

SAMBANDHA-VĀRTIKA

[1]

स्वाविद्याविभवप्रसूतविपुलद्वैतप्रपञ्चाहित-

स्पष्टभ्रान्तिरोहितात्ममतयो यं भागशो मन्वते ।

निर्भागं सकलाभिधानमननव्यापारदूरस्थितं

वन्दे नन्दितविश्वमव्ययमजं भक्त्या तमेकं विभुम् ॥ १ ॥

With devotion do I bow to that one who is imperishable, unborn, all-pervasive and partless, who stands far above the operations of all speech and thought, who makes the universe happy and whom they regard as being endowed with parts—they whose view of the Self is veiled by the potent delusion which is brought about by the expansive world of duality, generated by the power of nescience resident in themselves.

This is an invocation addressed to the supreme Reality which is eternal and without parts, and which transcends the reach of speech and mind. That Reality is of the nature of unexcellable bliss, and is the source of all happiness. It is one without a second. There are no divisions in it. The apparent differentiations are due to nescience (*avidyā*) which veils the real self and projects the non-real world. Nescience too has no locus apart from the non-dual self. Somehow it resides in the self and veils it, and weaves the variegated texture of the illusory world. Being blinded by this illusion, the ignorant imagine that the supreme is a whole-of-parts, and that it really creates the world.

Four preliminary matters (*anubandha-catuṣṭaya*) are to be settled before the commencement of any work. They are: (1) subject-matter (*viśaya*), (2) relation (*sambandha*), (3) fruit (*prayojana*), and (4) eligible

person (*adhikārin*). Here, in the invocation, these four are indicated. (1) The words 'that one who is all-pervasive' teach that the non-dual self is the subject-matter. (2) The relation is between this subject and Scripture which teaches it. (3) The words 'who makes the universe happy' show that the attainment of supreme happiness is the fruit. (4) And, the one who desires that happiness is the eligible person.

[2]

यां काण्वोपनिषच्छलेन सकलाम्नायार्थसंशोधिनीं

संचक्रुर्गुरवोऽनुवृत्तगुरवो वृत्तिं सतां शान्तये ।

अर्थाविष्करणं कुतार्किककृताशङ्कासमुच्छित्तये

तस्या न्यायसमाश्रितेन वचसा प्रक्रम्यते लेशतः ॥ २ ॥

The commentary explaining the sense of all scriptures which the preceptor¹ wrote for the satisfaction of the good people, following his preceptors, under the pretext of (explaining) the Kāṇvopaniṣad²—the exposition of its meaning in brief through words supported by reason is commenced for the purpose of removing the objections raised by pseudo-logicians.

The *Vārtika* on Śaṅkara's commentary on the *Bṛhadāraṇyakaopaniṣad* is commenced for refuting the arguments put forward by those who are opposed to non-dualism. Rājaśekhara says in his *Kāvyamīmāṃsā* that *Vārtika* is a work which examines what is said, what is not said and what is not well said in the original text.*

1. I. e. Śaṅkara.

2. The *Bṛhadāraṇyakaopaniṣad* forms part of the *Śatapatha-brāhmaṇa* (of the *Śūkla-yajur-veda*) which is in two recensions—

*The Haridas Sanskrit Series No. 14, Benares (1934), p. 21. *uktā-'nukta durukta-cintā vārtikam*.

Mādhyandina and *Kāṇva*. It covers the last five sections (*prapāṭhakas*) of the XIVth book of the *Śatapatha-brāhmaṇa* in the *Mādhyandina śākhā* and the whole of the XVIIth book in the *Kāṇva-śākhā*. Śaṅkara's commentary is on the *Kāṇva* recension of the Upaniṣad. Hence, it is referred to, here, as the *Kāṇvopaniṣad*. Śaṅkara calls it *Vājasaneyi-brāhmaṇopaniṣad*. One of the *Samhitās* of the *Śukla-yajurveda* is the *Vājasaneyi-samhitā*, which takes its name from Yājñavalkya Vājasaneya, the chief teacher of this Veda. Śaṅkara gives the same name to the *Brāhmaṇa* also.

NKL—*vedāntānām advaitaparatvam ayuktaṁ bhedālabhanapratyakṣādi-virodhādityādi śuṣka-tārkikottha-sambhāvanā-nirāso-’vāntara-phalam ityarthah.*

[3]

अत्र चोपनिषच्छब्दो ब्रह्मविद्यैकगोचरः ।

तत्रैव चास्य सद्भावादभिधार्थस्य तत्कुतः ॥ ३ ॥

And here the word *upaniṣad* has for its sense exclusively Brahman-knowledge, since in respect of that alone there is its express sense. Why is it so?

That release (*mukti*) is the fruit of the Upaniṣads is shown in this and the succeeding verses (i.e. vv. 3-10), by explaining the meaning of the title *Bṛhadāraṇyakopaniṣad*. First, the word *upaniṣad* is explained. The meaning of it is Brahman-knowledge; for that is the express sense of the word. The etymological meaning of the word is 'to sit (*sad*) down (*ni*) near (*upa*)'. It refers to the ancient practice of competent pupils sitting near their preceptors and listening to them. What was imparted at such 'sessions' came to be called *upaniṣad*.

[4]

उपोपसर्गः सामीप्ये तत्प्रतीचि समाप्यते ।

त्रिविधस्य सदर्थस्य निशब्दोऽपि विशेषणम् ॥ ४ ॥

The prefix *upa* means nearness; that, in effect, indicates the inner self; and the particle *ni* also is a qualification of the sense of *sad* which is threefold.

The prefix *upa* is used in the sense of nearness or proximity. It refers to what is immediate; and that is the self. The distinctions of 'in' and 'out' do not apply to the self. It is called 'inner' only in the sense that it is not remote or mediate.

The particle *ni* (meaning 'completely' or 'fully'), like *upa*, goes with *sad* which has, three senses, viz. destroying, leading to understanding, and terminating (*sad! viśaraṇa-gaty-avasādanēṣu*).

The next three verses interpret the meaning of the word *upaniṣad* in these three senses respectively.

[5]

उपनीयेममात्मानं ब्रह्मापास्तद्वयं यतः ।

निहन्त्यविद्यां तज्जं च तस्मादुपनिषद्भवेत् ॥ ५ ॥

Because by bringing this self near Brahman which transcends duality it destroys nescience and its product, it may be called *upaniṣad*.

The *upaniṣad* is so called because it makes known the non-duality of the self and Brahman, and *destroys* nescience along with its product, the world.

[6]

निहत्यानर्थमूलं स्वाविद्यां प्रत्यक्तया परम् ।

गमयत्यस्तसंभेदमतो वोपनिषद्भवेत् ॥ ६ ॥

Or, destroying one's own nescience which is the cause of evil, it makes known the supreme as the inner and indivisible (self). Hence it is called *upaniṣad*.

Because it *leads* to the knowledge of the identity of the inner self with Brahman, it is called *upaniṣad*.

[7]

प्रवृत्तिहेतून्निःशेषांस्तन्मूलोच्छेदकत्वतः ।

यतोऽवसादयेद्विद्या तस्मादुपनिषन्मता ॥ ७ ॥

Or, through the removal of their causes, knowledge puts an end to the conditions of activity without residue. Hence it is held to be *upaniṣad*.

Self-knowledge *causes the termination* of nescience and its brood, attachment, etc.; so, it is known as *upaniṣad*.

[8]

यथोक्तविद्याबोधित्वाद्ग्रन्थोऽपि तदभेदतः ।

भवेदुपनिषन्नामा लाङ्गलं जीवनं यथा ॥ ८ ॥

Because the text teaches the aforesaid knowledge and is non-different therefrom, it too has the name *upaniṣad* as the ploughshare is called livelihood.

It has been shown in the previous three verses that *upaniṣad* means *vidyā* (knowledge). Here it is stated that the books which teach *vidyā* are also called *upaniṣads*. An example from empirical usage is cited. The ploughshare is the *means* of livelihood, but is itself spoken of as livelihood. Similarly, the sacred books which serve as the means for Brahman-knowledge (*upaniṣad*) are themselves referred to as *upaniṣads*.

G. A. Jacob quotes this *vārtika* in his *A Second Handful of Popular Maxims*, under the heading ‘*lāṅgalaṁ jīvanam*.’*

* *Laukikanyāyāñjaliḥ*, Part II (Nirnayasagar Press, Bombay, 1909), p. 72.

[9]

अरण्याध्ययनाच्चैतदारण्यकमितीर्यते ।

बृहत्त्वाद्ग्रन्थतोऽर्थाच्च बृहदारण्यकं मतम् ॥ ९ ॥

It is called *āranyaka* because it was studied in the forests; since it is great, both in extent and sense, it is called *Brhadāranyaka*.

Here, the expressions *āranyaka* and *brhat* are explained. As the Upaniṣad was taught and studied in the forest-regions, it is called *āranyaka*. And, as it is great both in length and in meaning, it is *brhat*. *Brhat + āranyaka + upaniṣad = Brhadāranyakopaniṣad*.

[10]

इत्यादिनामव्युत्पत्तिच्छद्मना प्रकृतोचितम् ।

सर्वोपनिषदामाह मुक्तिमात्रं प्रयोजनम् ॥ १० ॥

Thus under the pretext of explaining the etymological meaning of the name, he (the commentator) has stated that the end of all *Upaniṣads* is release alone.

By explaining the meaning of the word '*upaniṣad*' it has been shown that the fruit of Brahman-knowledge is the removal of bondage with its cause, and the attainment of unexcellable happiness.

[11]

मिथोविरोधसिद्ध्यर्थं कर्मज्ञानाधिकारिणोः ।

संसारव्याविवृत्सुभ्य इत्युक्तिं भाष्यकृज्जगौ ॥ ११ ॥

In order to establish the mutual conflict between those who are eligible for action and those who are

eligible for knowledge, the commentator wrote the words 'for the sake of those who desire freedom from transmigration'.

After indicating the fruit of Vedānta-study, the question as to who is the eligible person for such study is taken up. Śaṅkara, the commentator, declares that the eligible persons are those who desire freedom from transmigration, viz. release, and not those who are attached to actions.

[12]

त्यक्ताशेषक्रियस्यैव संसारं प्रजिहासतः ।

जिज्ञासोरेव चैकात्म्यं त्रय्यन्तेष्वधिकारिता ॥ १२ ॥

He alone is eligible to study the Vedāntas¹ who has renounced all actions without residue, who desires to shake off transmigration and also to know the unity of the self².

It may be urged that the same person is eligible for ritual actions and Brahman-knowledge, even as is the case with *Agnihotra* and *Darśapūrṇamāsa* rites. But it is not so. Even among rituals all are not meant for all. E.g., *Bṛhaspatisava* and *Rājasūya* are enjoined on different persons. There is no rule, therefore, that the same persons should be eligible for following all that is taught in the Veda. The eligibility for Vedānta consist of discrimination between the eternal and the non-eternal, non-attachment to the enjoyments of this world and the next, possession of virtues like equanimity, self-control, etc., and desire for release. In short, those who want to get freedom from transmigration and realize the non-dual self are fit students for Vedānta-study.

1. *Trayī* is Veda ; *Trayyanta* is Vedānta. The plural indicates the texts of Vedānta.

2. *Aikātmya* is the truth that there is only one reality which is the self. We have rendered this word by employing such expressions as the unity of the self, the oneness of self, and the one self.

[13]

एतमेवेति च तथा प्रत्यग्याथात्म्यवित्तये ।

सर्वकर्मत्यजं प्राह श्रुतिर्विद्याधिकारिणम् ॥ १३ ॥

Scripture too says in the passage 'This only, etc.' that the one who is eligible for knowledge is he who has renounced all actions for the sake of knowing the real nature of the inner self.

The scriptural text declarative of the eligibility for Brahman-knowledge is cited here.

1. *BU*, IV, iv, 22: "Desiring this world (the Self) only, the renouncers renounce. Verily, because they knew this, the ancients did not desire offspring, saying: 'What shall we do with offspring, we whose is this self, this world?' They, verily, rising above the desire for sons and the desire for wealth and the desire for worlds, led the life of mendicancy."

[14]

प्रत्यग्विविदिषासिद्धयै वेदानुवचनादयः ।

ब्रह्मावाप्त्यै तु तत्त्याग ईप्सन्तीति श्रुतेर्बलात् ॥ १४ ॥

Reciting the Veda, etc. are for the sake of generating the desire to know the inner self; for attaining Brahman, however, they (action, etc.) are to be renounced, on the strength of the scriptural passage 'They desire' (*īpsanti*).

How, then, it may be asked, is the performance of sacred acts like reciting the Veda, etc. related to Brahman-knowledge? The answer is that such acts are helpful in generating in the mind of the *adhikārin* the desire to know Brahman. Cf. *BU*, IV, iv, 22: 'Such a one the Brāhmaṇas desire to know by reciting the Vedas, by sacrifice, by gifts, by penance, by fasting. By knowing that one, one becomes a sage.' For attaining Brahman, however, the renunciation of actions is the means. Here, the *Mādhyandina* version of that part of *BU*, IV, iv, 22, translated in note 1 to the previous verse, is quoted. See *Śatapatha-brāhmaṇa*, XIV, vi, 25: (ed. by A. Weber, 1855, p. 1090). *tam-etaṁ vedānuvacanena vividiṣanti, brahmacaryeṇa tapasā śraddhayā yajñenānāśakena caitameva viditvā munir bhavati; etam eva pravrajino lokam īpsantaḥ pravrajanti.* (*īpsantaḥ* of the *Mādhyandina-sākhā* is the same as *icchantaḥ* of the *Kāṇva-sākhā* meaning 'desiring'.)

[15]

उक्ताधिकारविषयप्रतिपत्त्यर्थमीरितम् ।

संसारहेत्विति वचः स्फुटन्यायोपबृंहितम् ॥ १५ ॥

For the purpose of knowing the aforesaid eligibility and content (which is to be explained), are stated the words 'the cause of transmigration, etc.' which are replete with clear reasonings.

After commenting on the eligibility for the Vedānta-study, the subject-matter is introduced here.

[16]

ऐकात्म्यविषयान्नान्यो वेदान्तवचसां यतः ।

लभ्यते विषयः कश्चित्तद्धीस्तस्मात्तमोपनुत् ॥ १६ ॥

Since the words of the Vedāntas have for content the one self, no other content results—the knowledge thereof, therefore, dispels the darkness (of ignorance).

The subject-matter or content of Vedānta is *aikātmya*, the oneness of self. The knowledge of that is what removes ignorance.

[17]

संसारकारणाविद्याध्वंसकृज्ज्ञानलब्धये ।

प्रारब्धेयं प्रयत्नेन वेदान्तोपनिषत्परा ॥ १७ ॥

In order to attain the knowledge which destroys nescience, the cause of transmigration, this work based on the Vedāntopaniṣad¹ has been commenced, with care.

The primal cause of transmigration is 'ignorance or nescience (*ajñāna*, *avidyā*). Merit (*dharma*) and demerit (*adharma*) are only intermediary causes. What dispels nescience is not mediate knowledge but the direct experience (*sākṣātkāra*) of the self. The aim of this work is to lead to that goal.

1. I. e. the *Bṛhadāraṇyakopaniṣad*.

[18]

प्रत्यग्याथात्म्यधीरेव प्रत्यगज्ञानहानिकृत् ।

सा चाऽऽत्मोत्पत्तितो नान्यद्धान्तध्वस्तावपेक्षते ॥ १८ ॥

Knowledge of the true nature of the inner self alone is the destroyer of the ignorance regarding the inner self. And, it requires nothing other than its own generation to destroy the darkness (of ignorance).

Self-knowledge is what is opposed to ignorance, and therefore what removes it. Apart from its rise, nothing else is required for the removal of ignorance. Action which is governed by ignorance cannot remove it.

NKL gives the following syllogism. The knowledge of self does not require action, because it is the knowledge of truth, like the knowledge of the reality of nacre. (*pratyag-dhīr na karmāpekṣā tattva-dhītvāt śukti-tattva-dhīvat.*)

[19]

साधनं चाधिकारी च कर्मविज्ञानकाण्डयोः ।

मिथो विरोधतः सिद्धावधुना तत्र चोद्यते ॥ १९ ॥

As it has been established that in the rites- and knowledge-sections, the means, eligible persons, etc. are mutually conflicting, now in respect thereof it is objected to (as follows).

Now it has been shown that the two sections of Scripture—ritual and knowledge—are different from each other in regard to the means they teach, and in regard to the eligibility for their study. They differ also as regards content and fruit. The Pūrvamīmāṃsaka, of course, will not accept this position. He opens his case in the next verse.

NKL—*sādhanaṁ phalaṁ ca adhikārī viśayaś cety arthaḥ.*

[20]

नन्वभ्युदयवन्मुक्तिं गृहीमो विधिलक्षणाम् ।

कार्यं विना नाधिकारी नापीज्याफलसङ्गमः ॥ २० ॥

“Now, let us admit that, like prosperity, release (too) is attained through injunctions (i. e. *karma*), for

without something to be done (*kārya*) there is no eligible person, nor the relation of sacrifice (i.e. means) and end.

An objection usually begins with a *nanu* (an inceptive particle implying doubt or objection). Here the Mīmāṃsaka begins to state his objection. Just as heaven, etc., which constitute prosperity (*abhyudaya*), are obtained through ritual acts, release (*mukti*) also is attained through action, because it is an end taught in Scripture. Thus, the eligibility is the same for both *karma-kāṇḍa* and *jñāna-kāṇḍa* (ritual- and knowledge-sections of the Veda).

NTV—nanu abhyudayavat mumukṣoḥ iṣyamāṇo mokṣaḥ sādhyāḥ siddhe prepsānupapatteḥ, ataś ca kriyaiva tatsādhanam, na jñānam, kriyāyā eva abhūta-prādurbhāva-phalatvāt, jñānasya pradīpavat siddhārthābhivṛtyakṛti-mātra-phalatvāt.

NKL—muktiḥ karma-sādhyā vaidika-phalatvāt, svargādivat.

ijyā-ṣabdo yāgavacano 'py atra sādhanamātra-gocaraḥ. Though the word 'ijya' means sacrifice, here it indicates 'means' in general.

[21]

लभ्यते लौकिकोऽपीह किमङ्गाऽऽगमसंश्रयः ।

विधिलक्षणसिद्धयर्थं सन्ति वाक्यानि च श्रुतौ ॥ २१ ॥

“Even what relates to the empirical world results (only through *kārya*); how much more what depends on Scripture? For establishing injunction as the means, there are texts in Scripture.

Here an argument *a fortiori* (*kaimutika-nyāya*) is advanced. Even in the world, without a knowledge of something to be done (*kārya*), there is no eligibility. It goes without saying, therefore, that this must be so with regard to sacred matters. Nor may it be said that there is no parity between what obtains in the world and

what is true of the Veda. In *PM*, I, iii, 10 (*Lokavedādhikaraṇa*) it is established that the words and their meanings are the same in the Veda and in empirical usage. It is not as if an uncommon set of words is used in the Veda. Hence there is parity.

The Mīmāṃsā view is as follows :—In texts like ‘One performs the *Agnihotra* as long as one lives,’ *life-long-ness* is enjoined, not as a property of the act, but as a property of the agent. The meaning is that the performance of the act is contingent upon the ‘being alive’ of the agent. Now, since the contingency is upon a constant factor, viz. being alive, the act is an obligatory one (*PM*, II, iv, 1-7. *Yāvaj-jīvādhikaraṇa*). Heaven is said to be the fruit of sacrifice. But sacrifice which is an act perishes as soon as it has been performed while heaven comes only later on at death. What, then, is the cause of heaven? In order to solve this problem, an unseen potency called *apūrva* or *kārya* is assumed. The sacrifice generates the *apūrva*, and this lasts till the fruit is gained (*PM*, II i, 5. *Apūrvādhikaraṇa*). It is the *kārya* that is the principal. Not only are substances, properties and preparations auxiliaries; actions, result and agent also are auxiliaries (*PM*, III, i, 3-6. *Bādaryadhi-karaṇa*.)

On the basis of the sections of the *Pūrvamīmāṃsā-sūtra* cited above, the Mīmāṃsaka urges that *mukti* results only through the performance of action, and that, therefore, it is what is to be accomplished (*kārya*).

[22]

कुर्वीत क्रतुमित्यादिर्विधिरभ्युदये यथा ।

उपासीतेति च तथा मुक्तावपि समीक्ष्यते ॥ २२ ॥

“Just as in respect of prosperity (*abhyudaya*) there is the injunction ‘Perform the rite,’ so in respect of release (*mukti*) there is seen (the injunction) ‘Meditate.’”

The objector now quotes Scripture in support of his view. There is no doubt regarding the existence in the Veda of the injunctions of ritual. They take the form 'Perform the rite'. Similarly, it is contended, there are injunctions regarding release, which are expressed in the form 'Do meditate'.

[23]

नाभ्युदयस्य मुक्तेश्च साध्यासाध्ये ध्रुवाध्रुवे ।

वैलक्षण्यान्न युक्त्यं तुल्यसाधनता तयोः ॥ २३ ॥

No. Prosperity and release, which are (respectively) what-is-to-be-accomplished and what-is-not accomplished, what-is-impermanent and what-is-permanent, are opposed to each other. Therefore, they cannot have the same means.

To the objection raised, the *siddhāntin* now replies. Prosperity and release are quite different ends. Prosperity is what-is-to-be-accomplished; release is the eternally-accomplished. The former is impermanent; the latter is permanent. Therefore, the same means cannot serve the two ends; nor can the eligibility be the same for both.

NTV—*anyathā svargādivat saṁsāra eva mokṣa iti prasajyeta*. Otherwise, like heaven, *saṁsāra* itself would have to be regarded as release.

[24]

अन्यच्छ्रेयोऽन्यदुतैव प्रेय-

स्ते उभे नानार्थे पुरुषं सिनीतः ।

तयोः श्रेय आददानस्य साधु

भवति हीयतेऽर्थाद्य उ प्रेयो वृणीते ॥ २४ ॥

‘The good is one thing, the pleasing is quite another. The two bind man to different ends. Of these, all is well with him who chooses the good; and he who weds the pleasing falls from the (supreme) end.’

A text of the *Kāṭhōpaniṣad* (ii, 1) is reproduced here. *Śreyas* is *mokṣa* that is eternal. *Preyas* is pleasure that perishes. They govern different men. He who lets himself to be governed by the former attains the final goal. And he who chooses the latter falls away from that goal. The means also are different. While *jñāna* is the means to *śreyas*, *karma* is the means to *preyas*.

[25]

परीक्ष्य लोकान्कर्मचितान्ब्राह्मणो

निर्वेदमायान्नास्त्यकृतः कृतेन ।

तद्विज्ञानार्थं स गुरुमेवाभिगच्छे-

त्समित्पाणिः श्रोत्रियं ब्रह्मनिष्ठम् ॥ २५ ॥

‘Examining the enjoyments acquired through deeds a Brāhmana becomes dissatisfied, since what is not accomplished (*akṛta*) is not attained through deeds. For a knowledge of that he should, verily, approach, with fuel in hand, a preceptor who is versed in Scripture and established in Brahman.’

This is a text from the *Muṇḍakōpaniṣad* (I, ii, 12). It declares that for him who has become non-attached to *samsāra* there is eligibility for *jñāna*. His non-attachment is the result of a realization of all that is finite. Whatever is accomplished in the world perishes. Nothing wrought through *karma* lasts for ever. He who realizes this truth turns away from *samsāra* and seeks the knowledge

of the non dual self which is eternal, immortal, fearless, immutable, unmoving and firm. In order to obtain that knowledge, he approaches a preceptor (*guru*) who is established in Brahman and learned in the *sāstras*.

[26 a]

नन्वभ्युदयवत्साध्या मुक्तिरप्राप्तरूपतः ।

“Now, like prosperity, release is to be accomplished, since it is of the nature of what has not been attained.”

Now, the objector argues that release is a thing-to-be-accomplished, for it has not yet been accomplished by us. So, he maintains that release is on a par with prosperity.

SP—vimatā muktiḥ sādhyā, aprāpta-rūpatvāt, svargavat.

Release, which is in dispute, is what-is-to-be-attained, because it is of the nature of the unattained, like heaven.

[26 b]

मैवं साध्याऽपि नो मुक्तिर्न त्वभ्युदयवद्यतः ॥ २६ ॥

Not thus. Even though release for us is what-is-to-be-accomplished, it is not so in the sense that prosperity is.

This is the reply to the above objection. Release is not what-is-to-be-accomplished in the sense in which prosperity is. It is imagined to be so on account of delusion. Therefore, it is not what-has-not-been-attained, or what-is-to-be-accomplished, in the principal sense. It is so, only in a figurative sense.

SP—bhrāntam aprāptirūpatvaṁ mukteḥ, na mukhya-sādhya-vāvaḥam. That release is the unattained is a delusion; it is not what-is-to-be-attained in the primary sense of the term.

NTV—dvividho hi loke prāpyaḥ, yathā gamanādinā grāmādiḥ, yathā ca jñānena kaṇṭhe cāmīkarādiḥ, pariharaṇīyaś ca dvividhaḥ, cikitsādinā rogādiḥ, yathā vā sthāṇvādi-jñānena corādiḥ.

There are two kinds of attainables in the world: (1) like a village, etc., which are to be reached by walking, etc., and (2) like the forgotten ornament round the neck which is to be attained through knowledge. Similarly, there are two kinds of remediables; (1) like disease, etc., which are to be remedied by proper treatment, and (2) like the imagined thief, etc., who are to be driven away by a knowledge of the post, etc.

[27]

स्वतोमुक्तान्तरायस्य तमसो विद्यया हतेः ।

तत्कैवल्यमतः साध्यमुपचारात्प्रचक्षते ॥ २७ ॥

Where, by knowledge, darkness (ignorance) which is an obstruction already removed is destroyed, there is perfection (*kaivalya*); it is figuratively spoken of as what is accomplished (*sādhya*).

Ignorance (*avidyā*) which is not real is removed by knowledge (*vidyā*). Release which is the eternal nature of the self is figuratively spoken of as what is to be attained through knowledge.

[28]

चिकित्सयेव संप्राप्य स्वास्थ्यं रोगार्दितस्य तु ।

आत्माविद्याहतेर्बोधात्तत्कैवल्यमवाप्यते ॥ २८ ॥

For one who is afflicted by disease there is attainment of one's native state (i.e., health) through medical treatment. When through knowledge the ignorance of self is destroyed, perfection is attained.

Here an illustration is offered. Health is one's natural state. Sometimes it gets obscured by disease. When, by proper treatment, the disease is removed, we say, one becomes whole. This is only a figure of speech.

NTV—nitya-suddha-mukta-buddha-svabhāvam brahmaiva mokṣaḥ tac-ca svāntarāya tamo-nivṛtyā prāpnotīty upacaryate.

Release is Brahman itself which is by nature eternal, pure, ever free and intelligent, and that is said to be attained, figuratively, when the obstacle to it, viz. the darkness of ignorance, is removed.

NKL—muktir asādhya ātmābhinnatvāt ātmavat.

[29]

ब्रह्म वा इदमित्यादिब्रह्मैवेति तथा श्रुतिः ।

सुषुप्तनरवच्छत्या बोध्योऽतोऽयं न कार्यते ॥ २९ ॥

'Brahman verily was this'¹ etc., 'Brahman alone'²: thus Scripture. Like the man who sleeps (is awakened) so one is made to know by Scripture and not made to act.

The Scriptural texts that declare the eternal nature of release are cited.

1. *BU*, I, iv, 10. 'Brahman, verily, was this in the beginning. It knew only itself thus: "I am Brahman." From it all this came into being.'

2. *BU*, IV, iv, 6, 'Being Brahman alone, he attains Brahman.'

These and other texts teach that Brahman is the eternally attained.

What Scripture has to do is only to awaken the individual to this truth, and not to make him do anything.

*NKL—yathā rājā supto bandi-prabhṛtibhis tattva-kathanena bodh-
yate, na kaṁcid anuṣṭhāpyate.*

[30]

किमत्र विधिना कार्यमनृतन्त्रत्वहेतुतः ।

श्रुतोऽप्यनर्थकोऽत्र स्याद्विध्यर्थासंभवत्वतः ॥ ३० ॥

What can be accomplished by injunction here, since (release) is not dependent on human effort? Injunctions that are declared in Scripture have no purport here, since the injunctive sense is impossible.

Jñāna cannot be the content of an injunction. Only *karma* can be enjoined. Deeds are dependent on the will of man. Not so is knowledge. Even if there are passages in Scripture relating to knowledge which appear to be in the form of injunctions, they are not to be understood as such. What can a razor's edge do against a rock? It will only get blunted. Even so, injunction cannot affect knowledge.

[31]

यच्चास्यासति कर्तव्ये नाधिकारो निरूप्यते ।

तदप्यशेषतश्चोद्यमूर्ध्वमुन्मूलयिष्यते ॥ ३१ ॥

As for what is stated, that in the absence of what is to be accomplished there is no eligibility, that objection too will be uprooted completely later on.

What was stated by the objector in v. 20 is recalled here, and the promise is made that it will be replied to later. See v. 228 *et seq.*

[32]

पर आहाऽऽत्मनः स्वास्थ्यं श्रेयो यद्यभिवाञ्छसि ।
कर्मभ्य एव तत्सिध्येच्छतत्वात्कर्मणः श्रुतौ ॥ ३२ ॥

Another says: "The natural state of the self which you desire as the good can result only from deeds; since deeds are taught in Scripture.

The objector now says: You hold that the remaining of the self in its own nature is the goal. Agreed. But that can be achieved only by performing the deeds enjoined in Scripture.

The combination of *mukti* and *karma* is on the maxim of *the lost horses and burnt chariot* (*naṣṭāśva-dagdharathavat*). Jacob explains the maxim thus: "This is based on the story of two men travelling in their respective chariots, and one of them losing his horses and the other having his chariot burnt, through the outbreak of fire in the village in which they were putting up for the night. The horses that were left were harnessed to the remaining chariot, and the two men pursued their journey together. Its teaching is—union for mutual advantage." *

[33]

श्रुतौ स्मृतौ च विहितं कर्मैव श्रूयते यतः ।
न च कर्मातिरेकेण मुक्त्यभ्युदयसाधनम् ॥ ३३ ॥

* *A Handful of Popular Maxims* (Nirnayasagar Press, Bombay, 1925), p. 31.

“Since in Scripture and in Traditional Code action alone is declared to be obligatory, there is no means other than action for release and prosperity.

Whether the end be prosperity or release, the means taught in Scripture is action.

[34]

यत्नतो न्यायतः किञ्चित्प्रश्यामो वेदचक्षुषा ।
निषेधविधिमात्रत्वाद्देदार्थस्येह सर्वतः ॥ ३४ ॥

“With care and through reasoning let us see with the eye of the Veda. Here, everywhere, the sense of the Veda is either prohibition or injunction alone.”

So far as the sphere of relative experience is concerned, it is clear that the purport of the Veda lies in injunctions and prohibitions. That is to say, it is taught in the Veda that *karma* alone is the means to the human goal. Release is a human goal, like heaven. Therefore, *karma* should be the means thereto.

NTV—etad uktam bhavati—niṣedha-vidhi-codanaiva sāstram pravartaka-nivartakāveva sāstrārthaḥ pravṛtti-nivṛtti-sādhyaṁ eva sāstra-prayojanam; vidhi-pada-rahitānām vākyānām apramāpakatvād ajñātārthaprameyābhāvāt pravṛtti-nivṛtti-sādhya-prayojanābhāvac ca pauruṣeya-vākyavat nirapekṣa-prāmāṇyābhāvāt na karmātirekeṇa mukty-abhyudaya-sāadhanam-iti.

This is what has been said: Scripture is only mandate, of the form of prohibition and prescription; the sense of Scripture is only what prompts and prevents; the fruit of Scripture is only what can be accomplished by activity and withdrawal.

[35]

ननु श्रुतौ पुरोक्तानि वाक्यानि बहुशो मया ।
अविधायित्वतस्तेषां न न्याय्यं भवतोदितम् ॥ ३५ ॥

Now, several texts of Scripture were cited by me above. Since they are non-injunctive, what you have stated is not reasonable.

The *siddhāntin* observes that, as he has already cited Scriptural texts which are non-injunctive in character, it is wrong to maintain that Scripture has purport only in injunctions and prohibitions.

[36]

आम्नायस्य क्रियार्थत्वाद्विधिनेति च सूत्रणात् ।
विधिशेषतया तेषामेकवाक्यत्वसंभवे ॥ ३६ ॥

“Syntactical unity for them is possible as subsidiary to injunction because of the aphorisms ‘Since Scripture has *kriyā* for purport’¹ ‘With injunction, etc.’².

The *pūrvapakṣin* replies that the non-injunctive texts have no independent purport, and that they should be construed with an injunction.

1. *PM*. I, ii, 1. ‘Since Scripture has action for purport, what are not for the sake of that are useless; in these, therefore, Scripture is declared to be non-eternal.’

2. *PM*, I, ii, 7. ‘Being construed with injunction, they would serve the purpose of eulogizing those injunctions.’

These two *sūtras* occur in the *Arthavādādhikaraṇa* (PM, I, ii, 1-18). The first one states the opponent's (i.e., he who is opposed to Mīmāṃsā) contention that eulogistic passages are useless, and that, therefore, to that extent the Veda would become unreliable. The other *sūtra* (I, ii, 7) gives the reply. The eulogistic (*arthavāda*) passages have no independent purport. They should be construed syntactically with the injunctions. Their duty, in fact, is to praise the injunctions.

For example, there is the following text in the Veda (*Taittirīya-saṁhitā*, II, i, 1) 'One desiring prosperity should sacrifice the animal *śveta* dedicated to Vāyu: Vāyu, verily, is the efteft deity: he leads the man to prosperity'. Here, the sentence 'Vāyu, verily, is the efteft deity' does not indicate any action. It has to be construed with the injunctive sentence 'One desiring prosperity should sacrifice, etc.'

Similarly, those texts of the *jñāna-kāṇḍa* which are themselves non-injunctive, says the *pūrvapakṣin*, acquire meaning only as construed with the injunctive texts. In other words, they have syntactical unity (*ekavākyatva*) with *vidhi-vākyas*.

NTV—*codanātirikta-vedavākyānām niṣpramāpakatvāt, nirviṣayatvāt, niṣprayojanatvācca aprāmāṇyam.*

The Vedic texts which are non-injunctive do not make known the truth, have no content, and are futile; hence, they are not authoritative.

NKL—*vimatā na svārthaparā vidhi-vikala-vedatvāt so'rodīd ity ādivat.....karmāpekṣita-kartrādi-prakāśanadvārā teṣām api vidhinai-kavākyatvam lāghavāt.*

[37]

वचसामक्रियार्थानां वाक्यभेदप्रकल्पना ।

गुर्वी स्यान्ननु कैवल्यं फलं नित्यमिहेष्यते ॥ ३७ ॥

“To assume sentence-split for sentences which do not have *kriyā* for purport would be prolix.”

Now, here, what is desired is perfection, the eternal truth.

Here, the statement of *pūrvapakṣa* continues upto the words *gurvī syāt* in the second line. The rest of that line states an objection raised by the *siddhāntin*.

Pūrvapakṣin.—There is no fruit in the sense of the Vedānta texts ; even as there is no fruit seen in the *artha-vāda*, ‘He wept (*arodīt*) ;—because he wept, *Rudra* came to be called *Rudra*.’ (*Traittirīyasamhitā*, I, v, 1). The sentence ‘He wept, etc.’ should be construed with the injunction ‘Silver shall not be given on the *barhīs*’. Otherwise there would be sentence-split (*vākyabheda*) and prolixity (*gaurava*). To separate the *arthavāda* text from the injunctive text would be wrong. Equally unjustifiable is it to assume a separate fruit for the *arthavāda* text.

Siddhāntin.—*Mokṣa* is the fruit of Vedānta, and that is eternal. If the Vedānta-texts were subsidiary to the injunctive texts *mokṣa* would become non-eternal. Therefore, *mokṣa* is not what is accomplished through action.

SP—*na sā (muktiḥ) karma-sādhyā nityatvād ātmavat*.

[38]

कथं नित्यं भवेत्तन्नो यदि स्यात्कर्मणः फलम् ।

कर्मोत्थं न यतः किञ्चिद्भुवं जगति वीक्ष्यते ॥ ३८ ॥

How can it be eternal, if it were the fruit of action ? Nothing that is given rise to by action is seen to be permanent in the world.

The *siddhāntin* continues : Whatever is accomplished through action perishes. *Mokṣa* is eternal. Therefore, it cannot be the fruit of action.

[39]

तत्साधनेन चावश्यं भवितव्यमतो भवेत् ।

पारिशेष्यादिह ज्ञानं वेदान्ते तत्प्रसिद्धितः ॥ ३९ ॥

That (release) should result necessarily through some means. Hence, by elimination, knowledge becomes here (the means). This is well known in the Vedānta.

If action is not the means to *mokṣa*, what is the means ? By a process of elimination it is settled that knowledge is the means. *Pāriśeṣya-nyāya* is the principle of residues.

[40]

नैवं क्रियाभ्य एवास्या मुक्तेः सिद्धत्वहेतुतः ।

कुतः क्रियाभ्यः सिद्धिश्चेच्छृणु तद्गण्यते यतः ॥ ४० ॥

“ Not thus ; for the reason that release results from rites alone. If it be asked, how does it result from rites ?, listen, how it is so is explained.

The *pūrvapakṣin* contends that the principle of residues does not apply here, as, in his view, *mokṣa* is accomplished through action. He proceeds to explain how this is so.

[41-42]

निषिद्धकाम्ययोस्त्यागात्कर्मणोर्नित्यकर्मणः ।

करणात्प्रत्यवायस्य हतेर्भोगेन च क्षयात् ॥ ४१ ॥

शरीरास्मकस्यैवं मुक्तिः सिद्धाऽन्तरात्मनः ।

विनाऽप्यैकान्त्यसंबोधात्कर्मणैवोक्तवर्त्मना ॥ ४२ ॥

“By giving up prohibited and optional rites and by performing the obligatory rites, the sin of non-performance being removed and the *karma* responsible for generating (a fresh) body being destroyed through experiencing: when thus release for the inner self results, (it must be admitted that) even without the knowledge of the one self, action alone is the means to release in the aforesaid manner.”

This is the recipe for *mokṣa* : your present body is the result of the accumulated *karma* of your past. If you desire *mokṣa*, all that you need accomplish is that when your present body falls, there should be no more embodiment for you. The causes of embodiment (i.e. birth) are merit (*punya*) and demerit (*pāpa*). If you succeed in avoiding both till the time of death, thereafter you will not be born. How to avoid merit and demerit? By not performing prohibited (*niṣiddha*) acts, you avoid demerit. By not resorting to optional rites (*kāmya-karma*), you do not gather merit. Obligatory duties (*nitya-karma*) you should perform, because their non-performance will bring in demerit, while their performance does not lead to any fresh merit. The *karma* that is responsible for the present body, however, perishes when it has been experienced. Thus when the present body falls, there will be no cause for seizing another body. And that is *mokṣa*. When it is attained through *karma*, where is the need for *jñāna*?

NKL—mokṣārthī na pravarteta tatra kāmyaṇiṣiddhayoḥ, nitya-naimittike kuryāt pratyavāya-jihāsayā-iti nyāyena uktam upapādayati niṣiddheti.

[43]

ननु चाऽऽत्मावबोधस्य निचाय्येति फलं श्रुतम् ।

ब्रह्म वेदेति च तथा नैवं तस्यार्थवादतः ॥ ४३ ॥

Now, that release is the fruit of self-knowledge is declared by Scripture in 'Having realized (him, one is released from the mouth of death),'¹ as also in 'He who knows Brahman (becomes Brahman)'.²

"Not thus; since they are eulogies."

Siddhāntin : In spite of what you have said, *karma* cannot be the means to *mokṣa*; for Scripture expressly declares that knowledge is the means.

1. *KU*, I, iii, 15. 'Devoid of sound, of touch, of form, without decay, and likewise devoid of taste, eternal, and devoid of odour, beginningless, endless, superior to the Great (*Mahat*) and firm: having realized him, one is released from the mouth of death.'

2. *MU*, III, ii, 9. 'He, verily, who knows that supreme Brahman, becomes Brahman itself. In his family there will be born no one who does not know Brahman. Sorrow he crosses; sin he crosses: Liberated from the knots of the cavity (of the heart), he becomes immortal.'

Pūrvapakṣin : The Scriptural texts you have quoted are eulogies (*arthavāda*).

[44]

फलोत्तेरर्थवादत्वं द्रव्यसंस्कारकर्मसु ।

सर्वत्र दर्शनाच्छास्त्रे पर्णमय्यां फलोक्तिवत् ॥ ४४ ॥

“In Scripture everywhere it is seen that the declaration of fruit in respect of material and purificatory rites is eulogistic, as in the case of the declaration of fruit for (the sacrificial ladle) made of *parṇa*-wood.

Admitting that there are texts in Scripture declaring *jñāna* to be the means to *mokṣa*, the *pūrvapakṣin* maintains that these texts are eulogistic and, therefore, have no purport of their own. *PM*, IV, iii, i, declares: “The mention of fruit in connection with ‘material’, ‘purification’, and ‘acts’ should be regarded as eulogistic, because they are for the sake of another (action).” There is the text, for example, which says: ‘He whose sacrificial ladle is made of *pārṇa*-wood does not hear any evil of himself.’ Here the text does not enjoin the non-hearing of evil as an actual result. It is only a praise of the ladle made of *parṇa*-wood which is subservient to the act of offering. Similarly, the declaration of fruit in the texts relating to self-knowledge is an eulogy.

[45]

आत्मनःकर्मशेषत्वात्तद्वियः कर्मशेषता ।

विधिं त्वयाऽनिच्छताऽपि ह्यभ्युपेयाऽर्थवादता ॥ ४५ ॥

“Since the self is subsidiary to action, the knowledge of that is subsidiary to action. Though injunction is not accepted by you (in Vedānta), the eulogistic character (of Vedānta texts) must be admitted (by you).”

The *pūrvapakṣin* continues: Just as *parṇa*-hood helps the sacrifice by offering its material to the ladle, even knowledge helps the same by way of purifying the agent. Therefore, the mention of fruit in the texts about self-knowledge is an eulogy. Even though knowledge may not be enjoined, it becomes subsidiary to injunction by purifying the agent.

NKL—karmāṅga-saṁskāratayā jñānasya kriyā-śeṣatvam ity arthah.

AVS—etad uktam bhavati ātma-jñānasya ātma-saṁskāratvāt ātmanas ca kriyā-śeṣatvāt, tad-dvāreṇa taj-jñānasya kriyā-śeṣatvopapatteḥ phala-sravaṇam avivakṣitam iti.

[46]

नैवं तद्धेतुतद्रूपविरोधादितरेतरम् ।

मुक्त्यभ्युदययोस्तस्मान्न सम्यग्भवतोदितम् ॥ ४६ ॥

Not thus. Since release and prosperity are opposed to each other as regards means and nature, what was stated by you is not sound.

The *siddhāntin* replies: Action cannot be the means to release, even though it may lead to prosperity. Discrimination (*viveka*) is the means to release; non-discrimination or nescience (*aviveka*) is the basis of prosperity. Permanence or eternity (*dhruvatva*) is the nature of release; transitoriness (*adhruvatva*) is the characteristic feature of prosperity. Since prosperity and release are so divergent, the same means cannot serve both ends.

NKL—kaivalyam karmaphalam ity etad dūṣayati—ne'ti. tayoḥ hetu, taddhetu, rāga-vairāgya-pūrvakau tayo rūpe bandha-tad-dhvaṁ-sātmake tayo virodhān mukty-abhyudayayor eka-puruṣāsaṁbandhaḥ.

[47]

स्वरूपेऽवस्थितिर्मुक्तिरात्मनो भवतोच्यते ।

काम्यादिवर्जनादिभ्यस्तस्याः सिद्धिश्च वर्ण्यते ॥ ४७ ॥

You say that the resting of the self in its own nature is release ; and you explain that it is attained through giving up optional rites, etc.

The *siddhāntin* recalls here what was stated by the *pūrvapakṣin* in v. 32. Admitting that the resting of the self in its own nature is release, it was urged that this is achieved through the performance of Scripture-ordained acts.

[48-49]

तत्राऽऽत्मा किं स्वरूपे प्राङ्मन स्थितो येन तत्स्थितौ ।

हेतुं व्यपेक्षते यत्नात्स्वरूपं हि न तद्भवेत् ॥ ४८ ॥

स्वतोऽनवस्थितो यत्र हेतुना स्थाप्यते बलात् ।

अथावस्थित एवायं किमर्थं हेतुमार्गणम् ॥ ४९ ॥

Does the self not rest in its nature previously, that in order to rest therein it depends on a means through effort ? But, then, that cannot be its nature wherein it has to be made to rest forcibly through means, as it does not rest of itself. If it rests, then for what purpose is the search for means ?

Here the *pūrvapakṣin* is asked: Prior to the performance of actions, does the self rest in itself or not ? If the latter, then 'resting-in-itself' cannot be the nature of the self, for it is adventitious, being dependent on an external means. If the former, then, where is the need for the performance of actions ? Surely, no one wants to go to a village which has already been reached.

कैवल्येऽपि च तत्सत्तेरनिर्मोक्षः प्रसज्यते ।

अतो निषिद्धकाम्यादिवर्जनान्नाऽऽत्ममुक्तता ॥ ५० ॥

If even in release there be attachment thereto (rites) there is the contingency of non-release. Therefore, by giving up prohibited and optional rites, there is no release for the self.

If it be said that the performance of actions is natural to the self, then, there would be no difference between bondage and release.

विषयाभ्यासजास्वास्थ्यनुत्त्यर्थमिति चेन्मतम् ।

स तु विषयसंपर्कः कस्माद्भवति कारणात् ॥ ५१ ॥

If it be thought that it (the prescription of rites, etc.) is for the sake of resolving the non-abidance in the self brought about by repeated contacts with the objects, due to what cause does that contact with objects come about?

The *pūrvapakṣin* may say: 'I admit that the performance of actions is not natural to the self. Nor is it required to make the self remain in itself. Yet I maintain that it is necessary for removing the sin that has been generated in the self by repeated contact with the objects of sense.'

Now, if that be so, he should be asked: 'What brings about contact with sense-objects?'

NTV—*paramārthato 'saṁgasyā 'tmano viṣayādinā tat-kāraṇena vā kenāpi saṁbandhānupapatteḥ na tan-nivartanena karmaṇām mokṣa-sāadhanayogyatā syāt.*

In truth, the self is unattached, and there can be for it by no means any relation either to the objects, etc., or to their cause. And so, actions cannot be the means to *mokṣa* for the purpose of removing them (viz. the objects and their cause).

[52]

अकस्माद्भवतः सत्तेर्मुक्तावप्यनिषेधतः ।

अनिर्मोक्षप्रसक्तिर्वस्तथा सति समापतेत् ॥ ५२ ॥

If, according to you, such contact is accidental, then, since it cannot be prevented even in release, there is for you the contingency of non-release.

If contact with sense-objects is accidental, i.e. if it be without a cause, then, it may occur even in *mokṣa*, with the result that there would be no *mokṣa*.

[53]

धर्माधर्मनिमित्तश्चेत्किं पुनर्धर्मपातके ।

अप्यसङ्गस्वभावस्य संपर्कं कुरुतो बलात् ॥ ५३ ॥

If the cause be merit and demerit, do merit and demerit occasion contact by force for what is by nature unattached ?

It may be held that merit (*dharma*) and demerit (*adharma*) are the cause of the contact. In that case, two alternatives are possible :

(A) that merit and demerit establish contact with the objects for the self that is unattached ; and

(B) that the self for which contact is established is not unattached.

Here, the first alternative (A) is mentioned.

NTV—nityāsaṅgacinmātrasyā 'tmana ukta-saṁparko nopapadyate.

For the self which is eternal, unattached pure consciousness, the aforesaid relation (to the objects, etc.) is not possible.

avidyaiva akhaṇḍānanda-caitanyasya asaṅgasyā 'tmanoḥ ukta-saṁparkam karoti.....tan-nivṛttaye jñānamevaiṣitavyam, na karma.

For the self which is impartite bliss and consciousness and is unattached, nescience alone brings about the said relation; for removing that, knowledge alone is to be sought for, not action.

[54-55]

भल्लातकाङ्कवद्वस्त्रे न हि लोके स्फुरन्नपि ।

कुशलोऽपि कुलालः सन्नघटादिस्वभावकम् ॥ ५४ ॥

मृद्वव्योम घटी कुर्यान्मरुद्वाऽग्नेश्च शीतताम् ।

आत्मा कर्त्रादिरूपश्चेन्मा काङ्क्षीस्तर्हि मुक्तताम् ॥ ५५ ॥

Just as the marking-nut makes the cloth bear marks, not thus can merit and demerit produce contact for the self.¹ A potter, even though able-bodied and skilled, cannot make a pot out of ether which is not of the nature of pot, etc; nor can wind produce coolness in fire.²

If the self be of the nature of agent, etc.,³ then do not hope for release.

The alternative (A) is not sound.

1. This is a contrary example. A piece of cloth may be stained, but not the self.

2. These two are similar instances: ether cannot serve as the material of pot; fire cannot be made cool by a blowing wind.

3. This is the second alternative (B). Here, again, there are minor distinctions.

i. Is the self of the nature of effects (*kārya*) such as agent, etc.? Or,

ii. is it of the nature of the potency (*śakti*) of being agent, etc.?

And, as regards the first of these :

(a) Is there release for the self on the destruction of the effects, agency, etc.? Or,

(b) is there release even when there is not that destruction?

The first, i (a), is not possible.

[56]

न हि स्वभावो भावानां व्यावर्त्येतौष्ण्यवद्रवेः ।

स्वभावाद्धिनिवृत्तोऽर्थो निःस्वभावः खपुष्पवत् ॥ ५६ ॥

Not, indeed, can the nature of things be changed, as the heat of the sun. A thing which has lost its nature is void of reality like the sky-flower.

Here, the reason for the impossibility of i (a) is given.

A thing cannot change its essence. If it should change, it will cease to be itself. Gauḍapāda says (*GK*, iv, 29) :

prakṛter anyathābhāvo na kathaṅcid bhaviṣyati.

[57]

नाविनश्यन्यतो वह्निर्व्यावर्त्येतौष्ण्यतः क्वचित् ।

न च कर्त्ताद्यनिर्मुक्तौ मुक्तिः संभाव्यतेऽन्यतः ॥ ५७ ॥

Fire which has not been destroyed does not lessen its heat at any time.

For if the self be not freed from agency, etc., will release be possible by any other means?

Here, the unsoundness of i (b) is shown.

ननु कर्तृत्वभोक्तृत्वकार्यमेवाऽऽत्मसंसृतिः ।

न तु तच्छक्तिरित्येवं शक्तिमात्रतया स्थितौ ॥ ५८ ॥

सर्वानर्थविनिर्मुक्तेरुपपन्नाऽऽत्ममुक्तता ।

“ Now the effect consisting in agency and enjoyer-ship, is alone the transmigration of the self, and not the potency thereof. Thus when the potency alone remains, and all evil is removed, the release of self is intelligible.”

Here, the *pūrvapakṣin* accepts the alternative ii, and argues: The self is of the nature of the potency of being agent, etc. But what constitute *saṁsāra* actually are the effects, such as agency, enjoyership, etc., and not their potency. So, when the effects are destroyed, there is release, even though their potency may persist.

AVS—karṭṛ-śakti-kāryasya anarthatvāt tasya ca muktāḥ abhāvāt śaktes ca anarthatvābhāvāt, tad-bhāve 'pi mokṣaḥ syād eva ity arthaḥ.

[59b]

मैवं भेदे तथाऽभेदे दोषः स्याच्छक्तिकार्ययोः ॥ ५९ ॥

Not thus; whether potency and its effect be different or non-different, there will be the (aforesaid) defect.

The *siddhāntin* rejects the alternative. Whether potency be identical with its effects or different from them, there would result non-release for the soul.

NTV—śakti-tatkāryayor bhede.....ityaṁ śaktir idaṁ ca kāryam iti vyavasthā na syāt, tilebhya eva tailam payasa eva dadhītivat karṭṛtva-śakter eva kriyā bhokṭṛtva-śakter eva bhoga iti ca vyavasthā na syāt.

Were potency and its effect different, then, one cannot say 'this is potency, and this is its effect.' Just as we say 'from the sesamum seeds, oil; from milk, curds,' we cannot say that action comes from the potency of agency alone, and enjoyment from the potency of enjoyership alone.

[60]

शक्तित्कार्ययोर्यस्माद्व्यतिरेको न विद्यते ।

नियमासंभवः प्रापव्यतिरेकस्तयोर्यदि ॥ ६० ॥

For there is no difference between potency and its effect. If there be difference between them, invariable relation (of cause and effect as between them) would be impossible.

There can be no difference between potency and its effect. If there is difference, potency cannot be the cause of its effect. Indeed, as between differentials like cow and horse, there is no causal relation.

AVS—ayam arthaḥ. śakti-śakyayor vyatirekāyogāt, vyatirekas tāvan nāsti, yadi kathamcid vyatirekaḥ syāt, tadā mṛda eva ghaṭaḥ kṣīrād eva dadhī 'ti niyamo na siddhyet, sarvataḥ sarvaṁ sambhavet.

[61]

कार्यकारणता न स्यात्स्वतो भेदेन सिद्धयोः ।

अभेदे च तयोरैक्यात्कार्यकारणता कुतः ॥ ६१ ॥

If they are established to be different by nature, there would not be the relation of cause and effect. And if they are non-different, they would be identical; whence, then, the relation of cause and effect?

Whether it is held that potency and its effect are different, or that they are identical, there is difficulty because either way the two cannot be related as cause and effect.

[62-64]

नाकुर्वत्कारणं दृष्टं कार्यं चाक्रियमाणकम् ।

अथाभेदस्तयोरिष्टः कार्यध्वस्तौ प्रसज्यते ॥ ६२ ॥

तच्छक्तेरपि विध्वंसस्तयोरव्यतिरेकतः ।

शक्तिस्वरूपहाने च शक्तिमद्रूपनिहुतिः ॥ ६३ ॥

तयोरव्यतिरेकत्वात्स एवाऽऽयात्यनीप्सितः ।

निरात्मवादः पूर्वोक्तस्तस्मान्नैवं प्रकल्पयेत् ॥ ६४ ॥

No cause is seen that is unproductive; nor an effect that is not produced. If non-difference between the two is what is accepted, then, on the destruction of the effect, there is the contingency of destruction for its potency too, for they are non-different. When the nature of potency is destroyed, the nature of the potent also is destroyed, because they are non-distinct. The same aforesaid view of no-self is brought in, even without our desire. Hence not thus should it be objected.

On the view that potency and its effect are non-different, defect is shown here. If the effect is included in potency, then, so long as the latter lasts, the former cannot be destroyed. In other words, agency, etc., will be constantly there for the self. So, there will be no release for it.

AVS—*abhede idaṁ kurvad idaṁ kriyamāṇam iti vibhāgasya kartum asakyatvāt, akurvata eva kāraṇatvam akriyamāṇasyaiva kāryatvam prāpnoti tad ubhayaṁ drṣṭa-virodhī 'ti.*

[65]

मतं कार्यानभिव्यक्तिर्निमित्तासंभवाद्यदि ।

शक्तेरिति न तद्युक्तं शक्तितद्देतुसंभवात् ॥ ६५ ॥

If it be your view that release is the non-manifestation of the effect of the potency, since the cause is impossible, that does not stand to reason, as potency, and the cause (dharma, etc.) are there.

Pūrvapakṣin—It is not the destruction of either the effect or its potency that is release. Release is the non-manifestation of the effect of the potency. It cannot be said that, then, release would be the same as deep sleep. In sleep there is the cause of renewed manifestation, viz. *adrṣṭa*, etc., whereas in release there is no such cause.

Siddhāntin—What you have stated is wrong. The cause of *samsāra* is potency or some excellence present in it. What produce its effect are merit (*dharma*), etc. Since they are present, even in release there is the contingency of the manifestation of the effect.

NTV—*yady api kāryānabhivṛtyakṛtiḥ muktau sambhavati, tathāpi mukty-avasthāyām kartṛtva-śakter ātmano nityādyananuṣṭhāna-janya-pāpmanah kāmya-pratiṣiddhānuṣṭhāna-janya-puṇya-pāpayoś ca bhāvāt punar dehāntara-prāptyādi sambhavāt, viśayābhyāsajāsvāsthyanuttīlakṣaṇo mokṣo na sambhavatīti pariharati na tad yuktam ityādinā.*

[66]

शक्तिरूपेण संबन्धो निमित्तानामपीष्यते ।

नैमित्तिकैरिति ततो बह्वयौष्यादिसमानता ॥ ६६ ॥

The relation of causes with what are occasioned is through the form of potency. Hence there is parity with fire-heat, etc.

Causes are related to effects through potency. So, if potency is there, the effect must be there. E.g. if there is fire, there must be heat. The fire-heat example was given in v. 57.

[67]

कार्यस्य शक्तितन्त्रत्वे सर्वदा कारणस्थितेः ।

कार्योत्पत्तिः सदैव स्यान्निदाघे घर्मवद्यतः ॥ ६७ ॥

If the effect is dependent on potency, then, as the cause is always existent, the origination of the effect would always be there, like heat in summer.

Does the effect consisting of agency, etc., depend on the entire cause? Or, does it not? If the first alternative is accepted, then, potency is the entire cause, and since it is present in release the effect too must be present.

[68-69]

तथैव शक्त्यतन्त्रत्वेऽप्येष दोषो यतो भवेत् ।

सदा कार्यं न जायेत कारणासंभवात्सदा ॥ ६८ ॥

निदाघे शीतवद्यस्मादतोऽसम्यगिदं वचः ।

निष्कारणस्य चोद्भूतौ कार्यजन्म सदा भवेत् ॥ ६९ ॥

Likewise, even if it be independent of potency, the same defect there would be. The effect would never arise, since always the cause is not, as cold (does not arise) in summer. Therefore these words (of yours) are not sound. If what has no cause is generated, then, there would be the generation of effect always.

If the effect is not dependent on the entire cause, then, it would never arise. Or, if it arises even without a cause, it would be there always.

NKL—tasmād ajñānam eva viśayasāṃparka-kāraṇam tac ca jñāna-mātro 'panodyam iti bhāvaḥ.

[70-71]

कार्यता वा कुतोऽस्य स्यान्न चेत्कारणतन्त्रता ।

न च शक्यं प्रतिज्ञातुं जन्माऽऽरभ्याऽऽमृतेर्नृभिः ॥ ७० ॥

निषिद्धकाम्यकर्मादिवर्जनं निपुणैरपि ।

सूक्ष्मापराधसंदृष्टेरतियत्नवतामपि ॥ ७१ ॥

And how could there be effectness for it, if it be not dependent on a cause? Even by the skilled men it is not possible to resolve to renounce prohibited and optional rites, etc., beginning from birth until death; for even in the case of the most diligent, subtle mistakes are seen.

If agency, etc., were independent, they would not be effects; if so, they would always be there.

The Mīmāṃsaka said that, in order to attain *mokṣa*, one must give up optional rites and prohibited actions. But, is it possible for anyone to do so throughout one's life from birth to death? Even the best of persons cannot conform to this rule.

NTV—asaty ātmaviññānena karmaghasmare sarvātmanā kāmya-pratiśiddhāni na kenacit parihartum śakyante, rāga-dveṣa-lobhādinām doṣāṇām anivṛtteḥ.

[72]

संशयस्तु भवत्येव पक्षासिद्धिस्तु तावता ।

अथ चेन्मोक्ष्यते सोऽत्र यस्य संपत्स्यते तथा ॥ ७२ ॥

The doubt at least is there, and so your view is not established (*pakṣāsiddhi*).

‘He, for whom this is realized in full, is released’, if thus it be said (we reply):

At any rate, the doubt as to the possibility of acting according to the Mīmāṃsaka prescription is there. If it were a small matter, then even if there be doubt, one may act. But *mokṣa* is not a small matter; nor the prescription of the means. So, no one would undertake to follow the way shown by the Mīmāṃsaka.

The *pūrvapakṣin* still persists in saying: “He who acts according to my prescription does surely attain *mokṣa*.”

[73]

त्वदुक्तं नैतदेवं स्यादवक्तव्यत्वहेतुतः ।

निश्चितं साधनं वाच्यं ज्ञानं निःश्रेयसं प्रति ॥ ७३ ॥

What is stated by you cannot be so, for the reason that it cannot be explained. In respect of release an ascertained means should be stated, viz. knowledge.

Siddhāntin's reply: A doubtful means is not adequate to establish its end. That which is doubtful cannot be determinate. If it were such operations as agriculture, etc., one may be active even though one may not be sure of the yield. Not so in the case of *mokṣa*. You profess to teach the means to *mokṣa*. But that means should be such that it has been ascertained to be the means.

[74]

न तु यादृच्छिकी सिद्धिर्वक्तव्येह विपश्चिता ।

दैवगोचर एवैष न तु मानुषगोचरः ॥ ७४ ॥

Not by the one who is wise will it be held that accomplishment is accidental. This is the sphere of destiny, and not the sphere of man.

No one who is intelligent would adopt a hit-or-miss method for achieving a goal. The hit-or-miss process is a gamble with destiny.

[75]

सहकत्री भवेच्छक्तिरिति न्यायाद्भवेद्यदि ।

मनुष्यगोचरोऽपीति नाऽऽख्यातासंभवात्तथा ॥ ७५ ॥

If it be stated that it also is the sphere of man on the rule that 'potency becomes helpful (to the verbs)', no, because there is no such verb.

Nor may it be said that this is within the sphere of man also (i.e. that human effort also is required) on the rule that potency or ability is helpful to injunction.

The rule is mentioned in the Mīmāṃsā works in connection with the topic of injunction of eligibility (*adhikāra-vidhi*). The rule runs thus: "For verbs, which express a meaning, power is an auxiliary." Here the meaning is: an injunction applies only to him who has the ability to perform the act enjoined. This is a commonsense rule. For instance, the Vedic injunctions, which require, on the part of the agent, the use of his eyes, tongue and ears, are not applicable to the blind, the dumb and the deaf.

This rule, says the *siddhāntin*, does not apply in the present case. Where there is an injunctive verb, there the ability of the agent is helpful. But nowhere in the Veda is there the injunction that he who desires *mokṣa* should give up optional rites, etc.

[For an explanation of the rule, see G. A. Jacob, *A Third Handful of Popular Maxims*, pp. 21-22; also *Arthasaṃgraha*, section on 'Adhikāra-vidhi', Śābara-bhāṣya on *PM*, I, iv, 30, and *Tantravārtika*, II, ii, 27. The present verse is quoted by Jacob as an illustration.]

[76]

मुक्त्यर्थी न हि काम्यादि वर्जयेदिति चोदना ।

अस्ति वेदे कचिद्येन शक्तेर्विध्येकदेशता ॥ ७६ ॥

There is no injunction anywhere in the Veda that he who desires release should leave off optional rites, etc., in which case there would be for potency the nature of being part-content of the injunction.

What was stated above is explained. There is no Vedic injunction that he who desires *mokṣa* should leave off optional rites, etc.

[77]

काम्यादिवर्जनं त्वेतत्स्वमतिप्रभवं यतः ।

नातः शक्तेस्तदंशत्वं कथंचिदपि युज्यते ॥ ७७ ॥

Since the saying about the leaving off of optional rites, etc., has its source in your imagination, it is not proper to say that for potency there is the nature of being part thereof (i.e. of the injunction).

Nor may the following statement be quoted by the *pūrvapakṣin* :

“Let the one who desires *mokṣa* turn away from optional rites and prohibited actions; let him perform the obligatory and occasioned rites in order to avoid sin.”*

**mokṣārthī na pravarteta tatra kāmya-niṣiddhayoḥ nitya-naimittike kuryāt pratyavāya-jihāsayā.*

This statement is not supported by Scripture.

If the view of the *pūrvapakṣin* is born out of his own brain, it carries no authority for us.

[78]

नित्यादिकरणान्नापि काम्यादेश्चापि वर्जनात् ।

श्रेयः संभाव्यते विद्यानिष्फलत्वप्रसङ्गतः ॥ ७८ ॥

Not from the performance of obligatory rites, nor from leaving off optional rites, is release (*śreyas*) possible ; since there is the contingency of the futility of knowledge (*vidyā*).

The *pūrvapakṣin* may say: "I have already quoted a *smṛti* passage in support of my view ; and we have to presume a *śruti* text as the basis of the *smṛti* passage."*

The *siddhāntin* replies: "What you say is not sound. The *śruti* expressly declares that *mokṣa* is through *jñāna*. With that declaration your view is in conflict."

NKL—*kāmyādi-varjanam abhyupagamyā na tataḥ kaivalya-siddhir ity āha nityād iti.*

[79]

काम्यात्स्वर्गादिकं मा भूदक्रियायां तदुद्भवम् ।

अर्थान्तरात्स्वभावाद्वा भवन्न तु निवार्यते ॥ ७९ ॥

From the optional rites let there not be heaven, etc., and from prohibited rites what is generated thereby (viz., hell). But nothing could prevent their coming into being either through some other means or of their own accord.

* *ācārāc ca smṛtiṁ jñātvā smṛteś ca śruti-kalpanam iti nyāyāt.*

Let there be, somehow, the giving up of optional rites, etc. Even then that cannot serve as the means to *mokṣa*.

Heaven, etc., and the body that is adequate for their enjoyment may not come to one, because one has given up the optional rites. Similarly, hell and the body appropriate to it may not result to one, because one has not done the prohibited deeds.

Even, then, there is no *mokṣa*. For, heaven, etc., may come to one through some other means.

[80]

अन्यतो भवने मानं न चेदस्त्वह संशयः ।

एतावताऽपि पक्षस्ते प्रतिबद्धो न सिध्यति ॥ ८० ॥

If it be said that there is no evidence in the matter of their resulting from other causes, (we reply) there may be doubt in regard thereto. And so your view is not established, it being obstructed.

Pūrvapakṣin—To one who has followed the way I have shown, there is no evidence that heaven, etc., come through some other means.

Siddhāntin—Even granting that there is no evidence, the possibility that they may come is still there.

[81]

अथैतयोरिति तथा चोदनार्थातिलङ्घिनाम् ।

सुखदुःखादिसंदृष्टेर्न चाप्यस्तीह संशयः ॥ ८१ ॥

Since those who transgress the sense of injunction are declared to be related to pleasure and pain in the

words “ But on neither of these ways ”¹, etc., there is not the said doubt here.

There is no doubt, whatsoever, that those who follow the way of works have to be re-born. Scripture speaks of three alternatives. Those who perform ritual go by the Southern Path. Those who combine ritual with knowledge go by the Northern Path. A third place—the status of low creatures—is indicated for those who transgress injunctions and prohibitions.

¹CHU, V, x, 8: “ But on neither of these ways are the small, constantly revolving creatures, (of whom it is said :) ‘ Take birth, die’—theirs is a third state.”

NTV—smṛtir api viruddha-phalena karmaṇā pratibaddhasya karmāntarasya ciram apy avasthānaṁ darśayati—kadācit sukṛtaṁ karma kūṭastham iva tiṣṭhati, majjamānasya saṁsāre yāvad duḥkhād vimucyate.

[82]

नित्यस्याकरणे दोषस्तात्क्रियायां न यद्यपि ।

अन्यतोऽसौ स्वभावाद्वा न तु मानेन वार्यते ॥ ८२ ॥

Even though there be defect if there is non-performance of obligatory rites and no defect if there is performance thereof, there is no evidence to prevent the same resulting otherwise or by its own nature.

In this birth one may perform obligatory rites and thus avoid demerit. But still, there may be demerit or defect due to the non-performance of obligatory rites in a former birth. Or, the demerit may result from some other cause ; or, it may appear of its own accord.

[83]

नित्यादेः फलमिष्टं चेदुपात्तदुरितक्षयः ।

तथाऽप्यागामिदोषेष्वशङ्का पूर्ववदुद्भवेत् ॥ ८३ ॥

If it is admitted that the fruit of obligatory rites is the destruction of accumulated sin, even then the doubt would arise, as before, in regard to defects that are to come.

Even if the present performance of obligatory rites destroys the previously accumulated demerit, what can prevent the demerit that may accrue in the future as a result of the neglect of obligations? Since that danger is there, the doubt regarding re-embodiment still persists.

[84]

अनभीष्टफलानां च दुरितत्वात्क्षयो भवेत् ।

नत्वाभ्युदयिकानां स्यादभीष्टत्वात्क्षयस्तव ॥ ८४ ॥

Though fruits which are not desired may perish because they are of the nature of sin, the destruction of those which lead to prosperity is not for you, since they are desired by you.

Granting that the performance of obligatory duties destroys demerit or sin, what about the merit that has not yet been enjoyed or is yet to come? Since merit is desired, and is not opposed to the performance of obligatory rites, the latter cannot destroy it. So, for the sake of enjoying merit, one may have to be re-born.

[85]

सर्वेषां दुष्टता चेत्स्यान्न विधानाददुष्टता ।

नापि श्येनादितुल्यत्वं फलदोषेण दुष्टता ॥ ८५ ॥

If there is defectiveness for all, no; what is enjoined cannot be defective. Nor is there parity with

the Hawk sacrifice, etc.; for it is defective because of the defect of the fruit.

It cannot be argued that merit (*dharma*) is a defect even as demerit (*adharma*) is a defect. For, merit is enjoined, and what is enjoined cannot be a defect. Here, the *Śyena* sacrifice is no example. The *Śyena* is defective because its fruit is defective. There is no *adhikārī* for it; and it is not enjoined at all. Not so the *Soma* sacrifice which is enjoined; and which yields merit.

NKL—*vimatam aduṣṭam, vihitatvāt, agnihotravat.*

[86]

ऐकात्म्यज्ञानतश्चेत्स्याव्यर्था कर्मप्रधानता ।

प्रधानत्वं च विद्यायास्तमेतमिति दर्शितम् ॥ ८६ ॥

If (release be) through the knowledge of the one self, futile is action as the principal. That knowledge is the principal is shown in the text ‘Such a one (the Brahmins desire to know)’¹

If it be admitted that release is attained when all actions are destroyed by the knowledge of identity with pure consciousness which is the self, then action cannot be the direct means. And, Scripture expressly declares that knowledge is the direct means.

1. *BU*, IV, iv, 22.

NKL—*karmanām sākṣān-mokṣa-hetutvam pramāṇa-prayojana-vikalam iti dūṣayati-vyarthē ’ti...karmanām jñānecchā-sādhana-tva-pradarśita-dvārā jñānasya sākṣān-mokṣa-hetutvaṁ darsitam ity arthaḥ.*

NTV—*evam sati karmanām kaivalya-sādhana-tvaṁ niṣpramāṇakam ity arthaḥ. kimca mukti-phala-jñānecchā-sādhana-tvena karmanām viniyogāt, jñānasyaiva kaivalya-sādhana-tvaṁ sapramāṇakam ity āha-pradhānatvaṁ ce’ ti.*

[87]

तत उक्तेन मार्गेण कर्तृसंस्कारकारिणाम् ।

ऐकात्म्यज्ञानतात्पर्यं कर्मणामिति निश्चितम् ॥ ८७ ॥

In the manner stated it has been settled that the rites which purify the agent have for purport the knowledge of the one self.

Actions purify the agent and culminate in knowledge; and knowledge is the means to *mokṣa*.

NKL—karmanā suddha-buddher viraktasya jñānecchā syād ity arthaḥ.

[88]

तेन निःसारतां बुद्ध्वा कर्मणां वेदतत्त्ववित् ।

ऐकात्म्यज्ञानमन्वेति तपोमुषितकल्मषः ॥ ८८ ॥

Therefore, he who knows the truth of the Veda will realize the futility of rites, and seek the knowledge of the one self, being rid of blemishes through austerity.

He, whose mind has been purified by the performance of obligatory duties (*nityakarma*), learns in general the teaching of the Veda, realizes that no lasting fruit can result from deeds, becomes unattached to work, renounces and enters upon the path of inquiry with a view to gaining knowledge.

[89]

यस्तु जन्मान्तराभ्यासात्क्षपिताशेषकामनः ।

आदावेवाधिकारी स पुनः कर्म न वीक्षते ॥ ८९ ॥

He, who, through practice in a previous birth is free from desires without a residue, is an eligible person

even at the beginning (i.e. while in the first *āśrama*). He does not stand in need of action again.

In certain cases the requirement of mental purification through obligatory duties might have been fulfilled in the previous birth itself. Where this is so, there is no need for fresh actions. Such persons are eligible for renunciation and knowledge even in the first *āśrama*.

NKL—ajñāna-nivṛtter jñāna-mātra-phalatvād ity arthaḥ.

[90]

विरक्तस्य तु जिज्ञासोर्मानान्नान्यव्यपेक्षणम् ।

कर्मापेक्षा हि साध्येऽर्थे सिद्धेऽर्थे तदनर्थकम् ॥ ९० ॥

For him who is dispassionate and who desires knowledge there is no need of anything other than knowledge. Action is required in respect of what is to be accomplished. In respect of the established it is of no use.

For accomplishing what is to be accomplished action is required, but not for realizing what is eternally established. For the latter, only knowledge is necessary. Knowledge does not stand in need of *karma*. It is not like the *Āgneya* which requires the aid of the *Prayājas*.

[91]

वामदेवस्य मैत्रेय्या गार्ग्याश्चैव समञ्जसम् ।

दर्शनं ब्रह्मचर्यादेस्तथा प्राव्राज्यशासनात् ॥ ९१ ॥

This is clearly seen in the cases of Vāmadeva, Maitreyī and Gārgī.¹ Renunciation even at the stage of a student's life is declared in Scripture.²

As sprinkling helps in the case of the *Darsapūrṇamāsa* by purifying the material sprinkled upon, so here *karma* helps in the rise of *jñāna* by purifying the mind. *Karma* is not the direct and independent means to *mokṣa*.

1. In these cases there is *jñāna* even without the performance of Vedic rites.

2. *Jābāla*, 4.

NKL—*janmāntarā-'nuṣṭhita-karmaṇām suddhi-dvāreṇa jñāna-hetutva-liṅgam āha-vāmadeve 'ti.*

NTV—*tasmāt kevala-jñānād eva sañcitā- 'seṣa-puṇyā-'puṇya-nivṛttiḥ na karmaṇa iti. janmāntara-kṛtena karmaṇā suddha-sattvasya sa-sannyāsa-jñānam eva mokṣa-sādhanaṁ ity atra liṅga-darśanaṁ srutiṁ cā 'ha.*

[92]

इष्टापूर्तादिहेतूनामानन्त्यात्स्वर्गसिद्धये ।

हेत्वन्तरासंभवोऽतो दुर्ज्ञानः संभवाद्भवेत् ॥ ९२ ॥

Since causes like sacrifice and good works (*iṣṭāpūrta*), etc., are innumerable, the impossibility of other causes for attaining heaven is difficult to know. As they are possible, it may quite well be.

The *pūrvapakṣin* believes that if one abstains from optional rites in this birth and performs the obligatory duties, one will attain release. But as against him, it is pointed out that even if one succeeds in keeping away from optional rites in this birth, the enjoyment of heaven may come to him when his present body falls, as a result of good deeds performed in previous births.

Iṣṭa means scripture-ordained deeds (*śrauta-karma*); *pūrta* means works taught in the *smṛtis* (*smārta-karma*).

NKL—*agnihotrādikam iṣṭam vāpy-ādikam pūrtam śaraṇāgata-paripālanādi dattam.*

[93]

एवं निषिद्धवाक्येषु यथोक्तं न्यायमादिशेत् ।

नित्यकर्मवचःस्वेवं नातो मुक्तिविनिश्चयः ॥ ९३ ॥

Thus in the case of prohibitory texts, the aforesaid rule must be applied; thus also in the case of texts enjoining obligatory rites. Hence there is no certainty of release.

The argument advanced above in regard to optional rites applies also to prohibited deeds. The same consideration holds good in the case of the obligatory and occasioned rites.

[94]

अनेकजन्मोपात्तस्य पुण्यापुण्यस्य कर्मणः ।

अनन्तदेहहेतोश्च विप्रधातस्य संभवात् ॥ ९४ ॥

For, there are merit and demerit of deeds like brahmanicide gathered in several births which are productive of innumerable bodies.

It cannot be said that the present birth is enough to experience the sum-total of merit and demerit acquired in all the previous births. For, we hear that to suffer for a single sin like brahmanicide one may have to take on a series of bodies.

[95]

ततः शेषेण वचनान्तथा तद्य इहेत्यतः ।

अनारब्धफलेहानां गम्यते संस्थितिस्ततः ॥ ९५ ॥

The existence of the fruit of works which have not begun to take effect is made known in texts like 'Hence by the residue (of the fruit of deeds)', and 'Accordingly, those who are (of pleasant conduct) here', etc.

Scripture and Traditional Code are cited here to show that there is unspent *karma* which is the cause of future births.

1. *Gautama-dharma-sūtra*, x, 31.
2. *CHU*, V, x, 7.

[96]

फलं नित्यस्य नापीह दुरितक्षयमात्रकम् ।

फलान्तरश्रुतेः साक्षात्तद्यथाऽऽम्रस्मृतेस्तथा ॥ ९६ ॥

The fruit of obligatory rites is not merely destruction of sin, because other fruit (also) is declared in Scripture directly,¹ as in the Traditional Code 'When mango (is planted)'.²

It was stated by the *pūrvapakṣin* that in the case of the obligatory rites their non-performance leads to demerit whereas their performance brings in no result. The latter part of this belief is refuted here. Scripture and Traditional Code expressly declare that merit is the fruit of the obligatory rites. So, whether the obligatory rites are performed or not performed, there is *saṃsāra*.

1. *BU*, I, v, 16.
2. *Āpastamba-dharma-sūtra*, I, xx, 3.

[97]

आम्रे निमित्त इत्यादि ह्यापस्तम्बस्मृतेर्वचः ।

फलवत्त्वं समाचष्टे नित्यानामपि कर्मणाम् ॥ ९७ ॥

The words of the *Āpastamba-dharma-sūtra* 'When mango is planted', etc. declare fruitfulness of even obligatory rites.

The passage from the *Āpastamba-dharma-sūtra* is explained.

[98]

उक्तमेव तु संशीतावियं त्वत्त विनिश्चितिः ।

कार्यमारभते शक्तिर्यत्किंचेह व्यवस्थिता ॥ ९८ ॥

As regards the doubt (*vide* v. 80), its resolution has already been stated. Potency, as long as it lasts, will be productive of effect.

As regards the doubt expressed by the *pūrvapakṣin* in v. 80, viz. that *mokṣa* may result if one follows the course prescribed by him, as there is no evidence that heaven, etc., would come through some other means, in the case of such a person, the reply has already been given (*vide* v. 81).

It has also been stated that as long as there is potency there is the possibility of its fructifying.

[99]

यस्मादसति कार्येऽसौ शक्तिरेव न सिध्यति ।

कार्यकारणयोः सिद्धिरन्योन्याव्यतिरेकतः ॥ ९९ ॥

For, if the effect be absent, the potency itself will not be established. The establishment of cause and effect is reciprocal.

It cannot be argued that, though there is potency in the state of release, it does not fructify; for if there is potency it must express itself. Cause and effect are reciprocally related. The establishment of one depends on that of the other.

[100]

कर्तृभोक्तृस्वरूपेऽतो ह्यभ्युपेतेऽन्तरात्मनि ।

न मुक्त्याशाऽस्ति पूर्वोक्तन्यायमार्गसमाश्रयात् ॥ १०० ॥

Hence, if the inner self be admitted to be of the nature of agent and enjoyer, there is no hope of release

(as has been shown) through having recourse to the arguments set forth above.

Hence if the soul has the potency of agency and enjoyership, there can be no release for it. This has already been stated (*vide v. 55 ff.*).

NKL—ataḥ sakti-pakṣe mokṣāsiddhiḥ.

[101]

सापराधत्वतो मुक्तिः संदिग्धैव प्रसज्यते ।

द्विजातीनां खरादेस्तु त्वदुक्त्या स्यादसंशयात् ॥ १०१ ॥

Since there is the possibility of transgression, there arises doubt in respect of release for the twice-born; and by what you have stated there would be release, without doubt, for the donkey, etc.

Even though a person belonging to the twice-born class follows assiduously the course of discipline prescribed by the Mīmāṃsaka, one cannot be sure that he has not transgressed. Without his knowing, he may overlook an injunction or perform a prohibited deed, with the result that when the present body falls he will have to take on another body. So, there will be no release for him.

If it is contended that the effects of all the previous actions can be reaped in the present birth, then release must be admitted even for the donkey, etc., when their present bodies are destroyed.

NKL—itthaṁ darśanam eva kaivalya-sādhanaṁ iti sādhana-bheda-siddhāv adhikāri-bheda-siddhaḥ.

[102]

ननूक्तं कर्मशेषत्वमात्मनो यागकर्तृता ।

नैतदेवं यतो नैतत्कर्माङ्गं ज्ञानमिष्यते ॥ १०२ ॥

“Now, it was said (in verse 45) that knowledge is subsidiary to action and that the self is the agent of

sacrifices ”. This is not so ; for, this kind of knowledge which is subsidiary to action is not what is accepted.

The *pūrvapakṣin* stated in v. 45 that since the self is subsidiary to action, the knowledge of that is subsidiary to action.

With reference to that, the *siddhāntin* says here that the knowledge of the self as the agent of sacrifices, etc. is not what is meant by self-knowledge. The knowledge of the empirical self may be useful to action. But that is not knowledge of the true self.

[103]

कर्तृत्वमात्मनः सिद्धं यतोऽन्यत्वापि यागतः ।

निःशेषकर्मकारित्वात्तस्मादुक्तमपेशलम् ॥ १०३ ॥

Even elsewhere, apart from sacrifices agency is established for the self, since it is the agent of all actions. Hence what you have said is unsound.

The knowledge of the empirical self cannot properly be said to be subsidiary (*aṅga*) to ritual action ; for that kind of knowledge, we find, is related to secular action also. And, a subsidiary is that which helps the principal, while being unique to it.

[104]

न ह्यात्मज्ञानविरहात्कर्म कर्तुं न शक्यते ।

पर्णज्ञानमृते यद्वज्जुह्वर्त्तुं न शक्यते ॥ १०४ ॥

It cannot be said that in the absence of a knowledge of the self it is not possible to perform ritual, even as, without the knowledge of the *parṇa*-wood, it is not possible to fetch the sacrificial ladle.

It cannot be said that in the absence of self-knowledge it is not possible to perform action, as without the knowledge of the *parṇa*-wood it is not possible to employ the sacrificial ladle. For, true

self-knowledge is inimical to the performance of any action. The self is transcendent of all that is empirical; it is beyond hunger, etc.; it has no use for caste-distinctions such as Brahmin, Kṣatriya, etc.; it is not subject to transmigration; it is known through the Vedānta.

[105]

देहान्तराभिसंबन्धी नत्वात्माऽस्तीत्यजानतः ।

विवेकिनो न युक्त्यं प्रवृत्तिः पारलौकिकी ॥ १०५ ॥

Nor may it be said that an intelligent man will not be active in respect of the other world if he does not know that there is the self related to another (divine) body.

It may be said that in order to perform sacrifices, etc., one must know that it is the same self that will go to heaven after death. In other words, the sacrificer must be able to distinguish the self from the present body, etc.

This is replied to in the next verse.

[106]

एवं तर्हि न कर्माङ्गं कर्तुश्चेष्टैकहेतुतः ।

फलार्थिवन्न च ज्ञानं क्रियाङ्गत्वेन चोदितम् ॥ १०६ ॥

Even thus (the knowledge of the self) is not subsidiary to action; since the agent alone is the instrument to the desired, like the one who desires the fruit. Knowledge is not enjoined as subsidiary to action.

Now, it has been said that the self as distinct from the body should be known in order to perform ritual action. What kind of self is intended here? Is it the self as agent, or as non-agent? The

knowledge of the self as agent is common to all action—sacred and secular. And so, it cannot be the subsidiary of sacred action. As an example, we may cite the knowledge of the self as enjoyer which is required for all action. As for the knowledge of self as non-agent, it is not at all required for action. On the contrary, it is destructive of all action.

[107]

नन्वेवमपि सिद्धः स्यात्प्रवेशः सर्वकर्मसु ।

आत्मज्ञानस्य सामर्थ्यान्न नाम विधिसंश्रयात् ॥ १०७ ॥

“Now, even so, it would be established that knowledge of self enters into every act, because of competence, though not as dependent on an injunction.”

The *pūrvapakṣin* says, here, that in the absence of a self distinct from the present body, all acts relating to the other world would be unintelligible. Knowledge of such a self, then, is subsidiary to action, even though it may not be so as dependent on injunction.

[108]

नैतदेवमविज्ञाततत्त्वस्यैवेह कर्मसु ।

अनात्मार्थविशिष्टस्य ह्यधिकारित्वहेतुतः ॥ १०८ ॥

It is not so ; because eligibility here in respect of rites is for him who has not known the truth and who is qualified by the sense of not-self.

Siddhānta—You seek to establish the subsidiariness of self-knowledge to action through presumption (*arthāpatti*). Now, what is the kind of self that you are thinking of? Is it the qualified self (*viśiṣṭa*)? Or, the pure self (*kevala*)? The qualified self is an illusory one (*kalpita*). The knowledge of that may be subsidiary to action. Thereby, true self-knowledge does not become subsidiary. Knowledge of the

pure self which is true self-knowledge is what is opposed to action. It is only he that is endowed with ignorance (*ajñāna*) that is eligible for action. Self-knowledge is what liberates one from ignorance.

NTV—brāhmaṇyādy-anātma-viśiṣṭasyaivā-'tmano 'dhikāra-hetutvāt taj-jñānasyaiva karmasu praveśaḥ, natv-apeta-brahma-kṣatrādi-bhedā-'saṁsāry-ātmatattva-jñānasyā-'nupayogāt, virodhāc ca.....anātmārtha-brāhmaṇyādi-vaiśiṣṭyam adhyāsa iti, tat-kāraṇam ajñānam evā 'nvaya-vyatirekābhyām.

[109]

स्वरूप आत्मनः स्थानमाहुर्निःश्रेयसं बुधाः ।

ततोऽन्येनाभिसंबन्ध आत्मनोऽज्ञानहेतुकः ॥ १०९ ॥

The abidance of the self in its nature, the wise say, is beatitude. The relation of the self with what is different from that is the result of ignorance.

What is release? It is the abidance of the self in itself. And, that results to one for whom ignorance has been removed through knowledge. Since knowledge is the means to *mokṣa* it cannot be subsidiary to action. The relation of the self to the not-self is caused by nescience. Of the pure self which is unattached, that relation is not possible.

NTV—jāti-vyaktyādi-bhāvābhāvāt ajñāna-hetukam eva tādātmyam.

NKL—svātmāvasthāna-kaivalyasya svābhivakatvād anya-saṁsarga-rūpam asvāsthyam ajñāna-kṛtam ity arthaḥ.

[110]

आगन्त्वनात्मरूपं तत्स्वसंविद्यैव गम्यताम् ।

नातोऽवाप्तपुमर्थस्य स्वरूपावस्थितस्य तु ॥ ११० ॥

The adventitious nature of not-self is made known by the self-same intelligence. Not therefore is there (for the ignorant) the attainment of the human goal which is being-in-the-self.

Moreover, we offer the following inference: The not-self has nescience for its basis, because it is an effect, like the serpent. Likewise is the relation thereto.

And, the nature of not-self is known by the witness-self. Without the relation of the self to it, this is not possible. Both the not-self and the relation thereto have nescience as their ground.

NTV—yat svasaṁvityaiva gamyatām ahaṁ-rūpaṁ tad anātmā ghaṭavat.....ahaṁ-rūpaṁ anātmā suṣuptāv ahaṁkāraḥbhāvāt.

[111-113]

कर्तृभोक्त्रादिरूपत्वं प्रत्यगज्ञानतोऽन्यतः ।

कर्म तत्फलभोगश्च बाह्यानि करणानि च ॥ १११ ॥

ततोऽपि बाह्यो देहश्च जातिस्तत्समवायिनी ।

जरामरणजन्मानि देहाधिकरणानि च ॥ ११२ ॥

दारपुत्रधनादीनि देहबाह्यानि यानि च ।

कर्माधिकारहेतूनि स्वतोऽस्यानधिकारिणः ॥ ११३ ॥

The nature of the agency, enjoyership, etc., is on account of the nescience of the inner self; not otherwise. Also, action, enjoyment of its fruit, and outer sense-organs; thence also the physical body and the caste inherent therein, old age, death and birth which are located in the body; and wife, son, wealth,

etc., which are external to the body and which serve to make the self eligible for action, though by itself it is not eligible.

Agency, enjoyership, etc., are caused by nescience. Similarly the other factors that make for finitude: mind, sense-organs, physical body with its attributes, and what are related to it, like son, wealth, etc. It is as endowed with these that one becomes eligible for action. The pure self which is unattached, unchanging, and unconditioned, is not eligible for action.

*NKL—kartṛtvādir nātmadharmo dr̥śyatvād rūpavad iti tu-
ṣabdārthah.*

[114-116 a]

अभिन्नस्याऽऽत्मनो मोहाद्भेदकानीति मन्वते ।

विशेषणं स्वरूपं वा नान्योन्यस्य स्वतो यतः ॥ ११४ ॥

लोके दृष्टं विनाऽविद्यां मोहाद्दृष्टं तु सर्वतः ।

चोरोऽसौ मामभिप्रैतीत्येवं चोरविशेषणम् ॥ ११५ ॥

स्थाणुं संभावयत्यज्ञो न तु दृष्टं तमो विना ।

These, it is thought, are what bring about differentiation for the self which is undifferentiated. One being either the attribute (*viśeṣaṇa*) or the nature (*svarūpa*) of another is not out of itself. Without nescience it is not seen in the world. It is everywhere seen due to delusion (*moha*). It is the ignorant man that superimposes the attribute of being a thief on a post thus, 'This thief comes against me'. Without darkness this is not seen.

The attribute or the nature of a thing is not, of its own accord, seen in another thing. This happens only on account of delusion

(*moha*). Agency, etc., are not the attributes of the self; nor do they constitute its nature. So, it is ignorance or nescience that is responsible for making these appear in the self.

An illustration is given. One mistakes a post for a thief in the dark. This is clearly a case of delusion.

NTV—kartrtvādy-ātma-viśeṣaṇam ajñāna-kṛtam eva.

NKL—sarvataḥ sarvatra dehādi-kalpitaṁ anyātmanā bhāsamānatvād anyasya viśeṣaṇatvāc ca rajju-sarpādivat ity arthaḥ.

[116 b-117 a]

नन्वविद्यामृतेऽप्यन्यद्दृष्टमन्यविशेषणम् ॥ ११६ ॥

औपगवो नृपहयस्तथा श्येनचिदादयः ।

“Now, even without nescience, one is seen to be the attribute of another; as for instance, *Aupagava* (son of Upagu), *nṛpahaya* (the king's horse) and *Śyenacit* (he who performs the hawk-sacrifice), etc.”

Pūrvapakṣa — Even in the absence of delusion, there may be transference of attributes. Examples:— (1) *Aupagava* means ‘son of Upagu’. Here Upagu is the attribute of son. (2) *Nṛpahaya* means ‘the king's horse’. Here king is a qualification of horse. (3) *Śyenacit* means ‘he who performs the hawk-sacrifice’. Here hawk-sacrifice stands in adjectival relation to the person who performs it. In each of these cases there is the relation of qualification and qualified, without nescience.

[117 b-118 a]

नैतदेवं यतस्तत्र नैवं प्रत्यक्तयेष्यते ॥ ११७ ॥

अन्येनान्यस्य संबन्धः कुशोऽहमिति वत्कचित् ।

It is not so; for in those cases there is not the relation of identity between the two (the qualification and the qualified) as in ‘I am lean’.

Siddhānta — The examples you have given have no parity with the cases of delusion we mentioned. When a person says, 'I am lean', he does not see any difference between himself and the lean body. Here, the qualification is not distinguished from the qualified. Not so in the case of *Aupagava*, etc. Upagu and his son are, certainly, not identified; only their relation is indicated.

[118 b-119 a]

उपग्वादिर्हि पित्रादिः प्रकृत्यर्थो विशेषणम् ॥ ११८ ॥

भिन्नस्यौपगवापत्यप्रत्ययार्थस्य गम्यते ।

The sense of the stem *Upagu*, namely, father, etc., is the qualification of the sense of the suffix, which is different in *Aupagava*, namely, son.

In the instances of *Aupagava*, etc., the difference between the qualification and the qualified is evident; and so, they are not on a par with the delusions, 'I am lean', etc. The *pūrvapakṣin* cannot argue thus: What is in dispute, viz., the relation of the qualification and the qualified is caused by the non-apprehension of difference, because it is a relation of the qualification and the qualified, as, for instance, in 'I am lean'.

[119 b-120 a]

नैवं कर्त्रादिदेहान्ताज्जात्यादीन्देहगांस्तथा ॥ ११९ ॥

व्यतिरेकतया कश्चिद्विशिनष्टीह मानवः ।

Not so does man here¹ think (of himself) as different from the qualifications beginning with egoity and ending with the body and likewise from the caste, etc., inherent in the body.

Just as Upagu differentiates himself from his son, the individual does not distinguish himself (i.e. the self) from egoity, etc.

1. Here means 'in the state of ignorance'.

[120 b-121 a]

यत आत्मतयैवैतैर्विशिनष्ट्यविशेषणम् ॥ १२० ॥

करोम्यन्धो द्विजो बालो दग्धश्छिन्नोऽहमित्यपि ।

For, man thinks of these as the self, as non-different therefrom. Thus he says, 'I do', 'I am blind', 'I am a twice-born', 'I am a child', 'I am burnt', 'I am cut', etc.

That the difference between the self and its adjuncts is not grasped by the individual is evident from his experience such as 'I do this action', 'I am blind', etc.

[121b-122 a]

नाविद्यामन्तरेणैषां विशेषणविशेष्यता ॥ १२१ ॥

इयमेवाऽऽत्मनो ज्ञेया कर्माधिकृतिकारणम् ।

This relation of qualification and qualified is not possible without nescience. This alone is to be known as the cause of making the self eligible for rites.

The relation between the self and egoity, etc., is due to nescience, even as the relation between the post and man in the delusion 'This is a thief'. (See vv. 114-116a.)

It is the self that is identified with the adjuncts like egoity that is eligible for performing rites.

NTV—*avidyā-kṛta-viśeṣaṇa-viśeṣyataiva karmādhikṛti-kāraṇam... evaṁ kartṛtvādeḥ avidyādhyastatva-prasāadhanena ajasyaiva karmādhikārah prasādhitah*

[122 b-123 a]

अधिक्रियन्ते येनैते बृहस्पतिसवादिषु ॥ १२२ ॥

अतोऽनवगतैकात्म्यकर्माधिकृतिहेतुतः ।

It is for the reason that ignorance of the one self makes one eligible to (perform) rites that eligibility is prescribed for *Brhaspatisava*, etc.

That it is only the ignorant man that is eligible for rites is further shown. In the text 'A Brāhmaṇa is to sacrifice with the *Brhaspati-sava*', it is seen that the person who is eligible for this sacrifice is one who has conceit in a particular caste. This is so with all sacrifices. Otherwise, all persons would be eligible to perform all sacrifices. Without conceit (*abhimāna*) of some sort or other, the performance of sacrifice is not possible. And, conceit is born of nescience. Therefore, it is only the ignorant person that is eligible for rites. A knowledge of the nature of such a person, viz. the empirical soul, may be auxiliary to ritual, but not the knowledge of the pure self.

NKL—ajñasya karmādhikāratve jñānasya tadviparītādhikāritvam, ato na karmāṅgatā.

[123 b-124 a]

श्रुत्यादिमानप्रमितप्रत्यग्याथात्म्यनिष्ठितम् ॥ १२३ ॥

सर्वकर्मसमुच्छेदि ज्ञानं वेदान्तमानजम् ।

The knowledge, which has for content the real nature of the inner self made known by the means of valid knowledge, like Scripture, etc.¹, and which removes entirely all action (with its fruit) arises from the testimony of Vedānta.

The knowledge of the pure self which is obtained from the Vedānta cannot be an auxiliary to *karma*, because it is destructive of all *karma*. There are texts in support of this view. The *Muṇḍaka Upaniṣad* (II, ii, 8) declares: 'The knot of the heart is cut, all doubts are dispelled, and his deeds perish, when the higher and the lower

Brahman has been realized.' And, the *Bhagavad-gītā* (iv, 37): 'The fire of knowledge reduces all deeds to ashes.'

1. *Et cetera* may mean Traditional Code, Epics, Purāṇas, the experience of the wise, inference, etc. Or, if *śruti* is taken to mean the first of the six *pramāṇas* (modes-of-evidence for determining the purport of a scriptural passage), viz. express statement, then *et cetera* would stand for *liṅga* (capacity), *vākya* (syntactical connection), *prakaraṇa* (context), *sthāna* (position), and *sāmākhya* (name). *

[124 b-125]

तन्मूलाज्ञानघातित्वाज्ज्ञानस्येह प्रसिद्धितः ॥ १२४ ॥

न तु प्रवर्तकं तस्मान्नार्थवादत्वसंभवः ।

फलोक्तेः पर्णमय्यां तु युज्यते कर्मशेषतः ॥ १२५ ॥

Knowledge is well known as the remover of ignorance which is the root cause of that (viz. action). It is not what prompts one to activity. Hence, the declaration of fruit in respect thereof cannot be an eulogy. As for the (ladle) made of *parṇa*-wood, eulogistic character (of the text) is intelligible, because it is an auxiliary to rite. (See vv. 44 and 45.)

It cannot be maintained that knowledge removes nescience alone, and not *karma*; for nescience is the cause of the conceit of agency, etc., which are responsible for *karma*, and with the destruction of the cause the effects also get destroyed. That knowledge destroys ignorance is evident, even as the fact that light dispels darkness. So, the knowledge of the pure self which is destructive of the cause of all activity cannot be an auxiliary to *karma*. Because it is not auxiliary, the texts that proclaim its fruit cannot be of the nature

* See *Mīmāṃsā-nyāya-prakāśa*, para 67 ff. translated by Franklin Edgerton (Yale University Press, New Haven, 1929):

of *artha-vāda*. The case of the ladle made of *parṇa*-wood is quite different. Here a separate statement of fruit is an eulogy because the wood is an auxiliary of the sacrifice and whatever is the fruit of the sacrifice is the fruit of the wood also.

NKL—*yato jñānam ajñānasyaiva nivartakam ity uktatvān na karma-nivartakatvam.....tattva-jñānam ajñāna-nivartakam iti sūkti-jñānādaḥ dr̥ṣṭatvāt.*

[126]

यत्त्वचोदि त्वयाऽपीयमभ्युपेयाऽर्थवादता ।

अनिच्छताऽपि विध्यर्थमत्र प्रतिविधीयते ॥ १२६ ॥

What you asked me to admit even without my willingness to admit, that knowledge is the content of an injunction, being eulogistic in character—to that we shall reply here. (See v. 45.)

What has already been refuted is being further refuted. Knowledge is not the content of an injunction.

[127]

इच्छाम्येवार्थवादत्वं वचसोऽन्यपरत्वतः ।

यथाश्रुतार्थवादित्वान्न त्वभूतार्थवादता ॥ १२७ ॥

I even admit that the text declaring fruit is an eulogy, since the words are dependent on another (i.e. the major text). But as it is an eulogy in accordance with what is declared in Scripture, it is not an eulogy of what is non-existent.

We may even admit that the declaration of the fruit of knowledge is an *artha-vāda*, because such declaration is an auxiliary of the major texts like 'that thou art'. But it is certainly not a case of *abhūtārtha-vāda*.

[128]

इज्येते स्वर्गलोकाय दर्शादर्शौ यथा तथा ।

न त्वभूतार्थवादित्वं पापश्लोकाश्रुतेर्यथा ॥ १२८ ॥

‘For the sake of attaining the heavenly world, the New Moon and Full Moon rites are performed.’ As in this text, so in that also. There is no eulogy of what is non-existent, as in the text ‘He who has a ladle of *parṇa*-wood hears no evil sound.’

The text ‘The knower of Brahman becomes Brahman’ is a *bhūtārtha-vāda* like the text relating to the New Moon and Full Moon rites; it is not *abhūtārtha-vāda* like the text which declares the fruit of the ladle made of *parṇa*-wood.

[129]

कुतः प्राप्तं फलमिति प्रत्यक्षं ह्यात्मधीफलम् ।

यतोऽवगम्यते तेन ज्ञानं कर्म न ढौकते ॥ १२९ ॥

‘How is it obtained that it is the fruit?’ Indeed, the fruit of self-knowledge is immediate. Since this is seen to be so, knowledge does not touch action.

That the fruit of the knowledge of Brahman is the attainment of Brahman is known from the direct experience of the wise. Therefore, knowledge cannot be an auxiliary of *karma*.

NKL—*jñānasya kartrtvādi-nivartakatvān na karmāṅgatvam.*

[130]

प्रवृत्तेः प्रतिकूलत्वान्मुक्तिं प्रति विरोधतः ।

मुमुक्षोरधिकारोऽतो निवृत्तौ सर्वकर्मणाम् ॥ १३० ॥

Because activity is an obstacle and is opposed to release, the one who desires release is eligible to withdraw from all action.

The knowledge of the pure self is the means to release ; *karma* is the means to prosperity. Since their ends are different, the eligible persons also must be different. The discipline that the person who desires release follows is repeated hearing of the Vedānta texts, etc. This is opposed to *karma* which is prompted by the conceit of agency, etc. So, the person who seeks release has nothing to do with *karma*. He is eligible for Vedānta-study through the renunciation of works.

NTV—jñānasya svatantra-phalatva-prasāadhanena adhikāri-bhedo 'pi siddhah.

[131-133 a]

प्रवृत्तिहेतुप्रध्वस्तेर्न प्रवृत्तौ कथंचन ।

नाभिप्रेतपुरप्राप्तिसमर्थं सुगमं शिवम् ॥ १३१ ॥

वारिपथ्यदनोपेतं सर्वानर्थविवर्जितम् ।

प्राप्तं मार्गं समुत्सृज्य तद्विरुद्धेन वर्त्मना ॥ १३२ ॥

यियासति सुधीः कश्चिद्यथा भ्रान्तोऽध्वगस्तथा ।

He for whom the cause of activity has been destroyed has no (eligibility) whatsoever for action. No wise man would leave the path he is on, which has the capacity to lead to the desired city, which is easy and good, which is endowed with water and victuals for the journey, which is free from all obstacles, and desire to take to the contrary path, like a deluded traveller.

Attachment, etc., are the cause of activity. He who longs for release has no attachment, etc. And so, there is no activity for him.

Nor is there activity for him who has realized the truth through Vedānta-study. The path of *karma* is such that it will not take one to *mokṣa*; the way of knowledge is the appointed road. No discriminating traveller will choose the wrong route, leaving the right one.

NTV—yo hi yad icchatī tat-sādhane pravartate, atat-sādhanāt tad-viruddha-sādhāne ca nivartata ityuktam. ito 'pi karmanī na pravartate mumukṣuḥ, pravṛtti-hetu-rāgādi-dhvaṁsāt.

[133 b-136 a]

तथाऽविद्योत्थकर्त्रादिधर्मशून्यमविक्रियम् ॥ १३३ ॥

अक्रियाकारकं ज्ञात्वा निःशेषपुरुषार्थदम् ।

आत्मप्रत्ययमागम्यमात्मानं देवमञ्जसा ॥ १३४ ॥

तत्स्थितौ च फलेऽभीष्टे नित्ये साधनवर्जिते ।

तद्विरुद्धफले बाह्यसाधनेऽनेककारके ॥ १३५ ॥

कथं कर्मणि सर्वज्ञो मनो दध्यौद्धसन्नपि ।

Likewise, having known the unchanging Self which is devoid of the nescience-generated characteristics such as agency, etc., which neither acts nor causes others to act, and which is the giver of the final human end, which is knowable by self-knowledge, and when that knowledge of the divine self is there, in respect of the eternal fruit which is desired and which is devoid of any other means, how can the omniscient one set his mind, even in jest, on action whose fruit is contrary (to release) which depends on external means and on several causal correlates?

The seeker and the knower of the self have no use for *karma*. The self is devoid of agency, etc. It is itself the human end and is eternal. The fruit of *karma*, on the contrary, is non-eternal and is contingent upon so many factors. So, he who seeks the self and he who has realized the self have no need of *karma*.

1. *NKL* interprets *āgamyam* as *āgama-yogyam*, or as *parāmarśa-siddha-svāpānubhava-gamyam*.

[136 b-137 a]

सम्यग्धीमृदिताशेषध्वान्तस्य च न पूर्ववत् ॥ १३६ ॥

अज्ञानादि पुनः कर्तुं शक्यतेऽकारकत्वतः ।

For one whose ignorance has been entirely destroyed by right knowledge, it is not possible to perform (action) which is of the nature of nescience, etc., as before, for, there is no prompter to activity.

It cannot be said that the one who has realized the self may have to perform action again because of some other nescience. For, there is no possibility of nescience for such a person.

NKL—akāraakatvata iti kūṭasthatvād ātmanah kāraṇatvāyogāt kāraṇāntarasya cā 'bhāvād ity arthaḥ.

[137 b-138 a]

श्रुत्यादिमानप्रमितयाथात्म्यज्ञानतत्फलः ॥ १३७ ॥

प्रतिकूलत्वतो विद्वान्यतः कर्मसु नेहते ।

The wise one, who is endowed with the knowledge of the truth as understood through the means of valid knowledge like Scripture, etc., and with the fruit of such knowledge, does not desire action, since it is opposed (to knowledge).

The wise one who has realized the self will not desire *karma*, because *karma* is opposed to self-knowledge.

[138 b-139 a]

अतोऽज्ञस्यैव निःशेषमुमुक्षुप्रजिहासितः ॥ १३८ ॥

कर्त्राद्यनात्मधर्मस्य कर्माधिकृतिरात्मनः ।

Therefore for the ignorant one alone, who has the characteristics of the not-self, like agency, etc., is there the eligibility for rites, shunned by all seekers after release.

Mere nescience is not enough for qualifying a person for *karma*. In sleep one has nescience, but does not act. The eligibility for action consists in being endowed with agency, etc., which are the products of nescience. He who seeks release renounces agency, etc. So, not for him is the eligibility for action.

[139 b-140 a]

विद्यात्ममोहतत्कार्यविरोधाच्च परस्परम् ॥ १३९ ॥

रोगादिवदनर्थत्वात्कर्त्रादिः प्रजिहासितः ।

Because knowledge and delusion of self are mutually opposed by nature as well as in their effects, agency, etc. are sought to be relinquished, as they are evil, like disease, etc.

Knowledge and delusion are opposed to each other both by nature (*rūpataḥ*) and by result (*kāryataś ca*). Therefore, he who seeks release through knowledge desires to renounce delusion-born agency, etc.

NTV—*vidyā tad-viśayā-'tmā ca prepsitau, tad-virodhāt mohas tat-kāryam cā 'narthah.*

[140 b-143 a]

जिहासितुः स्वभावोऽसावित्युक्तिः शिशुवक्तृका ॥ १४० ॥

कर्त्रादिश्चेत्स्वभावः स्यात्प्रत्यक्षाकर्तृरूपिणः ।

प्रत्यक्षादिविरोधः स्यादनिर्मोक्षस्तथैव च ॥ १४१ ॥

अस्तु काममनिर्मोक्षो विक्रियावत्त्वतो दृशेः ।

अग्निवत्फलभोक्तृत्वान्नो चेदाकाशकल्पता ॥ १४२ ॥

इति चेन्नाऽऽत्मनो ध्रौव्याद्विक्रियानुपपत्तिः ।

‘This (agency, etc.) is the nature of the one who desires to leave.’ This statement is infant’s prattle. If agency, etc., be the nature of what is immediately experienced (by the wise) as non-agent, there would be conflict with perception, etc.¹, and likewise non-release. ‘Let there be non-release, since the seer (soul) is subject to transformation, being the enjoyer of fruit, like fire. Or, if not, it would be unreal, like ether’. If thus it be said, no; for transformation in the case of the soul is unintelligible, since it is constant (*dhruva*).

The self is not an agent of actions or enjoyer of fruits. To say that it is, is to go against the immediate experience of the wise ones. And, if the self were really agent, etc., there would be non-release.

The materialist (*Lokāyata*) may say that this is a contingency of the acceptable. There is no unchanging or permanent self. The so-called self is subject to transformation, even as the element, fire, is. Even if the self is distinguished from the physical body, it must be regarded as the enjoyer, and enjoyership involves change. If the self is neither agent nor enjoyer, it would be nothing like ether. [The *Lokāyata* recognizes only four elements: earth, water, fire and air.]

The contention of the Lokāyata is unsound, because the self is eternal.

1. Etc. means inference, etc.

NTV—ādi-grahaṇena anumānādi-virodha ucyate, tathāhi kartṛtvāder dr̥ṣyatvāt ātmanah svarūpaṁ dharma vā na sambhavati ghaṭa-tad-rūpādivat.

[143 b-144 a]

मूर्तामूर्तत्वहीनस्य प्रतीचो विक्रिया कुतः ॥ १४३ ॥

प्रमायोगो हि भोक्तृत्वं प्रमा चैवाऽऽत्मनः सदा ।

For the soul which has neither shape nor non-shape, how could there be transformation? Enjoyership is but conjunction with experience; and the self is always consciousness.

That there can be no transformation for the self is further explained. It is the world that consists of elements and elementals that is subject to transformation. The self is not so; it is the unchanging witness. Agency, enjoyership, etc., are attributed to it, when it is in conjunction with the ego, etc., and, this attribution is due to nescience.

*NKL—bhāvābhāva-sādhaka-caitanyasyā-'bhāvah kena siddhyed
iti bhāvah.*

[144 b-146 a]

वाय्वमिवद्विकारो न प्रागभावाद्यसंभवात् ॥ १४४ ॥

अग्न्यादीनां तु सांशत्वाद्बलवद्भिस्तदिन्धनैः ।

अभिभूतस्वरूपाणां काष्ठनिर्मथनादिना ॥ १४५ ॥

युक्तैवाऽऽविष्कृतिर्नित्यं तेषां कार्यात्मकत्वतः ।

Transformation is not possible (for the self), as for wind and fire, because there is no possibility of prior non-existence. Of fire, etc., being overpowered by heavy fuel, manifestation is intelligible through the churning of wood, etc., because they (fire, etc.) are endowed with parts and are always of the nature of products.

That, of which there is prior non-existence, is subject to transformation. This is true of all elements and elementals. The self is not so ; therefore, it does not change.

Fire, etc., may become manifest by the rubbing of sticks, etc. That is because they are finite wholes-of-parts. The self, however, has no parts. Therefore, it has no transformation.

NKL—nahi svataḥsiddhasya prāgabhāvādayaḥ svatonyato vā siddhyanti, prāgabhāvādimatva-vyāptam vikāritvam nātmanah.

[146 b-147 a]

आविर्भावतिरोभावौ स्वतःसिद्धेश्च कारणात् ।

For the self, manifestation and disappearance are nowhere to be found in the primary sense, because it is without parts and is self-established.

Really speaking, there can be no obscuration and manifestation for the self; for it has no parts and is self-established.

NTV—kim ātmana ekadeśenā 'virbhāva-tirobhāvādiḥ sarvātmanā vā? natāvad ekadeśena nirāṁśatvāt, nāpi sarvātmanā, svarūpābhāva-prasaṅgāt. kimca, yad anyādhīna-savyapadeśyaṁ tasyaivā 'virbhāva-tirobhāvādiḥ, ātmā tu svatas-san atopy āvirbhāvādiḥ tasya nāsti. api ca yaj jaḍaṁ tasyā 'virbhāvādiḥ, ātmā tvajaḍaḥ svayaṁprakāśatvāt, ato 'pi nāvirbhāvādir asya.

[147 b-148 a]

अभ्युपेताऽप्यभिव्यक्तिर्नाभिव्यङ्ग्यस्य विक्रिया ॥ १४७ ॥

यथा तथाऽनभिव्यक्तिः सर्वेषामपि वादिनाम् ।

Even if manifestation be admitted, there is no transformation in what is to be manifested. So also in the case of non-manifestation. This is true for all disputants.

Even if manifestation and non-manifestation be admitted for the self, there is no transformation for it. All philosophers who believe in the self at all must recognize its changelessness.

NTV—vimata ātmā na abhivyakti-vikriyāvān abhivyaṅgyatvāt, kūpa-khananādāv ākāśādivat. tathā na anabhi-vyakti-vikriyāvān ātmā anabhi-vyaṅgyatvāt tadvat. vikriyāvātve ca carmādivad anityatva-prasaṅgāt.

[148 b-149 a]

अतोऽनभ्युपगच्छद्भिर्मुक्तौ कर्त्रादिरात्मनः ॥ १४८ ॥

अविद्याकल्पितो ज्ञेयो न ह्यसौ परमार्थतः ।

Therefore, for those who do not admit agency, etc., for the self in the state of release, it (agency, etc.) must be understood as posited by nescience. It is not, indeed, in reality.

If there is no change for the self, it may be asked, how is the manifestation, in it, of agency, etc., to be explained? We reply: that

manifestation is caused by nescience. In *mokṣa* there are no agency, etc., for the self. So, these are illusory like the nacre-silver and the rope-serpent.

NTV—*natāvad ātmani karṭṛtvādiḥ paramārthaḥ tasya kūṭastha-bodhaghanatvāt, nāpy anātmani loṣṭa-pāṣāṇādiṣv adrṣṭatvāt, tasmād dehādaḥ ātmādhyāsāt ātmani ca ahaṅkāradhyāropāt karṭṛtvādir bhavati. kimcā 'laktaka - sannidhānāt sphaṭika - lauhityavad antaḥkaraṇopādhy-uparāgād ātmany āropyamāṇaḥ karṭṛtvādiḥ katham paramārthaḥ syāt.*

NKL—*karṭṛtvādi tat - sthitau mukty - anupapattes tasya jñāna-nivartyatvo'pagame rajju - sarpādivat kalpitatvam ity arthaḥ.*

[149 b-150]

कर्त्राद्यात्मस्वभावस्य प्रात्यक्ष्यान्न तदात्मनि ॥ १४९ ॥

मात्रादिबोधकं मानं प्रत्यगात्मनि साक्षिणि ।

न व्यापारयितुं शक्यं वह्निं दग्धुमिवोल्मुकम् ॥ १५० ॥

Because agency, etc., are perceived by the self, they are not in the self. The means of valid knowledge which makes known cognizership, etc., are incapable of functioning in respect of the inner witness-self, just as the fire-brand cannot burn fire itself.

Agency, etc., cannot be the characteristics of the self, because they are perceived by the self. What reveals cognizership, etc., cannot reveal the witness-self, because it is the witness-self that reveals them. Verily, fire cannot burn itself.

NKL—*ahaṁ daṇḍitvad ahaṁ-pratyayo 'haṁkāravacchinna-dehādi-viṣayo, na tat-sākṣiṇi karṭṛtvādy-abhāvānumāna-virodhī 'ty arthaḥ.*

[151]

साक्षिसाक्ष्याभिसंबन्धः प्रमात्रादौ यथा तथा ।

साक्षिवस्तुनि नैव स्यात्केवलानुभवात्मनि ॥ १५१ ॥

The relation of witness and witnessed which obtains in the case of cognizer, etc., is not thus possible in the case of the witness-reality, the self which is pure experience.

The empirical cognizer which is the ego requires to be illumined by the witness, because it is inert. The witness itself does not require another witness to illumine it. It is pure intelligence, of the nature of illumination, like the resplendent sun.

NTV—pramātrādeḥ jadātvāt sākṣi-dṛśyatvaṁ, sākṣiṇaḥ svayam-prakāśa-kevalānubhavātmatvāt na svagrāhyatvaṁ, nāpi paragrāhyatvaṁ.

NKL—sākṣiṇo na sva-grāhyatvaṁ vṛtti-virodhāt, nāpy anyeṇa jadasyā 'sādhakatvāt, ajadātve tasyaiva sākṣitvāt, ity arthaḥ.

[152]

परार्थसंहतानात्मभोग्यकर्त्तादिबोधिना ।

विरोधात्तद्विरुद्धोऽर्थः प्रत्ययेनेक्ष्यते कथम् ॥ १५२ ॥

By the cognition which makes known the not-self consisting of being enjoyed, agency, etc., which are collocations for the sake of another, how is it possible to see a content (self) opposed to it, because of the opposition ?

The witness is not the content of the empirical *pramāṇas*. It is not an agent; nor is it what is enjoyed. It is not for the sake of another, i.e. it is not an instrumental value. So, it cannot be known by the cognition which has for content the cognizer, etc.

[153]

इच्छाद्वेषादिरप्येवं नाऽऽत्मनो धर्म इष्यताम् ।

कामः संकल्प इत्येवं मनोधर्मत्वसंश्रयात् ॥ १५३ ॥

Thus, desire, aversion, etc., too, are not admitted to be the characteristics of the self; because they are declared to be the features of the mind in the text 'Desire, resolve', etc.

It cannot be argued that since desire, etc., belong to the self, agency, etc., also must belong to it. Desire, etc., are declared by Scripture to be the features of the mind.

1. BU, I, v, 3.

NTV—yathā kartṛtvādiḥ na ātma-dharmah, kiṁtv avidyā-kalpitaḥ, evam icchā-dveṣādir api na ātma-dharmah, kiṁtu avidyā-kalpita eva, ātmanah pramāṇa-³viśayatvena tad-gatecchādīnām api māna-meyatvā-bhāvāt, dr̥śyatvāc ca icchādīnām.

[154]

स्वपरोभयहेतुत्वे ह्यनिर्मोक्षप्रसङ्गतः ।

सम्यङ्निरूपणे चैषामविद्याकार्यतैव हि ॥ १५४ ॥

If either themselves or some other or both be the cause (of desire, etc.) there is the contingency of non-release. On closer examination, they turn out to be the effects of nescience.

An inquiry into the nature of desire, etc., does not yield any conclusion. What is the cause of desire, etc.? Are they self-caused, other-caused, or both? None of these alternatives is sound. If desire, etc., are self-caused, they cannot be removed. If they are other-caused, there will be infinite regress. The third alternative involves a contradiction. Therefore, we say that desire, etc., are the result of nescience. They belong to nescience, which does not brook inquiry and yet is immediately experienced, e.g. the blue colour of the sky.

[155]

इच्छादीनां स्वहेतुत्वेऽनर्थं कुर्यात्कथं स्वयम् ।

आत्मा जानन्न्यथा शत्रोरात्मनोऽतो न युज्यते ॥ १५५ ॥

If desire, etc., be caused by oneself, then how is it that one brings evil upon oneself, knowing that it is so, as on the enemy? So it is not proper.

The soul cannot be the cause of desire, etc. These are of the nature of evil. And, no one would consciously cause evil for oneself.

[156]

तथा परनिमित्तत्वेऽनर्थस्यापरिहारतः ।

नैकान्तिकफलत्वं स्याद्रोगादिपरिहारवत् ॥ १५६ ॥

Likewise, if the supreme soul (i.e. God) were the cause, evil would not get remedied, and there would be no constancy of fruit. It would be like the temporary cure of disease, etc.

If God be the cause of desire, etc., then they cannot be rooted out completely, for God may cause them even in a released person. So, even if they are once removed, they may re-appear.

[157]

करणैः संहतिं चर्ते परिहारः कुतो दृशेः ।

तथोभयनिमित्तत्वे नैकान्तिकफलोदयः ॥ १५७ ॥

How can the seer (i.e. the released soul) find remedy without instruments and the collocation (viz., body)? If both cause (desire, etc.), there would be no rise of constant fruit.

It cannot be said that a released soul will have the power to remove, again, the desire, etc., caused by God. For, how can the released soul do anything, as it has no instruments and auxiliaries of action ?

If it be held that both the soul and God are responsible for the rise of desire, etc., even then it is not possible to secure release that will last for ever.

[158]

पराभिप्रायानियमान्नैव स्यान्मोक्षनिश्चितिः ।

निर्हेत्वविद्याकलुप्तौ तु दोषः कश्चिन्न विद्यते ॥ १५८ ॥

Since the will of the supreme would be without regulation, there would be no certainty of release. But if nescience which is without cause be the cause, no defect whatever is seen.

So, if God be regarded as the cause of desire, etc., there is the defect of the impossibility of release. In the view that nescience is their cause, there is not this defect.

NTV—na ātmā kartrādi-rūpaḥ kiṃtu bodha-lakṣaṇaḥ.....tasminn evā 'tmani pratiyamānaḥ kartṛtvādi-pramukho-'nārtha-vrātaḥ paramārthato na bhavati, kimtv avidyaka iti.....asmākaṃ tu anādy-avidyā-vijṛmbhitatvābhyupagamāt na kaścid doṣaḥ.

[159-160 a]

तद्वर्जनस्य संसिद्धेः प्रसिद्धोपायसंश्रयात् ।

परागर्थप्रमेयेषु या फलत्वेन संमता ॥ १५९ ॥

संवित्सैवेह मेयोऽर्थो वेदान्तोक्तिप्रमाणतः ।

Since the removal of that (nescience) by resorting to the well-known means is well established, the same

consciousness (*saṁvit*), which is accepted as the fruit in the case of the external objects of knowledge, is the sense to be known, here, through the Vedāntic testimony as the means of valid knowledge.

In the state of release there is the removal of nescience. And so, desire, etc., are also removed there. Without the material cause, the effect cannot exist, and nescience is the material cause of desire, etc.

How is the removal of nescience brought about? The self itself is the means to the removal of nescience. In the case of one who is endowed with all the qualifications for Vedānta-study and who has gained the true teaching, the self-luminous self manifests itself and destroys the nescience which is located in itself.

The reflection of the intelligence-self in the external objects when they are known through means of valid knowledge is technically called the 'fruit'. The prototype of this reflection is the content of Vedānta.

NTV—jñānam ajñānasyaiva nivartakam iti loke prasiddham, yathā ghaṭa-śukty-ādi-jñānam tat-tad-ajñāna-nivartakam, nivartakam eva arthāt prakāśakam, pramāṇam iti hi sthitiḥ.....tasmād ātma-jñānam eva ātmajñāna-tat-kārya-nivṛttau sādhanam yathā veṇujopy agniḥ taṁ sa-mūlam dahati, svaṁ ca śāmyati tadvat.

pratyakṣādeḥ advayānubhavāt anya-viśayatvaṁ na kalpayet, kiṁtu tad-viśayatvam eva kalpayet ity arthah. tasmād ākāśādi-prapañce pramāṇābhāvāt asau avidyā vijṛmbhata iti, jñānan nivr̥ttir mokṣa upapannah.

[160 b-161 a]

अप्रामाण्यप्रसक्तिश्च स्यादितोऽन्यार्थकल्पने ॥ १६० ॥

वेदान्तानामतस्तस्मान्नान्यमर्थं प्रकल्पयेत् ।

If some other content be assumed, the Vedāntas would become unauthoritative. Therefore, let no other content be assumed.

For empirical *pramāṇas*, external objects are regarded as contents. This, however, is not true. Even for empirical *pramāṇas*, we say, the self is the content; i.e. they have as their object the conditioned self; whereas the content of Vedānta is the unconditioned self.

[161b-162 a]

नन्वेवमपि मानत्वव्याघातः स्यात्क्रियाविधेः ॥ १६१ ॥

वेदान्तेष्वप्यनाश्वासस्तथा च प्रसजेद्भुवम् ।

“Now, even thus there would be contradiction of validity for injunction of rites. And likewise, even as regards Vedāntas there would result loss of faith.”

Pūrvapakṣa : If what the Vedānta teaches is true, the teaching of the *karma-kāṇḍa* cannot be true. If that be the case, one may not have faith in any part of the Veda, including the Vedānta.

[162 b-163 a]

नैतदेवं यतोऽशेषमानानामपि मानता ॥ १६२ ॥

आ परात्मावबोधात्स्यात्तत्र सर्वसमाप्तिः ।

It is not thus; for all means of valid knowledge are valid till the realization of the supreme self; and in that all end.

The validity of the ritual teaching of the Veda, as of all empirical *pramāṇas*, lasts till the rise of knowledge. The Vedānta, however, is supremely valid because its content is the highest truth.

NTV—ukta-lakṣaṇā-'tmāvabodhāt prāg aprāmāṇyaṁ na sakyate prasamjayitum sarva-pramāṇānām avyāhatatveṇa prāmāṇyopapatteḥ,

tasmād aikātmya-jñāna-bādhitatvād saṁsāro mithyaiveti bhāvaḥ.

[164 b-165 a]

कर्माण्यतो विधीयन्तेऽविद्यावन्तं नरं प्रति ॥ १६४ ॥

न तु विध्वस्तसकलकर्महेतुं द्विजं प्रति ।

Rites, therefore, are enjoined on the man who is endowed with nescience, and not on the twice-born for whom the seed of all action has been destroyed.

Karmas are for him who is endowed with nescience, and who considers himself to be a man. Therefore, the *karmakāṇḍa* is an empirical *pramāṇa*, and is valid only till the rise of absolute knowledge. There is no injunction to perform *karma* for him who has gained wisdom, and who has risen above all the conditions that make for finitude.

[165 b-166 a]

सर्वकर्मनिरासेऽतो ह्यधिकारो विवेकिनः ॥ १६५ ॥

यथोक्तन्यायतः सिद्धो न तु कर्मसु कर्हिचित् ।

Hence, to the discriminating there is eligibility, indeed, for repudiation of all action, and not for actions in the least ; this has been settled through the aforesaid reasoning.

He who seeks knowledge has no need to perform *karma*. He has discrimination and dispassion. He has only to renounce the world and study the Vedānta. That is the means to *mokṣa*. Therefore, it is only in regard to the ignorant that there is the injunction of rites. Such injunction cannot reveal the truth.

NKL.—*karma-phalatve mokṣasya sātīṣayatvā-'nityatvādi-prasakter ity arthah.*

[166 b-167 a]

कारकव्यवहारे हि शुद्धं वस्तु न वीक्ष्यते ॥ १६६ ॥

शुद्धे वस्तुनि सिद्धे च कारकव्यापृतिस्तथा ।

If there be the operation of causal agents, verily, the pure reality is not seen; and if the pure reality is attained, there would be no operation of causal agents.

Karma is the activity of such causal factors as the agent, etc. If these factors exist, there will not arise even the desire for knowledge, and it will not be possible to intuit the pure reality. Therefore, the performance of *karma* is only till knowledge has not arisen. When there is discriminative knowledge, *karma* is given up.

NKL—kartrādy-abhimānasya tad-vilakṣaṇa-brahmābhimānasya ca virodhād ity āśayaḥ.

[167 b-168 a]

कारकाकारकधियोर्नैकदैकत्र वस्तुनि ॥ १६७ ॥

विरोधात्संभवोऽस्तीह प्रकाशतमसोरिव ।

The cognitions of agent and non-agent are not possible in the one reality at one and the same time, because they are opposed (to each other) like darkness and light.

The wise one has the knowledge of the self as non-agent. And so, to say that such a one has eligibility to perform action carries no meaning. Agency and non-agency cannot co-exist.

NKL—yathā annam madhu-samyuktam madhu cā 'nnaṇa samyuktam, evam tapaś ca vidyā ca samyuktam bheṣajam mahat—iti smaraṇāc chuddha-vastu-darsane kāraṇam vyāpāraḥ syād atrāha—kāraketi. smṛtau vidyā-śabdena saguṇa-jñānam uktam ity āśayaḥ.

[168 b-169 a]

अविरोधः क्रमेण स्यात्स्थितिगत्योरिवेति चेत् ॥ १६८ ॥

नाऽऽत्मज्ञानस्य कूटस्थवस्तुतन्त्रत्वहेतुतः ।

“Let there be no opposition, through sequence, as for standing and walking.” If thus it be said, no ; for the reason that self-knowledge is dependent on the immutable reality.

It may be said that there is sequence as between the sense of agency and the sense of non-agency. While, we admit, there may be the sense of agency before the rise of the sense of non-agency, the other way is impossible. After the knowledge of Brahman which is non-agent has arisen, there can be no sense of agency at all.

NTV says that even the sequence of agency and non-agency is unintelligible.

nā ca pūrvam kartṛtvam paścād akartṛtvam ity avirodha iṣyata iti vācyaṃ—avidyayā kartṛtvasya jñānotpatteḥ prāg apy asatvāt. paramārthatas tu kauṭasthyād eva nirastam, tad uktam—tvam kuru tvam tad eveti pratyayāv ekakālikau, eka-nīḍāu katham syātām viruddhau nyāyato vada—iti.

[169 b-170 a]

नौण्यात्मको मितो वह्निः क्रमशोऽक्रमशोऽथवा ॥ १६९ ॥

वस्तुतः शीततामेति कर्तृतन्त्रं तथा भवेत् ।

Fire which is known to be of the nature of heat does not, of its own accord, become cold, either in sequence or otherwise. What is dependent on an agent admits of that (sequence).

The nature of a thing cannot be altered. It is not within the power of the agent to do so. No agent can make fire cold.

[170 b-171 a]

भेदाभेदात्मकत्वाच्चेदेकस्यापीह वस्तुनः ॥ १७० ॥

अविरोधो न तन्न्याय्यं त्वदुक्तार्थविरोधतः ।

“Of the one reality, because of difference *cum* non-difference, there is no conflict (of being agent and non-agent).” This does not stand to reason, because the sense of what you say is conflicting.

The *Bhedābheda-vādin* contends that Brahman is both agent and non-agent. The reply is that his statement involves self-contradiction. How can one and the same thing be agent as well as non-agent, identical and yet different?

[171 b-172 a]

नानेकस्यैकता न्याय्या तथैकस्याप्यनेकता ॥ १७१ ॥

वस्तुतन्त्रत्वतो बुद्धेर्न चेदेवं मृषा मतिः ।

It does not stand to reason that there is oneness for the many or manyness for the one. Cognition is dependent on the object. If this were not so, cognition would be false.

The contradiction is further explained. If a thing is identical, it cannot be different ; if different, it cannot be identical. Cognition must be in accord with the nature of the thing cognized. And, a thing cannot possess contradictory natures.

NTV—bhedābheda - jñānāyor anyonyasya viśayopamardanam antareṇa prāmāṇyaṁ nopapadyate, tad-viśayayoḥ paraspara-viruddhatvena bhāvābhāvavat samuccayānupapattēh.

yuktaṁ tatra puruṣa-prayatna-sādhyayoḥ vṛhi-yava-yāgayoḥ buddhī vikalpena-prāmāṇyam aśnuvāte iti. bhedābheda-buddhyos tu puruṣa-prayatnā-'sādhyā-gocarayor idaṁ rajatam nedaṁ rajatam iti jñānavad anyatara-viśayāpahāram antareṇa prāmāṇyaṁ nopapadyate.

[172 b-173 a]

यथा चास्य विरुद्धत्वं तथोदर्के प्रवक्ष्यते ॥ १७२ ॥

ऐकात्म्यस्यैव मेयत्वं तस्यैवाप्रतिबोधतः ।

And, how there is contradiction will be explained later. Being-the-object-of-valid-cognition (*meyatva*) is for the one self alone, for that alone is unknown.

The one self alone is the content of valid knowledge, not the world. There is no unknownness in the world, for we experience it. It is the self that remains unknown, and needs to be realized. The world is superimposed on the self.

*NTV—bhedābhedayoḥ paraspara-virodhād anyatarasyā 'prāmāṇi-
katvāt bādhyām sāmānādhikaranyam.*

[173 b-174 a]

वस्तूनीह प्रमीयन्ते व्यावृत्तानि परस्परम् ॥ १७३ ॥

अभावेन प्रमाणेन तेनोक्तं ते विरुध्यते ।

“Things are known here, as mutually exclusive through means of valid knowledge which are different (viz., perception, etc.). Therefore, what you have stated stands contradicted.

Pūrvapakṣa—It is wrong to say that there is no evidence for plurality. Perception, etc., are the *pramāṇas* which make known a plurality of things.

[174 b-175 a]

भेदे वा यदि वाऽभेदे संसृतेर्ब्रह्मणा सह ॥ १७४ ॥

ब्रह्मणोऽब्रह्मता तद्वद्विद्यानर्थक्यसांशते ।

“Whether the empirical world is different or non-different from Brahman, there would be non-Brahmanhood for Brahman and likewise there would be futility of knowledge, and being endowed with parts.

It was stated (in v. 172 b-173 a) that the world is superimposed on Brahman. Is the world different from Brahman or identical with it? If different, there would be duality, and Brahman would become a limited entity. If there be identity or non-difference, is the world non-different from Brahman, or is Brahman non-different from the world? If the former be the case, there is no need for Brahman-knowledge. If the latter, Brahman will be an entity with parts.

[175 b-176 a]

ब्रह्माविद्यावदिष्टं चेन्ननु दोषो महानयम् ॥ १७५ ॥

निरविद्ये च विद्याया अनर्थक्यं प्रसज्यते ।

“If it be admitted that Brahman has nescience, then this is a great defect. And if it be free from nescience, there results futility for knowledge.”

If it is stated that the world is different from Brahman, and that there is neither the futility of knowledge nor the limitation of Brahman because the world is not real, being a product of nescience, then what this nescience is must be explained. Is nescience located in Brahman or in the jīva, or is it independent? Brahman cannot be the locus of nescience, because it is of the nature of knowledge and is all-knowledge. For the same reason the jīva which is non-different from Brahman cannot be the locus. If nescience be an independent entity it cannot be removed by knowledge.

[176 b-177 a]

नाविद्याऽस्येत्यविद्यायामेवाऽऽसित्वा प्रकल्प्यते ॥ १७६ ॥

ब्रह्मदृष्ट्या त्वविद्येयं न कथंचन युज्यते ।

No; nescience is predicated (of Brahman) (by the jīva which is) in the state of nescience. From the standpoint of Brahman, however, this nescience is by no means intelligible.

Siddhānta—Brahman is the locus of nescience. This, however, is only from the empirical point of view. The supreme truth is that there is no nescience at all; only Brahman is.

NTV—*na cā 'kāra-ropasya brahmaṇaḥ kāra-ropāśraya-viśayat-vavirodhaḥ kāra-kāra-virodhasya avidyāyām eva āsitvā'vakalpanāt, tad evam brahmaiva avidyāyām eva āsitvā avidyāyāḥ āśrayaḥ īśvaro'ntar-yāmī mukto baddhaḥ śiṣyo gurur ityādi sarva-vyavahāra-bhāg bhavati.*

[177 b-178 a]

यतोऽनुभवतोऽविद्या ब्रह्मास्मीत्यनुभूतिवत् ॥ १७७ ॥

अतो मानोत्थविज्ञानध्वस्ता साऽप्येतथाऽऽत्मताम् ।

As nescience is experienced like the experience 'I am Brahman', so, being destroyed by knowledge generated by valid means of knowledge, it also attains selfhood.

Nescience is not the content of *pramāṇa*; it is in the sphere of the experience which is Brahman. Brahman is the basic consciousness which is common to both *pramāṇa* and *apramāṇa*. Scripture, etc., remove only the delusion of those who believe that it is non-existent.

Since nescience is not the content of *pramāṇa*, since it is established only on the basis of the witness-self, and since it is destroyed by the psychosis born of the Vedānta-text, it is not real. And, what is called the destruction of nescience is Brahman itself. When destroyed by *pramāṇa*, nescience attains Brahman-hood and gets resolved there.

NTV—yathā brahmāsmīti anubhūtiḥ anubhava-siddhā tarkaṇa nāpalapanīyā, evaṃ avidyā tat-sambandhaś ca nāpalapanīyaḥ, mānottha vijñānasya avidyā-dhvastiḥ prayojanam ity āha—ata iti. avidyāyāḥ param pāram tārayasi, bhūyaścānte viśva-māyā-nivṛttiḥ mām eva ye prapadyante māyām etām taranti te,

[179 b-180 a]

अविद्यावानविद्यां तां न निरूपयितुं क्षमः ॥ १७९ ॥

वस्तुवृत्तमतोऽपेक्ष्य नाविद्येति निरूप्यते ।

He who is endowed with nescience cannot establish it; in consideration of the nature of reality it is established that there is no nescience.

The ignorant do not have valid cognition of nescience and its relation, for there is no *pramāṇa*; and if there be *pramāṇa*, nescience will cease to be nescience. Nor do the wise cognize nescience, for there is no nescience for them. So, nescience is established only through the witness-self.

NKL—nirūpamāṇākṣamatvaṁ ajñānatvād iti draṣṭavyam. ajñānam mithyā apramāṇikatvāt sūkti-rajatavad iti.

[180 b-181 a]

वस्तुनोऽन्यत्र मानानां व्यापृतिर्न हि युज्यते ॥ १८० ॥

अविद्या च न वस्त्वष्टं मानाघातासहिष्णुतः ।

It does not stand to reason that the means of valid knowledge function except in relation to what is real. And nescience is not admitted to be real, for it cannot bear the scrutiny of the means of valid knowledge.

An inference is here given to show that nescience cannot be known through *pramāṇa*. What is not a thing cannot be known through *pramāṇa*, like the horns of a hare. Nescience cannot be known through *pramāṇa* because it is not a thing.

NTV—*yad vastvanyan na tan mānagocarah yathā naraviṣāṇādi, avidyā ca na vastumānasambandhā-'sahiṣṇutvād ity arthaḥ.*

[181 b-182 a]

अविद्याया अविद्यात्वं इदमेव तु लक्षणम् ॥ १८१ ॥

मानाघातासहिष्णुत्वमसाधारणमिष्यते ।

Of the nescience-nature of nescience this is the non-common definition that it does not stand the scrutiny of the means of valid knowledge.

Nescience does not stand the scrutiny of *pramāṇa* ; for that is its nature.

[182 b-183 a]

त्वत्पक्षे बहु कल्प्यं स्यात्सर्वं मानविरोधि च ॥ १८२ ॥

कल्प्याऽविद्यैव मत्पक्षे सा चानुभवसंश्रया ।

In your view, many assumptions will have to be made, and all opposed to validity. In my view, nescience alone has to be assumed, and that too as dependent on experience.

Here the *siddhāntin* says that, while in the view of *bhedābheda* several assumptions have to be made, in his own view only nescience has to be assumed. The assumptions of *bhedābheda* are that as between Brahman and the world there are difference and non-difference, that there is the destruction of bondage which is beginningless and real, that release is the fruit of *karma*, and that it is eternal, etc. These assumptions may be made if they are valid. But everyone of them involves a contradiction.

Nescience, which we assume, is established by the witness-intelligence.

NKL—*sarvasya bhinnābhinnatvaṁ saṁsārasya anādeḥ paramārthasya nivr̥ttimatvaṁ, kṛtakasya mokṣasya nityatvaṁ ca mānaviruddhaṁ kalpyam ity arthaḥ.*

AVS—*bhedābhedavādi-pakṣe anāder bandhasya paramārthasya nivr̥tṭiḥ kalpyā, sā ca pramāṇa-viruddhā, na hy anādeḥ paramārthasya 'tmano nivr̥ttir dr̥ṣṭā, sāder mokṣasya nityatvaṁ ca kalpyeta, tac ca pramāṇa-viruddhaṁ, yat kṛtakaṁ tad anityam iti sthitatvāt sarvaṁ vastu bhinnābhinnam iti ca sarva-pramāṇaviruddhaṁ parikalpyata iti.*

[183 b-184 a]

तत्त्वमस्यादिवाक्योत्थसम्यग्धीजन्ममात्रतः ॥ १८३ ॥

अविद्या सह कार्येण नाऽऽसीदस्ति भविष्यति ।

On the mere rise of the true knowledge generated by the sentence 'That thou art', nescience, along with its effects, was not, is not and will not be.

That nescience is not real is realized when the supreme wisdom dawns on hearing the great text 'That thou art.'

[184 b-185 a]

अतः प्रमाणतोऽशक्याऽविद्याऽस्येति निरीक्षितुम् ॥ १८४ ॥

कीदृशी वा कुतो वाऽसावनुभूत्येकरूपतः ।

Therefore, it is impossible to demonstrate through means of valid knowledge that nescience is in (Brahman), or as of what form it is, or whence, for there is only experience (of it).

Questions about nescience, as to where it is, whence it is, what it is, etc., cannot be answered intelligibly. It is only established through experience.

[185 b-186 a]

देवताद्रव्यकर्तादि ननु वस्त्वस्तु नाद्वयम् ॥ १८५ ॥

सर्वलोकप्रसिद्धत्वादद्वयस्याप्यसिद्धितः ।

“Now, deity, material, agent, etc.—let these be real and not the non-dual, because they are well known to all people, and non-duality is not established.”

Pūrvapakṣa—The world of plurality is real because it is well known to all people. The non-dual Brahman is not known to people ; so it cannot be real.

[186 b-187 a]

नैतत्साधु प्रमाणानां सर्वलोकाभिधं न हि ॥ १८६ ॥

प्रमाणमस्ति यत्प्राणाद्भवानेवं प्रभाषते ।

This is not sound. Among the means of valid knowledge, there is no means of valid knowledge called ‘known to all people’, on whose strength you speak thus.

Siddhānta—There is no *pramāṇa* called ‘known to all people.’

[187 b-188a]

अभिमानश्च यत्नायं सर्वलोकस्य गम्यते ॥ १८७ ॥

प्रत्यक्षोऽर्थोऽयमित्येवं मिथ्यात्वं तस्य चोदितम् ।

The conceit (of the form) ‘This object is perceived’ is experienced by all people. The illusoriness thereof has been declared.

It is true that people imagine ‘I see this,’ etc. But all such imagination is illusory because it is sublated by the knowledge of the true self.

[188 b-189 a]

प्रत्यक्षं च यथाऽऽसन्नं परोक्षाद्वस्तुनो मतम् ॥ १८८ ॥

सर्वप्रत्यक्तमस्तद्वद्बोधो वाक्योत्थ आत्मनि ।

As perception is thought to be of what is nearer than the mediate object, so is there knowledge of the self as the inner-most of all, generated by the sentence (of Scripture).

If it be said that the cognition of the self got from Scripture cannot sublate the world that is sense-perceived, because that cognition is not immediate, like inference, we ask : what is meant by the non-immediacy of the Scriptural cognition ? Does it mean (1) not making known a content that is proximate, (2) not making known a content that is immediate, (3) not being the locus of immediacy, or (4) being devoid of independence ?

The first alternative is not correct. There is nothing nearer or more proximate than the inner spirit. So, the knowledge that is born of the Vedānta-texts has a content which is most proximate.

AVS—pratyakṣād āgamasya sannihitārthatvāt, pratyakṣād āgamo balavān.....yathā pratyakṣānumānayor virodhe pratyakṣasyaiva balavatvam anumānāt pratyakṣasya sannihitārthatvāt. sannihitārthatvañ ca liṅga-vyavadhānābhāvāt. atra ca tadbhāvāt. āgamasya tu pratyakṣāt sannihitārthatvam ātma-viśayatvāt. pratyakṣasya vā 'san-nihitārthatvañ parāg-viśayatvāt. ato durbalam ato bādhyatvañ ato mithyātvañ iti.

[189 b-190 a]

आत्मानुभवमाश्रित्य प्रत्यक्षादि प्रसिध्यति ॥ १८९ ॥

अनुभूतेः स्वतः सिद्धेः काऽपेक्षा ह्यात्मसिद्धये ।

Depending on self-experience, perception, etc., are established. As experience is self-established, what

need is there (for means of valid knowledge) in the matter of establishing the self?

The second alternative is not possible. Perception, etc., are not self-established, because they are inert; nor are they established through *pramāṇas*, for then there would be an infinite regress; nor are they not established, for in that case no object can be known. Perception, etc., are established only on the basis of the self which is experience. The self, however, is not dependent on any other. So, it is intrinsically immediate. The knowledge of it that rises from the study of Vedānta cannot have for its content something which is not immediate.

NTV—pratyakṣa-sphuraṇasya āgama-gamyā-'tmānubhavā-'dhīnatvāt āgamo balavān, durbalaṁ pratyakṣam ity ato bādhyatvān mithyātvam.....pratyakṣa-sattāyā ātmādhīnatvāt ātma-sattāyāś ca pratyakṣā-nadhīnatvāt ātma-viṣayoyam āgamo balavān.

AVS—pratyakṣa-sphuraṇasya āgamagamyātmādhīnatvād āgamo balavān, pratyakṣam durbalam.

[190 b-191 a]

आत्मानुभवपूर्वत्वात्प्रत्यक्षत्वस्य न स्वतः ॥ १९० ॥

आत्मैकगम्यमैकात्म्यं वेदान्तेष्ववगम्यते ।

Since perceptuality is preceded by self-experience and does not exist of its own accord, the one self is known by the self alone—thus it is understood from the Vedāntas.

The third alternative, that the cognition generated from Scripture is not the locus of immediacy, is not tenable. Even perception is not immediate of its own accord, because it is inert. It is immediate only because of its relation to the self-nature which is eternally immediate. So, the immediacy of perception is dependent on the self-established

self-experience. Similarly, Scriptural cognition, too, which is dependent on the same, may well be the locus of immediacy.

Nor is the fourth alternative—that scriptural cognition is devoid of independence—sound. Validity is intrinsic. The Vedāntas which have the self for purport are not expectant of anything else. And the self-cognition which arises from them is intrinsic.

AVS—pratyakṣa-sattāyā ātmādhīnatvād ātma-sattāyās ca pratyakṣatvāt tad-adhīnatvābhāvat āgama ātma-viṣayo balavān pratyakṣam durbalam.

[191 b-193 a]

यच्चाप्युक्तं श्रुतिस्मृत्योः क्रियाया एव सिद्धितः ॥ १९१ ॥

अतः क्रियातिरेकेण नास्त्यन्यन्मुक्तिसाधनम् ।

केन चोक्तं क्रिया मुक्तेः साधनत्वं न गच्छति ॥ १९२ ॥

तमेतमिति नाश्रौषीः संस्कारा इति च स्मृतिम् ।

As for what was said, that because Scripture and Traditional Code establish rites alone, there is no means to release other than rites, by whom was it said that rites do not attain the status of means to release? Have you not heard the Scriptural text ‘That one’¹, etc., and the Traditional Code ‘Purificatory rites’²?

It was stated by the *pūrvapakṣin* (in v. 33) that Scripture and Traditional Code establish rites alone, and that rites are the means to release. Now, are rites the direct means to release, or do they serve as the means in sequence? Not the first, because they cannot bring about release; and there are Scriptural texts which say that release is not attainable through *karma* (e.g. *Mahānārāyaṇa Upaniṣad*, x, 5; and *Kaivalya*, 2.). The second alternative is acceptable to us. Rites

are instrumental to release either by generating the desire for knowledge or through purification.

1. *BU*, IV, iv, 22. See note on v. 14.

2. See *Gautama-dharmasūtra*, ed. by L. Srinivasacharya (Government Oriental Library Series, Bibliotheca Sanskrita No. 50, Mysore, 1917), viii, 19-22, pp. 127-132.

NKL—*nānyaḥ panthā iti sākṣātsādhana-tva-niṣedhād vividiṣādvārā saṁskāra-dvārā vā mukti-hetutvaṁ vācyaṁ tad-iṣṭam eva.*

AVS—*kriyayaiva kaivalya-sādhanaṁ cen nāsti pramāṇam, kriyāpi kathaṁcit śuddhi-dvāreṇa sādhanam ced asti pramāṇam.*

[193 b-194 a]

यद्यप्यैकात्म्यधीः साक्षाच्छ्रुतिस्मृत्योर्न चोद्यते ॥ १९३ ॥

तथाऽप्यसौ न तद्वाह्या ताभ्यामेवाऽऽत्मबोधनात् ।

Though the cognition of the one self is not directly enjoined by Scripture and Traditional Code, it is not outside of them, for through them alone there is self-knowledge.

Although knowledge of the self is not the content of injunction (*acodita*), it is not something which is alien to the Veda (i. e. not *avaidika*). It is taught in Scripture and Traditional Code, even as knowledge of *karma* is taught therein. Hence, it stands to reason that self-knowledge is the means to the human goal, viz. release.

AVS—*śrutismṛtyavihitam api brahmātmaikatva-jñānam na śruti-smṛti-bāhyaṁ śruti-smṛti-janyatvāt.*

[194 b-195 a]

यच्च न ज्ञाप्यते वेदे वस्त्वित्येतदचूचुदः ॥ १९४ ॥

तच्चापहस्तितं चोद्यं वक्ष्यते च निराकृतिः ।

As for what was stated (in v. 33) that in the Veda the reality is not made known, that objection has been refuted (in v. 123) and its (further) refutation will be set forth later on.

The contention of the *pūrvapakṣin* that the Veda does not teach the oneness of self has already been refuted, and will be refuted again.

[195 b-196 a]

विधावसति वाक्यस्य यच्चावोचोऽप्रमाणताम् ॥ १९५ ॥

स्फुटन्यायोक्तिभिस्तच्च यत्नात्परिहरिष्यति ।

As for what you said that, in the absence of injunction, the sentence (about Brahman knowledge) would be invalid, that will be refuted¹ with care through clear and logical arguments.

The objection raised in v. 34 is referred to here.

1. NKL—*parihariṣyatīti pāṭhe bhāṣyakāra īti śeṣaḥ.*

[196 b-199 a]

यच्चोक्तं न पुमर्थोऽस्ति वस्तुमात्रावबोधनात् ॥ १९६ ॥

आख्यानप्रचुरा यस्मात्प्रय्यन्ता इह लक्षिताः ।

रामो राजा बभूवेति न ह्येतावत्प्रबोधतः ॥ १९७ ॥

संभाव्यते पुमर्थोऽतो विध्यर्थविरहात्कचित् ।

परार्थतैव सर्वत्र ज्ञानस्येहोपलक्ष्यते ॥ १९८ ॥

ज्ञात्वाऽनुष्ठानवचनाद्विद्वान्यजत इत्यपि ।

And as for what was said: “There is no human goal by a knowledge of the mere reality, for the

Vedāntas are characterized by a profusion of stories ; by a knowledge thus ‘There lived a king named Rāma’, the human goal does not result, as there is not any injunctive sense ; everywhere, here, knowledge is indicated as being for the sake of another ; for there is the statement about performance after knowing, thus : ‘ The learned one performs sacrifice’.”

Here, the objection stated in v. 36 is alluded to. The view of the *pūrvapakṣin* is that the Vedāntas are subsidiary to *karma*, even as the looking into clarified butter by the sacrificer’s wife is a subsidiary to the *Darśapūrṇamāsa* rites.

[199 b-200 a]

उक्तोऽत्र परिहारः प्रागूर्ध्वं चापि प्रवक्ष्यते ॥ १९९ ॥

विद्याफलस्य प्रात्यक्ष्यादितिहेतुसमाश्रयात् ।

The reply to it has been stated already (v. 129) and will be stated hereafter also, in reliance on the ground that the fruit of knowledge is immediate.

The reply has been stated already, and will again be stated. We rely on the texts which speak of the experience of the wise. Self-knowledge leads to the destruction of evil in its entirety and to the manifestation of unlimited bliss. And so, Vedānta is not an auxiliary of the injunction of *karma*.

[200 b-201 a]

ननु निर्धूतशोकादि फलं यच्छ्रूयते श्रुतौ ॥ २०० ॥

आत्मस्तुतिरसौ तस्मात्त्वन्मनोरथकल्पितम् ।

“ Now, as for what is declared in Scripture about the fruit of freedom from sorrow, etc., that is an eulogy of the soul. Therefore, what you say is your imaginary dream”.

Pūrvapakṣa—The texts ‘The knower of the self crosses sorrow,’ etc., are intended to praise the soul which has the eligibility for ritual action. They do not teach the wisdom about the non-dual self.

[201 b-202]

अत्रोच्यते ह्यभिप्रेतं गम्यमानं प्रमाणतः ॥ २०१ ॥

फलं तत्संपरित्यज्य कस्माल्लक्षणया स्तुतिम् ।

अश्रुतामनभिप्रेतां कल्पयस्यबुधो यथा ॥ २०२ ॥

Here it is replied: Leaving the fruit which is intended and which is validly cognized, why do you, like one ignorant, assume through secondary implication eulogy which is neither declared in Scripture nor intended (by it)?

Siddhānta—On what ground do you say that the texts quoted above do not have for purport the destruction of sorrow, etc.? (1) Is it because it is not wished for, or (2) because it is not known from the sentence, or (3) because it is not known through other means of valid knowledge? Not the first; for, every one desires the fruit in the form ‘Let me be happy; let not sorrow come to me’; and it cannot be said that this fruit is not wished for. Not the second; for, the sense we have urged is readily understood from the text. Nor the third; for, the experience of the wise is the evidence for it.

You think that the text in question is a case of *abhūtārthavāda*. On what ground, we ask. Is it known directly from the statement? Or, is it what is wished for? Or, is it established through some other *pramāṇa*? Not the first; for, from the statement itself we do not understand any praise of the soul; it has only to be assumed by implication; and such an assumption is not proper because it would go against the fruit which is known from Scripture, and which is experienced by the wise. Not the second; for, praise of the soul cannot be what is wished for; what is wished for is the attainment

of happiness, the destruction of sorrow, and the means thereto. Nor the third; for, it is not known through any *pramāṇa* that the destruction of sorrow, etc., constitute the praise of the soul.

NKL—jñāna-phalasya kimaniṣṭatvāt tyāgaḥ, apratīyamānatvād vā, bādhitatvād vā. nādyā ity āha—abhipretam iti. sukha-duḥkha-pari-hāratvād ity arthaḥ. avagata-saṅgatikasya pratīte na dvitīya ity āha—gamyamānam iti. na tritīyaḥ apauruṣeyatayā vidhi-vākyāt svataḥ pramāṇatvād ity āha—pramāṇata iti.

AVS—jñāna-phalasya karṣṇtvādy-upamardasya pratyakṣatvād ata eva karṣṇtvādi- pratibhāsanasya viduṣo bādhitānuvṛttitvāt phala-srutir nābhūtārthavādaḥ ataḥ sādhanādhikāri-bhedo vastuparatvaṁ ca vākyasya ity etam manoratham ity uktam manorathamātram.

[203-204 a]

न चास्त्येकविषयत्वं प्रत्यक्षवचसोर्यतः ।

श्रुत्यैव परिहारोक्तेः स्वप्नादिस्थानसंचरात् ॥ २०३ ॥

बहुशोऽसङ्गवचसा निःसङ्गत्वं ब्रुवाणया ।

Nor is there identity of content between the perception (I am miserable) and the Scriptural statement; the reply has been stated by Scripture itself in the text referring to the passage through dream and other states, which declares several times the unattached nature (of the self) in texts declarative of non-attachment.

The perceptual experience of the form 'I am miserable' cannot contradict the Scriptural text, because the two do not have an identical content. The experience has for its content the empirical soul. Scripture speaks about the true self which is of the nature of the eternal bliss-experience, which is the witness of the three states of experience, and which is not affected by these changing states.

[204 b-205 a]

मनोराज्यसमं मन्ये सर्वमेतत्त्वयोदितम् ॥ २०४ ॥

न प्रत्येमि यतः साक्षात्प्रत्यक्षं ज्ञानतः फलम् ।

“I consider all that has been stated by you to be a castle in the air; for I do not see the fruit of knowledge to be directly perceived.”

Pūrvapakṣa—Your belief that Brahman is pure consciousness, that agency, etc., are superimposed thereon, and that the fruit of Brahman-knowledge is the complete removal of agency, etc., is a product of your imagination. There is no direct experience of what you say.

[205 b-206 a]

श्रुतादपि न चेद्वाक्याज्जायेत फलवन्मतिः ॥ २०५ ॥

आशङ्क्येत तदैवैतद्यदेतद्भवतोदितम् ।

If the fruitful knowledge does not arise even from the sentence (That thou art) declared in Scripture, then what you have said may be raised as a doubt.

Siddhānta—Our view is not a day-dream. You may legitimately raise the doubt you have raised only if from the Vedānta text wisdom leading to release did not result. For the proper person the Veda does generate knowledge. If for the ineligible person the said wisdom does not rise, it is not the fault of the Veda.

NKL—*jñāninopi sukhādi-darśanāt, bādhitānuvṛtteḥ paribhāṣā-mātratvād, ity arthaḥ. tadyathā ahinirivayanītyādi-śruti-siddhatvāt bādhitānuvṛtṭiḥ paribhāṣāmātram.*

[206 b-207 a]

नित्यमुक्तत्वविज्ञानं वाक्याद्भवति नान्यतः ॥ २०६ ॥

वाक्यार्थस्यापि विज्ञानं पदार्थस्मृतिपूर्वकम् ।

The knowledge of the eternally free arises from the sentence, not otherwise. The knowledge of the sentence-sense is preceded by the memory of the word-senses.

For the eligible person, knowledge arises from hearing the major text 'That thou art'. It is true that all do not get this knowledge. That is because the true knowledge of this sentence can come only after there has been a correct understanding of the words constituting it. Those who do not have this understanding cannot realize the truth of the major text, even as a deaf person cannot appreciate music.

NKL—sodhitapadārthajñānavatām viśiṣṭādhikāriṇām eve'ty arthaḥ;

[207 b-208 a]

अन्वयव्यतिरेकाभ्यां पदार्थः स्मर्यते ध्रुवम् ॥ २०७ ॥

एवं निर्दुःखमात्मानमक्रियं प्रतिपद्यते ।

The word-sense is remembered for certain through co-presence and co-absence. Thus, the self free from sorrow and action is understood.

The knowledge of the word-senses too does not come to all. One must inquire into the meaning of the words through the application of the rule of co-presence and co-absence. Nor is it enough to have a knowledge of the word-senses alone. One must understand the sentence as a whole also.

NTV—kena krameṇa vākyāt tad-arthāvagatir ity apekṣāyām āha—vākyārthasyāpi ityādinā—prathamam anvayavyatirekābhyām tvāmpadārthaḥ smaryate, anantaram nirduḥkham akriyas-tvāmpadalakṣyam ātmānam pratipadyate, tadanantaram sadevetyādi-vākyebhyo brahmāsmṛiti pratyagātmany aparokṣa-pramā jāyate.

NKL—ātmano 'vasthā-īrayeṇugamād avasthā-trayasya paraspara-vyabhicārād ityādi caturvidhānvayavyatirekābhyām ity arthaḥ. śodhita-tatpadārtha-jñānam tathāpi durlabham tatrānvayavyatirekayor

The reply to this suggestion is : no. The meditations are either for the fulfilment of *karmas*, or for achieving prosperity, or for gaining release in sequence (*krama-mukti*). What we have already said with regard to *karmas* holds good as regards meditations also. In the *vividiṣā*-text (*BU*, IV, iv, 22) the word *tapas* stands for meditations.

[330]

विमुच्यमान इत्युत्तेरर्चिराद्युक्तितस्तथा ।

स्वार्थमात्रावसायित्वं नोपास्तीनां प्रतीयते ॥ ३३० ॥

Because of the text, 'Being released,'¹ and because of the text about the path of light,² it is seen that the meditations do not directly lead to release.

Upāsanas are not the direct means to release; they are the means only in sequence. As evidence, two scriptural texts are cited :

1. *BU*, IV, ii, 1.

2. *BU*, VI, ii, 15; *CHU*, V, x, 1.

NTV—*tad āhuḥ paurāṇikāḥ—brahmaṇā saha te sarve samprāpte pratisaṅcare, parasyānte kṛtātmānaḥ praviṣanti param padam-iti.*

AVS—*arcirādivākyodāharaṇam upāsanānām krama-mukti-phalatva-dyotanāya. svārtha-śabdena viriñcyādi-phala-grahaṇam.*

[331]

इत्येवमभिसंबन्धः कर्मकाण्डस्य युज्यते ।

इतोऽन्यथाऽभिसंबन्धे न किञ्चिन्मानमीक्ष्यते ॥ ३३१ ॥

It cannot be said that the Vedānta texts are invalid because their cause is defective ; for, the Veda is not the composition of any human being.

There can be no conflict of other means of valid knowledge with the Vedānta, because their contents differ.

Nor may it be said that the Vedānta cannot give rise to direct knowledge ; for the kind of knowledge one gets depends upon the nature of the object too. The object of Vedāntic knowledge is the self which is eternally immediate. So, the Vedānta texts may well generate immediate knowledge of the self.

Śaṅkara will establish this later, while refuting the view that valid knowledge requires four factors, viz., the word, reasoning, meditation and the self. He will, then, say that from the major text alone the immediate knowledge of the self arises.

[211]

नवसंख्याहतज्ञानो दशमो विभ्रमाद्यथा ।

न वेत्ति दशमोऽस्मीति वीक्षमाणोऽपि तान्नव ॥ २११ ॥

Though seeing the nine, the tenth man does not know 'I am the tenth', because his knowledge is clouded by the number nine and he is deluded.

The *pūrvapakṣin* may say that there is no need for *Veda-pramāṇa* because the self is of the nature of immediate awareness .

In reply, the *siddhāntin* cites the illustrative story of the ten travellers. The tenth man does not realize that he is the tenth because he is obsessed with the number 'nine.' And he realizes the truth—that, too, immediately—when he is told 'You are the tenth'.

[212]

अपविद्धद्वयोऽप्येवं तत्त्वमित्यादिना विना ।

वेत्ति नैकलमात्मानं प्रत्यङ्गोहाप्रबोधतः ॥ २१२ ॥

Similarly, though the duality might have been destroyed, he does not know the one self without the text, 'That thou art', etc., because he is without wisdom, due to delusion regarding the inner self.

Although one knows in general about the self, one does not know it truly because of the obstacle, viz., nescience. In order to remove this obstacle *Veda-pramāṇa* is necessary.

[213]

बुभुत्सोच्छेदिनैवास्य सदसीत्यादिना दृढा ।

प्रतीचि प्रतिपत्तिः स्यात्प्रत्यगज्ञानबाधया ॥ २१३ ॥

For him there arises firm knowledge in respect of the inner self through the texts, 'Thou art real', etc., which destroy the desire to know, sublating the ignorance regarding the inner self.

Although the self is of the nature of immediate awareness, and we are that, there may arise in us the desire to know the self which is the eternal bliss. We study the Veda and Vedānta and acquire superficial knowledge of that. In order to acquire distinct and clear knowledge of the same we should listen to the major texts. From such listening arises illumination which is unsublatable and free from doubts.

It cannot be said that when the self is known, nescience also would become a content of valid knowledge. When nescience is sublated, the self is realized ; and so in that experience there is no nescience at all.

NKL—*dr̥dhety abādhita-niściti rūpā ity arthaḥ.*

[214]

निःशेषकर्मसंन्यासो वाक्यार्थज्ञानजन्मने ।

तस्याऽऽरादुपकारित्वात्सहायत्वाय कल्प्यते ॥ २१४ ॥

Renunciation of all action is assumed to be a proximate auxiliary, because it helps in the generation of the knowledge of sentence-sense.

Renunciation of all *karma* is an auxiliary of knowledge; for it helps in the understanding of the major texts.

NTV—tatra śravaṇam śabda-śakti-nirdhāraṇāvasānaidamparya-viparyaya-vināśi, mananam bādhabhāva-parīkṣā sā bādha-buddhim niruṇddhi, ekālaṃbanapratyayāmreḍanam dhyānam tac chinatti citta-vikṣepam bhinatty aṭad-vāsanām, vedāntas tv ātmānam sākṣāt bodhayanti, tathāpi vedāntaḥ śravaṇādiṣu satsv eva 'tmavidyām prasūyante nāsatsu.

śravaṇa - manana - dhyānābhyāsāḥ śabdasya jñānotpatti - pratibandhāpanayena sahāyatām pratipadyante.

[215]

त्याग एव हि सर्वेषां मोक्षसाधनमुत्तमम् ।

त्यजतैव हि तज्ज्ञेयं त्यक्तुः प्रत्यक्परं पदम् ॥ २१५ ॥

Renunciation is the supreme means to release in the case of all. By him who renounces is to be known the supreme place which is the inner self of the renouncer.

Here by 'release' is meant knowledge. Renunciation is an auxiliary of knowledge. It is called the *supreme* means because it is the proximate auxiliary. *Karma* cannot serve as the proximate auxiliary because it involves the conceits of agency and enjoyership.

NTV—atra mokṣa-śabdena mucyateneneti brahma-jñānam ucyate.

[216]

शान्तो दान्त इति तथा सर्वत्यागपुरःसरम् ।

उपायमात्मविज्ञाने श्रुतिरेवाब्रवीत्स्वयम् ॥ २१६ ॥

Scripture itself has declared the means to self-knowledge as preceded by renunciation of all (action) in the words 'subdued, self-controlled', etc.

Scripture is cited to show that renunciation of *karma* is an auxiliary of knowledge. *BU*, IV, iv. 23 : 'Therefore, he who knows it thus becomes subdued, self-controlled, indrawn, forbearing and absorbed, and sees the self even in the self ; he sees all as the self.' Here by the word 'indrawn' (*uparatah*) is meant renunciation of obligatory and occasioned rites. It is as preceded by renunciation that the self is to be seen.

[217]

प्रवृत्तिलक्षणो योगो ज्ञानं संन्यासलक्षणम् ।

तस्माज्ज्ञानं पुरस्कृत्य संन्यसेदिह बुद्धिमान् ॥ २१७ ॥

Yoga (action) is characterized by activity ; knowledge is characterized by renunciation. Therefore, having knowledge in view let the wise one, here, renounce.

Another text is quoted here : The *Mahābhārata*, *Āśvamedhika-parvā*, 43, 26.

[218]

मुक्तेश्च बिभ्यतो देवा मोहेनापिदधुर्नरान् ।

ततस्ते कर्मसूद्युक्ताः प्रावर्तन्ताविचक्षणाः ॥ २१८ ॥

The gods, fearing release, covered men with delusion. Therefore, they, devoid of sight, began to perform rites with zeal.

It cannot be said that all might renounce for the sake of knowledge which is the means to release. The gods delude men, whom they use as their domestic animals. *BU*, I, iv, 10 : 'He who

worships another god thinking, “He is different, and I am different”, does not know ; he is as an animal to the gods.’ It is only a few that see through this delusion and escape from the herd and seek knowledge. Renunciation, therefore, is not something which comes of its own accord effortlessly and with ease.

[219]

अतः संन्यस्य कर्माणि सर्वाण्यात्मावबोधतः ।

हत्वाऽऽविद्यां धियैवेयात्तद्विष्णोः परमं पदम् ॥ २१९ ॥

Therefore, renouncing all actions and destroying nescience through knowledge of the self, let him attain the supreme place of Viṣṇu, through knowledge alone.

After renouncing the world, one ought to ‘hear’ the Vedānta texts for the sake of gaining self-knowledge. This is an originative injunction (*utpatti-vidhi*) even as the injunction to renounce is. An originative injunction is that which makes known the bare nature of an act, e.g., ‘He is to offer the *Agnihotra* oblation.’ [The other types of injunction are: applicatory injunction (*viniyoga-vidhi*), injunction of the eligible (*adhikāra-vidhi*), and procedural injunction (*prayoga-vidhi*).]

When through ‘hearing’, etc., one matures, one acquires self-knowledge. With that, nescience which is the root of all evil is destroyed. The body may last for some time longer so that the unspent portion of the *prārabdha* may be enjoyed. When that enjoyment is over, one attains the supreme Reality.

The last quarter of this verse is from the Upaniṣads. See

[220]

इति भाल्लविशाखायां श्रुतिवाक्यमधीयते ।

सर्वकर्मनिरासेन तस्मादात्मधियो जनिः ॥ २२० ॥

Thus in the Bhāllavi section the Scriptural text is found: Through the renunciation of all action the knowledge of self is born.

The *Bhāllavi Śākhā* is not now extant.

[221]

सत्यानृते इति तथा सर्वसंन्यासपूर्वकम् ।

आत्मनोऽन्वेषणं साक्षादापस्तम्बोऽब्रवीन्मुनिः ॥ २२१ ॥

Sage Āpastamba taught directly in the words 'True and false' that the search for the self is to be preceded by renunciation.

Āpastamba-dharma-sūtra, II, xxi, 13.

[222]

नाविरतो दुश्चरितान्नाशान्तो नासमाहितः ।

नाशान्तमानसो वाऽपि प्रज्ञानेनैवमाप्नुयात् ॥ २२२ ॥

'He who has not desisted from evil conduct, who is not subdued, nor self-composed, and whose mind is not quiescent cannot attain him (self) through knowledge.'

KU, ii, 24.

Here renunciation is laid down as a condition precedent for self-knowledge—not renunciation of optional rites alone, but of all *karma*.

[223]

वेदानुवचनादीनां विनियोगोक्तियत्नतः ।

भिन्नाधिकारितालिङ्गं कर्मविज्ञानकाण्डयोः ॥ २२३ ॥

The statement of procedure 'By the recitation of the Veda,'¹ etc., which has been made through effort shows that there is a difference of eligibility for the two sections, viz. of rites and knowledge.

It is not that the one who is eligible for *karma* is eligible for knowledge. *Karma* is an auxiliary of knowledge. For the two sections of the Veda, the eligible persons are different.

1 BU, IV, iv, 22. See note on v. 14.

[224]

ज्ञानोत्पत्त्यादिकाह्निङ्गाद्यतस्तद्धेतुमात्रकम् ।

गम्यते न विशेषोऽतः कर्मैवेति न गम्यते ॥ २२४ ॥

Through the mark, generation of knowledge, etc., it is known that action is a cause thereof; but not that it alone is the distinctive cause.

Although, sometimes, *karma* is said to be generative of knowledge, it is not the distinctive cause of knowledge. *Karma* is the cause of knowledge through the purification of the mind; but *sannyāsa* is the direct means through the *modus operandi*, 'hearing', etc.

NTV—*jñānotpatti-liṅgāt karmaṇām na sākṣāt jñāna-sādhanaṭvaṃ gamyate kiṃtu paraṃparayāpi sādhanatva-mātraṃ gamyate atah karma-jñāna-kāṇḍayor bhinnādhikāritā.*

NKL—*dharmāt sukhaṃ ca jñānaṃ ceti. kvacit jñānahetutvaṃ gamyate. vividiṣantīti kvacid vividiṣā-hetutvaṃ. saṃskārā iti kvacit saṃskāratvaṃ. anupahatamanāveti kvacit chuddhi-pradhānatvaṃ.*

AVS—karmanām jñāna-sādhana-tva-mātram gamyate, na tu karmaiva sādhanam iti, tasmāt karmāṇi suddhi-dvāreṇa sādhanam, sannyāsas tu sākṣāt-sādhanam iti vibhāgaḥ.

[225]

मुण्डोऽपरिग्रहोऽसङ्गो बहिरन्तः शुचिः सदा ।

ब्रह्मभूयाय भवति परिव्राडिति च श्रुतिः ॥ २२५ ॥

‘With shaven head, without possession, non-attached, pure always within and without, the wandering monk is fit to become Brahman’—thus Scripture.

This is an adaptation from the *Jābālopaniṣad*, 5: *atha parivrāḍ vivarṇa-vāsā muṇḍo 'parigrahaḥ sucir adrohī bhaikṣaṇo brahmabhūyāya bhavatīti.*

NKL—bāhya-yajñopavītādirahito 'parigrahaḥ.

[226]

इत्यादिश्रुतिवाक्यानि स्मृतिभिः सह कोटिशः ।

ज्ञानाय विदधत्युच्चैः संन्यासं सर्वकर्मणाम् ॥ २२६ ॥

The texts like these from Scripture, along with crores of texts of Traditional Code, enjoin emphatically the renunciation of all action for the sake of knowledge.

NKL quotes the following text: *śasikhaṁ vapanam kṛtvā bahiḥsūtram tyajed budhaḥ, tasmāt karma na kurvanti yatayaḥ pāradaṛśinaḥ.*

[227]

यच्चाभाणि विना कार्यं नाधिकारो निरूप्यते ।

दोषोऽयमपि नैव स्याज्ज्ञानोपाये यथोदिते ॥ २२७ ॥

As for the defects you pointed out, viz. that without something to be done eligibility is not established (v.31), even this does not exist, as there is the means for knowledge in the manner stated above.

It cannot be said that there must be something-to-be-done (*kārya*), in the absence of which there will be no eligibility. Is it contended that *kārya* is necessary for establishing in one who desires release eligibility for the means to *jñāna*, or for *jñāna* itself? Not the first; for, the means to knowledge consists of 'hearing', etc., as preceded by *sannyāsa*. Here the means itself is *kārya*; nothing else.

[228]

विधिमार्गेऽधिकारस्य परीक्षा वर्तते यतः ।

फलभूते तु विज्ञाने नाधिकारो निरूप्यते ॥ २२८ ॥

As in the path of injunctions there exists an examination of eligibility, there is no need to establish eligibility in regard to knowledge which is of the nature of fruit.

The second alternative too is not possible. As regards *jñāna*, there is no question of considering eligibility. It is not the content of an injunction, and it is a seen fruit. Inference: what is in dispute, viz. *jñāna*, is not what is enjoined, because it is a fruit, like *svarga*.

NTV—*vidheyasādhane kriyāyām loka-vedayor adhikārasya parīkṣā vartate, jñāne tu pramāṇaphalabhūte pramāṇatantratvān na vidheyatā, tena adhikāras tatra nirūpyate. yato 'to yathodita-jñānopāya evā*

'dhikāra ity arthaḥ. kiñca puruṣatantra eva vidheyatayā 'dhikāra iṣyate, na vastutantre, pramāṇaphalabhūtaṁ ca vijñānaṁ vastutantraṁ yataḥ ato vijñānasādhana evā 'dhikāraḥ, na jñāne.

[229]

अधिकारविचारो हि नृतन्त्रे वस्तुनीष्यते ।

वस्तुतन्त्रे न युक्तोऽसौ स्वयं चैव पुमर्थतः ॥ २२९ ॥

Inquiry into eligibility is necessary in respect of an object which is dependent on man ; that is not proper in respect of what is reality-dependent, for that itself is the human goal.

What is called *jñāna* is nothing other than the destruction of nescience through the rise of the self-cognition from the major texts. In fact, the self itself is the destruction of ignorance. Therefore, self-knowledge is the human goal. That is the nature of reality, and does not depend on an agent.

NTV—*puruṣeṇa kartum akartum anyathā ca kartum asakyatvāt jñānasya ity arthaḥ. kiñca pumarthasāadhanam eva vidheyam na pumarthaḥ svargādi, brahmajñānam tu svayam pumarthaḥ svargādi-sukha-sākṣātkārādivat, jñāna-jñeyasyā 'tmanah svargādivat svayam pumarthatvāt.*

NKL—*ātmanah sukha - rūpatvāt tadākāra - vṛtteḥ sukhasākṣātkāratayā svargavat pumarthatvān na vidheyatvam.*

AVS—*vihitampraty adhikāri-cintā, jñānasyā 'vihitatvāt svargādivat phalarūpatvāt jñānasya kartum-akartum-anyathākartum asakyatvāt jñāna-jñeyasya cā 'tmanah pumarthatvāc ca nāthā 'dhikāri-cinteti. kva tarhi adhikāri-vicārah prastuta iti cet jñāna-sādhana śravaṇādāy iti brūmah.*

[230]

अनात्मनि प्रमेयेऽर्थे या फलत्वेन संमता ।

प्रेमया सैव वेदान्तेष्वनुभूतिरिहाऽऽत्मनः ॥ २३० ॥

What is admitted as the fruit in the case of the not-self which is known as an object, that itself is to be known here in the Vedāntas as the experience of the self.

What was stated in v. 159-160a is here recalled. See note thereon.

NTV—etad uktam bhavati-yā yā pumarthe saṁvit sā sā pumarthā loke dr̥ṣṭā yathā sukha-tatsādhanādy-anubhūtiḥ, ātmā ca sukha-tatsādhanādy-anubhūti-svabhāvo vedānta-prameyaḥ, tasmād anena pumarthena bhavitavyam iti.

na hy anubhūter apumarthatā loke paramārthatō 'sti, apumartharūpatvasya anubhūter āropāt, anyathā nirupādhika-premāspadatā yadartham sarvaṁ yac ca nānyārtham tat sukham iti sukha-lakṣaṇa-lakṣitatā ca anubhūty-ātmano na syāt.

[231]

विज्ञानमानन्दमिति ह्यात्मैवेति श्रुतेस्तथा ।

पुमर्थस्यैव मेयत्वं मातृत्वाद्यनपेक्षिणः ॥ २३१ ॥

Because of the Scriptural texts “Consciousness, bliss”,¹ “The self alone (is bliss)”,² the human goal is alone the object of knowledge, without being expectant of cognizership, etc.

Cognizership, etc., are conditioned by adjuncts such as egoity, etc., which are the products of nescience. Although the contents of cognition vary, because, again, of nescience, the immediateness of cognition is the same in all cases. That is the self of the nature of awareness. That is the human goal.

1. BU, III, ix, 28.

2. SP makes the *śruti* text referred to here read 'ātmaivānandah'. But there is no such text in the Upaniṣads, though there are many which teach the same meaning; e.g. BU, IV, iii, 32.

[232]

तज्ज्ञानं यस्य संजातं जातमेवास्य नान्यथा ।

कुक्षिस्थस्यापि हि सतो वामदेवस्य तद्यथा ॥ २३२ ॥

In whom the knowledge of that has arisen, in him, for ever, has that arisen and never will it be otherwise ; as that (arose) in the sage Vāmadeva even while in the womb¹.

On the view that there is injunction of knowledge, it must be stated why there should be injunction. Is it for the non-sublation of knowledge, or for bringing about relation to the fruit, or for the destruction of the obstacles to knowledge ?

Not the first ; for in the case of Vāmadeva there was knowledge even while he was in the womb of his mother. There was no sublation of the study, etc., made in his earlier birth, and no one exhorted him to know the self. The true knowledge that results from 'hearing', etc., can never be sublated.

1. AIU, iv, 5.

NTV—*yathā sukṭi-jñāna-samakālam eva tat-prāptir evam brahma-jñāna-samakālam eva tat-prāptir bhavati, yathā garbhastho vāmadevo brahma-jñāna samakālam eva sārvaṭmyaṁ pratipede.*

[233-234]

तच्चाविद्यानिरास्येव व्याधभावनयाऽञ्जितः ।

राजसूनोः स्मृतिप्राप्तौ व्याधभावो निवर्तते ॥ २३३ ॥

यथैवमात्मनोऽज्ञस्य तत्त्वमस्यादिवाक्यतः ।

लब्धैकात्म्यस्मृतेर्व्येति सर्वाऽविद्या सकार्यका ॥ २३४ ॥

And that certainly removes nescience. When for the prince who is deluded by the idea that he is a hunter there is the recollection, the hunter-idea is removed; even so, for him who is ignorant of the self and attains recollection of the one self through the sentence 'That thou art', etc., all nescience, along with its products, vanishes.

Nor is the second alternative possible. There is no need for an injunction to bring about a relation between self-knowledge and the destruction of ignorance which is the fruit.

Nor the third. In the story of the prince who grew as the son of a hunter, forgetting his royal birth, the destruction of the obstructing belief is brought about by true recollection, even without an injunction.

NTV—kaścid rājakumāro jātamātrād eva vyādhakulaṁ praviṣṭo vyādhō 'smī 'ty ātmānaṁ manyate, tatra rājākumāro 'sī 'ty upadeśa-mātreṇa rājakumāra-smṛtau vyādhabhāvo nivartate.

NKL—kasyacid rājakumārasya garbhaniḥsāraṇānantara-bhraṣṭa-rājyatayā vanam praviṣṭasya vyādhaiḥ putratayā poṣitasya dṛḍhabhā-vita-vyādhabhāvasya auśadhādi-sevayā prāpta-rājya-sāmarthyasya tan-mantrabhis cinha-viśeṣa-darśanena avagata-rājabhāvasya nāsti tvam vyādhō rājaiveti bodhita-vākya-ja-bodhaḥ abodha-dhvaṁse nāparam apekṣate yathā ity arthaḥ.

[235]

यत एवमतो नात्र विधिः कल्प्यः कथञ्चन ।

अनर्थकः कल्पितोऽपि तस्येहानुपयोगतः ॥ २३५ ॥

This being so, injunction here is not to be assumed by any means. And, the assumption is futile, as it is of no use here.

Moreover, does Scripture say that there is injunction with regard to knowledge, or is such injunction assumed? There is no Scriptural declaration to that effect. As for the texts like, 'The self is to be seen,' (*BU*, II, iv, 5) etc., they are not injunctions. This will be explained later on.

There is no need to assume an injunction, for there is no ground for such an assumption. As, in respect of the self, activity and turning away are not possible, what is the use of assuming an injunction?

[236]

उत्पत्तिराप्तिः संस्कारो विकारश्च विधेः फलम् ।

मुक्तिर्विलक्षणैतेभ्यस्तेनेहानर्थको विधिः ॥ २३६ ॥

Origination, attainment, purification, and modification—these are the fruit of injunction. Release is different from these; therefore, injunction here is futile.

Injunction is possible only with regard to action. Action may lead to one of four results: origination, attainment, purification, and modification. Release which is the fruit of knowledge is none of these. It cannot be originated, because it is not what is made, and is beginningless. It is not what is attained, because it is without any relation, and is of the nature of what is eternally attained. It is not what is purified, because it is devoid of qualities, and no speciality can attach itself to it. It cannot be modified, because it is not a finite entity and is unchangeable. Therefore, release is not the fruit of an injunction.

NTV—vastunaḥ.....notpādyatā ananyāyatta-prakāśatvāt, na svaviṣaya-jñāna-vikāreṇa vikāryatā, niravidyatvāc ca na saṃskāryatā, ātmatvāc ca nāpyatā ity arthaḥ.

NKL—piṇḍotpatti-phalaṁ saṁnyavanāṁ piṣṭau saṁnyantīti vidhīyate. payaḥ-prāpti-phalaṁ dohanaṁ gām dogdhīti vrīhi-saṁskāra-phalaṁ prokṣaṇaṁ vrīhīn prokṣatīti vrīhi-vikāra-phalo 'vaghāto vrīhīn avahantīti.

[237]

अनन्यायत्तसंसिद्धेर्निरविद्यात्मवस्तुनः ।

न क्रियात्वं फलत्वं वा नापि कारकरूपता ॥ २३७ ॥

Since the real self which is free from nescience is not brought about by anything else, there is not for it the nature of being act, fruit, or causal correlate.

It cannot be said that Brahman is the content of the injunction to meditate. For, no action is possible with reference to Brahman. Brahman is not dependent on anything else. It is self-established. It cannot even be called a fruit, because it is not generated by any act.

[238]

अतोऽत्र विध्यभावोऽयं न कथञ्चन दूषणम् ।

अलंकृतिरियं साध्वी वेदान्तेषु प्रशस्यते ॥ २३८ ॥

Hence, the non-existence of injunction, here, is by no means a defect; this is a good ornament; it is praised in the Vedāntas.

The Vedāntas do not become *apramāṇa* because there is no injunction in them. On the contrary, the absence of injunctions is their merit.

AVS—yatra vidhi-kṛtyaṁ nāsti tatra vidhyasāmbhavo na doṣaḥ, pratyuta alaṅkāraḥ.

[239]

चोदनाभिर्नियुक्तोऽहं तथा ब्रह्माहमित्यपि ।

परस्परविरुद्धत्वादेकदैक्यं न द्वयम् ॥ २३९ ॥

‘By the commands I am prompted’ and ‘I am Brahman’—these two, because of mutual contradiction, cannot be (valid) at the same time and in the same place.

Injunction and knowledge belong to different universes of discourse. The one who has self-knowledge cannot be the patient of an injunction. There is nothing for him to do or not to do.

[240]

स्वामी सन्न हि भृत्येन स्वामिनेव नियुज्यते ।

संबोधनीय एवासौ सुप्तो राजेव बन्दिभिः ॥ २४० ॥

Being master, one is not prompted by a servant, as by a master. He is only to be awakened, as a sleeping king by his bards.

Even the seeker of knowledge is not to be prompted by an injunction. He is the master of the Veda, and not its servant, because he has risen above the way of *samsāra*. He is only to be awakened, even as a king may be by his bards.

The above explanation is on the assumption that the entire verse refers to the seeker of knowledge. An alternative explanation is that the first half of the verse applies to the one who has self-knowledge already, and the second half to the one who seeks it.

The seeker of knowledge may require prompting for ‘hearing’, etc., but not for knowledge.

NTV—*sarva-niyantuḥ pratyagātmano veda-svāmitayā na vedanīyojyatayā, kiṃtu avidyā-nidrayā supto bodhyata eva.*

NKL—*lakṣaṇayā tadākāra-vṛtti-janana-dvārā ajñāna-nivartakatvāt prāmāṇyam ity arthaḥ.*

AVS—*mumukṣuḥ padārtha-vivekavān veda-svāmitvān na vedena preryāte, kiṃtu bodhyata ity arthaḥ.*

[241]

चोदनालक्षणत्वादि धर्मं प्रत्येव गृह्यताम् ।

धर्मस्यैव प्रतिज्ञोक्तेर्न तु ब्रह्म प्रतीष्यते ॥ २४१ ॥

Being of the nature of command, etc., is to be understood with reference to religious duty (*dharma*) alone; because religious duty alone is declared as the premise; and it is not Brahman that is intended.

Injunctions have meaning only in regard to religious duty (*dharma*), and not in regard to Brahman. The *Pūrvamīmāṃsā-sūtra* has only *dharma* as the content of its inquiry.

[242]

अथातो धर्म इत्युक्तेश्चोदनालक्षणोक्तिः ।

तद्भूतानां क्रियार्थेन ह्याम्नायस्य क्रियार्थतः ॥ २४२ ॥

Because of the statement “Then, therefore, (the desire to know) religious duty” (*PM* I, i, 1), because of the declaration “Of the nature of command” (I, i, 2), because of (the *sūtra* I, i, 25) “(In a sentence) all words denoting things are (in close textual juxtaposition) with the words expressive of action”, and because of (the *sūtra* I, ii, 1) “Scripture is for the sake of ritual”, (Brahman is not subsidiary to injunction).

A few aphorisms of the *Pūrvamīmāṃsā-sūtra* are cited here to show that injunction has no reference to Brahman.

[243]

भावार्थाः कर्मशब्दा ये प्रतीयेत क्रिया ततः ।

इत्येवं नरतन्त्रेऽर्थे ज्ञेया द्वादशलक्षणी ॥ २४३ ॥

“All verbs are indicative of productive operations (*bhāvanās*); from them the unseen potency (*apūrva*) is known”, etc., (II, i, 1). Thus the twelve-chaptered work (on *Pūrva-mīmāṃsā*) is to be understood as having for purport what is dependent on man.

After quoting another aphorism, it is declared here that *Pūrvamīmāṃsā* discusses *dharma* alone which depends on man, and not Brahman which is beyond such distinctions as action, causal agent, etc.

NKL—*kartum akartum anyathā vā kartum vyacchakam, tad viṣaya prāktana-mīmāṃsā na para-niṣpanna-brahma-gocarā ity arthaḥ.*

[244]

वेदान्तार्थापवादाय नालं साऽतत्प्रमाणतः ।

मानं नालं निराकर्तुं वस्तु यन्मान्तरैर्मितम् ॥ २४४ ॥

It cannot remove the sense taught by *Vedānta*; for it is not an evidence therefor. A thing that is known through one means of valid knowledge cannot be set aside by another means of valid knowledge.

Mīmāṃsā has no power to sublate what is taught by *Vedānta*. Nor is injunction of *karma* capable of cancelling what is known through *Vedānta*.

If the reading be *tat-pramāṇataḥ* instead of *atat-pramāṇataḥ*, then the rendering would be ‘for, it is the authority for that (viz. *dharma*).’

AVS—*pūrva-bhāgasya vyāvahārikaṁ prāmāṇyam na tattvāvedana-lakṣaṇam, ato na tattvamādi-siddhārtha-bādhakatvam.*

[245–246]

स्वमेयमात्रशूरत्वान्मितेर्नान्यत्र मानता ।

अथातो ब्रह्मजिज्ञासा इत्याद्युक्तं नयान्वितम् ॥ २४५ ॥

मीमांसान्यायवत्त्वाभ्यां धर्ममीमांसनोक्तिवत् ।

एवं सत्यनुकूलार्थं तत्त्वमित्यादिकं वचः ॥ २४६ ॥

An evidence is valid only in respect of what can be known by it ; it is not an evidence elsewhere. The text “Then, therefore, the desire to know Brahman”, etc., is endowed with reasoning, because there are enquiry and rules, as in the case of the Pūrva-mīmāṃsā text. This being so, the text ‘That thou art’, etc., has a harmonious sense.

A *pramāṇa* functions only in respect of its content. It has no business to intrude into another field. If *Karma-mīmāṃsā* be valid, *Vedānta* too is valid. So, it cannot be said that *Vedānta* is a pseudo-*pramāṇa*.

[247-248 a]

सर्ववेदान्तविषयमन्यथा तद्विरुध्यते ।

न तत्र करणापेक्षा नेतिकर्तव्यता तथा ॥ २४७ ॥

यत्र यत्राऽऽत्मभावेन श्रुत्या ब्रह्मावबोध्यते ।

(It is) the content of all Vedāntas. Otherwise, that would be contradicted. Not there is the expectancy of instrument, nor of a *modus operandi* where by Scripture Brahman is made known as being of the nature of the self.

The Vedānta-teaching is about the non-dual Brahman. Its aim, thus, is to make known the truth. *Karma-kāṇḍa*, however, which depends on differences such as action, etc., makes known only what is not true. So, it must be admitted that each is *pramāṇa* in its own field.

There can be no productive operation (*bhāvanā*) in relation to Brahman. Each productive operation has three elements. What is to be accomplished (*bhāvya*)? What is the instrument (*karana*)? And, what is the *modus operandi* (*itikartavyatā*)? Brahman is not what is to be accomplished (*bhāvya*). The other two elements, therefore, have no meaning with reference to it. *Bhāvanā* relates to action, and not to Brahman. The Vedāntas only teach that Brahman is the Self.

NKL—sarva-vedānta-viṣayaṁ sarvopaniṣad-gataṁ mahāvākyam upakramādi-liṅga-gati-sāmānyābhyāṁ tatparam ity arthaḥ.

kiṁ kena katham bhāvayed ity aṁsatrayāpekṣā bhāvanā neha sambhavati, karaṇāṁsābhāvad iti bhāvah.

AVS—yatra aṁsa-trayaṁ tatra bhāvanā, yatra bhāvanā tatra vidhiḥ, atra tu tattvamasīty-ādi-pradeśeṣu na aṁsa-trayam, tata eva na bhāvanā, tata eva na vidhiḥ, ato 'dhikāri-sādhana-bheda iti.

[248 b-249 a]

इतिकर्तव्यतादानं करणादानमेव च ॥ २४८ ॥

तत्र तत्र विधिः स्थाने प्रहितस्य फलेच्छया ।

Where *modus operandi* and instrument are brought in, it is but proper that there should be an injunction for one who is impelled by the desire for fruit.

Bhāvanā with the three elements mentioned above is possible only in the sphere of action.

[249 b-250]

आप्ताशेषपुमर्थत्वात्त्यक्तानर्थस्य च स्वतः ॥ २४९ ॥

अनात्मनीव नेच्छेयं कथंचित्स्यादिहात्मनि ।

तन्निवृत्तौ निवर्तेते इतिकर्तव्यसाधने ॥ २५० ॥

Because the human goal has been attained fully and because evil has been removed of its own accord, there does not arise by any means desire here for the self, as for the not-self.

When that desire is removed, the *modus operandi* and means are removed.

It is intelligible that there may be desire for heaven, etc., which constitute the not-self. There can be no such desire in relation to the self. When one knows the nature of the self from the major texts, one realizes one's eternal bliss-nature and freedom from evil. So, the self is not the fruit or result of some activity. There can be no *bhāvanā* with regard to it.

[251]

निरन्तरायतोऽशेषपुमर्थस्याऽऽत्मरूपतः ।

न चांशत्वयशून्येह भावनेष्टा परीक्षकैः ॥ २५१ ॥

As the human goal without residue and free from obstacles is of the nature of the self, a productive operation devoid of the three elements is not acceptable to inquirers.

It cannot be said that there may be in *Vedānta* a *bhāvanā* without the three elements. Such a productive operation is impossible. And, the one who has realized the self desires nothing; he has nothing to accomplish.

NTV—*avidyākhyontarāyo vidyodayād eva nivartate na tu vidhi-vasād ity arthaḥ.*

NKL—*pumarthasya sukha-sākṣātkārasyā 'tmarūpataḥ svataḥ-prāptatvān nirantarāyato pratibandhatvād bhāvyāntarasya kalpayitum asakyatvād ity arthaḥ....avidyāstamayāḥ phalaṁ dhīśādhyaṁ dhīś ca na prayatnam apekṣata ity arthaḥ.*

[252 a]

भावनातो न चान्यत्र विधिरभ्युपगम्यते ।

And in cases other than where there is productive operation, injunction is not admitted.

Since *bhāvanā* is not possible in the case of Brahman, there can be no injunction with regard to it. Brahman is made known by the major texts. It is only that knowledge that is the means to release, not *karma*. Therefore, for the two sections the eligible persons and the means are different.

NTV—tasmāt pūrṇa-niśreyasa-pratyag-anubhūty-avidyā-nivṛtṭyā tadavaseṣa-sādhana-jñāne vidhyabhāvanā na tatrā 'dhikārah, kiṃtu jñāna-sādhana-śravaṇādāv eveti siddham.

[252 b-253]

मोहमात्रान्तरायायां मुक्तावस्तु यथोदितम् ॥ २५२ ॥

एकदेशो विकारो वा संसारी त्वात्मनो यदा ।

किं तदाऽप्युक्तमार्गेण मुक्तिः किंवा क्रियाश्रयात् ॥ २५३ ॥

“ If delusion were the only obstacle, what has been stated (by you) will do for release. When, however, the soul in bondage is either a part (*ekadeśa*) or a modification (*vikāra*) of the self, even then, is release got through the said path, or as dependent on action? ”

Pūrvapakṣa—If delusion alone were the obstacle to *mokṣa*, then *jñāna* may remove it. But it is not so. In the views which regard the *jīva* as a part or as a mode of the supreme spirit, there would be required *karma* for effecting release. If that be so, how can there be difference of means as between the two sections?

[254]

निवृत्तावेव निःशेषसंसारस्य तदाऽपि तु ।

आगन्तोरधिकारः स्यान्न प्रवृत्तौ कथंचन ॥ २५४ ॥

Even then, the eligibility is for turning away from the adventitious transmigration without residue and not, by any means, for activity.

Siddhānta—Even in the view that the *jīva* is a part of Brahman, what is it that is regarded as release—is it the attainment of Brahman, or is it the destruction of difference? On the first alternative, the non-difference of the part and the whole is not brought about by *karma*, because that is self-established. What is required is only the destruction of bondage including *karma*. Therefore, the attainment of Brahman does not require *karma*.

[255]

आत्माज्ञाननिमित्तस्य ह्यन्यत्वानुपपत्तिः ।

तदाऽप्यविद्याविध्वस्तावधिकारो न कर्मणि ॥ २५५ ॥

As difference is unintelligible being dependent on nescience of self, even so, eligibility is for destroying nescience, not for action.

Now for the other alternative. If the *jīva* is a part of Brahman, it is non-different therefrom. So, there can be no real difference between them. And, the difference must be due to nescience. The destruction of that can be only through *jñāna*, and not through *karma*.

[256]

कर्तव्याभावतस्त्वेवं विकारेऽपि न कर्मणि ।

कारणैकत्वसंपत्तेः स्वतःसिद्धत्वहेतुतः ॥ २५६ ॥

Even if (the soul be) a modification (of the self) there is no (eligibility for) work, as there is nothing to be done, since attaining oneness with the cause is established of itself.

After examining the view that the *jīva* is a part of Brahman, the other view that it is a mode is here considered. If the *jīva* is a mode, then Brahman must be its principal. Here, what is release? Is it the attainment of Brahman which is the principal? Or, is it the destruction of difference from that? Not the first, for the non-difference of the effect from the cause is not accomplished through *karma*, because that non-difference is natural.

[257]

मृदापत्तिर्घटस्येव विकारस्याऽऽत्मनो ध्रुवम् ।

अविकारात्मसंपत्तिः सा च तत्त्वावबोधतः ॥ २५७ ॥

As the attainment of clay by pot, the attainment of the unmodified self by the *jīva*-self which is a modification is certain; and that is through knowledge of the truth.

The other alternative, viz., that *karma* is required for the destruction of difference is now refuted. Just as pot, the effect, is non-different by nature from clay, the cause, so also is the *jīva* from Brahman. The difference, such as it is, must be due to nescience; and that can be removed only by true knowledge.

[258]

कार्यकारणयोर्मित्तौ कार्यकारणता कुतः ।

अमित्तौ च तयोरैक्यात्कार्यकारणता कुतः ॥ २५८ ॥

If cause and effect be different, how is there relation of cause and effect; if non-different, since they are identical, how is there the relation of cause and effect?

Hitherto, admitting the views that the *jīva* is a part and a mode of Brahman, it was shown that *karma* cannot be the direct means to *mokṣa*. Now, those views themselves are criticized.

At the basis of all relations is that of cause and effect. But this relation is unintelligible.

[259-260 a]

विज्ञानात्मविकारस्य कारणैक्यं विमुक्तता ।

स्वतस्तस्य च संसिद्धेः कार्यता नोपपद्यते ॥ २५९ ॥

कर्मातोऽनर्थकं मुक्तावेकदेशविकारयोः ।

Release is identity of the modification of the intelligence-self with the cause. Since that is established of itself, it is not something to be accomplished (*kāryatā*). There is futility of action for release of what is either a part or a modification.

Brahman is of the nature of consciousness. Even those who hold that the *jīva* is a part or mode of Brahman believe that its release consists in its identity with Brahman which is its cause and ground. But that identity is self-established, and so cannot be accomplished by *karma*.

[260 b-261]

अप्यनर्थाय कर्म स्यात्क्रियमाणं न मुक्तये ॥ २६० ॥

प्रतिकूलं विमुक्तेश्च क्रियमाणमसंशयम् ।

कर्माऽऽरभेत तेनैतन्मुक्तौ कर्म निरर्थकम् ॥ २६१ ॥

Moreover action that is being done will make for evil, not for release. Action that is being done will produce, without doubt, obstacle to release. Therefore, in regard to this release, action is futile.

Not only is *karma* futile, but also it will be the cause of evil. *Karma* that is done according to the injunction of Veda will lead to *Svarga*, etc., that are obstacles to *mokṣa*.

NKL—na kevalam nairarthakyaṁ kaivalya-pratikūla-saṁsārā-rambhakatvād anarthakaram ca.

[262]

विकारोऽत्यन्तनिर्मिन्नो यदा तु स्याद्विकारिणः ।

तदाऽपि विकृतेर्नाशो मुक्तिरित्यभिधीयते ॥ २६२ ॥

If, however, the modification is wholly different from that which is modified, even then, it must be said that the destruction of the modification is release.

If it be held that the *jīva* is radically different from Brahman, then release would consist in its total destruction.

[263]

अत्राप्यनर्थकं कर्म तत्फलासंभवत्वतः ।

कर्मेव ज्ञानमप्यत्र फलाभावादनर्थकम् ॥ २६३ ॥

Even here action is futile, since there is no possibility of its fruit. Like action, even knowledge is of no use, here, as there is no fruit.

If it be held that the destruction of the *jīva* is release, there would be no need for *karma*. If it be said that there may be need for knowledge, then our view will have to be accepted.

NKL—phalinobhāve phalāsaṁbhavād ity abhisandhiḥ.

[264]

नैवाविद्याकृतैवासौ वास्तवी यदि संसृतिः ।

स्वरूपनाशदोषः स्यादेकदेशेऽपि पूर्ववत् ॥ २६४ ॥

If transmigration were real, it will not be a product of nescience. There will be the defect of destruction of nature, even on the view of (the *jīva* being) a part, as before.

Moreover, on the view that the *jīva* is a mode of Brahman, is bondage natural, or is it nescience-caused? If bondage be natural, it cannot be destroyed by Brahman-knowledge. Nor can it be removed by *karma*, because *karma* is the cause of bondage.

The same criticism holds good with regard to the view that the *jīva* is a part of Brahman.

[265-266 a]

यदा त्वविद्ययाऽध्यस्तं संसारित्वं न वस्तुतः ।

विकारेऽवयवे चैव तदा पूर्वोक्त एव तु ॥ २६५ ॥

पक्षो निर्वहणीयः स्यादस्माभिरपि संमतः ।

If, however, transmigration is superimposed by nescience, and not a reality, whether (the *jīva* be) a modification or a part, then what was stated before has to be maintained. This is acceptable to us also.

If bondage be nescience-caused, then the modality or part-hood of the *jīva* cannot be real; that too would be the result of nescience. If that be so, then, what results is our view. The two sections of the Veda are different; and the persons eligible for them are different.

[266 b-267]

सर्ववादाविरोधी च नातो विधिरिहेष्यते ॥ २६६ ॥

तदा हि कल्पनाः सर्वा विकारावयवादिकाः ।

वृथैवेमा ह्यविद्यैव सर्वाः संपादयिष्यति ॥ २६७ ॥

This does not conflict with any view. Therefore, there is not admitted here injunction. Then, indeed, all assumptions such as 'modification', 'part', etc., are futile. Nescience itself will accomplish all these.

All those who believe in *mokṣa* will have to admit that bondage is nescience-caused and that release is through knowledge. Then, it follows that there is no possibility of injunction in the *Vedāntas*. *Mokṣa* is not a fruit like *Svarga*, and *jñāna* is not dependent on human will. So, the *Vedāntas* terminate simply after revealing the nature of Reality. The assumptions that the *jīva* is a part or mode, etc., of Brahman are all imaginations.

NKL—ātma-jñānān niḥśreyasādhigama iti sarva-vādinām avivāda-padam ity arthaḥ.

[268-269 a]

पूर्ण निःश्रेयसं तस्मात्तदपूर्णमविद्यया ।

आभासते मृषैवातो यथाभूतात्मविद्यया ॥ २६८ ॥

प्रध्वस्तायामविद्यायां पूर्णमेवावशिष्यते ।

Wholeness is release. Hence the non-wholeness which is on account of nescience appears but illusorily. Therefore, when nescience is destroyed through the knowledge of the real self, wholeness alone remains.

Brahman is the whole (*pūrṇa*); that itself is release, perfection. *Karma* cannot achieve that, because Brahman is not a finite object.

Cp. BU, V, i, 1 :

pūrṇam adaḥ pūrṇam idam

pūrṇāt pūrṇam udacyate,

pūrṇasya pūrṇam ādāya

pūrṇam evā 'vaśiṣyate.

[269 b-270]

अनर्थको विधिस्तस्मात्सर्वो निःश्रेयसं प्रति ॥ २६९ ॥

इत्येतन्न्यायतः सिद्धं यत्तु प्राक्चोदितं त्वया ।

आम्नायस्य क्रियार्थत्वादित्यत्राप्यभिधीयते ॥ २७० ॥

Futile, therefore, is all injunction in regard to release; this has been logically established. (v. 228, ff.) As for what was objected to by you 'Because Scripture is for the sake of ritual' (v. 36), in regard to this also, it may be remarked as follows.

Since Brahman does not fall within any of the four categories of the fruit of action, there can be no injunction with regard to it.

As for what was said that Scripture is for the sake of ritual, we have already stated our reply. We shall explain that further.

*AVS—niḥśreyasa-sabdena brhmābhilapyate, tat pūrṇam deśādy-
aparicchinnam, tasya ca bhedaḥ tad-avidyā-vilasitaḥ, vidyayā tv avidyā-
nivṛttau brahmaiva bhavati, ataḥ sarva-prakāro vidhir mokṣam-praty
anarthaka eva.*

[271]

तत्राऽऽम्नायाभिधानस्य ह्याम्नायांशाभिधानतः ।

विध्युत्तीनां क्रियार्थत्वं सिद्धं हेतुतयोच्यते ॥ २७१ ॥

There, the term, 'āmnāya' refers only to a part of Scripture, because 'being for the sake of ritual' is only as regards injunctive texts.

In the *Pūrvamīmāṃsā-sūtra* (I, ii, 1) 'Since Scripture has action for purport', etc., the word 'Scripture' (*āmnāya*) refers only to the *karma-kāṇḍa*, and does not include the Upaniṣads. From *PM*, I, i, 2, it is clear that only injunctive texts have action for purport, and not all scriptural texts.

[272]

क्रियाप्रकरणस्थानां विधिशेषात्मनां सताम् ।

वचसामक्रियार्थानामानर्थक्याय तद्वचः ॥ २७२ ॥

That statement (in the *Sūtra*: *ānarthakyam atadar-thānām*) relates to the futility of those words which do not have ritual for purport, but which are subsidiary to injunction in the context of ritual.

The expression in *PM*, I, ii, i, 'There is futility for those (words) which do not have that (ritual) for purport', also refers to *karma-kāṇḍa*.

[273]

न तूपनिषदां न्याय्यं पार्थगर्थ्यस्य संभवात् ।

पूर्वोक्तेनैव न्यायेन नातस्तद्विधिशेषता ॥ २७३ ॥

Because they have a different purport, it is not proper to regard the Upaniṣads as auxiliary to injunction. This is evident, by the aforesaid reasoning.

Although the Upaniṣads do not have action for purport, they are not futile. They have a different sense; and their fruit cannot be denied, because it is declared in Scripture, and because it is actually experienced by the wise.

[274]

विधिना त्वेकवाक्यत्वादिति यच्चापि चोदितम् ।

तेषामेव तदप्यस्तु तदानर्थक्यचोदनात् ॥ २७४ ॥

As for what was urged, 'Because of syntactical unity with injunction,' let that be so with regard to

those (texts which occur in the ritual sections); because it is declared that they would be futile (otherwise).

PM, I, ii, 7 'Because of syntactical unity with injunction through eulogizing, (the non-injunctive texts) may be for the sake of injunction' (see v. 36) also refers to those non-injunctive texts which are to be found in the *karma-kāṇḍa*.

NTV—*na cā 'rthavādasṭha-padānām anuṣṭhāpanam asti, ato yuktam tāni vidhinaikavākyatām anubhaveyur iti.*

[275]

न तु वेदान्तवचसां दृष्टार्थत्वेन हेतुना ।

तद्बुद्धेः पृथगर्थत्वमुक्तमेवातिविस्तरात् ॥ २७५ ॥

This is, however, not so as regards Vedānta texts, for the reason that they have a seen fruit. That the knowledge thereof has a different purport has been explained at length (v. 23 *et seq.*).

Those texts in which there is no mention of fruit may have syntactical unity with those wherein a fruit is mentioned, and they may be subsidiary to the latter. The Upaniṣads, however, do have a fruit and that too a seen fruit (*dr̥ṣṭa-phala*), and not an unseen fruit like *Svarga*. Therefore, it is clear that the Vedānta texts have a purport other than what the ritual-sections have.

NTV—*na co 'paniṣad-gatāni padāny adr̥ṣṭārthīni bhavanti. na hi vedāntaiḥ pratyag-advaye brahmaṇy avagatē jñātavyam āptavyam vā 'vaśiṣyate.*

[276a]

अन्यार्थानुपपत्तेश्च वेदान्तवचसां तथा ।

And because for the Vedānta texts, being for the sake of another is unintelligible.

The texts about *Prayāja* (fore-sacrifice), etc., are auxiliary to the texts about *Darsapūrṇamāsa* rites because the fore-sacrifices are helpful in regard to the *Darsapūrṇamāsa* rites yielding their fruit. But there is no such relation between the Vedānta texts and the ritual texts. The self which is known through Vedānta receives no help from *karma*. And so, Vedānta is not subsidiary to *karma-kāṇḍa*.

[276b-277a]

अर्थैकत्वगतौ सत्यां वाक्यभेदप्रकल्पना ॥ २७६ ॥

न न्याय्या सेति दृष्टत्वाद्देवस्य त्वादिवाक्यवत् ।

“When there is unity of sense, to postulate sentence-split is not proper, as it is seen in the text: (At the impulse) of the divine (Savitṛ, I take) thee, etc.

Pūrvapakṣa—Where syntactical unity (*ekavākyatā*) is possible, sentence-split (*vākyabheda*) is improper. This is the rule. As there is syntactical unity between the *Prayāja* text and the *Darsapūrṇamāsa* text, so is there syntactical unity between the Vedānta texts and the ritual-texts. The reason for this is that they have a unitary sense. As an instance may be cited the syntactical unity between ‘*devasya tvā savituh*’ and ‘*nirvapāmi*’ in the text ‘At the impulse (*prasavana*) of the divine Savitṛ, I take thee with the arms of the Aśvins, with the hands of Pūṣan, thee, agreeable to Agni!’ ((*Vājasaneyi-saṁhitā*, i. 10). See *Śatapatha-brāhmaṇa*, SBE, vol. xii, p. 16.

NKL—*karma-jñānayoḥ prayāja-darsapūrṇamāsavād aṅgāṅgitvāt tatkāṇḍayos tad-vākya-vedakārtḥayor ekavākyatva-sambhave tad-bhedo na kalpyo gauravād ity arthah.*

[277b-278a]

तथैव पृथगर्थत्वगतौ भिन्नवचस्त्वतः ॥ २७७ ॥

इषे त्वादिषु दृष्टत्वान्न न्याय्यैकार्थकल्पना ।

Even so, where there is difference in sense, there must be sentence-split. This is seen in *iṣe tvā*, etc. So the postulation of unity of sense is not proper.

Siddhānta—There is no unity of sense. Where there is difference of sense, sentence-split has to be admitted. As an illustration may be cited the text ‘*iṣe tvā, ūrje tvā*’ [For the sake of growth, thee (I cut); for the sake of strength, thee (I plane)] (*Vājaṣaneyi-saṁhitā*, I, i). These *mantras* are addressed to the presiding deity of the *palāśa* tree as it is being cut and planed. The question here is whether ‘*iṣe tvā, ūrje tvā*’ is one *mantra* or two. The answer is that they are two *mantras*, even though they are found together. See *PM*, II, i, 47: ‘When the sentences are equally independent (of one another) they should be treated as syntactically distinct (sentences).’

[278b-279a]

ज्ञानकाण्डार्थशेषत्वं कर्मकाण्डस्य यत्पुनः ॥ २७८ ॥

विनियोजकहेत्वेतत्तयोर्वाक्यैकवाक्यतः ।

As for the subsidiariness of the ritual section to the sense of the knowledge-section, that is accounted for as a case of syntactical unity with sentence, because of (the *vividiṣā* text) being the applicatory text.

We do admit that the ritual section (*karma-kāṇḍa*) is auxiliary to the knowledge-section (*jñāna-kāṇḍa*) through purification of the mind. This is evidenced by the *vividiṣā* text. But this does not mean that the two sections have an identical sense. The unity here is as between two different sentences which are related as the helper and the helped. It is not like the syntactical unity of *mantras* and *arthavādas*, which have no independent purport, with injunction (*vidhi*). Just as the injunction to earn wealth is related to the injunction to perform sacrifice, so is *karma-kāṇḍa* to *jñāna-kāṇḍa*

Wealth may be used for purposes other than the performance of sacrifice. Similarly, *karma* may be the means to ends other than *jñāna*. What the *vividiṣā* text says is that *karma* is to be used as a means to *jñāna*. So, there is, as between the two *kāṇḍas*, syntactical unity of sentence with a sentence (*vākyaikavākyatā*.)

NTV—etad uktam bhavati—tam etam vedānuvacanenetyādi viniyojaka-vaśāt saṁskāra-dvāreṇa vividiṣā-dvāreṇa vā jñānotpatti-śeṣatvam eva karmaṇām, na mokṣa-śeṣatvam, ato bhinnārthatvāt naikavākyatvam karma-vijñāna-kāṇḍayor iti.

[279b-280]

न्यायेन वक्ष्यमाणेन भूयोऽप्येतत्प्रवक्ष्यते ॥ २७९ ॥

पार्थगर्थ्यमतः सिद्धमपास्तविधिलक्षणम् ।

सर्वोपनिषदां चाऽऽत्मज्ञानं कैवल्यसाधनम् ॥ २८० ॥

By the reasoning to be hereafter set forth, this will be stated again (i.e. that the Upaniṣads have a fruit of their own). Therefore, for all the Upaniṣads there is a different sense. This is self-knowledge which has no characteristic of injunction and is the means to release (*kaivalya*).

There may be *vākyaikavākyatā* between two sentences each of which has a fruit of its own. The Upaniṣad texts have as their fruit self-knowledge. So, they have a sense different from that of the ritual texts.

[281]

निःशेषवाङ्मनःकायप्रवृत्त्युपरमात्मिका ।

तन्निष्ठा चेह विज्ञेया यथोक्तन्यायवर्त्मना ॥ २८१ ॥

The discipline (of knowledge) is of the nature of the quiescence of all activity, of speech, mind and body. This is to be known by the reasoning already set forth.

It is only for those who are endowed with quiescence, self-control, etc., that the Upaniṣads reveal knowledge.

AVS—niṣṭhā-sabdena śravaṇādy atra grhyate, tad eva jñāna-sādhanaṁ ity arthaḥ.

[282]

अधिकारोऽपि तस्यां च सिद्धोऽशेषक्रियात्यजः ।

जिज्ञासोरेव कर्तुस्तु न सिषाधयिषोः सदा ॥ २८२ ॥

Eligibility therefor (*viz.*, the discipline) is also established only for him who has renounced all activity and who desires knowledge ; and not for the agent who always seeks to accomplish something.

The eligibility for the path of knowledge, *viz.* *śravaṇa*, etc., does not depend on *niyoga*. It is the *sannyāsin* that is the eligible person for *jñāna*, and not the agent of actions.

[283]

ब्रह्मात्मतत्त्वव्युत्पत्तिमालेणान्यधिकारिता ।

भवत्येवात्र जिज्ञासोरज्ञस्यापि मुमुक्षुतः ॥ २८३ ॥

Eligibility results even for him who, although ignorant, possesses a general knowledge about the truth of the Brahman-self, and who desires knowledge and release.

It may be argued that eligibility for knowledge is not possible for the one who does not know Brahman, and is not necessary for

the one who already knows it. The reply is that the one who desires release learns from the Vedāntas a preliminary and quite general knowledge about Brahman, and thus gains eligibility for *śravaṇa*, etc.

[284]

मैवं प्रक्रमसंहारपर्यालोचनया पुरा ।

वेदस्यैकार्थ्यतात्पर्यमेकवाक्यतयोदितम् ॥ २८४ ॥

“Not thus. It has been stated already that, on a consideration of the initial and concluding passages, the Veda has one sense and purport; and so, there is syntactical unity.

Pūrvapakṣa—Through a study of the initial and concluding texts of the Veda, it is learnt that the Veda has *kārya* alone for purport. So, we must infer that the Vedāntas have syntactical unity with the *karma-kāṇḍa*. That being so, there cannot be a difference of eligibility for the Vedāntas.

[285]

तेन निःशेषवेदोक्तकारिणोऽत्राधिकारिता ।

सिद्धे ह्यनेकवाक्यत्वे कल्प्या भिन्नाधिकारिता ॥ २८५ ॥

“Therefore, eligibility, here, is for the one who does all that is enjoined by the Veda. For, it is only when the diversity of context has been established, that there is need for assuming difference in eligibility.”

Since the two *kāṇḍas* have syntactical unity, there is no difference in eligibility. He who has performed all the rites and sacrifices, follows *jñāna-niyoga* and attains *mokṣa*.

[286]

मैवं भिन्नैकवाक्यत्वे प्रागस्माभिः समर्थिते ।

ततश्च भवदुक्तस्य चोद्यस्येह न संभवः ॥ २८६ ॥

Not thus. When we have already established that there is syntactical unity of only what are different there is no occasion for raising your objection.

Siddhānta—We have already shown that the two *kāṇḍas* have different fruits, that the *karma-kāṇḍa* may become subsidiary to the *jñāna-kāṇḍa*, and that in this sense alone there may be syntactical unity.

[287]

नापि निःशेषवेदार्थमनुष्ठातुं क्षमो नरः ।

पुमायुषाऽपि येन स्यादात्मज्ञानेऽधिकारिता ॥ २८७ ॥

Nor is it possible for a man to perform all that is enjoined in the Vedas, even though he may strive all through his life (of one hundred years) in which case alone (according to you) there could be eligibility for self-knowledge.

Moreover, the condition precedent for adopting the path of *jñāna* laid down by you is impossible of achievement. No one can perform all the rites and sacrifices.

NKL—*sandhyāvandanam-ārābhya-sahasrasaṁvatsara - paryantānām karmanām ānanyād ity arthah.*

[288]

संपदां चार्थवादत्वं तेन वेदान्तगोचरे ।

ज्ञानेऽधिकारिणोऽभावत्प्रामाण्यं क्षिप्यते स्वतः ॥ २८८ ॥

Attaining prosperity (*sampat*) is an eulogy ; therefore as there would be no eligible persons for knowledge

having as its sphere the Vedānta, the intrinsic validity (of the Veda) would have to go.

If it be said that there is the same eligible person for the two *kāṇḍas*, we ask, who is this eligible person? Is it the one who desires *Svarga*, etc., or the one who desires *jñāna*? It cannot be the first, for sacrifice, etc., are auxiliary to *jñāna*, and the supposed fruits thereof, viz. *Svarga*, etc., are not intended to be the fruits. Nor the second, for, as it is not possible for any single person to perform all the rites and sacrifices, there would be no eligible person for *jñāna*.

AVS—sāmpac-chabdena upāsanā-'bhidhīyata iti kecit. teṣāṃ ayam abhiprāyaḥ aśvamedhādi-karmā-'nadhikṛtānām tat-phalārthinām sāmpad upadiśyate. yadi sakala-vedārthādhikāriṇaḥ jñānādhikāraḥ tadā sāmpad avivakṣitā bhaved iti.

[289]

किंच मानादविज्ञाता विमुक्तिः काम्यते न च ।

ज्ञातायां स्वात्मरूपत्वात्सुतरां नास्ति कामना ॥ २८९ ॥

“Now, if release is not known through a means of valid knowledge, it cannot be desired; if known, since it is the nature of one's own self, there cannot be still desire (therefor).

Pūrvapakṣa—The distinctive feature about the eligible person is said to be his desire for *mokṣa*. Does he desire *mokṣa* even without knowing it, or after knowing it? Without knowing it, he cannot desire; after knowing it, there is no need for desire.

In this verse *kimca* is used in the sense of *nanu*. See *NKL*: *nanvarthe kimceti prayogaḥ ātmano brahmabhūyaṃ kaivalyam anavagataṃcen na kāmyeta jñānakāryatvād kāmanāyāḥ avagataṃcet siddhatvāt kāmanām nirundhyād ato mumukṣur nādhikārity abhisandhiḥ.*

AVS—athavā kiñceti-slokaḥ pūrvapakṣaḥ. nanu kiñceti samuccaye gamyamāne pūrvapakṣatvaṁ katham siddhāntokty-anantaram nāyaṁ doṣaḥ anekārthatvān-nipātītānāṁ kiñca nanu ity arthaḥ. ayam arthaḥ. yathā asmat-pakṣe adhikāry-abhāvāt veda-prāmāṇyākṣepaḥ evam tvat-pakṣepi syāt mokṣakāmas tavādhikārī mokṣe ca kāmo no sambhavatīty uktam.

[290]

न युक्तं कामना मुक्तौ पुंसां नास्तीति भाषितुम् ।
देशकालानवच्छिन्नसुखाद्यर्थित्वदर्शनात् ॥ २९० ॥

It is not proper to say that there is no desire on the part of man for release ; for there is seen desire for happiness unconditioned by space and time.

Siddhānta—In our view, the possibility of the desire for *mokṣa* is stated thus : every living being wants happiness and shuns misery, and so the desire is possible for *mokṣa* which is the same as the self—the unlimited happiness marked by the total absence of misery. Although *mokṣa* is our own nature, we do not know it through *pramāṇa* before the rise of knowledge. Hence the need for Vedānta. And, the one who is eligible for Vedānta does not require the *karma-kāṇḍa*.

NTV—sukhaṁ me syād duḥkhaṁ me mābhūd iti deśakālāsprṣṭaṁ sukhamātraṁ duḥkhanivṛtti-mātraṁ vā kāmayaṁānās sarve puruṣā dṛśyante.

NKL—mābhūd anvapi me duḥkhaṁ, sukhy eva syām ahaṁ sadeti, niratisayānanda-niḥśeṣānarthanivṛtti-prārthanā-darśanāt.

[291]

किंच ज्ञानमदृष्टार्थमग्निहोतादिवद्यदि ।
ततोऽधिकारिचिन्ता स्यात्कृतेऽप्यफलशङ्कया ॥ २९१ ॥

Further, if knowledge were to have an unseen fruit, like *Agnihotra*, etc., then there might be the doubt whether there is an eligible person or not, because of doubt as regards something done not fructifying.

For the following reason also, in our view there results the eligible person for *jñāna*: *jñāna*, for us, has a seen fruit, and not an unseen fruit as for you. If it be an unseen fruit, there may be the doubt if it would result or not. If there be that doubt, the eligibility will not be certain. Since, in our view, *jñāna* is a seen fruit, like the fruit of agriculture, the desire for it as well as the eligibility are established.

[292]

कामिनाऽप्यभिहोत्रादि शूद्रेणानधिकारिणा ।

कृतमप्यफलं तेन यत्नात्तत्र निरूप्यते ॥ २९२ ॥

Agnihotra, etc., performed by a *Śūdra*, who is not eligible, though having desire (for heaven), do not yield fruit. Hence, there eligibility is determined with care.

Where the fruit is unseen, as in the case of *Agnihotra*, there is need to inquire as to who is eligible and who is not. Mere desire, here, for an end will not do.

[293]

अविद्याधस्मरज्ञानजन्ममात्रावलम्बिनः ।

पुमर्थस्याधिकं शास्त्रार्त्तिकचिदत्र तु नार्थ्यते ॥ २९३ ॥

But, here, nothing more is sought from Scripture than the human goal which depends only on the rise of knowledge which destroys ignorance.

As far as Vedānta is concerned, no unseen fruit is desired. What Scripture does here is to dispel ignorance; and when ignorance is dispelled, the human goal is reached.

[294]

कुतस्तज्ज्ञानमिति चेत्तद्धि बन्धपरिक्षयात् ।

असावपि च भूतो वा भावी वा वर्ततेऽथवा ॥ २९४ ॥

“Whence that knowledge?” If thus it be asked (it is replied): That, indeed, is from the removal of obstacle.

“Even that is either past, future, or present”.

Pūrvapakṣa—The aforesaid *jñāna* does not arise from Scripture, for we see that to be the case with many who are learned in Scripture.

Siddhānta—In the case of those who are free from sin, there is the rise of true knowledge from the ‘hearing’, etc., of Scripture.

Pūrvapakṣa—Is that sin (obstacle) past, present, or future? The sin that is past cannot stand as an obstacle. Nor the sin that is going to be in the future. As for present sin, that is impossible in the case of one who has followed the path of *jñāna*.

AVS—*anuṣṭhita-sāadhanasyāpi jñānotpatti-pratibandha-pāpādikṣaya-vyatiरेकेṇa jñānaṁ na sambhavati.*

[295]

अधीतवेदवेदाऽर्थोप्यत एव न मुच्यते ।

हिरण्यनिधिदृष्टान्तादिदमेव च दर्शितम् ॥ २९५ ॥

Therefore it is that even though one might have studied the Veda and its meaning, one is not released. This has been shown (in the *Chāndogya*) by the illustration of buried treasure.

Siddhānta—Present sin serves as an obstacle to the rise of Brahman-knowledge. There may be the causal aggregate for knowledge, and yet knowledge may not arise because of some obstacle. The *Chāndogya* text (VIII, iii, 2), which says that though all beings go to Brahman in sleep, they do not know it, is cited here as evidence. The Upaniṣad compares this to a person not knowing a buried treasure even though he may be walking over it.

[296]

भिद्यते हृदयग्रन्थिश्छिद्यन्ते सर्वसंशयाः ।

क्षीयन्ते चास्य कर्माणि तस्मिन्दृष्टे परावरे ॥ २९६ ॥

‘The knot of the heart is cut, all doubts are dispelled, his *karmas* are destroyed, when that than which there is nothing higher is seen.’

To show that *jñāna* is a seen fruit, the evidence of the experience of the wise ones is given. The Upaniṣad text quoted refers to this experience. See *MU*, II, ii, 8.

[297]

इत्यादिनाऽपि विज्ञानं नाद्याष्टार्थमितीरितम् ।

तथा स ब्रह्मणः केन स्याद्येनेति प्रदर्शितम् ॥ २९७ ॥

In this and other texts it is said that knowledge is not an unseen fruit. Even so, it is shown in the text ‘By what does he become a Brāhmaṇa,’ etc.

From the texts quoted we learn that *jñāna* has a seen fruit.

[298]

आत्यन्तिकसुखानर्थप्राप्तिविच्छेदकाङ्क्षिणः ।

प्रीत्युत्कर्षोऽपि लोकेऽस्मिन्दृष्टः स किं न काम्यते ॥ २९८ ॥

“There is seen in the world intense pleasure in the case of those who desire the attainment of absolute happiness and the removal of evil. So, why should it (release) not be desired ?

Pūrvapakṣa—(Here, the *Pūrvapakṣa* is not *Mīmāṃsā* but a school of Vedānta which advocates combination of *karma* and *jñāna*). Even though *ātma-jñāna* has a seen fruit, is it settled that he who desires *mokṣa* has eligibility for it, or is it not settled ? If it is not settled, even he who desires *Svarga* may want *jñāna*. If it is settled, then, the principle on which you have settled it may hold good in my view also. *Mokṣa*, according to you, is attainment of happiness and freedom from misery. He who desires that is the eligible person. That is possible in my view too. So, both the sections of the Veda are authoritative.

AVS—*prīty-utkarṣo mokṣaḥ tad viṣayā kāmāno 'palabhyamānā nivārayitum na śakyate.*

[299]

दृष्टादृष्टार्थसंबन्धिप्रीत्युत्कर्षविशेषतः ।

नाऽऽनन्दादन्यतो मुख्यात्पण्डितः पर्यवस्यति ॥ २९९ ॥

“Since there is no difference in degree as between the pleasure relating to the seen and that relating to the unseen fruit, the wise man chooses nothing other than the principal bliss.

The intelligent person chooses *mokṣa* in preference to *Svarga*, because it is the highest bliss. Even in my view that is so.

[300]

किंतु साधनसाध्यत्वादनित्यं कर्मजं सुखम् ।

अभिव्यञ्जकतन्त्रस्तु मोक्षस्तेनाक्षयो मतः ॥ ३०० ॥

“Moreover, the happiness born of action is non-eternal since it is accomplished through a means; release, however, is dependent only on what manifests it, therefore, it is admitted to be imperishable.

The reason why *mokṣa* is preferred is that it is eternal while heavenly happiness, etc., are non-eternal. *Mokṣa* is not produced by anything; it is only manifested.

NTV—tasmād deśa-kāla-vastvaparicchinna-pratyagātmā mukhyā-nanda iti bhāvah.

[301]

संस्कारमात्रकारित्वं सर्वेषामपि कर्मणाम् ।

ज्ञानकाण्डे प्रवेशो वा तेषां नार्थान्तरं ततः ॥ ३०१ ॥

“All rites effect only purification; or, they are to be regarded as subsidiary to the knowledge-section. Thus, there is no different purport for them.

Karmas purify the soul. Because of this, *karma-kāṇḍa* is subsidiary to *jñāna-kāṇḍa*. *Karma* has no aim other than *mokṣa*. So, it is part of the means to release. Only, *jñāna* is the principal, and *karma* is the subsidiary.

NKL—saṁskāro 'ntaḥkaraṇa-suddhiḥ, praveśo vividiṣā-dvāreṇa, mokṣābhivyañjakatvaṁ na tu sākṣād ity arthah.

AVS—saṁskāra-sabdena antaḥkaraṇa-suddhir vivakṣyate praveśa-sabdena vividiṣā tad-dvāreṇa mokṣābhivyañjakatvaṁ na sākṣād ity arthah.

[302-303a]

एवमत्रैकवाक्यत्वं नानुष्ठेयसमाप्तिः ।

असारफलसंप्राप्तिः पुमर्थो नेष्यते यतः ॥ ३०२ ॥

तृष्णया साधयन्प्रीतिं न प्रीतिलवमिच्छति ।

Thus is the syntactical unity here, and not by way of the completion of what is to be performed. As the attainment of an essence-less fruit is not accepted as the human goal, he who thirsts for accomplishing (the highest) pleasure does not desire fragmentary pleasure.

Thus, the two sections have syntactical unity, because the means to *mokṣa* is a combination of *jñāna* and *karma*. It is not as if one should finish performing all *karmas* and then pursue the path of *jñāna*. He who desires *mokṣa* performs *karmas* for the sake of *mokṣa*, and also seeks *jñāna*. He does not attain *Svarga* because *Svarga* which yields only limited happiness is not desired by him. As his aim is *mokṣa*, that alone he attains through *karmas* combined with *jñāna*.

NKL—*alpīyaḥ phala-saṁprāptiḥ svargo neṣyate yatotaḥ svarga-kāmo mumukṣur eve 'ty arthaḥ.*

AVS—*asārāphala-saṁprāptiḥ kṣudraphala-saṁprāptiḥ puruṣārtho neṣyate svargakāmo yajeta ity atra svargo neṣyata ity arthaḥ.*

[303b-304a]

प्रीतेः श्रुतः प्रकर्षोऽपि स्वर्गस्वाराज्यभेदतः ॥ ३०३ ॥

नापि प्रीतेरियत्तायाः स्वर्गशब्दोऽस्ति वाचकः ।

“The supreme pleasure is declared in Scripture differently as ‘heaven’, ‘autonomy’, etc. Nor does the word ‘heaven’ connote that the pleasure is this much alone.”

On the view of combination as between *jñāna* and *karma*, it has now been stated that as there is eligibility for *jñāna*, there is no non-authoritativeness of the Veda, nor difference of eligible person, etc.,

as between the two sections. Here, another reason is given for showing that there is no difference in means, etc., taught in the two sections. In texts such as 'He who desires *Svarga* is to sacrifice', etc., the term *Svarga* means *mokṣa*. It does not mean anything less than the highest happiness. So, it is clear that *mokṣa* is to be accomplished through *karma*.

[304 b]

न चाजानन्स्वसाध्यार्थं विद्वान्कश्चित्प्रवर्तते ॥ ३०४ ॥

“Nor does a wise man exert himself (in respect of rites) without knowing what he has to accomplish.”

Although those who are ignorant may understand by the word *Svarga* happiness in another world, and perform sacrifices, etc., for the sake of that, he who is wise inquires into the true meaning of that word, understands that it means *mokṣa*, and for the sake of attaining that performs *karma*. Thus, there is no difference in means, etc., as between the two sections.

NKL—*niratisaya-sukhasya svargatvāt tasya mokṣatvāt tat-sāadhanatvena yāgādi-vidhānāt na sādhanādi-bhedah.*

AVS—*eṣa samudāyārthah. niratisaya-prīteḥ svargatvāt tasyāś ca mokṣatvāt tat-sāadhanatvena yāgadānādi-vidhānāt na sādhanā-dhikāri-bhedah iti.*

[305]

प्रीतिर्या काचिदिष्टा चेत्स्वर्गशब्देन भण्यते ।

चित्ताग्निष्टोमयागादेः पश्वादिफलसंकरः ॥ ३०५ ॥

If some undefined pleasure is accepted as what is connoted by the word 'heaven', there would be confusion of the fruit, cattle, etc., of the *citrā* and *Agniṣṭoma* sacrifices.

Siddhānta—If it is your view that by *Svarga* what is meant is some undefined happiness, then he who has performed the *Citrā* sacrifice will not be prompted to perform the *Jyotiṣṭoma*; for having derived happiness by drinking the milk which is the fruit of the *Citrā* sacrifice, there is no need for him to perform the *Jyotiṣṭoma* for the sake of *Svarga*. But we do find that a distinction is made between the fruits of the two sacrifices. So, *Svarga* cannot mean mere undefined happiness.

[306-307]

विशेषो वाञ्छितश्चेत्स्यात्पुत्रपश्वाद्युपाधितः ।

न तावत्संभवेत्स्वर्गो ज्ञातोपाधिवियोगतः ॥ ३०६ ॥

मुक्तौ काम्यफलेऽभीष्टे सकृत्करण एव च ।

अनवच्छिन्नरूपायाः प्रीतेराप्तौ कृतार्थता ॥ ३०७ ॥

If it (i.e., heaven) be accepted as something more excellent than (the pleasure) which results from adjuncts like son, cattle, etc., that (the supreme happiness) cannot be heaven, because it is free from any known adjunct. If release be accepted as the fruit of optional rites, then, since by a single performance of a rite there would be the attainment of unconditioned happiness, there would be (final) accomplishment.

If *Svarga* be taken to mean some distinctive happiness which is other than that derived from son, cattle, etc., is it, we ask, conditioned happiness or unconditioned happiness? If it is conditioned happiness, it cannot be the same as *mokṣa*. It cannot be unconditioned happiness, for we do not know of any instance where the word *Svarga* is used to mean such happiness. *Svarga* is not a self-established or self-revealed experience. If it is self-established or self-revealed,

it would not require *karma* for its attainment. Therefore, the *Svarga* that is accomplished through *karma* is not *mokṣa*. And, there is no identity of means, etc., for the two sections.

Even granting that *Svarga* means *mokṣa* and that it is attained through *karma*, we can show that your view is not intelligible. If *mokṣa* is the result of an optional rite, then the mere performance of a rite once must yield *mokṣa*, in which case the injunctions in regard to all other rites would become futile.

AVS—etad api vārtikadvayam [305-6] pūrvapakṣa eveti kecit.

[308]

पुत्रा ह्येते परीक्ष्येति तथा तद्य इहेति च ।

कर्मभ्यो निर्वृतिर्नास्तीत्यादिवाक्यैः प्रदर्शितम् ॥ ३०८ ॥

That through rites there is no perfection is shown in the texts: ‘These are transitory’¹, ‘Having examined’², ‘As here’³, etc.

Three texts from the Upaniṣads are quoted here in support of the view that *karma* is not the means to *mokṣa*.

1. *MU*, I, ii, 7. ‘Unsteady, verily, are these boats of the eighteen sacrificial forms, which are declared to be inferior *karma*. Those misguided men who acclaim this with superior joy fall again into old age and death.’*

2. *MU*, I, ii, 12. ‘Deeply pondering over the worlds that are won by *karma*, let a Brahmin arrive at non-attachment. That (Brahman-world) which is not made, cannot be (won) through works. For the sake of this knowledge, let him only approach, with sacrificial fuel in hand, a preceptor who is learned in Scripture and who is firmly established in Brahman.’†

* T.M.P. Mahadevan, *The Upanishads* (Selections), G.A. Natesan & Co., Madras, 4th edn., 1950, p. 98.

† *Ibid.*, p. 100.

3. *CHU*, V, x, 7. 'Those whose conduct here has been good will soon attain a good birth,' etc.

NTV—*tasmāt jñānam eva kevalam mokṣa-sādhanaṁ na karma, tasmim̐sca jñāne avidhitantratvāt nādhikārah, kiṁtu tatsādhana-samnyāsādāv adhikāra iti.*

[309]

प्रत्यक्षश्रुतिविध्यन्तविहितानामकारणात् ।

त्यागोऽतिसाहसं मन्ये ननु यागादिकर्मणाम् ॥ ३०९ ॥

“Now, to reject, without (sufficient) reason, actions like sacrifices, which are enjoined by the direct injunctions¹ of Scripture, would be rashness, I think.”

Pūrvapakṣa—Injunctive texts are stronger than *arthavāda* texts. Therefore, *mokṣa* must be regarded as the fruit of action, in which case the two sections will have the same eligible person.

The text, ‘As long as one lives, one must offer the *Agnihotra*,’ is a direct and principal text. In view of this, to teach that one must renounce would be the height of rashness. And, *Agnihotra*, etc., are the means to *mokṣa* through being subsidiary to *jñāna*.

1. *Vidhyanta* means *vidhi* here, as *svapnānta* means *svapna* in *BU*, IV, iii, 13. See the present writer’s *Gaudapāda: A Study in Early Advaita* (2nd ed., University of Madras, 1954), p. 67.

[310]

प्रत्यक्षोपनिषद्वाक्यविहितायास्ततोऽपि तु ।

ऐकात्म्यज्ञाननिष्ठायास्त्यागोऽतीव हि साहसम् ॥ ३१० ॥

A far greater rashness it is to reject the knowledge-discipline of the one self which is directly enjoined in the Upaniṣad texts.

Siddhānta—The Upaniṣad texts such as *BU*, IV, iv, 23 (See v. 216) enjoin directly renunciation for one who has detachment. For such a one 'hearing', etc., are prescribed. If the view of combination of *karma* and *jñāna* be accepted, all those texts would have to be rejected, which is much worse than the renunciation of *karma*. The text about *Agnihotra* cited above refers only to those who have not yet developed a sense of detachment.

NKL—*sādhana-catuṣṭaya-viśiṣṭasya śravanādy-anuṣṭhānam aikāntya-niṣṭhā sarva-vedānta-siddhānta ity arthaḥ.*

[311-312 a]

विचार्यमाणे यत्नेन त्वधिकारे यथाश्रुति ।

न किञ्चित्साहसं त्वत् प्रत्यक्षश्रुतिवाक्यतः ॥ ३११ ॥

अधिकारविभागस्य प्रसिद्धेरेव कारणात् ।

If inquiry as regards eligibility be made with care, in accordance with what is declared in Scripture, there would, indeed be no rashness here; for the reason that difference in eligibility is established in Scripture by direct statements.

There is no rashness as alleged by the *pūrvapakṣin*. Nor is there conflict between the two sections. For one who inquires, the position becomes very clear. A person in whom there is non-attachment is eligible to renounce all actions including the obligatory rites. Actions are only for those in whom there is ignorance. Scripture is definite on this point.

AVS—*bibhīṣikāṁ kurvato bibhīṣikayaiva uttaram uktam. idānīm sākṣād uttaram āha.*

[312 b]

तस्मात्सिद्धोऽधिकारोऽत्र ब्रह्मरूपं विविक्षिताम् ॥ ३१२ ॥

Therefore, eligibility has been established here for those who desire entry into Brahman-nature.

It has now been settled that eligibility, etc., for the two sections are different. The seeker after release is eligible to study the *jñāna-kāṇḍa*; for he wants to realize Brahman which is of the nature of eternal happiness and consciousness. The means to that is only the knowledge of the one self. *Karma* is the means to prosperity (*abhyudaya*); it cannot effect release.

[313]

तस्यास्य कर्मकाण्डेन संबन्ध इति भाष्यकृत् ।

प्रतिज्ञायापि संबन्धं कस्मात्तन्नोक्तवान्स्फुटम् ॥ ३१३ ॥

“ Even though premising the relation thus, ‘ Of that (viz., the knowledge-section) the relation to the ritual-section (will be declared,)’ why has not the commentator (i.e., Śaṅkara) stated the relation explicitly ?

Pūrvapakṣa—why is it that the commentator, Śaṅkara, has not stated clearly the relation between the two sections ?

[314]

अभिधीयत इत्यादिवचसाऽपि स नोच्यते ।

सिद्धे वस्तुनि वेदस्य मानत्वं तेन भण्यते ॥ ३१४ ॥

“ Even in the words ‘ It will be declared,’ etc., it (the specific relation) is not stated. What is stated there is the evidence of the Veda in respect of the existent reality.”

Śaṅkara merely shows that the Veda is *pramāṇa* for the self which is an existent reality.

[315]

वेदान्तोक्तेः प्रमाणत्वे सति संबन्ध उच्यते ।

प्रामाण्यायैव तेनाऽऽदौ सर्वोऽपीत्यादि भण्यते ॥ ३१५ ॥

After establishing the evidentiary character of the Vedānta texts, the relation is stated. It is for establishing the evidentiary character that it is stated first 'Even all,' etc.

Siddhānta—After premising the relation between the two sections, the commentator seeks to establish the validity of the Vedānta texts. Then he will proceed to specify the relation. This is the proper procedure. Unless it is shown that Vedānta is valid, what is the use of relating it to the *karma-kāṇḍa*?

[316]

आक्षिप्यते वा संबन्धः संबन्धो नाभिधीयते ।

सप्तम्यन्तपदच्छेदात्कथं चेदिति भण्यते ॥ ३१६ ॥

Or, the relation is objected to (thus): 'The relation is not declared', by splitting the word (*karmakāṇḍena* into *karmakāṇḍe na*) (and taking the first word) as having the seventh case-ending. If it be asked 'How?', it is explained.

This is an alternative explanation of the words of the commentator. He is of the view that there is no relation of *jñāna-kāṇḍa* with *karma-kāṇḍa*.

[317]

भिन्नार्थयोर्न संबन्धो ह्यन्योन्यार्थानपेक्षतः ।

ऐकार्थ्ये चैकवाक्यत्वात्कर्मविज्ञानकाण्डयोः ॥ ३१७ ॥

If the ritual- and knowledge-sections have different senses, then, since each is not expectant of the sense of the other, there is no relation; if they have unity of sense, even then (there is no relation) because of syntactical unity.

Do the two sections have different senses or a non-different sense? If the former be the case, there cannot be any relation between them; if the latter, there would be syntactical unity between them, and so there would be no need for a relation.

[318]

तथा तयोरमानत्वे संबन्धोक्तिर्न युज्यते ।

द्वयोरेकस्य वा मात्वे न संबन्धादि शस्यते ॥ ३१८ ॥

Similarly, if the two have no validity, it is not proper to state a relation (between them); so also, if both or either of them be valid, no relation fits in.

Again, are both the sections invalid, or valid? If both are invalid, they cannot be related, even as there can be no coherence between two sets of insane statements. If both are valid, they would be independent and hence there can be no relation between them. If either alone be valid, even then there is no question of a relation between the two. Surely, there can be no relation between a valid statement and an invalid statement.

*AVS—ity-etad-vārtika-trayaṁ (316-8) pūrvapakṣaḥ, katham gam-
yate, atra sarvaprakāra-saṁbandha-nirākaraṇāt tasya ca aniṣṭatvāt,
ato vārtika-trayaṁ pūrvapakṣa eva. siddhānta itī kecit.*

[319]

श्रुत्यैव तस्य चोक्तत्वात्तमेतमिति यत्नतः ।

इति चेतसि संधाय संबन्धं नोक्तवान्गुरुः ॥ ३१९ ॥

And, because that (relation) has been stated by Scripture itself with care in the text ‘That, this one’, etc., bearing this in mind, the Preceptor did not state the relation.

It may be stated that the relation between the two sections is the unintelligibility of any invariable sequence. If that be the relation, then it is stated in *BU*, IV, iv, 22. See note on v. 14.

[320]

प्रसाध्य वा प्रमाणत्वं वेदान्तानां प्रयत्नतः ।

संबन्धं कर्मकाण्डेन पश्चात्सम्यक्प्रवक्ष्यते ॥ ३२० ॥

Or, after establishing with care the validity of the Vedāntas, he does explain well, later on, the relation to the ritual-section.

The commentator will explain later on the specific relation—the relation as taught in *BU*, IV, iv, 22.

[321]

वेदानुवचनादीनामैकात्म्यज्ञानजन्मने ।

तमेतमिति वाक्येन नित्यानां वक्ष्यते विधिः ॥ ३२१ ॥

“In the text ‘That, this one’, etc., it is the obligatory rites such as the recitation of the Veda that are declared by the injunction to be (the means) for the rise of the knowledge of the one self.”

The discussion now is about the *vividiṣā* text, *BU*, IV, iv, 22.

Pūrvapakṣa—The text under reference regards only the obligatory and occasioned rites as the means to the rise of *jñāna*. This means that the optional rites are of no use for *jñāna*. If that be so, there is no relation of the *jñāna-kāṇḍa* with the entire *karma-kāṇḍa*.

[322]

यद्वा विविदिषार्थत्वं सर्वेषामपि कर्मणाम् ।

तमेतमिति वाक्येन संयोगस्य पृथक्त्वतः ॥ ३२२ ॥

Or, in the text, ‘That, this one’, etc., all rites are stated to be for the sake of (generating) the desire for knowledge, because of a difference in relation.

Siddhānta—Because the general term *yajña* is used in the text, all *karmas* become the means to *jñāna* through generating the desire for knowledge (*vividiṣā*). It is true that the optional rites have other ends. But they can also have the generation of the desire for knowledge as their end.

For example, in the context of the *Agnihotra*, we read ‘*dadhnā juhoti*’ (one should offer curds), and again ‘*dadhnā indriyakāmasya juhuyāt*’ (for him who desires efficient sense-organs, one should offer curds). The former of these texts refers to an obligatory rite, and the latter to an optional rite. The question is whether the material to be used in these two rites is different or the same. The objector suggests that the material should be different. The *Pūrvamīmāṃsā-siddhānta* is that the material—viz. curds—is the same. That is, in

the case of the obligatory injunction, the connection of the material, the curds, is with all *homa*; and in the case of the optional injunction, the connection is only with that *homa* which is performed for a man desiring efficient sense-organs, and there is disconnection from all other *homa* (See *PM*, IV, iii, 5). Similarly, the *karmas* that are related to *Svarga* may subserve the purpose of generating the desire for knowledge, if the fruit, viz. *Svarga*, is given up; and thus the entire *karma-kāṇḍa* may be related to *jñāna-kāṇḍa*.

[323]

लोकतः सिद्धमादाय पशुव्रीह्यादिसाधनम् ।

इदं कार्यमिदं नेति कर्मकाण्डश्रुतेर्गतिः ॥ ३२३ ॥

“Taking what are well-established in the world, viz., the means like animals, rice-grains, etc., the way of Scripture in the ritual-section is (to teach) ‘This is to be done,’ ‘This is not (to be done).’

Pūrvapakṣa—How can there be relation between the *karma-kāṇḍa* which teaches difference of causative factors such as animal, etc., and the *jñāna-kāṇḍa* whose purport is the non-dual Brahman? The purport of *karma-kāṇḍa* is injunction.

[324]

मानान्तरेण संप्राप्तां साध्यसाधनसंगतिम् ।

कर्मशास्त्रं व्यनक्तीति न तु वस्त्ववबोधकृत् ॥ ३२४ ॥

“The teaching about ritual states the relation of ends and means for what have been obtained through other means of knowledge; it is not, however, what makes known the existent.”

It cannot be said that *karma-kāṇḍa* is invalid because it re-states the differences existing in the universe or the rites and rituals. The *karma-kāṇḍa* is not invalid, because it teaches a relation which remains otherwise unknown—viz. the relation of the soul to heaven. Scripture is valid, not because it reveals an existent entity such as the self, but because it makes known a relation which is otherwise unknown.

[325]

वेदो हि सर्व एवायमैकात्म्यज्ञानसिद्धये ।

अतो नान्योऽभिसंबन्धः कर्मविज्ञानकाण्डयोः ॥ ३२५ ॥

The entire Veda is, indeed, for the sake of gaining knowledge of the one self. Therefore, no other relation there is between the ritual- and knowledge-sections.

Siddhānta—We say that the purport of the entire Veda is the non-dual self. The *jñāna-kāṇḍa* teaches it directly, the *karma-kāṇḍa* indirectly. No other relation between the two sections is possible.

NTV—*vividiṣā saṁskārapakṣayoḥ śuddhi-dvāreṇa jñāna-sādhana-

tu sākṣād dhī-hetutvam ity evaṁ kṛtsna-
vedasya jñāna-hetutvaṁ
sambandhaḥ śruti-siddhaḥ.*

[326]

नित्यनैमित्तिकानीह कर्तृसंस्कारतो यतः ।

नान्यत्र पर्यवस्यन्ति ज्ञानादैकात्म्यगोचरात् ॥ ३२६ ॥

“The obligatory and occasioned rites culminate in nothing other than the sphere of the one self, through purifying the agent.

The *pūrvapakṣin* does not like the statement that the *entire* Veda has for purport the non-dual self. So, he argues that the obligatory and occasioned rites alone purify the soul and make it eligible for *jñāna*—not the optional rites.

[327]

प्लवा ह्येते परीक्ष्येति तथा तद्य इहेति च ।

निन्दाश्रुतेर्न काम्यानां कार्यताऽध्यवसीयते ॥ ३२७ ॥

“That the optional rites ought to be done is not made known, because of the condemnatory texts, ‘These are transitory’¹, ‘Having examined’², and ‘They, like those here’³.”

The *pūrvapakṣin* cites a few scriptural texts in his favour. All of them teach the futility of Vedic rites so far as self-knowledge is concerned.

These are the same as the texts quoted by the *siddhāntin* in v. 308.

1. MU, I, ii, 7.

2. MU, I, ii, 12.

3. CHU, V, x, 7.

AVS—*ayam arthaḥ. suddhy-utpādana-dvāreṇa jñāna-sādhana-tvaṁ nitya-naimittika-karmaṇāṁ bhavaty eva, kāmyānāṁ nindā-śravaṇāt kartavyataiva nāsti, katham jñāna-sādhana-tvaṁ. ato yadvā vividiṣārthatvam iti pakṣo ’nupapannaḥ iti.*

[328]

विधिनिन्दासमावेशो नैवमप्युपपद्यते ।

फलाभिसंधिमात्रे तु निन्दायामेव युज्यते ॥ ३२८ ॥

Even thus, the co-presence of injunction and condemnation is not intelligible. If, however, the condemnation relates to the desire for fruit, it is intelligible.

Siddhānta—It cannot be said that optional rites ought not to be performed, for they are enjoined. It is true that they are also condemned. But the condemnation refers only to the attachment to their fruit. When there is freedom from such attachment, the optional rites also can serve as the means to *jñāna*.

NTV—*yat-tu kāmyānām phalārthatayā coditatvāt tāni phalam eva ārabhante na suddhim ity uktam, tan na, pramāṇābhāvāt, na hi śāstrād anyat kāmyakarmāṇi phalam ārabhanta ity atra pramāṇam asti, śāstram tu phalecchor eva kāmyānām api phalāraṁbhakatvam āha. phalecchāyāś ca niṣiddhatvāt ananuṣṭheyatvam uktam. tasmāt phalāraṁbhakatve pramāṇābhāvāt suddhyāraṁbhakatve vividiṣantīti śāstrasya pramāṇatvāt, suddhir eva kāmyānām api phalam.*

[329]

उपासनं च यत्किञ्चिद्विद्याप्रकरणे श्रुतम् ।

तदप्यैकात्म्यविज्ञानयोग्यत्वायैव कल्प्यते ॥ ३२९ ॥

And, whatever meditation is taught in the knowledge section—that also is for making one fit for the knowledge of the one self.

‘Let the *karmas* be the means to *jñāna* through purification, etc. What about the meditations (*upāsanas*) which are taught in the *jñāna-kāṇḍa*? They can well be the direct means along with *jñāna*.’

The reply to this suggestion is : no. The meditations are either for the fulfilment of *karmas*, or for achieving prosperity, or for gaining release in sequence (*krama-mukti*). What we have already said with regard to *karmas* holds good as regards meditations also. In the *vividiṣā*-text (*BU*, IV, iv, 22) the word *tapas* stands for meditations.

[330]

विमुच्यमान इत्युक्तेरर्चिराद्युक्तिस्तथा ।

स्वार्थमात्रावसायित्वं नोपास्तीनां प्रतीयते ॥ ३३० ॥

Because of the text, 'Being released,'¹ and because of the text about the path of light,² it is seen that the meditations do not directly lead to release.

Upāsanas are not the direct means to release ; they are the means only in sequence. As evidence, two scriptural texts are cited :

1. *BU*, IV, ii, 1.

2. *BU*, VI, ii, 15 ; *CHU*, V, x, 1.

NTV—*tad āhuḥ paurāṇikāḥ—brahmaṇā saha te sarve samprāpte pratisaṅcare, parasyānte kṛtātmānaḥ praviṣanti param padam-iti.*

AVS—*arcirādivākyaodāharaṇam upāsanānām krama-mukti-phalatva-dyotanāya. svārtha-śabdena viriñcyādi-phala-grahaṇam.*

[331]

इत्येवमभिसंबन्धः कर्मकाण्डस्य युज्यते ।

इतोऽन्यथाऽभिसंबन्धे न किञ्चिन्मानमीक्ष्यते ॥ ३३१ ॥

Thus is the relation of the ritual-section (to knowledge) intelligible. In regard to any relation other than this, there is no evidence.

Karmas are the means to *jñāna* through purification; the *Upaniṣads*, however, are the direct means.

There is no evidence for the opposite view that the *jñāna-kāṇḍa* is an auxiliary to *karma-kāṇḍa* through purifying the agent.

NTV—*suddhivāreṇa jñāna-sāadhanatvaṁ karma-jñāna-kāṇḍa-sambandha ity arthaḥ.*

[332]

न चोद्गीथादिविषयज्ञानवत्कर्मसंगतिः ।

ऐकात्म्यबुद्धेस्तद्बुद्धिद्वारं नैव निरीक्ष्यते ॥ ३३२ ॥

Nor is there relation to ritual, as for the knowledge of the *udgītha*, etc.; for the knowledge of the one self, dependence on a knowledge of that (viz., ritual) is, certainly, not seen.

It cannot be held that self-knowledge enters into *karma*, even as the knowledge of *udgītha*, etc., is a part of *karma*, because it is Vedic knowledge. May be that the knowledge of the *udgītha* is a part of *karma*; for even though it is not an auxiliary thereof, it is related to an auxiliary. But there is no way by which self-knowledge can become a part of *karma*.

NTV—*udgīthādeḥ karmāṅgasya svaviṣaya-jñānamantareṇa prayogā-nupapatteḥ taj-jñānaṁ karmāṅgam iti yujyate, iha tv aupaniṣadāt-majñānam-antareṇa anupapattyabhāvāt karma-vidhayaḥ taj-jñānaṁ nākṣipatīty arthaḥ.*

[333-334 a]

श्रुत्या नैकात्म्यविज्ञानं विनियुक्तं श्रुतौ क्वचित् ।

उपस्थानं यथैन्द्रया स्यान्नापि लिङ्गेन संगतिः ॥ ३३३ ॥

बर्हिर्देवसदनं दामीत्यादौ च यथा तथा ।

The knowledge of the one self is not applied anywhere in Scripture (as an auxiliary to ritual) by express statement (*śruti*), as the *upasthāna* (i. e. the worship of the *Gārhapatya* fire) is (served) by the *Aindrī* hymn. Nor is there relation by the capacity of words (*liṅga*), as in ‘I cut the *barhis* as the seat for the deity,’ etc.

If self-knowledge is an auxiliary of *karma*, it must be capable of application in *karma*. For determining the application there are six *pramāṇas* (modes-of-evidence). [See note on v. 123 b-124 a.] By none of these six modes-of-evidence can it be shown that self-knowledge is an auxiliary of *karma*.

The first mode-of-evidence is express statement (*śruti*). A case where express statement decides the application is as follows: There is the text ‘With the *Aindrī*-mantra one worships the *Gārhapatya* fire’ (*aindryā gārhapatyam upatiṣṭhate*). [*Maitrāyaṇīya Saṃhitā*, III, ii, 4.] Here the problem is: What is the object of worship? Is it *Indra*, as signified by the word *aindryā*? Or, is it the *Gārhapatya* fire, as indicated by the word *gārhapatyam*? The answer is that the object of worship is the *Gārhapatya* fire, because of the express statement ‘one worships the *Gārhapatya* fire.’ The second case-ending in *gārhapatyam* indicates expressly that the fire is the object of worship. [See *PM*, III, ii, 3.] There is no such express statement to show that self-knowledge is to be applied in *karma*.

The second mode-of-evidence is word-capacity (*liṅga*). In connection with the *Darsapūrṇamāsa* rites there is the text 'I cut the *barhis* as the seat for the deity.' (*barhir deva-sadanam dāmi.*) From this we learn that the formula of the text is a subsidiary of the act of cutting, which is made known by word-capacity. The meaning of the words is that *barhis* is to be cut. And so, we understand that the formula is to be used while cutting the *barhis*. [See *PM*, III, ii, 1.] But no such word-capacity is seen for relating self-knowledge to *karma*. There is no formula through the meaning of whose words we may conclude that self-knowledge is subsidiary to *karma*.

NTV—śruti-liṅga-vākya-sthāna-prakarāṇa-samākhyānām śeṣa-śeṣi-pramāṇānām abhāvāc ca na jñānasya karmāṅgatvam ity āha—śrutyety ādinā.

[334 b-335 a]

न चापि वाक्याद्विज्ञानं कर्तृद्वारेण गच्छति ॥ ३३४ ॥
कर्मण्यप्रक्रियास्थं सज्जुहूर्पणमयीत्ववत् ।

Nor can knowledge be related (as auxiliary) to ritual by syntactical unity (*vākya*), through the agent, though it is not in the context (of ritual), as the state of being the *parṇa*-wood (is related to the ladle).

The third mode-of-evidence is syntactical connection (*vākya*). There is a text which reads 'He who has a ladle made of *parṇa*-wood hears no evil sound' (*yasya parṇamayī juhūr bhavati na sa pāpaṁ ślokaṁ śruṇoti*). (*Taittirīya-saṁhitā*, III, v, 7, 1.) Here, there is no express statement of a case-ending, such as accusative, etc.; only the ladle and the being-made-of-*parṇa*-wood are mentioned together. From their syntactical connection, it is inferred that being-made-of-*parṇa*-wood is subsidiary to (i. e. qualifies) the ladle. [See

PM, III, vi, 1.] In this manner it is not possible to determine from such statements as 'The self is to be known' that self-knowledge is subsidiary to *karma*.

[335 b-336 a]

जुह्वाद्याकृतिसंपत्तिव्यपेक्षापूर्णक्षमम् ॥ ३३५ ॥

विशेत्पर्णमयीत्वादि प्रकृत्युपनयात्क्रतुम् ।

By bringing in the primary material (*prakṛti*), 'being-made-of-*parṇa*-wood,' etc., may serve the rite, because it fulfils the expectancy about the form of the ladle.

In the case of the ladle, one would require to know of what material it should be made. So, from the text 'a ladle made of *parṇa*-wood' the expectancy is fulfilled, and being-made-of-*parṇa*-wood becomes a qualification of the ladle, thus serving the purpose of the rite.

[336 b-337 a]

कर्मापेक्षितकर्त्रादिरूपविध्वंसकृन्न तु ॥ ३३६ ॥

ऐकात्म्यज्ञानमन्वेति स्वातन्त्र्येऽप्यर्थवत्त्वतः ।

The knowledge of the one self, however, which destroys the nature of agency, etc., required by ritual, cannot be the auxiliary (of ritual), for even independently it has purport.

The case of self-knowledge is quite different. It cannot help the cause of rites in any way. For the performance of rites there is needed an agent. The knowledge, of which we are speaking, is of the self as non-agent.

Moreover, the text about the ladle made of *parṇa*-wood has no independent purport of its own, whereas the texts relating to self-knowledge have their own purport.

[337 b-338 a]

जुह्वाद्यव्यभिचारित्वात्प्रत्युपस्थापयेत्क्रतुम् ॥ ३३७ ॥

कर्ताऽन्यत्रापि सद्भावान्नाऽऽक्षेप्ता व्यभिचारतः ।

The ladle, etc., because of non-inconstancy may serve as auxiliary to rite; but because the agent is elsewhere too, he does not bring in (rite as the principal), as there is inconstancy.

‘Being-made-of-*parṇa*-wood’ becomes subsidiary to the rites through the ladle, because the ladle is indispensable for the rites. The agent, however, does not necessarily bring in *karma* as the principal of knowledge; for, agency is related not exclusively to Vedic *karma*. Even for secular acts, agency is required.

[338 b-339]

अनारभ्योक्तिश्चापि नेह प्रकरणग्रहः ॥ ३३८ ॥

सिद्धे सामान्यतो लिङ्गात्संबन्धे कर्मभिस्ततः ।

विशेषावगतिर्नाम्नः क्रमाच्चेति व्यवस्थितम् ॥ ३३९ ॥

Since, having commenced (to expound ritual) (the knowledge of self) is not taught, there is not here the application of context (*prakaraṇa*). When a relation, in general, with rites has been established through the capacity of words (*liṅga*), then a specific knowledge may result through name (*nāma*) and order (*krama*); thus has it been settled.

The fourth mode-of-evidence is context (*prakaraṇa*). Context is interdependence or mutual requirement. When a certain statement (i. e. injunction of action) stands in need of the statement of the *modus operandi*, and when this need is supplied by a statement which is found in close proximity with the original statement, then there is connection between the two statements. For example, in connection with the *Darśapūrṇamāsa*, we read ‘*samidho yajati, tanūnapātām yajati, iḍo yajati, barhir yajati, svāhākāraṁ yajati*’ (*Taittirīya-saṁhitā*, II, vi, I, 1). This text speaks of the five fore-sacrifices (*prayājas*). Now, the question is: in the context of which set of rites are these fore-sacrifices to be performed? The text about them is to be found in close proximity to the statement about *Darśapūrṇamāsa*. The two statements stand in mutual need. In the injunction of the *Darśapūrṇamāsa* rites, there is felt a requirement of the *modus operandi*: how is the fruit of the rites to be accomplished? In the statement of the fore-sacrifices there is felt a requirement of the fruit to be gained. What is the end to be achieved by them? Since the statement of the fore-sacrifices is to be found in the proximity of the injunction of *Darśapūrṇamāsa*, it is to be inferred that the fore-sacrifices are the subsidiaries of the *Darśapūrṇamāsa* rites. (*PM*, III, iii, 11.)

Applying the principle of context (*prakaraṇa*), it cannot be said that *jñāna* is subsidiary to *karma*. The context of *jñāna* is different from that of *karma*. And, self-knowledge is nowhere taught in the context of *karma*.

The last two modes-of-evidence are order or position (*krama, sthāna*) and name (*nāma, samākhyā*). Order or position means common-location. It may refer to either common-location in the text or common-location in the performance. For instance, if there is the mention of a series of ritual acts followed by the recital of a set of *mantras*, the problem would be: which *mantra* is to be uttered in which sacrifice? The answer is that the first *mantra* should be connected with the first sacrifice, the second with the second, and so on. Similarly, there may arise the question, in connection with a

sacrifice, as to whether a particular act is to be performed on one day or on the other. The question is to be decided by reference to the commonness of place in the performance. (*PM*, III, iii, 42.) The last mode-of-evidence which is name means a word understood in its literal or etymological sense. For example, the word '*hotṛcamasa*' means 'the cup from which the *hotṛ*-priest drinks.' From this it is to be understood that the *hotṛ* is subsidiary to the drinking of the contents of the cup. (*PM*, III, iii, 13.)

With regard to the application of word-capacity, order and name, there is the following discussion under *PM*, III, ii, 19. There is a section of the Veda bearing the heading '*kāmya-yājyānuvākyas*.' Here a set of verses called *kāmya-yājyānuvākyas* (verses of sacrifice and invitation) are to be found, beginning with '*indrāgnī rocanā divaḥ*' (Indra-Agni are the two light-spaces of heaven), etc. Then we have certain *kāmya* sacrifices mentioned in a definite order, such as '*indrāgnam ekādaśakapālaṁ nirvapet*' (He shall distribute a cake for Indra-Agni on eleven potsherds), '*vaiśvānaram dvādaśakapālaṁ nirvapet*' (He shall distribute a cake for Vaiśvānara on twelve potsherds), etc. Now, the question is whether the *yājyānuvākya* is connected with all the sacrifices that are offered to Indra-Agni, or only with that particular *kāmya* sacrifice enjoined in the text '*indrāgnam ekādaśakapālaṁ nirvapet*'. The answer is that it is connected with only that particular *kāmya* sacrifice. This is established on the evidence of word-capacity, order and name. The word-capacity of the *yājyānuvākya*, *indrāgnī*, etc., and also its order, are the same as those of the said sacrifice. The name '*yājyānuvākya*' also indicates that the verse is subsidiary to the *kāmya* sacrifice. Thus, through the combined force of word-capacity, order and name, the subsidiariness of the *yājyānuvākya* to the *kāmya* sacrifice is established.

In the next verse it is shown that the case of self-knowledge is not similar to that of the *kāmyayājyeṣṭi*.

[340]

इह त्वैकात्म्यधीयोगः काम्ययाज्येष्टिवन्न हि ।

तस्मात्कर्माभिसंबन्धो नैवैकात्म्यधियोऽमितेः ॥ ३४० ॥

But here, the relation of the knowledge of the one self is not like that of the *kāmya-yājyeṣṭi*; therefore, the knowledge of the one self is not related to rites (as their auxiliary), as there is no (other) means (of stating the relation).

Self-knowledge is not subsidiary to *karma*, as *yājyānuvākya* is to the *kāmya* sacrifice. So, the last two modes-of-evidence, order and name, are not helpful here in establishing the subsidiariness of self-knowledge to *karma*. And, there is no other mode-of-evidence to determine the principal-subsidiary relation.

[341]

न चाप्यस्यार्थवादत्वं विधिना वाक्यभेदतः ।

दृष्टार्थत्वाच्च तद्बुद्धेः पाठान्नादृष्टकल्पना ॥ ३४१ ॥

Nor is this (viz. the text about the fruit of self-knowledge) an eulogy, because there would then be sentence-split with the injunction. And, because that knowledge has a seen fruit, an unseen fruit cannot be postulated for the study (of the Vedānta).

It may be held that the text which declares the fruit of self-knowledge is an eulogy, on the analogy of the text about the ladle being made of *parṇa*-wood. But that is not correct because there is no syntactical unity of the Upaniṣad text with the ritual text which is mandatory.

Moreover, the fruit of Vedānta which is the destruction of all sorrow is a seen fruit, whereas the fruit of ritual action is an unseen fruit. Therefore, the Vedānta text cannot be subsidiary to *karma-kāṇḍa*.

NTV—na ca kartr-stāvakatvena karma-viśeṣatvaṁ vedāntānām.

[342 a]

तमेतमिति वाक्यात्तु यागादेः प्रत्युताङ्गता ।

From the text, ‘That, this one’, etc., it is (learnt), on the contrary, that sacrifice, etc., are auxiliary (to knowledge).

It has been shown that there is no evidence for *jñāna* being subsidiary to *karma*. Here, the *siddhānta* view already set forth is repeated, viz., that *karma* is auxiliary to *jñāna*. The evidence for this is the *vividiṣā* text (*BU*, IV, iv, 22).

NTV—kimca ātmajñānasya kartr-śeṣatve na kevalaṁ] pramāṇā-bhāva eva, pratyuta karmaṇām jñāna-śeṣatve pramāṇam asti.

[342 b–343 a]

अन्ये त्वाहुर्न शक्नोति कामसंदूषिताशयः ॥ ३४२ ॥

द्रष्टुं तत्परमद्वैतं सर्वकामासमाप्तिः ।

Others say : “One cannot realize the supreme non-duality, if his mind is defiled by desire and if every desire of his has not been fulfilled.

This objection is that of the *kāmavilaya-vādin*. While admitting that *karma* is auxiliary to *jñāna*, he contends that it is so, not through generating the desire to know (*vividiṣā*), but through resolving desire (*kāmavilaya*). And, desires are to be resolved through enjoyment. It is only when all desires are resolved that one obtains eligibility for knowledge. All desires including that for heaven should be first fulfilled, and then there would be no more attachment to them. When there is complete non-attachment, one becomes fit for the path of knowledge.

[343 b–344 a]

द्वैतैकत्वमतीहाभिः सूत्रान्तं फलमाप्स्य ना ॥ ३४३ ॥

प्राजापत्यं पदं भुक्त्वा तदैकात्म्यं प्रपद्यते ।

“By the contemplation of unity in duality (i. e. the *Sūtrātman*), one attains fruits ranging from human-ness to the status of the *Sūtrātman*, and after enjoying the status of *Prajāpati* attains the one self.”

The *kāmavilaya-vādin* continues: By meditating on the *Sūtrātman* and by performing all the rites beginning with *Darvi-homa* and ending with *Satra*, one attains all the grades of pleasures, ranging from those of the human species to those of the *Sūtrātman*. After that there will be nothing more to enjoy. So, one becomes detached from all desires, attains identity with *Prajāpati*, and eventually realizes the non-dual self.

NKL-pūrva-pūrva-kṣudratara-karmānuṣṭhānena kṣudraphalaprāptyā tato-nivṛtta-rāgo nityānuṣṭhāna-samuccita-hiraṇyagarbhopāsanāt tat-padam prāpya tatrāpi jāta-vairāgyo brahmabhūyaṁ gacchatīty arthaḥ.

[344 b–345 a]

नैवं न कामसंप्राप्त्या तन्नाशोऽब्दशतैरपि ॥ ३४४ ॥

तत्सेवातोऽतिवृद्धिः स्यान्निवृत्तिर्दोषदर्शनात् ।

Not thus. Desire is not destroyed by fulfilment even in hundreds of years ; it only increases enormously by being served ; it is removed only when its defect is seen.

The *Siddhāntin* replies: Not through enjoyment will desires cease. On the contrary, they will increase. It is only when their defect is seen that there will be non-attachment.

NKL — *bhogasya rāgavṛddhihetor na tannivartakatvam iti dūṣayati.*

AVS—*na bhogāt kāma-nivṛttiḥ, kintu doṣa-darśanād eva.*

[345 b–346 a]

न जातु कामः कामानामुपभोगेन शाम्यति ॥ ३४५ ॥

हविषा कृष्णवर्त्मैव भूय एवमिव वर्धते ।

Never does desire cease by the enjoyment of desires ; it only increases, like fire (fed) by oblation.

This is a verse from *Manu* (ii, 94).

NKL refers to this verse as *Parāśara-vacanam*.

[346 b–347 a]

निवर्तेतापि कामेभ्यस्तदुपायाप्रसिद्धितः ॥ ३४६ ॥

सर्वक्लेशोपशान्त्यात्मज्ञानं चापि समाश्रयेत् ।

One should, indeed, turn away from desires, for they are not the means ; and one should resort to the knowledge of self through the quiescence of afflictions.

Karmas cannot remove attachment. The knowledge of *karmas* and their performance are not the way for the one who wants to break the vicious circle of *samsāra*. Just as enjoyment does not free one from desire, so also performance of action does not destroy

desire. It is only when there is cessation from desire and action that there is a possibility of acquiring self-knowledge. So, the afflictions (*kleśas*) must go.

[347 b-348 a]

अथाऽऽनन्दः श्रुतः साक्षान्मानेनाविषयीकृतः ॥ ३४७ ॥

दृष्टानन्दाभिलाषं स न मन्दीकर्तुमप्यलम् ।

The happiness, which is heard of in Scripture but not realized through direct evidence, is not sufficient to diminish the longing for happiness derived from objects.

He who has attained the status of *Prajāpati* cannot even 'hear' from the *Śāstras* about Brahman-bliss; for only human beings are eligible to study the *Śāstras*. Even supposing that, somehow, he 'hears,' he will not develop a longing for that bliss while he is actually enjoying the pleasures of *Prajāpati*.

[348 b-349 a]

कामप्रविलयायातस्तद्विपक्षार्थभावनम् ॥ ३४८ ॥

विधयस्तत्क्रियाणां स्युस्तद्विपर्ययहेतवः ।

For resolving desire, the contemplation of what is contrary thereto (is the means). Injunctions of rites are the means to what is opposed to it.

The way to resolve desires is to constantly remember the defects of all sense-objects. If there is perception of the defects of objects, there will be no desire for them. Performance of actions will never lead to this end. Even obligatory rites result in the enjoyment of certain ends.

NKL—*karma-vidhayaḥ kāma-vṛddhi-hetavaḥ ity arthah.*

[349 b-350 a]

द्वारं न नियतं मुक्तेः प्राजापत्यं पदं भवेत् ॥ ३४९ ॥

नह्युपाधिषु तत्त्वस्य विशेषः कश्चिदीक्ष्यते ।

The state of *Prajāpati* is not an invariable door to release; nor is any excellence of the real seen among adjuncts.

The state of *Prajāpati* is not the means to true knowledge; nor is it the means to the augmentation of truth. Where the adjuncts such as *Prajāpati*-hood function, there can never be the excellence of truth. So far as the highest truth is concerned, the adjuncts are all the same.

NTV—upādhīnām anirvācyatvāt teṣu viśeṣāpi anirvācyā eveti tattvasya na tāttvika-viśeṣaḥ. śaviśeṣatve ca tattvaṁ na syād ity arthaḥ.

[350 b-351 a]

नाऽऽकाशस्य विशेषोऽस्ति कुम्भद्रोण्याद्युपाधिषु ॥ ३५० ॥

दूरान्तिकादिभिन्नेषु कल्पिताकल्पितेष्वपि ।

There is no excellence for ether as regards its adjuncts such as a pot or a valley, different as being distant or near, imaginary or non-imaginary.

That there is no excellence among adjuncts is explained with the help of the ether-analogy. The ether of a pot does not differ from the ether of a valley; for ether is the same, no matter what the adjunct is.

[351 b-352 a]

सत्तत्त्वापेक्षयाऽभेदो भावानां नाभ्युपेयते ॥ ३५१ ॥

स्वभावहानादन्योन्यं विशेषो बाह्य एव सः ।

Non-difference of objects is not admitted as dependent on *the nature of being* (*sat-tattva*), for then, the nature of things would be destroyed. The mutual particularity (of things) is but external.

It cannot be said that the adjuncts, viz., objects, are all non-different because of their nature as being. If that were so, they will cease to be the objects. Nor can they be different from being, for, then, they would be non-being. So what is called particularity or plurality is superimposed on Brahman.

NTV—sattattvād bāhyaḥ kalpita evety arthaḥ nahi kalpitena viśeṣeṇa tattvaṁ saviśeṣaṁ bhavati.

[352 b–353 a]

कार्यकारणपक्षेऽपि कार्यं नान्यत् कारणात् ॥ ३५२ ॥

न च तत्त्वे विशेषोऽस्ति कटकादीव हेमनि ।

Even on the view of cause and effect, the effect is not from what is other than the cause; nor is there any particularity in the real, as bracelet, etc., in gold.

Even admitting that Brahman is the cause and the world is its effect, there could be no absolute difference between the two. Nor is there any evidence to show that the world of plurality makes any difference in or for Brahman. In gold there is no difference such as between a bracelet and a necklace. So also, in Brahman there is no difference. There is no real difference either between the particulars that constitute the world, for they are appearances like the rope-snake.

NTV—vastutas tu kāryaṁ kāraṇaṁ cā 'tmani kalpitam iti na saviśeṣatva-śaṅkāpīty arthaḥ.

NKL—kaṭakādi vartulatvādi viśeṣepi hemarūpasya nirviśeṣatvāt brahmāpi nirviśeṣaṁ ity arthaḥ.

AVS—kāryam-tāvat kāraṇān na bhinnam, bhede ghaṭa-paṭavat kārya-kāraṇatva-hānāt, abhede 'pi tad-hānāt, bhedābhedasya nirastatvāt, kāryam-tāvat kalpitam, tathā kāraṇam api, ato nirviśeṣam brahma.

[353 b-354 a]

अतः प्रजापतौ तत्त्वं कृमौ वा न विशिष्यते ॥ ३५३ ॥

तर्कादागमतश्चापि तद्यो य इति हीदृशात् ।

Therefore, reality is not different in *Prajāpati* or in a worm ; this is established through reasoning and from the Scriptural texts like 'And whoever (among the gods) (knew) it,'¹ etc.

Brahman is distinctionless (*nirviśeṣa*). Distinctions such as between genus and species do not apply to Brahman. Reality does not differ. There can be no excess or diminution for it. It is the same whether in *Prajāpati* or a worm. This truth is known both through logic and Scriptural testimony.

1. *BU*, I, iv, 10. 'And whoever among the gods knew it also became that.'

[354 b-355 a]

यदा सर्वे प्रमुच्यन्ते कामा येऽस्य हृदि श्रिताः ॥ ३५४ ॥

अथ मर्त्योऽमृतो भवत्यत्र ब्रह्म समश्नुते ।

'When are shed all the desires lodged in his heart, then the mortal becomes immortal; he reaches Brahman here'.¹

To show that Brahman is distinctionless, that it is the same in all adjuncts, another Scriptural text is cited.

1. *BU*, IV, iv, 7; *KU*, vi, 14.

[355 b-356 a]

एको देवः सर्वभूतेषु गूढः सर्वव्यापी सर्वभूतान्तरात्मा ॥ ३५५ ॥
कर्माध्यक्षः सर्वभूताधिवासः साक्षी चेता केवलो निर्गुणश्च ।

‘The one God, hidden in all beings, all-pervading, the inner self of all beings, the one who presides over *karma*, the support of all beings, the witness, the sole intelligence, without attributes’.¹

The meaning of this Scriptural text is that Brahman is of one essence, free from all distinctions.

1. *SU*, vi, 11.

[356 b-357 a]

विज्ञानकर्मणोस्त्रेधा यद्युच्येत समुच्चयः ॥ ३५६ ॥
पूर्वोक्तैकात्म्यतात्पर्याद्वेदस्यासौ न युज्यते ।

If it be said that as between knowledge and action three ways of combination are possible, (we reply) it is not proper, for, as pointed out earlier, Veda¹ has for purport the oneness of self.

At this stage, the *samuccaya-vādin* (the combination-theorist) appears and says that the combination of *karma* and knowledge is the means to *mokṣa*. Three ways of combination are possible:

(1) *jñāna* is the principal and *karma* is its subsidiary; (2) *karma* is the principal and *jñāna* is its subsidiary; (3) both are equal.

Now, the *Siddhāntin* asks: What is the *pramāṇa* for combination, in whichever of the three ways it may be? Is it the *karma-kāṇḍa*? or, is it the *jñāna-kāṇḍa*? It cannot be the first, for *karma-kāṇḍa* only teaches that *karmas* are the means to *Svarga*, etc. Nor the second, for the purport of the *jñāna-kāṇḍa* is the one self (*Vide* v. 16.)

1. 'Veda' here means 'Upaniṣad'.

NKL—*jñānaṁ pradhānaṁ karmopasarjanaṁ, karma pradhānaṁ jñānaṁ upasarjanaṁ, dvayoḥ samaprādhānyaṁ ceti traividhyam.*

sākṣāt-pāramparyābhyāṁ kṛtsna-vedasya advaita-paratvād avidyā-darśita-dvaitasya vidyāmātrāpanodyatvāt na trividhopi samuccayaḥ.

[357 b-358 a]

एकवाक्यावशीभावात्साध्यैक्यायोगतस्तथा ॥ ३५७ ॥

समुच्चयः कुतो द्रव्यगुणवज्ज्ञानकर्मणोः ।

Because they do not admit of being included in the same sentence, and because the end is not the same for both, how can there be combination of knowledge and action, as in the case of the material and the auxiliary?

There can be no combination of *karma* and *jñāna* as equals, as there is between the new-moon and full-moon rites (*Darsapūrṇamāsa*). In the example taken from *Pūrvamīmāṃsā*, the question is whether the two texts '*ya evaṁ vidvān paurṇamāsīm yajate*' and '*ya evaṁ vidvān amāvāsyām yajate*' lay down two distinct and independent acts or the same set of rites to be performed at different times, viz. the new-moon and the full-moon. The conclusion is that they refer to the same set of rites called *Darsapūrṇamāsa*. The new-moon rites and the full-moon rites are of equal strength, and together they give rise to the unseen potency which leads to heaven. (See *PM*, II, ii, 3.) The case of *karma* and *jñāna* is not like that. The texts relating to them have no syntactical unity as the texts of new-moon and full-moon rites have.

There is another reason for saying that there is no parity between *karma* and *jñāna*, on the one hand, and the *Darsapūrṇamāsa* rites, on the other. The *Darsapūrṇamāsa* consists of six main sacrifices, the *Āgneya*, etc. Though there are six sacrifices, they are to be regarded as one act, because they are related to the same fruit. As evidence

for this may be cited the text, 'Desiring heaven, one should perform the *Darśapūrṇamāsa* sacrifices'. Heaven is the common fruit of the six sacrifices, even as when it is said 'The well should be dug by the village' we understand that the well is to be the fruit of the collective labour of the villagers. (See *PM*, XI, i, 1.) *Karma* and *jñāna* do not have the same fruit. How could there be combination between them?

A contrary example is now given to show that *karma* and *jñāna* cannot be related as principal and subsidiary. In connection with the *Jyotiṣṭoma* sacrifice, it is laid down 'One purchases *Soma* with a tawny-eyed and one-year-old (cow), which is red' (*aruṇayā piṅgākṣyā ekahāyanyā somam krīṇāti*). In regard to this, the question is: Does the property of redness go with the entire context, qualifying all that is mentioned therein? Or, does it go with the *one-year-old cow* only, and that too in connection with the act of *purchasing*? The answer given by the Mīmāṃsaka is that, as the cow which is the substance and redness which is its property serve the same purpose and have the same function, both of them should be connected with the act of purchasing. In other words, what is enjoined here is the purchase, and this purchase is qualified, not by each of the two factors, substance and property, severally, but by both collectively (*PM*, III, i, 12.). The case of *karma* and *jñāna* is quite different. There cannot be a combination between them, as there should be between the one-year-old cow and redness.

(358 b-359 a)

भेदाभेदाश्रयत्वेन ह्यैकात्म्यज्ञानकर्मणोः ॥ ३५८ ॥

परस्परोपकारित्वहानात्कीदृक्समुच्चयः ।

Knowledge of the one self is dependent on non-difference; and action is dependent on difference; as there is no mutual helpfulness, how can there be combination?

There can be combination only between what are helpful to each other. Such a relation cannot exist between *karma* which is dependent on distinctions such as agency, etc., and self-knowledge which is devoid of all distinctions.

*NTV—kimca kartṛtvādi-bhedāśritam karma, tad-rahitādvayātma-
viṣayaṁ jñānam atas tamaḥ-prakāśavat paraspara-viruddhayor
upakāryopakāra-katvābhāvān na sarvaprakāras-samuccayaḥ.*

(359 b-360 a)

देवताद्रव्ययाथात्म्यज्ञानं कर्माङ्गतां गतम् ॥ ३५९ ॥

तावदेव हि तत्कर्म नाज्ञातद्रव्यदैवतम् ।

The knowledge of the nature of the deity and the material is auxiliary to ritual; with this much, indeed, is it ritual, and not when there is no knowledge of the deity and the material.

It cannot be argued that there can be combination between self-knowledge and *karma* even as there is between the knowledge of deity, etc., and ritual action. For, the knowledge of deity, etc., falls entirely within ritual action, and therefore it requires no combination therewith. There can be no ritual action without the knowledge of deity, etc. Such knowledge is part and parcel of *karma*.

[360 b-361 a]

तद्विशेषेऽङ्गभूयस्त्वात्फलभूयस्त्वमित्यतः ॥ ३६० ॥

समुच्चयो न तस्य स्यान्नाङ्गेनाङ्गिसमुच्चयः ।

When there is that excellence (i.e. knowledge of the deity, etc.) there is an increase in parts and consequently an increase in fruit. Therefore, of that there can be no combination; for there is no combination of the part with the whole.

Knowledge of the true nature of the deity, etc., is a part of *karma*. When that knowledge increases and becomes more adequate, *karma* itself increases and yields more fruit. Knowledge of the deity, etc., is not outside *karma*. A part does not require to be united with the whole.

[361 b-362 a]

यच्चाप्यैकात्म्यविज्ञानं तदज्ञानैक्यस्मरम् ॥ ३६१ ॥

तस्मिन्सति कुतः कर्म का वाऽपेक्षाऽस्य गोचरे ।

That which is called knowledge of the one self is entirely destructive of ignorance (*ajñāna*). When that is present, how can there be action? And in the sphere of this (viz. knowledge), how can there be the expectation of anything?

Here is a syllogism: What is in dispute, viz., self-knowledge, does not combine with *karma*, because it is opposed to *karma*; what is opposed to another does not combine with that other, as light with darkness. The sphere of knowledge is the Brahman-self, viz., *mokṣa*. That does not depend on anything else.

NKL—*ātma-dhīr na karma-samuccitā tan-nivarttakatvāt prāyaścittādivat.*

AVS—*jñāna-karmaṇo' parasparopakārābhāvāt na samuccayaḥ.*

[362 b-363 a]

ब्राह्मणत्वादिविज्ञानमग्निहोतादिकर्मणाम् ॥ ३६२ ॥

यद्दृष्टं साध्यसिद्धयै तु कर्मानुगुणमेव तत् ।

The knowledge of Brahmanhood, etc., which is seen in the case of rites like *Agnihotra*, for the sake of attaining the end, is only in the nature of aiding ritual.

The knowledge of Brahminhood, etc., is certainly helpful to *karma*. But that does not mean that self-knowledge is auxiliary to *karma*.

[363 b-364 a]

ऐकान्त्यवस्तुयाथात्म्यबोधे जात्यादिबाधनात् ॥ ३६३ ॥

न केवलं क्रिया न स्यात्कर्मणां प्रत्युताक्रिया ।

When there is knowledge of the true nature of the one self, caste, etc., get sublated ; and so then, there is not only no performance of ritual but there is no action at all.

With what *karma* is *jñāna* to be combined? (1) Is it with the actions subsequent to the rise of *jñāna*? (2) Or, is it with the fruit of those actions performed in previous births? (3) Or, with those earned in this life prior to the rise of *jñāna*?

Not the first. When there is the knowledge of the true self, ignorance is destroyed along with its effects, viz., place, caste, etc. After the destruction of ignorance, there can be no action.

Nor the second. When through the direct experience of the self ignorance has been destroyed, there can be no *karma* acquired in previous births.

[364 b-365 a]

अयथावस्तुसर्पादिज्ञानं हेतुः पलायने ॥ ३६४ ॥

रज्जुज्ञानेऽहिधीध्वस्तौ कृतमप्यनुशोचति ।

The knowledge of illusory objects like the serpent is the cause of running away, etc. But, when by the knowledge of rope the cognition of serpent is destroyed one repents for one's past actions.

Ignorance is the cause of *karma*, even as mistaking the rope for the snake causes one to run, etc. When the nature of the rope is known, one feels ashamed of one's earlier running, etc. Similarly, when self-knowledge is gained, the illusory character of the earlier actions is realized. So, the third alternative also is not possible.

AVS—*evam jñānād ajñāna-kṣaye karma-kṣayāt, na jñānasya karmā'nugūṇatvam ity arthaḥ.*

[365 b-366 a]

न कर्मव्यापृतिर्मुक्तावाप्त्यादीनामभावतः ॥ ३६५ ॥

न च श्रुत्यादयस्तत्र तेन स्यान्न समुच्चयः ।

There is no empirical usage of action in release, because of the absence of attainment (*āpti*), etc. Nor are Scripture, etc. (the evidence) there (i.e., for combination); therefore, there is no combination.

Scripture does not teach combination of *karma* and *jñāna*. The only combination—if it may be called combination—is one of sequence (*krama-samuccaya*) between the two. That is, *jñāna* succeeds *karma*.

NTV—*paripakva-jñānasya acodya-svarūpatvāt vidyamānāyāḥ snānādi - pravṛtteḥ saṁskāra - nibandhanatvāt dvaita - pratyayavat, tasmād aikātmya-vastu-bodho jātyādi-bādhanaṭ, akartābhoktā-nubhūtyaikaraso-'dvaya ātmāvatiṣṭhate. mokṣasya karma-sādhya-tvābhāvāc ca ātma-jñānam na karmāṅgatayā samuccīyate.*

NKL—*evam jñāna-svarūpa-paryālocanayā samuccayaṁ nirasya, pramāṇa-prayojanayor abhāvenāpi nirācaṣṭe.*

AVS—*śrutyādaya iti śruti-liṅgādi-grahaṇam veda-smṛtyādi-grahaṇam vā.*

[366 b-367 a]

अन्तरङ्गं हि विज्ञानं प्रत्यङ्गात्रैकसंश्रयात् ॥ ३६६ ॥

बहिरङ्गं तु कर्म स्याद्बाह्यद्रव्याश्रयत्वतः ।

Knowledge is the internal means (*antaraṅga*) because it relates to the inner self alone; action, however, is an external means (*bahiraṅga*), because it depends on external materials.

Jñāna is the internal means to *mokṣa*, while *karma* is the external means. As between the internal and external means, the internal is stronger. And, there can be no combination between the strong and the weak.

NTV—*sattva-suddhiḥ karma-phalaṁ, jñāna-phalam-ajñāna-nivṛttiḥ.*

NKL—*antaraṅgasya bahiraṅgāt prabalaṭvāt, prabalena durbalasya bādho yukta ity arthaḥ.*

[367 b-368 a]

सत्यन्तरङ्गे विज्ञाने बहिरङ्गं न सिध्यति ॥ ३६७ ॥

संस्कारकं तु कर्म स्याज्ज्ञानात्त्वज्ञाननिह्नुतिः ।

When there is knowledge, the internal means, there cannot be the external means. Ritual can be the purifier (*samskāra*). By knowledge, however, there is removal of ignorance.

When the internal means, viz., *jñāna*, is present, the external means, viz., *karma*, cannot stand. When *jñāna* is there, ignorance is not there; and when ignorance is not there, *karma* cannot be. *Karma* can only purify the mind. *Jñāna* destroys ignorance.

NKL—pratyak - prāvaṇya-kāraṇā-'ntaḥkaraṇa - suddhiḥ karma-phalam.

AVS—sādhyā-bhedāc ca jñāna-karmaṇor na samuccayaḥ...suddhiḥ karma-phalam ajñāna-nivṛttiḥ jñāna-phalam ity arthaḥ.

[368 b-369 a]

यथावस्त्वात्मविज्ञानं मोहमात्राश्रयाः क्रियाः ॥ ३६८ ॥

सम्यग्ज्ञाने कुतः कर्म कर्महेतूपमर्दनात् ।

Knowledge of the self is (knowledge of) reality ; rituals rest on delusion alone. When there is true knowledge, how can there be action, since the cause of action (delusion) has been destroyed ?

Karma cannot remove ignorance ; for it depends on ignorance. When *jñāna* removes ignorance, it removes *karma* as well.

NKL—brahma-jñānaṁ na karma-nivarttakam jñānatvāt jñānānta-ravad ity atrāha—yatheti—brahmajñānam adhyasta-nivarttakam tattvadhītvāt sūkti-tattva-jñānavad iti satpratipakṣam āha.

[369 b-370 a]

नित्यप्राप्तं च विज्ञानं प्रतीचः संनिधेः सदा ॥ ३६९ ॥

कर्मानित्यं पृथग्रूपं नित्यं चानित्यबाधकम् ।

Knowledge is eternally attained, since it is ever of the nature of the inner self. Action is non-eternal and varied. And, what is eternal is sublativ of the non-eternal.

There is no parity between *jñāna* and *karma*. *Jñāna* is the self, of the nature of intelligence-light, and is eternal. *Karma* is non-eternal, because it is dependent on a plurality of causal agents, and because it is itself plural. Thus the two have divergent natures; and so, there can be no combination between them.

NTV—ātma-jñānasya nitya-prāptatvāt karmaṇas tad abhāvāt anityatvāt, nityena anitya-bādhopapattes ca na samuccayah.

NKL—jñānaṁ na karma-hetu-nivarttakam kāryatvād ghaṭavad ity āsaṅkya hetvasiddhim āha—nityeti.

AVS—ātma-jñānasya nitya - prāptatvāt karmaṇas tad-abhāvāt nityena anitya-bādhopapattes ca na samuccayah.

[370 b-371 a]

क्षयी कर्मार्जितो लोकः स्वराड्ब्रह्मावबोधतः ॥ ३७० ॥

लब्धे त्रैलोक्यराज्ये ना भिक्षामाद्रियते तु कः ।

The enjoyment (*loka*) earned by action perishes; by Brahman-knowledge one becomes the lord of oneself (*svarāt*). Who would hug beggary, when there is rulership of the three worlds at hand?

It is not possible to combine *jñāna* with *karma*, because the results of the two are different, even as it is not possible to combine the *Citrā* rite with the *Darsapūrṇamāsa* for the same reason.

NTV—jñāna-phalaṁ svārājyam iti jñāninaḥ karma-phale prepsābhāvāc ca na samuccayah...yat sādhyam tat kṣayīti vyāpti-niyamāt.

AVS—karmaphalasya anityatvāt jñānaphalasya nityatvāc ca na samuccayah.

[371 b-372 a]

भिन्नप्रकरणं ज्ञानं काङ्क्षितं न च कर्मणा ॥ ३७१ ॥

विरोधान्च स्वतन्त्रं तद्गुणभूतं न कस्यचित् ।

Knowledge belongs to a different context ; nor is it needed by action. Because of opposition, that (*viz.* knowledge) which is independent is not an auxiliary of anything.

Jñāna and *karma* belong to different contexts. *Karma* does not require *jñāna*. They are not related as helper and helped. They have contrary natures. So, there can be no combination. *Jñāna* is independent, and, therefore, is not an auxiliary of *karma*.

[372 b-373 a]

यतो वस्त्वनुरोधेतन्न ज्ञातृवशवर्त्यतः ॥ ३७२ ॥

अज्ञानोच्छित्तये ज्ञानं स्वतन्त्रं तेन भण्यते ।

As it (*viz.* knowledge) is dependent on reality, it is not dependent on the knower. Knowledge is for the purpose of removing ignorance; therefore it is said to be independent.

Why is *jñāna* said to be independent? It is not dependent on the knower, as *karma* is dependent on the doer. *Jñāna*, it is true, is dependent on the real (*vastu*). Yet, it is independent in so far as it yields its fruit without depending on any other means.

NTV—brahma-jñānam svatantram, na karmāpekṣam.

[373 b-374 a]

अनावृत्तिश्च कर्मभ्यो न कचिच्छ्रूयते स्फुटम् ॥ ३७३ ॥

ज्ञानादेव त्वनावृत्तिः श्रूयते बहुशः श्रुतौ ।

Nowhere is it clearly stated in Scripture that by ritual one attains the state of non-return (*i.e.*, release); many Scriptural texts, however, declare that by knowledge alone there is non-return.

There is no combination of *jñāna* as the principal with *karma* as the subsidiary ; for, *jñāna* which is the means to release does not require the assistance of *karmas* which are not the means thereto. It is nowhere declared that through *karmas* one could reach the status of non-return. Scripture teaches repeatedly that *jñāna* is the path to perfection.

[374 b-375 a]

एकरूपं च विज्ञानमेकरूपात्ममेयतः ॥ ३७४ ॥

भिन्नरूपाणि कर्माणि बहुकारकसंश्रयात् ।

Knowledge is uniform because its content is the self which is of one-form ; actions are multiform, because they depend on many causal correlates.

There can be no combination of *jñāna* and *karma* as equals. The two are different : *jñāna* is uniform, whereas *karma* is multiform.

NTV—*jñāna-karmaṇor ekāneka-rūpatayā mokṣa-sādhanatve virodhāc ca na karma itikartavyatva-lakṣaṇas samuccayaḥ.*

[375 b-376 a]

एकरूपस्य मोक्षस्य भिन्नरूपं न साधनम् ॥ ३७५ ॥

एकरूपस्य मोक्षस्य होकरूपं हि साधनम् ।

For release which is uniform, what is multiform cannot be the means ; for release which is uniform, what is uniform is, indeed, the means.

As is the end, so should be the means. For release which is one, *jñāna* should be the means, and not *karma*.

AVS—*mokṣasyaikarūpatvāt jñānasyāpi tad-viśayatvena ekarūpatvāt, karmaṇo 'neka-kāraṇakāśritatvena anekātmakatvāt taj-jñānasyāpi tathātvāt, ekarūpasya mokṣasya ekarūpam eva jñānaṁ sādhanam ucitam, netarat.*

[376 b-377 a]

तस्मात्कर्मफलं नाना नानाकर्मसमुद्भवम् ॥ ३७६ ॥

देवमानुषतिर्यक्षु कर्तुः शास्त्रैर्निदर्शितम् ।

Therefore, the fruit of action is varied, being produced by various deeds ; (this is) for the agent in the forms of gods, men and animals. This has been shown by the Scriptures.

The fruits of *karma* are many. It is these fruits that constitute *samsāra*. And, they are enjoyed by the different kinds of beings.

[377 b-378 a]

अन्ये तु मन्वते केचिद्भ्रम्भीरन्यायवादिनः ॥ ३७७ ॥

भेदस्य विलयो वेदे गम्यते कस्यचित्कचित् ।

Some others who argue bravely, however, think that the resolution of some difference (*bheda*) or other is taught somewhere in the Veda.

Here, attention is turned to the view known as *prapañcavilaya-vāda*. According to it, *karma* is auxiliary to *jñāna* through effecting the resolution of the world.

[378 b-379 a]

देहात्मभावविलयः स्वर्गकामपदे यथा ॥ ३७८ ॥

देहाद्भिन्नोऽधिकार्यत्वं स्वर्गभोग्यवगम्यते ।

For example, in (the text containing) the expression 'desire for heaven', there is seen the resolution of the notion that the body is the self ; for, the eligible person

who is different from the body is known here as the enjoyer in heaven.

The *prapañcavilaya-vādin* argues as follows : The text 'He who desires heaven should sacrifice' conveys the resolution of the idea that the physical body is the self, for it is not this body that is to enjoy heaven.

[379 b-380 a]

गोदोहनेनेत्यत्रापि विलयोऽन्याधिकारिणः ॥ ३७९ ॥

अधिकृताधिकारित्वान्नान्योऽधिक्रियते यतः ।

Even in the text 'with the milk pail' there is seen resolution for one who is eligible in respect of another rite ; for here there is eligibility for one who is already eligible (*adhikṛta-adhikāritva*); no one else is eligible here.

The text about 'the milk pail' also teaches resolution—resolution of independent eligibility for the act indicated by this text in the eligibility for the *Darśapūrṇamāsa*.

In connection with the *Darśapūrṇamāsa* there is the text 'With the *camasa* (cup) he is to sprinkle the water'. Here sprinkling is enjoined. There is a further text which says, 'With the milk pail for him who desires cattle'.* This, evidently, does not enjoin any principal rite. In the case of one who is already eligible for the *Darśapūrṇamāsa*, for its own fruit, here there is the injunction, incidentally, of another subsidiary for a further fruit.

[380 b-381 a]

रागाद्युत्थप्रवृत्तीनां निषेधेषु लयोऽञ्जसा ॥ ३८० ॥

विधिष्वपि लयस्तासां कार्यान्तरनियोगतः ।

In prohibitions, there is the resolution, in no time, of activities roused by attachment, etc.; even in injunctions there is their resolution because of the prompting in respect of other activities.

The prohibition texts too have resolution for their purport—the resolution of activities prompted by attachment, etc. So do the texts enjoining obligatory and occasioned rites. Here also, there is the resolution of natural and instinctive acts.

[381 b-382 a]

लोकेऽपि चानभिप्रेतात्पथः साक्षान्निवारणम् ॥ ३८१ ॥

मार्गान्तरोपदेशाद्वा वेदेऽप्येवं प्रतीयताम् ।

Even in the world, a path that is not intended is prohibited either directly or by teaching another path ; similarly let it be understood as regards the Veda.

The prohibitions and injunctions of the Veda are similar to those that belong to empirical usage. The latter too involve resolution—preventing the performance of an act, or changing the course of action.

[382 b-383 a]

एवं रागादिहेतूत्थप्रवृत्तिलयवर्त्मना ॥ ३८२ ॥

आत्मज्ञानाधिकारार्था निःशेषा विधयः स्थिताः ।

Thus all injunctions without exception are for making one eligible for self-knowledge, through the resolution of actions roused by attachment, etc.

Thus, concludes the *prapañcavilaya-vādin*, all the texts of the *karma-kāṇḍa* make one fit for *jñāna* through the resolution of the world.

[383 b-384 a]

नैतदेवं यतोऽशेषा न कर्मविधयः श्रुतौ ॥ ३८३ ॥

स्ववाक्यावगतात्कार्यादपेक्षन्ते फलान्तरम् ।

This is not so ; for no injunctions of the Scripture relating to ritual are expectant of a fruit other than the *kārya* which is made known by the texts of the injunctions themselves.

The *siddhāntin* replies : For whom do the injunctive texts declare the resolution of the world ? Is it (1) for the one who seeks release, or (2) for the one who desires heaven, or (3) for the one who wishes for only the absence of the world, or (4) for the one who wants to know the content of *jñāna-niyoga* ?

(1) The injunctions of rites that are to be found in the Veda declare *Svarga* as the fruit. They, therefore, cannot be related to *mokṣa* which is quite a different fruit. To say that the ritual texts teach the resolution of the world for the sake of him who seeks release carries no sense at all.

[384 b-385 a]

वेदेऽनुष्ठानतात्पर्यान्न लयो गम्यते कचित् ॥ ३८४ ॥

फलश्रुतेरभावो हि साध्यः स्यादफलः कथम् ।

As, in the Veda, the performance is the purport, resolution is nowhere taught ; for, a fruit is declared in Scripture (for each rite). How, indeed, can non-existence which is no fruit be what is to be accomplished ?

(2) For him who desires heaven, the Veda does not teach the resolution of the world, for such resolution is not the means to heaven. What the Veda teaches in his case is the performance of rites.

(3) No one can desire a non-existence. The non-existence of the world is not what is to be accomplished, because it is a non-existence, like tortoise-hair. Also it cannot serve as a human goal, even as the non-existence of son, etc., is not a human goal.

[385 b-386 a]

वस्तुनोऽवगतिर्नापि लयाद्भवति कुत्रचित् ॥ ३८५ ॥

अभावेऽप्युपपन्नत्वात्सुषुप्ते चाप्यनीक्षणात् ।

Nor is the perception of the real brought about anywhere by resolution; for even where there is absence (of resolution) there is perception, and in deep sleep (where there is resolution) there is no perception (of the real).

(4) The content of *jñāna-niyoga* is *jñāna* as the means to release. But the non-existence of the world is not what causes *jñāna*. Through resolution, the real is never known. Even when the world is seen to exist, it is possible to know the real. Just as, even while two moons appear, one may know that there is only one moon through the words of a trustworthy person, etc., so also even while the body lasts one may realize Brahman through the study of Scripture, etc. The resolution of the world does not necessarily mean the realization of truth. In sleep, swoon, etc., there is no world, but there is no Brahman-knowledge either.

[386 b-387 a]

स्वाभाविकः प्रपञ्चश्चेत्स निरोद्धुं न शक्यते ॥ ३८६ ॥

कार्यश्चेत्कारणोच्छेदे कार्योच्छेदः स्वतो न हि ।

If the universe is natural (*svābhāvika*), it is not possible to remove it; if it is an effect, there would be removal of the effect when there is removal of the cause, and not of itself.

Whether the world be beginningless or with a beginning, its resolution cannot be the content of *jñāna-niyoga*. If it is beginningless like the self, it cannot be removed at all. If it is a product, then it will be destroyed only when its cause is destroyed. The cause of the world is ignorance; and that can be removed only by knowledge. So, it is not right to say that the resolution of the world leads to knowledge.

NTV—nahi svabhāvo bhāvānām vyāvartyeta auṣṇyavad raveḥ, svabhāvād vinivṛttortho niḥsvabhāvaḥ, kha-puṣpavad iti hy uktam, nityasya layābhyupagame ātmanopi laya-prasaṅga iti bhāvaḥ.

[387 b-388 a]

कृत्स्नप्रपञ्चविलयः कर्तुं शक्यो न केनचित् ॥ ३८७ ॥

स्वेन्द्रियादिलयः स्वापे स्वत एव न शास्त्रतः ।

It is not possible for anyone to resolve the entire universe by anything (except knowledge); the resolution of one's own sense-organs, etc., in sleep is of their own accord, and not from the sacred teaching.

Is the destruction of the entire universe along with its cause said to be the content of *jñāna-niyoga*, or only of a part thereof? The entire universe with its cause cannot be destroyed except by self-knowledge. If the destruction of a part of the universe be the content, what is this part? Is it any part of the universe, or that belonging to the individual such as sense-organ, etc.? If the destruction of any part would do, there is the contingency of the rise

of knowledge in one who has destroyed a part. As for the resolution of sense organ, etc., that happens automatically in sleep, etc., and there is no need for *niyoga*.

[388 b-389 a]

उत्थितस्य पुनर्भावादनुच्छेदोऽथ शङ्क्यते ॥ ३८८ ॥
आयातस्तर्ह्यनाश्वासस्त्वदभ्युपगतावपि ।

If it be doubted that there is no absolute resolution (of the sense-organs in sleep) as they come into being again when one wakes up, then there would result lack of trust even in what you maintain.

It may be thought that, as in sleep sense-organ, etc., are not altogether destroyed, there is need for *niyoga* to bring about their destruction. But what guarantee is there that in the resolution taught by the *prapañcavilayavādin* sense-organ, etc., are completely destroyed? For aught we know, they may remain there in an unmanifest form.

NTV—pravilīnasya punar-bhāvād anucchedaścet, niyogataḥ pravilīnasyāpi punar-udbhava-sambhavāt tatra prayāso vyarthah.

[389 b-390 a]

प्रपञ्चनाशनेनाथ नाशयते भेदकारणम् ॥ ३८९ ॥
नैवं न कार्यनाशेन कारणं नश्यति क्वचित् ।

“Then, by the destruction of the universe the cause of difference is destroyed.” Not thus; nowhere is the cause destroyed by the destruction of the effect.

It may be said that in sleep the cause of sense-organ, etc., is not destroyed, and that as the cause persists, sense-organ, etc., reappear on waking. But we ask: What is it that removes this cause? Surely,

it cannot be the destruction of the universe. The universe is only an effect. With the destruction of the effect, the cause is not necessarily destroyed.

AVS—na hi kuṇḍala-vilayāt prayatna-sādhyaḥ api suvarṇalayaḥ, tathā prapañcalayāt prayatna-sādhyaḥ na tat-kāraṇa-laya iti.

[390 b-391 a]

कारणस्याप्यविद्याया वस्तुबोधाद्विनाशतः ॥ ३९० ॥

यतोऽतोऽविद्यानाशार्थं प्रपञ्चविलयोऽफलः ।

As nescience which is the cause is destroyed by the knowledge of reality, resolution of the universe is useless for the sake of destroying nescience.

For the destruction of the cause, viz., nescience, what is required is the knowledge of truth ; therefore, the resolution of the universe is useless.

[391 b-392 a]

रज्जुज्ञानाद्धि सर्पादिप्रपञ्चविलयो यतः ॥ ३९१ ॥

सर्पाभासलयेऽपीयं रज्जुस्तमसि नेक्ष्यते ।

It is by the knowledge of rope that there is resolution of the appearance of serpent, etc., for even when the snake-appearance is resolved in darkness the rope is not seen.

What was stated above is here explained with the help of the rope-snake illustration.

[392 b-393 a]

लयनिष्ठे प्रमाणे नो वस्तुगोचरभेदतः ॥ ३९२ ॥

अथ वस्तुनि तन्मानं न लये स्यान्न च द्वये ।

If the evidence (of Scripture) be in regard to resolution, then reality cannot be its sphere, because of difference ; if, then, it be evidence for reality, it cannot be (evidence) for resolution ; nor for both.

What does Scripture teach—is it the resolution of the universe, or the nature of reality, or both ? If Scripture teaches the resolution, reality cannot be its purport. Nor can both be its purport, for, then, there would be sentence-split.

[393 b-394 a]

भाव्युच्छेत्तुमशक्यस्ते भूतोऽप्युपरतः स्वतः ॥ ३९३ ॥
प्रपञ्चो वर्तमानस्तु कार्यत्वान्नश्यति स्वतः ।

For you, of what is yet to be (*bhāvī*) destruction is not possible ; nor of what is past, for it has ceased to be of its own accord ; and the universe that is present, because it is an effect, will by itself cease to be.

Moreover, which universe is it that is sought to be resolved—the future, the past, or the present ? The past universe has ceased to be ; the future universe is not yet ; the present, because it is an effect, will disappear of its own accord. Hence there is no need for a *niyoga* to bring about the resolution of the world.

[394 b-395 a]

श्रुतेर्विलयतात्पर्ये फलमाकस्मिकं भवेत् ॥ ३९४ ॥
फलार्था चेष्टये न स्यान्नोभयं वाक्यभेदतः ।

If Scripture has resolution for purport, the fruit will become accidental ; if it has the fruit for purport, it cannot have resolution (for purport); nor both, because of sentence-split.

It may be contended that the ritual texts have the resolution of the world as their purport. But, if that were so, the attainment of heaven, etc., which is declared to be the human goal would become accidental. If the ritual texts teach the relation between heaven, etc., and sacrifice, etc., as ends and means, the resolution of the world cannot be their purport. The ritual texts cannot have both as their purport, for, then, there would be sentence-split.

[395 b-396 a]

प्रपञ्चविलयेनैव सर्वानर्थप्रहाणतः ॥ ३९५ ॥

पुरुषार्थस्य संसिद्धेर्विद्या नैष्फल्यमाप्तेत् ।

If by the resolution of the universe itself, there be the destruction of all evil, then, as the human goal has been accomplished, there would be futility for knowledge.

If the ritual texts have the resolution of the world for purport, and if by this the human goal is reached, where is the need for knowledge?

[396 b-397 a]

अत ऐकात्म्ययाथात्म्यज्ञानादज्ञानहानतः ॥ ३९६ ॥

सिद्धे पुमर्थे विलयकल्पना निष्प्रयोजना ।

Therefore, since by the true knowledge of the one self ignorance is destroyed, and thereby the human goal is accomplished, the postulation of resolution is useless.

It is by knowledge that ignorance is destroyed. With the destruction of ignorance, all evil is removed. Therefore, there is not required the resolution of the world.

[397 b-398 a]

स्वकार्योपक्षयादेव विधीनां च परस्परम् ॥ ३९७ ॥

कुत एकाधिकारत्वमपेक्षाभावतो वद ।

As injunctions are exhausted with their own (respective) *kāryas*, and as there is no mutual expectancy, say, how can there be singleness of eligibility ?

The eligibility for the *karma*- and *jñāna-kāṇḍas* cannot be the same. It is only in the case of what are related as principal and subsidiary that the same person is eligible for both. *Karma* and knowledge are not so related. Each of these results in its own fruit ; therefore, the eligibility for each is different.

NKL—karma - kāṇḍasya jñāna-kāṇḍavat svaphalopakṣiṇatvāt parasparānapekṣatvān na karma-vidhīnām jñāna-niyoga-śeṣatvam.

[398 b-399]

विधीनां चापि सर्वेषां निषेधवचसां तथा ॥ ३९८ ॥

नामादिलयनिष्ठत्वे ह्यभ्युपेतेऽप्रमाणके ।

अनिमित्तोऽपवर्गोऽपि शास्त्रं चैवमनर्थकम् ॥ ३९९ ॥

If it be admitted that all injunctions and prohibitions too have for purport the resolution of name, etc., which is not authorized (by the Scriptural texts), then release would be accidental and the sacred teaching would be futile.

If injunctions and prohibitions have for purport the resolution of the world, there would be no *śravaṇa*, etc., which are known as the means to *mokṣa*. Then, *mokṣa* too, like heaven, etc., would become accidental. And, Scripture would lose its value.

[400-403 a]

स्वर्गादिकार्यमार्गेण मन्यसे यदि कर्मणाम् ।

सोपानपाङ्क्तिगत्येव हर्म्यपृष्ठाधिरोहणम् ॥ ४०० ॥

आत्मज्ञानाधिकारानुप्रवेशित्वं भविष्यति ।

यथैव नगराध्वस्थग्रामगत्युपदेशनम् ॥ ४०१ ॥

नगराध्वोपदेशस्य शेषत्वं प्रतिपद्यते ।

नाकामितत्वाद्ग्रामादिगतेर्युक्तैव शेषता ॥ ४०२ ॥

स्वर्गादेर्न तु शेषत्वं पुरुषार्थत्वहेतुतः ।

If you should think thus : “Just as one climbs to the terrace of a house by a flight of stairs, so the ritual acts serve to introduce one into eligibility for self-knowledge through the instrumentality of *kāryas* like heaven, etc., even as the direction for going to a village which is on the way to a town becomes auxiliary to the direction for going to the town ;” it is not so, because as going to the village is not what is desired, it can well be ancillary ; heaven, etc., however, cannot be ancillary, since they are human goals.

Pūrvapakṣa—The two *kāṇḍas* have the same fruit which is release ; and heaven, etc., are not accidental results, as they constitute the channel to release. Heaven, etc., may be compared to the rungs of a ladder leading to the terrace, or to a village that is on the way to a town. So, one has to pass through heaven, etc., in order to attain *mokṣa*. The present argument may be expressed in the following syllogistic form : What are in dispute, viz. heaven, etc., are

auxiliaries to *jñāna-niyoga*, because they are taught for the sake of him who seeks knowledge; what is taught for the sake of a seeker is auxiliary to what he seeks; just as the teaching about going to a village with reference to a person who wants to go to a town is auxiliary to going to that town.

Siddhānta—The reasoning is fallacious. In the instances cited as examples, there is no particular fruit attached to the rungs of the ladder or to the wayside village. So, they may well serve as auxiliaries to go up to the terrace and to reach the town, respectively. Not so are heaven, etc. These are desired as ends-in-themselves.

AVS—*grāma-gamanopadeśeṣu puruṣārthasyāśravaṇāt phalavan nagara-gamanopadeśa-śeṣatvaṁ ghaṭata eva, svargādeḥ phalasya śravaṇān nānya-śeṣatvaṁ karma-vidhīnām iti.*

[403 b-405 a]

अथोपच्छन्दनार्थानि स्वर्गादीनि विमुक्तये ॥ ४०३ ॥

नगरास्तौ तदध्वस्थग्रामादिगुणगीरिव ।

नैवं मान्तरतः सिद्धेर्नृवाक्ये तत्समञ्जसम् ॥ ४०४ ॥

वेदे तु वक्त्रभावत्वादभिप्रायाद्यसंभवः ।

“Heaven, etc., are inducements to release, even as extolling the excellences of the village, etc., that are on the way is for reaching the town.” If thus it be said, not so; for, as there are other evidences possible in the case of a man’s statement, that is all right (i.e., praising the excellence of the village, etc., may be determined to be ancillary by other means of valid knowledge); but as regards the Veda, there is no speaker, and so it is not possible to determine the intention, etc.

Pūrvapakṣa—Heaven, etc., are not intrinsic ends. They are praised only in order to inspire those who have no longing for release. In other words, they are offered as baits to entice the worldly people away from their empirical attachments. This is just like extolling the wayside village. A boy that refuses to move may be induced to move by telling him that there are food, etc., available in plenty in that particular village. The objective, however, is to lead the boy to the town.

Siddhānta—How is the auxiliariness of ritual-commands to *jñāna-niyoga* known? Is it known by some other *pramāṇa*? Or, by verbal testimony? In the example, it is possible to determine the true intention of the person who extols the village through means other than his words. But, in the case of the Veda, such a procedure is not possible. The Veda is not a human composition; and there is no question of determining the intention through means other than the words of the Veda.

[405 b-406 a]

यद्वा तत्रैव तात्पर्यं यतोपच्छन्द्य नीयते ॥ ४०५ ॥

नगराप्तौ तु माभावात्प्रयतेत पुमान्कुतः ।

Or, if that itself were the purport (i.e. going to the village) where one is led to by persuasion, then since there is no evidence as regards reaching the town, how could a man strive for it?

If the words alone constitute the *pramāṇa*, then, in the example, going to the village will have to be declared as the end, and not going to the town. The boy who hears the praise of the village will regard the village as his destination, and not the town. Similarly, from the texts of the Veda, it cannot be determined that the injunctions of ritual are for the sake of eligibility for *jñāna*.

[406 b-407 a]

यदाऽपि वस्तुवृत्तेन नगरावाप्तिसाधनम् ॥ ४०६ ॥

ग्रामाप्तिर्नगरप्राप्तिस्तदाऽप्यर्थान्न मानतः ।

Even if, by the nature of things, reaching the village is the means for reaching the town, reaching the town (by that means) is by implication (*arthāt*) and not by a means of valid knowledge (*mānatah*).

In the example, going to the village is ascertained to be auxiliary to reaching the town, not from the express words which are only in praise of the village, but by implication. In the case of the ritual-commands, however, these are said to be auxiliary to *jñāna-niyoga* on the strength of testimony. Hence, there is disparity between the illustration and the illustrated.

[407 b-408 a]

अर्थादपि न तात्पर्यं द्रव्यार्जनविधेरिव ॥ ४०७ ॥

शब्दमात्रानुसारेण वेदे तात्पर्यधीर्यतः ।

Even by implication it is not the purport, as in the case of the injunction to gather money ; for the cognition of purport as regards the Veda must follow the simple words.

Even by implication, the injunctions and prohibitions do not have *jñāna-niyoga* as their purport ; for they are not unintelligible without postulating the latter. An example is given to show that *karma-kāṇḍa* is not for the sake of *jñāna-niyoga*. In the *Pūrvamīmāṃsā-sūtra* (IV, i, 2) distinction is made between what is a human end (*puruṣārtha*) and what is for the sake of a sacrifice (*kratvartha*). *Puruṣārtha* is that upon which follows man's happiness:

whereas *kratvartha* is that which is required for the performance of a sacrifice and is to be learnt from Scriptural injunction alone. Now, there is a text relating to the acquisition of property which says: 'For the *brāhmaṇa*, by means of receiving gifts; for the *kṣatriya*, by means of conquest, etc.; and for the *vaiśya*, by means of agriculture, etc.' The question with regard to this text is whether the acquisition of property is a *puruṣārtha* or *kratvartha*. The answer is that the acquisition of property is for the purpose of bringing about happiness which is the human end. It is not necessary, therefore, to include this acquisition in the injunction of the performance of the sacrifice. Similarly, *karma-kāṇḍa* has its own end. Why, then, should it be regarded as auxiliary to *jñāna-niyoga*?

[408 b-409 a]

स्वर्गादौ यदि तात्पर्यं न स्यादैकात्म्यबोधने ॥ ४०८ ॥

मुक्तौ चेन्न भवेत्स्वर्गे वाक्यभेदान्न च द्वये ।

If the purport be in respect of heaven, etc., it cannot be in respect of the knowledge of the one self; if (the purport be) as regards release, it cannot be as regards heaven; nor can it be in regard to both because of sentence-split.

Moreover, if *karma-kāṇḍa* be auxiliary to *jñāna-niyoga*, it must be stated whether the purport of *karma-kāṇḍa* is heaven, etc., or release, or both. If the purport be the first, the *kāṇḍa* cannot be auxiliary to *jñāna-niyoga*. If the purport be release, then there is contradiction with the cognition that *karma-kāṇḍa* is related to what is unknown, viz., heaven. The third alternative is impossible because if both heaven and release be the purport there would be sentence-split.

न च स्वर्गादिकार्याणां प्रयाजार्यसमानता ॥ ४०९ ॥

अनुप्रवेशः कल्प्येत येन कार्यान्तरं प्रति ।

What are to be accomplished, like heaven, etc., are not similar to the fore-sacrifices (*prayājas*) in which case they may be assumed to be included in some other thing to be accomplished.

Karma-kāṇḍa cannot be treated as an *arthavāda*, because we hear in it of fruit like heaven. Heaven, etc., cannot be compared to the fore-sacrifices, because they are ends-in-themselves.

NTV—*prayājādiṣu varma vā etad yajñasya kriyate ity-ādi śrūyamāṇārthavādika-phalavan na svargādi-phalaṁ, prayājādivad agniṣṭomādīnām ātma-jñānāṅgatvasya adyāpy aprasiddheḥ ity arthaḥ.*

वक्तव्यं च कथं त्वेते दृष्टेनैवोपकारिणः ॥ ४१० ॥

आत्मज्ञानाधिकारस्य यदि तावदिदं मतम् ।

रागाद्याक्षिप्तदृष्टार्थप्रवृत्तिप्रतिषेधतः ॥ ४११ ॥

अस्त्वेवं प्रतिषेधेषु निवृत्तेरुपकारतः ।

“Somehow, these (injunctions and prohibitions) must be stated (to be auxiliary to *jñāna-niyoga*) because they are seen to be helpful to eligibility for self-knowledge.” If this be your view, let this be so in the case of prohibitions, for they help turning away (*nivṛtti*) by banning activity towards seen objects brought about by attachment, etc.

If it be said that injunctions and prohibitions are helpful to *jñāna-niyoga* in so far as they make one turn away from too much activity, the *siddhāntin* replies that such is the case only with regard to prohibition.

[412 b-413 a]

विधयस्तु कथं रागं निरुन्धन्तीति भण्यताम् ॥ ४१२ ॥

न हि ते परिसंख्यार्था नापि चैते नियामकाः ।

But how is it possible to say that injunctions destroy attachment? They are not for the sake of exclusion (*parisaṅkhyā*); nor are they restrainers (*niyāmakāḥ*).

How can injunctions serve to remove attachment and thus make one turn away from activity?

There are three types of injunction—the injunction of the novel (*apūrva-vidhi*), the restrictively complementary injunction (*niyama-vidhi*), and the exclusive injunction (*parisaṅkhyā-vidhi*).

(1) *Apūrva-vidhi* is that injunction whose fruit is the establishment of what is not established in any other way; e.g. “He sprinkles the paddy-grains.” Here, what is enjoined is the purificatory act of sprinkling the paddy-grains. This is not established by any other evidence, the injunction being the only authority. (2) *Niyama-vidhi* is that injunction whose fruit is the complementation of the unestablished element, in respect of what is established in part; e.g. “He pounds the paddy-grains.” Here, even in the absence of injunction, pounding of the paddy-grains would result in order to get the rice which is the basic material of the sacrificial cake (*puroḍāśa*). But the pounding is established only in part, for there are other means of producing the rice such as husking with the nails. And so, the purpose of the injunction is to restrict the means to producing the rice by pounding. (3) *Parisaṅkhyā-vidhi* is that injunction which excludes one of two alternatives

that are simultaneously established or are available. For example, in the *Agnicayana* two acts are to be observed, viz. taking hold of the reins of a horse and taking hold of the reins of a donkey. Here there is an injunction which says, 'He takes hold of the reins of the horse with the words "they seized the bridle of the right"'. Since there are two animals connected with this sacrifice, the words "they seized," etc., may refer to the act of holding the reins of either a horse or a donkey. The purpose of the injunction is to exclude the possibility of taking hold of the reins of a donkey.

If the *karma-kāṇḍa* is held to be helpful to *jñāna-niyoga* by removing attachment, etc., it must be of the nature either of *parisaṅkhyā-vidhi* or of *niyama-vidhi*. But neither can be the case. There are no alternatives here, nor establishment in part.

[413 b-414 a]

अत्यन्ताप्राप्तमर्थं हि विधयो बोधयन्ति नः ॥ ४१३ ॥
प्राप्तार्थो यो विधिः सोऽन्यनिवृत्तिफल इष्यते ।

Injunctions, indeed, teach us what is not absolutely accomplished (otherwise). That injunction which relates to an accomplished object is in effect for excluding something else.

The main purpose of *karma-kāṇḍa* is to enjoin what is novel. It teaches what is not established by any other means. Restriction and exclusion are possible only in the case of what have been already established either in part or as alternatives.

[414 b-415 a]

सेवासांग्रहणीहावत्तुल्यकार्यतया न च ॥ ४१४ ॥
यतोऽनियतकालीनफला वैधी क्रियेय्यते ।

Nor is there similarity of being accomplished as for service (of the king) and the *Sāṅgrahaṇī* rite (in the matter of acquiring a village); for the activity consequent on Vedic injunction does not yield its fruit in a fixed time.

It may be contended that, even though the injunctions of ritual have what is novel as their content, they make one turn away from something else. For example, service to a king and the *Sāṅgrahaṇī* rite have the same fruit which is acquiring possession of a desired village; the adoption of one of these means, by implication, makes one not seek the other means. Similarly, activity that is prompted by attachment, etc., and the empirical usage prompted by Scripture result in transmigration; in the case of one who has recourse to the latter, the former is removed. So, even though the injunctions of ritual relate to what is not established otherwise, they do serve to remove activity prompted by natural desire.

In reply to the above contention it is stated that there is no parity between the illustration and the illustrated. While service may yield its fruit immediately, the *Sāṅgrahaṇī* may fructify in the future.

[415 b-416 a]

अदृष्टार्था हि दृष्टार्था रागाद्युत्थाः प्रवृत्तयः ॥ ४१५ ॥

ग्रामोपायेन सेवायाः सांग्रहण्याऽविरुद्धता ।

For (the activity consequent on Vedic injunction) has unseen fruit; whereas actions prompted by desire, etc., have seen fruits. And, there is no opposition between the *Sāṅgrahaṇī* and service as means for gaining a village.

Scripture-prompted activity and activity prompted by natural desire, etc., do, it is true, result in transmigration. Yet, there is a difference between them in regard to intermediary results. So, the illustration of service, etc., is not apt.

Service and the *Sāṅgrahaṇī* do not have the same fruit. There is Scriptural evidence for the *Sāṅgrahaṇī* leading to the possession of a village. There is no such evidence for service resulting in the same fruit. Since there is no mutual conflict between the two, the adoption of one does not necessarily mean the rejection of the other.

[416 b-417]

क्रियातः फलमित्येवं शास्त्रमेतावति प्रमा ॥ ४१६ ॥

क्रमेण युगपद्वाऽतः सेवासांग्रहणीहयोः ।

नानुष्ठाने विरोधोऽस्ति फलभूमार्थिनः क्वचित् ॥ ४१७ ॥

“Through rite (*kriyā*) the fruit.” This much alone Scripture makes known validly. Whether in sequence or simultaneously, if service and the *Sāṅgrahaṇī* be performed, there is nothing incongruous; they may well be performed by him who desires more of the fruit.

The text which declares, “He who desires a village is to perform the *Sāṅgrahaṇī*,” merely says that he who performs this rite along with its auxiliaries obtains the village; it does not say that service is not a means to that end.

There is no disjunction between service and the *Sāṅgrahaṇī*. One may perform them both on the same day or on different days. Therefore, the *Sāṅgrahaṇī* does not exclude service.

In addition to the *Sāṅgrahaṇī* one may perform service in order to acquire more of the fruit. The former results in the acquisition of a village. When service is added, one may acquire a bigger village.

[418]

रागाद्युत्थप्रवृत्तीनां कात्स्न्येन च विरोधतः ।

नैयोगिक्योऽपि नैव स्युर्द्रव्याभावात्प्रवृत्तयः ॥ ४१८ ॥

If there be opposition to all activities prompted by desire, etc., then there would be no activity at all as prompted by *niyoga*, because of the absence of money.

Does the Scripture-prompted activity remove all activity prompted by natural desire? If that were so, then the activity for earning wealth will also be removed. And if there is no wealth, no Scripture-ordained rite can be performed. There will, therefore, be no activity based on Scriptural injunction ; and *karma-kāṇḍa*. will become invalid.

[419]

दृष्टादृष्टप्रवृत्त्योश्च न विशेषोऽस्ति कश्चन ।

उपायत्वेन काम्यानां रागाद्याक्षिप्तहेतुतः ४१९ ॥

There is no difference (*viśeṣa*) whatever between activity in respect of a seen fruit and that in respect of an unseen fruit, for the reason that both are means to what one desired, and are brought about by attachment, etc.

Activity born of natural desire and Scripture-prompted activity are equal in the sense that they are adopted as means to an end that is desired. Desire is the root of both the types of activity. Without the desire for heaven, etc., there cannot, indeed, be Scripture-prompted activity.

[420]

प्रपञ्चाभिनिवेशित्वहेतौ तुल्येऽपि चानयोः ।

कं विशेषमपेक्ष्यैका चेष्टा मुक्त्यनुरोधिनी ॥ ४२० ॥

Since both of them are equal as being the means for developing attachment to the universe, depending on what difference can it be said that one of them is ancillary to release ?

Both types of activity bind one to the world. So, it cannot be stated that one of them, viz. Scripture-prompted activity, is the means to release.

[421]

कामोपायत्वमेवाथ नेष्टं यदि च कर्मणाम् ।

उक्तो न्यायः प्रहीयेत फलं चाऽऽकस्मिकं भवेत् ॥ ४२१ ॥

If you do not accept that actions are means to the accomplishment of desires, then the rule set forth (in the *Mīmāṃsā Śāstra*) would be destroyed, and the fruit would be accidental.

In texts such as 'He who desires heaven is to offer sacrifice,' etc., heaven is seen to be the principal and sacrifice to be the subsidiary (vide *PM*, VI, i, 2). So, it is clear that the fruit of ritual acts is heaven, etc. If that were not the case, the attainment of heaven, etc., would become a matter of accident.

[422]

सर्वकामाशनेनाथ कृत्स्नकामलयाध्वना ।

यान्ति मुक्त्यानुगुण्यं चेद्विधयो वार्त्तमेव तत् ॥ ४२२ ॥

“By the enjoyment of all desires, all desires get destroyed; and through this means the injunctions become ancillary to release”—this is without substance.

The *kāmadhvamsa-vādin* argues thus: “The injunctions of ritual prompt a man to perform ritual acts; and when a man performs those acts, they cause him to enjoy the appropriate fruit; and by causing him to enjoy, they remove his desire for that fruit. Through this procedure, the injunctions culminate in making that man eligible for *jñāna*.”

The *siddhāntin* finds no sense in this argument.

[423-424]

यन्निमित्ता प्रवृत्तिः स्यात्सा कथं तन्निवर्तिका ।

प्रवृत्तोऽपि निवर्तेत न कामोपायकर्मतः ॥ ४२३ ॥

उद्विजेताथवा ज्ञानात्सर्वपुंभोगघस्मरात् ।

अपि वृन्दावने शून्य इति कामिवचस्तथा ॥ ४२४ ॥

That for the sake of which (or, that caused by which) there is activity, how can that (activity or enjoyment) remove that? He who has begun to be active will turn away from the activity that is the means to the desired end; and there will be no activity.

Or, he who has desires will abhor knowledge which is destructive of all human enjoyments. Thus the statement of the man of desires: “Even in the deserted *Vṛndāvana*, etc.”

What removes the desire for fruit? Is it activity? Or, is it the enjoyment of that fruit? Activity cannot remove the desire for fruit, for it is the desire for fruit that prompts activity; and how

can activity remove its own aim ? If what removes the desire for fruit is enjoyment, it must be stated whether enjoyment removes desire during the time it lasts, or during the time of its prior non-existence, or during the time of its destruction. Not the first ; when there is enjoyment, that only increases desire and cannot remove it. Nor the second ; if enjoyment of fruit were to remove the desire for fruit even before its commencement, then one would turn away, at the very same time, from activities that are the means to the desired fruit, although one might have started being active. In other words, one would cease from all activity. The third alternative, that enjoyment of fruit removes the desire for fruit when it is destroyed, is also unacceptable. It is seen that when a man has enjoyed the object of his desire he does not cease from desire. On the contrary, desire only increases. If any one tells him at that time about self-knowledge, etc., he is greatly displeased.

SP gives also another interpretation of these two verses. According to this interpretation, the rendering of the first *śloka* would be : ‘That for the sake of which there is activity—how can that (activity) be the remover thereof ? He who has begun to be active will not turn away from the activity which is the means to the desired end.’

The second *śloka* proceeds to say : In the case of such a person, it cannot be maintained that there is cessation of activity through self-knowledge. He would not stand even the talk about self-knowledge. The following statement about the passionate soul is cited :—

*api vṛndāvane sūnye śṛgālatvam sa icchati,
na tu nirviṣayaṁ mokṣaṁ kadācid api gautama.*

‘Even in a deserted Vṛndāvana, he desires to be as a jackal ; not, indeed, (does he desire) at any time, O Gautama, the contentless *mokṣa*.’

This verse is referred to by the commentator as *kāmi-gīta*.

There is a similar verse which is in criticism of the Nyāya view of *mokṣa* :

*varaṁ vṛndāvane ramye śṛgālatvaṁ sa icchatu,
gautamābhihitāṁ muktiṁ gautamo gantum arhati.*

(*Nyāya-siddhānta-dīpa-prabhā*, p. 232.)

NTV—*iti rāgi-vacaḥ pramāṇam.*

NKL—*yataḥ kāraṇāt pravṛttiḥ sā sva-kāraṇasya kāmasya katham
nivarttikā ity arthaḥ.....bhogasya na kevalaṁ jñānānugūṇyābhāvaḥ

[425]

उक्तं यदपि वेदेऽस्मिन्कस्यचिद्विलयः क्वचित् ।

तन्नातत्परतस्तूक्तेर्न देहादिलयस्ततः ॥ ४२५ ॥

As for what was said that, in the Veda, somewhere the resolution of something or other is understood, that is not sound ; for the texts of the Veda do not have that for purport. From those (texts) there is no resolution of body, etc.

Karma-kāṇḍa does not have the destruction of difference for its purport. For its purport is only the relation to what is unknown, viz. heaven. Nor is the destruction of difference the purport of *jñāna-kāṇḍa* ; for the purport of that is the distinctionless Reality. So, the resolution of the world of duality is not the purport of the Veda.

The texts 'He who desires heaven,' etc., do not teach the resolution of body, etc. What they teach is the relation between heaven, etc., and sacrifice, etc. (*Vide v. 3776 b f.*)

NTV—svargakāmo yajetety evam - ādinām na prapañcavilaya-paratvaṁ kiṁtu sādhyā-sādhana-saṁbandha-vidhiparatvaṁ, atas tato vākyāt na dehātmabhāvādi-vilayas siddhyati.

[426]

श्रुतेऽपि स्वर्गतात्पर्ये कल्पना चेच्छयेऽर्थतः ।

तन्न प्रत्यक्षवचनाद्देहादिलयसिद्धितः ॥ ४२६ ॥

“Even though Scripture has heaven for purport, the resolution is assumed by implication.” If thus it be said, no ; for the resolution of body, etc., is established by direct statements.

It cannot be said that, even though the relation between sacrifice and heaven is the purport of *karma-kāṇḍa*, the resolution of body, etc., is to be assumed, as otherwise no man would be active in respect of the other world. For, assumption is necessary only of what is not established otherwise ; the resolution of body is established on the strength of other evidence ; and it is on that that otherworldly activity is based.

[427]

साक्षाद्वास्तिनि दृष्टेऽपि नहि हस्तिपदानुमा ।

अस्थूलादिवचः साक्षाद्देहादिप्रतिषेधकृत् ॥ ४२७ ॥

When an elephant is directly seen, the elephant is not, indeed, inferred. The text “not-gross,”¹ etc., directly negates body, etc.

The resolution of body, etc., is declared by Scripture directly ; so, there is no need to assume it.

1. *BU*, III, viii, 8. 'He (Yājñavalkya) said: O Gārgi, the knowers of Brahman declare, this immutable (Brahman) is, verily, that. It is not gross nor subtle, not short nor long, not red nor sticking, not shadowed nor dark, not airy nor aetherial, without attachment, without taste, without odour, without eyes, without ears, without speech, without mind, without light, without the vital air, without mouth, without measure, and without inside or outside. Not that does eat anything ; nor does that anything eat.'

[428]

विपर्ययेण येऽप्याहुर्यथोक्तज्ञानकर्मणोः ।

एकाधिकारितां वाच्यं मानं तैर्ज्ञानसंगतौ ॥ ४२८ ॥

As for those who maintain the view that there is contrary relation as between knowledge and action, as aforesaid, and that there is identity of eligibility, they must produce evidence for so relating knowledge.

The contrary relation is that *karma* is the principal and *jñāna* is the subsidiary. There is no use in merely asserting that there is such a relation ; evidence must be produced.

[429]

न तावत्प्रक्रियेहास्ति व्रीह्यादिप्रोक्षणे यथा ।

प्रकृतापूर्वसंबन्धलक्षणापरतः स्थितेः ॥ ४२९ ॥

As in the case of sprinkling the paddy-grains, etc., here there is no context, because the paddy-grains there suggest by implication the relation to the *apūrva* under reference.

Context (*prakaraṇa*) is not the evidence for making out that *jñāna* is subsidiary to *karma*. That the sprinkling of paddy-grains is subsidiary to the *Darśapūrṇamāsa* is known through context. Nothing like that obtains in the present case.

[430]

ब्रीहिशब्दस्य हि ब्रीहिस्वरूपे तु निरर्थकम् ।

प्रकृतापूर्वसंबन्धं बोधयेदिति युज्यते ॥ ४३० ॥

If the word 'paddy-grain' (denote) the paddy-grain itself, then it is futile. It is but proper to say that it makes known the relation to the *apūrva* under reference.

The expression 'paddy-grains' in the illustration does not denote paddy-grains as such; because it is not possible to sprinkle paddy-grains as such, and it is not necessary also. So, the expression refers to the relation to the *apūrva* in the context of *Darśapūrṇamāsa*. The sprinkling generates an unseen potency which is related to the supreme unseen potency of the *Darśapūrṇamāsa* rites.

[431-432 a]

नापि वाक्येन संबन्धो जुहूपर्णमयीत्ववत् ।

जुह्वाद्यव्यभिचारित्वकर्मसंगतिकारणात् ॥ ४३१ ॥

विनाऽपि प्रक्रियां तेन कर्मोपस्थापयेद्भ्रुवम् ।

Nor can that relation be established through *vākya*, as in the case of the ladle being made of *parṇa*-wood; because the ladle is invariably related to ritual, even without the context, (the nature of being made of *parṇa*-wood) will surely be related to ritual because of that (viz. *vākya*).

Syntactical connection (*vākya*) too is no evidence for establishing the subsidiariness of *jñāna* to *karma*. Through syntactical connection it is known that 'being-made-of-*parṇa*-wood' is subsidiary to the ladle. (See note on v 334 b-335 a.) And thus it comes to be related to the rite. This is intelligible because the material of the ladle, etc., is invariably related to the rite. But no such relation between *jñāna* and *karma* is known through syntactical connection.

[432 b-433 a]

वाक्येनैवाभिसंबन्धस्तत्र तस्येति वर्णितम् ॥ ४३२ ॥

आत्मज्ञानं तु नैवं स्यान्न तत्प्रकरणे श्रुतम् ।

There (in the third *adhyāya*) it was declared that the relation (of *parṇa*-wood to ritual) is by *vākya* itself. But self-knowledge is not thus ; it is not declared in that context.

Unlike 'sprinkling,' self-knowledge is not auxiliary to *karma*, because it is not taught in that context (*prakaraṇa*).

[433 b-434 a]

नापि चाव्यभिचारित्वमात्मनः कर्मणोक्ष्यते ॥ ४३३ ॥

तेनास्य कर्मसंबन्धो न मानेनोपपद्यते ।

Nor is there seen non-inconstancy as between the self and action ; the relation of that (knowledge) with action is not intelligible on any evidence (*māna*).

Syntactical connection (*vākya*) too is not the evidence ; nor express statement (*śruti*), etc. Even as empirical action is not unintelligible without self-knowledge, so also Scripture-ordained action is not unintelligible without that knowledge.

[434 b-435 a]

एवं चाज्ञातपारार्थ्ये नार्थवादः फलश्रुतिः ॥ ४३४ ॥

पृथगेवाधिकारोऽतो यथोक्तज्ञानकर्मणोः ।

Thus, when it (knowledge) is not known to be for the sake of something else, the declaration of the fruit thereof is not eulogy ; therefore, the eligibility is different for knowledge and action, as aforesaid.

Thus, self-knowledge is not a subsidiary of anything else ; and so the declaration of its fruit is not an *arthavāda*. *Jñāna* is the means to *mokṣa*; not *karma*. Therefore, the two *kāṇḍas* have different eligible persons, etc.

[435 b-436 a]

अर्थाक्षेपोऽपि योग्यस्य कर्तुर्भोक्तुश्च युज्यते ॥ ४३५ ॥

न तु विध्वस्तभेदस्य स्यादौपनिषदस्य सः ।

Postulation by implication (*arthākṣepah*) is intelligible, of what is competent therefor, viz., the agent and enjoyer ; but that is not possible of the self, to be known through the *Upaniṣads* alone, which is devoid of difference.

It may be claimed that there is evidence for stating the subsidiariness of *jñāna* to *karma*—the evidence being postulation (*arthāpatti*). Without knowing the nature of self, it is not possible for one to engage oneself in acts relating to the other world ; hence self-knowledge is a subsidiary of *karma*.

Here, the objector is to be asked: What is the kind of self-knowledge you are thinking of—is it the knowledge of the self as agent, or of the self as non-agent? The first alternative is acceptable to us. The second is not possible. The self which is to be known through the Upaniṣads as the real without any distinctions is of no use at all for *karma*.

NKL—*kartrādy - ātma - jñānaṁ karmāṅgam, na aśanāyādyatītā-
-tma - jñānam, anupayogāt, virodhāc ca.*

AVS—*yādṛśātma-jñānaṁ vinā karmānuṣṭhātum na sakyate, tādrṣ-
-ātmajñānasya karma - śeṣatvaṁ bhavatu, aupaniṣadātmajñānasya
kartrtvādy - aśeṣa - viśeṣopamardakatvāt tac - cheṣatvaṁ na ghaṭate.*

[436 b-437 a]

प्रत्यक्षवेदवचनप्रामाण्याद्यश्रयत्वतः ॥ ४३६ ॥

आदौ संन्याससंसिद्धेर्ऋणानीति ह्यस्मृतिः ।

Because, depending on the evidence of the direct statement of the Veda, renunciation even at the beginning is established, the Traditional Code 'Debts, etc.,' is no evidence.

Some may believe that the texts of the traditional code which speak of the three debts every man has to discharge are evidence for making *karma* subsidiary to *jñāna-niyoga*. The text referred to in this verse is from *Manu* (vi, 35). Besides this, the glossator quotes the *Taittirīya-saṁhitā* (VI, iii, 11).

The *siddhāntin* maintains that all such texts are of no avail against the express declaration of *Śruti* that one may renounce even from the student's stage in life (See *Jābāla*, 4). The texts quoted above only mean that one should discharge the three debts some time or other, not necessarily in the present life.

[437 b-438 a]

न च केवलकर्मभ्यो मुक्तिर्युक्त्योपपद्यते ॥ ४३७ ॥

तथा च वक्ष्यते स्पष्टमतो मुक्तिर्न कर्मतः ।

Nor is it possible to show by reasoning that release is through mere action ; how this is so will be explained clearly later ; therefore, release is not through action.

The words of the *Bhagavad-gītā* that ‘ By *karma* alone Janaka, etc., attained *samsiddhi* ’ (iii, 20) cannot be quoted in support of the view that *karma* alone is the means to *mokṣa*. For, these and similar words cannot make the Scriptural statement that *jñāna* is the means to *mokṣa* invalid. What they really mean is that *karma* purifies the mind and thus helps in the rise of *jñāna*. Scripture declares explicitly : ‘ Not by *karma*, not by progeny, nor by wealth, but by renunciation alone some attained immortality ’ (*Mahānārāyaṇa*, X, 5 ; *Kaivalya*, 2). This is corroborated by the experience of the wise. The reasoning in support of this will be stated later on.

[438 b-439 a]

न चैकात्म्यपरिज्ञानमभ्यासापेक्षमिष्यते ॥ ४३८ ॥

मुक्तये भावनार्थं वा तथा चोर्ध्वं प्रवक्ष्यते ।

Nor is knowledge of the one self dependent on practice (*abhyāsa*) ; nor is it expectant of meditation (*bhāvanā*) for the sake of release ; this will be explained later (iii, 3).

Jñāna does not require repeated practice (*abhyāsa*). Nor does it stand in need of continued meditation (*bhāvanā*). It is the teaching of Scripture that *jñāna* is the sole and independent means to release.

[439 b-440 a]

स्वतोऽनुभवतः सिद्धेरैकात्म्याख्यस्य वस्तुनः ॥ ४३९ ॥

न स्यात्सांपादिकं ज्ञानमित्येतच्चापि वक्ष्यते ।

The reality which is called the one self is self-established in experience. Hence knowledge is not that which produces it (*sāmpādika*); this also will be stated.

It cannot be said that self-knowledge is not valid, because it is generated by the Upaniṣads, like the knowledge that woman is fire (*CHU*, V, viii, 1; *BU*, VI, ii, 13): for, in the latter case, which is cited as illustration, the content is something which is superimposed and is therefore illusory; not so is self-knowledge whose content is the supreme truth. Even here, it must be remembered that the self is not produced, but only revealed by the Upaniṣads.

[440 b-441 a]

अन्य आहुः पदार्थत्वात्प्रमाणान्तरगम्यताम् ॥ ४४० ॥

आत्मनो नाऽऽगमात्सिद्धिर्ब्रह्माद्यन्यपदार्थवत् ।

Others say: "Because the self is an entity, it is known through *pramāṇas* other than Scripture. It is not established (through Scripture) even as other entities like paddy-grains (are not so established).

The view here set forth is as follows : As the self is an established entity, there is no need to depend on Scripture for knowing it. What is enjoined in the Vedāntas is the suppression of the residual impressions of waking and other states or the suppression of mind. Injunctions of *karma* are auxiliary thereto.

NKL—*ātmā āgamātirikṭamāgamyah siddhavastutvāt ghaṭavad ity arthaḥ.....vrihyādeḥ pratyakṣādi-siddhatvena avidheyatvād yathā kartavyatāparam vrihibhir yajate ityādi-vākyaṁ, tathā vedāntavākyaṁ api. itarathā anuvādāpātād ity arthaḥ.*

[441 b-442]

अन्वयव्यतिरेकाभ्यां जाग्रत्स्वप्नसुषुप्तिः ॥ ४४१ ॥

विविच्यतः स्वमात्मानं प्रत्यभिज्ञानतस्तथा ।

माव्यापारसमाप्तत्वान्न भूयस्तदपेक्षिता ॥ ४४२ ॥

“ Enquiring into waking, dream and deep sleep by co-presence and co-absence, thence one recognizes one's self; as the functioning of the means of valid knowledge is complete (with this), there is no need of it again.

The evidence for the self is such reasoning as is based on co-presence and co-absence. An inquiry into the states of experience reveals that the witness-self is constant, while the objects are inconstant. As a result of this inquiry the self is realized. So, Scripture is unnecessary.

NKL—*avasthātraya-sākṣitvena ātma-sphuraṇāt, avasthā-trayasya vyabhicārat, ātma-svarūpatva-taddharma tayor ayogāt, yo 'ham pūrvedyuh so 'ham idānim iti pratyabhijñānāc ca ātmānaṁ vivicyāvasthitasya punar mānāpekṣā vedāntāpekṣā vā na syād ity arthaḥ.*

AVS—*avasthātraya-sākṣitvena ātmanah sphuraṇāt, avasthātrayasya vyabhicārāc ca, ātmasvarūpatvadharmatvā-'yogāt, pratyabhijñā-balenaikyena ātmānaṁ vivicya sthitasya punar mānāpekṣā vedāpekṣā vā na bhaved iti yata ukta-prakāreṇa pramāṇāntara-siddham ātmavastu ato vedāntānāṁ tatra pramāṇatvāyogāt, vāsanānirodhe vedāntavākyaṁ pumān niyuḥyate, mano-nirodhe vā.*

[443-444 a]

तद्वासनानिरोधेऽतः पुमाञ्श्रुत्या नियुज्यते ।

मनसो वा निरोधेऽसौ न तु वस्त्ववबोधने ॥ ४४३ ॥

मानान्तरेण तत्सिद्धेर्नात्र व्याप्रियते वचः ।

“ Therefore, man is prompted by Scripture to control the residual impression thereof (i.e., the three states), or to control the mind, and not in respect of knowing reality; for, that having been established by other means of valid knowledge, the words (of Scripture) do not function here.

What Scripture does is to lay down the means which consists in suppressing the residual impression of the three states of the mind. The glossator cites here *KU* iii, 13, ‘Let the wise man resolve speech into mind, resolve that into the intelligence-self, resolve intelligence into the great-self, and resolve that into the peaceful self.’

NTV—kṛtisādhyo hi niyoga-viṣayaḥ ātmavastu-vivekāvabodho mānāntarasiddhas tena kṛtisādhyatvābhāvāt tatra na niyoga ity arthaḥ.

[444 b-445 a]

स्वयंज्योतिःस्वभावत्वान्निरुद्धस्वान्तवासनः ॥ ४४४ ॥

प्रमान्तरानपेक्षोऽपि स्वयमात्मा प्रकाशते ।

“ Because the self is self-luminous, when the residual impression of the mind has been removed, it shines of itself without depending on any other means of valid knowledge.

When the impressions of the mind have all been removed, the self which is self-luminous shines of its own accord. Hence too, it is not proper to say that the self is known through the Vedāntas.

NKL—vāsanāsu niruddhāsu svayam evā 'tmā siddhyati svaprakāśatvāt.

[445 b-446 a]

एवं कार्यमुखेनैव ज्योतिष्टोमादिवाक्यवत् ॥ ४४५ ॥

वेदान्तानां प्रमाणत्वं नाक्षवद्वस्तुनीष्यते ।

“Thus the validity of the Vedāntas is only by way of what-is-to-be-done (*kārya*), as that of the text relating to the *Jyotiṣṭoma*, etc.; it is not required in respect of an entity, as the sense of sight.

The Vedāntas are not *pramāṇa* in respect of the self. They have validity only through enjoining something-to-be-done (*niyoga*). What is to be done here is the suppression of the mind.

[446 b-447 a]

वासनामात्रहेतुत्वादात्मनोऽनर्थसंगतेः॥ ४४६ ॥

अन्योपाये सत्यसति निरोधादेव मुक्तता ।

“Since for the conjunction of the self with evil (*anartha*) the residual impression is alone the cause, whether a different means (*upāya*) is present or not release results from (mind-) control alone.

That which joins the self to evil (*anartha*, i.e., *samsāra*) is residual impression (*vāsanā*). When that is suppressed, there is release. It is not proper to say, therefore, that release is through

jñāna. It is seen that even *jñānīs* have *saṁsāra*. The sole means (*upāya*) to *mokṣa* is the suppression of residual impressions. Scripture and Traditional Code have this alone as their purport.

NKL—viduṣopi saṁsāra-darśanāt, nāsau ajñāna-kṛtaḥ, vāsanā-mātra-kṛta eva ity arthaḥ.

AVS—yadyapi jñānasya mokṣa-sāadhanatvaṁ śrūyate, tathāpi jñāninopi saṁsāra-darśanād vāsanā-nirodha eva mokṣa-sāadhanam ity arthaḥ.

[447 b-448 a]

संभाव्यं नानपेक्षत्वं नियोगविरहात्कचित् ॥ ४४७ ॥

शब्दप्रवृत्तेः सिद्धे च न नियोगस्य संभवः ।

“The functioning of words (*laukika* and *vaidika*) is not possible independently, without *niyoga* (mandatory force), and *niyoga* is not possible as regards what is an existent.

There is also another reason why the Vedāntas are valid only as being auxiliary to the injunction of suppression (*nirodha-vidhi*). Words, secular or sacred, become valid only through *niyoga* (command). *Niyoga* relates to what-is-to-be-done. It is of no use in respect of an established entity (*siddha-vastu*). The Vedāntas which are auxiliary to *niyoga* cannot, therefore, teach something which is already an established entity.

AVS—śabda-prayogasya anapekṣaṁ prāmāṇyaṁ niyoga-vyatirekeṇa tāvan na saṁbhavati, siddhe ca na niyogaḥ saṁbhavati, sādhyaviṣayatvān niyogasya, ato na siddhe vedānta-vākyānāṁ prāmāṇyam.

[448 b-449 a]

न च वस्तुनि मानत्वं उदाहरणमिष्यते ॥ ४४८ ॥

विधिर्गुणार्थस्तस्यापि व्यापारविषयत्वतः ।

“ *Guṇa-vidhi* is not an example for (the Vedāntas) being the means of valid knowledge in regard to an existent; for that too has for content an operation.

Nor may it be argued that the Vedāntas have an established entity for purport, even though they may be auxiliary to injunction, even as the text ‘One who is desirous of sense-efficiency should offer oblations of curds’ (*dadhnā indriya-kāmasya juhuyāt*), although having *niyoga* for purport, has as its content an established entity. (*PM*, II, ii, 25.) In the example cited, the problem is whether the text in question enjoins another act (i.e. an act other than *Agnihotra*) as qualified by an auxiliary, or whether it enjoins an auxiliary belonging to the present act (*Agnihotra*) itself for the sake of a fruit (here, sense-efficiency). The conclusion is that the text does the latter. But the example does not serve the purpose here. For, even there the content of injunction is not a bare entity but a subsidiary material as governed by an operation. So, operation is the principal, not an established entity.

[449 b-450 a]

किञ्चानुभूयमानस्य ह्यर्थस्य पुरुषार्थता ॥ ४४९ ॥

सर्वत्र गम्यते वेदे नानुभूतेः कथंचन ।

“Further, only a thing that is to-be-experienced can be a human end; this is seen everywhere in the Veda; by no means can experience be a human end.

Another reason for saying that the Veda cannot be *pramāṇa* in respect of what is pure (*śuddha*) and established (*siddha*): everywhere in the world it is seen that only what-is-to-be-experienced is a human end. The mere self-luminous self cannot be the human end. So, the Vedāntas are *pramāṇa* only as being auxiliary to a fruitful *niyoga*.

NTV — adhyayanavidhyupātta-vedāntavākyaśya puruṣārthaparatā svīkartavyā, anubhūti-lakṣaṇam ca siddham brahma na pumarthaḥ, anubhūyamānasyaiva pumarthatva-niyamāt, atopi nirodha-niyoga-paratā vaktavyā.

AVS—anubhāvyasyaiva modakādeḥ puruṣārthatvaṁ, na anubhūter ity arthaḥ.

[450 b-451 a]

ततश्च प्रतिभामात्रं शब्दादिति न मानतः ॥ ४५० ॥

प्रतीयमान एवातः पुरुषार्थः प्रसिद्धितः ।

“So from the words (of Scripture) there is only awareness (*pratibhā*), and not validity. It is only that which is experienced that can be a human end. This is settled.

Texts like ‘intelligence, bliss’ (*BU*, III, ix, 28), etc., merely generate insight. They do not become *pramāṇa* thereby. It is only what is being experienced that can become a human end, not experience as such.

[451 b-452 a]

अप्युपादीयमानं च सिद्धं वस्तु न कर्मणि ॥ ४५१ ॥

पुमर्थं साधयद्दृष्टमनिर्ज्ञाताङ्गभावकम् ।

“Even though an existent entity be taught (in the Veda), it is not seen to be taught as a human end unless it is known to be an auxiliary to an act.

Veda does not have for purport any pure existent entity. Such entities are certainly mentioned in the Veda, but only as auxiliaries of action.

[452 b-453 a]

अनुपादीयमानश्च न च ज्ञाताङ्गभावकः ॥ ४५२ ॥

आत्मा चेन्नास्य शेषत्वं विधिं प्रत्युपपद्यते ।

“If the self be not taught in the Veda (because it is of the nature of self-luminous experience), and if it is not known to be auxiliary, then it cannot be subsidiary to injunction.

If it is true that the self is of the nature of self-luminous experience, it cannot be taught in the Veda. Also, it cannot become a human end by being an auxiliary of injunction.

[453 b-454 a]

उपासीत स्वमात्मानमिति साक्षाद्वचःश्रवात् ॥ ५५३ ॥

तत्ताङ्गभाव इति चेन्मत्पन्थानं भवानिति ।

“If you say that there is subsidiariness (for the self) to the injunction of meditation because it is declared in Scripture ‘Meditate on your own self,’ then you adopt my view.

If it is your view that the self is taught as the content of the injunction of meditation, then you are adopting my position which is *niyoga-vāda*, relinquishing your doctrine that the *Vedāntas* are *pramāṇa* in respect of the pure self-established self.

AVS—*tarhi bhavat-siddhānto hataḥ, asmat-siddhāntaḥ siddhaḥ.*

[454 b-455 a]

क्रियाविधिपरत्वेन प्रामाण्यं वचसः स्थितम् ॥ ४५४ ॥

इति व्याचक्षते केचिन्नियोगार्थेकरागिणः ।

“Thus it is settled that words have validity only as having for purport injunction to act.”

Thus say some who are attached to the sense of *niyoga*.

Here the *niyoga-vādin* concludes the presentation of his case: The *Vedāntas* are auxiliary to the injunction of suppression (*nirodha-vidhi*). Karmas are also auxiliary to injunction. Thus there is connection between the two *kāṇḍas*.

[455 b-456 a]

नैतत्साध्वभ्यधायुच्चैर्नियोगविरहादपि ॥ ४५५ ॥

कामितार्थस्य संसिद्धेर्लौकिकादेव मानतः ।

What you have loudly proclaimed is not good. Even without *niyoga* we find the accomplishment of desired ends by empirical means of valid knowledge alone.

Siddhānta.—It is not right to say that release is through suppression alone. If suppression of mental impressions alone were the means, then it could be accomplished even through empirical *pramāṇas*; and there would be futility of Vedic injunction.

NTV—karma-nirodhayos samuccayān mokṣa iti pūrvottara-kāṇḍa-saṁbandhaṁ nirākaroti.

[456 b-457 a]

तद्भावभावतो लिङ्गाद्वैकसमाश्रयात् ॥ ४५६ ॥

ज्ञातोऽनर्थेन संबन्ध आत्मनो न तु वास्तवः ।

It is known that the relation of the self to evil is as dependent on residual impression (*vāsanā*) and it is not real. This is known through reasoning, viz., when that (*vāsanā*) is, the other (relation to evil) is.

Through empirical reasoning it is possible to establish the causal relation between residual impressions and the evil called *saṁsāra*. The reasoning, here, is based on co-presence and co-absence. What is the use, then, of the Veda?

NTV—jāgradādaṁ vāsanodbhave saṁsārodbhava-darśanāt, suṣup-tādaṁ vāsanābhibhave saṁsārābhibhava-darśanād ity arthaḥ.

[457 b-458 a]

तस्मात्संसारसंबन्धनिदानस्य प्रसिद्धितः ॥ ४५७ ॥

लिङ्गादेव ततस्तस्य ध्वंसेऽनर्थो निवर्तते ।

Therefore, since the cause of the relation to transmigration is established through reasoning itself (*liṅga*), when that (cause) is destroyed, evil is removed. (This is also known by the same reasoning.)

Just as through reasoning the cause of transmigration is determined, so also through reasoning it can be known that the suppression of the cause will result in the destruction of the effect.

Thus even without the help of Scripture, the human end can be achieved.

NKL—nirodha-vādinā saṁsārasya anvayādinā vāsanā-kṛtatvaṁ vācyam. ataś ca tan-nivartaka-nirodhasyā 'pi lokata eva siddhir ity arthaḥ.

[458 b-459 a]

अन्तरेणापि वचनं बौद्धादेरिव सिद्धितः ॥ ४५८ ॥

मोक्षस्य पुरुषार्थस्य वचोऽतो निष्फलं भवेत् ।

Since for you, as for the Bauddhas, etc., the human end which is release is accomplished even without the word (The Veda), the word (the Veda) would be futile.

If there is no help from Scripture, Scripture is futile. And, you would be joining the ranks of the *nāstikas*.

NTV—yathā bauddhādīnām mate mokṣo 'numānenaiva siddho nāgamam apekṣate tadvad ity arthaḥ.

[459 b-460 a]

व्यतीतानेकजन्मोत्थवासनानामनन्ततः ॥ ४५९ ॥

तासां निरोधोऽसंभाव्यो जन्मन्येकत्र मानवैः ।

As the residual impressions given rise to by the past several lives are endless, it is not possible for men to destroy them in a single life.

It may be said that man is prompted to suppress the residual impressions by Scripture. Even, then, it must be stated whether the residual impressions to be suppressed are of the past, the present, or the future. The past impressions are endless and, therefore, cannot

be suppressed. The present impressions are occasional, and do not stand in need of an injunction for suppression. The future impressions are not yet, and so how can they be suppressed ?

[460 b-461 a]

साक्षादोत्मावबोधेन प्रत्यग्ध्वान्तच्छिदा न चेत् ॥ ४६० ॥

दुःखादिभावना ध्वस्ता कथं तद्भावना नुदेत् ।

If by the direct intuition of the self there is no destruction of the inner darkness, how can it be removed by continued meditation (*bhāvanā*) which is itself destroyed by the contemplation of sorrow, etc.

If you believe that direct self-knowledge destroys ignorance, that that destruction suppresses mental impressions, and that through that there is release, you are virtually adopting our view. Or, if you think that the direct knowledge of the self cannot destroy ignorance, and that continued meditation is needed, we ask you, how is this intelligible ? If self-knowledge cannot destroy ignorance, continued meditation (*bhāvanā*) which is itself destroyed cannot destroy it.

*NTV—sākṣād ātmāvabodhaḥ pratyak-dhvāntam ajñānam bhinaiti k

[461 b-462 a]

नियोगवर्त्मना चेय यथा मुक्तिर्न सिध्यति ॥ ४६१ ॥

स्पष्टेन न्यायमार्गेण वक्ष्यामोऽक्सरे तथा ।

Later on, in its proper place, we shall show clearly through reasoning how release is not accomplished through the path of *niyoga*.

The view that release is obtained through the injunction of the practice of *jñāna*, we shall refute later (*vide* v. 762 f.).

[462 b-463 a]

न पदार्थो न वाक्यार्थ आत्माऽयं वस्तुतो यतः ॥ ४६२ ॥

तत्प्रत्याख्यानश्रुत्यैव तद्याथात्म्यावबोधनात् ।

The self, really, is not the sense of either a word or a sentence ; its true nature is understood only from the Scriptural texts which deny that.

It was stated in v. 440 b-441a that because the self is an entity, like paddy-grains, it is known through *pramāṇas* other than Scripture.

With reference to that contention, it is explained here how Scripture becomes evidence in respect of the self. The true nature of the self cannot be known through the literal sense of words or sentences. Scripture indicates the nature of the self through the exclusion or denial of the superimposed particulars constitutive of the world ; also through denying that the self is the content of words or sentences.

NTV—brahmātmany eva pramāṇam uttara-kāṇḍam iti samudāyārthah.....neti-netyādinā sakala-padārtha-vāk्यārtha-pratyākhyānena ātma-yāthātmyam pratipādyata ity arthah.

tena pramāṇāntara-gamyatvābhāvāt ātma-yāthātmyasya āgamād eva vidhiḥ yuktam, vrīhyādinām pada-vācyaatvāt pramāṇāntara-gamyatvam, ātma-yāthātmyasya tvam-pada-vācyaatvāt avāk्यārthatvāc ca na pramāṇāntara-gamyatvam iti vaiśamyam.

[463 b-464 a]

वासनानामभावेऽपि सुषुप्त्यादौ न मुक्तता ॥ ४६३ ॥

मानव्यापारविरहात्प्रथनं वा दृगात्मनः ।

In sleep, etc., even though there are no residual impressions, there is no release ; nor in the absence of the functioning of the means of valid knowledge in that state does the inner self manifest itself.

By the mere suppression of residual impressions one cannot attain release. There are no residual impressions in sleep ; but sleep is not release. It cannot be said that there are residual impressions in sleep, for if that were so, sleep would not be sleep. If it be urged that in sleep the impressions remain in the form of their cause, viz. nescience, then it is only the removal of that cause that would lead to release. And the removal of nescience is possible only through knowledge.

As for what was said that even without the functioning of *pramāṇas* the self shines when the impressions are removed, we have to make this observation, viz. that without *pramāṇa* the self-manifestation of the self cannot be known.

NTV—vāsanā-nirodhān na muktatā suṣṭyādaṁ vyabhicārāt, nāpi svānta-vāsanā-nirodhāt ātmā svayam eva prakāśate vāsanā-śūnye suṣṭyādaṁ dr̥g-ātmanah pr̥thag adarśanāt.

[464 b-465 a]

सर्वानर्थोभिसंबन्धे ह्यविद्यैवास्य कारणम् ॥ ४६४ ॥

वासनानामपि युतौ सैव यस्मादपेक्ष्यते ।

For the relation (of the self) to all evil, nescience alone is the cause; for conjunction with residual impressions nescience alone is required.

Nescience is the cause of residual impressions and of bondage.

NTV—ādhyātmikādhībhautikādhidāivikā-'nārtha-saṁbandhe mūla-kāraṇam avidyāiva, na ca tasyās sattvam asattvam vā yena tan-nirodhaka-prayatnāpekṣā kimtv anirvācyāyā jñānādeva nivṛttiḥ, tena vedāntānām tattva-jñānotpādakam eva.

[465 b-466 a]

संभाव्यतेऽनपेक्षत्वं नियोगविरहादपि ॥ ४६५ ॥

यथा तथा च वक्ष्यामः स्पष्टेन न्यायवर्त्मना ।

As to how independence (as means of knowledge) is possible (for Scripture) even without *niyoga*, we shall explain clearly through reasoning.

Scripture is *pramāṇa* even without dependence on *niyoga*.

NTV — siddhe vastuni niyogā-'saṁbhavasya tvayaivoktatvāt nirapekṣa-pramāṇa-bhāvena vedāntena kevalam brahmaiva pratīyate na niyogaḥ, nirviṣayatvād ity arthaḥ.

[466 b-467 a].

स्वानुभूतिबलादेव भवताऽपि विभाव्यते ॥ ४६६ ॥

नियोगादिः प्रमाणार्थो नानुभूतिर्नियोगतः ।

Even by you *niyoga*, etc., are known only on the strength of self-experience; experience is not known through *niyoga*.

Even the *niyoga-vādin* is able to understand the sense of *niyoga* which is inert only on the strength of the self which is consciousness. So, the self which is consciousness is self-established, and does not stand in need of *niyoga*. The impossibility of *niyoga* in its case is, therefore, not a defect. Surely, the sun which illumines colour, etc., does not shine as being dependent thereon.

NTV—niyogādeḥ jadasya anubhavaḥ siddhāv apekṣyate, anubhavasiddhau tu na niyogāpekṣā asti, anubhūtir eva ātmā ity arthaḥ.

[467 b-468 a]

यस्याप्रसिद्धिर्नाज्ञानात्प्रसिद्धिर्नापि मानतः ॥ ४६७ ॥

तस्यानुभवतत्त्वस्य कुतः सापेक्षतोच्यते ।

That of which there is neither non-establishment through ignorance nor establishment through means of knowledge—how can that experience-reality be said to be dependent ?

The self does not require to be established by *pramāṇa* ; nor does it become unestablished on account of ignorance. It neither rises nor sets. It is immutable and is of the nature of the one consistency of intelligence. Hence there is no need of *niyoga*.

[468 b-469 a]

स्वप्रधानात्मबुद्धयैव तदन्यस्य प्रसिद्धितः ॥ ४६८ ॥

कार्यबुद्धिव्यपेक्षातो नानुभूत्यात्मवस्तुनः ।

Because all other things are established only through self-knowledge which is independent, there is no dependence of the experience-self on the cognition of what-is-to-be-done.

The self is primary and independent. On it depend the entire host of things constituting the not-self. For its establishment, it does not depend on anything, even as the rope-cognition does not depend on the snake-cognition.

[469 b-470 a]

क नु प्रतीयमानस्य पुमर्थत्वं समीक्षितम् ॥ ४६९ ॥

मानान्मानफलस्यैव पुमर्थत्वसमन्वयात् ।

Where, indeed, is it validly seen that what is being experienced is the human end? The constant human end is only the fruit of the means of knowledge (*viz.* experience).

It was stated by the *pūrvapakṣin* that what-is-enjoyed alone is the human end. But that cannot be. What is enjoyed or experienced varies. Enjoyment or experience alone is constant. What is inconstant and contingent cannot be the human goal. Only that which is constant and unconditioned can be the goal.

[470 b-471 a]

प्रतीतेर्माफलत्वाच्च कथं मेयैकनिष्ठता ॥ ४७० ॥

साक्रियाफलयोगोऽयं यतो मातरि भोक्तारि ।

Because experience is the fruit of means of knowledge, how can it have the object alone for basis? The cognitive activity is in the cognizer; the fruit is related to the enjoyer. (These two are not different.)

It cannot be said that experience is dependent on the experienced object, even as the colour of the object is; for, experience is the fruit of *pramāṇa*, and the cognized object cannot be its locus, as the

object is inert. Surely, as between what is inert and what is not inert, there is not the relation of locus and the located.

Nor may it be urged that a fruit cannot be independent, and therefore experience must depend on the object ; for, the fruit of *pramāṇa* depends on the cognizer, and the fruit of action on the enjoyer ; and the two—cognizer and enjoyer—are not different. To speak of experience as the fruit of *pramāṇa* is only in the figurative sense. Experience is the self.

NTV—anubhavyaiva svayamprakāśatvāt anubhavyasya ca jādātīvāt na anubhāvyaśrayā pratītir ity arthaḥ. na kevalam pratīteḥ hetoḥ na meyaika-niṣṭhā anubhūtiḥ, kiṃtu māna-phalātīvāc ca tataś ca bhoktari phalam tat bhoktā ca pramātaiva.

AVS—anubhavya māna-phalātīvāt prameyasya jādātīvāc ca anubhavo na meyaśrayaḥ, kiṃtv ātmāśraya iti.

[471 b-472 a]

न चाऽऽत्मानुभवादन्यो विषयः कश्चिदिष्यते ॥ ४७१ ॥

अपि सर्वप्रमाणानां किमु वेदान्तशासने ।

Nothing other than self-experience is the content of all means of knowledge—what, then, of Vedānta-teaching!

The self which is experience is the content of all *pramāṇas*, for there is nothing other than the self which is unknown. So, it requires no special effort to know that for the *Vedāntas* there is no content other than the experience-self which is the human goal.

NTV—anavagatārtha-gaṇṭṛ pramāṇam iti lakṣanād ajñānanivartakaṃ pramāṇam, tac ca ajñānam jāde ghaṭādaḥ na sambhavati, tathā ca anubhūter eva ajñānaviśayatvena anavagatatvāt tasyā eva meyatvam pumarthatvam ceti yadā jāda-niṣṭhānām api pramāṇānām evam gatiḥ, tadā kimu vaktavyam anubhava niṣṭhānām vedāntānām.

[472 b-473 a]

लौकिको वैदिकः सर्वो व्यवहारो जगत्पि ॥ ४७२ ॥

भोक्त्रर्थ एव नान्योऽतः प्रधानं भोक्तुरिष्यते ।

All usage in the world, whether empirical or Scriptural, is for the sake of the enjoyer, and not for anything else—so, the enjoyer is the principal.

Here is another reason for saying that the *Vedānta* is *pramāṇa* in respect of the supreme consciousness-self which is the ultimate human goal, untouched by *niyoga* :

All empirical usage in the world is for the sake of the enjoyer-self. The self which is experience and which is of the nature of bliss is the principal ; all else is subsidiary. Hence, it is the goal of *Vedānta-pramāṇa*.

NTV—kimca sarvasya ātmārthatvena priyatvād ātmā niratisaya-sukham, anubhūtir eva ātmā iti saiva pumarthah.

[473 b-474 a]

न वा अरे पत्युरिति तदेतत्प्रेय इत्यपि ॥ ४७३ ॥

निखिलेऽपि जगत्स्मिन्प्रधानं नाऽऽत्मनोऽपरः ।

From texts like “Not for the sake of the husband, etc.”¹ and “So this is dearer, etc.”² it is learnt that everywhere in the world there is nothing superior to the self.

1. *BU*, II, iv, 5 ; IV, v, 6 : ‘Not indeed for the love of a husband is the husband dear ; but, for the love of the self is the husband dear.’

2. *BU*, I, iv, 8 : ‘This which is the self is dearer than a son, dearer than wealth, dearer than everything else, and is innermost.’

That the inner self is of the nature of unexcellable bliss is taught in Scripture. The self is the principal ; it is the sphere of unconditioned love ; hence, it is of the nature of supreme bliss.

NKL—yadartham sarvam upādiyate yac ca nānyārtham tat sukham iti lakṣaṇam ātmani paripūrṇam ity arthaḥ. nirupādhiprema gocaratvādapy ātmanah sukha-rūpatvam sādhayitum para-prema-gocaratve śrutim udāharati.

[474 b-475 a]

न प्रमाता प्रमाणं वा क्रियामेयफलानि वा ॥ ४७४ ॥

प्राधान्यायेह कल्पन्ते भोक्तुरेव प्रधानतः ।

Neither the cognizer, nor the means of cognition, nor activity, object, or fruit, can be assumed to be the principal here (in the empirical state), for the enjoyer alone is the principal.

The enjoyer alone is the principal ; everything else is for his sake.

[475 b-476 a]

आत्मनः कर्त्रवस्थाऽपि भोक्तृत्वमिति निश्चयः ॥ ४७५ ॥

यतोऽतोऽपरमप्येतद्भोक्तृत्वं विनियुज्यते ।

Even the state of agency for the self is certainly for the sake of the enjoyer ; for all other things subserve the purposes of the enjoyer.

Even agency is secondary. Agency is for the sake of enjoyership. The enjoyer-self is not subsidiary to anything else. If it imagines that it is subsidiary, such imagination is born of delusion.

[476 b-477 a]

नापि चाऽऽत्मातिरेकेण वस्त्वन्यन्मानभूमिगम् ॥ ४७६ ॥
संभाव्यते यथा चैतत्तथोदके प्रवक्ष्यते ।

Nothing other than the self can be the sphere of cognition ; how this is so will be explained later.

The self alone is the content of valid knowledge. What is other than that is illusorily posited.

NKL—udarke upariṣṭād avyākṛta-vicāradau ity arthah.

[477 b-478 a]

अनादृत्य यथोक्तार्थं नियोगार्थैकरागतः ॥ ४७७ ॥
केचित्कार्यैकनिष्ठत्वं वेदान्तानां प्रचक्षते ।

Setting aside the sense we have explained, some, because of exclusive attachment to the sense of *niyoga*, maintain that the Vedāntas have for their sole purport what-is-to-be-done.

So far it has been shown that the Vedāntas are not auxiliary to the injunction of suppression. Those who would not brook this view say that the Vedāntas culminate only in what-is-to-be-done (*kārya*).

[478 b-479 a]

कार्यैकमात्रनिष्ठत्वात्प्रमाणस्याऽऽगमात्मनः ॥ ४७८ ॥
कुत ऐकात्म्यनिष्ठत्वं त्वया यदुदितं पुरा ।

“ Since Scripture as means of knowledge has for its sole purport what-is-to-be-done alone, how can it have for purport what you have stated, viz. the one self ?

Pūrvapakṣa.—All Vedic texts, including ‘That thou art,’ etc., have *kārya* as their purport. Even when existent entities are mentioned, it is only with the intention of making them auxiliary to *kārya*.

NTV—*āgama hi śāstratvāt pravṛtti-nivṛtti-upadeśaparaḥ, vedānta-vākyamapy āgamaḥ, tena asyāpi pravṛtti-nivṛtti-paratā vācyā. tad uktam :*

शब्दसामर्थ्यनियमो लोकादेवावगम्यते ॥ ४८० ॥
लोके मान्तरसिद्धोऽर्थः कार्ययैवाभिधीयते ।

“The rule regarding capacity of words is understood from the world (secular practice) alone ; and in

the world an existent entity which is known through other means of knowledge is referred to by words only for the sake of what-is-to-be-done.

The capacity of words is learnt from the usage of elders ; and all words point to some *kārya* or other. Moreover, in empirical usage, the things that are established through perception, etc., are made to subserve a *kārya*.

NTV—kimca lokādeva śabda--sāmarthyādhigamaḥ, tatra hi kāryaparatayaiva vākyāni prayujyante, ataḥ kāryaparatvam eva vedāntānām api.

[481 b-482 a]

न प्रवृत्तिनिवृत्तिभ्यां शून्यस्य वचसो यतः ॥ ४८१ ॥
कश्चिदर्थोऽत्र दृष्टोऽतो वस्तुनि स्यान्न मानता ।

“ For a word which is void of either activity or withdrawal there is no meaning seen here ; therefore, there is no validity in respect of an existent.

Testimony as a means of valid knowledge depends on purport ; purport refers to a human end ; such an end is to be accomplished by appetite or desistance ; these are prompted by injunctions and prohibitions ; and they are what-are-to-be-done. Hence also the Veda does not have the existent for purport.

NTV—śrotuḥ prayojanaṁ vivakṣan prekṣāvān padāni prayuṇte, prayojanaṁ ca pravṛtti-nivṛtti-sādhyaṁ bhavati, pravṛtti-nivṛtti ca kāryatā-'bhijñānāt bhavata iti tat-paratayaiva sakala-padānām prayoga ity arthaḥ.

[482 b-484 a]

संबन्धावगमो नापि शब्दाद्भूतार्थवाचिनः ॥ ४८२ ॥
प्रवर्तकात्प्रवृत्त्याऽर्थे प्रत्ययो ह्यनुमीयते ।

ततः शब्दस्य सामर्थ्यं प्रतीतेरवधार्यते ॥ ४८३ ॥

कार्यैकविषयैवेयं वाक्यस्यातः प्रमाणतः ।

“Nor is there cognition of relation in the case of a word which expresses an existent entity. It is by the activity prompted by a prompter that the meaning in respect of a particular thing is inferred.

Thence the capacity of a word to signify certain things (through what-is-to-be-done) is determined. Thus it is settled through means of knowledge that a sentence has for its sole content what-is-to-be-done.

In the absence of activity, words do not convey meaning. Let us see how a child learns the meanings of words. The superior elder (say, the grand-father) commands the intermediate elder (his son) to do something. When the latter obeys the command, the child looks on ; and then the child infers the meanings of the words contained in the command. Thus action is the important factor. It is as associated with action that words become meaningful.

NTV—tathā ca pravṛtti-saṁbandha-rahiteṣu bhūtārtheṣu na śabdā-nām śaktir gamyate, tathāsaty anavagata-sāmarthyāś śabdāḥ bhūterthe katham tam avabodhayeyuḥ, mama punaḥ kāryatā-jñānād eva pravṛtṭiḥ, na kriyāmātra-jñānāt, nāpi phalamātra-jñānāt, na cāpi kriyā-phalayoḥ sādhya-sādhana-saṁbandhāvagamāt, ataḥ kāryatā-jñānād eva asyāpi pravṛttir ity anumimīte.

[484 b-485 a]

क्रियाकारकसंबन्धो वाक्यार्थो यैरपीष्यते ॥ ४८४ ॥

अनुवादविसंवादात्तेषामुक्तेरमानता ।

“As for those who say that the sense of a sentence is the relation between action and agent, their statement is not valid, because of the method of agreement and difference.

It cannot be said that the sense of a sentence is the relation between an action and an agent, as in the case of the sentence ‘He cooks food.’ For, in the example cited, the relation of agent to action is known through other means, such as perception and inference. So, it is not ‘sentence’, or testimony that is the evidence here. We can only say in such cases that the testimony is either in agreement with or differs from the other *pramāṇas*. Hence, *kārya* alone should be taken as the sentence-sense.

NKL—pacatītyādaḥ kriyā-kāraka-sāmbandhasya māntara-yogyatvāt tat siddha-bodhakatve anuvādakatvam, anyathā yogyānupalambha-virodhān mithyā-bodhakatvam, ato niyoge prāmāṇyaṁ vākyaśya ity arthaḥ.

[485 b-486 a]

मान्तरानुप्रवेशित्वं कार्यस्य तु न शङ्क्यते ॥ ४८५ ॥

शब्दादेव हि कार्यार्थप्रतिपत्तिर्न लोकतः ।

“It cannot be doubted that even for what-is-to-be-done there may be some other evidence; for the sense of what-is-to-be-done is known from the Veda alone, and not from the world.

Kārya cannot be known by any other means. That is why it is called *mānāntarāpūrva*. Vedic sentence, of the nature of command, is the only means for knowing *kārya*.

NTV—svargakāmādi-padānām niyojya-samarpakatvena na tatsa-mabhivyāhṛtānām liṅādi-padānām niyojyānvita-kāryābhidhāyinām

*alaukikāpūrva-kārya-vācakatvābhyupagamāt na anuvādatā-prasaṅgaḥ

[486 b-487 a]

प्रवर्तनां वदञ्शब्दः प्रवर्तक इतीर्यते ॥ ४८६ ॥

ज्ञापकत्वात्प्रमाणस्य प्रेरयन्कारको भवेत् ।

“ Because the Vedic statement speaks of activity, it is called that which teaches activity ; for, the purpose of a means of knowledge is to make known ; if it actually prompted one to activity, it would be a causative agent (like desire or passion).

Here, the following objection may be raised : Śabara says that a command (*codanā*) means a statement which prompts activity. Therefore, that alone should be regarded as the cause of activity (*pravṛtti-hetu*). How, then, can *kārya* be inferred through activity as the *probans*, or *liṅ*, etc., connote *kārya* ? And also how can there be the apprehension of the sense of *apūrva-kārya* from ‘sentence’ alone ?

The reply is : ‘ Sentence ’ does not become directly the prompter. If it were to prompt directly, all those who hear the words, *liṅ*, etc., would begin to act. It is only as indicating an activity that a sentence becomes a prompter.

NKL—*vācya-vācakayor abhedopacāreṇa prerayan śabdaḥ pravartaka ity ukto bhāṣyakāreṇa ity arthaḥ.*

[487 b-488 a]

शब्दात्प्रवर्तनाबुद्धौ रागादिर्न च शङ्क्यते ॥ ४८७ ॥

रागादिः प्रेरणाकारी प्रेरणाज्ञापको ध्वनिः ।

“It cannot be doubted that desire, etc., are the cause in generating the cognition of activity from word (*liṅādi-śabda*); desire, etc., are what lead to prompting; sound (*i.e. liṅādi-śabda*) makes known prompting.

It cannot be said that appetite, etc., are responsible for knowing activity from ‘word’ (verbal testimony); for they may only lead to a command; that which makes command known is the word.

NKL — *śabdāt pratipannasya pravartakasya janako rāgādir iti bhāvah.*

[488 b-489 a]

आज्ञापितार्थनिष्पत्तौ कृतिमत्त्वेक्षणात्प्रभोः ॥ ४८८ ॥

रागाद्यर्थस्य चासिद्धौ कर्तृवृत्तिर्न रागतः ।

“Since we see activity for accomplishing something enjoined by a master, and since here appetite, etc., are not possible, the activity of the agent is not due to appetite.

It has been said that what prompts activity is neither appetite, etc., nor the word, and that it must only be the *kārya*. For example, commanded by the teacher, a student performs an action. Here, there is nothing like appetite, etc., on the part of the student. He acts merely as impelled by the power of the teacher’s command, *i. e.* out of a sense of obligatoriness.

[489 b-490 a]

स्वामिकोपप्रसादादिहृदयाकृतवेदनात् ॥ ४८९ ॥

नापि श्रोतुः प्रवृत्तिः स्याच्छब्दात्कोपाद्यवेदनात् ।

“Nor is the activity of the hearer prompted by a knowledge of the inner intentions like anger, pleasure, etc., of the master; for anger, etc., are not known from the word.

Nor may it be said that anger, etc., present in the one who issues the command are what prompt one to activity; for they cannot be known directly, as the *niyoga* or *kārya* is known from *liñ*, etc.

[490 b-491 a]

लिङादयो न कोपादेः स्मर्यन्ते प्रतिपादकाः ॥ ४९० ॥

मानान्तरमिताः सन्तस्ते हि पुंसां प्रवर्तकाः ।

“The potential ending, *liñ*, etc., are not taught to be the indicators of anger, etc. They, viz., anger, etc., become prompters of men's activity only as known through other means of knowledge.

The suffixes *liñ*, etc., make known command, and not the anger, etc., of the speaker. These latter are known through other means.

[491 b-492 a]

धिगङ्गाद्यभिधानैस्तु लिङ्गभूतैरिहेङ्गिताः ॥ ४९१ ॥

रागादयो नियोगस्य सिद्धयै विषयसाधनाः ।

“They (anger, etc.) are inferred from *probans* like the expressions ‘Fie’, ‘Dear one’, etc; appetition, etc.,

establish the content (*viṣaya*) and thereby make *niyoga* possible.

Anger, etc., are inferred from such expressions as 'Fie !,' etc.; they are not directly expressed by words.

If *kārya* is what prompts one to activity, and not *liñ*, etc., or appetite, etc., why was it said that attachment, etc., are what cause prompting? The reply is : attachment, etc., establish the stem-sense which in turn establishes the *niyoga*. Hence it is that they are said to cause the command.

NKL—*dhātvartha-sādhakatvena niyoga-sādhakā ity arthah.*

[492 b-493 a]

अत एव च रागादिसंस्पृष्टोऽपि विविच्यते ॥ ४९२ ॥

लोडाद्यर्थो व्रजेत्युक्तो याति स्वार्थं विना यतः ।

“Therefore, because, when the word (sense of the imperative ending, *lot*) ‘go’ (*vraja*) is uttered, he goes even without any purpose of his own, the meaning of the imperative ending *lot*, though mixed up with appetite, etc., is discriminated.

It cannot be said that in the case of empirical injunctive statements the *niyoga* is always associated with appetite, etc., for when his master says ‘go,’ the servant is seen to go even without appetite, etc. So, it is only the invariable *niyoga* that is the prompter, and not appetite, etc.

NKL—*phala-rāgaṁ vināpi kaścit pravartate ato yatra śabdānantara-pravṛtttau rāgādi-sambhāvanā tatrāpi niyogasyaiva pravartakatva-niścaya ity arthah.*

को द्वेषोऽस्मासु भवतो येनोपालम्भ ईर्यते ।

“ ‘If the word can make known a sense whose relation has not been determined, then why is this hostility because of which you censure us ?’

If *liñ*, etc., may convey a sense, though their relation to their contents is not grasped, why should not the words ‘Brahman,’ etc., do so? If it is insisted that only words whose relation to their contents is grasped can convey a sense, then Brahman would become an object of other *pramāṇas*, and *Vedānta* would then cease to be authoritative.

An alternative interpretation is given in *AVS* and *NTV*, taking the verse to contain a plea of the *pūrvapakṣin*. Then the meaning of the verse would be this: The *pūrvapakṣin* says, “We do not hold that words whose relation to their senses is unknown can convey knowledge. Or, even if we held that a word whose relation to its sense is not known conveys knowledge, why should you, O calm *Vedāntin*, get provoked, since it is you who believe that the word ‘Brahman,’ whose relation to its content is not known, conveys a sense of its own?”

[500 b-501 a]

कर्तव्यताविवक्षैव नृवाक्येभ्योऽपि गम्यते ॥ ५०० ॥

विवक्षाया न कार्यत्वं शब्दार्थविषया हि सा ।

“It is the intention of duty that is understood even from human statements ; for mere intention there is no obligatoriness ; that is the content of the sense of words.

It may be contended that even though appetite, etc., are not the sense of *liṅ*, etc., *niyoga* is not their sense, because their sense is the intention of the speaker. The reply to this contention is as follows : Is intention alone the sense of *liṅ*, etc., ? Or, is the sense the intention as qualified by obligatoriness ? Not the first ; for in the

case of the Veda which has no author there can be no intention. Even as regards human statements or commands, intention appears only as qualified by obligatoriness. Nor the second ; for in the case of the Veda, the observation made above holds good. And as for human statements, it is prolix to assume that intention as qualified by obligatoriness is the sense, while obligatoriness may well be the sense. The two, intention and obligatoriness, are not the same.

[501 b-502 a]

तद्वशान्न तु शब्दार्थः स हि पूर्वं प्रतीयते ॥ ५०१ ॥

अतः प्रैषादिसंसृष्टोऽप्यर्थः सिद्धो विवेकतः ।

“ The word-sense (*i.e.* obligatoriness) is not dependent on that (intention) ; for it is known even earlier ; therefore, though related to the direction, the sense (obligatoriness) is settled by discrimination.

Activity is not governed by the intention of the speaker ; for it is seen that one acts on hearing the words even without knowing the intention of the speaker. So, the determination of the sense of words is not dependent on the intention. That, indeed, depends on the capacity of the words. Moreover, it has already been pointed out that in the case of the Veda intention is not possible. Hence, obligatoriness and intention are different.

Even direction is not the sense of *liñ*, etc. For, in direction too what persists uniformly is *kārya*.

NKL—vivakṣāyādi-saṁsṛṣṭopi niyogo vivakṣāder anyah.

[502 b-503 a]

शब्दार्थोपाधयो ह्येते पुरुषाशयपातिनः ॥ ५०२ ॥

प्रैषादयो न शब्दार्था न चानेकार्थता मता ।

“These which fall on the side of human intentions, direction, etc., are the adjuncts of word-sense (obligatoriness); they are not the word-sense; nor could there be many senses (for word).

Direction, etc., are not known as the sense of *liñ*, etc. In worldly sentences they are known only as the adjuncts of *niyoga* which is the sense of *liñ*, etc. In the case of the Veda, such direction, etc., are not possible. Also, instead of assuming many directions as the sense of *liñ*, etc., it is in keeping with the rule of parsimony to take the constant *kārya* (i.e. *niyoga*) as the sense of *liñ*, etc.

NKL—niyogopādhitvena praiṣādīnām laukika-liñādi-śabdānvaya-vyatirekavatvaṁ, na tad-arthataye 'ty arthaḥ.

[503 b-504 a]

अभिप्रायवतोऽभावादभिप्रायानुपातिनः ॥ ५०३ ॥

शङ्क्यतेऽपि न वेदे तु कार्यं वाच्यमिति स्थितम् ।

“Since there is no one who intends in the case of the Veda (which is not of human origin), it is not even possible to doubt those (direction, etc.), which fall within intention; hence it is settled that in the Veda the express sense of the word is what-is-to-be-done.

In the case of the Veda, as has been pointed out already, there is no one who intends or directs.

*NTV—kimca bhavet pauruṣeya-vākve praiṣādeś śabdārthatvā-

[504 b-505 a]

प्रयोगविधिशेषत्वात्तन्मूला एव नाऽऽशयात् ॥ ५०४ ॥

वेदे प्रैषास्तु ये दृष्टा अग्नीदग्नीनितीदृशाः ।

“Directions such as ‘Agnīd, draw off the fires’ which are found in the Veda are auxiliary to procedural injunctions; they are occasioned by them and not by any intention.

It is true that commands such as these are to be found in the Veda: ‘Agnīd, draw off the fires, spread the strew, make ready the sacrificial cake.’* But they do not imply any person with intention commanding. It is *niyoga* that prompts one to perform a principal rite with all its auxiliaries. A procedural injunction is subsidiary to it. And so, the operations of this nature that are observed in the Veda do not imply any human intention or command.

[505 b-506 a]

प्रैषादिभ्यो यथैवेयं भिन्ना कर्तव्यतेक्ष्यते ॥ ५०५ ॥

शब्दशक्तिवशात्तद्वत्क्रियादेरपि वीक्ष्यताम् ।

“Just as the obligatoriness is seen to be different from direction, etc., because of the nature of the potency of the word, even so it should be understood to be different from action, etc.

Even as command, etc., are not the meaning of *liñ*, etc., action, etc., are not their meaning. These latter also, like the former, are different from *niyoga*. And, it has already been shown that *niyoga* is the constant connotation of *liñ*, etc.

* *The Veda of the Black Yajus School entitled Taittirīya Saṃhitā* (Part II translated by A. B. Keith, Harvard Oriental Series, (Cambridge), Massachusetts, 1914), Vol. 19, p. 514.

[506 b-507 a]

नानिष्पन्नस्वभावोऽपि भावः कर्तव्यता यतः ॥ ५०६ ॥

लडादिश्रवणात्तस्यां अप्रतीतिर्लिङादिवत् ।

“Though the stem-sense (*i.e.* action) is of the nature of what-is-to-be-accomplished, as is obligatoriness, it is not (identical therewith); for that (the latter) is not expressed in *laṭ*, etc., (*pacati*, present tense, etc.), as it is expressed in *liṅ*, etc.

It may be asked : Since both action (*kriyā*) and *niyoga* are what are to be accomplished, and since there is no *niyoga* over and above action, why should not action be regarded as the sense of *liṅ*, etc. ?

It is replied thus : Activity is not the same as obligatoriness (*niyoga*), although it too is what-is-to-be-accomplished. Therefore, the two are not identical. For example, when one hears the word ‘*pacati*’ (he cooks), one does not cognize obligatoriness, although that word denotes action ; it is only on hearing *liṅ*, etc., that there is the cognition of obligatoriness.

[507 b-508 a]

ननु कालोपबन्धोऽत्र कार्यबुद्धिविघातकृत् ॥ ५०७ ॥

नैतत्संदेह एवात्र विवेकाभावतस्तत्र ।

“‘Now, here (in *pacati*, etc.) what impedes the cognition of obligatoriness is the obstruction in the form of (present) tense’. No ; this doubt of yours, here, is due to lack of discrimination.

It cannot be said that in the case of *pacati* there is no cognition of obligatoriness because of the obstruction caused by the ending which is in the present tense (*laṭ*) ; for there is no conclusive argument for such a view.

[508 b-509 a]

कालोपबन्धः किंत्वत्र कार्यबुद्धिविधातकृत् ॥ ५०८ ॥

किं भावात्कार्यता भिन्ना लडादिर्या न भाषते ।

“(The doubt is :) Is it the obstruction in the form of (present) tense that impedes the cognition of obligatoriness, or is obligatoriness different from the stem-sense because it is not expressed by *laṭ*, etc.?”

The doubt is there, in the case of *pacati*, etc., whether the non-cognition of obligatoriness is due to the use of present tense, or to the fact that *laṭ*, etc., which are not expressive of obligatoriness, are different from the stem-sense which expresses activity.

[509 b-510 a]

कर्तव्यः कट इत्यादावव्यापारेऽपि कार्यता ॥ ५०९ ॥

वीक्ष्यतेऽतः पृथग्भावात्फलाच्च प्राक्प्रतीतितः ।

“In ‘The mat is to be made’, etc., even though there is no operation, there is seen obligatoriness; so there is difference (between the two); from fruit too (obligatoriness is different), because it is seen earlier.

In statements such as ‘The mat is to be made’, ‘The village is to be gone to’ the *tavya* suffix does not express an activity; yet there is cognition of obligatoriness. So, the stem-sense which is activity and the sense of the suffix which is *niyoga* are different.

The fruit (*phala*) also cannot be the sense of *lin*, etc.; for it is different from *niyoga*, and in the case of ‘Go to the village,’ etc., even before the appearance of the fruit, there is the cognition of obligatoriness.

[510 b-511 a]

ननु कर्मणि कृत्योऽयं तयोरेवेति शासनात् ॥ ५१० ॥

मैवं प्रैषादिवद्यस्मादुपाधित्वादवाच्यता ।

“‘Now, this *kr̥tya*-suffix denotes an object, as taught in (the *sūtra*) “*tayor eva*” (Pāṇini, III, iv, 70).’ Not so; just like direction, etc., this (action) also is an adjunct, and is not the express sense.

The cognition of *niyoga* from the suffix *kartavyaḥ* (is-to-be-made) may be objected to thus: Pāṇini in his *Aṣṭādhyāyī*, III, iv, 70 (*tayor eva kr̥tyaktakhalārthāḥ*) says that the *kr̥tya* suffix has only the sense of an action (*bhāva*) or of an object (*karma*). So, it cannot have the sense of an imperative (*kārya* or *niyoga*).

The reply is as follows: Just as direction, etc. (*praiṣā*), may condition the sense of the imperative or optative suffix, as an adjunct, so also action and object may figuratively condition the meaning of the *kr̥tya*-suffix because they are the adjuncts of the *niyoga* which is the sense of the suffix.

NTV—*yathā praiṣādayo na liṅādy-arthāḥ, apitu liṅādy-arthopādhayaḥ, bhāva-karmaṇī api na kr̥tyānām arthau, kiṃtu kr̥tyārthopādhi iti pariharati maivam iti.*

AVS—*ayam arthaḥ-yathā praiṣādeḥ pratyayārthopādhitvāt pratyayārthopacāraḥ, evaṃ bhāvakarmaṇor api.*

[511 b-512 a]

प्रषौदिष्वपि कृत्यानां तथा च स्मरणं मुनेः ॥ ५११ ॥

कृत्यानां युक्तितोऽपि स्यान्नैव कर्माभिधायिता ।

“Hence it is that the sage (Pāṇini) lays down *kr̥tya*-suffixes in the case of direction, etc., also; so, even

through reasoning there is not for *kṛtya*-suffixes denotativeness in respect of object.

The case of direction (*praiṣā*) cited above is quite appropriate, because Pāṇini says (III, iii, 163 : *praiṣātisargaprāptakāleṣu kṛtyāśca*) that the *kṛtya* suffixes are used after verbs in the sense of direction also, as in the senses of impersonal action and object. Therefore, it cannot be said that these suffixes are used *only* in the senses of action and object.

Moreover, it can be shown through reasoning that the *kṛtya*-suffix does not directly denote object.

[512 b-513 a]

यथा कटं करोतीति कर्ममात्रावबोधनम् ॥ ५१२ ॥

कर्तव्यः कट इत्यत्र तथैव स्यान्न चेक्ष्यते ।

“ As in ‘ He makes a mat ’ the object alone is known, there may be the same in ‘ A mat is to be made ’. But it is not so observed.

The reasoning is as follows : In ‘ He makes a mat ’ (*kaṭam karoti*), by the accusative case-ending (*kaṭam*) the objectivity of the mat is made known. Not so in ‘ A mat is to be made ’ (*kaṭaḥ kartavyaḥ*). Here what is conveyed is direction. Hence, the view that the *kṛtya* suffix denotes object and impersonal action alone is not sound.

[513 b-514 a]

कर्तव्यत्वादमीष्टत्वसिद्धौ कर्मार्थलाभतः ॥ ५१३ ॥

साक्षादनभिधानेऽपि न द्वितीया प्रसज्यते ।

“ When the nature of being what is desired is accomplished from the nature of being what is to be

done, the sense of object is achieved (by implication), even though it is not directly expressed; there is no contingency of accusative case.

In the case of transitive verbs when the suffix does not express the object, the accusative case-ending is used, as in *kaṭam karoti*. In *kartavyaḥ kṛtaḥ*, since the *tavya*-suffix is not held to denote the object, should not the noun *kaṭa* take on the accusative case-ending, it may be asked. The answer is: No; because of the fact that the term *kartavyaḥ* implies that the mat is desired to be made, thereby suggesting the objective status of the mat. It is to be noted, therefore, that the accusative case-ending is to be used only where the objective status is altogether unexpressed.

[514 b-515 a]

न चाभीष्टत्वकार्यत्वमभिन्नं व्यतिरेकतः ॥ ५१४ ॥

इच्छेदेष्टव्यमित्येवं तत्रापि प्रत्ययो यतः ।

“ Nor are the nature of being what is desired and the nature of being what is to be done identical, for there is difference in ‘He shall desire’, ‘It should be desired’ ; also, there is difference in sense.

It may be objected thus: You say that *kartavyaḥ* implies that the mat is desired to be made. But, in fact, there is no difference between having to be made (*kartavyaḥ*) and being desired (*eṣṭavyaḥ*).

The reply is: There is a difference between the two. So, it is legitimate to infer *iṣṭatva* (desiredness) from *kāryatva* (the status of having to be made). For example, in *icchet* (one may desire) and *eṣṭavyam* (ought to be desired), the sense of the suffix is different from the stem-sense. Otherwise, there would be infinite regress, as ‘one may desire desire,’ ‘desire ought to be desired’, etc. So, here the meaning would be ‘desire is to be made’, etc.

[515 b-516 a]

तस्मात्कर्तव्यतावेशात्क्रिया वा यदि वा फलम् ॥ ५१५ ॥

कारकं वाऽपि कार्यत्वं लभते न स्वतन्त्रतः ।

“ Therefore, it is as dependent on obligatoriness that action, or fruit, or causative agent attains the status of what is to be done ; not independently.

Obligatoriness is fundamental. The notion that action, etc., are to be done arises only as penetrated by the sense of obligatoriness.

[516 b-517 a]

लोकवन्ननु वेदेऽपि कार्यमात्रं न गम्यते ॥ ५१६ ॥

साधनेहानुबन्धस्य वेदे कार्यस्य बोधनात् ।

“ ‘Now, as in the world, even in the Veda, it is not merely what is obligatory that is taught ; in the Veda, the obligatory as associated with the means in the form of effort is taught.

Here, an objection is raised against the view that *liñ*, etc., denote *kārya* which is other than action, etc.

The objection is : Just as in worldly usage *kārya* is known only as in association with the stem-sense which has been established through other *pramāṇas*, so also in the Veda what is taught is not mere *kārya*, but *kārya* which is related to activity which is the means such as sacrifice, etc., established through other *pramāṇas*.

NTV — yathā loka iṣṭaphala-sāadhanānubandhasyaiva kāryasyā-vabodho na kevalasya, nāpy aniṣṭasāadhanena, taduktam—kiñtu svayaṁ klesarūpaṁ karma yat-kāryatām vrajet, phala-sāadhanatā tatra kāraṇaṁ tena kāryate’ ti.

.....tasmāl loke phalasāadhanatānubandham eva kāryaṁ gamyate, evaṁ vedepi phalasāadhanatānubandha eva kāryāvagama iti.

[517 b-518 a]

ततश्चाऽऽरोग्यकामस्य पथ्यभोजनवाक्यवत् ॥ ५१७ ॥

मानान्तरप्रवेशेन सापेक्षत्वं प्रसज्यते ।

“ ‘Thence results (for the Veda) the nature of being dependent, because, as in the statement prescribing diet for him who desires health, there is dependence on some other means of valid knowledge.

The statement ‘Let him who desires health eat restricted diet’ depends for its sense on other means of valid knowledge. If in Vedic commands also, such as ‘Let him sacrifice,’ the *niyoga* has for its content the relation of end and means which is obtained through other *pramāṇas*, then it would become a dependent.

[518 b-519 a]

अतः प्रैषादितुल्योऽयं क्रियाफलनिबन्धनः ॥ ५१८ ॥

नियोगस्तदसंवादाच्चित्तादौ ते विहन्यते ।

“ ‘Hence, this *niyoga* which is bound up with action and fruit would be equal to direction, etc., and that (the authority of the Veda) in *Citra*, etc., will be destroyed for you, because there would be disparity.’

This dependence on other *pramāṇas* cannot be admitted in the case of sacrifices like the *Citra*. Here, there is no obvious relation between activity and fruitfulness. But *niyoga*, like direction (*praiṣā*), is based on the obviousness of the relation between action and fruit. Hence, *niyoga* cannot be admitted in the case of Vedic sacrifices.

[519 b-520 a]

मैवं मानान्तरावेशाल्लोके प्रैषाद्युपाधिकम् ॥ ५१९ ॥

कार्यं प्रयोजनार्थं च प्रवृत्तिरिति युज्यते ।

“ Not so ; it is intelligible that, in the world, obligatoriness, dependent as it is on other means of valid knowledge, should be conditioned by the adjuncts, such as direction, etc., and that activity should be for the sake of fruit.

The upholder of the doctrine of *kārya* now replies : In the case of worldly sentences it is true that the *kārya* denoted by *lin*, etc., and having direction (*praiṣā*), etc., as adjunct, has as its principal the procedure made known by other *pramāṇas*. Here, the sentences are uttered by human beings, and their purpose is to serve as the cause for bringing about some fruit.

[522 b-523 a]

वेदे तु सकलाक्षादिप्रमाणागोचरत्वतः ॥ ५२२ ॥

साध्यसाधनताज्ञानं नियोगादेव नान्यतः ।

“In the Veda, however, the knowledge of end and means is not gained through any other means of valid knowledge like perception, etc.; it is gained from the *niyoga* alone, not otherwise.

Vedic injunctions are not like secular commands. The *niyoga* here is not the sphere of any other *pramāṇa*; the relation between sacrifice, etc., and heaven, etc., is known solely from the *niyoga*.

NTV—*niyogasya pratyakṣādi-sakala-pramāṇāgocaratvāt.*

AVS—*eṣorthaḥ—vede pratīyamāna-sādhya-sādhana-bhāvasya veda-vyatirikta-sarva-pramāṇāviṣayatvāt vaidika-niyogād eva tat siddhiḥ.*

[523 b-524 a]

तथा ह्यकारकः कामी स्वर्गकामपदार्पितः ॥ ५२३ ॥

नियोगात्कर्मसंबन्धे पश्चाद्यातीह कर्तृताम् ।

“Thus, indeed, the one who desires, as made known by the words ‘He who desires heaven,’ is not a causal agent; when there is relation to an object (known) through the *niyoga*, thereafter one (the desirer) attains the status of being an agent.

In regard to Vedic injunctions, the relation of means and end is not established through any other *pramāṇa*. The *niyoga*, therefore, is

known from the Veda alone. The expression 'He who desires heaven' indicates the *niyojya* and *adhikārin*, and not the agent. Here 'desire' is not a qualification of the agent, but serves only to indicate the *niyojya*.

NKL—*svarga-kāmo yajeta iti pratyayāt pratīta-niyogākāṅkṣayā svarga-kāmo mamāyaṁ niyoga iti niyojyatvena anvīya niyogaviṣaye karaṇe karmaṇy aiśvaryaṁ adhikāraṁ pratipadyata ity arthaḥ..... sāṅge karmaṇi mamāyaṁ niyoga iti niyoga-svāmitvena anvīto niyogaḥ mayā sādhyata iti niyoga-dvāreṇa niyoga-viṣaya-bhāvārthenā 'pi kartṛtvena sambandhata ity arthaḥ.*

[524 b-525 a]

कामस्य च प्रधानत्वात्तत्प्राधान्यानपायतः ॥ ५२४ ॥

पुंविशेषणता तस्माद्भोगी कामी न कारकः ।

“Since desire is the principal, without prejudice to its own importance it may become a qualification of man; therefore, the enjoyer is the desirer, and not the causal agent.

Another reason is given as to why desire is not a qualification of the agent: Desire is the principal, for it has the fruit for its content. Without losing its nature as principal, it becomes the qualification of man. It cannot be the qualification of the agent, for the agent is a subsidiary of action; and if desire were a qualification of the agent it would become a subsidiary of a subsidiary. This will not happen if desire were a qualification of the *adhikārin*, for the *adhikārin* is the master and not a subsidiary.

[525 b-526 a]

अप्रवृत्तप्रवृत्तेश्च कारकत्वं न युज्यते ॥ ५२५ ॥

प्रवृत्तस्य णिचोक्तिः स्यात्पचन्तं पाचयेद्यथा ।

“ Being causal agent is not intelligible in the case of the activity of one who has not been active ; as for one who has been active, there would be the causative form (*nicoktiḥ*) as in ‘ Make him cook, who is cooking.’

The causative suffix *nic* may not be used to indicate the primary action of an agent in the world who can know the relation of what is to be accomplished (*sādhya*) and what can accomplish it (*sādhana*). Such activity is not prompted by *niyoga*. But as regards Vedic actions, one cannot know them through means other than the Veda. So, here, the Veda alone may prompt one to act, having made that one the *niyojya*. Had agency in regard to Vedic action been independent of *niyoga*, and had an agent acting independently been the *niyojya* of the Vedic command, the form of that command would be not *svarga-kāmo yajeta* (Let one desirous of heaven offer sacrifice), but *svarga-kāmo yājayet* (Cause him who desires heaven to offer sacrifice) as in *pācayet* (Cause him to cook) in regard to a man independently starting to cook.

NTV—*kimca loke phala-sādhane pravṛtta eva pravarttate, vaidike tu niyoge apravṛtta eva pravarttate, atopi niyojyatvam eva svargakāminah na kartrtvam.....pacāntaṁ pācayed-itivad yajantaṁ yājayed iti niṁ na śrūyate ity-arthah.*

[526 b-527 a]

अक्रियाकर्तृसंबन्धे ननु षष्ठी प्रसज्जते ॥ ५२६ ॥

नैवं नाम्नोः सदा योगे षष्ठीयं शैषिकी यतः ।

“ ‘ Now, if the relation is not that between the activity and the agent, there is the contingency of the genitive case.’ Not so; for, the residual genitive is laid down exclusively for the relation between nouns.

If the relation between the agent and act is given up in favour of that between seeker after heaven (*adhikārin*) and act, should there not be the genitive case used in the text thus: *svarga-kāmasya yajeta?*

No; for the genitive case can come in only when the relata are nouns (e. g. *rājñah puruṣaḥ*, the king's man), and not when one of the relata is a verb.

AVS—nanu kāmī karṣṭvā na sambadhyate svāmitvena sambadhyate cet, devadattasya vastram itivat svarga-kāmasya niyoga iti śaṣṭhī prāpnotīty āha.

[527 b-528 a]

क्रियाकारकयोगे च द्वितीयादिर्लडादि तु ॥ ५२७ ॥

स्यात्प्रातिपदिकार्थस्य भावार्थनेत्यसंकरः ।

“ The other cases like the accusative, etc., are used to express the relation between the act and the accessories thereof. And, the tenses like the present, etc., are used to express the meaning of the noun-stem and that of the root. Thus there is no confusion.

The accusative case, etc., are used to indicate the relation between verb and accessories—*kārakas* like agent, object, etc., (e. g. *vrkṣaḥ tiṣṭhati*, *taṁ paśyet*; the tree stands, look at it). Verbal suffixes are used to indicate the relation of verbs to nouns (e. g. *pācakaḥ pacati*, the cook cooks).

[528 b-529 a]

नीलोत्पले तु नामार्थावपहाय परस्परम् ॥ ५२८ ॥

भेदमेकात्मतां याताविति षष्ठी न संमता ।

“The words ‘blue’ and ‘lily’ though having the meaning of nouns, have attained identity by giving up their mutual difference; so, in their case the genitive case is not accepted.

It was stated in v. 526 b-527 a that the genitive case applies only when the relata are nouns. As against this observation, it may be asked why in the case of the ‘blue lily’ the genitive case is not used. The reply is: In such cases, the genitive case is ruled out because the denotations of the two component names have become one. The genitive case is possible only where there is difference, and not where there is identity of locus.

[529 b-530 a]

लिङ्गर्थे युज्यमानस्य कर्मत्वं न च कामिनः ॥ ५२९ ॥

अक्रियात्वान्नियोगस्य द्वितीया चेद्भवेत्तथा ।

“The desirer who is prompted by the use of the potential mood (the sense of *liṅ*) is not the object of the verb; because the *niyoga* is not action; if it were so, then the accusative case would be used.

Objection—Even though the genitive case is not possible, can we not use the accusative case and say *svargakāmaṁ yajeta*, as we say *grāmaṁ gacchati* (he goes to the village)?

Reply—No; for, the heaven-seeker is not an object, and the *niyoga* is not an act, but what is brought about by action.

[530 b-531 a]

तस्मादकारकः कामी स्वनियोगप्रसिद्धये ॥ ५३० ॥

नियुज्यमान एवेह विषयं साध्यमीक्षते ।

“Therefore, the desirer who is not a causal agent, only as being prompted in order that the *niyoga* relating to him may be established, perceives the object which has to be accomplished.

Thus, the *svarga-kāma* (heaven-seeker) is, first, related to *niyoga* as the one prompted by it. At that time, he has no sense of agency. He only recognizes his eligibility. And then, he comes to look about for the object of action, its instruments, etc.

[531 b-532 a]

राजादिषु प्रसिद्धश्च नियोगः साध्यगोचरः ॥ ५३१ ॥

भावार्थस्य च साध्यत्वमिति तेनापि युज्यते ।

“It is well known that in the case of kings, etc., the *niyoga* has what is to be accomplished for its sphere; and the stem-sense (action) is what is to be accomplished; thus he (the desirer of release) is related to that (the stem-sense) also.

Objection—There is no rule that the content of *niyoga* should be what-is-to-be-accomplished (*sādhya*). In the text, ‘For him who desires efficient sense-organs, one should offer curds,’ curds, which constitute what-are-already-established (*siddha*), are seen to be the content of *niyoga*.

Reply—The content of *niyoga* must always be what-is-to-be-accomplished. Curds, etc., get related only as auxiliaries of what-is-

to-be-accomplished. What-is-to-be-accomplished is always of the nature of activity, in the first instance. After having been, first, related to *niyoga*, the *svarga-kāma* gets related, next, to action. Without the action that perishes soon and which is the stem-sense (*dhātvartha*), *niyoga* cannot lead to the desired goal; and that cannot come about without the stem-sense; and also without itself coming into being, it cannot lead to heaven.

NTV—modakaṁ bhakṣayed iti hi niyogaḥ; na ākāśaṁ bhakṣayed iti tat kasya hetoḥ? modaka-bhakṣaṇasya sādhyatvāt.

[532 b-533 a]

अविवाक्षितमप्येवं लिङ्गसंख्यं विवक्ष्यते ॥ ५३२ ॥

पश्चाद्विषयसिद्धयर्थं कारकादि च यच्छ्रुतम् ।

“Though the gender and number are not (apparently) intended, they, in fact, are; later, causal agents, etc., are declared (in Scripture) in order that the object may be accomplished.

Although gender and number in the expression ‘*svarga-kāma*’ are not of the essence of the injunction (*svarga-kāmo yajeta*), both must be treated as significant as they find a place in the injunction.

There are such texts as the following: ‘On being initiated, he sacrifices the *animal* dedicated to Agni and Soma’ (*Taittirīya-saṁhitā*, V, i, 11, 6). ‘He yokes the *two* bulls.’ ‘To the Spring, he sacrifices the partridges’ (*Śatapatha-brāhmaṇa*, I, v, 1, 13). Here the question is whether the *number* (one, two, many) has any bearing on the sacrifice. The opponent of the Pūrva-mīmāṃsā says that it has no bearing because it is only an auxiliary to the object (in the texts quoted, to the animal, to the two bulls, and to the partridges). (*PM*, IV, i. 11.)

The Mīmāṃsaka replies to this by saying that the *number* has a bearing. On hearing the sentence 'Bring the animal,' one brings *one* animal; and on hearing the sentence 'Bring the animals,' one brings *several* animals. This only means that *number* is taken into account. Hence, in the case of the text 'He sacrifices the animal' (*paśum ālabheta*), what is understood from the words is the *sacrificing* (denoted by the verb 'ālabheta') as qualified by the two qualifying adjuncts (the *animal* denoted by the noun 'paśu' and the *number* 'one' as denoted by the singular case-ending in 'paśum'). Thus, it follows that *number* has a bearing on the sacrifice. (PM, IV, i, 15.) What is true of *number* is true of *gender* also. For example, there is the text: 'In spring, he sacrifices, in the morning, the black-necked animal (*kṛṣṇa-grīvām*) dedicated to Agni; in summer, he sacrifices, at noon, the lioness (*simhīm*) dedicated to Indra; in autumn, he sacrifices, in the afternoon, the white animal (*śvetām*) dedicated to Brhaspati' (*Taittirīya-saṁhitā*, II, i, 2, 5). Then follow the words 'These animals are pregnant' (*garbhīṇyo bhavanti*). It is clear, here, that what are meant in the text are *female* animals. (PM, IV, i, 17.)

In the expression *svarga-kāma*, therefore, *number* and *gender* are indicated. So also are the fruit, etc., indicated in the injunction. For, without these performance of sacrifice is not possible.

It cannot be said that if the fruit, etc., are also intended besides *niyoga*, there would be sentence-split; for, although the *niyoga* is the primary significance of the injunction, the other factors also come in, being related to *niyoga*.

[533 b-534 a]

ततश्च स्वर्गकामो यः स्वनियोगं स साधयेत् ॥ ५३३ ॥
केन यागादिनिर्वृत्येत्येतच्छास्त्रात्प्रतीयते ।

"Therefore, he alone who desires heaven should accomplish his *niyoga*. How? By the performance of sacrifice, etc. This is understood from Scripture.

So, the meaning of the injunction is that the person (*masculine, singular*) who desires heaven is the *adhikārin*, and that he should accomplish his own *niyoga* through the performance of the Vedic rite.

NTV—svarga-kāmo niyogaṁ bhāvayed ity arthaḥ.

[534 b-535 a]

न चानपनयन्यागः कामिनः स्वर्गकामिताम् ॥ ५३४ ॥

साधनं स्वाधिकारस्य भवतीह कथंचन ।

“Without removing the desire-for-heaven of the person who desires it, by bringing it (heaven) about, the sacrifice cannot be the means to accomplish its *niyoga* (*adhikāra*).

It cannot be said that if sacrifice, etc., are the means to *niyoga* there would be no means to heaven, and if *niyoga* be the means thereto it would cease to be the principal; for, the sacrifice cannot be the means to the *niyoga* if it does not fulfil the desire of the seeker after heaven by leading him to heaven, and so, the sacrifice generates heaven through *niyoga* and thus removes the desire of the *adhikārin*.

[535 b-536 a]

अनुन्मृदितकामो हि पूर्वावस्थाविशेषतः ॥ ५३५ ॥

निष्पादिताधिकारोऽपि नियोगार्हः पुनर्भवेत् ।

“If the desire has not been removed then even though one has accomplished his *niyoga* (*adhikāra*), his state being not different from the former state, again he would be subjected to *niyoga*.

If the sacrifice does not remove the desire for heaven, then the person would have to strive for *niyoga* again, even though he has acquired *niyoga*. Therefore, it is but proper to hold that the sacrifice gives rise to heaven through *niyoga*, and removes the desire relating thereto in the person.

AVS — yataḥ kāme 'nivr̥tte yāgena niṣpādita-niyogo'pi punar niyogārho bhavet, pūrvāvasthato 'viśiṣṭatvāt.

[536 b-537 a]

अधिकारः स्वसिद्ध्यर्थमतः कामस्य साध्यताम् ॥ ५३६ ॥

यागेनाऽऽपाद्य संसिध्यन्विषयस्यैति साध्यताम् ।

“ Thus *niyoga*, in order to accomplish itself, makes the desired object an end to be accomplished, by sacrifice, and having thus getting itself established, it attains the status of what is to be accomplished in relation to the object.

If the sacrifice generates heaven, and through that removes the desire relating thereto, where is the need, it may be asked, for *niyoga* ?

The sacrifice perishes soon; and heaven is to come hereafter. Therefore, *niyoga* is to be admitted as the link. *Niyoga* cannot accomplish itself if there is no *niyojya*. In order to have a *niyojya*, it makes heaven what-is-to-be-accomplished. And through the performance of the sacrifice by the *niyojya*, it establishes itself. Thus, *niyoga* is the principal; in order that it may have a *niyojya*, it must be helpful to the accomplishment of the fruit (viz. heaven).

[537 b-538 a]

नानन्तरफलाभावे विसंवादोऽत्र शङ्क्यते ॥ ५३७ ॥

क्रियासाध्ये फले स स्याद्विड्यर्थस्त्वक्रियात्मकः ।

“Nor may lack of agreement be feared if there be no immediate fruit; it may be so in the case of a fruit accomplished by action; but the *niyoga* which is the sense of the potential mood (*liṅārtha*) is not action.

Now, it may be said that, as no fruit is seen immediately after the performance of the sacrifice, the text about desire-for-heaven is invalid.

The reply is that the text is not invalid. Even in the case of sacrifices such as the *Citrā*, etc., which are performed for the sake of gaining cattle, etc., no immediate fruit is seen. Yet the texts enjoining them are quite valid. If a fruit were to result from mere action such as eating, then, if after the action there is no result, we may say that the injunction relating to the action is invalid. But, that does not apply in the present case. *Niyoga* is not action but the unseen potency (*apūrvā*); and the fruit that is to be accomplished thereby need not be immediate.

NTV—citrayā yajeta paśukāma iti hi coditam, na tv anantara-paśuphala-sādhanaṭvaṁ coditam ity arthaḥ.

[538 b-539 a]

प्रत्यर्थिनि च शब्देऽस्मिन्नाभावोऽनुपलब्धितः ॥ ५३८ ॥

मानाभावे ह्यसौ मानमानन्तर्यं त्वचोदितम् ।

“When there is the Scriptural statement about the fruit, the absence of that (fruit) cannot be suspected on the ground of non-cognition. This (non-cognition) is evidence only in the absence of (positive) evidence. Immediate sequence, however, is not declared (in Scripture).

Nor may it be said that, as the fruit is not seen immediately after the sacrifice, it must be concluded that there is no fruit on the ground of non-cognition of the competent (*yogyānupalabdhi*); for, there is not here non-cognition of the competent. Scripture declares that there is fruit. The *niyoga* given rise to by sacrifice, etc., should necessarily lead to its fruit. But it is not necessary that the fruit should result immediately. What Scripture teaches is that the fruit comes about surely through *apūrva*.

AVS — anuṣṭhita-sāadhanasya phalānupalabdhir na phalābhāvaṁ sādhayati. ... bhāva-pramāṇābhāve anupalabdhiḥ pramāṇam, śabdas tu bhāva-pramāṇam, ataḥ śabdād idaṁ phalaṁ bhavatīty avagamyate, nānupalabdhyā phalābhāva iti.

[539 b-540 a]

अतः कृताधिकारोऽपि यो विद्यादकृतार्थताम् ॥ ५३९ ॥

तस्य शास्त्रानभिज्ञत्वान्नाधिकारोऽल वैदिके ।

“Therefore, he who, through having accomplished the *adhikāra* (*niyoga*), thinks that he has not achieved his end, has no eligibility for the Vedic rites, for he does not know the Scripture.

A person may perform a sacrifice, and, seeing that no immediate fruit follows, may think that there is no fruit. Such a person, however, has no eligibility at all for Vedic rites. His scepticism can in no way affect the validity of Scripture.

[540 b-541 a]

मन्त्रार्थवादनाम्नां च कार्यार्थानुप्रवेशतः ॥ ५४० ॥

प्रामाण्यं न स्वतस्तस्मात्कार्ये वेदस्य मानता ।

“ *Mantra, arthavāda* and names are valid by being included in those that are for the sake of what-is-to-be-accomplished, and not independently; therefore the Veda is evidence in respect of what-is-to-be-accomplished.

Mantras, arthavādas and names are auxiliaries to *kārya*.

In the *Mantrādhikaraṇa* (PM, I, ii, 31–53), it is established that the *mantras* serve the rites by conveying certain meanings. In the *Arthavādādhikaraṇa*, it is explained that the *arthavāda* texts have no purport independent of *kārya*. Names also have *kārya* for purport. There are names of sacrifices like *Udbhid*, *Abhijit*, *Viśvajit*, etc. These too are for the sake of *kārya*, as they fall within the scope of injunctions. (PM, I, iv, 1.) Thus, it is evident that *all* Veda has *kārya* for purport.

NKL—*anuṣṭheya-smāraakatayā mantrāṇām tat-stāvakatvena arthavādāṇām tat-samjñātvena nāmnām vidhinaikavākyatvāt prāmāṇyam ity arthaḥ.*

[541 b-542 a]

वेदान्तानामतो वाच्यं कार्यार्थानुप्रवेशनम् ॥ ५४१ ॥

प्रामाण्यं वा निषेद्धव्यमत्र प्रतिविधीयते ।

“Therefore, of the Vedāntas, it must be said that they have validity only by being included in the accessories of what-is-to-be-accomplished; or their validity must be rejected.” This view is now refuted.

The Vedānta texts also can be valid only by being accessory to *kārya*. If this view be not admitted, there would be invalidity for those texts.

In this verse, the *pūrvapakṣa* is concluded, and the *siddhāntin* promises to refute it.

NTV—*udbhidā yajete' ty evam-ādi-nāma yasmāt kṛtsnasya vedasya kārye prāmāṇyam, ato vedāntānām api pratipatti-kartavyatā-prāmāṇya-bhājān tan-mukhena tad-anugata-bhūtārthātma-tattva-viśaya-bodhakatvaṁ, atah tepi kārya-niṣṭhatām nātivartata ity āha-vedāntānām iti.*

[542 b-543 a]

निःशेषमातृतद्बृत्तिजन्मनां तद्विलक्षण— ॥ ५४२ ॥

स्वतःसिद्धात्मसंबोधव्याप्तिर्वस्वनुरोधतः ।

In accordance with the nature of reality, there is the pervasion (*vyāpti*) of the cognizer, its modes and their originations *in toto*, by the self-established self-consciousness which is different therefrom.

What is the reason for saying that there would be invalidity for Vedānta texts if they are not considered to be accessory to *kārya*? (1) Is it because the Vedānta texts have no content (*viśaya*)? (2) Or, is it because words have no capacity to convey something already established (*siddhārtha*)?

(1) Not the first; for the witness-self is the content of the Vedāntas. The modifications of the intellect which bear reflections of the self are the cognizers. It is the self that pervades them, while being immutable. It is this that is to be realized through the Vedāntas.

NTV—*ananta-pramāṭṛn tadvṛtti-janmādīnāms ca rāga-dveṣādīms ca sākṣāt paśyantam anubhūti-svarūpam ātmānaṁ konāma nādrīyeta, tad anādarāṇe niḥśeṣa-māṭṛ-tadvṛttinām ananubhava-prasaṅga ity arthah.*

[543 b-544 a]

वियद्वस्तुस्वभावानुरोधादेव न कारकात् ॥ ५४३ ॥

वियत्संपूर्णतोत्पत्तौ कुम्भस्येव दृशा धियाम् ।

Just as a pot when produced is already filled with ether, by virtue of the nature of the ether itself, and not because of any causal agents, even so the intellect (and its psychoses) are pervaded by the consciousness-self.

The ether example is given to show that the self is unchanging even though it pervades the intellect, etc.

[544 b-545 a]

घटदुःखादिरूपत्वं धियां धर्मादिहेतुतः ॥ ५४४ ॥

निर्हेतुत्वात्मसंबोधरूपित्वं वस्तुरूपतः ।

The intellect assumes the form of pot, misery, etc., because of merit, etc.; its assumption of the form of the causeless self-consciousness is because of the nature of the real itself.

It cannot be argued that, if the self could pervade the intellect, etc., without changing, the same must be possible for the intellect too; for, the intellect is of the nature of the inert, and its taking on of the form of the object is caused by *adr̥ṣṭa*; its taking on of the form of consciousness, however, is not caused by *adr̥ṣṭa*; but is on account of the constant pervasion by the unconditioned self.

NTV—jagat-vaicitryavat dhīvṛtti-vaicitryam dharmādi-hetukam eva, anyathā tat-vaicitryānupapatteḥ.

[545 b-546 a]

बुद्धितद्वृत्तिभावोऽयमभावश्चाप्यनन्यमात् ॥ ५४५ ॥

यतः सिद्धायते सोऽर्थो ज्ञेयः सिद्धः स्वतः सदा ।

That reality by which both the existence and non-existence of the intellect and the psychoses are established, should be known as self-established always, as it is self-evident.

The self reveals the existence as well as the non-existence of the intellect and its modes. Hence, it is self-established and self-revealing, requiring no other revealer.

[546 b-547 a]

ननु प्रमाणविरहात्स्वतः सिद्धो यदीष्यते ॥ ५४६ ॥

वचसो बुद्धबोधित्वादप्रामाण्यं प्रसज्यते ।

“ Now, if you believe that the self is self-established because there is no means of valid knowledge, then, the Vedāntic statements would be void of validity, because they would only be making known what has already been known.”

Objection—If the immutable self is self-luminous, of what use are the Vedānta texts?

[547 b-548 a]

मैवमप्रतिपन्नत्वादनुभूत्यैव वस्तुनः ॥ ५४७ ॥

तद्व्युत्पत्तेः पुरा साक्षाद्बोधो व्युत्पत्तिमात्रतः ।

It is not so ; because prior to a knowledge of the meaning of Scripture the reality is not known—and this is

a matter of experience—the direct knowledge thereof results from a knowledge of the meaning of Scripture alone.

Reply—Before the rise of the Vedānta-generated knowledge, everyone experiences ignorance of the form ‘I am ignorant, I do not know myself.’ So, although the self is self-luminous, it remains unknown. It is only through the ‘hearing’ (*śravaṇa*) of the Vedānta texts that it comes to be realized.

NTV—*yady api svatas-siddha-ātmā, tathāpy 'aham ajñō mām anyam ca na jñānīty anubhava-siddhā apratipattiyā apratipannatvād apratipatti-nivartakatvena tatra prāmāṇyam upapadyata ity arthaḥ.*

NKL—*vākya-janitāparokṣa-jñānāt-prāg aham ajñō na jñānīty ātmanopratipannatvasya svānubhavenaiva siddhatvāt ... vedāntānām ajñāna-nivartakāparokṣadhī-janakatvam ayuktam śabdasya parokṣadhī-hetutvād atrāha-sākṣād-iti.*

[548 b-549 a]

बोधाबोधौ यतो दृष्टौ स्वानुभूत्यनुसारतः ॥ ५४८ ॥

दृष्टे चानुपपन्नत्वं किंबलादभिधीयते ।

Since, on the ground of one's own experience, both knowledge and non-knowledge (of the self) are seen, on the strength of what do you maintain the unintelligibility of what is observed?

In regard to the self-luminous self, there are both occasional knowledge and beginningless ignorance. Through reasoning based on constancy and inconstancy and from the experience of the wise ones, one has occasional knowledge of the self. Because of the experience ‘I am ignorant,’ there is beginningless ignorance also.

NTV—*na hi kham kṛṣṇam ity-ādi-drṣṭam anupapannatayā tyajata ity arthaḥ.*

[549 b-550 a]

सुषुप्तादेश्च संसिद्धिर्मात्वादिविरेहेऽपि या ॥ ५४९ ॥

साऽपीहान्तरसंबुद्धमेयमात्रव्यपाश्रयात् ।

The experience (*sphūrṭi*) here (in empirical state) of sleep, etc., even though cognizer, etc., were absent then, is made possible only on the ground of the inner uncognized object.

It may be asked how ignorance which is opposed to knowledge can have knowledge as its basis. In reply, the sleep-experience is adduced. In sleep, there are no cognizer, etc; yet there is experience. Similarly, ignorance is established even though it is opposed to knowledge.

[550 b-551 a]

न चाभावप्रमाणात्सा सति मातर्यभावमा ॥ ५५० ॥

मात्राद्यभावसंसिद्धिः कथं मात्रादिपूर्विका ।

Nor is that through the evidence of non-cognition; non-cognition is possible when there is a cognizer; how can the absence of cognizer, etc., be established when the cognizer, etc., are posited prior to it?

It cannot be said that the *pramāṇa* for sleep is non-cognition (*anupalabdhi*). When a person wakes up, he says, 'I did not know anything in sleep.' This is recollection of an experience. In sleep itself there is no cognizer; and so, no *pramāṇa* can function there. Hence, sleep is established by experience. Similarly, the establishment of ignorance is by experience.

NTV—*ato 'nubhava-siddha-susuptyādi-nivartakatayā vacasām prāmāṇyam apy ādartavyam iti bhāvaḥ.*

[551 b-552 a]

यमप्रमीयमाणानि नानात्मानं प्रमिष्वते ॥ ५५१ ॥

वस्तुवृत्तानुरोधेन कथं तत्वाप्रमा वचः ।

That without knowing which, in accordance with the nature of things, the not-self is not known (through) means of valid knowledge like perception, etc.)—in respect of that, how could the Vedāntic statements be unauthoritative?

That although the inner self is self-luminous, Vedānta is *pramāṇa* therefor, because both knowledge and ignorance are experienced with reference to it, has been stated. Here, an argument *a fortiori* is employed. Even empirical *pramāṇas* such as perception, etc., cannot function without revealing, basically, the self. How much more is this the case in regard to Vedānta whose specific content is the real self?

NTV—pratyakṣādi-pramāṇāni śabdādi-viśaya-bodhanena caritār-thāny apy ātmānamapi pramiṣvate, anyathā anātmānam api na pramiṣvate, kimu vaktavyam vacasas tatra apramāṇam na bhavatīti.

[552 b-553 a]

अमीमांसक इत्युच्चैरमीमांसक इत्यतः ॥ ५५२ ॥

आक्षिपन्ति यदज्ञानात्तच्छान्त्या उत्तरं वचः ।

Because of ignorance (of the self), they (the Mīmāṃsakas) loudly denounce (the Vedāntin) saying, 'He is not an inquirer, not an inquirer'. To silence them, the following reply is given (in the Commentary).

The Pūrvamīmāṃsakas say that the Vedāntin has no competence for inquiry, as he teaches that the purport of the Veda may be with

reference to existent things also. Their view is the result of their ignorance of the true nature of the self. In order to silence them, Śrī Śaṅkara says, 'sarvo 'pī vedah,' etc.

AVS—eṣo 'rthah: amī mām ākṣipanti vedasya siddhavastuni prāmāṇyaṁ bruvan sa ko mīmāṃsakah iti yadyasmād ajñānāt tasmāt tac-chāntyai syāj jñānasya śāntyai uttaram vacaḥ athavā yadyasya prāṇojñānād ākṣipanti tasya prāṇico yadajñānaṁ tac-chāntyai uttaram vacaḥ iti apara-vyākhyā.

[553 b-554 a]

सर्वोऽपि वेद इत्यादि यथोक्तपरिहारकृत् ॥ ५५३ ॥

गुरुराह वचः स्पष्टं दृढन्यायोपबृंहितम् ।

Making the said reply, the Master (*guruḥ*) declared the lucid words, "the entire Veda, etc.," full of sound reasoning.

Here the words of Śaṅkara's *bhāṣya* 'sarvo 'pī vedah' are quoted, and their purport is indicated.

[554 b-555 a]

मानस्वभावमाश्रित्य सर्वोऽपीत्याद्युदीरणम् ॥ ५५४ ॥

काण्डद्वयसमाख्या हि तत्प्रमेयानुरोधतः ।

The statement "the entire, etc.", is in view of the nature of the means of valid knowledge; the declaration regarding the two sections is in view of what are taught in them.

The Veda as such makes known what is unknown. This is true of both the sections of the Veda. And, both of them deal with the supersensuous. But the difference is that, while the *karma-kāṇḍa* is concerned with the *sādhya* (what-is-to-be-accomplished), the *jñāna-kāṇḍa* is about the eternally established reality.

[555 b-556 a]

मानं हि व्यञ्जकं लोके सिद्धे तच्च स्वकारणात् ॥ ५५५ ॥

स्वतः सिद्धेऽथवा नित्यं मेयमात्रं विशिष्यते ।

The function of a means of valid knowledge in the world is to manifest ; it functions in relation to what is established by its cause, as also in relation to what is eternally self-established ; the difference is only as regards the objects known.

The function of *pramāṇa* is to reveal. The *pramāṇa* can reveal only an object that is already there—which object may be a product, or an eternally established reality. *Pramāṇa* thus is only a revealer (*vyañjaka*), and not a producer (*kāraka*) of its own object.

NKL—*svakāraṇāt siddhe ghaṭādaṁ svataḥsiddhe gaganādaṁ tacca bodhakatvam.*

AVS—*svato vā parato vā vidyamānasya mānaṁ bodhakam eva na kārakam.*

[556 b-557 a]

अतः सर्वोऽपि वेदोऽयं प्रमाणत्वैकहेतुतः ॥ ५५६ ॥

प्रकाशनपरो ज्ञेयः सिद्धसाध्यात्मवस्तुनः ।

Therefore, the entire Veda, because it is the same means of valid knowledge throughout, must be understood as making known the established and the to-be-accomplished contents.

Veda which is *pramāṇa* makes known what was unknown. It consists of two sections: *karma* and *jñāna*. So far as their *pramāṇa*-nature is concerned, there is no difference between the two sections. The difference is only as regards their contents: the content of *karma*

is what is to be accomplished; that of *jñāna* is what is already established.

[557 b-558 a]

एकवाक्यत्वतो यद्वा सर्वोऽपीत्यादि भण्यते ॥ ५५७ ॥
पुरुषार्थविसायित्वाद्धेदाधीतिविधेरिति ।

Or, because the injunction to study the Veda culminates in the human end, there is syntactical unity; and so it is stated, “the entire, etc.”

The meaning of the words of the Commentary may be stated differently also. The two sections are related, even as the *Prayāja* texts and the *Darsapūrṇamāsa* texts are. That is, they are related because they lead to the same human goal; only, while *jñāna* is the direct means, *karma* helps indirectly.

NKL — *svādhyāyo 'dhyetavyaḥ, vedaḥ kṛtsno 'dhigantavyaḥ, sarahasyo dvijanmaneti cā 'dhyayana-vidher eka-mokṣa-pramāpaka-vedādhyayana-kartavyatā-bodhakatvāt.*

[558 b-559 a]

निःशेषसुखसंप्राप्तेः सर्वानर्थह्नुतेस्तथा ॥ ५५८ ॥
मुक्तेरर्वाक्पुमर्थोऽन्यो नेह कश्चित्समीक्ष्यते ।

Nothing can here be the human end, which is lower than release which is the attainment of the highest happiness and the destruction of all evil.

It cannot be said that *svarga* (heaven) is the fruit of *karma-kāṇḍa*; for, nothing short of release could be the goal of Scripture. *Svarga* is but a pseudo-fruit.

NKL — *svargāder anityatvena pumarthābhāsatvāt na tatra adhyayana-vidhi-tātparyam.*

AVS — svargāder ādyantavattvena puruṣārthābhāsāt nā tatra adhyayana-vidheḥ paryavasānam ity arthah.

[559 b-560 a]

असिद्धार्थस्य वा सिद्धिरनुभूत्येकमात्रतः ॥ ५५९ ॥

सर्वोऽपीति वचः सिद्धिः सर्वा ह्यात्मैकसंविदः ।

Or, the words 'the entire Veda, etc.', mean that through experience (self) alone is established the non-established (world) (in respect of its existence and manifestation); indeed, all is established only through the one consciousness-self.

This is another meaning: *Veda* is the reality which is consciousness. The existence and manifestation that we attribute to the world are really the essence of the self. But for the self, the world has no status. So, consciousness is all this world; it is that which makes the world-appearance possible. All that which appears is in its root the consciousness which is the self; it is experience (*anubhava*) which is called the *Veda*.

AVS — asiddhārthasya jada-prapañcasya siddhir anubhūtyaika-mātrataḥ anvaya-vyatirekābhāva-parihāreṇa anubhava-mātre antarbhāvo yathā tathā siddhiḥ sattopalabdhir ity arthah.

[560 b-561 a]

यद्वाऽनवगतोऽतोऽन्यः संभाव्यो नाऽऽत्मनस्ततः ॥ ५६० ॥

सर्वोऽपीति वचः प्राह तथा चोर्ध्वं प्रवक्ष्यते ।

Or else, because nothing other than the self is unknown, it is stated 'the entire Veda, etc.' This will be explained later on.

A yet different meaning is here given. What is to be known is the self alone. The not-self cannot be the content of knowledge, for its very nature is nescience. Thus, in respect of the self alone is the entire Veda *pramāṇa*.

NTV—*sarvopi jaḍa-vargo yathoktānubhūtir eye 'tyarthah.*

NKL—*jaḍasya ajñāna-kāryasya ajñātatvāyogād ātmana eva tat sambhavād anubhava eva sarvo veda-rāṣiḥ pramāṇam ity ucyate.*

[561 b-562 a]

यद्धेतुकं प्रमाणत्वं वेदान्तानां समर्थ्यते ॥ ५६१ ॥

तेनैव हेतुना कर्मकाण्डस्यापि प्रमाणाता ।

The ground on which the validity of the Vedāntas is established is no other than the ground on which there is validity for the ritual section.

The reason for regarding the two sections as *pramāṇa* is the same, viz. that they make known what is unknown (*ajñāta-jñāpakatva*).

[562 b-563 a]

वेदान्तानाममानत्वं येन वा हेतुनोच्यते ॥ ५६२ ॥

तेनैव हेतुना कर्मकाण्डस्यापि प्रसज्यते ।

The ground on which the Vedāntas are stated to be non-authoritative—the same ground occasions the non-authoritativeness of the ritual section also.

If *jñāna-kāṇḍa* be invalid, then *karma-kāṇḍa* too would be invalid.

NKL—*dr̥ṣṭo hi tasyārthah karmāvabodhanam iti sābara-bhāṣya-virodhād vedāntānām na svārthe pramāṇam ity āśaṅkya, śāṅkara-bhāṣya-virodhāt karma-kāṇḍasya na svārthe mānatvam.*

[563 b-564 a]

अपि सर्वप्रमाणानि स्वप्रमेयामिसंगतेः ॥ ५६३ ॥

प्रमामेवेह कुर्वन्ति प्रामाण्यं यान्ति नान्यथा ।

And, all means of knowledge attain validity only by engendering valid knowledge through contact with the objects of knowledge, not otherwise.

The Vedāntas are *pramāṇa* in respect of their content, since they make known what is unknown, like perception. All *pramāṇas*, perception, etc., become valid by making known their respective contents. *Pramāṇa* is that which generates a cognition that is fruitful, determinate, and unsublated. This definition fits in with reference to the Vedāntas also.

NKL—*pratyakṣādīny api pramāṇṁ kurvanty eva santi prāmāṇyam yānti, anavagatārthādhiḡgantrtvena prāmāṇyam.*

[564 b-565 a]

विधिनैवैकवाक्यत्वं यतो मन्तार्थवादयोः ॥ ५६४ ॥

ततो दर्शननिष्ठत्वं न तयोरुपपद्यते ।

As *mantras* and *arthavādas* have syntactical unity with injunctions, it is intelligible that they do not generate valid knowledge.

It cannot be said that since the Vedāntas are non-injunctive texts, like *mantras* and *arthavādas*, they are not *pramāṇa*. In the case of *mantras* and *arthavādas*, it is intelligible that they are not *pramāṇa*, because they have no fruit of their own. The case of the Vedāntas is not so.

NTV—*vedānta-vākyānām brahma veda brahmaiva bhavati ityādi-phalavatām na vidhinaika-vākyatvam api tu vidhivākyānām svārtheniratiśaya-puruṣārthābhāvāt adhyayana-vidhi-balena vedāntaika-vākyatvam upapadyate.*

[565 b-566 a]

अर्थवादोक्तितो याऽपि प्रतिष्ठाकामिकल्पना ॥ ५६५ ॥

विध्यर्थसंगतावेव साऽपि नैव ततोऽन्यतः ।

The statement of the *arthavāda* by virtue of which (eligibility) of the one who desires reputation (as the reward) is assumed—that too becomes valid only as related to the sense of an injunction, not otherwise.

It may be objected that in the case of the *arthavāda* text, ‘Those who have recourse to those sacrifices become famous’ (*pratitiṣṭhanti ha vā ete ya etā upayanti*), there is the mention of fruit. [See *PM*, IV, iii, 17–18.] In reply we say that here the eligibility is assigned, not to the *svarga-kāma* (one who desires heaven), but to the *pratiṣṭhā-kāma* (one who desires fame), because this eulogistic text is associated with the injunction about the *Rātri-satra* sacrifice. This procedure is, however, not to be followed in the case of other texts such as the *mantras*, etc.

[566 b-567 a]

विध्यर्थशेषभावश्च ततश्चार्थान्तरोक्तिता ॥ ५६६ ॥

ऐकार्थ्याद्वचसोऽशक्या विरुद्धद्वयर्थकल्पना ।

Because a sentence has a single meaning, it is not possible to assume for it two opposed meanings, viz. that it is auxiliary to the sense of the injunction and that it has a different sense.

It is not proper to assume two purports of equal strength for a single text. The supreme purport (*mahā-tātparya*) of an *arthavāda* is that it is auxiliary to an injunction. It is only through this that the *arthavāda* has an intermediary purport (*avāntara-tātparya*) in regard to its own sense.

[567 b-568 a]

विरोधे गुणवादः स्यादनुवादोऽवधारिते ॥ ५६७ ॥

भूतार्थवादस्तद्धानादर्थवादस्त्रिधा मतः ।

Arthavāda is thought to be of three kinds: when there is contradiction, it is a case of figurative statement; if it relates to what has been determined, it is a re-statement; if it is neither, it is *bhūtārthavāda*.

Arthavāda is of three types: (1) *guṇa-vāda*, e. g., 'The sun, verily, is the sacrificial post' (*ādityo vai yūpaḥ*); (2) *anuvāda*, e. g., 'Fire is the medicine for snow' (*agnir himasya bheṣajam*); and (3) *bhūtārthavāda*, e. g., 'He who has the *Vajra*-weapon in his hand is Indra' (*vajra-hastaḥ purandharaḥ*). *Guṇa-vāda* states something which is in conflict with what is established through another *pramāṇa*; hence, the statement is figurative. *Anuvāda* is re-statement of what is established through another *pramāṇa*. *Bhūtārthavāda* relates to a matter which is neither established nor not-established through another *pramāṇa*.

[568 b-569 a]

विधिशेषोऽपि यद्यर्थमर्थवादः समर्पयेत् ॥ ५६८ ॥

अद्वैतविधिनाऽऽक्षिप्ता वेदान्ता नेति का मितिः ।

If even *arthavāda* which is auxiliary to injunction may convey its own meaning, what is there to show that the Vedānta texts which are brought in by the cognition

of non-duality are not authoritative (in respect of what is already established)?

It is admitted that the *arthavāda* texts have an intermediary purport, and so are authoritative. If this be so, why should not the Vedānta texts be authoritative? Surely, they are not void of meaning.

[569 b-570 a]

प्रत्यक्षाद्यभिधानेन सर्वमानोपलक्षणम् ॥ ५६९ ॥

मान्तरं नाऽऽगमादन्यद्यदैकात्म्यावबोधकृत् ।

The words 'perception, etc.', are indicative of all means of valid knowledge; for, other than Scripture there is no means of knowledge which makes known the unity of the self.

Here, the reference is to the words of the *Bhāṣya* which say that the Veda teaches the means to the ultimate goal which does not fall within the sphere of *pramāṇas* like perception and inference. To the category of these two *pramāṇas* belong the others also, such as comparison, etc.

AVS—āgamād anyasya pramāṇasya na gocaro brahma ity arthah.

[570 b-571 a]

सिद्धेऽनवगते यस्मात्पुरस्ताद्व्यापृतिर्मितेः ॥ ५७० ॥

मानादज्ञाततासिद्धौ स्यादन्योन्यसमाश्रयः ।

And, the function of a means of valid knowledge is there (only) in regard to what is already established and unknown; if unknownness is established through a means of valid knowlege, there would be mutual dependence.

Perception, etc., have only empirical validity; they cannot serve as guides to the supreme truth. In fact, the definition of *pramāṇa* does not fit in at all in the case of perception, etc. *Pramāṇa* can function only in the case of an unknown object that is already established. If perception, etc., were to be regarded as *pramāṇa*, it must be known that their object is unknown before they start functioning. But, can this unknownness be known? Is it through *pramāṇa* or through *anubhava* (experience)? If the former, then there is mutual dependence as between *pramāṇa* and unknownness. Nor can the latter be the case, for that is not acceptable. Experience can establish only what is other than it, and what is superimposed thereon. The inert object and its unknownness, then, would be of the nature of the superimposed, like the rope-snake. If such stuff be the content of perception, etc., then perception, etc., cannot be considered to be true *pramāṇas*.

NTV — jadasya ajñātatvaṁ na māna-siddhaṁ, nāpy anubhava-siddham anaṅgīkaraṇāt.

NKL—prameye 'navagate, prāgevāvagatēḥ pramāṇaṁ pravartate, ataś ca pramāṇa-pravṛttau ajñāta-pramitiḥ tat-pramitau pramāṇa-pravṛttir iti itaretarāśrayāt na tattvāvedana-pramāṇatvaṁ pratyakṣādeḥ.

[571 b-572 a]

तत्त्वमस्यादिवाक्यस्य विरोधोऽतो न केनचित् ॥ ५७१ ॥

सर्वाश्रयत्वात्संवित्तेस्तथाऽऽत्मन्यप्रवृत्तिः ।

Therefore, there is no conflict of the text 'That thou art', etc., with anything, because consciousness (*saṁvit*) is the locus of all, and (perception, etc.) do not function in respect of the self.

Perception, etc., have no conflict with Vedānta. Experience is the basis even of perception, etc. And, as experience (viz., the self) is the content of Vedānta, Vedānta cannot be opposed to perception,

etc. The basic *pramāṇa* is Vedānta; what are superimposed thereon, perception, etc., cannot sublate it.

Moreover, perception, etc., reveal things that are coloured, etc. As the self is devoid of colour, etc., perception, etc., cannot be *pramāṇas* in respect thereto.

NTV — *pratyakṣāder anumānatvāt tattvamasyādi-vākyasya na kenāpi-pramāṇena viśaṁvāda iti ... na pratyakṣādi svāśrayaṁ bodhayati bādhate vā, itopi pratyakṣādi-saṁvāda-viśaṁvādābhyāṁ na tattvamādi-vākyasya aprāmāṇyam.*

NKL—*anubhavasya sakala-pramāṇa-viśayādhiṣṭhānatvād āgamasya anubhava-viśayatvāt, pratyakṣāder anātma-viśayatvena bhinna-viśayatvāc ca no virodhaḥ.*

[572 b-573 a]

कृत्स्नेष्टार्थस्य संप्राप्तिः कृत्स्नानर्थह्नुतिस्तथा ॥ ५७२ ॥

आत्मस्वरूपान्नान्यत्र संभाव्या सा हि मानतः ।

The attainment of the entire desired end and the destruction of the entire evil are possible through self-nature, not through anything else; and that (the attainment of the self) indeed is through means of valid knowledge.

Self-realization is the supreme goal. That is accomplished through Vedānta. So, Vedānta is pre-eminently fruitful. There is nothing to be attained after the self is attained; there is nothing to be avoided either.

[573 b-574 a]

इत्येवमादिभाष्यार्थः क्रमेणैकात्म्यवस्तुनि ॥ ५७३ ॥

यत्नेन वक्ष्यते न्यायात्पूर्वपक्षनिरासतः ।

The meaning of (the words) 'this and other statements' of the Commentary as relating to the one self, will be explained logically in sequence, through a refutation of the *prima facie* views.

The thesis set forth above will be strengthened through a refutation of the *prima facie* views in the *Bhāṣya*.

[574 b-575 a]

वेदान्तवचसां स्वार्थे प्रामाण्यं न विहन्यते ॥ ५७४ ॥

मानलक्षणसद्भावाज्ज्योतिष्टोमादिवाक्यवत् ।

The authority of the Vedānta-texts in respect of their own sense is not destroyed, for they bear the characteristic of being a means of valid knowledge, like the *Jyotiṣṭoma* text.

The Vedānta texts are valid because their content, the self, is not the content of any other *pramāṇa*; and they reveal what is unknown otherwise.

NKL — *vedāntaḥ svārthe pramāṇam tatra phalavad-vedatvāt jyotiṣṭomena yajeteti-vākyaavat.*

[575 b-576 a]

नवै कार्यैकनिष्ठानि व्यवहारे वचांसि हि ॥ ५७५ ॥

नियमेन प्रयुज्यन्त इत्यत्र मितिरस्ति ते ।

There is no evidence for you to show that as a rule in empirical usage words are used only with reference to what is to be accomplished.

It cannot be said that the Vedānta texts are not purportful because they do not relate to *kārya*; for, there is no rule that words should be construed only with *kārya*.

NTV—na hi kāryaika-niṣṭhāny eva loke vacāmsī 'ti niyame pramāṇam asti, siddhaparāṇām api vākyānām prayoga-darśanāt.

[576 b-577 a]

दिष्ट्या त्वं वर्धसे भद्र जातः पुत्रस्तवर्धिमान् ॥ ५७६ ॥
इति नेदं प्रवृत्त्यर्थं वचो नापि निवृत्तये ।

‘You are happy, my friend, by God’s grace! A son is born to you, who will be prosperous.’ This sentence is neither for the sake of activity nor for the sake of avoiding activity.

In the statement about the birth of a son, there is no mention of any act to be done ; and yet the statement is meaningful.

[577 b-578 a]

सुखाद्युत्पत्तिहेतूनि दृश्यन्तेऽकार्यवन्त्यपि ॥ ५७७ ॥
वचनानि ब्रज ग्राममित्यादीनि यथा तथा ।

Statements which do not imply what is to be accomplished are seen to produce happiness, even as the statement ‘Go to the village’.

As injunctive statements are fruitful, so are non-injunctive statements.

[578 b-579 a]

सुख्येधीति न चानेन प्रवृत्तिरुपदिश्यते ॥ ५७८ ॥
सुखीभवनमस्यार्थान्नोपदेशव्यपेक्षया ।

By the statement ‘Be happy,’ no activity is enjoined. His (the father’s) becoming happy follows from the sense of the statement, and not because of any command.

It cannot be maintained that in the statement about the birth of a son there is an implicit injunction of the form 'Be happy.' The father becomes happy not because of any injunction, but because of the news conveyed by the statement.

[579 b-580 a]

विशेषोऽस्ति प्रवृत्तेश्चेत्तात्पर्यं वचसोऽपि च ॥ ५७९ ॥

नैवं सुखादिसंभूतावर्थवत्त्वोपपत्तिः ।

“There is special activity (in the form of *jātakarmā*, etc.) from the purport of the statement.” If this be said, no; for, by the occasioning of happiness, etc., the statement becomes purportful; and this stands to reason.

It may be pointed out that the statement about the birth of a son is related to activity in the sense that the father begins to arrange for performing *jātakarmā*, etc.

But this is irrelevant. The statement becomes purportful by generating happiness in the father. It is not directly connected with the performance of birth-rites, etc.

[580 b-581 a]

आनर्थक्यभयादेव श्रुतादन्यत्र कल्प्यते ॥ ५८० ॥

तात्पर्यं प्रोक्षणाद्युक्तेर्न स्वतन्त्रेऽधिकारवत् ।

It is because of the fear of futility that in the case of the text about sprinkling, etc., a purport other than what is declared is assumed; this is not the case as regards a text which is independent like the text about eligibility.

It may be said that the text 'That thou art' has no purport of its own, like the text about sprinkling. In the context of the *Darsa-pūrṇamāsa* there is the text: 'One threshes the corn with pestle and mortar that have been besprinkled; one pounds it with the pounding slab and stone that have been besprinkled.' The question here is whether the 'sprinkling' is prompted by the *threshing* and the *pounding*, or by the transcendental potency (*apūrva*). It is decided in *Mīmāṃsā* that the sprinkling is connected with the *apūrva*, because it is undertaken for the sake of gaining the objective (*apūrva*) of the primary act which is the sacrifice. (*PM*, IX, i, 2-3). If 'sprinkling' is construed with the *threshing* and the *pounding*, it is without fruit; it is only when it is construed with the *apūrva* that it becomes fruitful.

Siddhānta—There is no parity between the Vedānta text 'That thou art' and the text about sprinkling. The Vedānta text is fruitful in its own sense, and is not prompted by anything else.

Nor is the knowledge generated by the Vedānta text 'That thou art' on a par with the subsidiary acts such as threshing and pounding. These subsidiary acts are prompted by *apūrva*, and are to be construed therewith, not directly but through the act of purification. Not so is Vedānta-knowledge, since it leads to its fruit independently. The Vedānta text, therefore, is a primary text, even as the text 'He who desires heaven should sacrifice' is. (See *PM*, II, i, 6, 9-10).

[581 b-582 a]

किंचोपायेऽप्रवृत्तः सन्पुरुषोऽयं प्रवर्त्यते ॥ ५८१ ॥

ज्ञातोपायत्वतो यद्वा विधिनोपेयसिद्धये ।

Moreover, does this (statement about the birth of a son) prompt the man to activity, as he is not active in respect of the means, or does it prompt him, who has understood the means, in order that the object may be achieved through the injunction?

It cannot be said that, like the text of eligibility for heaven, the Vedānta text should be injunctive; for, it is non-injunctive like the news about the birth of a son. The statement regarding the birth of a son is not an injunction, even if it includes the words 'Be happy'. If it be an injunction, then the hearer (the father), on hearing it, should be active either in respect of the means which is the birth of a son, or in respect of achieving the end (viz. happiness).

[582 b-583 a]

तत्वेह तावन्नोपाये पुत्रजन्मादिलक्षणे ॥ ५८२ ॥

तस्य निष्पन्नरूपत्वान्नाप्युपेये सुखे तथा ।

Of these here, there is no (activity) in respect of the means, of the nature of the birth of the son, etc., for that is already accomplished; nor in respect of the object, viz. happiness, for the same reason.

Neither of the alternatives mentioned above is possible. The son is already born; and so there is no need for activity in respect thereof. Happiness results from hearing the news, and not from any further activity.

NTV—natāvat upāye putrajanmani tasya niṣpannatvāt, nopēye sukhe tadartha-vyāpārāntarābhāvāt.

[583 b-584 a]

न व्यापारान्तरं यस्मात्सुखार्थं किञ्चिदीक्ष्यते ॥ ५८३ ॥

पुत्रजन्मोक्तिमात्रेण पुरुषार्थवसानतः ।

For the sake of happiness no other operation is required; because the mere statement about the birth of a son culminates in the human end.

The father is happy just on knowing the meaning of the statement he hears; he does not engage himself in any activity for becoming happy.

[584 b-585 a]

किंचाध्यस्ताहिदृष्टस्य तद्विषव्यासचेतसः ॥ ५८४ ॥

स्रगियं न फणीत्युक्ते दृष्टा विषनिराक्रिया ।

Moreover, in the case of a man who has been bitten by an illusory snake and whose imagination is full of the poison thereof, it is seen that the poison is removed when he is told that it is a garland and not a snake.

Another example is given for showing that there is no rule that a statement should prompt activity. This example relates to the removal of misery.

[585 b-586 a]

मा भैषीरिति चोक्तेऽपि न नियोगः प्रतीयते ॥ ५८५ ॥

स्रगुक्तेरेव निःशेषसाध्वसध्वंसलाभतः ।

Even if it be stated 'Be not afraid', there is not seen a *niyoga*; for the mere mention of garland destroys the entire fear.

When the deluded person is told 'This is not a snake; it is only a garland,' he becomes rid of fear. Even if he is exhorted thus: 'Be not afraid,' it is not because of the exhortation that he relinquishes fear. Fear goes automatically when he knows that there is no snake before him.

[586 b-587 a]

न्याय्यो नियोगस्तत्रैव यत्र बुद्धाऽस्य कार्यताम् ॥ ५८६ ॥
अनन्तरं प्रवृत्तिः स्याद्विषये तस्य सिद्धये ।

A *niyoga* is properly there only where a person, having known that something is to be done, begins subsequently to be active in respect of it in order that he may attain the object of the *niyoga*.

Niyoga is possible only where a person knows that something is to be accomplished by him, and then begins to be active in respect thereof.

[587 b-588 a]

इह त्वैकात्म्यवाक्येषु तत्त्वमात्रावबोधतः ॥ ५८७ ॥
सद्यः पुमर्थसंसिद्धेः कार्यसिद्धिर्न वीक्ष्यते ।

But, here, however, in the case of the texts about the one self, the human goal is accomplished immediately from the knowledge of the truth; there is not observed any accomplishment of what-is-to-be-accomplished.

When one knows the Vedānta text and realizes its truth, one attains the final goal. There is nothing that one should do thereafter.

[588 b-589 a]

कुतूहलवतां तद्वन्निर्वृत्ताख्यानमात्रतः ॥ ५८८ ॥
दृष्टा नराणां निःशेषकुतूहलनिराक्रिया ।

Similarly, it is seen that in the case of persons who are curious, the mere narration of what is actually established removes their entire curiosity.

It is not in Vedānta alone that the texts relate to what-is-established; the stories that are told in Scripture and Traditional Codes are of the same character.

[589 b-590 a]

वस्तुमालावसायित्वात्तद्वचांसि न कानिचित् ॥ ५८९ ॥

उपादानाय वाऽलं स्युर्नापि हानाय तद्विदः ।

Those statements relate merely to facts; and so he who understands them has neither anything to take nor anything to leave.

These statements merely convey knowledge. They do not aim at making the hearer active.

[590 b-592 a]

यत्रापि च प्रतीयेते हानादाने वचःश्रवात् ॥ ५९० ॥

अयं चोराकुलः पन्था देशोऽयं निधिमानिति ।

तत्रापि नैव शब्दस्य व्यापारः सिद्धवेदनात् ॥ ५९१ ॥

कृतार्थत्वान्नरस्यापि रागादेव प्रवृत्तिः ।

Even where activity in the form of leaving or taking is found on hearing statements like “This road is infested with robbers,” “This spot contains a treasure-trove”, the operation does not belong to the words, for those words make known what is established, and thus have accomplished their purpose; the activity of the person concerned is from his desire alone.

A man may be active after hearing certain statements of facts. Even then, the activity is not an effect of those statements; it is prompted by the desire, etc., present in the man.

[592 b-593 a]

कामैकपाशाकृष्टः सन्निच्छयैव प्रवर्तते ॥ ५९२ ॥

निवर्तते च तद्द्वेषान्न शब्दव्यापृतेर्नरः ।

Man is active, because of desire, being impelled by greed, and turns away from an object because of aversion. Here, there is no functioning of words.

Positive activity and negative activity are caused, not by prescription and prohibition, but by appetite and aversion.

NTV—ayam arthaḥ : śabdāt bhūtam artham pratipadya taj-jāṭīyasya pramāṇāntarād upakārahetutām apakāra-hetutām vā avagatām samsmr̥tya taj-jāṭīyasyāpi tam anumāya icchayā pravartante dveṣeṇa ca nivartanta iti.

[593 b-594 a]

नन्वप्रयुक्तमप्येतद्वक्त्रा वाक्यं विवक्षितम् ॥ ५९३ ॥

न गन्तव्यं पथाऽनेन गृहाणेमं निधिं तथा ।

“But, though not uttered, does not the informant intend to say, ‘Do not go along this road’, ‘Take this treasure’?”

Objection—Is there not an injunction implied in a statement like ‘This road is infested with robbers’? Does not the speaker of this statement intend to say ‘Do not go this way.’?

[594 b-595 a]

मैवं न वक्त्रभिप्रायाच्छब्दार्थत्वं प्रकल्पते ॥ ५९४ ॥

शब्दसामर्थ्यतो यस्मात्तादर्थ्यं नान्यहेतुकम् ।

Not so; the sense of words is settled not from the intention of the speaker, but from the capacity of the words; so, that is not caused by anything else.

Reply—The sense of a statement is what is declared by it, and not what is intended by the speaker.

[595 b-596 a]

भवद्भिरपि चैवैतदभ्युपेयं प्रयत्नतः ॥ ५९५ ॥

वक्तृतन्त्रे हि शब्दार्थे न विश्वासः श्रुतेर्भवेत् ।

Even by you this must be admitted per force, for if the sense of words depended on the speaker, there would be no faith in (the determination of the sense of) Scripture.

The observation made above, the Mīmāṃsaka should necessarily accept; for the Veda has no speaker, according to him.

[596 b-597 a]

नानाविधपुमर्थान्तिरपि वक्तुः समीहिता ॥ ५९६ ॥

तस्या अपि त्वदुक्त्यैवं शब्दार्थत्वं प्रसज्यते ।

And, since the attainment of many kinds of human ends may be intended by the speaker, all that would have to become the sense of the words, if what you say is true.

Moreover, there may be no limit to the intentions of the speaker. Surely, all these cannot be regarded as the sense of his statement.

[597 b-599 a]

प्रवृत्तिं वा निवृत्तिं वा यदाऽभिप्रेत्य चेतसा ॥ ५९७ ॥

किञ्चिज्ज्ञास्यते ज्ञात्वा प्रत्यक्षादिप्रमाणतः ।

अभिप्रेताऽपि न तदा प्रवृत्तिर्यदि वेतरा ॥ ५९८ ॥

प्रत्यक्षादिप्रमेयेति शक्या वक्तुं विपश्चिता ।

Having in mind the intention of activity or turning away, a person knows something through the means of knowledge, perception, etc.; but no one who is wise would say in this case that the intended activity or turning away is the object of perception.

The illustration of other *pramāṇas* is given. A person *sees* a thing, with the intention either of grasping it or of rejecting it. Here it cannot be said that the *seeing* is the cause of grasping or rejecting; *seeing* gives only knowledge of the thing. Therewith its function ends.

[599 b-601 a]

इतश्चाभ्युपगन्तव्यमेतत्तुल्येऽपि वस्तुनि ॥ ५९९ ॥

एकस्य हानधीस्तस्मिन्नुपादित्सा परस्य च ।

शब्दार्थत्वे हि सर्वेषामादानायैव धीर्भवेत् ॥ ६०० ॥

नोपेक्षायां प्रहाणे वा न चानेकार्थता मता ।

What we have stated must be admitted for this reason also : with reference to one and the same object, for one there is cognition of avoiding it, and for another the desire to attain it. If (the intention) were the meaning of words, then for all there must be the cognition for attaining it, not the cognition for either indifference or rejection; for there cannot be a plurality of senses.

That the intention is not the meaning of words may be shown thus also : hearing a set of words, one acts for gaining something, another strives to avoid it, and a third is indifferent to it. All these cannot be the meanings of the identical set of words.

NTV — *nidhimān eṣa bhūbhāga ity ukte kasyacit svata eva viraktasya hānadhīḥ kasyacid rāgāndhasya ādānadhīḥ kasyacit śokāsaḥiṣṇoḥ jighṛkṣābuddhir upajāyate, tatra ādānaṁcet vaktrā vivakṣitaḥ sabdārthaḥ sarveṣāṁ śruta-vākyānāṁ ādānabuddhir eva bhavet, nopekṣāhāna-buddhī bhavetām.*

[601 b-602 a]

न च प्रवर्तकत्वेऽपि वाक्यस्याङ्गीकृते त्वया ॥ ६०१ ॥

शक्यो विधायिनोऽन्येषां पदानां वक्तुमन्वयः ।

Even admitting that a sentence prompts one to activity, you cannot explain the syntactical construction of words which are other than injunctive.

Even if we admit that a sentence prompts the hearer to activity, it is impossible for the *pūrvapakṣin* to show that the non-injunctive words of the sentence are to be construed only in relation to the verb.

NTV—*vidhāyakapadātirikta - padānāṁ na kāryānvaya - paratayā prayogaḥ, nāpi tatra sāmārthya-grahaḥ, kiṁtu योग्येतरान्विते सāmārthya-grahaḥ.*

[602 b-603 a]

किं स्वार्थमात्रनिष्ठत्वमुत कार्यैकनिष्ठता ॥ ६०२ ॥

पदार्थमात्रसंसर्गपरता किंत्वितीयताम् ।

You must say whether (words) refer merely to their own sense, or to what-is-to-be-accomplished alone, or whether they have for purport the relation of word-senses alone.

To show that in the *pūrvapakṣa* view it is difficult to construe words other than verbs, certain alternatives are set forth here:

(1) When a boy learns the meaning of words through the activity of the intermediate elder, being commanded by the superior elder, how does he do so? To him, do the words convey their individual meanings alone? In other words, do words have capacity only in respect of their own senses, without mutual relation?

(2) Or, because the capacity of words is understood as construed with the verb (expressing what-is-to-be-done), do the words have that (what-is-to-be-done) as purport?

(3) Or, because the words as construed with what-is-to-be-accomplished have capacity in regard to their own senses, do they have their own senses as their purport?

(4) Or, do the words have capacity to indicate what has direct relation to the *kārya* which is the meaning of the sentence as a whole?

(5) Or, do the words convey their senses as associated with other words such as are fit to be so associated, whether these latter be verbs or non-verbs?

[603 b-604 a]

स्वार्थमात्रावसायित्वे वाक्यार्थप्रत्ययः कुतः ॥ ६०३ ॥

वैयर्थ्यं च प्रयोगस्य व्यवहाराक्षमत्वतः ।

If words end merely with conveying their own senses, then how could the sentence-sense be understood? The application (*prayoga*) also would be futile, for it would not be fit for empirical usage.

(1) The first alternative is not possible. If the words convey their own senses without mutual relation, there would not, then, be the cognition of the sentence-sense on the part of the hearer. Nor can the sentence as a whole convey the sentence-sense. Does the sentence, in that case, need the denotative capacity of each word?

If it does, it cannot express any distinctive meaning of its own. If it does not, why seek to grasp the meaning of the words, at all? If words do not jointly express a unified sense, why use them in the form of a sentence?

[604 b-605 a]

पदार्थमात्रसंसर्गे कार्यार्थविरहेऽपि ते ॥ ६०४ ॥

व्यवहारस्य संसिद्धेर्व्यर्था कार्यप्रकल्पना ।

If the words convey the relation to other congruous word-senses even in the absence of the sense of what-is-to-be-accomplished, then, since empirical usage is accomplished, the assumption of what-is-to-be-accomplished is futile for you.

(5) On the fifth alternative, the *pūrvapakṣa* view will have to be abandoned, and the *siddhānta* view will result. Words as related with other congruous words convey their meaning. These other words need not be verbs.

[605 b-606 a]

कार्यैकव्यतिषङ्गे च वाक्याद्भूतानुवादकात् ॥ ६०५ ॥

प्रतीतिः स्यान्न वाक्यार्थे स्यादुक्तेर्व्यर्थताऽपि च ।

If the sentence-sense be the relation (of words) to what-is-to-be-accomplished alone, then there would be no meaning for sentences which convey something existent; and there would also be the futility of such statements.

(2-3) As regards the second and third alternatives, the following difficulty arises: If all words have capacity in respect of a single *kārya*, they would become synonyms. And, if no sentence without

an injunctive suffix conveys sense, then statements of facts would become futile, and no hearer would make any sense out of them.

[606 b-607 a]

कार्यान्तरस्य चाभावात्कार्यार्थैकामिधायिनः ॥ ६०६ ॥

संबन्धो न भवेदन्यैः साधनाद्यभिधायिभिः ।

And, for the word which conveys the sense of *kārya* alone there would be no relation with other words signifying means, etc., for there is no other *kārya*.

(4) The word which denotes action itself is not related to yet other word or words expressive of action, for they are not to be found in any given sentence. Nor is it related to the sense expressed by itself, for the Prābhākara does not favour the *abhihitānvaya-vāda*. Again, the word expressive of action is not related to its sense, which in its turn, is related to an accomplished entity. Finally, it is not related to something which is itself related to the action denoted by the sentence as a whole ; for this relation may not be conceived of as either an adjective or an adjunct of the word in question. And, if the relation of the word expressive of action is not to be determined, it remains suspended, as it were.

NTV—*kārya-padasya kāryāntarānvita-svārthābhidhāna-niyamānu-papatteḥ, kāryasya kāryāntarābhāvāt.*

NKL—*vivāda-padāni padāni na kāryānvita-svārtha-niyata-sāmarthyāni, padatvāt, kārya-padavat.*

gām ānaya daṇḍena ity-ātau kāryāntarābhāvāt tad-anvita-svārthābhidhāyitvāyogāt, arthāntarānvita-svārthābhidhāyakatvā-nabhyupagame daṇḍene'tyādibhiḥ sambandho na bhavet. ataḥ kārya-padam anvitamātrābhidhāyīty arthaḥ.

[607 b-608 a]

कार्यान्वयित्वे सर्वेषामपि चेह परस्परम् ॥ ६०७ ॥

पदार्थानामसंबन्धोऽनपेक्षत्वाद्भवेद्भवम् ।

If all words were related to *kārya*, then there would certainly be no mutual relation among them, because of absence of expectancy.

If every word had capacity for a sense, only as related to *kārya*, there would be no mutual relation among words.

[608 b-609 a]

नियोगो न प्रतीयेत विशिष्टविषयस्तथा ॥ ६०८ ॥

तदा चैकपदार्थस्य नियोगः साध्यतामियात् ।

Then, there would not be understood *niyoga* as the content of what is qualified; and the *niyoga* would become what is accomplished by each single word-sense.

If the senses of the words had no mutual relation, then a sentence such as 'Sacrifice with the *soma*' will not have for purport a *niyoga* whose content is the sacrifice as qualified by *soma*. The *niyoga* would then become the content of each of the constituent words.

[609 b-610 a]

अथ सोमादिसंबन्धे यागादौ विषये मतः ॥ ६०९ ॥

नियोगः कस्ततः पूर्वं संबन्धे हेतुरुच्यताम् ।

If the *niyoga* is thought to be the content of sacrifice, etc., as related to *Soma*, etc., it must be stated what before that is the cause of the relation.

If it be held that the *niyoga* is conveyed by the sentence as a whole, it must be stated how this is done. How are the qualifying words like 'soma' and others like 'yāga' related? If their mutual 'fitness' relates them, the insistence on *niyoga* as the hub of relation may be discarded. *Niyoga* becomes equally superfluous, if the cause of relation of the words be held to be either their status as accessories to action or the fruit they point to.

[610 b-611 a]

सिद्धेऽसति विशिष्टे न विषये कार्यमिष्यते ॥ ६१० ॥

अथ क्रियैव प्राक्कार्यात्सिद्धं नो यत्समीहितम् ।

If the established qualified content be not there, there would be no *kārya*; if that relation were established through the activity itself even before the *kārya*, then there results what is acceptable to us.

So, the *niyoga* cannot function without the mutually related words denoting a qualified action. If it is held that the action itself (viz. *yāga*, etc.), before *niyoga* operates, relates adjectives like 'soma' to 'yāga,' etc., that would be accepting our position.

NTV—*vināpi kāryaṁ yogyetarānvite sarva-padānāṁ sāmartyaṁ tātparyaṁ ca siddham ity arthah.*

[611 b-613 a]

तदेतरत्तदर्थमित्येवं चैतत्समञ्जसम् ॥ ६११ ॥

विषये यदि कार्यत्वं कार्यावगमपूर्वकम् ।

कार्ये कार्यान्तराभावात्कार्यबुद्धिः कुतोभवेत् ॥ ६१२ ॥

तदभावादनुष्ठेयो विषयोऽपि न ते भवेत् ।

And the words of the Commentary “Then the other for the sake of that,” etc., would then fit in; if there be the nature of being *kārya* in respect of the content even before knowing the *kārya*, then, since there is no other *kārya* in respect of the *kārya*, whence could there be the cognition of *kārya*? Because it is not there, even the content will not become for you what-is-to-be-done.

The principle that all other words contribute to the *apūrva* denoted by any one word, in a sentence, also supports our position, viz., that a word construes with a sense with which other words construe. Words first express senses which are compatible with those expressed by others in the same sentence; only then they may be subordinated to some other special sense. If it is held that a precedent knowledge of *niyoga* is needed to associate ‘the ought’ with *yāga*, etc., it may be asked whether this knowledge of *niyoga* also is preceded by the knowledge of another *niyoga*, and so on. And, in the absence of the knowledge of *niyoga*, no action is there for you to perform.

NKL—*atra sābara-bhāṣyaṁ jñāpakam āha-tadeti. pratipadādhi-
karaṇe kiṁ sarveṣāṁ padārthānāṁ pratyekaṁ niyogenā ’nvayaḥ,
utaikenaiva niyogene ’ti saṁdehe, pratyekam iti pūrvapakṣayitvā
yadekasmād apūrvam tadetarat tadartham] syād iti siddhāntitan-
saṁgatam syād ity arthaḥ.*

[613 b]

कार्यार्थता ततश्चेष्टा हीयेतानुष्ठितिं विना ॥ ६१३ ॥

Then, without performance the sense of *kārya* which you desire will be destroyed.

And, when you cannot perform *yāga*, etc., *yāga* will cease to be the object of *niyoga*.

[614-616 a]

अथ कार्यान्तराभावेऽप्यस्य कार्यत्वमिष्यते ।

विषयस्यापि कार्यत्वं स्वत एव भवेत्तथा ॥ ६१४ ॥

विषयोऽकार्यरूपत्वात्स्वसिद्धयै यद्यपेक्षते ।

कार्यं तदपि विषयमीक्षेतासाध्यरूपतः ॥ ६१५ ॥

कार्येऽपि कार्यतैवं च भवेद्विषयहेतुका ।

If you think that there is the nature of being *kārya* for this even in the absence of another *kārya*, then there would be the nature of being *kārya* for the content also of its own accord. If the content, because it is not of the nature of *kārya*, requires the *kārya* for its own accomplishment, then, even the *kārya* would require the content because it is not of the nature of something to be accomplished. Thus, even the *kārya*-ness of the *kārya* will have to be caused by the content.

If you say that *niyoga* can operate without requiring another *niyoga*, we reply that what applies to *niyoga* must equally apply to *yāga*, etc. If you should say, “*Yāga*, etc., require *niyoga* because in themselves they involve trouble and would not be carried out without the sense of *niyoga*,” we reply: A sense of mere oughtness does not make sense; to give it sense it has to be related to the content of the verbal roots like *yajeta*, etc.

NTV—*iṣṭopāyatā-dhiyā hi mamedam kāryam iti buddhvā svatantraḥ pravartate, iṣṭopāyatā-dhīta eva kleśarūpasya kāryatā iti ca.*

[616 b-617 a]

अन्योन्याश्रयतो च स्यान्न च कार्यप्रधानता ॥ ६१६ ॥

पुन्यापारव्यपेक्षायां स्वसिद्धौ कार्यमुच्यते ।

And, there would be reciprocal dependence; and the *kārya* would not be the principal.

That is called *kārya* which for its own establishment stands in need of human effort.

Also, there would be mutual dependence between *niyoga* and the sense of the verbal roots like *yāga*, etc. Thus, *niyoga* would cease to be more important than those root-senses.

Properly speaking, obligatoriness is for *yāga* alone, not for *niyoga*. For, what is *kārya*? It is that which needs human effort for being accomplished.

AVS—niyoga-kartavyatve viṣayakartavyatvam, viṣaya-kartavyatve niyogakartavyatvam iti itaretarāśrayatvam, niyoga-prādhānya-kṣatis ceti.

NKL—niyogasya dhātvartha-kāryatva-siddhyarthatvāt prādhānyam ca na syād ity arthaḥ.

[617 b- 618 a]

यागादिः स च नो कार्यं स्वतः कार्यैकरूपतः ॥ ६१७ ॥

कार्यस्यैव न कार्यत्वमकार्ये कार्यतेष्यते ।

That (*kārya*) is sacrifice, etc.; the *niyoga* is not *kārya*, because (according to you) it is itself the nature of *kārya*.

For the *kārya* itself there is no *kārya*-ness; there is *kārya*-ness only for what is not *kārya*.

And, that is *yāga*; for it has the nature of being accomplished. *Niyoga*, on the contrary, does not satisfy the definition of *kārya*. The *niyogavādin* contends that *niyoga* is *kārya* by itself, and that it does not depend on human effort. So, if *niyoga* is obligatoriness, (*kāryatva*), it cannot have obligatoriness; for one and the same thing cannot be the locus and the located. Thus, it is only *yāga*, etc., which are by themselves not *kāryatā*, that become obligatory on account of injunction.

AVS—niyogasya kāryatvaṁ svataḥsiddham, na puruṣa-vyāpārā-dhīnam, anyathā ghaṭa-tulyatvaṁ niyogasye 'ty arthaḥ.

[618 b-620]

न शौक्ल्ये शुक्लतापत्तिः पटादेः सा विधीयते ॥ ६१८ ॥

घटकार्ययजत्यादि स्वस्वभावतया स्थितम् ।

सिद्धसाध्यादिभेदेन स्वशब्देनाभिधीयते ॥ ६१९ ॥

यदा तदा ध्वनेर्न स्यादज्ञातार्थावबोधने ।

विशेषः कश्चिदित्येवं न प्रवृत्तिर्विधेर्भवेत् ॥ ६२० ॥

There is no contingency of whiteness in whiteness; that is predicated only of cloth, etc.

When 'pot', 'kārya', 'sacrifice', etc., each of which has its own nature, are expressed by their respective words differentiated as accomplished or to-be-accomplished, then, there is seen to be difference as regards making known an unknown sense by the sounds; thus activity is not the result of injunction.

It was stated above that there is *kāryatva* only for what is not *kārya*. An example of this is that there is no whiteness for whiteness, but only for cloth, etc.

The result of this discussion is this: Words relate to senses which are not related to *kārya*. According to their varying capacities, they denote either accomplished entities like pots, etc., or yet-to-be-accomplished activities like *yāga*, etc., or qualities like whiteness, etc. They denote what they are 'fit' to denote. So, sentences made up of words, also, may denote either accomplished entities, or activities yet to be accomplished. *Niyoga* comes nowhere into this picture.

[621]

अवबुद्धे तु शब्दार्थे पुरुषार्थानुरोधतः ।

स्वत एव प्रवृत्तिः स्यान्न शब्दान्नार्थतस्तथा ॥ ६२१ ॥

When the sense of the word has been understood, there is activity of its own accord, in accordance with the desired human end ; it is neither from the word nor from the sense.

If it be asked how there is activity after hearing the words, we reply: the activity springs from desire. When an unknown object has been known from words, a man begins to be active because he *desires* that object. Another who does not desire it is not active even though he comes to know of it from words.

NTV—pravṛtṭiḥ pravartaka-pūrvikā pravṛtṭitvāt madīya-pravṛtṭivad iti, sa ca rāga eva pravṛtṭi-hetutvāt madīya-pravṛtṭi-hetubhūta-rāgavad iti. sa ca rāgaḥ iṣṭasāadhanatā-jñānahetuko rāgatvāt madīya-rāgavad iti.

AVS—na śabdaḥ pravartakaḥ, nāpi niyogaḥ, rāga eva pravartakaḥ.

[622]

साधनादित्रयाद्बाह्यं पुरुषार्थबहिष्कृतम् ।

क एतत्साधयेद्दीमान्किं वा रूपमितीर्यताम् ॥ ६२२ ॥

That which is outside the three, means, etc., and also other than the human end—which wise man will accomplish it? And what is its nature? Let it be stated.

So far, assuming that *niyoga* is of the nature of *sādhya*, it was argued that it is not what prompts activity. Now, it is sought to be shown that *niyoga* is not *sādhya* at all. There is no *kārya* other than the means (*karana*), the *modus operandi* (*itikartavyatā*), and what

is to be accomplished (*bhāvya*). *Niyoga* is not the same as *bhāvya*; for the *bhāvya* (that which is to be accomplished) is either happiness or destruction of sorrow, which is the human end.

And, it is not possible to define *niyoga*. (1) Is *niyoga* a direction (*preraṇā*)? (2) Is it internal effort? (3) Is it action (*kriyā*)? (4) Is it fruit? (5) Is it instrument (*kāraka*)? (6) Or, is it something else? (7) Is it that which is unrelated to three times? (8) Or, is it something supersensible?

AVS—na yāgādī-sāadhanam niyogaḥ, nāpi prayājādītikartavyatā, nāpi brāhmaṇādy-adhikārī, nāpi sukha-duḥkhanivṛttir vā phalam, evaṁ lakṣaṇam niyogam kaḥ sādhayet, prekṣāpūrvakāri-svarūpaṁ ca tasya kim bhāṇyatām ity arthaḥ.

[623]

न तावत्प्रेरणा कार्यं कार्यार्थविषया हि सा ।

नाऽऽन्तरोऽपि प्रयत्नः स्यान्मानान्तरगतेस्तथा ॥ ६२३ ॥

Kārya cannot be direction, for that (direction) has for content the sense of *kārya*; nor internal effort, for, then, it would be known through other *pramāṇa*.

(1) *Niyoga* is not direction, for direction which is word-function is the content or object of *niyoga*, and as between the content and the container there is difference.

(2) Nor is *niyoga* internal effort; for effort is mental, and if *niyoga* were to be that, there would be no *apūrvatva* for it.

[624]

न क्रिया कर्तृसंबन्धात्फलं नानिष्टरूपतः ।

कारकं नाप्यसिद्धत्वान्नाप्यन्यदनिरूपणात् ॥ ६२४ ॥

It is not activity, because activity is related to the agent; nor the fruit, because the *niyoga* is not what is

desired ; nor what accomplishes the act, because the *niyoga* is not what has been established ; nor something else because it is not clearly stated.

(3) *Niyoga* is not activity; for activity is related to the agent, whereas *niyoga* relates to the prompted person, and the two—agent and prompted person—are not the same.

(4) Nor is *niyoga* the fruit; for it is not a human end, as it is not what is desired.

(5) Nor is it an instrument; for an instrument is an accomplished thing, whereas *niyoga* is what-is-to-be-accomplished.

(6) Nor is it any other; for there is no evidence therefor.

[625]

न च कालत्रयास्पर्शवाच्यत्वं कार्यलक्षणम् ।

घटशब्दाद्घटे मा भूत्कालास्पर्शेन कार्यता ॥ ६२५ ॥

Nor is the definition of *kārya* that which is expressed without being touched by the three times, lest from the word 'pot' the pot would be understood as *kārya* (*niyoga*), because it is untouched by time.

(7) The non-relation of *niyoga* with the three times—is it from word, or from sense? Not the first; for if that were so, when it is said 'pot', there would be *niyogatā* for pot, for the word itself does not mention any relation to time. Nor the second; for, the word 'pot' has for its sense the broad-bellied object, and has no capacity to indicate relation to time as such.

NKL—*ghaṭa ity ukte kālatrayasyā-'sprṣṭo ghaṭo bhāti. itarathā ghaṭostītyādau laḍādy-arthasya dvirabhidhāna-prasaṅgād ato ghaṭe kāryatā mā bhūt tatrā 'tivṣāntir iti bhāvaḥ.*

[626]

नियोगोऽपि नियोज्यस्य व्यापारः स कथं भवेत् ।

अतीन्द्रियो लिङाद्यर्थः सिद्धिश्चास्य कथं भवेत् ॥ ६२६ ॥

And, the *niyoga* is the operation of him who is prompted; how can that be the sense of the potential mood (*liñ*), etc., which is super-sensuous? And how can that be accomplished?

(8) Just as sacrifice, etc., constitute the activity of the agent, the *niyoga* too forms an operation of the one prompted; and so, it cannot be super-sensuous.

[627]

सिद्धिर्विषयसिद्धौ चेन्नैवं स्यात्कर्मणा न हि ।

आप्त्युत्पत्त्यादिकं शक्यमनारोप्यस्वभावतः ॥ ६२७ ॥

If it be said that the *niyoga* is accomplished when the object is accomplished, not so; attainment, origination, etc., are not possible through activity, for the *niyoga* is not of the nature of the superimposed.

It cannot be said that sacrifice, etc., when accomplished, accomplish *niyoga*; for the usual results of action, viz. origination, attainment, purification, and modification, cannot be brought about for *niyoga*, as those who advocate the doctrine of *niyoga* believe that no excellence can be imposed on *niyoga*; and also it would be a contradiction to say that *niyoga* is eternal and that it is what-is-to-be-accomplished.

NKL—*āpty-utpatti-vikāra-saṃskārā na niyogasya karma-sādhyāḥ tasyā 'nāropya-svabhāvataḥ anādheyātisaṃyathena svikārād ity arthaḥ.*

[628]

कार्यं स्वेनाऽऽत्मना सिद्धं पुमर्थं साधयेद्यदि ।

सर्वदा तस्य तादृक्त्वात्पुमर्थः सर्वदा भवेत् ॥ ६२८ ॥

If the *kārya*, which being self-accomplished, were to accomplish the human end, then because the *kārya* is always of that nature, the human end also will be always there.

Having shown that *niyoga* is not accomplished by anything, it is now argued that *niyoga* does not accomplish anything.

Does *niyoga* (i.e. *kārya*), being already there, accomplish heaven, etc. ? Or, does it come into being through human effort, and then accomplish heaven, etc. ?

On the first alternative, heaven, etc., will always be there, as *niyoga* is admitted to be there always, and there would be no need for accomplishing heaven, etc.

[629]

पुंव्यापारप्रसिद्ध्याऽथ सिद्धं स्वार्थकरं मतम् ।

तस्यानाधेयरूपत्वान्न कदाचित्फलं भवेत् ॥ ६२९ ॥

If it be thought that the *kārya* having been accomplished by human effort produces its fruit, it can never bear fruit as it is of the nature of what is not an effect.

The other alternative is also not possible; for it has already been shown that *niyoga* does not admit of the imposition of any excellence. As *niyoga* is not accomplished through human activity, never can heaven, etc., come into being as dependent thereon.

[630]

संभाव्यमानसिद्धेर्हि यागादेः कार्यता मता ।

व्योमतत्पुष्पयोर्न स्यात्सिद्धात्यन्ताप्रसिद्धयोः ॥ ६३० ॥

There is the nature of being *kārya* only for sacrifice, etc., which have the prospect of being accomplished; that is not possible in the case of the already-accomplished like the sky or the entirely non-existent like the sky-flowers.

The nature of being accomplished (*kāryatā*) can belong only to a positive entity whose origination is through human activity, and not to *niyoga* which is not of that nature. *Niyoga* which is of the nature of absolute non-existence, like the sky-flower, cannot be accomplished.

[631]

कर्तव्यो याग इत्येवं यागाद्विन्ना यथेक्ष्यते ।

कर्तव्यं कार्यमित्येवं ततोऽपि व्यतिरिच्यते ॥ ६३१ ॥

If it be said that in the statement 'The sacrifice is to be performed', what is to be performed is something different from the sacrifice, then even in 'What is to be performed is *kārya*' what is to be performed will be different from that.

If it be said that in the usage 'The sacrifice is to be performed', the sacrifice figures as something different from *kārya*, then on the strength of the usage '*kārya* (i.e. *niyoga*) is to be performed' we must say that *niyoga* is different from *kārya*.

[632]

कार्यकर्तव्यता कार्येत्येवमेवातिरिच्यते ।

तस्मान्न वस्तुधर्मोऽयं शब्दादेव प्रकर्षतः ॥ ६३२ ॥

There is a similar transcendence in “the to-be-accomplished nature of the *kārya* is to be performed”. Therefore, this is not a characteristic of reality, because the difference is only in word.

It may be said that *kāryatā* (nature of being what-is-to-be-done) is not *niyoga*, but its attribute (*dharma*), and that *kāryatā* is not the attribute of sacrifice, etc.

But we ask: the *kāryatā* of the *niyoga* which is *kārya*—is that to be done or not?

If that is to be done, then that would be different from *niyoga*. This will lead to an infinite regress.

If *kāryatā* is not what-is-to-be-done, then it would be similar to what is prohibited.

Thus *kāryatā* can be neither the nature nor the attribute of *niyoga*. It is only a verbal expression.

NKL—*śaśa-śṛṅgaṁ gagana-kusumam itivac chābda-vikalpa-mātram ity arthaḥ*.

[633]

अतो यदेव साध्यार्थसाधनत्वेन गम्यते ।

वेदात्तदेव साध्यत्वात्कार्यं नान्यत्ततः पृथक् ॥ ६३३ ॥

Hence that alone, which is understood from the Veda as being the means to the accomplishment of what is to be accomplished, is the *kārya*, because it has to be accomplished, and nothing else apart from it.

What is *kārya* is sacrifice, etc., alone which are the means to the end, viz. heaven, etc.

[634]

लिङादिः प्रेरणावाची कुतः कार्यमितीर्यताम् ।

विषयत्वेन नाऽऽक्षेपो भावार्थो विषयो मतः ॥ ६३४ ॥

The potential mood, etc., express direction. Whence, then, the *kārya*? The *kārya* cannot be regarded as the object either; for, the object is the stem-sense.

According to the Bhāṭṭas, the potential mood, *liñ*, etc., express direction (*preraṇā*). *Niyoga* is not the content of direction; sacrifice, etc., are the content.

[635]

प्रेरणाऽपीह नैव स्यादज्ञातज्ञापनात्पृथक् ।

समस्तकार्यदोषोक्तिप्रसङ्गान्मित्यभावतः ॥ ६३५ ॥

Even direction here is not different from the making known of what is unknown; for it involves all the possible defects pertaining to the *kārya*; and there is no evidence to the contrary.

It is wrong to say that even direction is the meaning of the potential mood, *liñ*, etc. For, what is direction? Is it different from making known what is unknown? Or, is it not different?

It cannot be different; for, if it were so, all the defects pointed out earlier in the case of *kārya* would appear here also.

[636]

न स्वरूपं लिङादीनां प्रेरणाज्ञापकत्वतः ।

अन्योन्यरूपभेदेऽपि प्रेरणानुगमात्तथा ॥ ६३६ ॥

Direction is not the nature of the potential mood (*liñ*), etc., for the potential mood is for making known (the unknown) and direction is understood even where there are different forms (like *let*).

Moreover, if direction is different, what is it? Is it the nature of *liñ*, etc.? Or, is it some potency? Or, is it some particular operation?

It cannot be the first; for, *liñ*, etc., are what make known, and direction, you say, is not of that nature. Moreover, although there are different forms such as *yajeta*, *juhota*, etc., employing *liñ*, *let*, etc., there is no difference so far as their sense, direction, is concerned; and if direction is the nature of *liñ*, it cannot be the nature of *let*, etc.

[637]

शक्तेरनभिधेयत्वात्तद्व्यापारोऽपि नेष्यते ।

प्रेरकाभावतो वेदे तद्व्यापारोऽपि नेरणा ॥ ६३७ ॥

(Direction cannot be) the capacity (*śakti*) (of *liñ*, etc.), for then it would not be what is expressed; nor can it be the operation thereof; nor can prompting be the operation of the director, for in respect of the Veda there is no director.

Nor is direction some potency or capacity of *liñ*, etc.; for those who argue against us hold that direction is expressed by *liñ*, etc. If they hold, at the same time, that direction is their potency, they would be contradicting themselves; for, as potency and the potent are non-different, if direction is the potency of *liñ*, etc., it cannot be what is expressed (*vācya*) by them.

If direction is to be regarded as some particular operation, whereof is it an operation—of *liñ*, etc., or of the director?

If it is the operation of *liñ*, etc., what is this operation? Is it movement (*spanda*)? Or, effort (*yatna*)? Not the first, because *liñ*, etc., are all-pervading. Nor the other, because effort is an attribute of the conscious, and *liñ*, etc., are unconscious.

If direction is the operation of the director, who is this director? Is it a person? Or, is it the Veda?

It cannot be a person, for the Veda has no human author, and it can have no director.

[638]

अतः समीहितोपायतया वस्त्ववबोधयन् ।

अबुद्धं प्रेरको वेदो ज्ञापना प्रेरणा मता ॥ ६३८ ॥

Therefore, the director is the Veda which makes known a reality which was unknown, as the means to the desired end; and the making known is direction.

Therefore, it must be admitted that direction is not different from making known what is unknown, and that the director is the Veda.

[639]

तथा च वस्तुयाथात्म्यज्ञापनेन प्रमाणता ।

न प्रेरकतया सा स्यात्प्रत्यक्षादेरनीक्षणात् ॥ ६३९ ॥

And thus, there is validity only as making known the real nature of things, and not as directing activity; for this latter is not seen in perception, etc.

Perception, etc., simply make known what is unknown; they do not direct activity. Similarly, the Veda too is valid, not as directing, but as making known.

NKL—*vedaḥ abuddha-bodhakatvenaiva pramāṇam pramāṇatvāt pratyakṣādivat.*

AVS—*pratyakṣādivat vedasya prāmāṇyam abuddha-bodhakatvena siddham, na prerakatvena ity arthaḥ.*

[640]

निष्पादितनियोगस्य वेदप्रामाण्यतो यथा ।

नियमेन फलं तद्वत्साधनानुष्ठितेर्भवेत् ॥ ६४० ॥

Just as (according to the *niyoga-vāda*) the *niyoga* carried out invariably bears fruit from the authority of the Veda, so also may it result through the performance of the means (*viz.*, sacrifice).

Although neither *niyoga* nor direction is the meaning of *liṅ*, etc., these latter can convey the meaning of instrumentality to the desired. Just as in the *niyoga-vāda* it is maintained that the *niyoga* that is acquired by performing the stem-sense (*viz.* sacrifice) leads to the fruit on the strength of the text 'He who desires heaven,' etc., even so we may legitimately hold that the same sacrifice, when performed, results in bringing in the fruit through the intermediary operation of an unseen potency (*apūrva*). Thus, it is possible for us to say that the sense of *liṅ*, etc., *viz.* sacrifice, etc., constitute the means to what is desired, i.e. heaven, etc.

[641]

विसंवादोऽपि नाऽऽशङ्क्यो नियोगार्थे यथा तथा ।

वैदिकत्वादुपायेऽपि नृतन्त्रे व्यभिचारिता ॥ ६४१ ॥

Just as, if the *niyoga* be the sense (of *liṅ*, etc.), failure of fruitful result cannot be doubted, even so, if the means (sacrifice) be the sense, for it is declared by the Veda; there is inconstancy only in what depends on man.

It cannot be said that if the instrumentality of sacrifice, etc., to heaven, etc., be the sense of *liñ*, etc., the *Svarga-kāma* text would become invalid, as immediately after the performance of sacrifice, heavenly enjoyment is not observed; for, the situation is the same in the case of both the views, viz. the view that *niyoga* is the sense of *liñ*, etc., and the view that sacrifice is the sense.

Just as even if *niyoga* be the sense of *liñ*, etc., there is no futility even though no immediate fruit is seen, and there is no invalidity for the Vedic text, so also if sacrifice, etc., be the sense of *liñ*, etc., there is no contingency of the suspected defects. The instrumentality of sacrifice to heaven is to be ascertained from the Veda alone. And, the Veda is unlike human statements, and so cannot miscarry. It has no human author, and is free from defects.

NTV—pauruṣeya-vākyasya hi mānāntara-visaṁvādāt prāmāṇya-vyabhicāritā, pramāṇāntara-nibandhanatvāt tat-pramāṇasya.

AVS—vedaika-samadhigamyatvād upāyatvasya na pauruṣeya-vākyaṛthavad vyabhicārāsaṅkā ity arthaḥ.

[642]

नानन्तरफलो यागो दृष्टो लोकेऽपि हि क्वचित् ।

अतः सामान्यतो.दृष्टं क्रियात्वादित्यदूषणम् ॥ ६४२ ॥

Sacrifice does not yield immediate fruit, for even in the world some cases of action do not yield immediate fruit (e.g. service); so the *sāmānyato-drṣṭa* probans 'because it is an act' cannot be (adduced as) a defect.

It cannot be argued thus: 'Sacrifice, etc., must have immediate fruit, because they are acts, like the act of churning'; for not all acts yield their fruit immediately, e.g. service.

NTV — *na hi loke 'nantara-phalo yāgaḥ prasiddho 'sti, tasyā 'laukikas-svarūpatvāt, vaidikasya ru kāriryādi-yāgasya yady api dr̥ṣṭaphalatā, tathāpi nā 'nantara-phalaiva-niyamo 'sti, tasmāt vyāpti-grahaṇābhāvāt yāgatvād anataraphalo yāga ity anumānā 'nupapattir ity arthaḥ.*

AVS—*atra yāga-sabdena kriyā ucyate.*

[643]

स्वसामर्थ्याद्यथा कार्यं कालास्पृष्टं प्रभाषते ।

लिङादिर्यागमप्येवं वक्ष्यतीत्यविशिष्टता ॥ ६४३ ॥

Just as *liñ*, etc., by their own capacity, are said to mean *kārya* untouched by time, even so sacrifice is said to be the meaning; thus there is no difference.

It may be argued thus: If sacrifice, etc., which are the means to heaven, etc., be the sense of *liñ*, etc., it must be stated if sacrifice, etc., are related to time or not. If they are related to time, then they cannot be performed because of relation to past time, etc. On the second alternative, if from word there is no relation to time, they would be like pot, etc.; and if from sense there is non-relation to time, they would be non-existent.

The reply is: It is true that there is similarity between *niyoga* and sacrifice, etc. But there is this difference: sacrifice is not non-existent, although it is not related to time. Even though as instrument to the desired, sacrifice is not related to time, by nature (i.e. as sacrifice) it is related to time; whereas *niyoga*, even by nature, is not temporal.

[644]

साक्षादेवं च संबन्धः साध्यसाधनयोर्भवेत् ।

नातिरिक्तलिङाद्यर्थव्यवधानाविडम्बना ॥ ६४४ ॥

And thus, there would be a direct relation between end and means; and there would be no farce of interposing something which is other than these, the sense of *liñ*, etc.

There is another reason why we say that sacrifice, etc., which are the instrument to the desired, are the sense of *liñ*, etc.

If this be the case, there is established an immediate relation between means and end. If, on the contrary, *niyoga* be the sense, there will be an interposition between them. This, however, is not proper, as, in this case, an immediate relation is possible.

[645]

साक्षादसति संबन्धे पारम्पर्यं न तु कचित् ।

गतौ सत्यां तदप्यत्र नान्यत्रेवोपलभ्यते ॥ ६४५ ॥

Where there is no direct relation, there may be sequence (*pāramparyam*); and not where there is such a way (direct relation); even that (the former) is not seen here, as elsewhere.

Where immediate relation is not possible, then relation in sequence is to be admitted. In the case of the *svarga-kāma* text there is no need to postulate relation in sequence, for there is seen immediate relation.

AVS—avyavadhānena sambandhe asati pāramparyam, natu sati, tac ca pāramparyam atra nāsti, yathā aruṇayā krīṇātīty atra vidyate ity arthaḥ.

[646]

श्रुत्या क्रयामिसंबन्धो व्यवच्छिद्यैव साधनम् ।

अरुणः साधको दृष्टो नानपेक्षो वृथा च सः ॥ ६४६ ॥

By the express statement, it is known that the tawny colour, though related to buying, becomes what accomplishes only by interposing the means (the cow). It is not independent, for, if so, it would be useless.

The contrary example is now given. When the scriptural text says, 'With the tawny he buys', what is the relation between 'tawny' and 'buying'? There cannot be a direct relation; 'tawny' becomes the instrument of buying only as qualifying the cow. The meaning of the text is: with the tawny cow he buys *soma*.

The *svarga-kāma* text is not like this; for, here a direct relation is seen between the means and the end.

NKL—*aruṇayā krīṇātīti tṛtīyā śrutyā aruṇo guṇaḥ kriyāyām viniyuktopi paśu-dravyaṃ viśeṣyaiva soma-krayasya sādhaḥ, guṇasya asvatantratvād anyathā kevalasya guṇasya sādhaḥ* ity arthaḥ.

[647]

यागः कार्याभिसंबन्धोऽप्यनुत्पाद्य फलं न ते ।

कथंचित्साधयत्कार्यं तच्च नास्तीत्यसाधकः ॥ ६४७ ॥

Sacrifice, though related to *kārya*, does not accomplish the *kārya* for you without accomplishing the fruit; but that it does not, and so it cannot be what accomplishes (in respect of *kārya*).

It was stated that sacrifice, etc., are related to heaven, etc., and not to *niyoga*. Here, it is pointed out that even if their relation to *niyoga* be admitted, there will be defect.

Does the sacrifice that is related to *niyoga* generate it without or with an intermediary operation? It cannot be without an intermediary operation, for there can be no instrumentation without operation. If it be with an intermediary operation, what is that

operation? Is it the generation of fruit? Or, some other operation? If it be the former then without generating heaven first, sacrifice would not bring about the *niyoga* that you desire. But in the case of no one is heaven seen immediately after a sacrifice. And so, sacrifice is not what establishes *niyoga*.

[648]

नचान्या व्यापृतिस्तस्य कार्यसिद्धौ त्वयेष्यते ।

फलानुत्पत्तितस्तस्मान्न कार्येणापि संगतिः ॥ ६४८ ॥

Nor do you accept any other operation in order that the *kārya* may be accomplished; because the fruit has not been produced, the *niyoga* cannot be even connected with the *kārya* (sacrifice).

Any other operation is not admitted by you.

As the fruit (viz. heaven) is not seen immediately after the performance of sacrifice, etc., these latter cannot be related to *niyoga* through the generation of fruit.

[649]

अथ शास्त्रप्रमाणत्वाददृष्टाऽप्यभ्युपेयते ।

फलोत्पत्तिर्ममाप्येवं तथा सति भविष्यति ॥ ६४९ ॥

If you admit on the authority of Scripture that an unseen (*adr̥ṣṭa*) fruit is generated, then even for me that happens so.

If you say, on the authority of Scripture, that an unseen potency is generated by the sacrifice, that is acceptable to us. And, even thus, there would be no need for *niyoga*.

[650]

मम शास्त्रप्रमाणत्वात्पश्चादपि भवेत्फलम् ।

पूर्वं तु भवतो न्याय्यं तदभावे ह्यसाधकम् ॥ ६५० ॥

Because I accept the authority of Scripture, for me the fruit may come even late; for you it is but proper that it must come earlier, for in its absence the *niyoga* will not be what accomplishes.

In our view, the fruit may come about even some time after the performance of sacrifice, the authority for this being the *svarga-kāma* text. But for you the fruit must be immediate, because in the absence of the intermediary operation (which is heaven) *niyoga* will not be established.

As, on the authority of Scripture, the fruit results from the sacrifice itself, it is futile to assume *niyoga*.

AVS—*tad-abhāve svargābhāve kāryaṁ sādḥaka-sūnyam ity arthaḥ.*

[651]

कार्यसिद्ध्या फलावाप्तावशेषफलसंभवः ।

सकृत्करण एव स्यात्कार्यस्याभेदतस्तव ॥ ६५१ ॥

If by accomplishing the *kārya* the fruit be obtained, then by once performing (the sacrifice) all fruits must result; for according to you the *kārya* is non-different.

If on the accomplishment of sacrifice, etc., there is the accomplishment of *niyoga*, and thence result heaven, etc., then as *niyoga* comes about by the performance, even once, of a sacrifice, there should be no need for other sacrifices or for repeating the same sacrifice. By the single performance of a sacrifice one must then be able to reap all possible kinds of fruit.

[552]

अनुबन्धाभिसंबन्धात्फलं चेत्स्याद्वयवस्थया ।

तत एव न कार्यत्स्यात्तदा तद्भावभावतः ॥ ६५२ ॥

If it be said that there is the settlement of the difference in fruit due to the relation (of the *niyoga*) with the adjunct (viz., the particular rite), then, because of that very reason the fruit is not from the *kārya* (*niyoga*), for it is determined by that (rite).

It may be said that although *niyoga* is one by itself, it becomes different on account of the sacrifices with which it is associated, and that the difference in fruit may thus be accounted for.

If this be the case, then the difference in fruit is conditioned by the difference in sacrifice. And so, what is the use of *niyoga*?

AVS—kim niyogena ajāgalastana-kalpena?

[653]

औपाधिकश्च मिथ्या स्यात्साध्यसाधनलक्षणः ।

व्यवहारः श्रुतेर्ज्ञातः परमार्थैकवादिनः ॥ ६५३ ॥

And, it would have to be recognized that for him (the Pūrvamīmāṃsaka) who says that all (*Svarga*, etc.) is real, the Scriptural usage consisting in means and ends conditioned by adjuncts is illusory.

If there be difference in *niyoga* because of difference in sacrifice, there will result another defect also. The *niyoga* as conditioned by sacrifice will be the means; and heaven, etc., will be the ends. Then the conditioned *niyoga* will have to be declared illusory, like the redness of the crystal. That being the case, heaven, etc., brought

about thereby will also be illusory. This, however, is not acceptable to the Mīmāṃsaka who maintains that all means and ends, such as sacrifice, etc., and heaven, etc., are absolutely real.

[654]

एवं ते कर्मकाण्डेऽपि कार्यं तावन्न युज्यते ।

ऐकात्म्ये तु यथा नास्ति विशेषेणोच्यते तथा ॥ ६५४ ॥

Thus for you the *kārya* is not intelligible even in the ritual-section; as to how it is not intelligible in respect of the one self (*jñānakāṇḍa*) it will be stated in detail.

It has been shown that there is no need for postulating *niyoga* in the *karma-kāṇḍa*. That such a postulation is not necessary in the *jñāna-kāṇḍa* will be demonstrated hereafter.

[655]

प्रतिपत्तिविधिस्तावन्नाऽऽत्मा द्रष्टव्य इत्ययम् ।

तस्य भावार्थनिष्ठत्वाद्वस्तुन्यनुपपत्तिः ॥ ६५५ ॥

The text 'The self is to be seen' is not a command for knowing; for that (the command) relates to the sense of the verb, and that is unintelligible as regards the real.

In the Upaniṣads there is the text, 'The Self is to be seen.' Does this not imply *niyoga*, it may be asked.

Now, in regard to what is there *niyoga*? Is it in regard to the reality, i.e. the self, or in regard to the knowledge thereof? It cannot be the first, because the command relates to knowing; and as regards the self, which is eternal, no command is intelligible.

AVS — *nāyam ātmani vidhiḥ, vidheḥ kriyāviśayatvād vastuny ayogāc ca.*

[656]

सिद्धेऽसिद्धेऽथ वैकाल्ये विधिर्नैवोपपद्यते ।

नाऽऽकाशे नापि तत्पुष्पे पुंव्यापारानपेक्षता ॥ ६५६ ॥

Whether the one self is existent or non-existent (*siddha* or *asiddha*), injunction is unintelligible; as in the case of the sky or the sky-flower, because there is no dependence on human effort in either.

As the one-self is an established reality, there can be no command with reference to it, even as there is nothing to be commanded about either. Even if the one-self be regarded as unestablished, like the sky-flower, it must be admitted that a command would be futile. In either case there is no place for human operation.

[657]

न विधिर्दर्शनेऽपि स्यादन्योन्याश्रयदोषतः ।

दर्शनाद्विधिसंसिद्धेर्विधेर्दर्शनसिद्धितः ॥ ६५७ ॥

Nor is there injunction in respect of seeing; for there would be the defect of reciprocal dependence thus: the injunction is established from the seeing, and the seeing is established from the injunction.

Nor may it be held that the injunction is with reference to seeing; for, that is not intelligible. Is the injunction in regard to seeing as such, or in regard to seeing Brahman (i.e. Brahman-knowledge)? If the first be the case, there is the contingency of injunction in regard to pot-cognition also. On the second alternative, there would be the defect of reciprocal dependence thus: for enjoining knowledge as qualified by Brahman, there must be the earlier knowledge of Brahman, and from the injunction of Brahman-knowledge

there is that knowledge: when Brahman is known, there is the injunction for that knowledge, and from that injunction there is the knowledge of Brahman.

NTV—aikātmya-siddhau tadviśeṣita-darśane vidhis siddhyati, tadvidhi-siddhau balād aikātmya-siddhir ity anyonyāśrayatā.

[658]

न च यूपादिवच्छक्यं वेदेनैव समर्पणम् ।

ऐकात्म्यस्य स्वतः सिद्धेः साध्यत्वाद्युपवस्तुनः ॥ ६५८ ॥

Nor is the oneness of self a contribution made by the Veda itself, as in the case of the sacrificial post (as auxiliary to injunction); for the oneness of self is self-established whereas the sacrificial post is what is to be accomplished.

It may be argued that the Veda offers Brahman as an auxiliary to the injunction of seeing, even as it offers the sacrificial post as an auxiliary to the injunctions of sacrifice.

But this argument is not sound. The sacrificial post is a product of action. Not so is Brahman which is the eternally established reality.

NKL—prakṛti-dravyasya siddhatvepi yūpākārasya asiddhatvād aikātmyasya tu kūṭastha-nityatvād rūpāntara-rahitatvād vā ity arthah.

AVS—yūpasya vastutvepi sādhyatvād vidheyatvaṁ ghaṭate, na tathaikātmyasya, kūṭastha-siddhatvāt.

[659]

सिद्धं चेद्दर्शयेद्वेदः प्रसिद्धं दर्शनं तथा ।

तन्निष्ठं च भवेद्वाक्यं व्यर्थता च विधेस्तदा ॥ ६५९ ॥

If the Veda reveals what is existent, then our view is established, and the text (*satyam*, etc.) will signify that (Brahman); so, the injunction would be useless.

So, the Veda offers Brahman, not as an auxiliary of injunctions but as the eternally established reality. By applying the sixfold marks of interpretation, it is learnt that the texts like 'Reality, intelligence, infinitude,'¹ etc., have Brahman for purport. If the Vedāntic texts have reality for purport, there is futility of injunction in regard to knowledge thereof.

¹*Tait.*, II, i, 1.

[660]

सर्वमात्मेति वाक्यस्य न च वस्तुन्यसंभवः ।

येनार्थस्यासमाप्तत्वात्क्रियेताध्याहृतिः पदे ॥ ६६० ॥

In the text 'All is self'¹ it is not impossible that the teaching is about the real. It is only where the sense is incomplete that a word implying (an action) is to be imported.

It may be contended that, without injunction, a sentence cannot make reality known.

This is not right. For one who knows the meaning of words such a sentence does convey sense.

1. See *CHU*, VII, xxv, 2; *BU*, II, iv, 6; *Maitrī*, vi, 7.

NTV quotes the text: *idam sarvam yad ayam ātmā* (*BU*, II, iv, 6).

[661]

आत्मा ब्रह्मेति विज्ञानं विधिं नैव व्यपेक्षते ।

यस्मात्तच्छतवाक्यस्य स्वयमेवोपजायते ॥ ६६१ ॥

The knowledge from the text 'The self is Brahman' is not expectant of an injunction; for it arises of its own accord in him who has heard the text.

Further, if it be held that Brahman-knowledge is enjoined, it must be stated what type of Brahman-knowledge is the content of the injunction. (1) Is it verbal knowledge of the text (*sābda*)? (2) Or, is it of the nature of contemplation (*bhāvanā*)? (3) Or, is it of the character of direct intuition (*sākṣātkāra*)? In the first alternative, there are the following sub-divisions: (a) Is the injunction for the sake of the generation of the verbal knowledge? (b) Is it for determining the content of the knowledge that has arisen? (c) Is it for the sake of the purport of the text? (d) Is it for making the knowledge subserve the human goal? (e) Is it because Brahman is not the object of any other *pramāṇa*? (f) Is it for relating the word-senses?

(1a) There is no need for an injunction to generate verbal knowledge. As soon as texts like 'The self is Brahman'¹ are heard, the knowledge of those texts arises without depending on an injunction.

¹ BU, II, v, 19; IV, iv, 5; *Māṇḍ*, 2.

[662]

यजेतेतिविधिज्ञानं न विध्यन्तरमीक्षते ।

विध्यन्तरेऽनवस्था स्यान्न चायं कर्मणि स्थितेः ॥ ६६२ ॥

The knowledge of the injunction 'Perform the sacrifice' does not depend on another injunction, for if it did, there would be infinite regress; nor does that other injunction require this, for it relates to action.

For one who has studied the Veda, even from the text there arises the knowledge that the self is Brahman; and there is no dependence on an injunction. This is just like the rise of knowledge from the *Svarga-kāma* text without dependence on another injunction. If this be not admitted, there would be infinite regress.

Thus, just as the knowledge of the obligation to perform a sacrifice arises from the text, even so Brahman-knowledge arises from the Vedānta-text.

[663]

प्रतिपन्ने विधेयार्थे प्रवृत्तिः फलमिष्यते ।

प्रवृत्तेश्च विधिज्ञानमेवमन्योन्यसंश्रयः ॥ ६६३ ॥

When the sense enjoined is known, there is the fruit, viz. activity; and when there is activity, there is knowledge of the injunction—thus there is reciprocal dependence.

There is another defect in the view that there is the need of injunction for the generation of the verbal knowledge of Brahman. The defect is reciprocal dependence as between the generation of knowledge and activity caused by injunction.

NTV—draṣṭavya-vidhivākyārthābodbhe sati tatra pravṛttiḥ, pravṛttasya ca tad-arthābodbho jāyata iti, itaretarāśrayatā syād ity arthaḥ anyonya-saṁśraya ity upalakṣaṇam śabdārthābodbhād eva śabdārthābodbha ity ātmāśrayasyāpi.

AVS—brahma-jñāne jāte tatra vidhiḥ, vidhiṭaḥ pravṛttasya taj-jñānam iti itaretarāśrayatvam iti.

[664]

बोधेऽस्मिञ्शब्दतो जाते न प्रवर्त्योऽफलत्वतः ।

अनुत्पन्ने च नितरां प्रवृत्तेर्हेत्वसंभवात् ॥ ६६४ ॥

If the knowledge of this (self) has been generated from the word, then there is no need to be prompted, for that has no fruit; and much less if it has not arisen, for there is no cause for activity.

Further, does the knowledge of Brahman arise from verbal testimony or not? If it does arise, then a person does not require the prompting of an injunction. If it does not arise, then, in the absence of a content, how can injunction function?

[665]

अथ निश्चयसिद्ध्यर्थमुत्पन्नेऽपि प्रवर्त्यते ।

स निश्चयो वः किं शब्दादथान्यस्मादितीयताम् ॥ ६६५ ॥

If it be held that even though the knowledge has arisen, there must be the prompting of activity in order that the knowledge may become certain, then it must be stated whether that certainty for you results from the word or from something else.

(1b) If it be said that even though verbal knowledge arises from the text, an injunction is necessary for making that knowledge determinate, we ask, is that determination born of verbal testimony itself, or of some other *pramāṇa*?

[666]

शब्दाद्यदि तदेवेदमायातं पूर्वदूषणम् ।

अन्यस्मिन्निष्यमाणे च सापेक्षत्वं प्रसज्यते ॥ ६६६ ॥

If it is from the word, then the defect mentioned earlier would result (i.e. *vidhi-vaiyarthya*); if something else is desired, then, the Veda would become dependent.

If the determination of the content of knowledge is from the text itself, an injunction is futile. If another *pramāṇa* is required, the self-validity of the Veda will be destroyed.

[667]

अविवक्षितनुत्तर्यर्थमथात्र विधिरिष्यते ।

अयं ज्ञेयोऽर्थ इत्युक्तौ स्याद्विवक्षितधीर्यतः ॥ ६६७ ॥

“Now, the injunction here is required for removing the unintended sense, for when it is stated ‘This sense is to be known’ there would be the knowledge of what is intended.”

(1c) *Pūrvapakṣa*—The injunction in regard to the knowledge generated by the text is for the sake of the purport of the text which is reality. In other words, the injunction makes the purport of the text the content of the knowledge resulting from the text. Negatively, what is not the purport will not become the content of the knowledge.

[668]

नैवमुत्सर्गतो यस्माच्छब्दानां लोकवेदयोः ।

विशिष्टार्थैकनिष्ठत्वं स्वतो न विधिहेतुतः ॥ ६६८ ॥

Not so; for words, both secular and sacred, as a rule, convey their qualified sense by their own capacity, and not because of any injunction.

Siddhānta—Words have their senses for purport, of their own accord, without depending on injunction.

[669]

अविशिष्टश्च वाक्यार्थस्तथा लौकिकवैदिक-

वाक्ययोर्गम्यते यस्माद्विधिर्नातो विवक्षितः ॥ ६६९ ॥

The same is the case with sentence-sense also; i.e., similarly the meaning of sentence, secular or sacred, is known; and so, there is no need for injunction.

The same is the case with sentences.

AVS—loke vede ca padasya vākyasya ca sva-sāmarthya-kṛtaṁ na vidhikṛtaṁ.

[670]

अपि दृष्टार्थतैकात्म्ये कर्मस्विव न भिद्यते ।

वेदाधीतिविधेस्तस्माद्विधिरत्र निरर्थकः ॥ ६७० ॥

From the injunction to study the Veda, there is the seen fruit (i.e. knowledge) in respect of oneness of self as in the case of actions; therefore, injunction is useless.

The injunction to study the Veda brings about its seen fruit which is knowledge. This is common to both the sections, *karma* and *jñāna*. Thus the Veda as such becomes purportful; and no injunction in regard to Brahman-knowledge is required.

[671]

विधेर्विध्यन्तरेऽभीष्टे कृत्स्नोऽप्यविवक्षितः ।

पूर्वोक्तेनैव न्यायेन नैव कल्प्यो विधिस्ततः ॥ ६७१ ॥

If for the injunction to study, another injunction be required, then the entire sense would go unintended; and by the reasoning mentioned earlier, an injunction need not be assumed.

It is settled that words as such have their senses for purport. Therefore, there is no need to assume an injunction in regard to Brahman-knowledge for the sake of that purport.

[672]

मतं पुमर्थसिद्धयर्थं ज्ञानस्य विधिरिष्यते ।

फलस्य विध्यधीनत्वादुपेक्षाफलताऽन्यथा ॥ ६७२ ॥

It may be thought that knowledge stands in need of injunction so that the human end may be accomplished ; for fruit depends on injunction, as otherwise the fruit may be regarded as unintended.

(1d) It may be said that injunction in regard to Brahman-knowledge is for making it subserve the human goal. Even as it is the injunction that makes sacrifice, etc., yield their fruit, it may be argued, an injunction in regard to Brahman-knowledge is necessary in order that that knowledge may result in *mokṣa*.

[673]

ज्ञेयव्याप्त्यतिरेकेण न विज्ञानात्फलान्तरम् ।

इष्यते कर्मवन्नातस्तदर्थं विधिकल्पना ॥ ६७३ ॥

Other than the pervasion of the object of knowledge, there is no fruit of knowledge, as in action ; therefore, for the sake of that there is no need for assuming injunction.

In reply, we ask, what is the fruit of knowledge ? Is it the ascertainment of the object ? Or, is it something else ? There is no need of an injunction to ascertain the object. If the fruit is something else, does it occur in the object of knowledge or in the knower ? The fruit of knowledge remains, of its own accord, in the knower ; and that does not require any injunction.

NTV—jñānasya sva-viśaya-nisciti-vyatirekeṇa phalāntaram nāsti.

[674]

यदाऽपि मातरि फलं तदाऽपि विधिनाऽत्र किम् ।

मातृमानप्रमेयादौ तत्सिद्धेर्विधिना त्रिना ॥ ॥ ६७४ ॥

Even if the fruit be in the knower, then also, of what use is injunction? For without injunction, that (fruit) is established in cognizer, cognition, cognized object, etc.

Now, it may be said that in order to cause the fruit of *pramāṇa*, which is in the cognizer, to appear in the object there must be an injunction.

But, this is not necessary. Just as experience shines as making known the cognizer, it shines also as making known the *pramāṇa* and the object.

AVS—yathā māna-phalaṁ saṁvedanam anubhavo mātr-sādhakatvena bhāti, tathā māna-meya-sādhakatvenāpi bhāti, ato na tad-arthaṁ vidhi-kalpanā.

[675]

अथापि कार्यविरहात्सिद्ध्यर्थमनुवादकम् ।

वचो नैव प्रमाणं स्यात्तस्य मान्तरसंगतेः ॥ ६७५ ॥

“Even then, because of the absence of *kārya* (injunction), a sentence which restates an existent fact would not be a *pramāṇa*, for of that, relation with other *pramāṇas* is possible.

(1e) It may be argued thus: A text that speaks of an existent entity will not become a *pramāṇa* in the absence of an injunction (*niyoga*); it will be only a re-statement of what is known through other *pramāṇas*.

[676]

विध्यर्थाङ्गीकृतौ त्वेतदनपेक्षं प्रमाणताम् ।

अश्नुते मान्तराभावाज्ज्योतिष्टोमादिवाक्यवत् ॥ ६७६ ॥

“ But if the sense of injunction is accepted, this will attain to the status of an independent *pramāṇa*, because there is no other *pramāṇa*, as in the case of the *jyotiṣṭoma* text, etc.”

If, however, an injunction is admitted, the text relating to an existent entity like Brahman will become a *pramāṇa*. Although by itself it may be only a restatement, it becomes unique on account of association with *niyoga*, and is to be classed with such texts as that about *Svarga-kāma*.

[677]

वस्तु मान्तरयोग्यं चेद्विधौ सत्यपि तत्तथा ।

अथ तन्मान्तरायोग्यं विध्यभावेऽपि तत्तथा ॥ ६७७ ॥

If the reality is capable of being known through other *pramāṇas*, that would be so even if there be injunction; if, on the contrary, it is not capable of being known through other *pramāṇas*, it would be so, even in the absence of injunction.

The reply to the above argument is as follows:—Is Brahman knowable through other *pramāṇas* or not? If it is knowable, it will remain so even in the presence of injunction. If it is not knowable through other *pramāṇas*, then also it will continue to be so even in the absence of injunction.

NKL—anātmatvaṁ māntara-yogyatve prayojakaṁ na siddhatvam ity abhisandhāya dūṣayati.

[678]

किं वाक्यस्यानुवादत्वं सिद्धेऽर्थे मान्तरेण वा ।

मिते तत्र न पूर्वस्मिन्सिद्धेऽप्यर्थेऽनुवादता ॥ ६७८ ॥

Is the sentence a re-statement because its sense is an existent reality or because the sense is known through some other *pramāṇa*? Here, even if the sense is known to be the first, viz. existent reality, there is no re-statement.

It was stated above by the *pūrvapakṣin* that the texts about existent entities like Brahman are re-statements. Is it contended that these texts are re-statements because they relate to an existent entity, or because their contents are known through other *pramāṇas*?

Although the Vedāntic texts teach about Brahman which is an existent entity, they are not re-statements.

[679]

मानान्तरानधिगतं सिद्धं वस्त्ववबोधयत् ।

मानं किं नानपेक्षं स्यात्पुमर्थश्च स्वरूपतः ॥ ६७९ ॥

The *pramāṇa* (*śruti*) which makes known an existent reality, not known through any other *pramāṇa*, why is that not an independent *pramāṇa*? And why is not that the human end, of its own accord?

The Vedāntic texts teach about a reality which is not knowable through any other means. So, they constitute an independent *pramāṇa*, like perception, etc. The knowledge of Brahman is not fruitless like the knowledge that there are seven continents in the world; for Brahman is of the nature of unexcellable bliss, and is the highest human goal. Therefore, the texts that have that for content cannot be invalid.

NTV—*na ca siddhārthataiva mānāntarādhigatatvaṁ sāpekṣatvaṁ ca bodhayet, pratyakṣānumānayoḥ siddhārtha-vastvavabodhakayor api mānāntarānadhigata - nirapekṣārtha - bodhakatva - darśanāt, tasmāt siddhārthe kāryārthe vā adhigamāntara-saṁsparsaḥ pramāṇāntarā-*

pekṣā-hetuḥ, smṛtau tathā darśanāt tasyādhigamāntara-sambhinnārthatvāt. tasmāt yathā kārya-vākyānām mānāntarānadhigata-vastva-vabodhakatvāt prāmāṇyam, evaṁ siddhārthānām api vedāntānām prāmāṇyam yuktam ity arthaḥ.

advayānandabodha-pratyagarthatvena tat jñānasya svarūpataḥ puruṣārthatvāt anuṣṭhānam nāpekṣate.

NKL — anavagata - pariniṣpanna - vastu - gocara - pratyakṣāder iva vacasopi prāmāṇyam aviruddham iti bhāvaḥ.

[680]

पुंबुद्धिविषयो ह्यर्थो मानान्तरमपेक्षते ।

अभावात्पुरुषस्येह न तु सिद्धोऽपि वैदिकः ॥ ६८० ॥

It is only that sense which is the object of human intellect that stands in need of other *pramāṇa*; since, here, there is no human agency, that which is revealed by the Vedic text, though an existent, does not require other *pramāṇas*.

It may be argued thus : the text that is in dispute is a re-statement, because it is about an existent entity, like the statement about a fruit-bearing tree on the banks of a river.

The reply is : The example given is a human statement; and what it is about can be known through other *pramāṇas*. Not so is Brahman. The Veda is not a human composition; and even its teaching about an existent reality must be unique.

NTV—puruṣabuddhi-prabhavaṁ bhūtārthaṁ kāryārthaṁ vā vacanaṁ bhavati sāpekṣam, tena hi puruṣabuddhi-sambhinna evārthe pratyayo jāyate, na tvanapekṣita-pūrvādhigama-svātantryeṇārthe.

न च सिद्धत्वमात्रेण शङ्क्यते मान्तरं क्वचित् ।

शङ्क्यमानस्य मानस्य तुल्या सापेक्षता यतः ॥ ६८१ ॥

Nor, merely because of the existent nature, is other *pramāṇa* anywhere assumed; for dependence (on other *pramāṇa*) will be the same for the assumed *pramāṇa*.

The following argument may be urged against us: Brahman is knowable through other *pramāṇas*, because it is an existent reality, like pot.

Our reply is that pot is knowable through other *pramāṇas*, not because it is an existent, but because it is an inert object.

It may be said, 'Even though no other *pramāṇa* for Brahman is known, it is possible to assume that there is one.' But there is no end to such assumptions. If it be held that in view of the other assumed *pramāṇa*, verbal testimony is invalid, may one not maintain that in view of verbal testimony, the other *pramāṇa* is invalid?

NTV explains the meaning of the first line thus: If, because the sense of Vedānta is an established entity, it is contended that it is known through other *pramāṇa*, then the same may be said about what is to be accomplished, because in the world we find all words having as their content what is known through some other *pramāṇa*.

yadi siddhatva-mātreṇa vedāntārthe mānāntaram āśaṅkyeta, tarhi kāryatvenāpi mānāntaram śakyam āśaṅkitum, loke sakala-sabdasya pramāṇāntarādhiyata-viśaye darśanāt.

As regards the second line, *NTV* says: *dvayor mānayor eka-viśyat-vena pramāṇāntara-sambhavāt, na śabda eva sāpekṣaḥ, tad api pramāṇāntaram śabda-sambhavāt śabdāpekṣyam syāt.*

[682]

न च सापेक्षताऽप्यस्ति मितेर्मानत्वतः क्वचित् ।

मानान्तरानवबुद्धं हि बोधयन्मानमुच्यते ॥ ६८२ ॥

Nowhere is there dependence for a *pramāṇa* because it is a *pramāṇa*; for indeed, that is said to be a *pramāṇa* which makes known what is not known through another *pramāṇa*.

The Vedic text which has the existent reality for purport—is it valid in regard to its own sense or not? If it is valid in regard to its own sense, surely there is no dependence for it on another *pramāṇa*. It cannot be maintained that it is not valid in regard to its own sense; for it makes known what is otherwise unknown; and that is exactly the function of *pramāṇa*.

[683]

मानान्तरानपेक्षं चेन्मानं मेयं प्रबोधयेत् ।

मानमेव तदा तत्स्यान्नातोऽन्यन्मानलक्षणम् ॥ ६८३ ॥

If a *pramāṇa* makes known an object, without being dependent on another *pramāṇa*, then that is truly a *pramāṇa*; there is no other definition of *pramāṇa*.

The definition of *pramāṇa* is that it makes known what is otherwise unknown.

NTV—*mānāntara-nirapekṣatayā meya-bodhakam mānam*.

NKL—*ajñātam aikātmīyam bodhayad vākyaṁ mānam eva, anava-gatāvagantrīvasya māna-lakṣaṇatvāt*.

[684]

अथ मानान्तरापेक्षं तन्मानं मेयबोधकम् ।

द्वयोरेकक्रियावेशात्तथाऽप्यन्यानपेक्षता ॥ ६८४ ॥

If that *pramāṇa* makes known the object, depending on another *pramāṇa*, then because both are included in a single act, even then there is no dependence on another.

We have already stated that there is no possibility of other *pramāṇas* in respect of Brahman. But even granting that there may be other *pramāṇas*, we maintain, Vedāntic texts do not become invalid; nor need they depend on those other *pramāṇas*. Two *pramāṇas* such as perception and inference may make known fire. On that account, they do not become dependent on each other.

NKL—śabda-taditara mānayoṛ ekasyāṁ vastu-bodhana-kriyāyām vyāpṛtatvād anapekṣatvaṁ tulyam iti pariharati.

[685]

अथानधिगताभावादुत्तरस्याप्रमाणता ।

तत्सद्भावात्तु पूर्वस्य ज्ञानस्यास्तु प्रमाणता ॥ ६८५ ॥

“If the latter is not a *pramāṇa* because there is no unknownness (of content), then, because there is that (unknownness) let the earlier knowledge have validity.”

Objection:—The verbal testimony that arises after another *pramāṇa* does not have an unknown content; so it is not valid. The earlier *pramāṇa* has, an unknown content; hence it is valid.

NTV:—Verbal testimony functions in respect of a content which has been made known by another *pramāṇa*; and so, it is not valid.

nanv ekasminn arthe prathamam ekaṁ mānaṁ pravartate, śabda-mānaṁ tu tasminn eva 'rthe caramaṁ pravartate, tatra prathamam ajñāta-jñāpakatvāt pramāṇam, caramaṁ punaḥ śabdaṁ jñāta-jñāpakatvād apramāṇam eveti śaṅkate—atheti.

[686]

मातोऽनधिगतत्वस्य सिद्धिः स्यादथवाऽन्यतः ।

स्वतो वा ज्ञाततायाश्च कुतः सिद्धिरित्येताम् ॥ ६८६ ॥

How is the unknownness of a thing established—through a *pramāṇa*, or through some other means, or by itself? (Similarly) tell me, how is knownness of a thing established?

Reply:—It is not possible for you to distinguish between knownness and unknownness, for neither of them can be established in your view.

Is the unknownness in regard to a thing, prior to the functioning of a *pramāṇa*, established through *pramāṇa*, or through the eternal experience, or because of self-luminosity? A similar question may be asked about knownness also.

[687]

अज्ञातत्वस्य माव्याप्तेः पूर्वमेव प्रसिद्धितः ।

ततश्च मानतः सिद्धिर्नाज्ञातत्वस्य कुतचित् ॥ ६८७ ॥

Since unknownness is there only before the functioning of *pramāṇa*, nowhere is that unknownness established through *pramāṇa*.

The unknownness is not established through *pramāṇa*, either in respect of the self, or in respect of the not-self; for that is established only prior to the functioning of *pramāṇa*, and the functioning of *pramāṇa* is admitted only in respect of a thing that is unknown.

Nor is the unknownness established through eternal experience; for such an experience is not admitted by you.

Nor is the unknownness established by itself; for such a view is acceptable to neither of us.

NKL—*ajñātatvaṁ na nivartakajātiya - prakāśyaṁ nivartatvāt tamovat.*

[688]

मानव्यातिक्षमं चेत्स्यादज्ञातत्वं घटादिवत् ।

वास्तवं स्यात्तदा रूपमज्ञातं च सदा भवेत् ॥ ६८८ ॥

If unknownness, like that of pot, were capable of being pervaded by *pramāṇa*, then that would be the real nature (of things); and then everything would remain always unknown.

If unknownness were established through *pramāṇa*, then it would not be removed by *pramāṇa*, and the nature of a thing would remain unknown even after the functioning of *pramāṇa*, as before.

NTV—*māna-siddhasya mānena nirākaraṇāyogāc cā 'jñātatvaṁ na māna-siddham.*

[689]

तथा संशयमिथ्यात्वबुद्ध्योरेष यथोदितः ।

न्यायो वाच्यस्ततः सर्वो व्यवहारो न सिध्यति ॥ ६८९ ॥

Likewise, in the case of knowledge of doubt and falsity, the aforesaid reasoning can be stated; so no empirical usage (*vyavahāra*) will be possible.

The same argument applies in regard to the knowledge of doubt and falsity.

Doubt, etc., are not established by the witness; for you do not admit this. Nor are they self-established; for such a view is not acceptable to both of us. Nor are they established through *pramāṇa*; for *pramāṇa* is what removes them.

NTV — kinca saṁśaya - mithyājñānāyor api svayamprakāśatvā 'naṅgīkaraṇāt, sākṣimātra-siddhatvasya ca parair anaṅgīkaraṇāt, pramāṇenaiva siddhir vaktavyā, tathā ca mānena nirākaraṇāyogāt, sarva-vyavahāralopa-prasaṅgaḥ.

[690]

अज्ञातत्वाविशेषेऽपि मानानां यदि मानता ।

ज्ञातस्याज्ञाततोऽन्यत्वाच्च स्यात्किं न मानता ॥ ६९० ॥

If there can be validity for *pramāṇa* even though there is no distinction in the unknownness, why should there be no validity in the case of knownness which is other than unknownness?

It may be argued thus: the unknownness of a thing remains the same both prior to and after the functioning of *pramāṇa*; yet this is not in conflict with the *pramāṇa*-nature of the *pramāṇa*; and so, without the removal of unknownness, the empirical usage of means and object of valid knowledge results.

This argument would, then, mean that the form as qualified by knownness and the form as qualified by unknownness have different contents; and so, even without causing any excellence in the unknown object, *pramāṇa* becomes valid. If this be so, then why should not verbal testimony be valid even without causing excellence in what has been known through some other *pramāṇa*?

[691]

एकार्थोपनिपातित्वात्सापेक्षत्वं यदीष्यते ।

तथा च सर्वमानानां सापेक्षत्वं प्रसज्यते ॥ ६९१ ॥

If dependence (for Scripture) be urged because the object is the same (as the one known by another *pramāṇa*), then all *pramāṇas* would be dependent.

If it be said that there would be invalidity for verbal testimony if it has the same content as other *pramāṇas*, then that would result for all *pramāṇas* having an identical content for their sphere; and all *pramāṇas* would become mutually dependent.

NTV — śabda-taditarapramāṇayor ekasminn arthe samāveśāt śabdasya sāpekṣatvam iṣyate, tathā ca pratyakṣādīnām api itareṣāṃ sarva-mānānām anyonyasmin gocare vṛtti-sambhavāt, anyonyāpekṣatvenā 'prāmāṇya-prasaṅgaḥ.

[692]

एकस्यामपि सत्तायां सर्वाक्षाणां प्रमाणता ।

द्रव्ये त्वक्चक्षुषोस्तद्वत्प्रसज्येताप्रमाणता ॥ ६९२ ॥

In respect of the very same existent all the sense-organs have validity; but in that case, there would be invalidity for the senses of touch and sight in respect of a substance.

If having the same content makes *pramāṇas* dependent and, therefore, invalid, then, visual and tactual perceptions of the same object must be invalid. But the latter is not the case; and so, it

must be admitted that even though Brahman is known through other *pramāṇas*, verbal testimony does not become invalid by being dependent.

*NTV — kimca śrotra-tvak-cakṣur-jihvā-ghrāṇānām sarva-pratyak-
ṣāṇām ekasyām sattāyām pravṛtteḥ sāpekṣatvena amānatā prasajyena...
ato brahmaṇi mānāntarānuprevesepi na sāpekṣatvenā 'prāmāṇyaṁ
śabdasya ity arthaḥ.*

[693]

नियोगे लौकिके चाऽपि हरीतक्यादिभक्षणे ।

मानान्तरासंभवेन प्रसज्येतानपेक्षतां ॥ ६९३ ॥

Even in the case of a secular injunction (*laukika-niyoga*) like the eating of the myrobalan, there would result independence as no other *pramāṇa* would be possible.

So far, we have argued against the view which holds that, since Brahman is an existent reality, the text about it cannot be an independent *pramāṇa*. Now as regards the contention that, since *niyoga* is not the content of any other *pramāṇa*, the text about that is independent *pramāṇa*. Here we have to ask: is *niyoga* not the content of any other *pramāṇa* because it is *niyoga* as such? Or, because it is Vedic *niyoga*? If the former, then even secular injunctions will become independent of other *pramāṇas*, which is not the case.

[694]

नैष दोषो नरज्ञानपूर्विका विनियोगधीः ।

येन लोकेऽस्त्यतोऽपेक्षा वेदे तु स्याद्विपर्ययः ॥ ६९४ ॥

“ There is not this defect; the knowledge of application (*sādhya-sādhana-sambandha*) is preceded by the knowledge of the human origin (of the injunction); hence, in the world, there is dependence; in the Veda, however, the opposite is the case.”

The *pūrvapakṣin* argues that there is no independence for human statements. The speaker gets to know the relation between the means and end, and then commands one to do a certain thing. Here, the injunction relates to a content that has been known already through some *pramāṇa*. So, there is dependence for the injunction. In the case of the Veda, however, it is different. Its content is not known through any other *pramāṇa*. Hence, the Vedic *niyoga* is independent.

[695]

नैवं सत्यनपेक्षत्वं वचसः कार्यसंश्रयात् ।

पुंबुद्धिपूर्वकत्वेन यतः सापेक्षतोच्यते ॥ ६९५ ॥

This being so, a sentence would not be independent because of association with *kārya*, for you say that it is dependent because it is subsequent to human knowledge.

The *siddhāntin's* reply : If what you have now said is true, then your original thesis goes under. Your thesis was that those texts which enjoin action are independent because they have what-is-to-be-done for purport, while those other texts which teach about an existent reality are dependent on other *pramāṇas*, because of the existent nature of their content. Just now, you have declared that human injunctions are dependent because they are human statements.

Then, it is only proper that you should admit that Vedāntic texts are not dependent because they are not human statements, even though they relate to what is existent.

AVS—evam-sati kārya-niṣṭhaṁ nirapekṣaṁ, siddha-niṣṭhaṁ sāpekṣaṁ iti pakṣo hataḥ, yataḥ pumbuddhi-pūrvakatvaṁ sāpekṣatva-prayojakam.

[696]

नैवं नियोगनिष्ठत्वाद्दे तेनानपेक्षता ।

सापेक्षत्वं च लोके स्याद्विनियोगप्रधानतः ॥ ६९६ ॥

“Not thus; in the Veda there is independence because of reference to *niyoga*; and there is dependence in the world because of the predominance of application.”

The *pūrvapakṣin* (i.e. the *niyoga-vādin*) says: In the Veda, the *liṅ*, etc., have *niyoga* for content, and this *niyoga* is not known through other *pramāṇas*; and therefore, the Vedic injunctions are independent. The secular injunctions, on the contrary, depend so much on the knowledge of procedure, etc., otherwise known; and so they are dependent.

[697]

नैवं शब्दार्थयोरैक्यं यदा स्याल्लोकवेदयोः ।

तदा न शक्यते वक्तुं वैलक्षण्यं तयोरिति ॥ ६९७ ॥

Not so; because words and meanings are the same in empirical usage as well as in the Veda, it is not possible to speak of any difference between them.

Reply: What you now say contradicts the *Lokavedādhi-karaṇa* (PM, I, iii, 10; vide note on v. 21). The suffix *liñ*, etc., cannot mean one thing in the Veda and quite another thing in secular usage.

[698]

स्वरूपलाभः सिद्धश्चेत्स्वतो वा यदि वाऽन्यतः ।

स्वरूपेऽनुपयोगित्वान्न प्रमाणव्यपेक्षणम् ॥ ६९८ ॥

If the nature of a thing has been established, either by itself or by something else, then, because it would not be useful so far as its nature is concerned, there would be no need for another *pramāṇa*.

The *pūrvapakṣin* contends that the texts that speak of an existent reality are dependent. With reference to this contention, we ask: What is meant by the established-nature (*siddhatva*)? Does it mean the establishment of its own nature? Or, does it refer to its manifestation? In either case, is the establishment by itself, or through some other? The first alternative is not acceptable. In regard to self-existence, other *pramāṇa* is not useful, for even without the latter, it is. Even if its existence is through something else, that does not depend on *pramāṇa*, for *pramāṇa* can bring about only cognition.

NTV—*tat-siddhatvaṃ nāma kiṃ svarūpa-lābhah sattālakṣaṇah, kiṃvā abhivyaktiḥ prakāśalakṣaṇā, ubhayam api svataḥ parato veti. tatra ādyaṃ dūṣayati-svarūpeti. svatas-satve na pramāṇāntaram upayujyate, tad-vyatiरेकेनāpi satvāt, anyataḥ satvepi na pramāṇam apekṣate, pramitimātra-kāraṇatvāt pramāṇasya.*

[699]

अभिव्यक्तोऽथ सिद्धोऽयं स्वतो वा यदि वाऽन्यतः ।

अभिव्यक्तस्य भूयोऽपि निष्फलं मान्तरेक्षणम् ॥ ६९९ ॥

If an existent thing has become manifest either by itself or through something else, then for manifesting it, again, there is no need for depending on another *pramāṇa*.

As regards the second alternative, we reply: whether the self is manifest by itself or by a *pramāṇa*, there is no need of another *pramāṇa* for its re-manifestation.

NTV—*svyamprakāśatayā vā pramāṇena vā 'bhivvyaktasya punar abhivvyaktaye mānāntaram nākāṅkṣitavyam niṣphalatvāt, anavasthānāc ca.*

[700]

तस्मान्न सिद्ध इत्येव संभाव्येत प्रमान्तरम् ।

नरोक्तौ मान्तरापेक्षा तेन मान्तरसंभवः ॥ ७०० ॥

Therefore, merely because a thing is an existent there is no need for another *pramāṇa*. As regards human statements, there is dependence on other *pramāṇa* because that is possible there.

Thus, just because a text is about an existent reality, it need not necessarily be dependent. With regard to human statements, however, it is intelligible that they are dependent; for, here, a man conveys to another through words what he has already come to know.

[701]

क्रियां विना न संसर्गः पदार्थानामथोच्यते ।

क्रियैवापेक्ष्यतां तर्हि किं न सिद्धं विधिं विना ॥ ७०१ ॥

If it be said that without *kriyā* (verb) the word-senses will not combine, then let *kriyā* alone be depended on. What, then, is not established without injunction?

(1f) Now, as for the alternative that injunction is required for relating the word-senses; (*vide* v. 661) what is it that is required here? If it is the verb (*kriyā*) that is required to combine the word-senses, let it be. How does it follow from this that the injunction to know is also required?

NTV—na vidheḥ kiñcit prayojanam asti 'ti pariharati—kriyaive 'ti. tathā hi śrutayo vidhiṁ vinā janikriyādvāreṇa brahma pratipādayanti.

[702]

क्रिया चापेक्ष्यमाणाऽपि न या काचिदपेक्ष्यते ।

योग्यत्वहेतुतस्तर्हि साऽस्त्येवास्यादिका श्रुतौ ॥ ७०२ ॥

Even though a verb is required, it is not any verb that is required; if the requirement is competency or fitness, then there it is in *Śruti*, in *art*, etc. (That thou art).

If a verb, that is competent, is required, then we have it in the text 'That thou art (*asi*).'

NTV—na hi kriyā-dvāreṇaiva padārthānām saṁsarga iti niyamo 'sti, kriyām antareṇā 'pi padārthānām saṁsarga-darśanāt.

[703]

अकर्मकत्वादस्यादेर्न तावत्कर्म विद्यते ।

अभूतभवनं चार्थे नित्यत्वादात्मनश्च न ॥ ७०३ ॥

Since *art*, etc., are intransitive, there exists no object; also, there is no becoming of what has not been, because the self is eternal.

Now, it may be urged, 'Let the action indicated by that verb be enjoined, because the fruit is dependent on the enjoined action.'

Here, what is the fruit? Is it an excellence created in the object? Or, is it coming into being of what has not been? Or, is it the knowledge of the relation between the *jīva* and *Brahman*?

It cannot be the first, because verbs such as 'art' have no object; they are intransitive. It cannot be the second, because the *jīva* is not to *become Brahman*; for it is that already.

[704]

असंसृष्टात्मबोधित्वान्नापि संसर्गधीरतः ।

स आत्मेत्यभिसंबन्धान्नापि सत्ता सतोच्यते ॥ ७०४ ॥

Because the non-relational self is taught, there is no cognition of relation; and because it is stated 'He is the Self', the term does not mean the generic nature 'existence'.

The third alternative too is not sound. The text 'That thou art' teaches sameness of essence; it does not convey any relation between the *jīva* and *Brahman*.

It may be said that the text 'Existence alone, dear one, etc.,' declares that *Brahman* is the generic nature 'existence,' and that the other text 'That thou art' specifies that reality as the self. But this is not proper; for, the self is devoid of generic nature and special feature. If it had these, it would become the not-self. So, it is wrong to hold that an injunction is required for bringing about the relation of the generic existence, *Brahman*, with a speciality.

[705]

शब्दाद्यगोचरोऽर्थोऽतो लक्षणापाश्रयाच्छ्रुतौ ।

सदित्यादिपदैरात्मा साक्षान्नः प्रतिपाद्यते ॥ ७०५ ॥

Therefore, for us in Scripture the words, *sat*, etc., directly teach, through secondary implication (*lakṣaṇā*), the self, a reality which is beyond the scope of words.

Scripture teaches the unconditioned reality through implication (*lakṣaṇā*)—a reality which does not have the distinction of generic and special. This reality cannot be taught through words with their express meanings, because categories such as generic nature, etc., do not apply to it. So, it is the secondary implication (*lakṣaṇā*) of words that should be understood in regard to the teaching of Scripture.

AVS — sadādi-padais tarhi kiṁ pratipādyam iti nirviśeṣam advayānanda - lakṣaṇaṁ pratyagbhūtaṁ brahma lakṣaṇāvṛtṭyā pratipādyam.

[706]

यदाऽपि मानयोग्यत्वं सत्त्वं तच्च प्रतीयते ।

तदाऽपि वस्तुपरता नाऽऽर्गमस्य विहन्यते ॥ ७०६ ॥

Even if existence (*sattva*) be understood as what is competent to be known through *pramāṇa*, Scripture having for purport reality is not impaired.

We have maintained so far the *siddhānta* that, in respect of *Brahman* which is existence-consciousness-bliss, the Vedānta is independent *pramāṇa*. Now, we shall argue that, even if 'existence' were the content of other *pramāṇas*, and if that itself is made known by Vedānta, there is no dependence of the Vedānta on those other *pramāṇas*.

We ask: are the other *pramāṇas* external to the object of knowledge or not? If they are external, then fitness to be known belongs to the object, and the Vedānta texts may reveal it independently, because they are competent by themselves.

[707]

मान्तरेणापि संबद्धमर्थं वाक्यं प्रबोधयत् ।

मानतां न जहात्येव जगत्यास्तवचो यथा ॥ ७०७ ॥

A sentence making known a sense related to other *pramāṇas* does not cease to be a *pramāṇa*, even as the words of a trustworthy person in the world.

Even if the other *pramāṇas* are not external to the sphere of the object, the Vedānta texts do not become invalid. These texts may well validly make known a sense which is the content of other *pramāṇas*. For example, the statement made by a trustworthy person (*āpta*) does not become invalid simply because it relates to a matter already known otherwise.

NKL—*māntarāvagata-gamakalaunikavākyaiva vedāntānām api prāmāṇyam.*

NTV—*loke āptavākyaṁ yathā mānāntara-sambhinnārtham api pramāṇam evaṁ vedāntavākyaṇy apī 'ty arthaḥ.*

[708]

ज्ञातः सोऽर्थो मयेत्यत्र नाऽऽप्तवाक्यं विहन्यते ।

मानान्तरव्यपेक्षत्वाद्विहन्येतार्थनिश्चितौ ॥ ७०८ ॥

“That sense has been understood by me”. Here the statement of the trustworthy person is not destroyed. As regards the determination of the sense (or object), it may be impeded, because that depends on other *pramāṇas*.

The statement of the trustworthy person is independently valid so far as that person is concerned. The knowledge is of the form: "This sense has been known by me." As regards this knowledge, there is no dependence on any other *pramāṇa*. As for the validity of the sense of the statement, that depends on the knowledge of the speaker. And so it is not independently valid.

AVS—āptavākyaṃ vaktrjñāne nirapekṣaṃ pramāṇam.

[709]

मायोगेऽपि न मानत्वमनाप्तवचसः क्वचित् ।

तेनाऽऽप्तवाक्यं मायोगे मानादर्थेऽपि निष्ठितम् ॥ ७०९ ॥

The words of an untrustworthy person are nowhere authoritative, though associated with other *pramāṇas*; therefore not only are the words of a trustworthy person valid but the sense also, even though known through the other *pramāṇas*.

The statement of the trustworthy person is valid in respect of the sense through the knowledge of the speaker.

AVS—anāptavākyaṃ vaktrjñāne 'pi na mānam.

[710-711]

एवं च सति वेदान्ता यदि मानमलौकिकम् ।

प्रबोधयन्ति विध्वस्तनिखिलद्वैतगोचरम् ॥ ७१० ॥

कथं तेषाममानत्वं तदा स्यादाप्तवाक्यवत् ।

अर्थसिद्धिश्च मासिद्धौ सिद्धैवेति न साध्यते ॥ ७११ ॥

And this being so, when the Vedāntas generate valid knowledge which is transcendental and which has for its sphere the destruction of the entire duality, how

can they be invalid, even as the words of a trustworthy person are not invalid? When the validity (of the Vedāntas) is established the object (Brahman) is also established, and so it is not to be established.

The statement of the trustworthy person was given as an example. The argument so far has been that the statement can be valid even though it has a content which has been known through some other *pramāṇa*. Now the nature of the exemplified is explained. Just as at the time the knowledge of the speaker is ascertained from his statement, the sense also is ascertained, even so when the Vedānta texts are known to be valid, their content *Brahman* also is established. When the said validity is either generated or known from the Vedānta texts, then Brahman-knowledge also is generated, and there is no need for any further *pramāṇa* to make known *Brahman*. Hence the Vedānta texts have independent validity in respect of Brahman-knowledge.

NKL—evam api vedāntānām vastuparatva-pratijñāhānir atrā 'ha, arthasiddhiḥ ceti. māsiddhau svarūpabodhasya vākyajanya-buddhivṛtti-vyāptau satyām arthasiddhir aikātmaviśayājñāna-nivṛttiḥ siddhaiveti. na punar vedāntaiḥ sādhyata iti nivaritakatvena vastuni prāmāṇyam ity arthah.

[712]

किंच चिद्धत्वसंबन्धादैकात्म्ये मान्तरानुमा ।

यथैवं कार्यतायोगान्नियोगेऽप्यनुमा न किम् ॥ ७१२ ॥

Further, if other *pramāṇas* be inferred in respect of the oneness of self because it is related to what is existent (*siddha*), similarly, why should there be no inference in regard to the *niyoga* which is related to what is to be done (*kārya*)?

It cannot be contended that other *pramāṇas* are possible in the case of *Brahman* because it is an existent; for, if that were so, even in the case of *niyoga* there should be admitted the possibility of other *pramāṇas* as in the case of direction, etc. And so, if a text relating to *niyoga* could be independently valid, a text about reality also could be so valid in the same way.

NKL—*aikātmyam māntara-gamyam siddhatvāt ghaṭavad ity anumāyām, niyogo māntara-gamyah kāryatvād adhyeṣaṇavad ity anumānāt tan-niṣṭhasyāpi sāpekṣatvam ity arthaḥ.*

[713]

नियोगस्यापि कार्यत्वं प्रेषणाध्येषणादिभिः ।

समं तद्वर्त्मनैवास्य संबन्धग्रहणं यतः ॥ ७१३ ॥

Of the *niyoga* too, the nature of what is to be done (*kāryatva*) is the same as of direction and entreaties; for through that channel alone its relation (to meaning) is understood.

It cannot be maintained that there is no parity between *niyoga* on the one hand and direction, etc., on the other. The nature of what-is-to-be-done (*kāryatva*) is the same. Hence, the *probans* mentioned above is valid.

NKL—*utkr̥ṣṭena nikr̥ṣṭam prati vyāpāraḥ preṣaṇā, satkārapūrvako vyāpāro 'dhyeṣaṇā, ādi-padena nimantraṇādi-saṅgrahaḥ.*

[714]

परायत्तात्मलाभत्वं नियोगस्येह कार्यता ।

कार्यैर्मन्तरगम्यैः सा न कथंचिद्विशिष्यते ॥ ७१४ ॥

The nature of what is to be done (*kāryatā*) in the case of *niyoga* is an accomplishment brought in by something else, *i.e.*, by *kāryas* understood through other *pramāṇas*: and that by no means is distinct.

Moreover, the to-be-done nature of *niyoga* is ascertained through other *pramāṇas*. We may formulate the inference thus; *niyoga* is known through other *pramāṇas*, as its being is dependent on something else, like the pot.

NKL—*niyogo māntara-gamyah parādhīnātmalābhatvāt ghaṭavat.*

NTV—*sukhaviśeṣakāmī kṛti-sādhyatvaṁ praiṣādīnām niyogasya ca tulyam, niratiśaya sukhakāmī kṛti-sādhyatvam niyogasya aprasiddham svargādes sātisayatvād ity arthaḥ.*

[715]

यत्त्वसाधारणं तस्य कार्यत्वमिति भण्यते ।

लौकिकेष्वपि कार्येषु तन्नैव विनिवार्यते ॥ ७१५ ॥

If it be said that its nature of being *kārya* is something uncommon, then that cannot be excluded from the *kāryas* of the world also.

If it be said that *niyoga* is what-is-to-be-done in an uncommon sense, then that statement would apply to secular *kāryas* also. There is no distinction between *niyoga* and direction, etc., because each is what is accomplished by an act.

NTV—*sukhaviśeṣakāmī-kṛtyuddesyatvaṁ praiśādiṣvapi samānam svargasyāpi sukhaviśeṣataya laukikatvād ity arthaḥ.*

AVS—*yathā niyoga-sādhyatvaṁ niyogasyaiva, tathā paṭāder api, na hi paṭasya sādhyatā ghaṭasya bhavati.*

[716]

अथासाधारणज्ञानपरिच्छेद्यत्वमिष्यते ।

तच्च सर्वपदार्थानां न दण्डैर्विनिवार्यते ॥ ७१६ ॥

If it be urged that (in the case of the *niyoga*) there is determination by some unique knowledge, then that cannot be prevented by batons in the case of anything.

If it be said that the to-be-done character of *niyoga* consists in its being the content of the knowledge that it is to be done, that would be true of direction, etc., also.

[717]

प्रमाणायत्तमेतावत्स्वप्नमेयावभासनम् ।

कार्यताऽकार्यता वाऽत्र मेयायत्ता न मानतः ॥ ७१७ ॥

This much only is occasioned by *pramāṇa*, viz., the illumination of the object of knowledge; whether something is to be done or not to be done depends on the object, not on the *pramāṇa*.

Moreover, if *niyoga* is the content of the knowledge of what-is-to-be-done, there would be for it the nature of being made known by a *pramāṇa* other than Scripture. Scripture only sets forth such matters as 'This is the means to what is desired', 'This is the means to what is not desired', etc. The cognitions 'This is to be done', 'This is not to be done', etc., are not conveyed by Scripture. These latter arise in the mind thus: 'This is the means to what I desire:

therefore, I should accomplish it', 'This other is contrary to what I desire; therefore, I should avoid it.' So, *niyoga* would thus be the content of the mental perception of what-is-to-be-done.

NTV—ayam arthaḥ—vedavākyam idam iṣṭasāadhanam idam aniṣṭasāadhanam iti vā bodhayati nedaṁ kartavyam nedaṁ akartavyam iti ca bodhayati, paścāt tu idam kartavyam idam na kartavyam iti mānasa-pratyaya upajāyate na tau śāstrārthau iti.

AVS—vedaśāstram idam iṣṭasāadhanam idam aniṣṭasāadhanam iti bodhayati, nedaṁ kartavyam idam akartavyam iti, tau tu pratyayau mānasau.

[718]

सिद्धत्वहेतुको योऽपि दोष एकात्म्य उच्यते ।

नियोगस्यापि संसिद्धौ स दोषो नापनुद्यते ॥ ७१८ ॥

The defect which is said to be caused in the case of the oneness of Self on account of its nature as existent—that defect cannot be warded off in the case of *niyoga* also, when it is established.

To the argument of the opponent that *Brahman* is known through other *pramāṇas* because it is an existent, it was replied above that *niyoga* too is known through other *pramāṇas*, though on the ground of some other reason. Now, the opponent's reason itself is given for proving that *niyoga* is known through other *pramāṇas*.

It is maintained by the *Mīmāṃsaka* that *niyoga* is only what-is-to-be-accomplished (*sādhya*) and not an established entity (*siddha*). But he is to be asked: When the appropriate action has been done, does *niyoga* get established or not? On the first alternative, *niyoga* becomes an established entity; and the defect pointed out by the opponent in the case of *Brahman* would affect *niyoga* also.

NKL—*anuṣṭhānottarakālaṁ niyogasyā 'pi siddher ity arthaḥ.*

NTV—*kiñca vidyamānatvena brahmaṇi mānāntarānupraveśa-doṣo niyogepi samānaḥ, niyogasyāpi anuṣṭhānottarakālaṁ sattvābhyupagamāt.*

[719]

यागादिविषयासिद्ध्या न चासौ न प्रसिध्यति ।

विध्युक्तेस्तदसंसिद्धौ निष्फलत्वं प्रसज्यते ॥ ७१९ ॥

Nor may it said that this (*niyoga*) is not established because the content of the sacrifice, etc., has not been accomplished; for if that is not established, the statement of the injunction would be futile.

It is not possible for the opponent to put forward the second alternative. If *niyoga* is not accomplished through the performance of sacrifice, etc., that performance itself would be futile. This would result in the futility of the injunctive text.

AVS—*vidhi-vākyasya nairarthakya-prasaṅgāt.*

[720]

ऐकात्म्यवस्तुयाथात्म्यप्रकाशनपटीयसः ।

वचसस्त्वतिरेकेण किं मानं तद्धुरं वहेत् ॥ ७२० ॥

Other than the texts which clearly expound the true nature of reality as the one Self, what *pramāṇa* can accomplish that task ?

So far the argument has been that, assuming that *Brahman* is known through other *pramāṇas*, it is easy to show that *niyoga* too is the content of other *pramāṇas*. Now it is stated that in respect of *Brahman* no *pramāṇa* other than the Vedānta texts is possible. There is no evidence for maintaining that there are other evidences for *Brahman*.

NKL—*brahmaṇi māntarānupraveśam abhyupagamyā pratibandhyā vedānta-prāmāṇyam sādhitam, idānīm tat-sambhāvanā nāstīti āha—aikātmyeti.*

NTV—*na kimapi mānam aikātmya-bodhāya pravartate rūpādihīnasya tasya mānāntarāyogyatvāt.*

[721]

मात्रादिसव्यपेक्षं सद्यत्र ज्ञानं प्रजायते ।

तत्रैव मान्तरापेक्षा न तु विध्वस्तभेदके ॥ ७२१ ॥

Where knowledge is generated as depending on the knower, etc., it is only there that there is need for other *pramāṇas*; not where all difference has been destroyed.

It cannot be argued that *Brahman* is known through other *pramāṇas* because it is not what-is-to-be-done (*a-kārya*) like pot; for the argument would hold good only in the case of a thing whose knowledge involves the distinction of cognizer, etc. In the case of *Brahman*, however, this distinction is not possible.

NKL—*aikātmyam māntara-gamyam bhāvatvāt kuṁbhavad iti cet, na, jadatvopādheḥ.*

[722]

विध्यर्थाधीनसंसर्गाः पदार्था वैदिकोक्तिषु ।

लोके मान्तरसंसिद्धसंसर्गा रचनाबलात् ॥ ७२२ ॥

“In Vedic texts the senses of words are related as dependent on the sense of injunction (i.e., *liṅ*, etc.); in the world, the relations are as established by other *pramāṇas*, on the strength of the arrangement.

Here the opponent objects: Even though in the case of *Brahman* the application of other *pramāṇas* be denied, the Vedānta texts cannot become *pramāṇa* by themselves. For what causes the combination of words, making them meaningful, is not found in the case of the Vedānta texts. The words in a Vedic text can convey meaning only when they relate to an injunctive suffix, *liṅ*, etc. In the case of secular words, their combination is caused by other *pramāṇas*, as is made known by the order of their arrangement, etc.

NKL—vedānta-padārtha-saṁsargo niyogādhīnaḥ vaidika-saṁsargatvāt karmavākya-padārtha-saṁsargavat.

AVS—vede 'pi vidhyadhīnaḥ padārtha-saṁsargo loke pramāntarādhīno racanānyathānupapattyā.

[723]

रचना च पदार्थानां विवक्षापूर्विकैव तु ।

प्रमाणान्तरगम्येऽर्थे विवक्षा च व्यवस्थिता ॥ ७२३ ॥

“And the arrangement of word-senses is preceded by the intention of the speaker; and the intention has reference to the sense which is understood through other *pramāṇas*.

Here the opponent explains how the combination of secular words is dependent on other *pramāṇas*.

AVS—pramāṇāntareṇā 'rtham adhigamya vivakṣitvā para-pratipattaye vākya-viracanāl loke saṁsargasya pramāntarādhīnatva-siddhiḥ.

[724]

एवं च सति वेदान्तवाक्यार्थप्रत्ययो भ्रमः ।

उत्खातविधिको लोके तोयबुद्धिरिवोषरे ॥ ७२४ ॥

“This being so, to think that Vedānta texts yield knowledge in the absence of injunction is a delusion, as is the empirical knowledge of water in a mirage.”

The opponent concludes: What makes the Vedic words combine is injunction. In the case of secular words the combination is caused by other *pramāṇas*. As regards the Vedānta texts, they have no author and therefore are not secular and you do not accept an injunction. So, the knowledge of their sense must be illusory, even as the knowledge of water in a mirage is.

[725-726a]

इत्युक्ते परिहाराय शृणु यद्व्यप्यतेऽधुना ।

पदार्थसंगतेः कस्माद्विध्यधीनत्वमादृतम् ॥ ७२५ ॥

पदार्थान्तरतन्त्रत्वं कस्माद्धेतोर्न कल्प्यते ।

If this be said, listen now to what is stated in reply. Why do you say that the relation of word-senses is dependent on injunction? And on what grounds do you not assume that it depends on other word-senses?

Siddhānta.—What causes the Vedic words—in fact, any words—to combine is there in the case of the Vedānta texts also. Your assumption that injunction is the cause is groundless. What make words to constitute a sentence are compatibility, expectancy, and proximity. These do characterize the words of the Vedānta texts. Therefore, the knowledge of their sense cannot be illusory.

NKL—*yogyetarapadārthādhīnaḥ saṃsargo na liṅādyarthādhīnaḥ iti pariharati.*

NTV—na vidhis sākṣāt saṁsarga-sāmānyam tad-viśeṣam vā bodhayati, tasmāt padārtha-saṅgateḥ vidhyadhīnatvaṁ nādartavyam ... kiṁtu padārthāntara-tantratvam eva kalpayitavyam ... viśiṣṭārthaparatayaiva padānām prayogāt.

[726b-727a]

संसर्गश्चेत्पदार्थानां विनाऽपि विधिना भवेत् ॥ ७२६ ॥

अनर्थको भवेदेवं विधिर्निर्विषयत्वतः ।

“If the relation of word-senses be obtained even without injunction, injunction would then become useless, being without any purpose.”

Pūrvapakṣa.—If the relation of words in a sentence be effected by compatibility, etc., injunction would be futile.

[727b-728a]

ननु दोषः समानोऽयं विधेरन्यपदेष्वपि ॥ ७२७ ॥

विशिष्टार्थावगत्यर्थं प्रयुज्यन्तेऽपराण्यपि ।

Now this defect is common to words other than those of injunction; the others also are employed for the sake of making known some qualified sense.

Siddhānta.—If the relation of words depended on the injunctive verb, then, what about the other words like noun, etc.? Will they not become futile? So, all words are employed to signify a qualified sense.

NTV — prayujyanta ity upalakṣaṇam pratipadyanta ity api draṣṭavyam.

nahi loke padaiḥ svārthāḥ svarūpamātra-niṣṭhatayaiva pratipadyante, tathā sati śrotuḥ vyavahārānupapatteḥ, kiṁtu viśiṣṭhārtha-pratyaya-prayuktāḥ tathā sati vyavahāropapatteḥ.

tathā ca sati pratipadārtham saṁsargāpekṣa iti bhāvaḥ.

[728b-729a]

एवं सति विधिः कस्मान्नानर्थक इतीर्यताम् ॥ ७२८ ॥
योगक्षेमसमानत्वादविध्यर्थपदान्तरैः ।

This being so, say, how is not injunction futile? Because its fortunes are the same as of other words which do not have an injunctive sense.

The injunctive verb has no special virtue as against the other words. If you say that the injunctive verb would be futile if the other words are not related to it, we may as well reply that the same would be the fate of the other words.

NKL—ubhayor ānarthakyaṁ samam ity arthaḥ.

[729b-730a]

उच्यते विधिशब्दो हि मान्तराज्ञातगोचरः ॥ ७२९ ॥
न तस्य विषयाक्षेपं मुक्त्वाऽन्यत्र कृतार्थता ।

“This is the reply. The injunctive word, indeed, has for its sphere what is not known through other means of knowledge. Nor does it fulfil itself except through presenting its content (viz. relation).

Pūrvapakṣa.—The difference between the injunctive verb (with suffix *lin*, etc.) and the other words is this: Although the injunctive word has *niyoga* as its sphere, *lin*., etc., will not indicate *niyoga* in the absence of the latter’s content which is the relation (*samsarga*) of words.

[730b-731a]

मानान्तरप्रसिद्ध्यर्थवादित्वादनुवादकम् ॥ ७३० ॥
विधेरन्यपदं यस्मान्नाऽऽक्षेपोऽतः प्रतीयते ।

“A word other than injunctive words is a restatement, because it is explanatory of what is established by other means of knowledge; therefore implication is not seen in its case.”

Other words such as nouns are but re-statements; they do not bring in the relation, as the injunctive word does.

[731b-732a]

अव्युत्पन्नेऽपि संबन्धे विध्यर्थावगमस्तथा ॥ ७३१ ॥

अथ विज्ञातसंबन्धं सिद्धार्थं स्याद्विधायकम् ।

Then, the sense of injunction would be known even when there is no knowledge of the relation. Or, if the relation has been known, then the injunction would relate to what has been established.

Siddhānta.—Admitting that *liñ*, etc., have for their sense *niyoga* that is not known through any other *pramāṇa*, we ask, do *liñ*, etc., make known *niyoga* even when the relation between the two is not known, or not? If the first, there would be *niyoga*-prompted activity on the part of one who hears *liñ*, etc., but has not understood the meaning. If *liñ*, etc., make known *niyoga* when the relation has been understood, then it would result that they convey a sense that is already known; and there would be no difference between *liñ*, etc., on the one hand, and nouns, etc., on the other.

[732b-733a]

स्वधर्मं च पदं जह्यात्संबन्धज्ञाननिवृत्तौ ॥ ७३२ ॥

तस्माद्विज्ञातसंबन्धं पदं सर्वत्र बोधकम् ।

And, if the knowledge of relation is denied, a word would lose its nature (*dharma*); therefore, everywhere word conveys meaning only when the relation is known.

It is wrong to hold that *liñ*, etc., convey their sense, even when their potency remains unknown. A word conveys its sense only when the relation between the two is known, not otherwise. This applies to both secular and Vedic words.

NTV—saṁbandhajñānāpekṣayā bodhakatvaṁ pada-dharmah, tan-nirapekṣatayā bodhakatvaṁ vākya-dharmah.

tasmāt grhīta-saṁbandham eva loke vede ca padaṁ padārtha-bodhakam saṁsarga-bodhakam ca.

yady api mānāntara-siddhārthaṁ padam anuvādakam tathāpi loka-vedayoḥ pramāṇāntareṇa padārthānām saṁsarga-yogyatāvagame satyapi pūrvam eva saṁsargaṁ śrotā budhyate, apūrvāgamārthatvāt vākya-proyogasya, anyathā vākya-prayoga-vaiyarthya.

[733b-735]

इतोऽन्यथा कल्प्यमाने सर्वं स्यादसमञ्जसम् ॥ ७३३ ॥

वाक्यवाक्यार्थयोगश्चेद्वाच्यवाचकलक्षणः ।

तद्विशेषैकनिष्ठत्वान्न वः संबन्धधीर्भवेत् ॥ ७३४ ॥

न विशेषान्तरे वृत्तिर्विशेषस्यास्ति गोत्ववत् ।

नैराकाङ्क्षेण तत्सिद्धेः संबन्धोऽतो न गृह्यते ॥ ७३५ ॥

If it be assumed otherwise, everything will be inconsistent. If it be said that the relation of expression and expressed is as between a sentence and sentence-sense, then, since each sentence would refer to a distinct content, there would be no knowledge of relation. A particular content has no capacity for referring to another content, e.g., cowness. Since each is established independently, the relation would not be understood.

If it be said that, although in the world words require the apprehension of potency, in the Veda they do not require this, there would result a number of defects: (1) Words would go beyond their own nature, which is to convey their sense being dependent on the apprehension of the relation between them and their sense. (2) Words would play the role of sentences. (3) There would be transgression of the rule that the Vedic words are similar to the secular words in the matter of conveying their sense. These are the inconsistencies.

It may be said that the relation of expression and expressed is between sentence and sentence-sense, and not between word and word-sense, and that, since the sentence-sense which is *niyoga* is not made known by other *pramāṇas* there is not the said defect. But this statement is not sound. If each sentence has a unique sense, there would be no principle in language. The sentence 'Bring the cow' would have nothing in common with the sentence 'Tie the cow.' This, however, is not the case. 'Cowness' is meaningful only in dependence on particular cows such as *khaṇḍa*; and 'bringing' is significant because it occurs in other sentences such as 'Bring the horse.' Moreover, if the relation of a sentence to its sense is apprehended, then it must be admitted that that sense is made known through other *pramāṇas*. Therefore, the knowledge of relation is with reference to words and not sentences. And, when the relation remains unknown, a word cannot convey its sense.

[736-737a]

संबन्धं मन्यते योऽपि शाब्दबोधानुसारिणीम् ।

दृष्ट्वेहां श्रोतृगां सोऽपि न सम्यगभिमन्यते ॥ ७३६ ॥

श्रोतृस्थकार्यलिङ्गत्वात्कथं शब्दैकगोचरः ।

He who holds that the relation is after seeing the act of the hearer (intermediate elder) in accordance with the knowledge derived from words—he does not think

well; for since it (*niyoga*) is inferred from the act of the hearer, how can it be the sphere of words alone?

The *niyogavādin* may argue thus: The superior elder (grandfather) gives an order to the intermediate elder (father). The boy (son) sees the intermediate elder carry out the order. He connects the words he hears with the action he sees. Thus he understands the relation between *liñ*, etc., and *niyoga*.

Here it is to be pointed out that the argument is not valid. The argument would involve reciprocal dependence thus: The cognition of *niyoga* arises from the word whose relation has been known; and from the cognition of *niyoga* there takes place the knowledge of relation. Even if this defect be removed somehow, it would be impossible to show that *niyoga* is known through word alone, for according to the explanation given by the Mīmāṃsaka it is inferred from activity.

[737b-738a]

तस्यापि शब्दपूर्वत्वादिति चेद्विद्मपूर्वतः ॥ ७३७ ॥

कस्मान्न शब्दबोधोऽपि ह्यनुमानपुरःसरः ।

If that too is said to be understood from word before any inference, then why should not the knowledge of word also be preceded by inference?

If it be said that inference based on the activity of the intermediate elder is preceded by the *niyoga* understood from the words of the superior elder, we reply that for the hearer the knowledge of *niyoga* from the words is preceded by the inference. Thus there is parity between the inference and the words.

NTV—*śrotr-gataśabdajñānam api anumāna-pūrvakam ity anumānaika-gocaratā kiṃ na syāt.*

[738b-739a]

नियोगं शब्दतो बुद्ध्वा योऽपि श्रोता प्रवर्तते ॥ ७३८ ॥
तस्याप्यनुमितेरेव शब्दार्थप्रत्ययो भवेत् ।

The hearer who is active after knowing the *niyoga* from the word—for him also the knowledge of word-sense there will be only through inference.

We may even say that the inference has precedence over the words. Activity in respect of the sense of *liñ*, etc., at the time of learning does depend on the inference. So, the inference comes first.

NTV—sva-vyutpatti-kāle anumānād eva śrotuḥ niyogāvagamah na śabdāt.

[739b-740a]

प्रत्यक्षगम्यकार्येण नियोगस्यानुमेयतः ॥ ७३९ ॥
प्रत्यक्षकार्यवत्तस्य लौकिकत्वं प्रसज्यते ।

Since the *niyoga* is inferred from the *kārya* which is known by perception, there is the contingency of its becoming secular, like the perceived *kārya*.

Since the activity that is seen is the *probans* for inferring *niyoga*, verbal testimony (words) cannot be regarded as the only *pramāṇa* for *niyoga*, even as for a pot.

NKL—indriya-gamya-pravṛttirūpa-kāryaliṅgānumeyatvāt ghaṭavan na śabdaikagamyatvam.

AVS—ghaṭādivan niyogaḥ śabdaika-gamyo na bhavati.

[740b-741a]

न चेत्कार्यं नियोगः स्यात्कोऽर्थो यागादिसिद्धितः ॥ ७४० ॥
सिद्धवस्त्ववबोधित्वं विधेरपि तदा भवेत् ।

If the *niyoga* is not a *kārya*, then for what purpose is the accomplishment of sacrifice, etc.? And in that case, even the injunction would be making known an existent thing.

It may be urged that pot is no illustration for *niyoga*, as *niyoga* does not belong to the three-fold time and is not what is produced. But we reply: if *niyoga* is not what is produced, the performance of sacrifice, etc., is futile. Nor may it be said that the performance of sacrifice is for the sake of heaven, for that is not possible except through *niyoga*. Moreover, if *niyoga* is not what is produced, and as its unreality is not acceptable to you, you must necessarily admit that *niyoga* is an eternally established entity. If that be so, *lin*, etc., which convey knowledge of it must be taken as making known what is established.

[741b-742a]

प्राथम्यं चात्र दुर्लक्ष्यं बीजतत्कार्ययोरिव ॥ ७४१ ॥

शब्दानुमानयोर्नातः शब्दप्रथमतेष्यते ।

Between word and inference it is difficult to indicate the priority, as between seed and its effect; therefore, it cannot be stated that word is prior.

Verbal testimony and the inference from activity are related as seed and sprout. And so, it cannot be maintained that *niyoga* is understood from verbal testimony alone.

NTV — *bījāṅkurayor iva śabdānumānayor ekasya prāthamyam vyavasthāpayitum na śakyam śabdāvagatasyā 'numānād anumitasya viditasāṅgateḥ śabdāvagamāt.*

[742b-743a]

यद्वाऽनुमानमेवात्र शब्दात्पूर्वं हि युज्यते ॥ ७४२ ॥

नावित्तसंगतिः शब्दो गमकोऽतोऽनुवादकः ।

Or, it is proper to state here that inference alone is prior to word; for a word whose relation has not been understood does not make known (its sense); it will only restate.

Of the two, verbal testimony and inference from activity, the latter is primary; for, as has been shown already, words will convey their meaning only when their potency has been known. If *niyoga* is known through inference, *lin*, etc., must be regarded as re-stating it.

[743b-744a]

बुध्यते योऽनुमानेन शब्दबुद्धं न वेत्ति सः ॥ ७४३ ॥

भिन्ने भिन्नेऽपि मेये धीर्नानुवादोऽन्यबोद्धरि ।

He (the child) who understands through inference does not know what is revealed by the word; the knowledge of that or a different object of cognition is not a re-statement in the case of another knower.

Nor may it be contended that the inference may be a re-statement; for the child who hears the words does not understand the sense; it understands only as an inference from the intermediate elder's activity. It is true that the child's inference is subsequent to its hearing the words of the superior elder. But thereby the child's inference does not become a re-statement. When a pot has been seen by Caitra, and when subsequently Maitra sees the pot or some other, the knowledge that Maitra has is not of the nature of a re-statement.

NTV — sarva-pratipattirñām avyutpanna-sabdāt bodhotpatty anupapatteh.

[744b-745a]

प्रवृत्तिहेतुमात्रं च प्रवृत्त्याऽलानुमीयते ॥ ७४४ ॥

लौकिकेनापि तत्सिद्धेर्नास्ति मानमलौकिके ।

The mere cause of activity is here inferred from the activity; since that is achieved even through what is secular, there is no evidence for the supernormal (*niyoga*).

Admitting for the sake of argument that *niyoga* is inferred from activity, it was shown earlier that *niyoga* is on a par with other things. Here it is stated that *niyoga* is not even what is inferred from activity. He who hears the words and sees the activity infers only the cause of that activity, and not any supernormal *niyoga*.

NTV—vaidikīṣv api pravṛttiṣu laukika eva pravṛttihetur yuktaḥ lokāvagata-sāmarthyasyaiva śabdasya vede 'pi bodhakatva-niyamāt.

[748b-749a]

नियोगोऽथ प्रमारूपो विधिशब्दप्रकाशितः ॥ ७४८ ॥

मानान्तरानपेक्षः सन्नाक्षेपकतया प्रमा ।

“Now, the *niyoga* which is made known by the injunctive suffix has the nature of validity; because it does not depend on any other means of knowledge, it is valid by implying (relation).”

Pūrvapakṣa—What is expressed by *liṅ*, etc., viz. *niyoga* has validity; it is not expectant of any other *pramāṇa*; and it is not of the nature of a re-statement. *Niyoga* is not possible without the relation to instrument, etc. So, as implying that, *niyoga* is valid.

[749b-750a]

आक्षेप्तृत्वं न शब्दोत्थं न च मानान्तरात्तथा ॥ ७४९ ॥

अव्युत्पन्नप्रवृत्तिश्चेत्युक्तदोषप्रसङ्गतः ।

The nature of being the implier is not derived from the suffix (*liñ*, etc.), nor from any other means of knowledge. And, because of the contingency of the aforesaid defect, there would be activity on the part of one who has not understood (the word-sense).

Siddhānta—*Niyoga* implying the relation—is it established from word or from something else? Not the first: this is not known from *liñ*, etc., for these latter get exhausted after making *niyoga* known. Nor the second: for it is not seen that some other *pramāṇa* establishes the alleged implication by *niyoga*; if that were so, even *niyoga* would become the content of that *pramāṇa*. And, if *niyoga* were dependent on some other *pramāṇa*, there would be no *apūrvatā* for it.

[750b-751a]

स्वाभ्युपेतनयस्यैव त्यागः प्राप्नोत्यनीप्सितः ॥ ७५० ॥

प्रामाण्यं चास्य यत्नेष्टं श्रुतेस्तत्तास्त्वनेन किम् ।

Without your willing it, you will have to give up the position acceptable to you. The validity of the *niyoga*, where it is desired, there let it be on the basis of Scripture. Of what use is it?

If you say that activity is only for him who has not understood the meaning of *liñ*, etc., that he has heard, you will be contradicting the view that is acceptable to all schools of thought, viz., that the empirical usage based on verbal testimony is only for him who has understood the meaning.

NTV—*yatra niyogasya prāmāṇyam iṣyate śabdasyaiva tatrā 'stu prāmāṇyam kiṁ niyogena?*

[751b-752]

क चेष्टमस्य मानत्वं न यागादौ स्वशब्दमे ॥ ७५१ ॥

लौकिकोऽपि न संसर्गो विध्यायत्तः स्थितो यतः ।

विध्यभावे हि संसर्गः श्रोतुरस्त्यविधावपि ॥ ७५२ ॥

And, where is its validity desired? Not with reference to sacrifice, etc., where the evidence is the word setting it forth; nor is the relation known from secular usage dependent on injunction, for the hearer understands the relation even in the absence of injunction from a text which is non-injunctive.

Moreover, in respect of what is there validity for *niyoga*? It is not in respect of sacrifice, etc.; for these latter are known from such words as *yāga*, etc., themselves. Nor is it in regard to relation between words and senses; for the relation between the words such as *yāga* and their senses is not dependent on *niyoga*, as it is what belongs to worldly usage. Even in regard to sentences such as 'This is the king's man' which are not commands, the hearer understands the relation between the words and their senses. Since the relation is seen even in the absence of *niyoga*, the relation must be admitted as what is based on worldly usage.

NTV—*natāvad yāgādayo niyoge prameyāḥ teṣāṃ yajatyādi-śabda-mānatvād ity āha na yāgādau svaśabda iti. nāpy apūrve saṃsarge niyogaḥ pramāṇam ity āha laukiko 'pī 'ti. vidhipadarahiteṣu laukika-vākyeṣu vidhyarthābhāve 'pi śrotur anadhigatopūrvāḥ saṃsargaḥ pratiyate, devadatta diṣṭyā vardhase, putras te jātaḥ, ityādāv iti hetum āha yato vidhyabhāve 'pī 'ti.*

NKL—*yāgādi-padārtha-saṃsargo na vidhyadhīno laukikatvād ity arthaḥ rājñāḥ-puruṣaḥ ityādi-vidhivikalavākye saṃsarga-darśanād ity arthaḥ.*

[753]

फलसाधनशक्तिश्चेद्विध्यायत्ता भविष्यति ।

नैवं तत्रापि शब्दस्य सामर्थ्यं केन वार्यते ॥ ७५३ ॥

If it be said that the capacity to bring about the fruit depends on injunction, not so; for why should the capacity of the word even there be prevented?

Nor may it be said that *niyoga* is the evidence for sacrifice, etc., being the means to what is desired; for it can be shown even here that the words themselves may convey this meaning.

[754]

तस्मादितरतुल्यत्वान्न विध्यर्थनिबन्धनः ।

संसर्गः स्यात्पदार्थानां सुस्थमेवं विधिं विना ॥ ७५४ ॥

Therefore, because of similarity with others, the connection of word-senses is not dependent on the injunctive sense; this is thus well-settled without injunction.

It has now been established that an injunction is not necessary in the matter of knowledge through verbal testimony. And so, it is settled that there can be knowledge of texts such as 'The self is Brahman' even without an injunction.

NKL—niyogābhāve 'pi vedaprāmāṇyam sūstham ity arthaḥ.

[755]

तस्मात्सर्वपदार्थानामाकाङ्क्षायोग्यसन्निधेः ।

परस्पराभिसंबन्धाद्विशिष्टार्थावबोधिता ॥ ७५५ ॥

Therefore, all word-senses convey a qualified meaning by mutual relation, because of expectancy, competency, and proximity.

The relation of word-senses is thus not dependent on injunction. The word-senses get mutually related as conditioned by expectancy, etc. And, it is in this way that words cause the cognition of a qualified sense.

NKL—*ayam eti putro rājñah puruṣo 'pasāryatām ity atra rājña-padasya putra-padādinā 'nvyasya nirākāṅkṣasya puruṣa-padena anvayād ākāṅkṣā sambandhakāraṇam, agnīnā siñced ityādaḥ ayogyayor ananvayād yogyatā 'pi kāraṇam, bhinnavākyagatayor asaṁsargāt sannidhir api hetur ity arthaḥ.*

[756-757]

ननूत्पत्तिविधिर्यद्वत्कर्मबोधे व्यवस्थितः ।

कर्माधिकारवच्चाल प्रवृत्तिरपि सेत्स्यति ।

अप्रवृत्तप्रवृत्तिश्च तथाऽबुद्ध्यर्थबोधनम् ॥ ७५७ ॥

“Now, as originaive injunction (*utpattividhi*) is established in the case of knowledge of rites, so also let there be established the injunction of self-knowledge in respect of knowledge of the self. And, like eligibility for rites, here activity will also result: the activity of one who has not been active, and likewise the knowledge of a sense not already known”.

Here the *pūrvapakṣin* seeks to show that there are two types of injunction in regard to the Vedānta texts: originaive injunction (*utpatti-vidhi*) and injunction of eligibility (*adhikāra-vidhi*) ‘He is to offer the *agnihotra* oblation’ is a case of originaive injunction; similarly there is the injunction of self-knowledge in the form, ‘The self is to be seen’ (*ātmā draṣṭavyaḥ*). There is also the injunction of eligibility in the text ‘He who desires release should be active in respect of knowledge’ (*mokṣa-kāmaḥ prajñāṁ kurvīta*). The originaive injunction makes known what is unknown; the injunction of eligibility makes one who is not active active.

NTV — vastusvarūpamātra - jñānaṁ kartavyatā - jñāna - rahitaṁ pravṛtti-nivṛtti-sūnyam anarthakaṁ, pravṛtti-nivṛtti-prayuktatvāt vākya-pravṛtteḥ, ato vākyaśyā 'rthavatvāya vidhiḥ prārthanīyaḥ, anyathā 'narthakyam iti tad anuvadati nanv ityādinā.

NKL—āgneyo 'ṣṭākapālaḥ kartavya ity utpattividhiḥ karma-kartavyatā-jñāne paryavasyati, na pravartayati evaṁ ātmā draṣṭavya iti vidhir jñāna-kartavyatāyām paryavasyati, na pravartayati.....āgneyo 'ṣṭākapāla-ityādinā utpannasya darśapūrṇamāsyām svargakāmo yajeta-ityanena pravṛttiḥ, tadvad vijñāya prajñāṁ kurvīta ity adhikārabalān mokṣakāmīno 'vahita-jñāne pravṛttiḥ.

AVS—yathā āgneyo 'ṣṭākapālaḥ kartavya ity utpattividhiḥ karma-kartavyatā-jñāne paryavasyati, na pravartayati, evaṁ ātmā draṣṭavya ity ātmajñāne vidhir ātmajñāna-kartavyatāyām paryavasyati, na pravartayati.

[758]

एवं विधिमिहेच्छन्ति विध्ययोग्येऽपि वस्तुनि ।

विधिरागवशात्केचित्तान्तप्रतीदमथोच्यते ॥ ७५८ ॥

Thus some people, because of attachment to injunctions, desire injunction even in a matter which does not admit of injunction. As against them, this is stated.

The *siddhāntin* introduces his reply.

[759]

कर्मस्वरूपबोधे हि व्यापारो नेष्यते विधेः ।

किंतूत्पन्नस्य सापेक्ष्यादधिकारेण संगतिः ॥ ७५९ ॥

The operation of the injunction is not desired for knowing the nature of ritual only; but also for the connection of what has been originated with the eligibility (*adhikāra*), since it depends on that.

It was stated by the *pūrvapakṣin* that the originaive injunction simply makes known what is unknown, i. e. that its function is merely to inform about the nature of a particular ritual. This definition is not satisfactory. The mere knowledge of the nature of a ritual carries no fruit. So, the originaive injunction will not stop till there is the application of the ritual through the instrumentality of relation with the *niyoga* leading to the appropriate fruit.

NKL—*utpannasya karmaṇaḥ phalākāṅkṣatvād adhikārasaṁbandha-niyogadvārā anuṣṭhāne paryavasyati.*

[760]

अधिकारप्रवेशित्वं नाऽऽत्मज्ञानस्य युज्यते ।

यस्याधिकारसंबन्धः स आत्मा न विधीयते ॥ ७६० ॥

Self-knowledge cannot properly be included in the eligibility. He who is related to the eligibility—the self—cannot be the enjoined.

It cannot be urged that the self-knowledge, whose nature is made known by the injunction ‘The self is to be seen’ is related to eligibility; for the self-knowledge which is said to be enjoined as what is to be gained cannot be the content of an injunction of eligibility. Self-knowledge is not a matter of faith, as heaven is; it has its *pramāṇa*; and also, as it is not dependent on human will or activity, it cannot be related to eligibility. Nor may it be said that since the self is the master, it is related to eligibility, and through that self-knowledge also gets related to eligibility; for it must be first stated which is the self that is so related? Is it the transmigrating soul, or the supreme Self? Although the transmigrating soul is related to eligibility, it cannot be what is enjoined, for it is an established entity. It cannot also be the content of the knowledge that is enjoined; for the transmigrating soul is not the object of knowledge for the text ‘The self is to be seen.’ As for the supreme Self, that is not at all subject to eligibility. How, then, could self-knowledge become related to eligibility through the supreme Self?

[761]

ब्रीह्यादिविषयं यद्वद्यत्नेनापि निरूपितम् ।

प्रत्यक्षं नाधिकारानुप्रवेशं प्रतिपद्यते ॥ ७६१ ॥

This is just as perception having for its content rice-grains, etc., howsoever carefully examined, is not seen to enter into the eligibility.

Perception of rice-grains, etc., does not enter into the eligibility for *Darśa-pūrṇamāsa*, through rice-grains, etc. Even so, self-knowledge does not enter into eligibility through the self. Thus, although there is a possibility of the originative injunction in the Vedānta texts, there is no possibility of the injunction of eligibility, etc. The Vedāntic injunction, if there is one, makes known what is unknown.

[762]

अन्योऽप्यनुभवोपायो मननध्यानलक्षणः ।

सोपायो विहितोऽस्त्येव प्रतिपत्तिविधिं विना ॥ ७६२ ॥

“Without there being an injunction to know, there is enjoined the other which is the means to experience consisting in reflection and meditation together with the auxiliaries.

(2) Here the *pūrvapakṣa* is that, although there is no injunction of self-knowledge, there is the injunction of the means thereto, and that this is required in order that the one who desires release may be active.

The means consists of reflection (*manana*) and meditation (*nidīdhyāsana*); the end is realization (*anubhava*, *sākṣātkāra*). The auxiliaries are calmness (*śama*), etc.

With this verse commences the consideration of the second alternative mentioned in the notes to v. 661. The view expressed in this alternative is that it is the contemplation of Brahman that is enjoined. (See also note to v. 461b-462a.)

NKL—śābdajñānasyā 'vidheyatve 'pi tad-abhyāsasya vidheyatvād vidhiparatvaṁ vedāntānām sāmādy-aṅga-sahitaḥ sākṣātkāraphalaḥ paśyed-ityādaḥ vidhīyate.

AVS—śābdajñānād anyah sākṣātkaraṇopāyah mananadhyānāt-makah paśyed-ityādaḥ vidhīyate.

[763]

दर्शनस्य विधेयत्वात्तत्संबन्धोपलक्षितः ।

प्रसंख्यानान्मकोऽत्रापि प्रयत्नोऽनुभवं प्रति ॥ ७६३ ॥

“Because seeing (*darśana*) is enjoined, that which is implied as related to that, viz. the effort called continued meditation (*prasaṅkhyāna*), is also here enjoined for the sake of experience.

He who sponsors the second alternative shows that the third alternative, viz. that what is enjoined is direct intuition (*sākṣātkāra*), is not sound. The intuition which is of the nature of the self cannot be enjoined, for that is eternal. Nor is it possible to enjoin the modification of the mind which is of the form of the self, for that is the fruit, being the intuition of happiness. Therefore, by implication, the text ‘Thou shalt see’ should be understood as enjoining that which is the means thereto, viz. continued meditation (*prasaṅkhyāna*).

NTV—darśanasya avidheyatvāt prasaṅkhyāna-lakṣaṇaḥ prayatno vidhīyata iti sambandhaḥ. apāstāśeṣaduḥkhā-'natisayānandā-'dvaya-brahmātma-darśanasya phalarūpatvāt svargādivan na vidheyatvam ity arthaḥ.

[764]

शमाद्यङ्गान्वितः सर्वमात्मेतिस्तुतिभूषणः ।

मननाद्यर्थवत्त्वाय पश्येदिति विधीयते ॥ ७६४ ॥

“That which is associated with the auxiliaries ‘calmness’, etc., and which is praised in the text ‘All this is the self’ is enjoined thus : Thou shalt see, in order that reflection, etc., may become meaningful.”

Therefore, the text ‘Thou shalt see’ enjoins meditation as endowed with its auxiliaries, calmness, etc. Texts like ‘All this is the self’ should not be understood in their primary sense; they are but eulogies. In the text ‘The self, verily, dear one, is to be seen, heard, thought about, and meditated on,’ the expression ‘is to be thought about’ is not an injunction; for, if it were to be taken as an injunction, there would be sentence-split. Even if it be regarded as an injunction, it would only be an originative injunction. An injunction of eligibility is necessary; and that we have in ‘Thou shalt see.’

NTV—samadamādayo yamanīyamādayaś ca āṅgatayā vihitāḥ.

[765]

पश्येदिति प्रयत्नश्चेत्फलं स्यादर्शनं तदा ।

लक्षणं न प्रयत्नस्य लक्षणं चेत्कथं फलम् ॥ ७६५ ॥

“If in ‘Thou shalt see’ the effort (*prasaṅkhyāna*) is enjoined, then seeing would be the fruit. It cannot be a characteristic of the effort; if it is a characteristic, how can it be the fruit?

Here the *siddhāntin* objects that the text 'Thou shalt see' cannot enjoin continued meditation (*prasaṅkhyāna*). If meditation is enjoined for the sake of 'seeing', then 'seeing' would be the fruit (*phala*) and not a qualification (*viśeṣaṇa*) of meditation. A fruit is that which is yet to be, whereas a qualification is that which already is. So, it is not possible to enjoin meditation as qualified by 'seeing.'

AVS—*siddham hi lakṣaṇam kākavad atha lakṣaṇam na phalam bhavet siddhatvād anyathā lakṣaṇāyogāt.*

[766]

लोके दर्शनसंबद्धं प्रसंख्यानं समीक्षितम् ।

वेदेऽपि किं तथा तस्यान्न वाऽतस्तद्विधीयते ॥ ७६६ ॥

“In the world, continued meditation is seen to be related to seeing (*darśana*); (as it is doubted whether) in the Veda too it is so or not, that is enjoined.

The *prasaṅkhyāna-vādin* replies: In the world it is observed in the case of Śāstraic learning, etc., that meditation is related to perception as means to end. The doubt arises whether in the case of the Veda too there is a similar relation or not. In order to remove this doubt meditation is enjoined in the text under discussion 'Thou shalt see'. Here we learn that 'seeing' is the fruit, and that, as indicated thereby, meditation is enjoined as the means.

“Though through other means of knowledge continued meditation may not be known to be related to the fruit, here to us continued meditation bears fruit, because it is dependent on an injunction, and there is not the certainty of its absence.

It may be argued thus: Meditation (*prasaṅkhyāna*) does not have intuition as its fruit, because it is meditation, like secular meditations. The *prasaṅkhyāna-vādin* replies to this argument

saying: although it is not known through *pramāṇas* other than Scripture that meditation has intuition as its fruit, we have to admit that it is so on the strength of the Vedic injunction. There is nothing wrong in this admission because it is not definitely known that meditation is not the means to intuition, and also the injunction of meditation which is transcendental is superior to any human argument.

पश्चादवेवमेव स्यात्संदिग्धेऽपि विनिश्चयः ।

खपुष्पे त्वनुपायत्वान्निश्चयोऽस्ति विपर्यये ॥ ७६९ ॥

“In the case of cattle, etc. (which are the fruit of the *Citrā* rite), even though there is doubt, there is certainty (of the fruit); in the case of sky-flower, however, because it is not (something to be attained by) a means, there is certainty as to the contrary.”

The *prasaṅkhyāna-vādin* completes the present argument: The fruit of meditation is to be assumed on the analogy of the fruit of the *Citrā* rite. Although immediately on the conclusion of the *Citrā* rite, its fruit consisting of cattle is not observed to accrue, it is assumed on the strength of the injunction that the fruit will result.

Similarly, even though meditation may not immediately lead to intuition, we presume that it would on the strength of the injunction.

It may be asked : Why not imagine, on the strength of an injunction, that a sky-flower exists ? But there is no point in this objection. The sky-flower is non-existent ; it cannot be brought into being by any means. As its non-existence is a settled fact, no injunction can cause its existence ; nor can there be any injunction for causing its existence.

NTV—khaṇḍapasya tucchatvād eva upāya-sādhyatvābhāvāt na bhavatyeva 'ti viparyaya-niścayopapattau na vidhibalāt tat-kalpanā.

[770]

एवं केचिद्व्यवस्थाप्य प्रसंख्यानविधिं पुनः ।

ऐकात्म्यज्ञानतात्पर्यं तस्यापीच्छन्ति युक्तिभिः ॥ ७७० ॥

Thus some seek to establish the injunction of meditation, and desire therefor, through reasonings, the purportfulness in respect of the knowledge of the oneness of the self.

According to the *prasaṅkhyāna-vādin*, the texts like 'That thou art' assert the nature of reality, and the injunction of meditation is auxiliary thereto.

[771]

विधिस्वातन्त्र्यपक्षे हि किलैकात्म्यं न सिध्यति ।

तच्छास्त्रं विधिनिष्ठत्वान्न स्वरूपेऽर्थवादतः ॥ ७७१ ॥

On the view that injunction is independent, indeed, oneness of self would not result; because Scripture has for purport injunction, it cannot have for purport the nature of self, as that would be *arthavāda*.

As between the assertive statements that set forth the nature of reality and injunctive texts, which are principal and which are subsidiary? The *prasaṅkhyāna-vādin* would say: In the ritual section of the Veda the injunctions are primary; but in the Vedānta it is the assertive statements that are principal, to which injunctive texts are auxiliary. If injunction is primary, the reality would not be established; and if the reality of the self were not established, there would be no meaning in enjoining meditation thereon. If importance be given to injunction, then the texts like 'That thou art' would have to be treated as eulogistic passages, and they would not mean the oneness of self.

न तु व्यापारविहन्नातो द्विकरता श्रुतेः ॥ ७७५ ॥

“It is only through its own (intermediate) operation (of continued meditation) that Scripture makes known its own sense; and not without the operation; therefore there is no two-fold denotativeness for Scripture.

There is another objection: If Scripture were to instruct about reality and also enjoin meditation, there would be the defect of sentence-split (*vākyabheda*) for it. The reply is: no. Continued meditation is the intermediary operation through which Scripture reveals reality. So, there is no double sense for Scripture, and hence no sentence-split.

NKL—śāstrasya svārtha-pratipādanē prasaṅkhyānam avāntaravyāpārah, teṇa arthabhedābhāvān na vākyabhedaḥ.

[776]

स्वव्यापारतिरोधानं कारकाणां न च स्थितम् ।

तस्मादैकात्म्यतात्पर्ये प्रसंख्यानादि सुस्थितम् ॥ ७७६ ॥

“There is not for agents (here, Scriptural texts) obscuration by their own operation (continued meditation); therefore it is well-established that meditation, etc., have for purport oneness of self.

If meditation is the intermediary operation of Scripture, then, Scripture being obscured by it would not convey its sense. If thus it be objected, it is replied that what is auxiliary cannot obscure its principal. Without the injunction of meditation, there is not the intuition of reality. In the absence of a knowledge of reality gained through Scripture, there cannot be injunction of meditation thereon. Thus, even though the texts ‘That thou art’, etc., have reality for purport, there is required an injunction of meditation as auxiliary.

स्वीकृत्यैव प्रसंख्यानं युक्तिर्वस्तुनि वर्तते ॥ ७७९ ॥

“That (reasoning) also is incapable in respect of understanding of the truth, as smoke is in respect of fire; reasoning functions in respect of the real only by taking the aid of continued meditation.

Then, why should it not be that Reasoning itself, as assisting Scripture, generates the cognition of truth. Where is the need for injunction of meditation ?

To this objection, the reply is: Reasoning, even as in association with Scripture, cannot give rise to the intuition of the real ; for both reasoning and Scripture can yield only mediate knowledge. In the typical syllogism of Indian logic ‘Wherever there is smoke, there is fire ; there is smoke on the hill; therefore, there is fire on the hill’, what we gain is only mediate knowledge of the presence of fire this would be so even if the inference is confirmed by the testimony of a trustworthy person. So, even reasoning has to depend on meditation for yielding direct experience.

NKL—*sā yuktir api ātma-sākṣātkāraṁ janayitum aśaktā parokṣadhī-hetutva-svābhāvyāt. tasmāt prasāṅkhyānaṁ sāstraṁ ca svīkṛt-yaiva pravartata ity arthaḥ.*

According to an alternative explanation given in *AVS*, this verse may be treated as setting forth an objection raised by the *niyogapara-vādin* as against the *prasaṅkhyāna-vādin*.

[784]

विधिं विना श्रुतैकात्म्यस्तदर्थानुभवाद्दते ।

उपायाज्ञतया कुर्यात्तच्छास्त्रस्यार्थवादताम् ॥ ७८४ ॥

“If there is no injunction (of meditation), he who has heard of the oneness of self, but is without the experience of its sense, would make of Scripture an *arthavāda*, because he is ignorant of the means.

Let not reality become the content of the injunction, because even without this there is knowledge of reality from Scripture and as a result the human goal is reached.

Reply : If an injunction of meditation be not admitted, the text expounding reality would become invalid. As the means to experience, viz. continued meditation, is not recognized, and as no other means is observed, Scripture which by itself does not yield intuitive experience would become an eulogy. Therefore, an injunction of meditation should be admitted.

NTV—sākṣātkāropāyā 'parijñānāt tattvamādi-sāstram arthavādam karoti, prasaṅkhyāna-niyogā- 'pekṣayām sākṣātkāropāya-parijñānān nārthavādo bhaved iti bhāvah.

[785]

विधिनिष्ठेऽपि शास्त्रे स्यादसिद्धेर्वस्तुनो मितेः ।

देवताध्यानवत्कल्प्यं फलमैकात्म्यवेदनम् ॥ ७८५ ॥

“Even if Scripture has for purport injunction, the knowledge of reality (*vastu*) would not be established, and as in the case of meditation on the deities, the knowledge of oneness of self will have to be postulated as the fruit.

If the fruit, viz. the intuitive experience of the self, be dependent on the said injunction, then that injunction should be regarded as the principal, and not the text setting forth the nature of reality.

The reply to this has been stated in v. 771. The same is explained here.

If the injunction to meditate be the principal and the texts 'That thou art', etc., be subsidiary, then the cognition of the reality would not be established, and would have to be postulated as the fruit. This would not be proper. Although the injunction may be the principal as it is the means to the fruit, the fruit itself in this case being the cognition of reality, the texts expounding the reality should be regarded as the principal, and cannot be taken as restatements.

[786]

प्रतिपन्नात्मयाथात्म्यः प्रसंख्यानादि नेक्षते ।

अज्ञस्तु श्रावितोऽप्यस्माद्विना नाऽऽप्नोति तत्फलम् ॥ ७८६ ॥

“He who has realized the truth of self does not need continued meditation ; but he who is ignorant, even after study of Scripture, does not attain the fruit thereof without this.

He who has realized the truth through continued meditation, etc., does no longer stand in need of meditation. But he who has only known of the truth from the texts should meditate in order to realize the truth. He who has not realized may hear the text 'That thou art' repeated nine times in the *Chândogya*; but no realization will come to him unless he meditates.

NTV—ajñō 'sākṣātkṛta-brahmaḥ tattvamasīti śrāvito 'pi śravaṇa-phalam sākṣātkāram na prāpnoti asmāt prasaṅkhyānād vinā.

[787-788]

शास्त्रेऽस्मिन्वस्तुनिष्ठेऽपि प्रसंख्यानविधिं विना ।

पुमर्थो लभ्यते नैवेत्यसावपि समाश्रितः ॥ ७८७ ॥

नान्वयव्यतिरेकाभ्यामैकात्म्यानुभवो भवेत् ।

तत्सिद्धावेव तौ स्यातां स च ताभ्यामिति श्रयः ॥ ७८८ ॥

“ Even if Scripture have for purport the reality (*vastu*), the human goal is not gained, without the injunction of meditation; so that also has to be resorted to. By co-presence and co-absence there does not come about the experience of oneness of self. Only when that is established, they would be ; and that from them; thus there is reciprocal dependence.

The argument that the Vedānta texts stand in need of the injunction to meditate is here concluded.

The reasoning based on co-presence and co-absence is not enough. Such reasoning cannot independently lead to realization. It is only when a thing is known that there can be reasoning about it. If it be said that reasoning results in knowledge, there would be reciprocal dependence thus: When there is the experience of reality, there is reasoning based on co-presence and co-absence; and when there is the latter, there is the former.

NTV — aikātmānubhave sati anvaya-vyatirekau bhavataḥ, tat-siddhau ca brahmātmānubhava siddhir ity anyonyāśrayaḥ.

[789-790]

यथैव विश्वजिद्यागपदे स्वार्थानुपालनम् ।

कुर्वती स्वर्गकामेन(ण) गच्छतः सह मानताम् ॥ ७८८ ॥

तथैव शास्त्रतद्युक्ती स्वाभिधेयार्थपालनम् ।

कुर्वत्यौ मानतां यातः प्रसंख्यानानेन नान्यथा ॥ ७९० ॥

“ Even as the words ‘*viśvajit*’ and ‘*yāga*’ (in the text ‘*viśvajitā yajeta*’), while preserving their own senses attain validity by (the assumed word) ‘desire-for-heaven’;

so also, Scripture and reasoning, while preserving the sense expressed by them, attain validity through continued meditation; not otherwise”.

Scripture and reasoning convey their meaning and bring about the realization of the truth only in dependence on continued meditation (*prasaṅkhyāna*).

This is explained here on the analogy of the text of the *viśvajit* sacrifice (*viśvajin-nyāya*).* The *viśvajit* is a part of the great sacrifice called *gavām-ayana* which lasts for a year. In the command which relates to the *viśvajit* sacrifice, viz. ‘Let him sacrifice with the *viśvajit*’ (*viśvajitā yajeta*), no mention is made of any fruit. Here the enquiry is whether this text enjoins a mere action, or an action that results in a fruit. The *prima facie* view is that, as no result is mentioned in the injunction, only an act is enjoined here. The *Pūrva-mīmāṃsā* view is that it is not true to say that the action in question is not conducive to any result. Although no fruit is declared in this text, the fruit is to be known by implication. What, then, is the fruit? The *prima facie* view suggests that it may be any fruit, since no specific fruit is mentioned. The *Mīmāṃsā* view is that heaven is the fruit, since all desire heaven. [See *PM*, IV, iii, 10-16.]

Now, in the text ‘*viśvajitā yajeta*’, the words ‘*viśvajit*’ and ‘*yāga*’ convey their respective meanings, no doubt. But they become *pramāṇa* only when the word ‘*svarga-kāma*’ is supplied. Similarly Scripture and reasoning, while having each its place, gain validity only in association with continued meditation.

NTV—*tatra hi sarvābhilaṣitatva-lakṣaṇa-yukti-siddhena niyojyā-kāṅkṣā-pūrakeṇa svargakāmena svābhidheyārtha-pālanam kurvati viśvajidyāga-padena saha mānatām gacchataḥ anyathā aprāmāṇya-prasaṅgāt.*

NKL—*viśvajitā yajete ’ti viśvajic-chabdasya tṛtīyāntasya karaṇa-bhūta-yāganāmadheyatvāt.*

vaṁ tadabhāve pravṛttyabhāvād viśvajidyāga-padayoḥ svargakāmena
svārthānupālanaṁ kurvato mānatvaṁ yathā.*

[791]

एवमैकात्म्यतात्पर्ये शास्त्रस्येष्टेऽपि युक्तिभिः ।

केचित्कार्यमपीच्छन्ति तदर्थं तन्न युज्यते ॥ ७९१ ॥

Admitting that Scripture has for purport oneness of self, some seek to establish *kārya* also through reasonings, for the sake of that, (the experience of oneness of self); that is not right.

The *prasaṅkhyāna-vāda* is here concluded. Those who sponsor this view, while admitting that Scripture has the one reality for purport, maintain through the aforementioned arguments that in Vedānta there is *kārya* also which is of the nature of *prasaṅkhyāna*.

Siddhānta—The *prasaṅkhyāna-vāda* is not sound.

[792]

प्रमात्रादित्रयं यस्मात्संविन्मात्रवपुर्भूतः ।

सिद्धायतेऽप्रसिद्धं सत्तत्सिद्धौ किमपेक्षते ॥ ७९२ ॥

The triad, cognizer, etc., constituted by pure consciousness as they are, look like the established though they are not established; what then is required for their establishment?

What for is *prasaṅkhyāna*? (1) Is it required for establishing reality? (2) Or, for removing the mediateness thereof? (3) Or, for warding off its non-establishment? (4) Or, for destroying the ignorance thereof? (5) Or, for making it immediate? (6) Or, for the sake of its release?

(1) The first alternative is not possible. The reality with which we are acquainted is of the triple form, cognizer, cognition, and object cognized. This triad has no reality other than that of pure consciousness, the self. Because of the self, the triad appears as if established. Nothing else is required for the establishment.

NTV mentions only the first two alternatives:

*kiṁ vastu-siddhyartham prasāṅkhyānavidhir apekṣyate, uta vastu-
naḥ pāroṁṣya-nivṛttyartham.*

NKL has these two alternatives:

*prasāṅkhyāna-niyogasya vastvāparokṣaṁ phalam, tat-pāroṁṣya-
nivṛttir vā.*

AVS has the same alternatives as *NTV*.

[793]

परोक्षमपि सद्वस्तु यत्साक्ष्यात्मस्वरूपतः ।

साक्षादात्मेव चाऽऽभाति तस्मिन्पारोक्ष्यधीः कथम् ॥७९३॥

The witness-self, the reality, by which even the mediate (objects) are made to appear as if immediate and as if the self—in respect of that, how can there be mediate knowledge?

(2) The second alternative is to be rejected. Egoity, etc., which constitute the not-self, are made manifest by the witness-self, although by themselves they are mediate; and because of this manifestation they appear as if they are the self. The witness-self, therefore, can never be mediate. It is the most direct and immediate reality. As there is no mediateness for it, how can there be removal of mediateness?

[794]

अप्यज्ञानादि निःशेषप्रमेयव्यवधानकृत् ।

स्वतः प्रसिद्धात्संसिध्येत्तदसिद्धिः कुतो भवेत् ॥ ७९४ ॥

Because by that self-established (reality) even ignorance, etc., which veil the entire object of knowledge, are established, from what can its non-establishment result?

(3) The third alternative is here rejected. It is the self that establishes even ignorance, doubt and erroneous knowledge that veil the world of objects. The self is, thus, ever-established; it is self-established. So, non-establishment is impossible in regard to it. Where is the need, then, for *prasaṅkhyāna* for the purpose of warding off non-establishment?

[795]

स्वमहिम्नैव यः सिद्धः सर्वप्रत्यक्तमश्च यः ।

तत्तमोहतितः कार्यं किमन्यत्तत्प्रमाणजम् ॥ ७९५ ॥

That which is established by its own glory and is innermost of all—what else than the effect of removing the darkness (of ignorance) can the means of knowledge relating to that produce?

(4) The self is established by its own right, and in its own greatness. Nothing else is required to establish it. All that we need is to recognize its eternally established nature. For this, ignorance has to be removed. But the removal of ignorance is the fruit of *pramāṇa*, and not of *prasaṅkhyāna*.

NTV—*na vastunaḥ sphuraṇaṁ pramāṇa-phalaṁ kiṁtu avidyā-nivṛttir ity arthaḥ.*

NKL—*avidyādi-nivartakatvena vākya-prāmāṇyam iti bhāvah.*

AVS—*na vastu-siddhiḥ pramāṇa-phalam, kiṃtu avidyā-nivṛttir
ity arthah.*

[796]

मात्रादित्रयहानेऽपि हानसाक्षितयेक्ष्यते ।

येनासावविलुप्ताक्षस्तत्पारोक्ष्यं कथं भवेत् ॥ ७९६ ॥

Even in the absence of the triad, cognizer, etc., that which sees the absence as the witness, because it never loses its sight—how can that be mediate?

(5) The inner self is eternal and self-luminous. It is the never-failing witness of the being as well as non-being of cognizer, etc., enjoyer, etc., and agent, etc. It is absurd to suggest that such a reality is not immediate. Nothing else is immediate. Hence, there is no need for an injunction of *prasaṅkhyāna* to render the self immediate.

NTV—*na svatas-siddhasya lopa-janmādayaḥ svato 'nyato vā
siddhy anupāpatteḥ.*

NKL—*svāpādaḥ pramātrāder abhāve tad-abhāva-sākṣitayā ātme-
syate yena kena kāraṇena avi^{plū}tākṣo nitya-caitanya-svabhāvāt.*

aviluptākṣo
[797]

भावनावर्त्मनैकात्म्ये विध्यर्थासंभवो यथा ।

अधिकारपरीक्षायां तथा प्राक्प्रतिपादितम् ॥ ७९७ ॥

The impossibility of injunction through the channel of *bhāvanā* in the case of the one self has already been explained in our examination of eligibility.

In the verses of the *Vārtika* (v. 20 f.) dealing with eligibility, it has already been shown that there is no need for the injunction of the practice of contemplation after knowledge has arisen from scriptural testimony.

NTV — *bhāvanā puruṣa-prayatnādih vedārtha iti bhaṭṭapādamatā-valambanena vidhir adhikāri-parīkṣāyām nirākṛtaḥ, idānīm brahma-dattādi-matāvalambanena niyogo vākyārtha iti vidhir nirākriyate.*

AVS puts v. 654 before the present verse, and v. 655a after the present verse. This is followed by the remark: *ity evaṁ vārtikānām kramo draṣṭavyaḥ, pāṭhakramād arthakramo balavān iti.....*

tasmāt tatra likhitavyaṁ vārtikadvayam atra likhitam upadeśataḥ śāstrārtho 'dhigantavya iti pratipādanāya. anye tu atraiva vārtikadvaya-sambandham varṇayanti.

[798]

नियोगपक्षमाश्रित्य विध्यर्थसंभवो यथा ।

ऐकात्म्यसिद्धौ यत्नेन तथाऽत्र प्रतिपाद्यते ॥ ७९८ ॥

As to how the sense of injunction is impossible following the doctrine of *niyoga*, in the matter of establishing oneness of self, is here explained with care.

Here, the view that is refuted is that of Brahmadatta, viz. that there is need for injunction in the matter of the practice of *jñāna*. Hence, this is no repetition.

[799]

ऐकात्म्यस्य स्वतो मुक्तेरज्ञानात्तस्य बद्धता ।

साध्येऽर्थे साधनापेक्षा सिद्धे तन्न व्यपेक्षते ॥ ७९९ ॥

Because oneness of self is itself release, bondage is from ignorance of that; there is need for means in the case of what is to be accomplished; that is not required in the case of what is already established.

(6) The sixth alternative is here shown to be unsound. Release is the very nature of the self. The self is not really bound. The sense of bondage is due to ignorance. A means is required for accomplishing what is not accomplished. In respect of what is eternally established, no means for its establishment is necessary.

NTV frames two alternatives, for the first of which the present verse gives the answer. The alternatives are: (1) Is the prompted person he who desires release? (2) Or, he who desires the experience of *Brahman-Ātman*? The second alternative is replied to in verse 801.

[800]

तमोमालान्तरायत्वादैकात्म्याख्यस्य वस्तुनः ।

असाध्यसाधने तस्मिन्काऽपेक्षा भावनां प्रति ॥ ८०० ॥

For the reality which is called oneness of self, the only obstacle is darkness; it is neither what is to be accomplished nor means; in regard to that there is no need of *bhāvanā*.

Release, it has been said, is self-established, and is not dependent on any means. What for is *jñāna*, it may be asked. The reply is that *jñāna* is required only for destroying ignorance. As the self which is the sole reality is devoid of the distinction of what-is-to-be-accomplished and what-accomplishes, there is no need for the injunction of practice.

NKL—*asādhyā-sādhane sādhyā-sādhana-bhāva hīna ity arthaḥ.*

[801]

यदाऽनुभवकामस्य कार्यं साध्यं प्रतीयते ।
प्रसंख्यानं तदैकात्म्यतात्पर्यं कथमुच्यते ॥ ८०१ ॥

If continued meditation is seen to be the *kārya* to be accomplished by him who desires direct experience, then how can oneness of self be said to be the purport?

It may be argued thus: Although there is no injunction of *prasaṅkhyāna* as the direct means to release, it becomes an auxiliary through *jñāna* to which it is subsidiary.

Reply: If *prasaṅkhyāna* is enjoined by the Vedānta texts for the benefit of those who desire realization, then those texts cannot have the oneness of self for purport.

AVS—sākṣātkaraṇakāmasya kāryam niyogaḥ prasaṅkhyāne viṣaye sādhyam pratiyate yadā, tadā prasaṅkhyāna-niyogasya aikātmya-paratvam katham, na kathamcit.

[802]

कार्यं चान्यपरं चेति द्वयमेतद्विरुध्यते ।
साध्यं हि सर्वदा कार्यमन्यत्तस्य प्रसिद्धये ॥ ८०२ ॥

Having the *kārya* for purport and having something else for purport—these two are contradictory. Indeed, the *kārya* is always what is to be accomplished; what is other is only for accomplishing it.

The same texts cannot contain an injunction as well as teach the oneness of self. If injunction is the purport of the Vedānta texts, then any other teaching must be for the sake of that, on the principle that “things that have already come to be are taught for the sake of what-is-yet-to-be” (*bhūtaṁ bhavyāyo ’padisyate*).

[803]

विशेषणं नियोज्यस्य भवन्ननुभवः फलम् ।

विषयः सत्प्रसंख्यानमनुभूतेर्न साधनम् ॥ ८०३ ॥

Being the qualification of what is prompted, if direct experience be regarded as the fruit, then continued meditation which is the content (of the injunction) cannot be the means to direct experience.

If it be said that continued meditation (*nididhyāsana*) is also enjoined, like 'hearing' (*śravaṇa*), as means to direct experience, and *prasaṅkhyāna* is only another name for *nididhyāsana*, true; but *prasaṅkhyāna* does not make known the reality by being the content of the cognition of *niyoga*; for the direct experience is the fruit of *pramāṇa*, and *prasaṅkhyāna* is not a *pramāṇa*.

AVS—*anubhava-kāmaḥ prasaṅkhyānaṁ kuryād iti niyojyasyā 'dhikāriṇo viśeṣaṇaṁ bhavann anubhavaḥ phalam iti tvayocyate niyoga-viśayaṁ sat prasaṅkhyānaṁ anubhūter na sādhanam, anubhavasya māna-phalatvāt, niyoga-viśaya-prasaṅkhyānasya apramāṇatvāt.*

[804]

भावार्थविषयं कार्यं प्रसंख्याने कथं भवेत् ।

आवृत्तिर्हि प्रसंख्यानं शब्दयुक्त्योरिति स्थितम् ॥ ८०४ ॥

How can the *kārya* which is the sense of the verbal root occur in the case of continued meditation? Indeed, continued meditation is the repeated reflection with the help of word and reasoning. This is settled.

So far we have argued that *prasaṅkhyāna* is not the means to experience, admitting for the moment that it is the content of *niyoga*. Now, we affirm that *prasaṅkhyāna* is not at all the content of *niyoga*.

The content of *niyoga* must be the sense of a verbal root, e. g., *yāga*. *Prasaṅkhyāna* is not so. It is of the nature of a repetition of 'hearing' (*śravaṇa*) and 'reflection' (*manana*). It is not an act; it is the repetition of an act.

[805]

अथ श्रवणभावार्थविषयं कार्यमिष्यते ।

तदा श्रवणमेव स्याद्विशिष्टो विषयस्तव ॥ ८०५ ॥

If the content of the sense of the verbal root of *śravaṇa* (hearing) be the *kārya*, then *śravaṇa* alone will be for you the specific content.

If it be said: "Let there not be in the Vedānta an injunction for meditation. Let hearing and reflection be the content of injunction", we reply that the opponent's thesis would then be destroyed. The *prasaṅkhyāna-vādin's* thesis is that meditation is enjoined. We on our part do admit that hearing, etc., are enjoined in order to make him who desires release turn to the Scriptural texts.

[806]

दाक्षायणादावावृत्तेर्यत्रापि फलमुच्यते ।

सगुणात्पौर्णमासादेः फलं तत्रापि नो गुणात् ॥ ८०६ ॥

Even in the *Dākṣāyaṇa* rite, etc., where repetition is said to bear fruit, the fruit is from the *Paurṇamāsa*, etc., as associated with the *guṇa* (repetition), and not from the *guṇa* alone.

The *pūrvapakṣin* may argue that repetition may be enjoined on the analogy of the *Dākṣāyaṇa* sacrifice. The *siddhāntin* replies that, on the same analogy, it is the act that is enjoined, not repetition.

In the context of the *Darśapūrṇamāsa*, we have the passage, ‘*dākṣāyaṇa-yajñena yajeta prajākāmah*’ (One desirous of offspring should perform the *Dākṣāyaṇa* sacrifice.) [See *Taittirīya-saṁhitā*, II, v, 4. 3.] Here the question to be settled is whether the passage speaks of a particular result following from the adoption of a particular accessory at the *Darśapūrṇamāsa* sacrifice, or whether the act mentioned is a distinct and independent sacrifice. The *prima facie* view is that it is the latter. The reasons adduced are that a particular name is attached to the act, that there is no mention of an accessory in the text, and that the text is complete with the mention of the result. The *Pūrva-mīmāṃsā siddhānta* is that the text in question speaks of a particular result following from the adoption of a particular accessory at the *Darśapūrṇamāsa*. From the context of the present passage we learn that the *Dākṣāyaṇa* falls within the purview of the *Darśapūrṇamāsa*, and that it is not an independent or separate sacrifice. There is a text which reads thus: ‘One should perform the *Darśapūrṇamāsa* for thirty years; if he is a performer of the *Dākṣāyaṇa* he should perform it for fifteen years only; even thus does it become accomplished; as the *Dākṣāyaṇa* contains two *Paurṇamāsa* and two *Darśa* sacrifices: thus is there accomplishment in fifteen years’. From this we know that *Dākṣāyaṇa* is not a separate sacrifice. The term ‘*ayana*’ means repetition. *Dakṣa* is the sacrificer who is quick and an expert. So, the expression *Dākṣāyaṇa* signifies the repeated performance of the *Darśapūrṇamāsa* by the expert sacrificer and priests. *Dākṣāyaṇa*, thus, connotes a certain accessory detail at the *Darśapūrṇamāsa*. And, the text in question speaks of the result following from the adoption of an accessory; it does not enjoin a distinct sacrifice. [PM, II, iii, 5-11.]

In v. 806, the *pūrvapakṣa* is that there is realization through the repetition of hearing, etc., even as in the case of the *Dākṣāyaṇa* it is repetition that brings in the fruit. The *siddhāntin*’s reply is that, even in the example cited, the fruit which is heaven does not result from the accessory by itself, but from the *Darśapūrṇamāsa* as endowed with the accessory which is repetition. Similarly, here

when it is settled that the fruit is gained through the act, viz. hearing, etc., as endowed with the accessory, it is not proper to hold that there is injunction of *repetition* too for the sake of intuiting reality.

[807]

गुणो यत्रापि दध्यादिः कार्यावच्छेदको मतः ।

धात्वर्थावेशतः सोऽपि प्राप्ते चास्मिन्न तु स्वतः ॥ ८०७ ॥

Even where curd, etc., are taken to be *guṇa*, they are so as distinctive of the *kārya*, having been entered into by the meaning of the verb-root. This has already been attained, and (the curd, etc.,) are not independently (enjoined).

It may be argued that, even though 'repetition' is not the sense of the verb-root, it may be the content of injunction, even as the accessory curds (*dadhi*) in '*dadhnā juhoti*' (With curds he offers the oblation), which are not the sense of the verb-root, are enjoined. The reply is that even the curds are enjoined only as influenced by the sense of the verb, and not independently. So, here also, repetition without the act (hearing, etc.) cannot be enjoined for the sake of the fruit.

There is the text '*agnihotram juhoti*', and then the texts '*dadhnā juhoti*, *payasā juhoti*', etc. The question with regard to those texts is this: Are the *homas* enjoined by the texts '*dadhnā*', etc., and are these collectively referred to in the text '*agnihotram juhoti*'? Or, is this latter sentence injunctive of an independent *homa*? The *prima facie* view is that this sentence refers to the *homas* enjoined in the sentences '*dadhnā*', etc. The *Pūrva-mīmāṃsā siddhānta* is that the injunctive text is '*agnihotram juhoti*', and that the other sentences specify the accessories, etc. The term '*agnihotra*' does not refer collectively to sacrifices already enjoined. In '*agnihotram juhoti*', the act of *homa* (i.e. offering into fire) is enjoined. The sentence

‘*dadhnā juhōti*’ cannot convey the notion that the *Agnihotra* should be performed; what it signifies is simply that the connection between the *dadhi* and the *homa* should be brought about. Thus it is settled that the repetition of the mention of *homa* in such texts as ‘*dadhnā juhōti*’ serves the purpose of indicating the accessory details. In other words, the use of the term ‘*juhōti*’ is a reference to the *homa* enjoined elsewhere in the text ‘*agnihotram juhōti*’. In the term ‘*juhōti*’ as appearing in the sentence ‘*dadhnā juhōti*,’ the conjugational affix serves the purpose of enjoining the material, *dadhi*, mentioned by the word *dadhnā*, and it is only the verbal root that contains the reference to the *homa* enjoined elsewhere. [PM, II, ii, 13–16.]

[808]

श्रवणादेर्न च प्राप्तिर्गुणान्न च फलं श्रुतम् ।

पश्येदिति हि धात्वर्थः केवलो विषयः श्रुतः ॥ ८०८ ॥

Hearing, etc., have not been enjoined ; nor is the fruit declared in Scripture for *guṇa*; in ‘Thou shalt see’, only the content, the sense of the root, is declared.

It cannot be said that in the statement ‘Let one become calm and collected and then see the self,’ meditation which is of the form of repetition is enjoined. Seeing is not the fruit of repetition which is an accessory; it is the fruit of hearing, etc. Nor is release the fruit of repetition; for that is the fruit of *jñāna*. Here the content of injunction is seeing (*darsana*,) and not repetition.

[809]

नापि तल्लक्षितावृत्तिर्विधेया श्रुतहानतः ।

कार्यं यन्नापि भावार्थात्तदावृत्तिगुणात्कथम् ॥ ८०९ ॥

Nor is the repetition implied by that (*darśana-vidhi*) enjoined, for there would be giving up of what is declared. That which is not accomplished by the sense of the verb, how can that result from the *guṇa* called repetition?

It may be contended that, as seeing cannot be enjoined, we should take repetition as what is enjoined by implication. But this contention is pointless. There is no reason for rejecting what is expressly taught and assuming what is not taught. If a fruit does not result from an act, it cannot result from repetition. If intuition does not arise from the knowledge that is born of Scriptural testimony, how can it arise from a repetition thereof? So, even if an injunction of seeing is to be rejected, there cannot be assumed an injunction of repetition for the sake of intuition.

[810]

स्वयं प्रबोधितेऽप्यर्थे यदि युक्त्याद्यपेक्षते ।

शास्त्रं सापेक्षमेवं स्यात्स्वतः प्रामाण्यवर्जनात् ॥ ८१० ॥

As regards the sense made known by it, if Scripture needs reasoning, etc., then it would become dependent, by relinquishing self-validity.

In v. 774 it was stated by the *pūrvapakṣin* that meditation is enjoined for one who has known the nature of the self from Scripture but has not experienced it. It was also contended in that context (see v. 778) that reasoning too is required. That is recalled here and refuted. If Scripture depends for its sense on reasoning, etc., its self-validity would be destroyed, and would become dependent and defective like secular statements.

[811]

युक्त्यादि मान्तरं नो चेन्मानांशत्वेन तत्स्थितेः ।

संभूय पादाः सर्वेऽपि ह्यैकात्म्यं बोधयन्ति नः ॥ ८११ ॥

“If reasoning, etc., are not different *pramāṇas*, because they are parts of *pramāṇa*, all the parts together, for us, make known the oneness of self.”

Pūrvapakṣa — Reasoning, etc., are not different *pramāṇas*. They, together with Scriptural testimony, constitute a single *pramāṇa*. It has already been stated that the self is to be realized through verbal testimony, reasoning, meditation, and the self.

[812]

न संभूय यतः पादास्तैलवर्त्यग्नयो यथा ।

मितेः स्वरूपलाभाय न तु मेयोपलब्धये ॥ ८१२ ॥

Not together (do they make known the self); for the parts, like oil, wick and fire, are for the sake of securing for *pramāṇa* its nature, and not for attaining the object of cognition.

Siddhānta — It is wrong to say that these four together reveal the reality. Just as oil, etc., together contribute to the flame, and the flame illumines the object, here too the four parts together make for the *pramāṇa*, and it is the *pramāṇa* that reveals the real. So, it is settled that the four parts are not the means to the intuition of reality.

[813]

संभूय यदि सर्वाणि फलमेकं प्रतन्वते ।

प्रत्येकं प्रमितेर्वृद्धिरित्येतत्स्यात्तदा मृषा ॥ ८१३ ॥

If all of them together produce a single fruit, then the view that each fosters the *pramāṇa* would be false.

If the parts by themselves reveal the real, then it cannot be maintained that the *pramāṇa* is strengthened by each of these. The *prasāṅkhyāna-vādin* does maintain this latter view. So, on his own testimony, it must be admitted by him that the parts are only contributory to the *pramāṇa*.

[814]

संभूय फलकारित्वं क्रियाकारकसंगतेः ।

स्वरूपलाभतो नान्यदभिव्यक्तावपेक्षते ॥ ८१४ ॥

The fruit of the coming together of *pramāṇa* and the causal agents is the accomplishment of its own nature as *pramāṇa*; in the matter of manifesting the object nothing else is required.

Thus, the parts accomplish the *pramāṇa*; and the *pramāṇa* reveals the real. In the matter of its coming into being, the *pramāṇa* does depend on the causative factors; but in the matter of revealing the object, it depends on nothing else.

AVS—śabdādi-pādacatuṣṭayaṁ jñānotpādakam eva nārthaprakāśakam ity etat sādhayati.

[815]

तैलवर्त्यमयो यस्मात्प्रदीपोत्पत्तिकारणम् ।

लब्धात्मलाभो दीपोऽर्थं स्वयमेव प्रकाशयेत् ॥ ८१५ ॥

For, oil, wick, and fire are the cause of producing the lamp; the lamp which has thus been brought into existence illumines the object by itself.

The illustration given in v. 812 is here explained.

Just as the lamp, which is the result of oil, wick and fire combining together, illumines the object by itself, so also the *pramāṇa*, which is given rise to by verbal testimony, etc., reveals its object independently without any further aid.

[816]

शब्देन ज्ञाप्यते यद्वत्तथैव यदि युक्तिभिः ।

व्यर्थताऽथ विशेषश्चेत्संप्राप्ता भिन्नमानता ॥ ८१६ ॥

That which is made known* by Scripture, if that alone is made known by reasonings, then there is futility; if there is some difference, then they (reasonings) would constitute a different *pramāṇa*.

It may be held that verbal testimony, etc., are not contributories to the rise of *pramāṇa*, but are themselves *pramāṇa*. Then, the question would be: Are they *pramāṇas* collectively, or individually? If the first, then we have to enquire: the sense that is conveyed by verbal testimony—is that itself made known by reasoning, etc., or some other sense? If it is the same sense, then there is futility for reasoning, etc. If it is a different sense, then reasoning, etc., would be separate *pramāṇas*, and there would be no collectivity.

[817]

स्वप्नादियुक्तिमिश्रेत्तल्लौकिकीभिः प्रसाध्यते ।

अवैदिकं भवेद्वस्तु स्याच्च शास्त्रानुवादता ॥ ८१७ ॥

If reality be established through empirical arguments based on dream, etc., then it would be non-Scriptural; and Scripture would be a re-statement.

If verbal testimony, etc., be regarded as *pramāṇas* individually, then we have to ask: Are the reasoning, etc., that are *pramāṇa* such as are empirically known or those that are known through the *Veda* alone? The enquiry into the three states of experience is empirical. By the rule of co-presence and co-absence, it is argued that the three states are illusory and that the self alone is real. But, then, this reasoning is not dependent on the *Veda*; and the texts 'That thou art' etc., would turn out to be dependent *pramāṇa*.

NTV—vedaika-samadhigamyam brahma na bhavet, sāstram ca yuktisiddhānuvādakam na pramāṇam ity arthaḥ.

NKL—avasthātrayasya vyabhicārād ātmano 'vyabhicārād avasthātraya-taddharma-sambandho na vāstava iti laukika-tarkād ātmasiddhau vedasya anuvādakatvam avaidikatvam ca ātmanah ity arthaḥ.

[818]

वैदिकत्वेऽपि युक्तीनामागमार्थप्रबोधतः ।

अनुवादत्वमेव स्यात्स्याच्च शास्त्रादभिन्नता ॥ ८१८ ॥

If the arguments be Scriptural, as they serve only to elucidate the sense taught by Scripture, then also those arguments would be re-statements, and they would be non-different from Scripture.

If the reasoning, etc., are those that are known through the *Veda*, then they would be of the nature of restatements, and not *pramāṇas*. Also, they cannot be regarded as different from the *Veda*; and the four factors will have to be reduced to three.

[819]

आवृत्तिश्च प्रसंख्यानं कुर्यात्सातिशयं कथम् ।

न ह्यावृत्तौ प्रमाणस्य प्रमेयेऽतिशयो यतः ॥ ८१९ ॥

Continued meditation is repetition. How can repetition (of *śabda*) endow an object with an excellence? There is no excellence brought about in the object of knowledge by repetition of the *pramāṇa*.

It has been shown that verbal testimony does not depend on reasoning. Now, we proceed to show that there is no dependence of verbal testimony on meditation (*prasaṅkhyāna*).

Prasaṅkhyāna is repetition. As applied to verbal testimony, it must mean a repetition thereof. But such repetition does not bring about any excellence in the object. In the case of the perception of a pot, for example, there is no excellence seen in the object by a repetition of the perception.

NTV — *prasaṅkhyānam nāma pramāṇāvṛttir ucyate, sā katham atiśayaṁ kuryāt.*

[820]

यत्नापि चान्धकारादिदोषात्क्रमविनिश्चयः ।

तत्तापि भिन्नमेयत्वान्नैव संभूयमानता ॥ ८२० ॥

Even where because of the defect of darkness, etc., there is determination (of the object) in sequence, there is no validity for the combination (of parts), for the object cognized (at each stage) is different.

It is true that in the case of the determination of an object that is in semi-darkness or at a distant place, repetition of a *pramāṇa* is useful. But, here, it must be realized that the determination is not the result of the collective operation of *pramāṇas*. In fact, the object is different each time.

[821]

पूर्वं वस्त्विति विज्ञानं प्राप्ययं मानुषस्तथा ।

पुरुषोऽयमथ श्यामो दित्य इत्यर्थभिन्नता ॥ ८२१ ॥

It is first known as a thing, then as a living being, then as a human being, as a man, as being dark, and then as so-and-so; thus there is difference in the object.

How the object of knowledge is different is shown here.

[822]

परिच्छेदफलत्वं हि मानत्वं तच्च भिद्यते ।

तदभावे तु पूर्वेषामुत्तरस्यैव मानता ॥ ८२२ ॥

To be a means of valid knowledge, indeed, is to have definiteness as its fruit; and that is different. When the earlier cognitions do not have that there is validity only for the last one.

The function of a *pramāṇa* is to define the object. As the definition of each object is different, the *pramāṇa* also is different. If the earlier cognitions have not defined the object, the last one alone should be regarded as *pramāṇa*.

[823]

अथ मेयप्रभेदेऽपि प्रमाणैकत्वमिष्यते ।

वस्तुग्राहितयाऽक्षादेरैकार्थ्येऽभिन्नमानता ॥ ८२३ ॥

If it be said that even though there is difference in the object of knowledge, the *pramāṇa* is one because the same reality is apprehended, then (for the same reason)

perception, etc., having the same object must be a non-different *pramāṇa*.

If it be said that, though there is a difference in the object when there is a series of cognitions, the *pramāṇa* itself is single because the thing itself is non-different, we reply: if that were so then the five *pramāṇas*, perception, etc., should be regarded as a single *pramāṇa* when they have the same content.

[824]

साध्यमानं प्रसंख्यानं यागवत्साधयेत्फलम् ।

कारकं ज्ञापकं शास्त्रं तयोः स्यादेकता कथम् ॥ ८२४ ॥

If continued meditation which is being accomplished were to accomplish the fruit, like sacrifice, then it would be what causes to act, and Scripture is what makes known; how could the two be one?

If meditation is like sacrifice, yielding its fruit through being performed, then it is a causative factor (*kāraka*), and cannot, therefore, be identical with Scriptural teaching whose function is to make known (*jñāpaka*).

[825]

प्रमाताऽऽत्मा न मानांशो यद्ययं व्यावहारिकः ।

परश्चेत्स प्रमेयः स्यात्कथं चानुभवः फलम् ॥ ८२५ ॥

The cognizer-self cannot be a part of the *pramāṇa*, if it be the empirical soul (that is meant); if it be the supreme Self, that is the object of knowledge (*prameya*); how then can experience be the fruit?

It was stated by the *pūrvapakṣin* that there are four factors constituting the *pramāṇa* for Self-realization. One of the factors is the self. Which self is this? Is it the empirical self? Or, the supreme Self? It cannot be the empirical self, because that self is the locus of *pramāṇa*, and cannot, therefore, be a part of *pramāṇa*. Nor can it be the supreme Self, for that Self is the object of *pramāṇa*. So, how can experience be the fruit of the said four factors?

[826]

स्वरूपं यद्यसाध्यं तत्स्वातन्त्र्येण प्रसिद्धितः ।

तज्ज्ञानं चेत्प्रमाणं तत्तच्च शास्त्रान्न कार्यतः ॥ ८२६ ॥

If experience is one's own nature (*svarūpa*), then it is not what-is-to-be-accomplished, as it is established independently by itself; if it be the knowledge thereof, then that is *pramāṇa*; and that is (i.e. arises) from Scripture and not from a *kārya*.

What is this experience? Is it the nature of *Brahman*? Or, is it the psychosis of the form of *Brahman*? If it be the former, it cannot be the fruit of *pramāṇa*. If it be the latter, then that is the result of the Scriptural texts 'That thou art', etc., and not of *prasaṅkhyāna* which is a *kārya*.

masyaādi

NKL—*tattvamādivākya-phalam vṛttirūpajñānam na prasaṅkhyāna-phalam.*

[827]

शास्त्रमावर्त्यमानं हि स्वभावं नैव मुञ्चति ।

परोक्षवृत्तिर्युक्तिश्च कथं ते मिति वर्धने ॥ ८२७ ॥

Scripture which is being repeated, verily, does not lose its nature; and how can reasoning and that which is mediate be for you the means of increasing validity?

According to you, Scripture can yield only mediate knowledge of the real. Reasoning is, no doubt, mediate. By merely repeating these, how can one get immediate experience?

[828]

प्रमितेश्च प्रमेयस्य वृद्धौ वृद्धिः स्वतो न हि ।

तस्य वृद्धिर्मितेर्वृद्धावित्यन्योन्यसमाश्रयः ॥ ८२८ ॥

The growth in validity depends upon growth in the object of knowledge; it does not occur by itself; and the growth of that (object) depends on the growth of validity. Thus there is reciprocal dependence.

If it be held that by the said repetition there is an increase in knowledge, there would be the defect of reciprocal dependence thus: when there is excellence brought about in the object of knowledge, there occurs similar excellence in the means of knowledge, and *vice versa*.

NKL — *prameyasya vṛddhau viśayasyātiśaya-siddhau pramiter vṛddhiḥ.....mitivaicitryam antareṇa meyavaicitryam nāsti mānādhi-
natvān meyasiddhir iti anyonyāśrayaḥ.*

[829]

उत्पाद्यापि मितिं शास्त्रं यदि युक्त्याद्यपेक्षते ।

स्वर्गादावेवमेव स्यात्सापेक्षं च भवेत्तदा ॥ ८२९ ॥

If Scripture, even after generating knowledge, should stand in need of reasoning, etc., then that would be so even in the case of heaven, etc.; and in that case it would become dependent.

You say that Scripture stands in need of reasoning, etc. Now, does Scripture expect help from reasoning, etc., after making known the real, for the sake of the fruit which is intuitive experience, or does it require help even in the matter of making known the real? If it be the first, then it must be said with regard to the text 'He who desires heaven should sacrifice,' etc., that it occasions the sacrificial activity of the person concerned by making known the relation between the means and end, and then requires help from reasoning for the accomplishment of the end which is heaven. But such is not the case. If the second alternative be sponsored by you, then Scripture would cease to be *pramāṇa*, being dependent on reasoning.

[830]

व्यपास्तानर्थसंदर्भमात्मानमवगच्छतः ।

किमाप्यमधिकं शास्त्राद्येन युक्त्याद्यपेक्षते ॥ ८३० ॥

What more from Scripture is to be attained by him who has known the self as free from the aggregate of evil—in which case there may be dependence on reasoning, etc.?

More than the realization of the pure self, there is nothing that is to be achieved through Scripture. Where is, then, the need to depend on reasoning?

[831]

का वा युक्तिः प्रदीपस्य सर्पाद्याकम्पनाशनम् ।

रज्ज्वादितत्त्वविज्ञानं कुर्वतः स्वेन तेजसा ॥ ८३१ ॥

What reasoning does the lamp require which by its own light dispels the serpent and the shudder (caused by it) and makes known the truth, viz. the rope, etc.?

An example is given for showing that Scripture does not depend on reasoning for making known its own sense. The example is the familiar one of the lamp dispelling the rope-snake illusion.

NKL—*vimatam adhyasta-nivarttakam tattvajñānatvāt rajjutattva-jñānavat.*

[832]

गुणप्रधानभावो हि विना नैवैकवाक्यताम् ।

वस्तुकार्यार्थतात्पर्यभेदान्नापीह सा भवेत् ॥ ८३२ ॥

The relation of subsidiary and principal cannot be without syntactical unity; and that cannot obtain here because of difference in purport as reality and *kārya*.

Scripture and *prasaṅkhyāna* are not related as principal and subsidiary, because there is no syntactical unity between them. And there cannot be syntactical unity, because their purports are different; the texts 'That thou art,' etc., have reality for purport, while the injunction of meditation has *niyoga* for purport.

AVS—*prasaṅkhyānavidhi-sāstrayoh śeṣaśeṣibhāva ekavākyatām vinā na sambhavati, sā caikavākyatā na sambhavati, tattvamāder vastu-paratvāt prasaṅkhyānaviddhāyaka-vākyasya niyogaparatvāt.*

[833]

न च प्रयोजनैकत्वलक्षणाऽलैकवाक्यता ।

अङ्गप्रधानवद्येन कल्पेतालैकवाक्यता ॥ ८३३ ॥

Nor is there here syntactical unity of the nature of identity of fruit, as between auxiliary and principal, in which case syntactical unity could be postulated.

It may be contended that there is syntactical unity for *prasaṅkhyāna* and Scripture because of the sameness of fruit, as for the texts relating to the *Prayājas* and the *Darsapūrṇamāsa*. In connection with the *Darsapūrṇamāsa* sacrifice, we read—‘*samidho yajati, tanūna-pātaṁ yajati, iḍo yajati, barhir yajati, svāhākāraṁ yajati*’ (*Taittirīya-saṁhitā*, II, vi, 1, 1). This text mentions the fore-sacrifices that are to be performed in connection with the *Darsapūrṇamāsa*. These fore-sacrifices have no independent fruit; they are auxiliary to the principal act which is the *Darsapūrṇamāsa*.

Now, if *prasaṅkhyāna* and Scripture are to be related in this way, what is the fruit, we ask? Is it heaven? Or, is it release?

The fruit cannot be heaven; and *prasaṅkhyāna* and Scripture cannot have syntactical unity because of having heaven as their fruit. A contrary example is given here. There are two sets of texts (A) one commencing with the words ‘*yadāgneṇyo’sṭākapālaḥ,*’ etc., and (B) the other with the words ‘*āghāraṁ āghārayati,*’ etc. They relate to two sets of sacrifices. The question to be settled is whether both the sets of sacrifices are equally primary, or whether the first set alone is primary, the second being auxiliary. It is argued by the *Mīmāṃsaka*, as against the *prima facie* view, that the first set comprises the principal acts constituting the *Darsapūrṇamāsa*, while the second set consists of auxiliary acts. It is also maintained by him that the text, ‘*ya evaṁ vidvān paurṇamāsīm yajate, ya evaṁ vidvān amāvāsyām yajate*’ (*Taittirīya-saṁhitā*, I, vi, 9, 1-2), does not enjoin two different acts, but prescribes the time of performance with reference to the first set of sacrifices. [See *PM*, II, ii, 3-8.] Here again we have syntactical unity because the texts are related as enjoining the principal and subsidiary acts. And, the fruit is heaven.

This contingency does not arise with reference to *prasaṅkhyāna* and Scripture, because even you do not hold that heaven is their fruit.

[834]

स्वतःसिद्धस्य मोक्षस्य न साध्यमुपकारकम् ।

न चान्यथाऽङ्गता दृष्टा प्रधानानुपकारिणः ॥ ८३४ ॥

For release which is self-established, what is to be established (*prasaṅkhyāna*) cannot be the helper; auxiliaryness is not to be found in any other way in the case of what does not help the principal.

In regard to the other alternative, namely, that *prasaṅkhyāna* and Scripture have syntactical unity because they have release as their fruit, we have to ask; does *prasaṅkhyāna* help Scripture in the matter of bringing about the fruit, or in establishing Scripture itself?

Not the first; for it has already been shown that in the matter of release which is the fruit of Scripture, the injunction of *prasaṅkhyāna* is of no use.

NTV—*kaivalyaṁ hi svataḥsiddham na ca tasya kṛtisādhayatayā 'nuṣṭheyam prasaṅkhyānaṁ sādhanopakāraḥ bhavati.*

[835]

आत्मलाभे न शास्त्रं च नित्यत्वात्कार्यमीक्षते ।

स्वतोऽभिधानशक्तत्वान्नापि चैकतम्यबोधने ॥ ८३५ ॥

Scripture does not need *kārya* for establishing itself, for it is eternal, nor for teaching the oneness of self, for it has the capacity to express by itself.

The second alternative too is not possible; Scripture is eternal, and so it does not require *prasaṅkhyāna* for its establishment; nor does it need *prasaṅkhyāna* for revealing its sense, for it has the ability by itself to make known the one self.

AVS—*vedasya nityatvāt svato bodhana-sāmarthyāc ca.*

प्रसंख्यानं च शास्त्रार्थं सकृदेव कृते भवेत् ।

ऐकस्यानुभवो नो चेद्विसंवादादमानता ॥ ८३६ ॥

If continued meditation be the sense of Scripture, when performed once, there should be experience of the oneness of self; if not, there would be failure of fruitfulness, and there would result invalidity (for Scripture).

Let *prasaṅkhyāna* be the principal or a subsidiary to Scripture. But we have to settle this question, viz. whether it has an unseen result or a seen result. It cannot have an unseen result; for that is unacceptable to both of us. If it has a seen result, does that result come about when *prasaṅkhyāna* is performed once, or only when it is repeated? If the first alternative be sponsored, then you will have to give up advocating *bhāvanā* which is prolonged and uninterrupted meditation. As for the second alternative, that too is unintelligible. If a single performance of *prasaṅkhyāna* does not yield the fruit, how can a repeated performance yield it?

न चात्र चोदितः कालः संख्या वा येन निश्चयः ।

तद्द्वारेण भवेन्नापि संदिग्धे स्यात्प्रवर्तनम् ॥ ८३७ ॥

Nor is there prescribed here time or number in which case there could be certainty about the result through that. Indeed, there cannot be activity in respect of what is in doubt.

In the injunction of *prasaṅkhyāna* there is not mentioned 'time' or 'number' by virtue of which it may be said to yield the fruit. Contrary examples may help in elucidating the point here. In the

case of the *Agnihotra* sacrifice, 'morning' and 'evening' are prescribed. In the text 'He takes hold of the seventeen *Prājāpatya* animals,' the number 'seventeen' is prescribed. In regard to *prasaṅkhyāna*, no similar prescriptions are there. When one is in doubt about the fruitfulness of an act, one would not perform it.

NKL—*asmin-kāle etāvat - saṅkhyākāṁ prasaṅkhyānād unubhavo bhaved iti ... na.*

[838]

आरुह्याप्यथवा दूरं विसंवादपराङ्मुखः ।

यत्किञ्चित्कामतः कुर्यादकृतार्थोऽथवा पतेत् ॥ ८३८ ॥

Or (i.e. even if he is active), having climbed up high, he will turn indifferent because of failure and do as he likes, or fall without gaining his objective.

Or, when in doubt, if one performs *prasaṅkhyāna*, no good would come out of it. After trying and failing, one may become indifferent or despondent and end in utter defeat.

[839]

अदृष्टफलता वाऽपि कल्प्याऽग्निष्टोमवद्भवेत् ।

कर्माङ्गता वा कल्प्या स्यादुद्गीथविधिवत्तदा ॥ ८३९ ॥

Or, unseen fruit will have to be assumed, as in *Agniṣṭoma*; or it should be assumed to be an auxiliary to rite, as the injunction of the *Udgītha* chant.

If it be said that there is no question of failure, because one is asked to do *prasaṅkhyāna* till the end of one's life, then we must assume an unseen result for it, as for the *Jyotiṣṭoma*. Or, *prasaṅkhyāna* must be regarded as an auxiliary to ritual, even as the *Udgītha* chant is.

[840]

ततश्च प्रातिलोम्येन कार्यं स्याच्छास्त्रबाधनात् ।

अश्रद्धा च मुमुक्षूणां कार्यबाधोऽपि च स्थितः ॥ ८४० ॥

Thence there would be the *kārya* contrary to what is taught and subverting Scripture; there would also be loss of faith for those who desire release and there would be sublation of the *kārya*.

If *prasaṅkhyāna* is an auxiliary to ritual, it cannot serve as a subsidiary of Scripture (that teaches the one self). If it has an unseen fruit, then it would be a principal act, like the *Jyotiṣṭoma*. That would mean that you have to give up your view that *prasaṅkhyāna* is subsidiary to Scripture. Moreover, if *prasaṅkhyāna* is an auxiliary to ritual and has an unseen result, then the one who desires release would not be interested in it even as he is not interested in the *Jyotiṣṭoma*. As realization is not seen to result from it, the one who desires release would not perform it; and so far as he is concerned, there could be no injunction of *prasaṅkhyāna*.

[841]

वस्तुतत्त्वानपेक्षत्वात्कार्यमात्रप्रधानता ।

शास्त्राच्च वस्तुनोऽलाभात्कार्यं किंविषयं भवेत् ॥ ८४१ ॥

The *kārya* alone would be the principal, because there would be no need of the truth of reality; and since from Scripture the real cannot be gained, what content will the *kārya* have?

Further, on the view of *prasaṅkhyāna*, we have to ask, what makes the reality known? Is it the text that enjoins *prasaṅkhyāna*? Or, is it the text 'That thou art,' etc.? Not the first, because the injunction

has *niyoga* for purport, and cannot, therefore, reveal the real. Nor the second; for if the text 'That thou art' has *niyoga* for purport, it cannot serve as *pramāṇa* in regard to its own sense. And, in the absence of the knowledge of reality, a repetition of that knowledge would be impossible, and the *niyoga*, thus, would be void of content.

[842]

यदि तद्वस्तुयाथात्म्यं शास्त्रं न प्रतिपादयेत् ।

वस्त्वसिद्धेस्ततः कार्यप्राधान्यादर्थवादता ॥ ८४२ ॥

If Scripture does not expound the true nature of reality, then since the real has not been established and as that text treats principally of *kārya*, there would be for that the nature of eulogy.

On the view of *prasaṅkhyāna*, does the sacred teaching about the one self, while having that self for purport, not expound it, or does it expound? If it does not expound, then it would not be *pramāṇa*.

[843]

अथैकात्म्यार्थनिष्ठं सच्छास्त्रं स्यात्प्रतिपादकम् ।

आपरोक्ष्यात्तदा कार्यं व्यर्थं पारोक्ष्यहानिकृत् ॥ ८४३ ॥

If Scripture does expound the oneness of self as its purport, then that oneness will be immediate, and so it is futile to assume a *kārya* which destroys the mediacy.

If the sacred teaching does expound the oneness of self, then the intuitive experience thereof would result from that text itself, and there would be no need for *prasaṅkhyāna* to remove mediacy.

[844]

शास्त्रात्कथं च तत्सिद्धिर्याथात्म्यानवबोधकात् ।

नानश्वरूपे सिद्धेऽपि गव्यश्वस्य प्रसिद्धता ॥ ८४४ ॥

How does that result from Scripture which does not teach the true nature (of the self)? When the cow which is non-horse is established, the horse is not established.

Now, it may be argued thus: From Scripture there does not result the immediate experience of the real; for it can convey only a related and mediate sense. In order to make it immediate, there is the injunction of *prasaṅkhyāna*.

Reply: There is the text which declares, 'That which is direct and immediate,' etc. If from this and similar texts there does not arise the direct experience of the one self, Scripture would become *apramāṇa*.

Objection: Scripture teaches a reality which is distinct from the relationless and direct self, and also as the counter-correlate thereof the relationless and direct self. So, there is validity for Scripture.

Reply: How is this possible? Suppose we see a cow which is distinct from the horse; do we thereby see the horse also?

AVS—*aśvād bhinne gavi siddhe 'pi pratyakṣādina na taj-jñānād aśvasiddhiḥ*.

[845]

शास्त्राच्छ्रवणमालेण कार्याच्चानुभवो यदि ।

वस्तुन्यनिश्चिते वार्ता साऽर्थवादेऽपि दृश्यते ॥ ८४५ ॥

If it be said that the self is only heard from Scripture, and that the experience thereof is from *kārya*, then

the real is not determined, and Scripture would be mere words as is seen in the case of eulogy also.

Objection: From Scripture, the relationless and direct reality is established. But a mere hearing of Scripture does not produce experience. In order to have this experience, one must do *prasaṅkhyāna*. Thus, there is validity for Scripture, and there is need for *prasaṅkhyāna*.

Reply: From Scripture, is there determinate knowledge of reality, or only doubtful knowledge? If there is determinate knowledge, then that is experience, and nothing more is required. If there is only doubtful knowledge, then that is no knowledge. To say that there is knowledge from verbal testimony would thus be a mere figure of speech. If this be so, the text 'That thou art,' etc., would be but an eulogy.

[846]

ततश्च कार्यनिष्ठत्वं मुधैव परिवर्जितम् ।

संपत्परं भवेच्छास्त्रं वस्तुतात्पर्यवर्जनात् ॥ ८४६ ॥

And so, the doctrine that Scripture has *kārya* for purport has been given up (by the *prasaṅkhyānavādin*) only in vain; Scripture would have *sampat* (meditation) for purport, since it ceases to have reality for purport.

You cannot say, "Let the text 'That thou art' be an eulogy. What is the harm?" If the text is an eulogy, then its purport would be *kārya*. But this is not acceptable to you, for you too hold that the one self is the purport of the text. Self-consistency would demand of you to say that *prasaṅkhyāna*, and not reality, is the purport.

NKL — *vastuparaṁ śāstram icchatā na prasaṅkhyāna-niyogā 'ṅgikārya ity arthaḥ.*

AVS — vastuparatvena vastuni mātram icchataḥ prasaṅkhyāna-niyogo nābhyupagantavyaḥ.

[847]

न चाप्याख्यायिकारूपमनुग्राहं श्रुतौ मतम् ।

आदिमत्त्वादिदुष्टत्वात्पुमर्थत्वेन वर्ण्यते ॥ ८४७ ॥

Nor is Scripture to be taken as of the form of story, though (stories are) heard; for there would be the defect of having a beginning, etc. Stories are related only as being subsidiary to the human goal.

There are stories related in the Upaniṣads. But they are not their purport; for by listening to them the human goal is not reached. If the stories were to constitute the purport, Scripture would have a beginning and cease to be eternal. The stories are there only as subsidiary aids to understanding.

AVS—tarhi kimartham ākhyāyikārūpaṁ śrutyā bhāṇyate ... abhyu-dayamokṣa-sādhana-stutyartham iti brūmaḥ.

[848]

पौनरुक्त्यभयाच्चात्र यद्यर्थान्तरकल्पनम् ।

ऐकात्म्योक्तौ विधिव्यर्थ इति द्वैतप्रकल्पनम् ॥ ८४८ ॥

If, for the fear of futile repetition, another sense be assumed here (for *uttara-kāṇḍa*), and it be stated to be oneness of self, then injunction would be futile, and so duality would have to be assumed (that there may be continued meditation).

For this reason also there cannot be the injunction of *prasaṅkhyāna* in the Upaniṣadic texts 'That thou art, etc.: if the Upaniṣads have *niyoga* for purport, like the ritual sections of the Veda, there would be futile repetition.

Objection: In the ritual sections, injunction is independent, whereas in the Upaniṣads the main teaching is about Brahman, and the injunction of *prasaṅkhyāna* is auxiliary thereto. Thus there is no repetition. Or in the ritual section, *niyoga* is the external means, whereas here it is the internal means. Or, the connection may be stated thus: if *prasaṅkhyāna-niyoga* is not admitted in regard to the text 'That thou art,' there would be release through knowledge generated by the text heard only once, and the repetition of the text nine times in the *Chāndogya* would be pointless. Therefore the injunction of *prasaṅkhyāna* as auxiliary to the sacred teaching should be recognized.

Reply: The first explanation offered is not sound. If there be admitted *niyoga* in the Upaniṣads, that would become the principal according to the rule that what is existent is for the sake of what is to be occasioned (*bhūta-bhavya-nyāya*). So, the proper distinction between the two sections should be stated thus: In regard to the Vedāntic texts there could be no injunction by any means. Injunction is pertinent only to the texts that relate to ritual.

The second explanation too is not proper. That explanation would obtain if the two sections constituted one teaching like the second and third chapters of a single book. But that is not the case. As there can be no injunction at all in regard to the text 'That thou art,' etc., the two sections must be regarded as two different teachings.

The third explanation is equally unintelligible. If it is urged that the injunction of *prasaṅkhyāna* is for the wise one also because the text 'That thou art' is repeated, then it would follow that duality is real, as without duality there could be no injunction. It cannot be said that only an apparent duality is required, for your view is that the *niyoga* is necessary even after there is knowledge. Otherwise, the *niyoga* too would become unreal. So, the reason for the repetition of the text 'That thou art' must be stated thus: it is for the removal of doubts that arise in the way of understanding the text.

Note: AVS introduces the second alternative in the *pūrvapakṣa* thus: *brahmadattādi-matānusārī kaścic codayati*.

[849]

न च मानेन विषये बोधितेऽन्वेषणं पुनः ।

कार्ययुक्त्योः कचिदृष्टं स्वतःप्रामाण्यबाधनात् ॥ ८४९ ॥

In a matter which has been known through means of valid knowledge nowhere is again seen enquiring through *kārya* and reasoning, for then, self-validity would be destroyed.

When is *prasaṅkhyāna* required—is it when the Scriptural teaching has been understood only superficially, or even when that teaching has been directly and determinately known? The first alternative is acceptable to us, not the second. On the evidence of the Scriptural teaching when a matter has been settled, there is no need either for *niyoga* or for reasoning. When the supreme truth has been seen, there is no room for the sense of agency. How, then, can there be scope for injunction, etc.? Moreover, if Scripture were to be dependent on them, its self-validity would be destroyed.

[850]

प्रत्यक्षेण घटे बुद्धे का युक्तिः कार्यमेव वा ।

अदुष्टकारणत्वं चेत्सिद्धं वेदे नृवर्जनात् ॥ ८५० ॥

When a pot has been known through perception, why reasoning and why *kārya*? If they are needed for having a defectless cause, that is already established in the case of the Veda, because it has no human author.

An illustration is here given for showing that Scripture does not depend on reasoning, etc. When a pot is directly perceived, there is no need to reason about it. Sometimes, in the case of perception, etc., there may be a defective cause, which may necessitate dependence on reasoning, etc. But as regards Scripture, there can be no defect at all, for it is not the work of a human agent.

NTV—tatra kācādidōṣasambhavād anveṣaṇam, sābdepi pauruṣeye puruṣadvāraka-dōṣa-sambhavād anveṣaṇā bhavaty eva, vedasya tu apauruṣeyatvād dōṣarahitatvaṁ svataḥsiddham iti nānveṣaṇam yuktam iti bhāvaḥ.

[851]

प्रत्यक्षादिविरोधश्च कार्यपक्षेऽपि तु स्थितः ।

ऐकात्म्यानुभवो हि स्यात्कथमक्षादिबाधनात् ॥ ८५१ ॥

As for contradiction with perception, etc., that remains even on the view of *kārya*. How can there be the experience of oneness of self, since it is contradicted by perception, etc.?

It cannot be maintained that, as the Scriptural knowledge of the oneness of self is opposed to perception, there is need for *prasaṅkhyāna-niyoga*. For, even then the opposition to perception would remain.

NTV — siddhavastu-bodhakatve vākyasya pratyakṣādi-virodhepi prāmāṇyaṁ yujyate, upakramādiliṅgaiḥ tatra tātparya-nirṇayāt, niyoga-paratve tu ādityo yūpa ityādivat na vastuni prāmāṇyaṁ pratyakṣādi-virodhād ity arthaḥ.

[852]

तन्निषेधात्तु या सिद्धिर्न सा कार्यप्रसादतः ।

प्रमाणादेव शास्त्रात्सा न मेयात्कार्यतो भवेत् ॥ ८५२ ॥

That which is established by the denial of that (perception, etc.) is, indeed, not a gift from the *kārya*; that is only from Scripture which is a valid means of knowledge, and not from the object of knowledge which is *kārya*.

The establishment of the non-dual reality through the rejection of the evidence of perception, etc., is not on the strength of *niyoga*, but on the testimony of Scripture which is a valid means of knowledge. *Niyoga* is not a means of knowledge; it is an object of knowledge.

[853]

का वा कार्येऽस्ति ते युक्तिः शास्त्रं चेदुभयोः समम् ।

अज्ञातज्ञापनादन्यच्छास्त्रान्नेति पुरोदितम् ॥ ८५३ ॥

If the nature of Scripture be the same for us both, then what argument of yours will justify *kārya*? That there is no Scripture other than that which makes known what has not been known, we have said already.

Both of us are agreed' that the Vedānta texts validly teach a sense which relates to the established reality. We have also defined *pramāṇa* as that which conveys a sense not already known. Thus, when it is shown that Scripture is the evidence for Brahman which is not known earlier, where is the need for dependence on *niyoga*?

[See vv. 561-b — 562-a f.]

[854]

पुमर्थं प्रतिपाद्यापि प्रकृत्यैव श्रुतिः पुनः ।

तमेव युक्तिभिः सार्धं वदन्ती स्वार्थमीक्षते ॥ ८५४ ॥

After expounding the human goal by the force of its own nature, Scripture in speaking of that again with the help of arguments, is expectant only of its own sense.

It may be argued that although *niyoga* is not needed, reasoning is required thus: Scriptural texts do contain arguments. The reasoning based on arguments is not possible before knowing a thing. So, it must be admitted that Scripture stands in need of reasoning for establishing what is taught by it.

Reply: Scripture teaches its sense which is the human goal. The arguments are adduced to remove possible doubts. Although the knowledge of the inner reality, Brahman, is given by Scripture, there arise doubts on account of the limitations of man. The arguments that are advanced are designed for the removal of these doubts. They are not the means for generating the intuitive knowledge of Brahman. For this, the Scriptural text alone is the cause.

NKL—śrutiḥ prakṛtyaiva svārasikaśāmarthyenaiva saṁvid-ānanda-vastu pratipādyā, sambhāvanā - viparītabhāvanā - 'bhibhūtam āpāta-darśanam utpādyā, tad asambhāvanādi-nirāsaphala-yuktibhiḥ saha vadantī svārtham akhaṇḍāparokṣam ikṣate sadyomuktiphalam anubhavam prasūta ity arthah.

[855]

नैतावताऽपराधेन युक्तयो मानकारणम् ।

शब्दमालादसंसिद्धेरनपेक्षत्वहानतः ॥ ८५५ ॥

On account of a fault such as this the reasonings are not the cause of a means of valid knowledge; for if the self would not be established from Scripture alone, there would be the destruction of the latter's independence.

Scripture teaches its own sense; here there is no dependence on reasoning. The latter helps only by way of removing doubts. Otherwise, Scripture would cease to be an independent *pramāṇa*.

NTV — *pauruṣeyavākyavat vedah sāpekṣaḥ prāpnoti, yuktyādy-upanyāsasyā 'nyathāsiddhau na sāpekṣaḥ syād ity arthaḥ.*

[856]

न वायोः क्षिप्रकारित्वाच्छेतालम्भो विभूतये ।

विध्युद्देशात्तु तत्सिद्धेः शैद्यं तूक्तं प्रवृत्तये ॥ ८५६ ॥

Not because Vāyu is quick in giving reward is the sacrifice of a white goat enjoined for attaining prosperity; for that is established as the aim of the injunction; and quickness is mentioned for the sake of performance.

Here an illustration is given to show that reasoning is only for the purpose of removing obstacles that lie in the way of determinate knowledge. There is the Vedic text (see note to v. 36): 'One desiring prosperity should sacrifice the animal *śveta* dedicated to Vāyu: Vāyu, verily, is the eṣṭest deity ... he leads the man to prosperity.' Here the relation of means and end as between sacrificing the white animal and gaining prosperity is not established on the strength of the words 'Vāyu, verily, is the eṣṭest deity.' That relation is known from the earlier part of the text 'One desiring,' etc. The other part of the text is for removing a possible obstacle by putting enthusiasm into the agent of the sacrifice.

Similarly, here, reasoning is given, not for generating knowledge from the text, nor for the sake of determining the sense of the knowledge that has arisen, but for removing the obstacles thereto.

जाग्रदवप्नसुषुप्तेभ्यो यदि नामातिरेकतः ।

व्यक्तिभ्यो गोत्ववद्दृष्टं ब्रह्मत्वेऽस्य किमागतम् ॥ ८५७ ॥

If the self be seen as distinct from the states of waking, dream and sleep, as cowness is from the individuals, what bearing has it on the self being Brahman?

The determination of truth does not result from reasoning. For example, one may know through reasoning that the self is distinct from the three states of experience. But, with this much, it is not realized that the self is Brahman, that the sense of 'thou' is the sense of 'that.' This latter realization is got only from the Vedāntic text.

NTV—*tvaṃ-padārtha-śuddhir eva yuktibhiḥ bhavati na tasya brahmatvam avagataṃ bhavati, vākyād eva kevalāt tad avagamād ity arthaḥ.*

[858]

असिद्धं शास्त्रयुक्तिभ्यामावृत्त्याऽपि न सिध्यति ।

नैव ह्यावर्तनं हेतुः प्रामाण्येऽन्येष्वनीक्षणात् ॥ ८५८ ॥

What has not been established by Scripture and reasoning cannot be established by repetition. Verily, repetition is not seen to be the cause of validity elsewhere.

The opponent may argue that, as knowledge is not seen to result from the text that has been heard or from reasoning, there is need for repetition (*prasaṅkhyāna*). The reply is that repetition is not a means of knowledge. Even as the repetition of perception is not the cause of validity, the repetition of verbal testimony is not the cause of validity.

NKL — ātmājñānam abhyasyamānam nāparokṣapramiti-janakam, jñānatvāt, pratyakṣādi-jñānavat.

AVS—jñānasya āvṛtyā niścayaajanakatvaṁ na dṛṣṭam ity arthaḥ.

[859]

न चेदृशं प्रमाणत्वं दृष्टमन्यत्र कुत्रचित् ।

अन्यादृक्षप्रमाणस्य न च नास्त्यत्र संभवः ॥ ८५९ ॥

Nowhere else is this kind of validity seen ; nor can it be said that there is no possibility here of a unique kind of proof.

It may be that secular statements convey a sense that is related and mediate. That does not mean that it is impossible for the Vedāntic texts to reveal Brahman that is unrelated and immediate. A *pramāṇa* must be in consonance with the real.

AVS — apratibandha-vijñānam svarūpalābhamātreṇa niścitiṁ avidyāatākārya-nivṛttiṁ ca karotī 'ty arthaḥ.

[860]

अलौकिकार्थवादित्वादात्मब्रह्माभिधानयोः ।

संबन्धाग्रहणादात्मा ब्रह्मेति कथमुच्यते ॥ ८६० ॥

“Because the names *Ātman* and *Brahman* are expressive of nonempirical senses, how can it be said that the *Ātman* is *Brahman* without knowing their relation?

Objection: You say that the text ‘That thou art’, etc., is the *pramāṇa* for *Brahman-Ātman*. Now, are the words ‘*Brahman*’ and ‘*Ātman*’ known through some other *pramāṇa* or not? If they are not known, the text cannot convey meaning.

[861]

ज्ञातार्थसङ्गतिः शब्दो वाक्यार्थावगमक्षमः ।

ब्रह्मात्मार्थप्रसिद्धौ च लोकान्मानप्रवेशिता ॥ ८६१ ॥

“The word whose relation to the sense is known is capable of conveying the sentence-sense. If the senses of *Brahman* and *Ātman* were known from empirical usage, then the knowledge would enter the empirical sphere.”

If those words are already known, then the text ‘That thou art,’ etc., would be but a re-statement.

[862]

नाऽऽत्मन्येवाऽऽत्मशब्दस्य प्रयोगात्स्यादलौकिकः ।

ब्रह्मार्थोऽपि महत्त्वेन प्रसिद्धो व्यवहारतः ॥ ८६२ ॥

Since the word ‘self’ is used only to refer to the self, it has an empirical sense; and the sense of ‘*Brahman*’ also is well known in empirical usage as greatness.

Reply : The two words are not unknown in empirical usage. The word 'Ātman' is employed to refer to self. The word 'Brahman' means 'that which is great.'

[863]

एवं पदात्परिज्ञाते पदार्थे लोकमानतः ।

वाक्यार्थोऽतीन्द्रियो वेदे वाक्यात्केन निवार्यते ॥ ८६३ ॥

When thus the word-senses have been known from the words through the empirical means of knowledge, who can prevent the super-sensuous sentence-sense from the sentence in the Veda?

Although the word-senses are known earlier, the sense of the text 'That thou art' is not empirical, in which case alone the text would be a re-statement. The impartite sense which the text conveys is not known through any other *pramāṇa*.

[864]

अपूर्वदेवतास्वर्गपदार्थेष्वपि लोकतः ।

सिद्धेष्वतीन्द्रियोऽप्यर्थो वाक्यादेवागम्यते ॥ ८६४ ॥

When through empirical usage the senses of words like *apūrva*, *devatā* and *svarga* have been established, the super-sensuous sense is understood from the sentence alone.

An example is given here from the ritual section of the Veda. Words such as 'apūrva,' 'devatā,' and 'svarga' carry their meanings even in empirical usage. But, as employed in the Vedic texts, they acquire a supernormal meaning.

NKL — *kṛtisādhyamātre saṁpradānakāṛakamātre sukhāmātre vā apūrvādi-śabdānām loka-grhīta-saṅgātikānām vede svargakāmādi-padāntara-samabhivyāhāreṇa viśiṣṭārtha-bodhakatvaṁ yathā tathā atrāpī 'ty arthah.*

[865]

नापेक्षापूर्णाशक्तेः प्रयोगे समवायिता ।

पदानां सपदार्थानां वाक्याद्वयवहतिर्यतः ॥ ८६५ ॥

There is no coherence when words along with the word-senses are used, as they have not the capacity to satisfy the expectancy ; for, empirical usage is from sentence.

The objector may say that there is no sentence-sense other than the word-senses put together. But he is wrong. On hearing a set of words without mutual expectancy, one does not make out any sense. In order to convey sentence-sense, a sentence has to be employed.

[866-867]

वाक्यार्थायैव वाक्यं हि सर्वदैव प्रयुज्यते ।

व्यवहारेषु वृद्धानां संबन्धस्तत्र गृह्यते ॥ ८६६ ॥

भागान्तरप्रवेशेन भागत्यागेन च स्फुटम् ।

वाक्यवाक्यार्थयोर्भेदे पदार्थानां निमित्तता ॥ ८६७ ॥

In the empirical usages of elders a sentence is always used for the sake of sentence-sense ; there the relation (of words and their senses) is understood clearly by the entry of other parts and leaving off of certain parts (i. e. *āvāpodvāpa*); for the difference between sentence and sentence-sense, the words and their senses are the cause.

Objection: Words make their senses known; from the word-senses there is knowledge of the sentence-sense, and not from the sentence.

Reply: Both in the state of learning and in the state thereafter it is only the sentence that is used. Never do the word-senses make sentence-sense known; for they are not *pramāṇa*. If it were not thus, knowledge of the sentence-sense would not be through verbal testimony. Moreover, in the empirical usage of elders it is the knowledge of the sentence-sense that is intended. It is from this that the relation of particular words to their senses is known through the method of insertion and elimination.

Objection: Insertion and elimination stop when the senses of words have been grasped. How, then, to account for the difference between sentences and between sentence-senses?

Reply: Words are the cause for the difference between sentences; and word-senses for the difference between sentence-senses.

AVS — na kevalam padārthajñānāya vākya prayogaḥ, kiṃtu vākya-rtha-jñānāya.

[868]

यद्भागस्याऽऽगमाद्योऽर्थभागः स्यादधिकः क्वचित् ।

तस्य भागस्य भागोऽसौ निमित्तं स्यान्न तु प्रमा ॥ ८६८ ॥

If by the in-coming of a part there is increase of a part in the sense, then of that (increased) part this (added) part is the cause, and not the means of valid knowledge.

When a word is inserted in a sentence, there is an addition in sense. Of this added sense, the inserted word is the cause. Thereby that word does not become *pramāṇa*.

[869]

अत एव सभागत्वं वाक्यवाक्यार्थयोर्मितम् ।

वाचकत्वेऽपि वाक्यस्य संसृष्टार्थमिधानतः ॥ ८६९ ॥

It is therefore held that the sentence and sentence-sense have parts; and the sentence, while conveying its meaning, expresses a composite sense.

Objection: Like word and word-sense, sentence and sentence-sense, you say, are related as expression and expressed. Then, even as for the former, for the latter too parts are not possible; and sentence must convey its sense even as word does. You would thus have to admit that sentence is not *pramāṇa*, even as word is not.

Reply: Although sentence expresses its sense, the sense that it expresses is a related one. So, both sentence and sentence-sense have parts. The relation thus is between word which is a part of sentence and word-sense which is a part of sentence-sense. The same does not obtain between sentence which is a collection of words and sentence-sense which is a collection of word-senses.

[870]

ततश्चैवं समूहस्य वाचकत्वमवस्थितम् ।

भागवत्त्वं च संसिद्धं वाक्यवाक्यार्थयोरतः ॥ ८७० ॥

And thus it is settled that the capacity to express meaning is for a collection (of words) (only); and it is also, therefore, established that sentence and sentence-sense have parts.

Word has capacity to convey its own sense as associated with other competent words. And, sentence and sentence-sense have parts. From this we conclude that sentence which is a collection of

words conveys a meaning which is not known earlier from the words themselves, and so it is *pramāṇa*, while word is not.

NKL—*yato vākya-tadarthayor bhāgavatvam eva tataḥ samūhasya vācakatvaṁ pramāṇatvam avasthitam ity arthaḥ.*

AVS—*ataḥ-sabdo yata ity asminn arthe ca-sabda evakārārthe.*

[871]

एवं च लोक्तः सिद्धो वाक्यार्थः स्याच्छ्रुतावपि ।
ॐ

लौकिका एव शब्दार्था न्यायेनोक्ताः श्रुतौ यतः ॥ ८७१ ॥

And thus, even in Scripture there would be the sentence-sense established in empirical usage; for, the empirical word-senses alone are declared in Scripture through reasoning.

Just as in empirical usage words have capacity to express a sense as construed with other competent words, so also do they have that capacity in the Veda. So far as the use of words in sentences is concerned, there is no difference between empirical usage and Vedic usage. As for the Vedānta texts conveying a sense that is impartite, that is made possible by secondary implication (*lakṣaṇā*).

[872]

नृविवक्षाव्यवायेन लोके शङ्का भवेदपि ।

वेदे त्वपौरुषेयत्वात्साक्षात्स्वार्थे प्रमाणता ॥ ८७२ ॥

Even though, due to the intervention of human intention, there be doubt in empirical usage, in the Veda, because it is not a product of any human agency, there is direct validity in respect of its own sense.

Objection: If empirical usage and the Veda do not differ in the matter of sentence-sense, then like empirical words, the Veda too should be a contingent *pramāṇa*.

Reply: Empirical words are contingent because they are uttered by fallible human beings. Not so is the Veda, because it has no human author.

[873]

न च कार्यपरत्वेऽपि पदानां संहतिः स्थिता ।

अन्यत्वावगमो न स्यात्संबन्धज्ञानवर्जनात् ॥ ८७३ ॥

Even if the Veda had *kārya* for purport, it does not follow that combination of words has that for purport; for if that were so, there would be no knowledge of sense elsewhere, because there is not the knowledge of relation (to *kārya*).

Even if the Veda had *kārya* for purport, it does not follow that every combination of words should have that for purport. For, we have already shown that words have capacity in conveying sense in combination with competent words. And, sentences are employed to convey a sense that has nothing to do with *kārya*, even as there are sentences relating to *kārya*. So, it must be admitted that a sentence can mean something which is already there. To the question how a sentence can convey a sense that is unrelated and impartite, we have replied that it is by secondary implication.

If *kārya* is said to be necessary for words or sentences to make sense, then, what about words and sentences which have no relation to *kārya* and yet make sense?

[874]

यथा च कार्ये तात्पर्यं कार्यं चापि न विद्यते ।

पूर्वमेव तथाऽस्माभिर्युक्तिभिः संप्रसाधितम् ॥ ८७४ ॥

How *kārya* is not the purport (of the Veda) and how there is no *kārya* at all we have already established through reasoning.

That *kārya* is not the purport of the Veda, we have established already.

[875]

अनादिवृद्धव्यवहृद्युत्पत्त्यैव च तत्स्थितेः ।

शब्दस्यार्थेन संबन्ध आदिमत्ता न शङ्क्यते ॥ ८७५ ॥

Because the relation of a word to its meaning is established by the immemorial usage of elders, the doubt cannot be raised that the relation has a beginning.

If it be objected that because the relation between words and meanings depends on convention and so has a beginning, verbal testimony cannot be an independent *pramāṇa*, the reply is that the usage of words is without a beginning.

NTV — cakṣurāder yathā rūpagrahaṇe sāmāthyam sahajam na sāṅketikam evam śabdasyāpīty arthaḥ.

[876]

प्रथमश्रवणे चैव न शब्दार्थावधारणम् ।

तत्ताव्युत्पन्नता हेतुः शब्दानां न त्वशक्तिता ॥ ८७६ ॥

Where on the first hearing the sense of a word is not determined, there the lack of learning (on the part of the hearer) is the cause and not the incapacity of the words.

Objection: If words have capacity to convey meanings, why is it that all who hear words such as 'cow' do not have the knowledge of their meaning? Is it not, then, reasonable to say that the relation between words and meanings is dependent on convention?

Reply: Those who have not learnt the meanings of certain words do not understand the meaning when they hear those words, not because the words have no capacity but because those persons are not aware of that capacity. There is no need, therefore, to assume a relation called convention over and above capacity.

[877]

चक्षुर्द्रष्टृपि बाह्यं हि न प्रकाशं विनाऽर्थदृक् ।

नैतावताऽस्य सामर्थ्यं हन्यतेऽन्यस्य वा भवेत् ॥ ८७७ ॥

Though seeing, the eye does not see the object in the absence of external light; but with this much its capacity is not destroyed, nor does the capacity belong to something else.

An example is given here. The eye has the power to see. But in the absence of external light it does not see. This does not mean that the eye has no power to see, nor that the power belongs to light.

[878]

व्युत्पत्त्या न च संबन्धः क्रियते ह्यर्थशब्दयोः ।

अवस्थिते हि संबन्धे वृद्धेभ्योऽसौ प्रजायते ॥ ८७८ ॥

The relation between word and sense is not created by learning; when the relation is there, learning results from the usage of elders.

On the view which says that the relation between word and sense is conventional, we ask, what is the origin of the convention? Is the convention due to what one learns? Or, is it created by someone who is parviscient? Or, is it fixed by the omniscient God?

Not the first; because it is only when the relation between word and its sense is there that learning arises on the strength of the empirical usage of elders. How can that which is posterior be the cause of that which is earlier?

[879]

संबन्धकरणाशक्तेस्तत्कर्तुश्चास्मृतेरपि ।

तद्विना व्यवहाराच्च सिद्धा संबन्धनित्यता ॥ ८७९ ॥

Because no one is capable of creating the relation, as no such creator is remembered, and because there is usage even without such remembrance, the eternality of the relation is established.

The second alternative is not sound. No one who is parviscient can be the author of the relation between word and sense which is endless.

Nor is the third alternative intelligible. We do not experience a God that is the author of the relation. No one remembers such an act of creating the relation by God. The empirical usage of words takes place even without remembering some one as the author of the relation between words and their sense. The relation in dispute is eternal, like the self, because no author thereof is remembered.

[882]

संनिकृष्टार्थसंसृष्टस्वार्थमात्राभिधानतः ।

तस्मात्सिद्धोऽत्र वाक्यार्थो लोके वेदे प्रमाणवान् ॥ ८८२ ॥

Therefore, it has been established here, both in empirical usage and Veda, that the sentence-sense is

valid, as it expresses its own sense in relation to the proximate and connected senses.

It is now settled that words convey their senses as related to other senses characterized by proximity, etc., that the senses of the words may be *kārya* or what is not *kārya*, and that the sentence-sense, which is either the relation of word-senses or related word-sense, is valid testimony both in empirical usage and in the Veda.

[883]

अतोऽवबोधकत्वेन दुष्टकारणवर्जनात् ।

अबाधाच्च प्रमाणत्वं वस्तुन्यक्षादिवच्छ्रुतेः ॥ ८८३ ॥

Therefore, Scripture is valid in respect of the real, like perception, etc., because it conveys knowledge, because it is free from defective causes, and because it is not sublated.

The testimony of the Scriptural texts such as 'That thou art' is valid because it instructs the eligible person, and the knowledge that results from it is faultless. Neither doubt nor error is possible here because Scripture is not the work of any human author. Consequently, there can be no sublation of its testimony.

NKL—vedaḥ siddha evārthe pramāṇaṁ pramāṇatvāt cakṣurādivat.

[884]

पुरुषार्थोपदेष्टृत्वाद्यद्वैतकार्ये प्रमाणता ।

तथैकात्म्ये विशेषाद्वा पुमर्थातिशयत्वतः ॥ ८८४ ॥

Because Scripture teaches the human goal, as it is a means of valid knowledge in respect of *kārya*, so is it a

means of valid knowledge in respect of the oneness of self, or even more so, because of the excellence of the human goal.

Just as the texts of the ritual section of the Veda are valid, so are the Upaniṣadic texts valid. Especially the latter cannot but be valid because they make one realize the truth, and lead to the final human goal.

[885]

पुमानिष्टस्य संप्राप्तिमनिष्टस्य च वर्जनम् ।

इच्छन्नपेक्षते योग्यमुपायमपि तत्परः ॥ ८८५ ॥

Desiring to attain what is good and to avoid what is evil, and being devoted to that, man stands in need of the proper means also.

The human goal has two aspects—the attainment of what is desired, viz. happiness, and the avoidance of what is not desired, viz. misery. What is required is the proper means that would lead to this goal.

NKL—iṣṭāniṣṭa-prāptiparihāra-mātram apekṣate na sādhyatvam apī 'ty arthaḥ.

[886]

ग्रामादि किञ्चिदप्राप्तं प्राप्तुमिष्टमिहेच्छति ।

One may desire to reach a village, etc., which have not been reached; or one may desire to regain gold, etc., which, though being in one's own hand, has been forgotten.

What is to be attained may be of two kinds: (1) that which is yet to be accomplished, e. g. the reaching of a village, and (2) that

which is already there, but only has been forgotten, e. g. a gold piece that is in one's hand.

[887]

परिहार्यं तथाऽनिष्टं कण्टकादि जिहासति ।

रज्ज्वां सर्पादि किञ्चिच्च त्यक्तमेव जिहासति ॥ ८८७ ॥

Likewise, one may desire to remove what is unpleasant like thorn, etc., or one may desire to avoid the serpent, etc., in the rope, which are already not there.

What is to be removed is also of two kinds: (1) a factual impediment to one's happiness, e. g. a thorn that has entered the flesh, and (2) an imagined source of pain, e. g. the serpent in the rope.

[888]

नियतोपायसाध्यत्वादवाप्यपरिहार्ययोः ।

विधितः प्रतिषेधाच्च साधनापेक्षता भवेत् ॥ ८८८ ॥

Because what is to be attained and what is to be avoided are to be accomplished by the allotted means, there is the need of means through both prescription and prohibition.

For attaining what has not been attained, and for removing what has not been removed, one has to follow the prescriptions and prohibitions taught by Scripture.

[889]

अज्ञानान्तरितत्वेन संप्राप्तत्यक्तयोः पुनः ।

याथात्म्यज्ञानतो नान्यत्पुरुषार्थाय कल्पते ॥ ८८९ ॥

But as regards what are already attained and already avoided, because they are veiled by ignorance, nothing but the knowledge of truth serves as the means for the human goal.

What stands in the way of attaining what is already attained and avoiding what is already avoided is ignorance. In order to remove ignorance what is required is knowledge.

[890]

अशेषानर्थविच्छेदं वाञ्छतः श्रुतितः श्रुतेः ।

त्वं ब्रह्मेति हताशेषक्लेशो मोहप्रहाणतः ॥ ८९० ॥

For one who desires the destruction of the entire host of evil, when he hears from Scripture 'Thou art Brahman', there is the removal of all sorrow because of the destruction of delusion.

When from the Scriptural teaching 'Thou art Brahman' the truth is known and ignorance is removed, misery and evil disappear, and the goal that is unexcellable and unsublatable bliss is gained. Hence the Vedānta texts have absolute validity.

[891]

वेदस्य सिद्धे प्रामाण्ये ह्यज्ञातार्थावबोधतः ।

कार्ये यथा प्रमाणत्वमैकात्म्येऽप्येवमिष्यताम् ॥ ८९१ ॥

When thus the validity of the Veda has been established on the ground that it makes known a sense which was not known, just as there is validity in respect of *kārya*, validity in respect of the oneness of self must also be admitted.

The Veda is *pramāṇa* in the sense that it reveals a sense that is unknown. Just as its ritual section is valid by making known *kārya* which is otherwise unknown, even so its knowledge-section is valid by making us realize the oneness of self.

NKL—*karma-jñāna-vākyayor ajñāta-jñāpanam tulyam ity arthah.*

[892]

कार्याद्यदि तु मानत्वं मानत्वात्कार्यनिष्ठता ।

अन्योन्याश्रयतैवं स्यादेकस्यासिद्धितोऽन्यतः ॥ ८९२ ॥

If there is validity for the Veda because of *kārya*, then the Veda would have *kārya* for purport because it is valid; thus there would be reciprocal dependence because either will not be established without the other.

It is not proper to say that the Veda is valid because it has *kārya* for purport. For, there would be reciprocal dependence thus: the Veda is valid *pramāṇa*, and so it teaches *kārya*; it has *kārya* for purport, and therefore it is valid.

[893]

औदासीन्यान्निषेधेषु न लभ्येत प्रमाणता ।

औदासीन्यं निवृत्तिर्हि स्वरूपालम्बनं च तत् ॥ ८९३ ॥

Because prohibitions are of the nature of indifference (and not *kārya*), they would not attain validity; and indifference, indeed, is withdrawal (from action, and not action); that is remaining in one's own nature.

Objection: What is in dispute, viz. the Vedānta, is not valid in regard to its sense, as it does not have *kārya* for purport.

Reply: The *probans* is inconstant. The prohibitory texts of the Veda, such as 'Do not kill', 'Do not drink', do not have *kārya* for purport; yet they are admitted to be valid. What such texts teach is not action, but indifference or withdrawal from action. And, withdrawal means remaining in the state of the immutable self.

NTV—audāsīnyaṁ nāma nivṛttiḥ na bhāvarthaḥ, sā ca ātmādināṁ svarūpam eva.

NKL — rāga - prāpta - brāhmaṇahanana - kalañjabhakṣaṇādi - kriyā - nivṛttir ity arthaḥ.

AVS—audāsīnyaṁ nivṛttir na kāryam, sā ca nivṛttir vastveva ity arthaḥ.

[894]

सोऽरोदीत्यादिवाक्यानां कार्यविशेषप्रमाणता ।

अपुमर्थोपदेष्टृत्वात्तच्च नात्रेत्यकारणम् ॥ ८९४ ॥

The texts 'He howled', etc., are valid by entering into *kārya*, because they teach what is not a human goal; but that is not so here, hence it cannot be the reason.

Objection: The texts 'That thou art,' etc., are valid in regard to what is auxiliary to *kārya*, because they are Vedic statements devoid of injunction, like the eulogistic texts (*arthavāda*).

Reply: There is no parity between the Vedānta texts and the *arthavāda* texts. While the latter do not have an end in view, the former have for purport the highest human end. So, the *probans* in the inference given above is vitiated by an adventitious circumstance.

NKL — vedāntāḥ kāryaśeṣatvena pramāṇaṁ siddhārtha-vedatvāt, sorodīdityādi-vākyavad ity āsaṅkya svārthe-phalavikala-vedatvam upādhir ity āha—sorodīd iti.

[895]

न चैकात्म्याभ्युपायस्य मिथ्यात्वमिह शङ्क्यते ।

उपेयाप्तौ कृतार्थत्वादुपायं प्रत्यनीक्षणात् ॥ ८९५ ॥

Nor may it be doubted here that the means to the oneness of self is illusory; for it is only when the object has been attained that the means is neglected, because the aim has been fulfilled.

Objection: The knowledge that results from the texts like 'That thou art' is not valid, because its cause is illusory, even as the inference of fire from the pseudo- smoke as *probans* is.

Reply: When the knowledge is gained, release is attained. After that there is no need to inquire into the ontological status of Scripture.

NKL—*upeyasyaikātmyasya satyatvena taj-jñānasya pratibimbajanya-bimbānumānasyeva prāmāṇyopapattau upāya-satyatvā-'nādaraṇād ity arthaḥ.*

AVS—*jñānopāyasya śrutyācāryāder mithyātvena taduttha-jñānasyā 'mātvam nāsaṁkanīyam, upeyasya kaivalyasya prāptau puruṣasya kṛtārthatvād upāyanveṣaṇābhāvād iti.*

[896]

ऐकात्म्यप्रतिपत्तेः प्राङ् मिथ्या हेत्वभावतः ।

पुरुषार्थावसायित्वान्नाप्यूर्ध्वमनपेक्षतः ॥ ८९६ ॥

Before the realization of the oneness of self, the means is not illusory, because there is no *probans*; nor after, because it is not required, as the human goal has been reached.

Before the fruit of release comes about, the means which is Scripture is not known to be illusory. After the goal has been gained, although the means is known to be illusory, there is no destruction of the validity of the knowledge gained; and as the end which is release has already been reached, there is no further dependence on *pramāṇa*.

AVS—vākyārthajñānodayāt prāk upāyo na mithyā nopāyasya mithyātva-jñānam ity arthaḥ. gamakābhāvat bādhapūrvakatvāt tasya. yadyapy uttarakālaṁ mithyātvam upāyasya gamyate na tat prāmāṇyaṁ vihani, pramāṇaphalasya prāptatvena pramāṇāpekṣā 'bhāvād iti.

[897]

उपेयबोधनं मुक्त्वा मितेर्नान्याऽस्ति सत्यता ।

सत्यादप्यनुपायत्वाद्घटान्नामिहि गम्यते ॥ ८९७ ॥

For a means of valid knowledge there is no reality other than revealing the object; nor is fire inferred from pot which is not a means, even though it is real.

A means, although illusory, may lead to true knowledge, e. g. a reflection. A means, although real, may not result in knowledge, e. g. a pot cannot serve as *probans* for inferring fire. What is required of a means of valid knowledge is that it generates that knowledge, and not that it must be absolutely real or that it must remain unsublated always.

[898]

धूमाभासात्तु बाष्पादेर्यदग्निर्नावगम्यते ।

हेतुस्तत्त्वानुपायत्वमसत्यत्वं पुनर्न तु ॥ ८९८ ॥

Where fire is not inferred from apparent smoke such as vapour, etc., there the reason is, that (vapour, etc.) being not a means, and not unreality.

As for pseudo-smoke not leading to the valid knowledge of fire, the reason is not that the pseudo-smoke is illusory, but that there is no pervasion between pseudo-smoke and fire. In other words, pseudo-smoke is not the means for inferring fire.

[899]

धूमवत्परमार्थत्वमुपायत्वान्न लभ्यते ।

वेदान्तानां तथैकात्म्यश्रुतिबाधः स्फुटो भवेत् ॥ ८९९ ॥

Th *Vedāntas* do not gain absolute reality, like smoke (in its field), because they are the means; for then clearly there would be the contradiction of the Scriptural text declaring oneness of self.

Nor may it be urged that Scripture must be real because it is the means to the knowledge of the absolutely real, viz. the oneness of self; for if Scripture were real, the declaration that the sole reality is the self would be contradicted.

[900]

बाष्पवन्नापि मिथ्यात्वादनुपायत्वमिष्यते ।

ऐकात्म्याबोधबाधेन सिद्धा तूपायसत्यता ॥ ९०० ॥

Nor can it be said that the *Vedāntas* are not the means, like vapour, because they are illusory; for the reality required for being the means is established by the sublation of the ignorance about the oneness of self.

Nor may it be said that Scripture is not the means to the knowledge of the self even as pseudo-smoke is not the means for inferring fire: for, it is seen that Scripture accomplishes the destruction of ignorance.

[901]

श्रुतेरैकात्म्यसंविन्नौ चरितार्थत्वतो मितेः ।

वृथोपायपरीक्षा स्यादुत्तीर्णस्य प्लवे यथा ॥ ९०१ ॥

When the oneness of self has been realized from Scripture and the means of valid knowledge has fulfilled its aim, an examination of the means would be futile, as it would be for one who has crossed (the river) in regard to the boat.

An example is given to show that after the end has been gained there is no need to worry about what happens to the means.

[902]

बाह्येष्वर्थेष्वनात्मत्वात्पुनः शङ्का भवेदपि ।

अत्राऽऽत्मत्वादुपेयस्य का शङ्का मानतां प्रति ॥ ९०२ ॥

Even though, in the case of the external objects which are not self, doubt may arise again, here because the object attained is self, what doubt can there be in respect of the means of valid knowledge?

In regard to external objects like colour, etc., there may arise doubt about their valid perception, for they constitute the not-self. What is known from Scripture, however, is the self. How can there be doubt in regard to that?

An alternative interpretation of this verse is as follows: The means for cognizing fire, etc., is of the nature of the not-self, and hence is illusory. But Scripture which is the means for realizing the one self is of the nature of the self; and so the doubt that it may be invalid

or illusory cannot arise. Scripture is the absolute reality. It is only by an assumed difference that it is spoken of as means.

NKL—ātmā mithyā kalpita-janya viṣayatvāt svapnadr̥ṣṭārthavad atrāha—bāhyeṣv iti—jādatvam upādhir ity arthaḥ.

[903]

अन्यत्रेव न चाप्यत्र वाक्यार्थो भेदलक्षणः ।

संसर्गलक्षणो वाऽपि ब्रह्मात्माभेदतो भवेत् ॥ ९०३ ॥

Unlike elsewhere, here the sentence-sense is not characterized by difference, nor by relation, because Brahman and self are non-different.

For the sentence 'Bring the cow' the sense is the difference in relation between the act and the agent. For the expression 'The blue lily' the sense is relation between two things expressed by words in apposition. Not thus is the case with the text 'That thou art,' which has an impartite sense.

NTV—bhedo viśiṣṭa-saṁsargi-saṁsarga eva vākyārtha iti naiva vedānte niyamah brahmātmanor abhedād ity arthaḥ.

[904]

ब्रह्मणोऽनात्मतारूपमब्रह्मत्वं तथाऽऽत्मनः ।

अज्ञानलक्षणं शास्त्राज्ज्ञानं हन्ति समुत्पतत ॥ ९०४ ॥

The non-self-hood of Brahman and the non-Brahmanhood of self are of the nature of ignorance; the knowledge arising from Scripture destroys that.

Objection: Brahman and the self are not non-different, because they are opposed to each other, like cold and heat.

Reply: No; there is no opposition that is validly known. The so-called difference is the work of nescience.

*NKL—vimatam ajñānakṛtaṁ jñānena samūlaṁ nivarttyamānatvād
rajju-bhujaṅgavat.*

[905]

नेहान्यत्राऽऽत्मनो ब्रह्म तथाऽऽत्मा ब्रह्मणोऽन्यतः ।

तादात्म्यमनयोस्तस्मान्नीलोत्पलविलक्षणम् ॥ ९०५ ॥

Here (in Scripture) Brahman is not other than the self, and so also the self is not other than Brahman. The identity of the two, therefore, is different from that between lotus and blue.

Brahman and the self are not related like 'blue' and 'lily'. If the self be other than Brahman, then like pot it would be non-Brahman; if Brahman be other than the self, then it would be not-self. Since these contingencies are not acceptable, it must be admitted that there is oneness (*ekarasyam*) of Brahman and the self, and not identity-in-difference (*tādātmya*) between them.

[906]

अब्रह्मानात्मते यद्वदत्राज्ञाननिबन्धने ।

आत्मताब्रह्मते नैवमन्यस्मादित्यतः स्वतः ॥ ९०६ ॥

As non-Brahman-hood and non-self-hood are conditioned by ignorance, not so are selfhood and Brahman-hood conditioned by that (ignorance); they are self-established.

The self-hood of Brahman and the Brahman-hood of the self are of the nature of the real; they are not the products of nescience.

NTV — jīva-brahmaṇoḥ pramāṇāntarāgocarātvena tad bhedasyāpi pramāṇāntarāviśayatvāt bhedasye 'taretarāśrayādi-doṣa-duṣṭatvāt tasyaiva kalpitatvaṁ nābhedasye 'ty arthaḥ.

[907]

नान्तोरेवं च संबन्ध ऐकात्म्यात्स्यात्क्रियां विना ।

षष्ठीं च न क्रियाषष्ठ्योर्विना भेदात्प्रवर्तनम् ॥ ९०७ ॥

Thus the relation between the two nouns is even without activity or the sixth case, because of the oneness of self; where there is no difference, activity and the sixth case cannot function.

The two nouns are not related as agent and act, substance and attribute or possessor and possession. There is not even a trace of difference. The two nouns signify the same reality; and the signification is by secondary implication (*lakṣaṇā*).

[908]

महत्ता यद्वृद्धाकाशे घटाकाशव्यपेक्षया ।

पराक्त्वापेक्षया तद्वत्प्रत्यक्ता नाऽऽत्मनीक्ष्यते ॥ ९०८ ॥

As greatness is in the ether in relation to the pot-ether, so is not inwardness admitted in the self in relation to outwardness.

Objection: Although there may not be difference between the inner self and Brahman, difference must be admitted as between the inner self and not-self. That would mean that being inner will be conditioned by what is outer. That would mean again that there is not impartiteness.

Reply: No: when a distinction is made in ether between pot-ether and great ether, there is conditioning. Not so is the case with the inner self. Here 'inner' does not mean 'what is not outer'; it means 'what is real', 'what is natural', 'what is not adventitious.'

[909]

प्रत्यक्त्वमद्वितीयत्वं बोधवन्नान्यबन्धनम् ।

अपाराध्यान्न बोधो हि स्यादबोधनिरासतः ॥ ९०९ ॥

Inwardness and non-duality, like knowledge, are not dependent on others (their opposites); knowledge which is not for the sake of another, is not the result of negating what is inert.

When it is said that Brahman-self is non-dual, no dependence on duality is meant, even as when it is said 'Brahman is consciousness' the exclusion of the non-conscious is not meant. 'Non-dual' means 'full'.

[910]

आत्माऽपि सदिदं ब्रह्म मोहात्पारोक्ष्यदूषितम् ।

ब्रह्मापि संस्तथैवाऽऽत्मा सद्वितीयतयेक्ष्यते ॥ ९१० ॥

This Brahman, though the self, is through delusion affected by the defect of mediacy; likewise the self, though Brahman, is looked upon as having a second.

How the Vedānta texts teach the impartite non-dual Brahman-self is shown here.

[911]

आत्मा ब्रह्मेति पारोक्ष्यसद्वितीयत्वबाधनात् ।

पुमर्थे निष्ठितं शास्त्रमिति सिद्धं समीहितम् ॥ ९११ ॥

Through the sublation of mediacy and duality, Scripture teaches that the self is Brahman and thus culminates in the human goal. Thus the desired end has been achieved.

By cancelling the mediacy of Brahman through apposition with the self, and the finitude of the self through apposition with Brahman, the Scriptural text culminates in teaching oneness which is the supreme bliss. Thus through the knowledge of oneness resulting from the text there is release.

[912]

ननु भेदाश्रितैर्वाक्यैर्विधायकनिषेधकैः ।

अक्षादिभिश्च नैकात्म्यं बाधितत्वात्प्रमाणवत् ॥ ९१२ ॥

“Now, oneness of self is not valid, because it is sublated by prescriptive and prohibitory texts which are based on difference and by perception, etc.

The *pūrvapakṣin* objects: The texts of the *karma-kāṇḍa* consisting of prescriptions and prohibitions as also empirical means of knowledge like perception are opposed to oneness. How, then, can the Vedānta texts validly teach non-difference?

[913]

न चाप्यैकात्म्यशास्त्रस्य तैर्विकल्पसमुच्चयौ ।

प्रामाण्येनापि बाध्यत्वं तेषां तेन कथंचन ॥ ९१३ ॥

“Nor is the teaching of oneness of self valid as an alternative to or in combination with them; nor even are they sublated by it in any manner.

The oneness that, you say, is taught by Vedānta cannot be taken as an alternative to the plurality revealed by the aforementioned evidence; nor may it be construed in combination therewith. Nor may it be held that the evidence of the *karma-kāṇḍa*, perception, etc., is sublated by the teaching of Vedānta.

[914]

विरुद्धमानभावेऽपि न हि वस्तु विकल्प्यते ।

भेदाभेदौ न च स्यातां विरोधाद्युपपत्कचित् ॥ ९१४ ॥

“Though they are opposed as means of valid knowledge, the real cannot have an alternative nature; difference and non-difference can nowhere exist together, because of contradiction.

Although Vedānta and the other *pramāṇas* may be regarded as alternative means of knowledge, a similar attitude is not possible in regard to the nature of reality. The real cannot be alternately one and many; nor can it be both one and many.

[915]

भिन्नाभिन्नं न वो वस्तु येन मानाविरोधिता ।

नेह नानेति भेदानां निषेधात्क नु भेदधीः ॥ ९१५ ॥

“For you the real is not different-cum-non-different, in which case there may be no opposition between means of valid knowledge. How can there be cognition of difference, since differences are denied in ‘No plurality here’ ?

Moreover the concept of difference-cum-non-difference is not acceptable to you. The Upaniṣad text ‘There is no plurality whatsoever here’ negatives plurality. The real, therefore, cannot be both

one and many. The other *pramāṇas* either imply or make known plurality. How can you accept them as equally valid means of knowledge?

[916]

वर्णादिग्रहणापायो नापीहाक्षादि बाध्यते ।

संस्काराय च यच्छास्त्रमात्मज्ञानोपकारकम् ॥ ९१६ ॥

“Nor are perception, etc., which are the means for cognizing letters, etc., sublated here (by Vedānta texts); nor Scripture (*karma-kāṇḍa*) which (according to you) is for purification and which helps self-knowledge.

Nor can you say that the evidence of the other *pramāṇas* is sublated by the Vedānta texts. Perception, etc., are necessary for cognizing letters, words, etc., of which the Vedānta texts are composed. The *karma-kāṇḍa*, according to you, is helpful in that it purifies and thus makes one eligible for self-knowledge.

[917]

उपचारार्थतः शास्त्रं सावकाशं जपेऽथवा ।

अक्षादेरकृतार्थत्वात्कथं स्यात्तेन बाधनम् ॥ ९१७ ॥

“Therefore Vedānta-śāstra has the sense of eulogy, or it has the purpose of repetition; perception, etc., do not have their aim fulfilled (except through teaching difference); how can they be sublated by that?”

What, then, is the fate of the Vedānta texts? Just as when we say ‘The headman of the village is without a second’, the phrase ‘without a second’ carries a figurative sense, the Vedāntic declaration of non-duality must be understood as a figure of speech. Or, meditation may be the purport of the Vedānta texts.

Without duality the other *pramāṇas* would have no place at all. How, then, could they be sublated by the Vedānta texts?

[918]

उच्यते लोकतः सिद्धं भेदमाश्रित्य चोदना ।

प्रवृत्ता पुरुषार्थाय न तु भेदावबुद्धये ॥ ९१८ ॥

This is the reply: Basing itself on the empirically established difference, the (Vedic) command functions for the sake of the human goal, and not for teaching difference.

The *siddhāntin's* reply: There is no opposition of the *karma-kāṇḍa* to what the Vedānta teaches; for it is not the aim of the *karma-kāṇḍa* to establish plurality. Basing itself on the empirical difference of agent, etc., it merely shows man the way to prosperity. So, its purport is not to teach difference or plurality.

AVS—yadi karmasāstraṁ bhedanīṣṭhaṁ tadā karmasāstra-virodhaḥ syāt, na tathā, lokasiddhabhedāṅgīkaraṇena puruṣārthāya pravṛttatvāt, iti.

[919]

भेदस्य चापुमर्थत्वात्तादर्थ्ये स्यादमानता ।

पुमर्थत्वेन चास्येष्टं प्रामाण्यं वेदवादिभिः ॥ ९१९ ॥

Because difference is not a human goal, if Scripture had that for purport, it would not be valid; and by those who follow the Veda, the validity of the Veda is accepted for the sake of the human goal.

For this reason also difference cannot be the purport of the Veda: difference is not a human end, and Scripture declares that difference is the cause of fear. Therefore, if the *karma-kāṇḍa* had difference for purport, it would cease to be valid.

[920]

वस्तुस्वरूपसंस्पर्शिचक्षुरादिभ्य उत्थितम् ।

भेदस्पृङ्नाक्षजाद्येवं न तेनैकात्म्यबाधनम् ॥ ९२० ॥

From the sense of sight, etc., which are in contact with the form of the thing, knowledge is generated; no idea of difference arises from perception; so by that there is no sublation of oneness of self.

Perception, etc., should not be taken as evidence against the teaching of the Upaniṣads. Does perception, for instance, reveal the identity of an object, or the exclusion from other objects, or both? If it be the first, then difference cannot be its content, and therefore it cannot sublate the Vedānta which reveals the absolute reality.

NTV—pramāṇasya vastubodhakatva-niyamān na bhedaspr̥h̥ mānam.

[921]

प्रमेयविषयं मानं वस्तुनश्च प्रमेयता ।

न च भेदस्य वस्तुत्वं वस्तुतत्त्वानपेक्षणात् ॥ ९२१ ॥

Means of valid knowledge has for its content the object of knowledge; and reality is the object of knowledge; difference is not reality, because the nature of reality is not to be dependent.

The second alternative is not possible. Perception has for its content an object. Difference or exclusion cannot be a content because it is not an object. It is dependent and illusory like the rope-snake.

[922]

लब्धे हि भूतलेऽलब्धो घटस्तत्र निषिध्यते ।

मानान्तरेण विज्ञातो नाज्ञातः शून्यतासितः ॥ ९२२ ॥

When the floor is cognized, the pot which is not cognized is denied there; that (viz. the pot) which is known by some other means of knowledge cannot be unknown, for otherwise there would be nullity.

It cannot be maintained that exclusion or denial is the content of perception. When the locus like floor is perceived, there is the exclusion or denial of the counter-correlate such as pot. Here, what is perceived, viz. floor, is not denied; for that would be to go against the evidence. Nor is what is unknown the content; for all that is unknown should then become the content, not pot alone.

NKL — pratipanne vastuni pratipannasya vastuno nedam idam nehedam iti vā niṣedhaḥ, anyathā nety eva niṣedhe sarva-niṣedha-prasaṅgāt.

[923]

व्यञ्जकस्य समायोगो वस्तुनो वस्तुनैव हि ।

नाभावेन निरात्मत्वाद्द्वयावृत्त्या वा मितेर्भवेत् ॥ ९२३ ॥

Of what is a manifestor (perception, etc.) there can be contact only with a thing, and not with no-thing; nor can there be contact of perception, with difference, for it (difference) is not an entity.

What does exclusion or denial mean? Does it mean non-existence (*abhāva*)? Or does it signify difference (*bheda*)? It cannot be the first; for perception is an existent, and cannot be related to the non-

existent. The latter is void of nature and cannot serve as the basis of any relation. The second meaning too is not possible; for difference too is a non-entity, and to that perception cannot be related.

NKL—pradīpāder ghaṭādisaṃyogo na śaśa-sṛṅgādīnā, iti dr̥ṣṭatvāt.

[924]

नातो वस्तुनि संभेदो वस्तुनोऽभेदरूपतः ।

न प्रमाणाद्विर्वस्तु न मानं वस्तुनो बहिः ॥ ९२४ ॥

Therefore, there is no difference in the real (self), for the real is of the nature of non-difference. The real is not outside the means of knowledge, nor is the means of knowledge outside the real.

Non-difference is the very nature of the real. Non-existence and difference cannot touch it. Even the difference of *pramāṇa* and object is apparent, and not real.

NKL—pramāṇa-prameya-bhedo vyāvahārika ity arthaḥ.

[925]

नाभावयोर्मिथो योगोऽवस्तुत्वाभेदतस्तयोः ।

अभावभावयोस्तद्वद्भाव रूपेषु का भिदो ॥ ९२५ ॥

Not between two non-existences is there relation (here, difference), for as non-entities they are non-different; nor likewise between non-existence and existence; between existents what difference is there?

Difference is unintelligible. What is the nature of the correlate and counter-correlate of difference? Are these two non-existents, existent and non-existent, or existents? They cannot

be non-existents; for there can be no relation in that case. Nor is relation possible between the existent and non-existent; for the latter cannot serve as the basis of relation. As between existents there can be no difference; for there is nothing that makes for the difference. 'Existence' cannot be the differentiating condition; for that is present in the counter-correlate also. Nor can 'non-existence' be the condition, because that is non-entity, and the counter-correlate would then become nothing.

[926]

अनित्यत्वस्य धर्मस्य घटादेर्धर्मिणस्तयोः ।

संयोगः समवायो वा तादात्म्यं वेह संगतिः ॥ ९२६ ॥

Between the attribute of non-eternality and the substances like pot, etc., the relation must be either conjunction (*samyoga*) or inherence (*samavāya*) or identity (*tādātmya*).

By denying difference non-existence has been denied. Now, by denying non-existence difference is being denied. Here, 'non-eternality' (*anityatva*) means non-existence. As between existence and non-existence, is there relation or not? If there is no relation, then existence would be without beginning and end, and non-existence would be independent. If there be relation, then that relation should be either conjunction, or inherence, or identity.

[927]

आधाराधेययोगेषु घटोऽवेति यथा मतिः ।

नाभावभावयोगेषु मितेर्धीः कस्यचित्तथा ॥ ९२७ ॥

Just as there is knowledge of the form 'Here is the pot' in regard to what are related as support and support-

ted, there is no such knowledge for any one in regard to non-existence and existence.

None of the three relations mentioned is possible as between existence and non-existence.

AVS—sarvathā 'bhāvasya bhāva-sāmbandho na ghaṭate, tataś cā 'meyatvam abhāvasya.

According to *AVS*, the impossibility of inherence (*samavāya*) is shown here.

[928]

नहि भावातिरेकेण भावाभावः प्रमाणभाक् ।

भावात्मनाऽप्यतो भावो व्यवहाराय कल्पते ॥ ९२८ ॥

Mere absence of existence cannot brook means of valid knowledge either as being other than existence or as being identical with existence; hence existence alone is fit for empirical usage.

Is non-existence different from existence, or non-different? If the first, there should be another non-existence, and then another, and so on *ad infinitum*. If the second, there would be non-difference whether non-existence be included in existence or *vice versa*.

[929]

अथाभावोऽपि वस्त्वेव नास्तीति मितिजन्मतः ।

द्वयोर्भावैकरूपत्वात्काऽतिशीतिर्मितेस्तयोः ॥ ९२९ ॥

If it be said that non-existence too is a real because, of the rise of cognition 'is not', then because the two

have the same nature as existence, what is the difference between the two cognitions?

If non-existence, like existence, be real, then what is the difference between the two? The two would be one, and no difference could validly be established between existence and non-existence. If they are not two, there can be no relation between them.

[930]

विश्वं सदेव यस्येष्टं तस्याभावः कुतो मितेः ।

न च भावातिरेकेण भाववत्सिद्धिमश्नुते ॥ ९३० ॥

He to whom the universe is existent, for him, how can there be valid cognition of non-existence? Nor can it be established, even as existence (cannot be established), as something other than existence.

Moreover, is non-existence real or unreal? If real, then as all is real there can be no non-existence and no relation thereof with existence. If non-existence is unreal, then since nothing is there to be distinguished non-existence is not established and much less any relation.

[931]

अभावयोगं भावश्चेत्सहते नीलयोगवत् ।

अविरोधादभावेन न भावपहुतिर्भवेत् ॥ ९३१ ॥

If existence admits of relation with non-existence as (lotus) with blue, then because of non-opposition to non-existence, there cannot be suppression of existence.

Just as there is the relation of inherence between lily and blue, if there be relation between existence and non-existence, then, since

there would be no opposition between the two, existence would not be cancelled by non-existence, and existence would be without beginning and end.

[932]

योगोऽयं वस्तुनोर्दृष्टः पृथक्सिद्धौ परस्परम् ।

मेषयोर्मल्लयोर्यद्वन्न भावाभावयोस्तथा ॥ ९३२ ॥

Relation is seen between things that are established separately, independent of each other as between two goats or wrestlers; and not so between existence and non-existence.

That there can be no relation between existence and non-existence is explained by means of examples.

According to *AVS*, the relation that is shown to be impossible here is conjunction (*saṃyoga*).

[933]

न योगोऽभावयोर्दृष्टो वन्ध्यासूनुखपुष्पयोः ।

न भावाभावयोरेवं विरोधादितरेतरम् ॥ ९३३ ॥

No relation is seen between two non-existences, e. g. between the barren woman's son and sky-flower; nor between existence and non-existence because each is opposed to the other.

There can be no relation between two non-existences. So also there can be no relation between existence and non-existence. The reason is that the two are opposed to each other.

NKL—*abhāvo na saṃyoga-samavāyayor anyatarādharah, abhāvatvāt, vandhyāputravat.*

[934]

क्षितिदेशे घटाभावो घटवन्न प्रमीयते ।

योगो वा समवायो वा नाभावक्षितिदेशयोः ॥ ९३४ ॥

In the region of the floor the non-existence of pot is not validly seen, like the pot. Neither conjunction nor inherence is there between non-existence and floor-space.

The pot that is on the floor can be visually perceived because there could be conjunction of the sense of sight with pot. But the non-existence of pot cannot be so perceived because no such relation is possible between sight and non-existence, and between the floor and non-existence.

[935-936a]

सदात्मतैवं सर्वस्य नाभावात्मकता सतः ।

अप्यभावात्मकत्वेऽपि सतोऽभावात्मकत्वतः ॥ ९३५ ॥

कुतो भेदावकाशः स्याद्भेदेऽसति कुतो युतिः ।

(If non-existence is included in existence) then all would be of the nature of reality. Nor can reality be of the nature of non-existence. Even if it be of the nature of non-existence, then because reality is of the nature of non-existence, where is room for difference? And if difference is unreal, how can there be relation?

Supposing there is identity between existence and non-existence, is non-existence to be included in existence, or is existence to be included in non-existence? If the first be the case, there would be only non-dual existence. The second alternative is not possible because

existence is opposed to non-existence. Even if this difficulty be waived, one would have to say that non-existence alone is. If this be so, there is no difference between existence and non-existence, and consequently no relation.

AVS says that the relation of identity (*tādātmya*) is rejected here.

[936b-937a]

यावत्किञ्चिज्जगत्यस्मिन्भेदकं वस्तु लक्ष्यते ॥ ९३६ ॥

अनापन्नादिमध्यान्तं सदेव तदितीष्यते ।

Whatever differentiating thing is found here in this world, all that is to be regarded only as the real without a beginning, middle and end.

Anything that is to be regarded as the condition of difference must be existence. But existence, we have shown, is without beginning, middle and end. So, how can difference be established?

[937b-938a]

सदेवेदमिति स्पष्टं सन्मूला इति चापरम् ॥ ९३७ ॥

श्रुत्योदाहारि नः साक्षात्सदैकात्म्यावबुद्ध्यते ।

To us in the matter of knowing directly the oneness of reality, Scripture is evidence which declares 'This is reality alone'¹ and again '(All have their) root in the real.'²

Scripture is quoted to show that all is existence alone. The first of these texts teaches the non-duality of existence directly, and the second by implication.

1. *CHU*, VI, ii, 1.

2. *CHU*, VI, viii, 4.

[938b-939a]

मानाभावस्य मानत्वं मेयाभावस्य मेयता ॥ ९३८ ॥

न्यायं न सहतेऽतीव यथा तदधुनोच्यते ।

Now will be explained how it is absolutely illogical to say that the absence of means of valid knowledge is a means of valid knowledge and the absence of object is an object.

The *siddhāntin* now turns to an examination of another *prima facie* view.

According to *NKL* the *prima facie* view here is that of the *Bhāṭṭas*.

[939b-940a]

बोधकं यदबुद्धस्य तन्मानमिति हि स्थितिः ॥ ९३९ ॥

न च प्रमाणतास्तित्वमीदृक्तस्मान्न युज्यते ।

That which makes known what has not been known is a means of valid knowledge. This is the position. Such nature of being a means of valid knowledge is not there (for absence of *pramāṇa*). So that is not proper (*pramāṇa*).

The absence of *pramāṇa* does not have the characteristic of *pramāṇa*. The characteristic of *pramāṇa* is to make known what is unknown.

[940b-941a]

मेयाभावः प्रमाणानां यद्यभावेन गम्यते ॥ ९४० ॥

प्रमाणानामभावस्य गमकः को भविष्यति ।

If the absence of object is cognized by the absence of means of valid knowledge, what is that which makes known the absence of means of valid knowledge ?

If the absence of *pramāṇa* should make known the absence of object, it must be as itself known. But what is it that makes known the absence of *pramāṇa*?

[941b-942a]

नाक्षादिपञ्चकं तस्य बोधकं सत्समन्वयात् ॥ ९४१ ॥

नयतस्तदभावो वा मेयत्वेनैव तत्स्थितेः ।

The five means of valid knowledge beginning with perception do not make it known ; for they are related to reality ; nor is their absence (the revealer) through reasoning (inference) for that itself stands as an object to be known (or proved).

Neither the five *pramāṇas*, perception, etc., nor their absence can make known the absence of *pramāṇa*. Perception, etc., can be related to only what exists. The absence of *pramāṇa* cannot become its own object.

[942b-943a]

नीलादिवदभावस्य यद्यक्षादिविशेषणम् ॥ ९४२ ॥

विशेषणेन तद्व्याप्तेस्तदभावः कुतो मितेः ।

As blue, etc., (are attributes of lily), if perception, etc., be the attributes of non-existence, then, since as attributes they qualify that, how can the absence thereof be validly known ?

Does non-existence have attributes or not? On the first alternative, does non-existence have means of valid knowledge or object of knowledge as its attribute?

If non-existence has *pramāṇa* as its attribute, even as lily has the attribute, blue, then non-existence cannot become the object of *pramāṇa*, perception, etc. The qualified does not become the object of its own quality.

[943b-944a]

अथाविशेषणोऽभावो भवद्विरभिधीयते ॥ ९४३ ॥

मेयाभावस्य मानत्वमविशेषात्प्रसज्यते ।

If it is stated by you that non-existence is without attribute, then, there is the contingency of the non-existence of object being a means of valid knowledge, because there is no distinction.

If it be held that non-existence is attributeless, then it cannot be stated that absence of *pramāṇa* is a *pramāṇa* and absence of object is an object; for absence or non-existence cannot be qualified that way. If non-existence is without qualification, how can such a distinction be made?

[944b-945a]

घटाद्यभाव इत्युक्तिर्न सम्यगिति मे मतिः ॥ ९४४ ॥

पदानामसमर्थत्वाद्विरोधाद्वस्तुनोर्मिथः ।

My view is that it is not proper to say 'The non-existence of pot', etc., because the words are not capable of being combined that way, as the things are mutually opposed.

As for the other possibility mentioned in v. 942b-943a, viz. that non-existence has the object as its attribute, our view is that it has no sense at all. The expression 'non-existence of pot', for instance, has no meaning if 'pot' be regarded as a qualification of 'non-existence'. How can existence and non-existence be combined in any manner? As they are opposed to each other, no relation is possible between them.

[945b-946a]

भावाभावाख्यपदयोः सामर्थ्ये चेत्समासता ॥ ९४५ ॥

घटादिनाऽनपेक्षत्वान्न समासः प्रसिध्यति ।

If two words expressing existence and non-existence could be combined provided they have capacity, then since pot, etc., are not expectant (of non-existence), the compound does not result.

If it be said that, although there is opposition between existence and non-existence, there may be combination of the words expressive thereof, even as in the case of the words 'darkness' and 'light', we reply: It is true that words such as 'pot' are expectant of other words to complete their meaning. Not so is the case with the words 'existence' and 'non-existence'. The words] 'darkness' and 'light' also are in a similar plight, and cannot therefore serve as examples.

NTV—samarthaḥ padavidhir iti smaraṇāt samarthānām eva samāso iṣyate. sāmārthyam ca sahaikārthībhāvaḥ, samāse ekārthībhāvo 'pi ākāṅkṣāyogyatā-sannidhibhiḥ sambandhe, nacātra yogyatā 'sti virodhād ity arthaḥ. kiṁca ākāṅkṣā 'pi nāsti.

[946b-947a]

भावस्याभाव इत्यत्र षष्ठ्यर्थः कतमो मतः ॥ ९४६ ॥

न कश्चिदपि संबन्धो नीरूपस्यासदात्मनः ।

In 'the non-existence of existence' what is the sense of the sixth case? No relation whatever is possible of the colourless non-entity!

The phrase 'non-existence of existence' has no meaning. There can be no relation whatever with the void.

AVS—na samyogo niravayavatvād abhāvasya, nāpi samavāya-tādātmye avastutvād abhāvasya, ata eva na sva-svāmi-sambandha iti.

[947b-948a]

वस्त्वन्तरमभावश्चेदन्यदन्यद्वेत्कथम् ॥ ९४७ ॥

अन्योऽपि चेद्वेदन्योऽविरोधो नीलवद्वेत् ।

If non-existence is another reality, how can one thing become another? If one thing can become another, then there would be no opposition as in the case of blue.

If it be contended that non-existence is not void but another existence, in reply we ask: why then call it non-existence? And, look at the consequences of your contention! Just as when it is said 'Pot exists' 'pot' and 'existence' are taken to be one, when it is said 'Pot does not exist' 'pot' and 'non-existence' must be regarded as identical. If 'non-existence of pot' means 'cloth', then it would amount to saying 'Pot is cloth', which is absurd. Or, if the non-existence as qualified by pot is cloth, even then it should be admitted that the qualification 'pot' is included in 'cloth'. In that case the expression 'Pot is cloth' should be as meaningful as 'Lily is blue'.

NKL—bhāvāntarābhāvapadayor aparyāyatvāt aikārthyam ayuktam ity āha—anyad iti. ghaṭābhāvaḥ paṭād anyah, paṭopi ghaṭābhāvāt, taylor abhedo na yukta ity arthaḥ. bhāvāntarābhāvau nābhinnāv aparyāya-sabda-vācyaṭvāt ghaṭapaṭavad ity uktam. vipakṣe bādhakam āha—anyopīti. nīlavād avirodho nīlakāmbalayor iva bhāvābhāvayos tādātmyam syād ity arthaḥ.

[948b-949a]

संगतावविरोधी चेन्न संबन्धिनिवृत्तिकृत् ॥ ९४८ ॥

न संबन्धिग्रहाभावे संबन्धोऽयं प्रसिध्यति ।

If non-existence is said to be not opposed to some relation or other (though identity is impossible), then it cannot remove that with which it is related. If that with which it is related is not cognized, this relation will not be established.

If it be said that although there is no identity (*tādātmya*) between existence and non-existence, it is possible that there is some other relation, we reply: no. That no relation whatever is possible has already been shown. Moreover, does non-existence remove that with which it is related or does it not remove? If it does not remove, then there can be no opposition between non-existence and existence. If it does remove, then it must be opposed to the relation also. Further, does non-existence have a counter-correlate or not? On the first alternative, is the counter-correlate real or unreal? If the counter-correlate be real, then there is opposition between non-existence and its counter-correlate, in which case there can be no relation at all. If the counter-correlate be unreal, then since that is not cognized, how can there be relation of non-existence therewith?

[949b-950a]

संबन्धिविरहेऽसिद्धौ षष्ठ्यर्थत्वं न सिध्यति ॥ ९४९ ॥

विरोधाद्युपपन्नापि विधानप्रतिषेधनम् ।

Since the relation is not established in the absence of that with which there is to be relation, the sense of the sixth case does not result. Nor can perception affirm and deny at the same time because of contradiction.

On the view that non-existence has no counter-correlate, there is the following defect. If there be nothing with which non-existence is related, then it follows that there is no relation. If there is no relation, there is no sense in the expression 'non-existence of existence'.

In v. 920 three alternatives were set forth: (1) Does perception reveal the identity of an object, (2) does it make known the exclusion from other objects, (3) does it convey both?

If the first of these be the case, it was shown, difference cannot be the content of perception. The second alternative has been discussed so far and shown to be untenable. Now about the third.

The third alternative is that perception both affirms and denies. Here, does perception affirm and deny simultaneously? Or, does it first affirm and then deny? Or, does it first deny and then affirm? Not the first, because affirmation and denial are contradictory processes, and simultaneity is not possible as between them.

[950b-951a]

क्षणिकत्वाद्वियां नापि स्थायिधर्मः क्रमो भवेत् ॥ ९५० ॥

अनीलाभावपृष्ठेन नापि नीलस्य वेदनम् ।

Since cognitions are momentary, there is no sequence with permanent attributes; nor is there cognition of blue except through the basis of the absence of every colour but blue.

The second and third alternatives are rejected here. Cognitions are momentary; one and the same cognition cannot first affirm and

then deny. Nor can there be first denial and then affirmation; for the cognition of blue implies the absence of the other colours, and is not preceded by the denial of those colours.

[951b-952a]

नह्यदृश्यनिषेधः स्याद्घटादेरिव भूतले ॥ ९५१ ॥

नान्याभावविशिष्टत्वं कृत्स्नाभावगतौ भवेत् ।

There can be no negation of the unseen, as of pot, etc., on the ground. Nor can there be qualification by the non-existence of all other things, for that would require the knowledge of the entire existences and non-existences.

The cognition of blue does not arise from the denial of yellow, etc. The denial is possible only of that which can be perceived and is not perceived in a particular place, e. g. a pot on the ground. A similar phenomenon is not possible in regard to the atom, because the atom is imperceptible. So also there cannot be a general denial such as 'not-blue'. And it is not proper to say that through such denial there is the affirmation of blue.

Moreover, is the non-existence of non-blue (i.e. yellow, etc.) a qualification of blue or its nature? Not the first; if the qualification is the absence of all colours other than blue, then one must cognize the absence of all colours and only then it would be possible for one to cognize blue. This is certainly impossible for the parviscient individual to accomplish.

[952b-953a]

अन्याभावस्य भावत्वे स्यादभावः खपुष्पवत् ॥ ९५२ ॥

भावान्तरमभावश्चेत्सिद्धं वस्तु ततः स्वतः ।

If the non-existence of the other be existence,⁷ then the non-existence would be like sky-flower; if non-existence be another existence, the real would be self-established.

If the non-existence of yellow, etc., be the nature of blue, we ask, is blue, to be included in the non-existence, or is it the other way about? On the first of these alternatives, blue would be void like the sky-lotus. On the second alternative too, the non-existence would be void. If non-existence be taken to mean another existence, then, as already shown, difference and non-existence would not be established, and only the self-existent reality would have to be recognized.

NKL—bhedābhāvayor bhāvātirekeṇābhāvād advaitam āyātam.

[953b-954a]

तद्ग्राहीणि च मानानि व्यावृत्तिः केन गम्यते ॥ ९५३ ॥
चित्तेऽपि विषये चित्रमेकं वस्त्वेकमानतः ।

The means of valid knowledge reveal that (reality); by what is exclusion revealed? Even a multi-coloured object is a single object, since it is revealed by a single means of knowledge.

Exclusion, whether it be difference or non-existence, is not made known through any *pramāṇa*. Therefore, it must be admitted that the *pramāṇas* reveal the real which is untouched by difference and non-existence. Even if the real be varied or complex in nature, it is that real which is the content of *pramāṇa*, not difference or non-existence.

NKL—mānāni vastumātra-prakāśāni ato vyāvṛttir bhedābhāvaś ca na kenāpi gamyata ity arthaḥ.

[954b-955a]

प्रत्येकं नीलपीतादिग्रहणे चित्ता कुतः ॥ ९५४ ॥

वस्तुनो भेदरूपत्वे वस्त्वभावः प्रसज्यते ।

If blue, yellow, etc., are cognized each separately, how can there be multi-colour? If the real be of the nature of difference, there is the contingency of the non-existence of reality.

How can a multi-coloured object, for instance, be one reality? If thus it be objected, we reply: what are the many colours of the object? Are the colours severally cognized? Then, there is nothing like a multi-coloured object that is cognized. If the complex of colours is what is cognized, then it would be difficult to say whether there is difference or non-difference as between the various colours, blue, yellow, etc. Hence, as the so-called variety is not an entity, any exclusion that may be included in it would also be a void.

Exclusion cannot be regarded as the nature of blue, etc. The defect in so regarding we have already pointed out. Whether reality be included in difference or difference be included in reality, there would be defect.

[955b-956a]

अन्यधर्मे त्वभिन्नं स्यात्स्वतो वस्तु प्रमाश्रयम् ॥ ९५५ ॥

भिन्नाभिन्नं विरुद्धत्वान्नैकमानस्य गोचरः ।

If difference (*bheda*) be the attribute of the other (the unreal), then the real would be non-different, and it would be of itself the content of a means of knowledge. It cannot be both different and non-different, for, because of contradiction, it would not be the sphere of a single means of knowledge.

Now, it may be urged that difference is an attribute. If that be so, we ask, is difference an attribute of the real or of the unreal? It cannot be the first; for if the attribute too is a real entity, there would not result difference between the alleged relata, and if the attribute is a non-entity, there would be the non-duality of reality. If the second alternative, viz. that difference is an attribute of the unreal be sponsored, then the real remains untouched and its validity would have to be admitted.

The view that the real is both different and non-different is unacceptable because it involves a contradiction.

[956b-957]

वस्त्वात्मनाऽविरोधश्चेद्वस्त्वेव विषयस्ततः ॥ ९५६ ॥

सत्यं वस्तु कथं भिन्द्यात्पुंव्यपेक्षाविनिर्मितः ।

भेदः पुत्रादिभौवे तु जन्यत्वं वस्तुकल्पितम् ॥ ९५७ ॥

If it be said that difference and non-difference are not contradictory since they are of the nature of reality, then reality alone is the content; how can there be difference in the true reality—difference which is produced by human desires? In the matter of difference as son, etc., the nature of being generated is posited in an entity.

If it be said that difference and non-difference are not opposed to each other as they are of the nature of the real, then it is only in that form as not opposed that they would become the content of knowledge.

Moreover, since difference is dependent it cannot be real; it is illusory like the rope-snake. The difference of son, etc., too is not real. It is with reference to bodies that we speak of father, son, etc., the former being the generator, the latter the generated, and so on. The bodies, being dependent, are illusory.

NTV—ayam arthaḥ nāpekṣā nāma kascid vastu-dharmaḥ yena vastūni vyavasthāpyeran tasmāt puṁvyapekṣāvinirmita eva bhedo na vastu-svarūpaṁ bhidyād iti.

[958]

दाहपाकप्रकाशादिभेदेऽप्यग्नेरभिन्नता ।

कार्यतोऽपि न भेदः स्याद्वस्त्वभेदव्यवस्थितेः ॥ ९५८ ॥

Even though burning, cooking, shining, etc., are different, the fire is non-different; there is no difference even due to the effects, for the non-difference of the substance (fire) remains.

Inference and postulation may be adduced as evidence for difference. Inference: What is in dispute is different, since it gives rise to different effects, like clay. Postulation: The difference in effects is unintelligible without the difference in cause; so the difference in cause has to be postulated.

Reply: The reason given in the inference is inconstant. The postulation is not necessary because another explanation is possible. Although fire is one, different effects thereof are observed. So also, even though the effects constituting the world are different, the cause may be non-different.

AVS—dāha-pāka-prukāśa-kāryāṇāṁ bhede 'py agneḥ kāraṇasyā 'bheda-darśanād evaṁ jagad-bhede 'pi na tat-kāraṇa-bhedaḥ. ato nānumānam.

[959]

विभिन्नकार्यकर्त्रीणां शक्तीनां यद्वदाश्रयः ।

न विरुद्धोऽगिरेकोऽपि तद्वत्कार्येऽपि किं न ते ॥ ९५९ ॥

There is no contradiction in a single fire being the locus of capacities which produce different effects; even so why should it not be for you (a single cause) in the case of the effect?

Objection: Fire gives rise to different effects through different capacities. The capacities which are the causes are, therefore, different; and there is no non-difference of cause.

Reply: Fire must be admitted to be the cause of the capacities. It is one, although its effects, the capacities, are different.

[960]

घटाभावे घटः सिध्येत्पटाभावे पटस्तथा ।

अन्योन्याभावदृष्टेः स्यादन्योन्याश्रयता तव ॥ ९६० ॥

If there is non-existence of pot, pot will be established, and if there is non-existence of cloth, cloth will be established; if each is seen to be the non-existence of the other, there would be for you reciprocal dependence.

So far, assuming difference and non-existence in regard to effects, it was argued that these two are not possible in regard to cause. Now, it is shown that even in regard to effect they are not possible.

You look upon pot and cloth, for instance, as each the non-existence of the other. Then, it would be seen that if pot is established cloth is established, and *vice versa*. That would mean the defect of reciprocal dependence. And thus nothing would get established. If difference and non-existence are non-existent, there would be only the non-dual reality.

[961]

प्रत्यक्षत्वं पृथक्त्वस्य गुणत्वाद्यैरपीष्यते ।

तेषामपि गुणे मानं नीलवन्न त्ववस्तुनि ॥ ९६१ ॥

Even for those (Vaiśeṣikas) who hold that separateness (*pr̥thaktva*, i.e., *bheda*) is perceived because it is a quality, the evidence is in respect of a quality, like blue, and not in respect of non-entity (*avastu*).

It has been shown that difference and non-existence are not established in the view of the Mīmāṃsakas. Now is commenced an examination of the Vaiśeṣika position. According to the Vaiśeṣika, separateness (*pr̥thaktva*) which is difference (*bheda*) is a quality which is a real, and is perceived. Even thus perception is *pramāṇa* in respect of what is a real quality like blue, and not in respect of a non-entity which is difference.

[962]

अथ वस्तु पृथक्त्वेन विशिष्टं गम्यते तदा ।

शुक्लो गौरितिवन्मानं वस्तुन्येव न भेदगम् ॥ ९६२ ॥

If it be said that substance is made known as being qualified by separateness, then as in 'The cow is white' the means of knowledge reveals substance alone and not difference.

Objection: Separateness which is difference is not a non-entity since it is a qualification of what is real, like colour.

Reply: On the analogy of colour, if it is maintained that difference is perceived, then difference would be what is inherent in a single substance. Just as in the case of 'The cow is white' it is the

white cow that is perceived, even so in the case of 'The pot is different' it must be the pot that is different that is perceived, and not difference.

AVS—suklo gaur ity etan mānaṁ sukla-vastuny eva yathā, tathā bhinnno ghaṭa ity etad api mānaṁ bhinnavastuny eva na bhede.

[963]

अभेदेनैव वर्तेत पृथक्ता यदि वस्तुषु ।

वस्त्वेव तत्ततोऽन्या चेदपृथग्वस्तु तर्हि ते ॥ ९६३ ॥

If separateness resides in substances as non-different, then that would be a substance; if it is different, then substance would be non-separate for you.

Objection: The cognition 'The cow is white' is evidence for the cow and also for whiteness. Likewise, the cognition 'The pot is different' must be taken as evidence for both pot and difference.

Reply: Is difference which is separateness non-different or different from the thing? If the former, the non-duality of the thing results. If the latter, i.e. if difference is different from the thing, then the thing must be non-different or non-separate.

[964]

भावाभावपृथक्ताऽपि यद्यभिन्ना ततोऽपृथक् ।

भावाभावविभिन्ना चेत्पृथक्ता न परस्परम् ॥ ९६४ ॥

The separateness of existence and non-existence also, if it is non-different, it will not be separate from them; if it is different from existence and non-existence, then the separateness will not be mutual.

Moreover, is there separateness or not as between existence and non-existence? If there is separateness, is that separateness non-different from them or different? If non-different, then there cannot be difference between existence and non-existence, in which case there can be no exclusion at all from anything, and the non-duality of reality would result. If separateness is different from existence and non-existence, then the relation thereof with them is not possible. And, as there would be no mutual difference between existence and non-existence, there would be non-duality. If it be held that there is no separateness as between existence and non-existence, the same contingency would arise.

[965]

अन्यापेक्षं पृथक्त्वं चेत्स्वयं तर्ह्यपृथग्घटः ।

द्विधर्मत्वेऽपि वस्त्वेतदेकं स्यादुत्पलादिवत् ॥ ९६५ ॥

If separateness is dependent on another, pot by itself will be non-separate; if there be both features (separateness and non-separateness), the substance will be only one, like the lily.

Is the separateness of pot conditioned by pot itself or by another? If the former, the pot would turn out to be a void. If the latter, then the pot would itself be non-separate and non-dual; and what is conditioned by another is illusory, like the rope-snake.

If it be said that the pot by nature has the attributes of separateness and non-separateness, we reply that it would be difficult to determine whether the two attributes are different or non-different. In that case, the pot itself would be impartite and one, even as the lily is in spite of having many attributes.

[966]

धर्मबुद्धिप्रभेदेऽपि धर्म्यभेदः सदेष्ट्यते ।

अतो गवादेर्भेदेऽपि सन्मात्रमवसीयते ॥ ९६६ ॥

Though there are different attributes cognized, the non-difference of the substance is always admitted; therefore, though cow, etc., are different, the real *per se* remains.

Although the attributes seem to be different, there is no difference of the substrate. Similarly, cow, etc., may be different—but there is no difference of existence or reality *per se*. So, it is the real *per se* that is the content of knowledge. The non-dual alone is thus validly cognized.

NTV—yathā jalataraṅga-candraviśeṣāṇāṁ bhede 'pi candramātram avyabhicārat paramārtham, evaṁ gavādi-bhedānāṁ vyabhicārāt sanmātram vastv ity arthaḥ, tasmāt sad eva mānagrāhyaṁ netarat.

[967]

गोत्वादिमेयपक्षेऽपि सद्रूपस्यानपायतः ।

वस्त्वेव मेयं गोत्वादि शाबलेयादिवत्स्फुटम् ॥ ९६७ ॥

Even on the view that cowness, etc., are the objects cognized, the cognition of the reality-nature is not denied; therefore reality alone is the object of knowledge, as for cowness, etc., they are like spottedness. This is clear.

Even if it be admitted that cow, etc., are what are cognized, there can be no dispute about the fact that they are cognized as existing or being real. Existence is constant in 'The cow exists', 'The

pot exists', etc. Just as spottedness, etc., are not the meaning of the word 'cow', even so cow, etc., are not the meaning of the terms 'existence' and 'reality'. Cow, etc., vary; existence is constant. Hence the latter alone is validly cognized.

NTV—*gotvādeḥ meyatvāṅgikārepi sadrūpasyāpi meyatvam abhyupagantavyam tasya sarvatrā 'nusandhīyamānatvāt.*

[968]

सद्रूपत्वापरित्यागादवान्तरनिबन्धनाः ।

व्यवहाराः प्रतीयन्ते सत्तत्त्वं तेष्ववस्थितम् ॥ ९६८ ॥

The empirical usages conditioned by intermediate objects are seen to be even without relinquishing the reality-nature; for the reality-principle resides in them.

The empirical usage about things belonging to intermediate classes such as pillar and pitcher does not give up their form as real or existent. Hence in pillar, etc., there is reality. There is no generality other than reality which is the substrate of all assumptive natures; and there is nothing superior thereto wherein it may stand cancelled.

NKL — *kuṣa-palāśādi-viśeṣanimittā vyavahārāḥ saṁ kuṣaḥ saṁ palāśaḥ iti pratīyante tasmāt satvaṁ teṣv avasthitam avyabhicāri sthitam, itare vyabhicāriṇaḥ tatra kalpitā ity arthaḥ.*

[969]

सत्तातोऽपि न भेदः स्याद्द्रव्यत्वादेः कुतोऽन्यतः ।

एकाकारा हि संवित्तिः सद्द्रव्यं सन्गुणस्तथा ॥ ९६९ ॥

There is no difference of substance-ness, etc., from real-ness; from what else can they be different? Consciousness is of one form, as substance *exists*, quality *exists*.

Substance, etc., cannot be different from reality. If they are different, they would become unreal. What is real, viz. pure consciousness, is of one form, as evidenced by the usage, 'Substance is *real*', 'Quality is *real*', etc.

NKL—*sat-sāmānyād bhedābhāvaṃ sādhayati.*

[970]

समवायाच्च संबन्धे नैकरूप्यं विभिन्नयोः ।

तच्चेत्ततो न विश्वासो जातावप्येकबुद्धितः ॥ ९७० ॥

This oneness of form of what are different cannot be due to the relation of inherence; for if that were so, there would be no certainty, as there is the cognition of oneness in the class-nature also.

It cannot be said that the oneness of what are different as substance, quality, etc., is the result of inherence (*samavāya*); for as there would be the doubt whether the cognition of oneness is brought about by inherence or by the oneness of nature, it is not possible to assert that it is because of inherence alone. For instance, in the case of the cognition of oneness in 'Cowness is one', inherence is not the cause, as oneness is not inherent in cowness.

[971]

संसर्गधर्मता नापि भेदेनानुपलम्भनात् ।

समवायेन संबन्धे को हेतुरिति नेष्यते ॥ ९७१ ॥

Nor can there be relationness between reality and cow, etc., for no difference is seen. It is not determined what the cause is that relates inherence with the inherent.

Assuming inherence as between reality on the one hand and cow, etc., on the other, we have argued so far that the cognition of their oneness is not caused by inherence. Now, we proceed to show that the relation of inherence is not possible as between reality and cow, etc. Reality and cow are not seen to be different. So, there cannot be inherence as between them, even as there is no inherence as between the generality 'existence' and cow, etc. Moreover, is inherence independent or dependent? If it is independent of the relata, there is no meaning in using the possessive case 'inherence of'. If it is dependent, then the relation between inherence and the relata should be determined. This relation, however, cannot be either conjunction or inherence, as there is no evidence.

[972]

संयोगश्चेद्वियोगोऽपि समवायेऽनवस्थितिः ।

स्वतश्चेत्कल्पना व्यर्था द्रव्यस्याप्येकता स्वतः ॥ ९७२ ॥

If it is conjunction, there would be disjunction also; if it is inherence, then there would be endless regression; if (the relation of inherence with the relata be) self-established, then the assumption (of inherence) is futile, and the unity of the substance (and reality-nature) would also be of its own accord.

The relation of conjunction is impossible. If there be conjunction between inherence and its relata, there would be disjunction also at sometime hence, which would mean that quality, etc., are independent.

There cannot be inherence between inherence and its relata; for to say that there is would go against the Vaiśeṣika view that there is no inherence between the eternal substances and inherence.

Nor may it be held that the dependence of inherence on its relata is self-established; for in that case the assumption of inherence itself would be futile. Moreover, if the dependence of inherence on its relata be natural, then why should not the cognition of oneness of substance, etc., as existence be natural? If this is natural, then there is no need of inherence.

[973]

सत्तावगुणिताश्चैते सर्वे भावाः सदैव हि ।

व्यवहाराय कल्पन्ते भ्रान्तो भेदः सदैव तु ॥ ९७३ ॥

All these things being always encompassed by reality-nature, are fit for empirical usage; difference is always illusory.

It cannot be maintained that the particulars alone are real; for even to say that would show that it is reality that persists in them. It is as pervaded by reality or existence that the particulars become fit for empirical usage during the time of empirical affairs. In fact, the difference of the particulars is illusory appearance, like the difference in the reflections of the moon.

NKL—sarve viśeṣāḥ sattāvyāptā vyavahārayogyā bhavanti, ataś teṣāṃ bhāsamāno bhedo bhrānta ity arthaḥ.

[974]

येषामपि हि सामान्यभेदवद्वस्तु गृह्यते ।

तेषामपि कुतो भेदो वस्तुवैक्याद्वर्त्यभेदतः ॥ ९७४ ॥

Those who hold that a thing is made of both generality and particularity—for them also how can there be difference, as the thing is one and the qualified thing is non-different?

If it be held that what is called a thing has both generality and particularity, even then difference would not be established. The substrate which is of the nature of generality and particularity is non-different; and it is the real.

[975]

अपि भेदेन या बुद्धिः स्यात्सामान्यविशेषयोः ।

साऽपि तन्मात्रनिष्ठत्वाच्चैव भेदस्पृगिष्यते ॥ ९७५ ॥

The cognition of difference between generality and particularity—even that because of being in them alone is not true cognition of difference.

Objection: There is seen reciprocal difference between generality and particularity; that difference would devolve on the substrate also.

Reply: In your view, generality and particularity are not entities. Therefore, there cannot be cognition of difference in regard to them. In what is not an entity or thing, the cognition of difference is impossible. Even setting aside this difficulty, we ask, what is that cognition which, you hold, is of the difference between generality and particularity? Is that the cognition of generality, or of particularity, or of both, or some other cognition? On the first three alternatives, the cognition would be of generality, etc., alone, and not of difference. If it be held that that cognition is of something else, then that something else cannot be difference, because of the defects like reciprocal dependence, etc.

[976]

एकं चेद्विन्नता नास्ति भेदश्चेदेकता कुतः ।

चित्तेऽप्यनुगमाभावाच्च सामान्यविशेषता ॥ ९७६ ॥

If generality and particularity are one with a thing, there cannot be difference; if there is difference, how can unity be? Since there is no persistence in what are variegated, there are not both generality and particularity.

Are generality and particularity non-different from that which has them, or different? If they are non-different, then there would not be the relation of generality and particularity. If different, there is the contingency of there being three entities.

Although it is wished by you that the thing is of the nature of both generality and particularity, the thing can be only of the nature of a particular. The particular does not persist, e.g. the cow with broken horns (*khaṇḍa*) is not seen in the cow without horns (*muṇḍa*). The pure generality which persists, however, is not an entity.

[977]

स्वरूपपररूपाभ्यां यदा सदसदात्मकम् ।

वस्त्वेकं मानविषयमभावस्ते तदा कुतः ॥ ९७७ ॥

If the one reality be the content of means of knowledge as being and non-being, through its own form and other-form, how can there be non-existence for you?

Now, it is sought to reject difference through the rejection of non-existence.

If it be said that the same entity is real by its own nature and unreal as of the nature of something else, then it would result that, of that entity there is no unreality or non-existence since there is no evidence. In that case there would be no difference too which is dependent thereon.

[978]

प्रत्यक्षादिनिवृत्तिश्चेत्तस्याः किं रूपमुच्यताम् ।

स्तैमित्यमात्मनश्चेत्स्यात्तद्वस्त्वेवास्मदीहितम् ॥ ९७८ ॥

If the turning away of perception, etc., be the evidence for non-existence, say, what is the nature of that? If it is the non-activity of the self, then it is verily the reality which is acceptable to us.

If you say that the evidence for the non-existence of an entity is the non-rise of any of the five *pramāṇas*, we ask, what is the nature of the non-rise? (1) Does it mean that the self remains in itself without any activity? (2) Or, is there cognition of another entity? (3) Or, does it imply another existent?

(1) It cannot be the first; for there would then be the adoption of our position.

[979-980a]

अथ वस्त्वन्तरज्ञानं नितरां तस्य वस्तुता ।

भावान्तरमभावोऽपि निरुपाख्यः स नेष्यते ॥ ९७९ ॥

तस्माद्वस्त्वेकनिष्ठत्वान्न भेदोऽक्षादिगोचरः ।

If it (the turning away) is knowledge of some other entity, then by all means it is a reality. Even non-existence as another existence will not be admitted if it is

investigated into. Therefore, since perception, etc., relate only to the one reality, difference is not their sphere.

(2) If the non-rise of perception, etc., be the cognition of another entity, then also there is no non-existence, since cognition is an existence and its content also is an existent.

(3) The view that non-existence is another existence is untenable. If it is existence, the expression 'another' is meaningless. If it is non-existence, then the term 'existence' is inapplicable to it.

In any case, the so-called non-rise of the quintuple *pramāṇas* must be regarded as an entity; and the content or object of an entity must be an entity. An entity cannot establish the non-existence of entity; if this be not admitted, the establishing of one's own non-existence should be possible.

Rejecting difference through the rejection of non-existence, and accepting the view that generality alone is the real, it is concluded that difference has no evidence.

[980b-981a]

घटोऽयमिति संवित्तेर्घटो मेयः प्रतीयते ॥ ९८० ॥

न व्यावृत्तिः पटादीनामताद्रूप्यात्तथा पटे ।

In the cognition 'This is a pot' the pot appears as the object of knowledge, and not exclusion from cloth, etc., because it is not of that form; so also in the case of cloth.

If it be contended that the perception of a thing, say, pot, reveals also the exclusion of other things, such as cloth, we ask: is this done by the indeterminate perception or by the determinate perception? The indeterminate perception reveals only the object.

As for the determinate perception of pot, it is the pot alone that is the content, and not the exclusion of all other things; for this is an endless process and is not the sphere of the pot-perception. The same argument holds good with regard to cloth, etc.

[981b-982a]

घटाभावो विरोधित्वान्न घटेऽर्थान्तरेऽपि न ॥ ९८१ ॥

अषष्ट्यर्थतया तस्माद्विकल्पोऽयं न वस्तुगः ।

The non-existence of pot cannot be in pot because of contradiction; nor in some thing else, for it is not the sense of the sixth case; therefore, this is imagination and does not conform to reality.

Does non-existence of pot have no locus? Or, does it have one? If it is without locus, then it is independent. If it has a locus, what is that locus? Is it pot, or some other object? The pot cannot be the locus of its own prior non-existence, etc. As for reciprocal non-existence, that is another expression for difference which has been rejected. If the locus is something else, is that non-existence or existence? Not the first, because non-existence cannot be the locus of non-existence. Nor the second, for we have shown that no relation is possible as between existence and non-existence.

[982b-983a]

घटो हि संविदं कुर्वन्नात्माकारविशेषणम् ॥ ९८२ ॥

आत्मानं लभते तद्वद्व्यावृत्तिं न पटादितः ।

The pot, indeed, causing the cognition which has taken on the attribute of its form, makes itself known, and not its difference from cloth, etc.

The exclusion from cloth, etc., is neither the nature of pot, nor its attribute. In the pot-cognition it is pot alone that becomes the qualification of consciousness.

[983b-984a]

पटसंवेदनेऽप्येवं पटमालं विशेषणम् ॥ ९८३ ॥

ईक्षतेऽलाधिकं नान्यदभावादि यदुच्यते ।

So also in the cognition of cloth, cloth alone is the attribute; nothing more such as non-existence that is alleged is seen here.

Similarly, in regard to cloth. Just as in the pot-cognition the specification is pot alone, so also in the cloth-cognition it is cloth alone that is the specification.

[984b-985a]

संदिग्धनिश्चयाद्येवं ज्ञानधर्मो विशेषयन् ॥ ९८४ ॥

संविदं भिद्यते मेयात्प्रत्येकं भेदधीर्न तु ।

Doubt, determination, etc., which are the attributes of the internal organ, as they qualify the knowledge, differ due to the objects cognized and there is no independent cognition of difference.

Just as external objects like pot, cloth, etc., the internal contents such as doubt, determination, etc., do not import any difference into knowledge. Doubt, etc., constitute the qualification or attribute of knowledge, which here means the internal organ; hence we speak of doubtful knowledge, determinate knowledge, etc. These distinguish knowledge from the object known; but they do not convey any mutual distinction or distinction from knowledge.

AVS — saṁśaya-jñānaṁ mithyā-jñānaṁ pramāṇa-jñānaṁ ca jñānasyā 'ntaḥkaraṇa-dharmaḥ saṁvidam viśeṣayan saṁśayānubhavaḥ viparyāsānubhavaḥ pramāṇānubhavaḥ iti, meyaṁ na tu bhidyate.

[985b-986a]

तथाऽहमेव जानामि माता नान्य इतीदृशाः ॥ ९८५ ॥

मातृधर्माः प्रसिध्यन्ति विशिषन्तः स्वसंविदम् ।

Thus 'I alone, the cognizer, know, no one else'. This and similar ones are established as attributes of the cognizer, distinguishing one's own cognition.

Cognizer, hearer, seer, etc., are features that are superimposed on consciousness; so they are not different in reality. The same is the case with doubt, etc., and pot, etc.

NKL—jñātā mātā śrote 'tyādi mātṛ-dharmāṇām api parasparato 'nyataś ca bhedāsiddher anubhave 'dhyastāḥ sidhyantī 'ty arthaḥ.

[986b-987a]

संविदेका स्वतःसिद्धा प्रत्यग्रूपैकलक्षणा ॥ ९८६ ॥

भावाभावादिरूपाय व्यवहाराय कल्पते ।

Consciousness which is one, self-established, of the nature of the single inner reality, appears in empirical usage as existence, non-existence, etc.

Consciousness which is the self is the substrate of all appearances such as particularized existence, non-existence, etc.

NKL — adhiṣṭhānatvena rajjvādivad anyatrānādhyastatve hetum eketyādi viśeṣaḥair darsayati.

AVS—ahaṁ jānāmi mātāhaṁ draṣṭā śrotā mante 'tyādi mātṛ-dharmād yasmād anubhave 'dhyastam sarvaṁ tasmād anubhavo 'dvayaḥ kūṭasthaḥ prayagbhūtaḥ sarvavyavahārāspadaś ca siddhaḥ.

[987b-988a]

अतोऽनुभवमुल्लङ्घ्य न भेदो नाप्यभिन्नता ॥ ९८७ ॥

तत्पट्टेन तु मानानि विरोधः किंसमाश्रयः ।

Therefore, setting aside experience there will be neither difference nor non-difference; means of valid knowledge are only based on that; on what will contradiction be based?

What was premised earlier, viz. that there is no conflict of the Vedānta texts with other *pramāṇas* is here concluded.

The immutable inner experience is the substrate of all; transgressing that, neither the world nor its difference, etc., get established. The text 'That thou art', etc., teaches that experience; with that there could be no conflict of the other *pramāṇas*. The *pramāṇas* become valid only by being in conformity with experience. How can the Vedānta texts which conform to experience be in conflict with the other *pramāṇas*?

NTV—*tasmād anubhava eva pratyakṣādi-māna-meyah na bhedo nāpy abhedah ity upasaṁharati.*

NKL—*saṁvid atirekeṇa visvasya bhedo 'bhedo vā nāstīty arthah.*

[988b-989a]

अविज्ञातः प्रमाणानां विषयो वादिनां मतः ॥ ९८८ ॥

न तस्य मानतः सिद्धिस्तत्सिद्धेः प्राक्प्रमागमात् ।

Disputants believe that the object of means of valid knowledge is unknown before; but that is not *established* by means of valid knowledge, because that exists even before the functioning of means of valid knowledge.

It is experience that remains unknown and is the content of perception, etc. The Vedānta texts also relate to the same. How, then, can there be conflict between them and perception, etc.?

The *pramāṇas* do not produce the experience; they only reveal it.

[989b-990a]

अमानकं कथं च स्यादज्ञातत्वमिहोच्यताम् ॥ ९८९ ॥

कथं वा तद्विना मानं विषयासंभवाद्वेत् ।

“If the object exists even before the functioning of means of valid knowledge, then it cannot be known through means of valid knowledge. How then, can there be for it unknownness? This is to be explained”. (The reply is:) Without that how can there be means of valid knowledge, because it would be void of object?

Without the unknownness of the object, there cannot be the functioning of *pramāṇa*. If there be no unknownness, there will be no content indicated thereby; consequently *pramāṇa* would be void of content.

[990b-991a]

अज्ञातत्वक्षतिं कुर्वन्मानं मानत्वमश्नुते ॥ ९९० ॥

मानादज्ञातता चेत्स्यान्न सा तत्फलमिष्यते ।

Means of valid knowledge becomes means of valid knowledge by destroying unknownness; if there should be unknownness as a result of a means of valid knowledge the destruction of that cannot be the fruit thereof.

The unknownness itself is not the content of *pramāṇa*; for what the *pramāṇa* does is the destruction of unknownness. The lamp, indeed, does not have the darkness for its object!

[991b-992a]

अतोऽनुभवतौ लब्धमज्ञातं ज्ञापयत्सदा ॥ ९९१ ॥

प्रत्यक्षादि प्रमाणं स्यान्न स्वतौ नापि चान्यतः ।

Therefore, making known the unknown that has already been established in experience, perception, etc., become means of valid knowledge; not by themselves, nor by something else.

Perception, etc., are *pramāṇas* with reference to the pure inner self which is indicated by unknownness that is established by the experience which is the self that has neither a rise nor a setting. In other words, the self is the object of knowledge as well as that which establishes ignorance.

[992b-993a]

नाज्ञासिषमहं पूर्वमित्येवं प्रमिते घटे ॥ ९९२ ॥

पूर्वाज्ञातत्वविषयो भूयोऽप्यनुभवो यतः ।

“I did not know it before”. Thus with reference to a pot which has been known, the earlier unknownness as the content is experienced again.

The unknownness of a thing, say, pot, prior to the cognition thereof, is experienced thus: ‘Till this time I did not know the pot’. On the strength of this reflective cognition, we say, the unknownness is established by experience.

NTV—etāvantam kālam nājñāsiṣam iti jñānotpatteḥ prāg ajñātat-venā ’nubhūtasya punaḥ parāmarśa-darśanād ajñātatvam anubhava-siddham ity arthaḥ.

[993b-994a]

प्रवृत्तं विषये मानमवच्छेदफलं मतम् ॥ ९९३ ॥

ज्ञाताज्ञाते प्रति त्वस्य न व्यापारोऽप्रमाणतः ।

Means of valid knowledge is thought to yield the fruit of defining the object with reference to which it started functioning; as regards the knownness thereof it has no operation, for that would be invalid.

The *pramāṇa* which has the pot for content cannot establish its earlier unknownness, for that is not its function. The knownness as well as the unknownness of a thing are experience-established. What the *pramāṇa* does is only to define the object.

[994b-995a]

सर्वोऽप्यनुभवात्सिद्धां बालोऽप्यज्ञाततां स्वतः ॥ ९९४ ॥

न किञ्चिज्ज्ञान इत्येवं पृष्टो वक्ति प्रमां विना ।

All—and even children—give expression to their own experience-established unknownness. When asked about anything they say in the absence of evidence, “I do not know anything about it”.

That unknownness is experience-established is within the purview of everyone's experience.

AVS—prākṛtānām apy ajñātatvam anubhava-siddham.

[995b-996a]

निःशेषकरणग्रामलयेऽप्यनुभवः स्वतः ॥ ९९५ ॥

अलुप्तद्वक्सुषुप्तेऽपि जाग्रद्विधाविशेषतः ।

Even in sleep where the seer is not absent, though the entire host of instruments have resolved themselves, there is the self-same experience which is not different from the awareness in waking.

That unknownness is experience-established will be evident also when sleep-experience is analysed. On waking up one recalls 'I did not know anything in sleep'. The instruments of *pramāṇa* were not there in sleep. Yet there was the experience of unknownness. As between sleep and waking there is no difference so far as the experience or awareness of unknownness goes.

NTV — sakalamānopasañhārepi suṣuptāv ajñātatvam anubhava-siddham iti na mānāt siddham.

[996b-997a]

अत्यन्तानुभूतेषु हिमवत्पृष्ठवस्तुषु ॥ ९९६ ॥
जाग्रतोऽनुभवोऽप्येवं सुषुप्तान्न विशिष्यते ।

Thus is also the experience of one in waking, of the things on the top of the Himalayas which have never been experienced; so the waking experience (of unknownness) does not differ from the sleep-experience.

Here is a case of unknownness where the content cannot be validly cognized.

AVS—yathā suṣupte 'jñātatvā 'nubhavo 'nubhavād eva, tathā jāgraty apī 'ty arthah.

[997b-998a]

न चात्रानुभवो लुप्तो न जानामीति बोधनात् ॥ ९९७ ॥
अदृष्टमपि दृष्ट्वाऽस्ति बोधो नाज्ञासिषं त्विति ।

Here the experience is not lost, since there is the awareness 'I do not know', and even when what was unseen is seen, there is the experience 'I did not know it (then)'.

It is not right to say that experience itself is absent sometimes so that there is no question of its establishing unknownness during those moments; for experience could never be absent. Not during waking: witness such experience as, 'I do not understand the thing stated by you', 'So long I did not know this'.

[998b-999a]

पुमान्सुप्तोत्थितोऽप्येवं प्रमात्रादिलयं स्वतः ॥ ९९८ ॥

अनुभूत्यैव संधत्ते नान्तराऽतोऽस्य लुप्तता ।

Thus also the man who has risen from sleep remembers of his own accord the resolution of cognizership, etc., through experience alone; so in the interval there was no loss of this experience.

Nor is experience absent during sleep. On waking one says, 'I did not know anything in sleep'. There must have been experience then, even though there was not cognizership, etc.

NTV—sarvāntaḥkāraṇa-pariṇāmo-'paramasyaiva suṣupti-lakṣaṇat-vāt, nānubhavoparamaḥ suṣupti-lakṣṇam.

[999b-1000a]

न चेदानीतिनाद्धोधाद्धोधाभावगतिर्भवेत् ॥ ९९९ ॥

सौषुप्ती नहि बोधस्य कालभेदेन भिन्नता ।

Nor can the absence of knowledge in sleep be inferred from the present knowledge; knowledge does not become different, because of difference in time.

The absence of knowledge during sleep cannot be inferred on the strength of the knowledge that one has during waking. Experience does not become different because of differences in place, time and condition. The prior non-existence of experience can never be established.

The absence of that knowledge cannot be postulated on the ground of the awareness that is in sleep; for to say so would involve a contradiction.

[1000b-1001a]

बोधादेव प्रसिध्यन्ति कालावस्थादयो यतः ॥ १००० ॥

मातृमानादयश्चापि कुतस्तैरस्य विक्रिया ।

From awareness (*bodha*) alone are established time, states of experience, etc., and cognizer, means of cognition, etc. How, then, could that be a modification of them?

Experience is immutable, and is not altered by time, etc. Time, etc., are inert, and so are not self-established. They depend on consciousness for the manifestation of their existence. What is established earlier to them, viz. consciousness, cannot be modified by them. Experience which is self-nature, being without modifications earlier, cannot of its own accord get modified subsequently; for the self-nature cannot be destroyed.

[1001b-1002a]

प्रमातृमानतन्मेयेष्वागमापायिषु लिषु ॥ १००१ ॥

अलुप्तानुदितो बोधः प्रथते प्रत्यगेकलः ।

While the three, cognizer, means of cognition and object, come and go, knowledge which neither rises nor sets, shines as the one inner reality.

This is another reason for stating that the self which is experience is immutable. The inner self which is of one consistency shines without coming and going, and establishes the cognizer, etc., and their comings and goings. That self which is experience is not subject to change.

NKL—pramātrādi-bhāvābhāva-sādhakatvād ātmā svaprakāśaḥ.

AVS—ekaḥ svayamprasiddha ātmā na mā-siddha ity arthaḥ.

[1002b-1003a]

अभितोऽनुभवाक्रान्ता ज्ञाताज्ञातत्वभूमिषु ॥ १००२ ॥

नान्यत्तार्थाः प्रसिध्यन्ति लीयन्ते नाप्यनात्मनि ।

All things, everywhere, in the regions of the known and the unknown, are encompassed by experience; nowhere else are the things established, nor do they resolve into the not-self.

All objects, whether as known or as unknown, are pervaded by experience during the time of their empirical usage. It is thus that they gain their being. They do not stay elsewhere than in experience. Nor do they get resolved in something else. Therefore, cognizer, etc., —in fact, all things—arise from, stay in, and get resolved into experience which is the self.

[1003b-1004a]

अतोऽनुभव एवैको विषयोऽज्ञातलक्षणः ॥ १००३ ॥

अक्षादीनां स्वतःसिद्धो यत् तेषां प्रमाणता ।

Therefore, the one experience alone, which is of the nature of the unknown, is the object of perception, etc.; it is the self-established, in respect whereof they (perception, etc.) have validity (*pramāṇatā*).

It is experience alone that is the content of perception, etc.; and there is no other content. *Pramāṇas* become valid by removing unknownness in regard to experience. This is not incompatible with the self-luminosity of experience. Although experience is of one consistency and its luminosity is not other-dependent, *pramāṇa* is required to remove the nescience located therein.

NTV—yato 'nubhava-vyatirekeṇa kiñcin nāsti ato 'nubhavaśyaivā 'jñātātvaḍ anubhave sarvaṁ mānaṁ pravartata iti.

[1004b-1005a]

तेनानुभवसिद्धानां लोकेऽज्ञानविधातिनः ॥ १००४ ॥

मात्वमक्षादयो यान्ति नाज्ञातज्ञाततोऽन्यथा ।

Therefore, in the world, in respect of things which are established by experience, perception, etc., which destroy ignorance attain validity, not as otherwise than making known the unknown.

In the world, indeed, perception, etc., gain empirical validity only as removing the unknownness of pot, etc., which are established as superimposed on experience that is unknown.

NTV—anubhavāḍ ajñātātvena pratipannānāṁ ghaṭāḍīnam ajñāna-nivartakatvena ghaṭāḍāv akṣāḍīnāṁ prāmāṇyaṁ nā 'nyathā.

[1005b-1006a]

घटादयः प्रमासिद्धा मुञ्चन्त्यज्ञाततां न तु ॥ १००५ ॥

स्वतःसिद्धोऽपि वस्तुत्वान्मुञ्चत्यात्मा प्रमां विना ।

Pot, etc., having been established as valid through *pramāṇa*, leave off their unknownness; though self-established, the self, because of being an entity, does not leave off its unknownness without *pramāṇa*.

Just as pot, etc., being established by empirical *pramāṇas*, leave off their unknownness, so also the self, although self-luminous, becomes known only through *pramāṇa*, because it is also *vastu* (content of *pramāṇa*). Ignorance or unknownness is removed only by the luminosity that is the fruit of *pramāṇa*, and not by the self-luminosity of the self.

NKL — *ṛttivyāpta-ghaṭādīnām ajñāna-nivarttakatvād ātmanopī ṛttivyāptasya tan-nivarttakatvaṁ svarūpa-jñānasyā 'jñāna-sādhakatvād ity arthah.*

[1006b-1007a]

प्राग्बाधकागमात्सिद्धिर्लौकिकस्यापि वस्तुनः ॥ १००६ ॥

वस्तुतत्त्वबलादेव तत्तमोव्यवधानतः ।

Prior to the oncoming of the sublating Scriptural testimony, the empirical objects are established on the strength of the true reality (viz. the self)—and that, through the interposition of ignorance.

Just because the self becomes known through *pramāṇa*, it does not cease to be self-luminous. Before the final realization of the form 'I am Brahman' occurs, it is the self or experience that establishes all things as superimposed on itself by nescience.

NKL—*aham brahmā 'smīti jñānotpatteḥ prāg ajñāna-vyavahitā-nubhavād eva prapañca-siddher ātmā svaprabha ity arthah.*

[1007b-1008a]

कृत्स्नमात्राद्युपादानतमोबाधस्तु बोधतः ॥ १००७ ॥

तत्त्वमस्यादिवाक्योत्थात्पूर्णैकात्म्यस्वलक्षणात् ।

The sublation, however, of the ignorance which is the material cause of all things, cognizer, etc., is through the knowledge which is of the nature of the one plenary self, arising from the text 'That thou art', etc.

Perception, etc., are not the *pramāṇas* that will dispel the ignorance about the self. The knowledge that dispels it is the one that arises from the Scriptural text 'That thou art', etc.

[1008b-1009a]

तेनाऽऽगमस्य तत्र स्यादज्ञातत्वविधातिनः ॥ १००८ ॥

प्रमाणत्वं पुमर्थश्च स एव विदुषां मतः ।

Therefore, there is validity for Scripture, which destroys unknownness in respect thereof (the self); and that alone is regarded by the wise as the human goal.

The knowledge of what is conditioned is caused by perception, etc. In respect of what is unconditioned, Scripture alone is capable of functioning as *pramāṇa*. The knowledge of the conditioned cannot remove ignorance, for it depends on ignorance. The knowledge of the unconditioned dispels ignorance because the nature of the unconditioned reality is such. Therefore, it is through the knowledge generated by the Scriptural text alone that the root of all evil, ignorance, is destroyed. Thus it is clear that the text 'That thou art', etc., is *pramāṇa* in respect of the oneness of self. It is but proper that this should be so because the Brahman-self is of the nature of the supreme bliss and the final goal.

NTV—vākyottha-jñānād eva sakala-bandhopādānātmājñāna-nivṛttiḥ.

NKL—sukharūpatvād ātmaiva phalam ity arthaḥ.

AVS—yato vākyaṛtha-jñānād eva sakala-jāḍopādānā-'tmā-'jñāna-nivṛttis tenā 'gamasya tatra prāmāṇyam.

[1009b-1010a]

ननु दुर्वारसंसारदुःखसंदर्भहानतः ॥ १००९ ॥

किमन्यत्सुखमिष्टं स्याद्यस्याऽऽप्तेः पुरुषार्थता ।

“Now, other than the destruction of the host of misery consisting in the transmigration, difficult to avoid, what happiness is desired, the attainment of which is said to be the human goal?

The *pūrvapakṣin* (here the older Naiyāyika) objects: It is not right to say that the human goal is happiness or bliss. There is no happiness other than the removal of sorrow. Over and above the destruction of the entire host of misery which is called transmigration, nothing else is desired.

* *NKL* characterizes the *prima facie* view as that of the older Vaiśeṣika.

sukhasya duḥkhābhāvatvān nābhāvarūpātmatvam iti vṛddha-vaiśeṣikaś codayati.

AVS—duḥkha-nivṛttir eva sukham ity arthaḥ.

[1010b-1011a]

लोकेऽपि व्याधिसंतापविच्छिन्नौ सुखितेक्ष्यते ॥ १०१० ॥

व्यतिरिक्तसुखार्था च न प्रवृत्तिर्विरागिणाम् ।

“Even in the world, when the burning pain of disease is put out, happiness is seen; and for those who

are non-attached there is no pursuit of happiness other than that of release.

The destruction of sorrow alone is happiness. When a person, for instance, is afflicted with disease, he is said to be in misery. When he becomes rid of disease, he is considered to be happy. Even in the case of one who has renounced the world, seeking release, the goal is freedom from bondage which is misery.

[1011b-1012a]

असंवेद्यं सुखं नापि पुमर्थो न च कर्मता ॥ १०११ ॥

स्वरूपे वेद्यवेत्तृत्वायोगाद्द्वैतप्रसङ्गतः ।

“A happiness that is unknown cannot be the human goal, nor the object, for, in the self, the relation of the object of knowledge and the knower is not possible, as there is the contingency of duality.”

Moreover, if happiness which is an existent is said to be the goal, we have to ask: Is that happiness unknown or known? If it is unknown, like the hidden treasure, it cannot be the human goal. If it is known, then we should admit the duality of knower and known. This would militate against Advaita.

NKL—mandira-madhyā-nihita-dhananīcayavad ity arthah.

[1012b-1013a]

नैवं भेदेन संसिद्धे सुखदुःखे कथं तयोः ॥ १०१२ ॥

ऐक्यं सुखस्य विच्छेदो दुःखं वा किं न कल्प्यते ।

Not so. When happiness and misery are established as distinct, how can they be identified? Or, why should it not be assumed that the absence of happiness is misery?

The *siddhāntin's* reply: The destruction of misery cannot be the same as happiness, for in the case of a person who is half-immersed in water with the scorching sun above, there is simultaneous and separate experience of pleasure and pain.

Moreover, if the absence of misery be happiness, why cannot the absence of happiness be misery?

NKL—*nidāghe divākarakaravyāpta-sarīrasya mandākinī-hrade nimagnādhobhāgasya aparaparyāyam evā 'hlāda-duḥkha-saṁvedanāt.*

[1013b-1014a]

अदुःखिनोऽपि दृश्यन्ते सुखप्राप्तीच्छया यतः ॥ १०१३ ॥
तदुपाये प्रवर्तन्तस्तदभेदे न युज्यते ।

For, even those who have no misery are seen to be active in respect of the means of happiness, desiring to attain it. This will not be the case if the two were non-different.

It is observed in the case of some, e. g. the kings, that even though they have no misery they exert themselves in cultivating the means to happiness such as music and dance. This only shows that the destruction of misery and happiness are not identical.

AVS — *duḥkha-rahitasyā 'pi sukhecchayā tad-upāye pravṛtti-darśanāc ca na duḥkhābhāvaḥ sukham.*

[1014b-1015a]

चन्दनादिसुखोपायसंपन्नाः सुखिनोऽप्यलम् ॥ १०१४ ॥
पुत्रजन्मादिवार्ताभिः प्राप्नुवन्ति सुखान्तरम् ।

Even those who are endowed fully with the means of happiness such as sandal (paste), etc., and are suffi-

ently happy, attain more happiness through the words about the birth of a son, etc.

There are also different happinesses. A person becomes happy through means such as sandal-paste, etc. He gains happiness again on hearing that a son has been born to him.

AVS—sukhinām anīhamānānām api putra-janmādi-vārtā-śravaṇāt sukham dr̥syata ity arthah.

[1015b-1016a]

पुत्राद्यप्राप्तिरूपं च दुःखं तत्र न कल्प्यते ॥ १०१५ ॥

असंवित्तेरवेद्यं हि न दुःखं वैरिदुःखवत् ।

It cannot be assumed there that there is misery of the form of the non-birth of a son; for that is not known; what is unknown is not misery as the misery of an enemy.

It cannot be said that, in the case of the man who hears the birth of a son, what is called happiness is the destruction of the misery that was caused by the non-birth of a son; for, he was not thinking earlier of the fact that a son was not born to him, and so how could he have had misery? A misery that is not experienced is not misery. If an enemy feels miserable, do we feel that misery?

NTV—na hi puruṣāntara-gata-duḥkham puruṣāntarasya duḥkham bhavati.

NKL—ananubhūyamānaṁ na duḥkham puruṣāntaragataṁ duḥkham puruṣāntarasyā 'nanubhūyamāntvād yathā na duḥkham ity arthah.

AVS—yatra putra-janma-śravaṇāt sukham utpadyate na tatra duḥkham asti duḥkhānubhavābhāvāt, ananubhūtam api duḥkham astīti na śakyate vaktum, avedyasyāduḥkhatvāt puruṣāntara-gata-duḥkhavat.

[1016b-1017a]

तिर्यञ्चोऽप्यत एवेह कामयन्ते सुखं तथा ॥ १०१६ ॥

अप्रियं विजिहासन्ति न तु जानन्ति साधनम् ।

Therefore, even animals, here, desire happiness and want to avoid the unpleasant; but they do not know the means.

Even animals and birds seek pleasure as well as the destruction of pain. The only difference between them and the humans is that for the latter the proper means as taught in the Veda is available.

NTV — pasvādīnām sukha-prāpticchā duḥkha-parihārecchā ca vibhāgena dṛśyate yataḥ.

[1017b-1018a]

वेदोऽपि शुद्धमात्मानं सुखं मुख्यं प्रदर्शयन् ॥ १०१७ ॥

अनात्मानं तथा दुःखं पुमर्थत्वेन संमतः ।

And, the Veda is admitted to be the means of human goal, as it exhibits the pure self as the supreme happiness and the not-self as misery.

The Veda becomes *pramāṇa* by revealing the supreme happiness that is the self, free from all characteristics such as hunger, etc., and by showing up the misery that is the not-self.

[1018b-1019a]

तदेतत्प्रेय इत्यादिवाक्येभ्योऽनेकधा श्रुतम् ॥ १०१८ ॥

तथाऽऽत्मनस्तु कामाय तस्मान्नान्यत्सुखं भवेत् ।

It is declared in Scripture, in many ways, thus: 'This is dear',¹ and 'For the love of the self'² etc. Therefore, there is no other happiness.

Here are cited texts from the Veda which declare that the self is the supreme happiness.

1. BU, I, iv, 8.

2. BU, II. iv, 5 *et seq*;
IV, v, 6 *et seq*.

[1019b-1020a]

पुरुषार्थाभिसंबन्धाद्विरागित्वं यथाऽऽश्रितम् ॥ १०१९ ॥

परानन्दाभिलाषोऽपि तथा चेत्किं निषिध्यते ।

Just as, being related to the human goal, renunciation is depended upon, so also is the desire for the supreme bliss (depended upon). That being so, why is it prohibited ?

It cannot be said that, if he who seeks release desires happiness which is identified with the self, he would be subject to transmigration; for, just as it is admitted that he should have non-attachment because that is necessary for attaining the goal which is release, so also it must be conceded that he should have desire for the supreme bliss if it can be shown that it is for the sake of gaining release.

NKL — virāgitvaṁ saṁsārāsāratā-darśana-niṣpannaṁ saṁsāra-dveṣitvaṁ puruṣārthābhisāmbandhāt sādhanatvena mokṣasāmbandhāt tadadhīnā pravṛttiḥ na saṁsārāyeti bhavadbhir abhyupagataṁ yathā, tathā parānandābhilāṣopi puruṣārthābhisāmbandhīcet tan-mūlā pravṛttiḥ kasmāt saṁsārakāraṇatvena niṣidhyata ity arthaḥ.

[1020b-1021a]

आत्यन्तिकसुखेच्छायां यदि रागित्वमुच्यते ॥ १०२० ॥

विविक्तदेशसेवादाविच्छायां किं न रागिता ।

If the desire for absolute happiness is said to be attachment, then how is there not attachment in the desire for a solitary place, etc.?

In fact, what is called the desire for the supreme happiness is not really attachment; it is the interest (*śraddhā*) evinced in the supreme happiness. Attachment is born of delusion; the interest which we

speak of is caused by discrimination. This interest is exactly in the same position as the desire for solitude, attending on a teacher, etc.

NKL—virāgitvaṁ na dveṣaḥ kiṁtu saṁsāra-darśana-janyo-'dvegaḥ iti cet tarhi paramānandecchāpi śraddhaiva na rāgaḥ.

AVS—yad avidyākṣiptam abhūtaguṇābhiniveśaṁ rāgam ācakṣata iti rāga-lakṣaṇaṁ kṛtam.

[1021b-1022a]

अथ ये शतमित्यादिवाक्यैरेतत्प्रपञ्चितम् ॥ १०२१ ॥

एष ह्येवेति च व्यक्तं तैत्तिरीयश्रुतावपि ।

This has also been clearly explained in the *Taittirīya* texts, 'Now, that which is a hundredfold of the pleasure',¹ etc., and 'This alone gives happiness',² etc.

Two texts from the *Taittirīya Upaniṣad* are quoted here to show that the self is of the nature of the supreme happiness.

1. *TU*, II, viii, 1.

2. *TU*, II, vii, 1.

[1022b-1023a]

स्वानन्दाभिमुखः स्वापे बोध्यमानोऽत एव च ॥ १०२२ ॥

पीड्यते रूयादिसंपर्कसुखविच्छेदतो यथा ।

And, therefore, a man who in sleep enjoys the bliss of self, when awakened, is afflicted even as when interrupted in the enjoyment of contact with woman, etc.

The experience of sleep is also evidence for the bliss-nature of the self. When a person's sleep is interrupted he does not like it,

even as he dislikes a hindrance to the enjoyment of pleasure in the waking state. From this it is to be concluded that in sleep there is bliss.

[1023b-1024a]

आनन्दैकस्वभावत्वाद्बोध्यता तत्र नाथ्यते ॥ १०२३ ॥

निःसंबोधेऽथ्यते सा हि न तु बोधैकलक्षणे ।

Because it (viz. the self) is of the nature of pure bliss, knowability (*vedyatā*) is not required there ; that, indeed, is required in what is not of the nature of intelligence, and not in the case of that which is solely of the nature of intelligence.

Objection—If Brahman-bliss is an object of knowledge, there would be duality; if it is unknown, it would not be the human goal.

Reply—Although the self is of the nature of the one consistency of happiness, it is not an object of knowledge. It is only what is inert that may become an object of knowledge. The self, on the contrary, is pure consciousness. For understanding the bliss-nature of the Brahman-self, therefore, the Vedānta may well be the *pramāṇa*.

[1024b-1025a]

अधिकारस्य सौलभ्यप्रतिपत्त्यर्थमीरणम् ॥ १०२४ ॥

सर्वपुंसामिति तथा पूर्वमेव प्रपञ्चितम् ।

The words “for all men” (of the commentary) are stated for the purpose of teaching that the eligibility is simple. This has already been explained.

Having explained the meaning of the word “the entire Veda”, etc., the implication of the words “for all men”, etc., is here indicated.

There is the wish on the part of every one thus: 'Let happiness be to me; let not misery come to me'. *Mokṣa* is pure unconditioned bliss. He who desires that is the eligible person in respect of knowledge. Therefore, the eligible person here is easily secured. In order to remind us of that, the commentary says, "for all men".

*NTV—sukhaṁ me syāt duḥkhaṁ me mābhūt iti viṣaya-viśeṣā-
'navacchinna-sukhamātre duḥkha-nivṛttimātre ca sarva-puruṣāṇām
abhilāṣā darśanāt.*

[1025b-1026a]

स्वर्गादिकाम्यपि यतो मुक्तिं कामयते न तु ॥ १०२५ ॥

मुक्तिं कामयमानोऽन्यत्कटाक्षेणापि वीक्षते ।

For, even he who desires heaven desires release ; but he who desires release does not even cast so much as a side-glance at the other.

The pleasures of heaven are small as compared with the supreme bliss which is release. He who seeks release will never court them.

[1026b-1027a]

सर्वेषामपि च नृणामधिकारोऽनिवारितः ॥ १०२६ ॥

यतोऽतः सर्वतो नृणामिति भाष्यकृदब्रवीत् ।

And, to no man may the eligibility be denied ; therefore, the commentator said " for all men ".

When it is said that all are eligible for knowledge, what is meant is that no one is barred therefrom provided he is endowed with the fourfold means consisting of discrimination, etc.

[1027b-1028a]

शुक्लां गामानयेत्युक्ते कांचिद्भोक्त्रिकां क्रियाम् ॥ १०२७ ॥

कुर्वाणमभिवीक्ष्याज्ञः कुरुते कारणानुमाम् ।

“ When it is said ‘Bring the white cow’ a certain person performs the act having the cow as its object ; an ignorant person seeing this infers the cause (of the action).

Next is commenced the explanation of the commentary beginning with the words, “in the matter of what is seen”, and ending with the words “investigation of Scripture”.

Here there is a *pūrvapakṣa*.

When the superior elder says, ‘Bring the cow’, the intermediate elder performs the appropriate act in relation to the cow. The child observes this and infers the cause of the intermediate elder’s act.

[1028b-1029a]

ज्ञातं ध्रुवमनेनैतद्यद्भो कर्म कमीक्ष्यते ॥ १०२८ ॥

प्रागज्ञातस्य निर्वृत्तिर्न यतो वीक्ष्यते क्वचित् ।

“This has certainly been known by him—this which is seen as having cow for its object ; for nowhere is it observed that one who does not know earlier does something.”

This is how the child infers: The activity in question is caused by the cognition of what prompts, since it is a conscious activity.

*AVS—suklām gām ānaya iti kaścid vadati, tad-vākya-śravaṇānanta-
taraṁ śrotā pravartate, tataḥ goviṣayāṁ pravṛttiṁ drṣṭvā anuminoti.*

[1029b-1030a]

यद्यर्थं कारकाधीनं दृष्ट्वा तत्कारणानुमा ॥ १०२९ ॥

प्रमाणान्तरगम्यत्वाल्लौकिकत्वं तदाऽऽपतेत् ।

If the cause is inferred by seeing the thing (viz. the activity of the hearer) which depends on the causal agent (*kāraka*), then since that (i.e. *niyoga*) is understood through some other means of valid knowledge, there is the contingency of its being empirical (*laukikatva*).

Is that which prompts something other than *niyoga*, or is it *niyoga* itself? It cannot be the first; for, if it is admitted that words have capacity to get related to other words, the view that all words have *niyoga* for purport will have to be given up.

As regards the second alternative, this is the defect: If on seeing the activity of the hearer that is generated by causal agents one were to infer *niyoga* as the prompter thereof, then *niyoga* would be on a par with pot, etc., ceasing to be that which is special to the Veda.

[1030b-1031a]

न चेत्कारकतन्त्रोऽर्थो ज्ञातस्यानुष्ठितिः कथम् ॥ १०३० ॥
न सिद्धो नापि चाभावः कारकापेक्ष ईक्ष्यते ।

If the thing does not depend on the causal agent, how can there be the performance of what has been known? Neither what has been established nor what is non-existent is observed to require a causal agent.

Moreover, *niyoga* which is the sense of *lin*, etc.,—is it not accomplished through causal agents, or is it accomplished? The first alternative is not possible. Although *niyoga* is known somehow through *lin*, etc., it cannot be accomplished through performance, and so the performance of the stem-sense (sacrifice) would be fruitless and futile. On the second alternative, viz. that *niyoga* is accomplished through causal agents, is it as existent, as non-existent, or as

both? It cannot be the first, for neither the existent nor the non-existent depends on causal agents. For example, the self which is existent is not caused, nor the human horn which is non-existent.

NTV says that we may so split the words of the first line that we may read *ajñātasya* instead of *jñātasya*. Then the meaning would be that the performance of *niyoga* does not take place because *niyoga* is unknown.

ajñātasya iti vā padacchedaḥ. dr̥ṣṭa-viśaye ca iṣṭāniṣṭa-prāpti-parihāro-'pāya-jñānasyaiva pratyakṣānumānābhyām siddhatvāt, niyogasyā 'siddhatvāt vyutpattyabhāvena abodhakatvāt nāgamānveṣaṇā ato 'nuṣṭhānaṁ tasya na sidhyet.

[1031b-1032a]

आरभ्ये कारकत्वे न बलात्प्रामाण्यमापतेत् ॥ १०३१ ॥

व्यङ्ग्ये तु कार्ये वेदस्य सिद्धेऽर्थे मानता भवेत् ।

If the *niyoga* were originated by Scripture, then Scripture would be causal agent and therefore would not be *per force* a *pramāṇa*; if the *kārya* were only manifested, then the Veda would be *pramāṇa* in respect of what is established already.

On the view that *niyoga* is existent, is *niyoga* originated by Scripture, or is it manifested? If it be the first, Scripture would be a causal agent, and not a *pramāṇa*. If it be the second, Scripture becomes *pramāṇa* in respect of what is already accomplished; for manifestation or revelation is possible only of what is already there.

AVS—*na śabdārabhyo niyogaḥ kiṁtu vyañya iti cet tarhi siddha-vastuni mātvaṁ vedasya bhavet.*

[1032b-1033a]

वाक्यस्य च प्रमाणत्वं नाप्यभावैकगोचरम् ॥ १०३२ ॥

न चेदभावः कार्योऽर्थः सिद्धेऽर्थे मानता भवेत् ।

The validity of verbal testimony cannot have for its sphere what is non-existent ; if the sense of the *kārya* were not non-existence, there would be validity in respect of what is already established.

If *niyoga* be non-existent, there is no question of Scripture being a *pramāṇa* in respect thereof; for knowledge is never *pramāṇa* in regard to what is non-existent. If *niyoga* be existent, as was shown above, Scripture would become *pramāṇa* in respect of what is already accomplished.

[1033b-1034a]

अथोभयात्मकं कार्यं सिद्धासिद्धस्वभावकम् ॥ १०३३ ॥

उक्तदोषद्वयासक्तिर्न च वस्त्वीदृशं क्वचित् ।

If the *kārya* be of the nature of both, the established and the non-established, both the aforesaid defects would result ; nor is there anywhere such a thing.

If *niyoga* be both existent and non-existent, then the defects pointed out in both the alternatives would result. Moreover how can such a thing be which is existent as well as non-existent?

[1034b-1035a]

सिद्धस्य व्यञ्जकं मानं न मानं कारकं क्वचित् ॥ १०३४ ॥

चोदना मानकं चेत्तत्कथं कार्यं तदुच्यताम् ।

Pramāṇa is that which manifests what is already established; *pramāṇa* is never a causal agent; if injunction be *pramāṇa*, how can it be *kārya*? That must be explained.

Perception, etc., make known what is already accomplished. Such is the function of *pramāṇas*. If *niyoga* which is said to be *kārya* is revealed by Scripture, it must be an established entity, i. e. it cannot be *kārya*.

NTV—*evam liṅādi-yukta-vākya-pramāṇam api siddhārtha-bodhakam pramāṇatvāt anyathā ukta-prakāreṇa kārye prāmāṇyāyogāt.*

NKL—*vidhi-vākyaṁ siddhe mānaṁ mānatvāt pratyakṣavat.*

AVS—*pratyakṣādi-mānam akārakam vidyamāna-prakāśakam ca dṛṣṭam. evaṁ yadi niyogo 'pi vidhi-vākya-pramāṇakah tadā tasya kāryatvaṁ na siddhyati.*

[1035b-1036a]

मतं विषयसंसिद्ध्या कार्यमित्यभिधीयते ॥ १०३५ ॥

यागसिद्धेः पुराऽसिद्धेः कथं चोदनया मितम् ।

If it be thought that by way of establishing the object (*viṣaya*) it is designated as *kārya*, then since it is not established prior to the establishment of the sacrifice, how can it be known through injunction?

Is *niyoga* accomplished only after the performance of the stem-sense (viz. sacrifice), or even earlier? If the first, then *niyoga* cannot be known from Scripture before the performance of the sacrifice. What is non-existent, like the human horn, cannot be known.

NKL—*yāgānuṣṭhānātprāg asatve niyogasya nṛśṛṅgasyeva na vedagamyatvam.*

प्राक्प्रयोक्तृभिसंसिद्धौ किं फलं यागसिद्धितः ॥ १०३६ ॥

यागसिद्ध्याऽपि तत्सिद्धौ प्रयोज्यत्वं कुतो यजेः ।

If, even before the performance of the sacrifice, *niyoga* be established, then, of what use is the performance of the sacrifice? If *niyoga* is established through performance of the sacrifice, then, how can the sacrifice be such as to be performed (by *niyoga*)?

If *niyoga* is accomplished even before the performance of sacrifice, then since it is not achieved through sacrifice, the performance of sacrifice would be futile. It is not possible to accomplish what is already accomplished. So, where is the need for performing sacrifice?

NKL—*siddhasya sādhyatvā-'yogāt niyogaprayuktānuṣṭhānavatvaṁ yāgasya hīyeta.*

AVS—*yāgānuṣṭhānaṁ niṣphalaṁ, niyogāsādhakatvāt.....siddhasya siddhy ayogān niyogaprayuktaṁ yāgasyā 'nuṣṭheyatvaṁ na ghaṭata ity arthaḥ.*

यागाद्यनुष्ठितेरस्य घटादेरिव चेन्मतः ॥ १०३७ ॥

उपकारो नियोगस्य कथं न घटतुल्यता ।

If the performance of sacrifice, etc., is to be regarded as an aid (in bringing about the *niyoga*) even as the operations of the potter are in relation to the pot, then how is there no similarity between *niyoga* and pot?

If the performance of sacrifice is said to be helpful in the accomplishment of *niyoga* even as the operations of the potter are in regard to the production of a pot, then *niyoga* would be an empirical phenomenon like the pot.

[1038b-1039a]

अपुमर्थे नियोगे च तात्पर्यं स्यात्तथा सति ॥ १०३८ ॥

प्रत्यर्थिनि पुमर्थे तत्सुधीभिर्गृह्यते कथम् ।

And if that were so, Scripture would have for purport the *niyoga* which is not a human goal; and when the human goal is inimical to it, how can the wise grasp it?

If *niyoga* be on a par with the pot, then it cannot be the human goal. And, if it is not the human goal, the wise would not seek it.

[1039b-1040a]

लिङ्गदिश्रवणात्पुंसः कार्यं यत्प्रसमीक्ष्यते ॥ १०३९ ॥

उपकाराद्यपेक्षं तद्वक्तृकलोः प्रसिध्यति ।

The *kārya* which is looked forward to by the man who hears the potential mood (*liṅ*), etc., depends for its coming into being on some benefit (resulting) to the speaker or the doer.

When an injunction is heard, the hearer seeks to fulfil it in order to accomplish happiness either for himself or for the one who gave the injunction, or in order to avoid pain for either. If that were so, the sense of *liṅ*, etc., is the instrument to what is desired, and not *niyoga-kārya*.

[1040b-1042a]

न चेत्संभाव्यते कर्त्ता पुमर्थः कस्यचिद्विधेः ॥ १०४० ॥

आज्ञोक्तेरेव न तदा कश्चिज्जगति चेष्टते ।

आज्ञार्थमात्रसिद्ध्यर्थं न कश्चित्स्ववशो नरः ॥ १०४१ ॥

दुःखात्मके मनो धत्ते यागादौ चोदनावशात् ।

If from the injunction no human goal is understood to be accomplished by the agent, then in the world no one would be active merely because of the injunctive statement.

No man who has an independent will, for the mere sake of fulfilling the sense of the injunction, sets his mind to the difficult tasks like sacrifices by virtue of the injunction.

In all cases, the sense of *liñ*, etc., is instrumentality to what is desired. When some one hears the command 'Bring the cow', if he does not understand that the execution of the command will result in an advantage either to himself or to the one who issued the command, he would not proceed to act. The sense of *liñ*, etc., thus, is only the instrumentality to what is desired. This is true of both injunctions and prohibitions.

Even in the case of a servant obeying the orders of a king, etc., the obedience is for the sake of avoiding pain.

The performance of sacrifice involves an enormous amount of effort and labour. No one would voluntarily undertake to perform such tasks if there be no advantage. So, even in the Veda the sense of *liñ*, etc., is instrumentality to what is desired.

NKL—*prayojanam anuddisya na mando 'pi pravartata iti nyāyāt.*

[1042b-1043a]

पुमर्थमभिसंधाय यागादावथ चेष्टते ॥ १०४२ ॥

फलं प्रवर्तकं प्रापन्न नियोगस्तथा सति ।

If for the sake of the human goal one is active in respect of sacrifice, etc., then the fruit which impels him to activity has come in and not *niyoga*.

If it is granted that one performs sacrifice only after knowing that it is the means to the accomplishment of what he desires, then it must be admitted that what prompts activity is the instrumentality to what is desired, and not *niyoga*.

AVS—tadā rāga eva pravartako na niyoga ity arthah.

[1043b-1044a]

मन्त्रोक्तेरिव लोडादेः प्रवृत्तिरिति चेन्मतम् ॥ १०४३ ॥

प्रायश्चित्ती भवेन्नैव तत्पराधीनवृत्तिः ।

If activity as a consequence of the imperative mood (*lot*), etc., is thought to be like that which is due to incantations, then since one would be entirely governed by it in his actions, there would be no need for expiation.

If activity in obedience to a command be on a par with the activity of a person who is under a spell, then the agent would have no responsibility for his actions. Even if he transgresses, that would be no fault of his, and there would be no need for any expiation.

NTV — kiṁ mantravat puruṣecchām anapekṣya niyogaḥ puruṣaṁ pravartayati utā 'napekṣya uttarātra rāgasyaiva pravartakatvaṁ prāpnoti pūrvatra niyogātikramāt na doṣabhāk puruṣo niyoga-paratantratvāt.

[1044b-1045a]

प्रवर्तकत्वं मन्त्रस्य न प्रवर्त्यवशाद्यथा ॥ १०४४ ॥

स्वत एव न यागादेः कार्यसिद्धिस्तथा भवेत् ।

If it be said that *mantra* (incantation) causes activity not through the object to be set to act but of its own accord, then from sacrifice, etc., there will be no attainment of *kārya*.

If it is said that the incantation or spell prompts activity of its own accord, and that the prompted person is helpless, and if it be maintained that the Vedic command also functions in the same way, then it would be meaningless to talk of any accomplishment through sacrifice.

AVS—yathā mantra-prerito mantra-paratantraḥ pravartamāno yadī kathamcin mantram atikrāmati na kaścīd doṣaḥ evam atrāpīty arthaḥ.yadi niyogātikramān na doṣaḥ tathāśati niyoga-viṣayaṁ yāgādikaṁ na ko'py anutiṣṭhed ato yāgāder na niyoga-siddhir iti.

[1045b-1046a]

कारकं वा क्रिया वा स्याद्यदि वा स्यात्क्रियाफलम् ॥ १०४५ ॥

तस्य लौकिकमासिद्धेर्लौकिकत्वं प्रसज्यते ।

Whether it is causal agent or activity or fruit of activity, there would be secular nature for *niyoga*, because it is established through secular *pramāṇas*.

Whether *niyoga* be a causal agent, or act, or the fruit thereof, since it is known through other *pramāṇas*, it would be a secular phenomenon, like a pot, which would mean that it is not something which is known from the Veda alone.

[1046b-1047a]

ऐकोत्म्यवस्तुनिष्ठे तु यथोक्तन्यायवर्त्मना ॥ १०४६ ॥

न कश्चिदपि दोषः स्याद्वचस्यस्मिन्मनागपि ।

As for the texts which have for purport the one self, there is not the slightest defect, as we have already explained through reasoning.

A similar contingency does not arise in the case of Brahman. We have already shown that the Upaniṣad texts such as 'That thou art' are *pramāṇa* for the Brahman-self. So, there is not even the least parity between *niyoga* and Brahman.

[1047b-1048a]

नेति नेत्यादिवाक्येभ्यो योऽर्थोऽनन्यानुभूतिगः ॥ १०४७ ॥

लौकिकत्वं कथं तस्य सर्वमेयातिलङ्घिनः ।

The sense which is understood from the texts like 'Not this, not this'¹, and which is not got through any other experience—how could it be secular, since it transcends all objects of knowledge?

Brahman is not what is known through secular *pramāṇas*, because it is without any quality, as is taught by the negative texts of Scripture such as 'Not this, not this', and because it is self-luminous, as is declared in the text 'Consciousness is Brahman', etc.

¹ BU, II, iii, 6; III, ix, 26.

[1048b-1049a]

इत्युक्तमभिसंधाय दृष्टादिवचनं जगौ ॥ १०४८ ॥

लौकिकत्वप्रसिद्धयर्थं नियोगस्य घटादिवत् ।

Bearing in mind what has been stated above, the Commentator wrote the words 'the seen (*dr̥ṣṭa*)', etc., for establishing the secular nature of *niyoga*, as of pot.

The words of the commentary, "the seen", etc., show that Brahman alone is the purport of the Veda, not *niyoga*. *Niyoga* is secular like a pot, and is known through other *pramāṇas*.

[1049b-1050a]

आस्तां वेदान्तमानत्वं त्यक्तं तत्कामतस्तव ॥ १०४९ ॥

वस्तुन्युक्तेर्न चेन्मात्वं कर्मकाण्डेऽपि तद्ववेत् ।

Let alone the validity of the Vedānta which you have rejected at your pleasure; but if the Veda were not *pramāṇa* in respect of the self (*vastu*), the same fault will affect the ritual-section.

You do not admit that the Veda is *pramāṇa* in respect of Brahman-self on the ground that the self is an existent entity. But this prejudice of yours will result in the destruction of your own *siddhānta*. In order that *karma-kāṇḍa* may be meaningful, you must *per force* admit that the Veda teaches a self that survives death and gets related to another body, etc., and a heaven to which it can go through acquiring merit. The transmigrating self and heaven are existent entities. If the Veda can teach these, can it not teach Brahman?

NKL—*tattvamādeḥ prāmāṇyaṁ tāvat tiṣṭhatu tad asmābhir api tvad-icchayā uktam siddha-vastuni vedasya prāmāṇyaṁ na cet karma-vāk-yānām api prāmāṇyaṁ na syāt. dehāntara-sāmbandhy ātmano prāmāṇi-kasyā 'siddher ato bhaviṣyad-dehasāmbandhy ātmani vākya-prāmāṇyo-pagame tattvamāder api siddhe prāmāṇya-siddher ity arthaḥ.*

AVS — tattvamādi-vākyaṁ pramāṇam ity etat tāvat tiṣṭhatu. siddhavastuni vedasya mātvaṁ naced iṣyate karma-vākyaṇām api na mātvaṁ sidhyet. ataḥ karma-vākyaṇām mātvaṁ icchatā siddha-vastuni bhaviṣyad-deha-sambandhiny ātmani svarga-devatādi-svarūpe ca vedasya mātvaṁ abhyupagantarvam. ataḥ kārya eve 'ti niyamābhāvat vedāntānām api svārthe mātvaṁ bhavet.

[1050b-1051a]

भविष्यदेहसंबन्धी वाक्यादात्मा न चेन्मितः ॥ १०५० ॥

मानान्तराच्च कः कुर्याददृष्टार्थाः क्रिया सुधीः ।

If the soul to be related to the future body is not known validly from the text or through some other *pramāṇa*, which wise man will perform the sacrifices which have unseen fruit?

If the transmigrating self were not known through Scripture and other *pramāṇas*, no one would perform the sacrifices. Thus the commentary says, “if not”, etc. It is the transmigrating self that is the enjoyer of the fruit of sacrifices. In the absence of a knowledge of that, who would undertake to perform the sacrifices?

[1051b-1052a]

नापि सांख्यप्रमासिद्धमात्मानमवगच्छतः ॥ १०५१ ॥

देहाद्यनभिसंबन्धात्प्रवृत्तिः स्यात्क्रियास्विह ।

Nor can there be activity in respect of rites, here, on the part of those who understand the self as established by the *pramāṇa* given by the Sāṅkhyas, for that self is not related to the body, etc.

The self that is established through inference by the Sāṅkhyas is of no use in the performance of ritual; for, that self is without activity and unrelated to a body.

[1052b-1053a]

कर्मकाण्डेऽधिकार्यस्मिन्याद्वक्संभाव्यतेऽञ्जसा ॥ १०५२ ॥

ताद्वक्संप्रतिपत्त्यर्थं न चासतीति भण्यते ।

The commentator says, “Nor if it were not so”, for the purpose of making us understand quickly the nature of the eligibility for the ritual-section.

The words of the commentary which indicate the nature of the eligibility for the ritual-section are now explained.

[1053b-1054a]

कर्मभ्यः फलमिच्छद्भिरदृष्टं दृष्टमेव वा ॥ १०५३ ॥

देहावस्थान्तरावेशे प्रमाणं वाच्यमात्मनः ।

Those who desire fruits, seen or unseen, from rites must state the evidence for the self entering into a different state of the body.

Although the self is self-established, the *pramāṇa* should be stated for its taking on another body after leaving off the present one. Otherwise the transmigrating self will not be established. Without that there would be no agent and enjoyer for the Vedic rites.

[1054b-1055a]

कथं च तस्य कर्तृत्वं व्यापित्वान्निष्क्रियत्वतः ॥ १०५४ ॥

न चाकर्तुः फलं गौण्या वृत्त्या चेत्सुतरां न तत् ।

And how can there be agency for it, since it is all-pervading and actionless? Nor can there be fruit for the non-agent; figuratively also it cannot be.

The self that is established through argument by the Vaiśeṣikas is of no use here; for that self, being all-pervading and without action, cannot be the agent of sacrifices.

Nor may it be said that although the self is not an agent, it is the enjoyer, as in the Sāṅkhya system; for the fruit can accrue only to the one who is prompted to act by Scripture. Moreover, the self is not the enjoyer in the principal sense of the term; for its true nature is to be unattached and indifferent. If the self is not the enjoyer in the principal sense, it cannot be the enjoyer in the figurative sense also.

[1055b-1056a]

मुख्यकर्तृत्वपक्षेऽपि ह्यनिर्मोक्षः प्रसज्यते ॥ १०५५ ॥

मानेन नाश्रयतेऽज्ञानं ज्ञापकं हि न कारकम् ।

On the view that agency is principal, there is the contingency of non-release. Through *pramāṇa* ignorance is destroyed; *pramāṇa* is what makes known, and not what causes one to act.

If the enjoyership is in the principal sense, then agency also must be for the self in the principal sense. If that is so, then there can be no release.

Nor may it be said that, although agency is real, it is removed through *pramāṇa*, for *pramāṇa* can never remove what is real; it can only reveal the real.

[1056b-1057a]

देहान्तराभिसंबन्धो भावित्वान्नाक्षगोचरः ॥ १०५६ ॥

लिङ्गसादृश्यविरहान्नानुमा नोपमा तथा ।

Relation to another body, because it belongs to the future, is not an object of perception; nor of inference and analogy, because there are no *probans* and similarity.

Perception, inference, and analogy cannot serve as *pramāṇas* in respect of the self that is related to a future body.

[1057b-1058a]

शब्दादात्मनि संसिद्धे पूर्वोक्तन्यायतो न च ॥ १०५७ ॥

श्रुतार्थापत्तिरप्यत्र नाभावो मानभावतः ।

When the self is established from Scripture, it is not established through the aforesaid reasoning; there is not even presumption from what is heard here; nor non-cognition, since there is cognition.

Presumption from what is seen (*dr̥ṣṭārthāpatti*) is not the evidence; nor presumption from what is heard (*śrutārthāpatti*). Nothing is seen that is unintelligible without presuming the self. And there is no unintelligibility either in what is heard from Scripture in regard to this matter.

As there is the *pramāṇa* of Scripture in respect of the self, there is no scope for non-cognition too to function as *pramāṇa*.

[1058b-1059a]

न चाहंप्रत्ययात्सिद्धिरात्मनः स्यात्कदाचन ॥ १०५८ ॥

बोधानुभवसंवित्तिवित्तयो ह्यात्मवाचिनः ।

Nor is even the self established through the cognition 'I', for the words expressive of the self are awareness, experience, consciousness, knowledge.

As the self is self-luminous, it is not grasped through the cognition 'I' also.

NTV — *ātma-pratipādaka-sabda-buddhiṣu vipratipatti-darśanān nāhaṁ-pratyaya-gamya ātme 'ty arthaḥ.*

AVS—*svayaṁprakāśatvād ātmano nāhaṁ-pratyaya-gamya ātmā.... ātma-prasādād ahaṁ-pratyaya-siddhes ca nāhaṁpratyayād ātma-siddhiḥ.*

[1059b-1060a]

यस्यानुभवसिद्धयैव सिद्धिः स्याद्घटसिद्धिवत् ॥ १०५९ ॥

ततोऽहंप्रत्ययात्सिद्धिमीक्षतेऽनुभवः कथम् ।

That whose establishment, like the establishment of pot, is through the establishment of experience—how from that cognition 'I' can experience expect its own accomplishment ?

Moreover, the cognition 'I' cannot grasp the self, because it is grasped by that, like the cognition of pot. Just as the pot-cognition which is a psychosis requires to be established by experience which is the self, so does the cognition 'I' require the self for its establishment. How can that establish the self?

NKL—*ahaṁ-pratyayo nātmasādhako dr̥śyatvāt ghaṭavat.*

[1060b-1061a]

मानादनुभवः सिद्धो जडः स्याद्घटवन्न चेत् ॥ १०६० ॥

नैरपेक्ष्यं चिदात्मत्वे स्याच्चान्योन्यसमाश्रयः ।

If experience is established through *pramāṇa*, it would be inert like pot; if not (inert), it will be independent, and the self is intelligence; also there would be reciprocal dependence.

If the 'I' cognition were to apprehend the self, the self would become inert like pot. If the self were not inert—as it is not inert—it must be admitted that it is pure consciousness, not requiring the 'I' cognition for its apprehension. And, if the self which is pure consciousness were to be apprehended by the 'I' cognition, there would be reciprocal dependence as between the two.

[1061b-1062a]

आत्मनोऽहंधियः सिद्धिरात्मसिद्धिरहंमतेः ॥ १०६१ ॥

अन्योन्याश्रयतैवं स्यादहंबुद्ध्यात्मनोर्ध्रुवम् ।

Through the self the establishment of the cognition 'I', and through the cognition 'I' the establishment of the self—thus there would surely be reciprocal dependence as between the cognition 'I' and the self.

How there would be reciprocal dependence is explained.

[1062b-1063a]

अहंधीरात्मनः कार्यं कारणेनाऽऽप्यते सदा ॥ १०६२ ॥

तया तस्य कथं व्याप्तिरव्याप्तौ मेयता कथम् ।

The cognition 'I' is an effect of the self; and it is always accomplished through the cause. How can by that (cognition 'I') the self be pervaded? If it is not so pervaded, how can the self be the object of knowledge?

The 'I' cognition is not what apprehends the self, as it is an effect of the latter, like desire.

The self is not what is apprehended by the 'I' cognition, since it illumines that; whatever illumines another is not illumined by that, even as the lamp which illumines a pot is not illumined thereby.

As the 'I' cognition does not prevade the self, the self cannot be the content thereof.

NTV—saṁvid-balād evā 'haṁ-pratyayasya sadbhāva eṣṭavyaḥ, saṁvid evā 'smākam ātmā, tasyā api saṁvidāḥ sad-bhāvo 'haṁ-pratyayād eva cet sādhyate tadā 'haṁ-pratyayā-'tmano vyāpya-vyāptṛtva-lakṣaṇa-viruddhārtha-pratipatti-darśanād vādinām iti.

NKL—ahaṁ-pratyayo nātmagrāhakaḥ tat-kāryatvāt sukhādivat..... ātmā nāhaṁ-pratyaya-vyāpyas tad-vyāpakatvād yo yad-vyāpako nāsau tad-vyāpyo yathā paṭa-vyāpakas tantur na tad-vyāpyaḥ.

[1063b-1064a]

क्रियाकाले गुणीभावात्क्रियासिद्धावसंभवात् ॥ १०६३ ॥

कर्तुः प्रमेयता न स्यादहंबुद्ध्या कथंचन ।

The agent is by no means the object known through the cognition 'I', for at the time of action he is the attribute, and when there is no action he is not established.

Moreover, is the self apprehended as the agent by the activity which is the 'I' cognition? If so, is it at the time of the act, or before, or after? It cannot be at the time of the act; for at that time the agent-self is subsidiary to the act, and therefore cannot be the object of the act. Nor is the self as agent apprehended either before or after; for either before or after there is no act, and in the absence of the act there cannot be the agent. Also, if the agent were to be the object of the act which is the 'I' cognition, it might as well be its own object which is absurd.

[1064b-1065a]

संविद्रूपे प्रमेये च संविदन्या फलं भवेत् ॥ १०६४ ॥

न च संविद्बुद्ध्याभासो नानुमेयं फलं क्वचित् ।

If consciousness be the object of knowledge, there would be another consciousness as the fruit ; but there cannot be the appearance of two consciousnesses ; nor is the fruit to be inferred by any means.

If the self which is of the nature of consciousness be the object of knowledge, then another consciousness should be admitted as the fruit of knowledge. But this is not what is experienced. In the consciousness-self there is not experienced another consciousness. Nor may it be said that although the other consciousness is not experienced, it is to be inferred; for in regard to the unconditioned self-luminous consciousness there can be no inference.

[1065b-1066a]

घटाद्याकारसंविद्वच्छ्रुद्धायामपि संविदि ॥ १०६५ ॥

संविद्विशिष्टा संवित्स्यान चासावात्मनीक्ष्यते ।

As in the case of the consciousness of the form of pot, etc., even in the case of pure consciousness there would be consciousness qualified by consciousness ; but this is not observed in the self.

The fruit-consciousness is intelligible in the case of inert objects like pot, but not in regard to pure consciousness which is the self.

[1066b-1067a]

प्रमातरि च मेये स्यात्फलं कस्येति भण्यताम् ॥ १०६६ ॥

न मातुस्तस्य मेयत्वान्नापि मेये फलं क्वचित् ।

And if the cognizer is the object of knowledge, it is to be stated, of whom is the fruit? It cannot be of the cognizer for he is the object of knowledge ; nor is there fruit anyway in the object of knowledge.

If the cognizer is the object of cognition, then for whom is the fruit which is cognition? It cannot be for the cognizer because the cognizer, you say, is the object of cognition. Nor may it be said that the fruit may belong to the cognizer as the object, even as it does to objects such as pot; for, we ask, what is this fruit—is it luminous or non-luminous? If it is luminous, it cannot belong to the non-luminous pot, etc.; if it is non-luminous, it cannot illumine pot, etc.

[1067b-1068a]

जडत्वात्तत्र मेयस्य फलं मातरि चेन्मतम् ॥ १०६७ ॥

मेयतो जडताऽत्रापि संविच्चेन्न प्रमाणजा ।

If it be thought that since pot, etc., which are objects of knowledge are inert, the fruit is in the cognizer, then since the cognizer is the object here, there would be inertness ; if there is consciousness, then, it would not be the result of *pramāṇa*.

If it be said that the fruit is not in pot, etc., because they are inert, but in the cognizer, because there is no inertness there, we reply: if the cognizer is the object of knowledge, inertness would result there also. If the self is admitted to be of the nature of consciousness, then it cannot be the result of a *pramāṇa*.

AVS—saṁvid-rūpaśced ātmā na pramāṇajā saṁvid-ātmani saṁvid-dvayādarśanād ity arthah.

[1068b-1069a]

धर्मत्वेनाप्यहंबुद्धेर्न भेदो धर्मिणाऽऽत्मना ॥ १०६८ ॥

रूपं द्रव्यात्मनो नान्यद्रसादेस्तद्विभिद्यते ।

Even as an attribute the cognition 'I' has no difference from the substance, the self; colour is not different from the substance, though it differs from taste, etc.

If the cognition 'I' be considered to be an attribute of the self, then there can be no difference between the two. Substance and attribute are not different from each other, as, for instance, a cow and a horse are. Colour cannot be different from the coloured substance. If colour appears as distinct, it is with reference to another attribute or another substance.

Thus if the 'I' cognition be an attribute of the self, then the two would be non-different, and therefore the self cannot be the object with reference to that cognition. If the two be different, then there cannot be the relation of attribute and substance as between them.

NTV—na hy ahaṁ-buddheḥ pramātuḥ ca bhedo 'sti rūpasyeva dravyāt, ataś caikasya jñāna-jñeya-rūpatvaṁ virudhyata ity arthaḥ.

[1069b-1070a]

द्रव्यादि चाऽऽत्मनो रूपं प्रमेयं यदुदीरितम् ॥ १०६९ ॥

घटवत्तदहंबुद्धेः प्रत्यग्वृत्तेर्न गोचरः ।

Substance, etc., which are stated to be the nature of the self and to be the objects of knowledge,—they are like pot, and are not the sphere of the cognition 'I' which has for its scope the inner self.

If it be said that the self as substance is the object of knowledge, and as consciousness is the cognizer, we reply: the self which as substance is regarded as the object of knowledge cannot, then, be the sphere of the 'I' cognition, because the sphere of this cognition is the inner self.

NTV—yadyat prameya-rūpaṁ tasya tasye 'daṁ-buddhi-gocaratva-niyamād dravya-rūpasyāpi 'daṁ-buddhi-gocaratvenā 'nātmatvam eve 'ti bhāvah.

[1070b-1071a]

अस्मत्प्रत्ययसंभिन्नं प्रत्यकर्तरि वेदनम् ॥ १०७० ॥

ज्ञानस्य यदुपन्यस्तं विशेषस्तत्र नेक्ष्यते ।

The apprehension, in which the cognition 'I' is mixed up, of the inner agent by knowledge as taught by you is not different (from the Bauddha position).

You reject the Bauddha view of momentary cognitions on the ground that one and the same cognition cannot be both apprehender and apprehended. But that defect would result for you also, if you were to hold that the self is of the nature of both apprehended and apprehender and that it is apprehended by the 'I' cognition.

AVS—nahi gami-kartā gami-kriyā-viṣayaḥ, ato bauddha-pakṣāt pakṣasya viśeṣam abhyupagacchatā nāhaṁpratyaya-grāhya ātme 'ty upaganta...

[1071b-1072a]

ज्ञानबोधेन नैवाऽऽत्मा मितो नाप्यात्मसंविदा ॥ १०७१ ॥

ज्ञानं न च द्वयं भेदादभेदेऽनुभवः स्वतः ।

The self is not known by the awareness of knowledge, nor knowledge by the awareness of the self; nor is knowledge twofold, for there would be difference; if there is non-difference, experience is self-established.

By the manifestation of the knowledge-element, the self, the substance-element is not manifested, since the two are different. If the self were manifested by the manifestation of the knowledge-

element, then the two would be non-different. Nor is the knowledge-element made manifest by the manifestation of the self, for the same reason. Since the two elements are differently manifested, it must be admitted that the twofold self is not established through the 'I' cognition.

If you agree that there are not two elements and that the self is one, then you must necessarily accept the view that the self which is of the nature of experience is self-established.

NTV—dravya-rūpa ātmeti naiyāyikādayaḥ, bodha-rūpa ātmeti vedāntinaḥ, dravya-bodha-rūpa ātmeti bhaṭṭamatānusārīṇaḥ, itthaṁ vādi-vipratipatti-darśanāt nāhaṁ-pratyaya-vedya ātmeti, tasmād dravya-rūpa eva vā bodha-rūpa eva vā ātmā, na dravya-bodha-rūpaḥ, tasmān mām ahaṁ jñāmi 'ti vikalpa-mātram.

[1072b-1073a]

किं प्रमाणमहंरूपमुताऽऽत्मैवेति कथ्यताम् ॥ १०७२ ॥

प्रत्यक्षत्वान्न तन्मानं नाऽऽत्मा स्वार्थजडत्वतः ।

This must be stated: Is the cognition 'I' the *pramāṇa* or is it even the self? It (the 'I' cognition) is not the *pramāṇa*, because it is directly perceived; nor the self, because of the difference between being its own end and being inert.

You hold that the self is cognized through the 'I' cognition. What is this 'I' cognition—is it a *pramāṇa*, or is it the self itself? It cannot be a *pramāṇa*, for it is directly apprehended like desire, etc., and *pramāṇa*, according to you, is what is inferred. Nor is the 'I' cognition the self, for it is other-dependent and inert whereas the self is independent and non-inert.

NTV — *natāvat pramāṇatvam ahaṁrūpasya ghaṭate icchādivat aparokṣatvāt. na hi pramāṇam aparokṣam icchanti nityānumeyatvā 'bhyupagamāt. nāpy ātmatvam ahaṁ-rūpasya parārthatvāt jadatvāc ca.*

[1073b-1074a]

न चाप्यात्मन्यविज्ञातेऽहंबुद्धेः सिद्धता तव ॥ १०७३ ॥

येनाऽऽत्मा स्यादहंबुद्धेरनुमेया हि सा स्थिता ।

When the self is not known the cognition 'I' is not established for you ; the self is not established through the cognition 'I' which is not itself known ; that (cognition 'I') is established as what is inferred.

The 'I' cognition cannot be what establishes the self, for in the absence of the manifestation of the self, it itself is not established. And, if you still insist that the 'I' cognition establishes the self, there would result the defect of reciprocal dependence. The 'I' cognition, according to you, is what is inferred on the strength of the *probans*, the manifestation of the self. This would mean that there is the 'I' cognition when the self is known; and at the same time if you hold that the 'I' cognition manifests the self, there would be reciprocal dependence.

[1074b-1075a]

निरंशस्य न चाप्यंशकल्पनाऽप्युपपद्यते ॥ १०७४ ॥

स्वात्मतन्त्रे च विषये मानबोधः सदा भवेत् ।

And, it is not proper to assume difference of parts in what is partless ; if the cognition 'I' be the object dependent on the self, there would be knowledge through *pramāṇa* always.

Admitting for the sake of argument that there is distinction of elements in the self, we showed that the 'I' cognition cannot be that which establishes the self. But the truth is that there is no distinction in the self. Twofoldness is not seen in the self; nor is there any need to assume such a distinction. Scripture declares that the self is without parts.

It is not proper to say that the self alone is the cause of the 'I' cognition; for if that be so, there should always be the 'I' cognition, which is not the case. In sleep, for instance, there is not the 'I' cognition.

NKL — niṣkalam niṣkriyam śāntam ityādi śruti-virodhāc ca nātmano rūpadvayam.

AVS—ātmana evāhaṁ-pratyaya-kāraṇatve ahaṁ-pratyayasya sadā-bhāva-prasaṅgāt.

[1075b-1076a]

अज्ञातत्वं विना मानं नाहंप्रत्यय आत्मनः ॥ १०७५ ॥

अज्ञातत्वमतो वाच्यमात्मनोऽत्र घटादिवत् ।

The cognition 'I' cannot be the *pramāṇa* in respect of the self without its being unknown; therefore as for pot, etc., unknownness must be predicated of the self.

Without recognizing unknownness in respect of the self which is the cognizer, it is not possible to show that the 'I' cognition is *pramāṇa* for the self. In order that *pramāṇa* may function in the case of the self, it must be admitted, therefore, that the self is unknown. Is this unknownness self-established, or established through some other? It cannot be the first, for that would be a self-contradiction. If it be the second, is the unknownness established through *pramāṇa*, or through the cognizer, or through the eternal experience? The unknownness cannot be established through *pramāṇa*, for that would

involve infinite regress, and also that would mean that no *pramāṇa* could remove the unknownness. Nor can the cognizer establish the unknownness, for the cognizer which is an object of knowledge, like pot, cannot establish anything.

[1076b-1077a]

तस्याप्यनुभवात्सिद्धिर्यद्युच्येत घटादिवत् ॥ १०७६ ॥

सिद्ध आत्मा पृथङ्मातुर्नो चेन्माता न सिध्यति ।

If it be said that the establishment of even that is by experience, as of pot, etc., then the self is established to be different from the cognizer; if not, the cognizer is not established.

If the third alternative, viz. that the unknownness of the cognizer is established through the eternal experience is accepted, then it must be admitted that the self which is the eternal experience is different from the cognizer. That being so, even if the cognizer be apprehended through the 'I' cognition, it does not follow that the self is so apprehended.

And, if the witness-self is not recognized as that which establishes the unknownness of the cognizer, there would be no functioning of *pramāṇa* in respect thereto, and the cognizer would not be established.

NTV—ātmani nāhaṁpratyayaḥ pramāṇam kimtu yeyam prete ityādyā śrutir eva pramāṇam ity arthaḥ.

[1077b-1078a]

प्रमाणसंश्लवोऽप्युक्तो दूरादेव निवर्तितः ॥ १०७७ ॥

अन्यत्रापि हि मानानां नैव संश्लव इष्यते ।

As for the cumulation of *pramāṇas* (being evidence for establishing the self), that has been removed far away ; even elsewhere (in the view of the logician) the cumulation of *pramāṇas* is never admitted.

So far, the view of the Bhāṭṭas that the self is apprehended through the 'I' cognition was examined and rejected; now, the Prābhākara view that the cognition of all objects is *pramāṇa* for the self is considered.

When it has been shown that even the 'I' cognition is not *pramāṇa* for the self, it goes without saying that the cognition of sound, etc., cannot establish the self.

The Naiyāyika contends that the self is not known exclusively through Scripture, as perception, inference, and Scripture are equally *pramāṇas*. But even according to the Naiyāyika, there is no cumulation of these *pramāṇas*. If, as shown already, the self is not the object of the 'I' cognition, how can it become the object of inference, etc.?

[1078b-1079a]

अज्ञातावगमे यद्वत्प्रमातर्यर्पितं फलम् ॥ १०७८ ॥

न मेये पूर्वमानेन तद्वन्मानान्तरैरपि ।

Just as the earlier *pramāṇa*, in knowing the unknown, offers the fruit to the cognizer, and not in the object of knowledge, even so should be the case with the other *pramāṇas*.

How is there the cumulation of the *pramāṇas*? Is it because each subsequent *pramāṇa* causes the fruit, viz., knowledge, in the same object? Or, is it because the knowledge so caused is for the same cognizer?

The first alternative is not possible ; for the object is inert, and knowledge cannot be caused in it. So, the *pramāṇas* in sequence bring in knowledge only in the cognizer.

AVS—meyāśritaṁ yadi phalaṁ tadā saṁplavaḥ śakyetāpi mātrāśrayaṁ jñāna-phalam atha suddhe vastuni pūrvamānavad uttara-mānānāṁ praveśān na saṁplava iti.

[1079b-1080a]

अतोऽनधिगतावेशात्सर्वेषां संप्लवः कुतः ॥ १०७९ ॥

मान्तरैरवबुद्धेऽपि ज्ञातेऽप्यज्ञाततोऽन्यतः ।

Thus, since the other *pramāṇas* relate to the unrecognized, how can there be the cumulation of all *pramāṇas* ? Even if it be known through other *pramāṇas* it would be other than that which was unknown and then known (by the previous *pramāṇas*).

Just as the earlier *pramāṇa* makes known what is unknown, the later *pramāṇas* too should do likewise. How then can there be the cumulation of *pramāṇas*?

Nor is there such cumulation because the knowledge caused is for the same cognizer; because the content of each *pramāṇa* being different, there is nothing like all the *pramāṇas* combining to produce knowledge.

[1080b-1081a]

अथाप्यवगमो मेये तथाऽपि स्यान्न संप्लवः ॥ १०८० ॥

पूर्वोऽनधिगते वृत्तः प्रत्ययोऽधिगते परः ।

Even supposing the object is understood (by these *pramāṇas*), there will be no cumulation ; the earlier

cognition took place in regard to the uncognized, the later in regard to the cognized.

Even if the fruit be admitted to occur in the object of knowledge, there is no cumulation of *pramāṇas*; for while the first *pramāṇa* makes known what is unknown, the subsequent *pramāṇas* relate to what is already known.

[1081b-1082a]

पूर्वेण निश्चिते चेत्स्यान्नोत्तरस्य प्रमाणता ॥ १०८१ ॥

तथा संदेह एकस्मादन्यस्माद्घि विनिश्चयः ।

If the object has been determined by the earlier, there will be no validity for the later ; if from the one there is re-statement, then from the other there is certitude.

If the object has been ascertained through the earlier *pramāṇa*, the later *pramāṇas* cannot be *pramāṇas*; they can only serve as restatements. Hence also there is no cumulation.

[1082b-1083a]

निःसामान्यविशेषेषु नातः संप्लव इष्यते ॥ १०८२ ॥

यथाऽन्यत्र तथेहापि वेदान्तेष्वभ्युपेयताम् ।

Therefore, in what are devoid of generality and particularity, cumulation is not admitted ; as elsewhere so here also, in the case of the *Vedāntas*, let it be admitted.

If even in the case of objects that have generality and particularity the cumulation of *pramāṇas* is not possible, how is that possible in the case of the souls which have no distinctions?

It may be said that since cumulation is possible in respect of Brahman-Ātman, the Upaniṣads are not the only *pramāṇa*. But this is not sound. If there can be no cumulation in respect of objects and souls, it goes without saying that that is not possible in the case of Brahman-Ātman. Thus it is settled that the Vedānta texts alone are *pramāṇa* here.

[1083b-1084a]

यतो मानानि सिध्यन्ति जाग्रदादित्यं तथा ॥ १०८३ ॥

भावाभावविभागश्च स ब्रह्मास्मीति बोध्यते ।

It is taught : 'I am that Brahman' from which result the *pramāṇas*, as also the three states, waking, etc., and the distinction of being and non-being.

Brahman becomes the content of other *pramāṇas* through adjuncts. The pure Brahman, however, is known through Vedānta alone.

Perception, etc., are inert, and are not self-established. They shine by virtue of the Brahman-self. How can the self be their content? Surely, colour, etc., which shine by the light of the lamp cannot make the lamp shine.

It may be asked: how can the inner self which is endowed with the states of experience, waking, etc., be identical with Brahman? The reply is: the inner self is the witness of those states, and is not, therefore, endowed with them.

Objection: How can there be identity between the dual and the non-dual? Reply: Duality is illusory; therefore, the non-dual reality is not affected thereby.

Restating the pure self which is the sense of the word 'thou', the text 'I am Brahman' declares that the same is the sense of Brahman.

*NKL—avasthātrayādi-śākṣitvād ātmanah sad-brahmatvam upapan-
nam ity arthah.*

[1084b-1086a]

यतोऽसिद्धानि सिध्यन्ति भावाभावौ यदाश्रयौ ॥ १०८४ ॥

योऽनन्यार्थो यदर्थं च सर्वं योऽनन्यदृक्सदा ।

प्रमेयादित्रयं यस्मात्परस्परविलक्षणम् ॥ १०८५ ॥

आत्मानं लभते सत्यः सौऽध्यक्षोऽलाभ्युपेयताम् ।

That whence what are non-established are established, whereon are grounded being and non-being, which is not for the sake of anything else, and for the sake of which all is—the non-different ever-seer; whence the three, object of cognition, etc., which are mutually distinct, attain their nature—let that true witness-self be admitted.

Having stated the sense of the text 'That thou art' by explaining the meaning of the term 'thou', the same is taught by expounding the meaning of 'that'.

The supreme Self is that by whose grace the inert things are established; it is that wherein the existents and non-existence stay; it is that which, Scripture declares, is of the nature of happiness; it is that which eternally shines without depending on any causal factors. With that supreme Self, the witness is identical. This is the meaning of the text.

The witness is that by virtue of which are established the mutually distinct cognizer, etc., agent, etc., and enjoyer, etc.; it is that which does not depend on anything else for its own existence; it is the unsublated immutable reality which is of the nature of pure consciousness: this witness it is not possible to deny, for it is most immediate.

NKL—dehādini jadāni yataḥ sidhyanti ajaḍātmavad ābhāsante pramātrādinām bhāvābhāvau ca yadāśrayau yadadhīnau sidhyataḥ yo 'nanyārthaḥ sarvaṁ ca yadartham iti sukha-lakṣaṇa-lakṣitatvena sukha-rūpo ya ātmā sa brahmeti tattvamādi-vākyena bodhyata ity arthaḥ.

असंकुचितचित्पद्मः प्राज्ञे स्वप्नप्रबोधवत् ॥ १०८६ ॥

तथा प्रफुल्लबोधाब्जः प्राज्ञवत्स्वप्नबोधयोः ।

As in dreams and waking, so in sleep there is the unclosed lotus of intelligence; likewise, as in sleep, so in dream and waking there is the lotus of knowledge in full bloom.

The witness-intelligence is never absent; it ever shines.

NTV—kūṭasthānubhavasya nirākaraṇaṁ na sambhavati tasyāpi nirākaraṇasyā 'nubhavād ity arthaḥ.

[1087b-1088a]

साक्ष्यसंबन्धतः साक्षी न स्वतः साक्षिताऽऽत्मनः ॥ १०८७ ॥

प्रत्यङ्मात्रैकदृष्टित्वाद्वियां वाचामगोचरः ।

It is the witness in relation to the seen; for the self there is no inherent witness-nature. Because it is of the nature of pure inner consciousness, it is not the sphere of mind and speech.

The self is said to be the witness only in relation to the objects. In itself there is not for it the witness-nature too. The witness-nature

which is a product of nescience cannot destroy the pure nature of the self which is distinctionless. The self is beyond the reach of speech and mind.

[1088b-1089a]

अस्मत्पक्षे हि कर्तव्यमविद्यामात्रकल्पितम् ॥ १०८८ ॥
तदभावान्न संसारो भूतो भावी न वर्तते ।

In our view, agency is fabricated by nescience; in its absence there is no transmigration, in the past, in the future, or in the present.

Agency, etc., are not real: they also are the products of nescience. When nescience which is the basis of all projections is destroyed through knowledge, there is no bondage at any time.

NTV—ajñānasya jñānān nivṛttau tat-kāryatvāt saṁsāropi nivartata ity arthah.

[1089b-1090a]

स्वाभाविक्यप्यविद्येयमनुभूत्याऽवभासिता ॥ १०८९ ॥
तमः सूर्योदयेनेव ज्ञानेनोत्कृत्य नाशयते ।

Though natural and manifested by experience, this nescience is destroyed, root and branch, by knowledge, as darkness at sun-rise.

Nescience is removed completely by knowledge.

NKL—brahmājñānaṁ jñāna-nivartyam ajñānatvāt śukty-ajñānavat.

[1090b-1091a]

अनादिकालमज्ञानं ज्ञानेनाऽऽदिमता क्षणात् ॥ १०९० ॥
दृश्यते नाशयमानं हि न चास्याऽऽवृत्तिरीक्ष्यते ।

The beginningless ignorance is seen to be destroyed in a moment by knowledge which has a beginning; and of this (knowledge) repetition is not required.

Knowledge destroys nescience without residue; there is no need for repetition of knowledge.

[1091b-1092a]

एवंभूतोऽप्ययं प्रत्यक्स्वात्मानुभवसंश्रयात् ॥ १०९१ ॥

व्युत्पत्तेः प्रागविज्ञातः सर्वाज्ञानादिसाक्ष्यपि ।

Though this inner self is of such nature and is the witness of all knowledge, prior to the understanding based on self-experience it is unknown.

Although the self which is the witness of all cognitions is self-luminous, it is not known through self-experience prior to the rise of true knowledge; therefore, the functioning of *pramāṇa* in respect thereof is intelligible.

[1092b-1093a]

तत्त्वमस्यादितस्तस्मादागमादेव नान्यतः ॥ १०९२ ॥

ऐकात्म्यवस्तुनः साक्षाद्व्युत्पत्तिरविचालिनी ।

Therefore, from the Scripture, 'That thou art,' etc., alone, and from nowhere else, is there the unwavering direct knowledge of the reality, the one self.

It is only the Vedāntic texts, 'That thou art', etc., that are *pramāṇa* in respect of the self. In regard to what is without adjuncts viz. the self, perception, etc., cannot serve as *pramāṇas*. The immediate knowledge that results from the Vedāntic texts destroys all bondage along with its cause and yields the fruit of non-return to *samsāra*.

NKL — yasmāt tattvamādi-vākya-janya-jñānāt prāg ajñātatvaṁ tasmād aupaniṣadatvaṁ siddham.

[1093b-1094a]

तस्यास्य कर्मकाण्डेन सम्बन्ध इति यः पुरा ॥ १०९३ ॥

प्रश्नस्तन्निर्णयार्थाय, सर्वथेत्यादिरुत्तरः ।

The previous question ‘Of that this is the relation to the ritual section’,—for the sake of settling that the reply is stated in ‘By all means,’ etc.

The commentary thus explains the relation between the two sections of the Veda: through the performance of the Vedic duties one gets one’s mind purified and develops a sense of detachment, etc., which pave the way for the rise of knowledge.

AVS—karmataḥ suddha-satvasya vairāgyādi-paramparayā jñānot-pattiḥ sambandhaḥ.

[1094b-1095a]

ननु सिद्धे यथोक्तार्थे नाऽऽस्मिन् हेतुरीक्ष्यते ॥ १०९४ ॥

कृत्स्नप्रयोजनावाप्तेः पूर्वोक्तैरेव कर्मभिः ।

“Now, since the object (goal) has been accomplished as stated above, there is no reason for commencing (the Vedānta); for by the aforesaid rituals the entire fruit has been obtained.”

Pūrvapakṣa—If the *karma-kāṇḍa* teaches the means to the human goal, where is the need to commence the *jñāna-kāṇḍa*? As the goal in its completeness can be gained by the performance of the duties enjoined in the *karma-kāṇḍa* the Vedānta is of no use whatsoever.

[1095b-1096a]

नैतदेवं सुखेप्साया जिहासायाश्च दुःखतः ॥ १०९५ ॥

निदानस्यानिषिद्धत्वात्पूर्वोक्तैः कर्मभिः पुरा ।

It is not so ; for the cause of the desire for happiness and for avoiding misery has not been removed earlier by the aforesaid rituals.

Siddhānta—The cause of all evil is ignorance. This is not destroyed through works, for they are not opposed to ignorance. It is only knowledge that can destroy ignorance. The commencement of Vedānta is thus intelligible, as it is required for the sake of gaining knowledge.

[1096b-1097a]

निःशेषाह्लादसंप्राप्तिः सर्वानर्थानुतिस्तथा ॥ १०९६ ॥

सर्वेषां प्राणिनामेतत्स्वत इष्टं प्रयोजनम् ।

The attainment of happiness without residue and the avoidance of all evil—this is the natural aim desired by all beings.

All beings desire plenary happiness and freedom from misery.

[1097b-1098a]

आत्मनस्तत्त्वमेतच्च सिद्धं चैतन्यवद्यतः ॥ १०९७ ॥

अथैष यो वै भूमेतिश्रुतिमानानुभूतिः ।

That this is the true nature of the self is established, like intelligence, from Scriptural texts like ‘This which is the supreme bliss,’¹ ‘That which is great,’² etc., from inference and from experience.

The twofold fruit which is desired by all is the very nature of the self, and is eternally accomplished. The desire to gain it is, therefore, born of ignorance, which is responsible for all *karmas*. The statement that the goal is to be attained is but figurative.

Scriptural texts are quoted as evidence. There is also the inference: the self is happiness, as it is the supreme object of love like pot. The experience of sleep too is *pramāṇa* for understanding the truth that the self is of the nature of happiness and the absence of misery.

1. *BU*, IV, iii, 32. 2. *CHU*, VII, xxiii, 1.

NKL—*prāpte icchāyā vastuto 'nupapatter ajñānād eva icchatīty arthaḥ.*

AVS—*sarvaprāṇibhir iṣṭobhaya-vidha-prayojanasyā 'tmasvarūpatvena prāptatvāt prāpte cecchāyogād ajñānam evecchākāraṇam karmādi nimittakāraṇam iti.*

[1098b-1099a]

स्वर्गशब्दाभिधश्चायं पुमर्थो यो यथोदितः ॥ १०९८ ॥

स्वर्गमित्यादिभिर्वाक्यैस्त्रयन्तेष्वपि गीयते ।

That which is declared as the human goal by the term '*svarga*,' is also declared in the *Vedānta* by the texts '*svargam*,'¹ etc.

The term *svarga* which is employed in the Veda to indicate the human goal signifies the self.

An Upaniṣadic text where there is such usage is cited.

1. *CHU*, VIII, iii, 3.

[1099b-1100a]

स्वर्गं पुमर्थमुद्दिश्य सर्वप्राणभृतामियम् ॥ १०९९ ॥

वाङ्मनः कायचेष्टा स्याद्याऽपि तत्साधनोपगा ।

“Having *svarga*, the human goal, as the aim, whatever vocal, mental and physical activity of all living beings is there—that is the means.”

Pūrvapakṣa—If *svarga* be the human goal, it is gained through works alone; for the Veda teaches the performance of sacrifices for the sake of that. That being so, the commencement of Vedānta is futile.

[1100b-1101a]

उत्पत्त्याद्यर्थनिष्ठानां सर्वेषामपि कर्मणाम् ॥ ११०० ॥

स्वर्गे नैवाधिकारोऽस्ति तस्य सिद्धत्वतः स्वतः ।

Of the various *karmas* which have as their aim origination, etc., there is no application to *svarga*; for that is self-established.

Siddhānta—Works can bring about origination, attainment, modification, and purification. They have no function in regard to the self which is immutable, eternal and unexcellable bliss. This, we have seen, is the true *svarga*, which is self-established, and, therefore, does not require to be accomplished. Works have use only in regard to the pseudo-*svarga* which is non-eternal.

NKL—*karmanām svargābhāsa-sādhakatvaṁ na mukhya-svarga-sādhakatvam.*

[1101b-1102a]

स्वात्मसाध्यातिरेकेण सर्वमेव हि साधनम् ॥ ११०१ ॥

नालं साध्यान्तरायेह किम्बसाध्यार्थसिद्धये ।

No means is capable of accomplishing another object beyond its own end; what to speak of accomplishing an end which cannot be accomplished?

A means can accomplish only the end that is appropriate to it, and not some other end. It goes without saying, therefore, that no means functions in relation to what is not accomplished, viz. the true *svarga*.

[1102b-1103a]

यथोक्तपुरुषार्थस्य यद्यप्याप्तस्वभावता ॥ ११०२ ॥

आत्मस्वभावतो नाऽऽप्तिस्तथाऽप्यज्ञानहेतुतः ।

Though the aforesaid human end is of the nature of the attained, since it is of the nature of self, yet it is not attained because of ignorance.

Although the self which is the true *svarga*, the human goal, is what is eternally accomplished, it seems to be unaccomplished because of ignorance. Hence the need for Vedānta.

[1103b-1104a]

अविद्याव्यवधानस्य नाऽऽत्मज्ञानातिरेकतः ॥ ११०३ ॥

प्रध्वस्तिः कर्मभिः कर्तुं शक्या तेषाममानतः ।

Except by self-knowledge, the interposition of nescience cannot be destroyed by *karmas*, since they are not *pramāṇas*.

Since what makes the self unattained, as it were, is nescience, what is required to remove nescience is knowledge, and not works.

[1104b-1105a]

व्यञ्जकं विरहय्यान्यत्साधनं कारकात्मकम् ॥ ११०४ ॥

तदभिव्यक्तये नालं स्वतःसिद्धस्य वस्तुनः ।

For manifesting a self-established reality, other than a manifestor, a means which is of the nature of producer (*kāraka*) is not fit.

What is required in the case of the self that is veiled by nescience is a manifestor, viz. knowledge, not a producer like *karma*.

[1105b-1106]

कर्मभिर्नर्पिनीतोऽतः प्रत्यङ्मोहोऽप्रमाणतः ॥ ११०५ ॥

यावच्च सम्यग्विज्ञानवह्निनाऽसौ न दह्यते ।

न तावत्किञ्चिदप्याप्तं सुखं दुःखविवर्जितम् ॥ ११०६ ॥

Therefore, the delusion about the inner self is not removed by *karmas*, since they are not *pramāṇas*. As long as this is not burnt by the fire of true knowledge, so long happiness free from sorrow is not attained.

Release, which consists of the attainment of happiness and the removal of sorrow, results only when ignorance is destroyed through knowledge.

[1107]

नालं विमुक्तये काम्यं यदि नाम तथाऽपि तु ।

पुंसो वैराग्यहेतुत्वादुपकार्येव तन्मतम् ॥ ११०७ ॥

Even though the optional (and obligatory rites) are not sufficient for (effecting) release, they are to be regarded as helpful in that they cause non-attachment in man.

Although *karmas* are not the direct means to release, they are helpful in that they purify the mind.

[1108-1109]

असह्यदुःखफलतः स्वकार्यविनिवृत्तिकृत् ।

विरक्तिहेतुतः कर्मप्रतिषिद्धं यथा तथा ॥ ११०८ ॥

अपि काम्यं कृतं सर्वं दुःखात्मकफलत्वतः ।

आविरिञ्च्यात्स्वकार्येभ्यः स्यादेव विनिवृत्तये ॥ ११०९ ॥

Just as the prohibited act causes non-attachment by making one turn away from itself because it results in unbearable misery, so also, since all optional rite yields fruit which is of the nature of misery, it makes for driving one away from its effects including attainment of the world of Brahmā.

Even as the knowledge of the evil effects of prohibited acts makes one turn away from them, the knowledge of the fact that optional rites are responsible for the continuance of transmigration creates non-attachment and paves the way for the dawn of wisdom through study, etc., which results in release.

NKL—garbhavāsādi-phalatvāt kāmyam api puṁso vairāgya-kāraṇam.

[1110]

इत्युक्तप्रतिपत्त्यर्थमाजगामोत्तरं वचः ।

एकवाक्यत्वमेवं च वेदस्य स्यादसशयम् ॥ १११० ॥

In order to teach what has been stated above, the words that follow came from the commentator. Thus without doubt, there will be syntactical unity for the Veda.

The commentary thus teaches that true knowledge alone is the means to *mokṣa*, and not works; the latter, however, are helpful indirectly through purifying the mind, etc.

In this manner the syntactical unity of the two *kāṇḍas* should be understood.

[1111]

दक्षिणोदगधोगत्या प्रत्यगज्ञानमूढधीः ।

बम्भ्रमीत्यनिशं दुःखी पुमान्कर्मपुरःसरः ॥ ११११ ॥

The man who goes after rituals, whose intellect is clouded by the ignorance of the self, and who is sorrow-stricken, wanders eternally by the southern, northern and downward paths.

The ignorant person who does not know the self performs *karmas* and reaps the consequences thereof which constitute *samsāra*.

[1112]

काम्यैर्दक्षिणमन्वेति ज्ञानयुक्तैस्तथोत्तरम् ।

निषिद्धैश्चाप्यधोजन्म कर्मसंभारसंभृतः ॥ १११२ ॥

He who is laden with the burden of ritual goes to the southern path by optional rites, to the northern path by those rites combined with meditation, and to low birth by prohibited acts.

By performing the optional rites one goes along the southern path, the path of the manes characterized by smoke, etc. By a combination of works with meditation one goes along the northern path, the path of the gods characterized by light, etc. By doing the prohibited deeds, one is reborn in the lower species.

[1113-1114a]

धर्माधर्मांशसाम्ये च मनुष्यत्वं प्रपद्यते ।

ब्रह्माद्या स्थावरान्तैवं प्रत्यगज्ञानहेतुजा ॥ १११३ ॥

नामरूपेहचिन्ताऽऽद्या स्वप्नमायेन्द्रजालवत् ।

When there is equality of merit and demerit, he attains the state of man. Thus the primeval transmigration (of beings) from Brahmā down to stationary objects, which is variegated on account of name, form, and action, is born of the ignorance of the self, like dream, delusion and magic.

When merit and demerit are equal, one is reborn as a human being.

Thus the variegated transmigratory tract is the result of ignorance.

[1114b-1115]

धर्माधर्माद्युपादानसाधना नश्वरी गतिः ॥ १११४ ॥

व्याकृतं नामरूपाभ्यां यद्यपीदं श्रुतौ श्रुतम् ।

आत्मतत्त्वानभिव्यक्तेर्नाभिव्यक्तं तदुच्यते ॥ १११५ ॥

This perishable process is brought about by the performance of good and bad deeds. Though it is declared in Scripture that the world is made manifest through name and form, it is said to be unmanifest because the truth of the self is unmanifest.

The aforementioned threefold fruit of *karma* is what makes for evil, since it is the product of nescience.

If it be said that *samsāra* cannot be illusory because it is established through perception, etc., we reply: no. The reality of the world is the self, for the world is a superimposition thereon. When the self is unmanifest, the world seems to be manifested through perception, etc. But in truth, the world is unmanifest, and its illusoriness cannot be disproved.

NKL—vimatam anityam karma-phalatvāt ghaṭavat.

[1116]

अविद्यातिमिरोच्छित्तौ नानाविष्कृतमण्वपि ।

कार्यकारणवद्वस्तु नानपास्तं तमोऽप्यतः ॥ १११६ ॥

When the darkness of nescience is destroyed, not even an atom, whether cause or effect, remains unmanifested, for the darkness has been removed from this (knowledge of self).

When the self is manifest, everything is manifest. It is only the ignorance of the self that conceals the truth. When ignorance is removed, truth is revealed.

NKL—tattva-sākṣātkāre vidvān sarvajñāḥ syād ity arthaḥ.

[1117]

यत एवमतः प्रत्यग्याथात्म्यप्रतिपत्तये ।

प्रारब्धेयं प्रयत्नेन वेदान्तोपनिषत्परा ॥ १११७ ॥

Because this is so, for the sake of understanding the truth about the inner self, this supreme Vedānto-paniṣad (viz. the *Bṛhadāraṇyaka*) is begun with care.

When the self is known, all human ends are achieved ; when the self is unknown every evil results. Therefore, in order that there

may be self-knowledge, the Upaniṣad is commenced for the sake of the eligible person who is endowed with the fourfold qualification.

NKL.—upaniṣatpadasya vidyāyām mukhyatvād vedāntopaniṣad iti viśeṣaṇam.

AVS—yata ātmani jñāte sakalapuruṣārthāhvāptir ajñāte ca sarvānarthāhvāptir ata ātmajñānārthatvena yathoktādhikāriṇaṁ prati vedāntopaniṣad ārabhyata iti.

[1118]

यथोक्तफलसिद्धयर्थमारब्धोपनिषद्यदि ।

ब्रह्म वा इदमित्यादि कस्मान्नाऽऽरभ्यतेऽधुना ॥ १११८ ॥

“If the Upaniṣad is begun for the sake of accomplishing the said fruit, why is it not now begun thus : ‘Brahman, verily, thus,’ etc.?”

Objection—If the Upaniṣad is commenced for the sake of imparting Brahman-knowledge, it must begin with an exposition of the nature of Brahman; but, here, the *Bṛhadāraṇyaka* starts with the topic of the *Aśvamedha*.

[1119]

येषामनधिकारोऽत्र ह्यश्वमेधकृतौ भवेत् ।

इत एव तु विज्ञानात्तेषां तत्फलकीर्तनम् ॥ १११९ ॥

For those who are not eligible for the *Aśvamedha*-rite, it is declared here that the fruit results even from the knowledge (i.e. meditation on it).

Reply—The commencement relates to *upāsanā*. Those who are not eligible for performing the *Aśvamedha* may gain its fruit through meditation.

कर्मगोचरतैवात्र विज्ञानस्यापि चेन्मतम् ।

विकल्पश्रवणान्मैवं कर्मणा विद्ययाऽथवा ॥ ११२० ॥

If it be said that this meditation is included in the ritual, not so, for these are declared to be alternatives thus, 'Through the ritual, or through the meditation.'

The meditation is not a part of the ritual; for it is declared that the fruit may be gained *either* through the ritual *or* through the meditation.

यजते योऽश्वमेधेन यश्चैवं वेद तं क्रतुम् ।

फलं तुल्यं तयोर्युक्तं कर्मिणो विदुषस्तथा ॥ ११२१ ॥

He who sacrifices with the *Aśvamedha* and he who knows that rite thus—it is proper that the fruit is the same for both the man who performs the rite and the man who knows.

The fruit is the same for him who performs the *Aśvamedha* sacrifice and for him who knows its significance and meditates.

उपास्तेरपि कर्मत्वादश्वमेधक्रतोरिव ।

नातो धियोऽर्थवादत्वं तद्विधोर्नितरां न च ॥ ११२२ ॥

Because the meditation is also a *karma* like the *Aśvamedha* rite, the knowledge (*phala-śruti*) is not an *arthavāda*; still less is the injunction thereof.

The declaration of fruit in the case of the meditation is not an *arthavāda*; for the meditation, like the rite, is an act. Nor is the meditation an auxiliary to the sacrifice; for option is declared as between the sacrifice and the meditation.

[1123-1124a]

एतावदेव चेदत्र भवतैवं विवक्षितम् ।

प्रयोजनं तत्सुकरं विध्युद्देशेऽपि भाषितुम् ॥ ११२३ ॥

विद्याप्रकरणे तस्य त्वाम्नायः किमितीर्यताम् ।

“ If this much alone is thus intended by you here, that result can easily be said to come about even if it were taught in the context of injunction ; say, why it is then declared by the Scripture in the context of knowledge ? ”

Objection—You say that the meditation on *Aśvamedha* is for the sake of gaining the human goal, and not for the sake of accomplishing the sacrifice, and that it is taught for the benefit of those who are not eligible to perform the sacrifice. Granting that it is so, why should the meditation find a place in the *jñāna-kāṇḍa* and not in the *karma-kāṇḍa*?

[1124b-1125a]

सौऽपि ज्ञानेन संयुक्तो ह्यमेधो महाक्रतुः ॥ ११२४ ॥

संसारफल एवेति प्रवृत्त्यङ्गतयोच्यते ।

Even that great sacrifice, *Aśvamedha*, combined with meditation results only in *samsāra*. This is stated so that there may be incentive to begin (the study of Vedānta).

Reply—Of all the sacrifices, the *Asvamedha* is the greatest. Even as combined with meditation, it yields only a perishable result. This is declared at the commencement of the Upaniṣad so that the need for self-knowledge may be realized.

In Ānandagiri's gloss there occurs the following line: *ucyate 'śeṣayajñānām kraturād eṣa ucyate*. This seems to be a part of the *Vārtika*. *AVS* puts it between 1124a and 1124b.

[1125b-1126]

प्रत्यग्बोधातिरेकेण साधनान्तरनिःस्पृहाः ॥ ११२५ ॥

निर्ज्ञाताशेषकर्मोत्थफलफल्गुत्वबुद्ध्यः ।

मुमुक्षवः प्रवर्तेरन्कथं नामाऽऽत्मवेदने ॥ ११२६ ॥

Those who have no attachment to means other than the knowledge of the inner self, those who know the vanity of the fruit resulting from the entire host of *karmas*—how would those who desire release be active in respect of knowing the self (is declared by Scripture).

The declaration of the fact that even the *Asvamedha* results only in *samsāra* helps him who seeks release turn away from rituals.

He who realizes the smallness of the fruit of sacrifices cultivates the fourfold means which equip him for acquiring *jñāna*; renouncing all works, he engages himself in *śravaṇa*, etc. It is to teach this that the Upaniṣad begins with a discourse on *Asvamedha*-meditation.

[1127]

संसारफलता काममस्तु काम्यस्य कर्मणः ।

नित्यानामफलत्वात्तु मुक्तिरेवास्तु तत्फलम् ॥ ११२७ ॥

“Let *samsāra* be the fruit, as you please, of the optional rites ; of the obligatory rites, however, since there is no fruit, let release alone be the fruit.”

Objection—It is only the optional rites that result in *samsāra* ; the obligatory and occasioned rites are not said to yield any particular fruit. So, let us take release to be their fruit.

[1128]

नह्युत्सर्गेण सर्वेषां फलवत्त्वस्य संश्रवात् ।

कर्मणा पितृलोकादि नित्यानामेव तत्फलम् ॥ ११२८ ॥

No ; because all *karmas* are declared to bear fruit ; in “By *kurma* the world of the manes, etc.,” that fruit (is declared) of the obligatory rites alone.

Reply—There cannot be any *karma* without a fruit. Scripture declares that the fruit of obligatory rites is the world of the manes.

NKL—*nityakarma samsāra-phalaṁ bāhyakarmatvāt kāmya-karmavat.*

[1129]

फलवत्त्वे हि नित्यानां काम्यत्वमिति चेन्मतम् ।

नैवं शुद्धिप्रमाणत्वाद्भोगनिष्ठस्य काम्यता ॥ ११२९ ॥

If it be thought that since the obligatory rites have fruit they will become optional, not so ; for their principal aim is purification, while optional rites have as their aim enjoyment.

Although the obligatory rites too have a fruit, they are distinct from the optional rites in that their main element is not enjoyment, as it is in the case of the latter, but the elimination of demerit or sin.

NKL—*phalavatvepi pāpakṣaya-pradhānam nityam bhogapradhānam kāmiam iti vibhāgaḥ.*

[1130]

काम्येऽपि शुद्धिरस्त्येव भोगसिद्ध्यर्थमेव सा ।

विङ्गराहादिदेहेन न ह्येन्द्रं मुज्यते फलम् ॥ ११३० ॥

Even in the case of optional rites there is purification, but that is for the sake of accomplishing enjoyment; the fruit of the status of Indra, indeed, is not enjoyed through the body of a hog, etc.

It is true that even the optional rites purify; but this purification is for the sake of procuring fitness for enjoying their fruit. For instance, one cannot enjoy the pleasures of the world of Indra with the body of a hog. That requires a divine body which can come to one only after purification.

The purification that is effected by the obligatory rites, however, is of a different order. It helps in the acquisition of knowledge.

[1131]

नित्येषु शुद्धेः प्राधान्याद्भोगोऽप्यप्रतिबन्धकः ।

भोगं भङ्गुरमीक्षन्ते बुद्धिशुद्ध्यनुरोधतः ॥ ११३१ ॥

Because in obligatory rites purification is the principal, even enjoyment is not an obstacle; enjoyment is considered to be perishable in accordance with the purification of the intellect.

Although the obligatory rites yield their fruit which is enjoyment in the world of the manes, etc., this enjoyment does not serve as an obstacle, for purification is the principal element here. In

fact, the purification creates a sense of non-attachment to enjoyment, through facilitating the rise of discrimination.

[1132]

तमेतमित्यतश्चोच्चैर्वेदानुवचनादिना ।

विरक्ताः सर्वसंसाराज्जिज्ञासन्ते परं पदम् ॥ ११३२ ॥

Therefore, through hearing the texts, "This self through reciting the Veda,"¹ etc., they become deeply non-attached to the entire *samsāra* and seek to know the supreme goal.

They, whose mind has been purified through the performance of the obligatory rites, become non-attached to *samsāra*, get endowed with virtues such as calmness, etc., and pursue the path of inquiry into the nature of Brahman.

1. BU, IV, iv, 22.

[1133]

आरादेवोपकुर्वन्ति नित्यान्यात्मविशुद्धितः ।

आत्माज्ञानाविरोधित्वात्साक्षान्न त्वात्मबोधवत् ॥ ११३३ ॥

The obligatory rites help through purifying the mind while being remote ; because they are not opposed to ignorance of the self, they are not the direct means, like self-knowledge.

The obligatory rites are remote auxiliaries ; they do not constitute the direct means to release because they cannot destroy ignorance. The direct means is knowledge.

[1134]

त्यक्त्वा कर्मण्यतोऽसङ्गाः प्रत्यक्प्रवणबुद्धयः ।

अपास्तरागादिमला ईक्षन्ते ज्ञं स्वमात्मनि ॥ ११३४ ॥

Renouncing *karmas* and thereby being non-attached, being devoted, in their minds, to the inner self, and leaving off the impurities like passion, etc., they see pure consciousness (i.e. the self) in themselves.

They, whose minds have been purified through the performance of the obligatory rites, acquire the eligibility for *śravaṇa*, etc. Being non-attached, they renounce all works. Renunciation of works without non-attachment is no good at all. They who are non-attached and have renounced become endowed with calmness, etc., and gain the intuition of the inner immutable self.

[1135-1136a]

अतोऽशेषमहानर्थहेत्वात्माज्ञानहानिकृत् ।

प्रत्यग्याथात्म्याविज्ञानभास्करोदयहेतवे ॥ ११३५ ॥

आरब्धेयं प्रयत्नेन वेदान्तोपनिषत्परा ।

Therefore is begun, with care, this supreme *Vedāntopaniṣad*, which will destroy the ignorance of self, the cause of the entire great evil, so that the sun of the true knowledge of self may rise.

As the knowledge of the truth alone is the means to release, the Upaniṣad is begun for the sake of that. It is true that the meaning of the Upaniṣad is difficult to grasp. With a view to making the meaning clear, the commentary has been written.

NKL—evam kaivalyasya dhīmātra-phalātve saty ātmāvidyā-nivartaka-jñāna-janmane vedāntārambhe nigamayati.....vijñāna-bhāskarodayo hetur ajñāna-nivṛttes tadartham ity arthah.

*AVS—yato jñānameva kaivalya-sāadhanam ato jñānārthatveno-
'paniṣad ārabhyata iti.*

[1136b-1137a]

शतानि दश चैकं च चत्वारिंशत्तथाऽष्ट च ॥ ११३६ ॥

श्लोकाः संबन्धभाष्येऽस्मिन्संङ्ख्याताः संख्ययाऽखिलाः ।

The verses of this *Sambandha-bhāṣya* are altogether one thousand and one hundred and forty eight in number.

Including the half verse mentioned in the note to verse 1124b-1125a, and omitting the present verse which is not part of the *Vartika*, the actual number of verses in the extant text is one thousand one hundred and thirty-six.

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

(BUBV 1.1)

Aśvabrāhmaṇa

तत्राश्वविषयं तावदादौ दर्शनमुच्यते ॥

प्राजापत्यत्वहेतोश्चाप्यश्वनामाङ्कितत्वतः ॥ १ ॥

To begin with, there is in the beginning of the Upaniṣad discussed (lit. mentioned) the worship (lit. seeing¹) which has the horse as its object, because it is the means, firstly, for being the means to obtain the nature (or the status) of Prajāpati² and, secondly, because it is marked by the name 'a horse'. [1]

¹This refers to the Upāsanā connected with a horse, viz. the Aśvamedha sacrifice, and consequently with Fire in its various forms which are mentioned in the last portions of BUBV 1.2. Cf. also BUBV 1.2.1 ; 220.

²This is a reference to the first manifest form, the most minute one, of the Brahman, viz. Hiraṇyagarbha, which is discussed in BUBV 1.2 at length.

अश्वस्य यच्छिरः साक्षात्तदुषा इति चिन्तयेत् ॥

हरेरवयवेष्वेवं योज्याः कालादिदृष्टयः ॥ २ ॥

[This gives the meaning of the Upaniṣadic sentence *uṣā vā aśvasya śiraḥ* (BU 1.2.1). The second line explains the BU sentence *sūryaś cakṣur...*]

One should think (i.e. meditate on) that what is (i.e. knows as) the head of a horse¹ is the directly perceptible Uṣas. (Thus) should one² entertain (further) the notions of *kāla* etc.³ in respect of the (different) limbs of the horse (of the sacrifice). [2]

¹The horse refers to the horse of the Aśvamedha sacrifice.

²It is known in the Upaniṣad that while getting to know the Brahman one has first to understand some manifest object as the Brahman and later does one gradually come to realize the nature of the nameless, formless, qualityless Brahman. Therefore, there is in the beginning mention made of the worship of some object, e.g. Aśvamedha etc., which is to be connected with the knowledge of the Brahman (*jñānakarmasamuccaya*). Cf. BUBV 1.3.1-3; BS 4.1.6. Read: *utkr̥ṣṭadr̥ṣṭir hīne syāt*—BVS p. 181, verse 19. Also BSB 4.1.5: *brahmadr̥ṣṭir evādityādiṣu syāt—kasmāt[utkarṣāt]evam utkarṣeṇādityādayo dr̥ṣṭā bhavanti*.

³The word 'etc.' refers to other aspects connected with the Aśvamedha sacrifice.

संस्कार्यत्वात्पशोरेवं दृष्टीरङ्गेषु योजयेत् ॥
कालादावमखाङ्गत्वान्नाश्वदृष्टिर्विधित्स्यते ॥ ३ ॥

Since the animal (viz. horse) is to be sanctified (for the performance), one should entertain such notions (as *kāla* etc.) in respect of its (different) limbs. (However) since *kāla* etc. are not the parts of the sacrifice, therefore entertaining the notion of them as a horse (or its limbs) is not sought to be prescribed (by the Śruti).¹ [3]

¹Such notion is set aside by BS 4.1.6: *ādityādimatayaś cāṅga upapatteḥ*.

सत्स्वश्वादिषु कालादिदृष्टीरङ्गेषु योजयेत् ॥
असत्स्वात्मानमेवाश्वं कल्पयित्वा नियोजयेत् ॥ ४ ॥

One should entertain the notions of *kāla* etc. in respect of the limbs of the horse (of the sacrifice) when the horse etc. are present (i.e. actually connected with the ritual¹). But when there is no presence of a horse and its limbs² one should entertain (the notions) only after imagining one's own body³ as that of a horse. [4]

¹SP points out that this has a reference to the performance of the Aśvamedha by one who is entitled to undertake it.

²This is in respect of one who is not entitled to the performance of the sacrifice.

³The word *ātman* refers to the body (SP). Read BVS p. 181, verse 18:

*upāsanasya svātantryāt karmānadhikṛto 'pi ca/
manasā kalpayitvāśvam virāḍrūpeṇa cintayet||*

कर्तारमश्वमेधिनं च चित्तं सर्वं प्रजापतिम् ॥

अश्वमेधफलं चार्कं वेत्ति मृत्युं यथोदितम् ॥ ५ ॥

अकर्ताऽप्यश्वमेधस्य ब्राह्मणश्चेह बुद्धिमान् ॥

ऋत्वात्मा मृत्युरस्मीति तादात्म्यं सोऽधिगच्छति ॥ ६ ॥

And the wise Brāhmaṇa¹, even though a non-performer of the Aśvamedha, who knows about the performance of the sacrifice, the horse and the fire which is to be collected (from whatever house of (a fire worshiper)—all (this) as Prajāpati, Arka, the result of the (performance of the) Aśvamedha sacrifice), and Mṛtyu as stated (in the later portion of the text) secures oneness with him (Mṛtyu or the Sūtrātman)² on (knowing) 'I am the soul of the sacrifice, Mṛtyu'. [5-6]

¹Brāhmaṇa indicates Kṣatriya and Vaiśya who also are eligible for the performance of the Aśvamedha.

²SP refers to the view that entertaining the various notions which are considered as the objects of different Upāsanās would bring in here a *vākyabheda* 'prescription of more things than one by only one sentence' and then it points out that since these (so called Upāsanās) have but one result and not various results, there is no *vākyabheda*; all these notions go to form but one Upāsanā.

अश्वसंज्ञपनात्पूर्वं तथोर्ध्वं चापि हाटक-

राजतात्मकपात्राभ्यां गृह्येते तत्र यौ ग्रहौ ॥

महिमाख्यौ तयोरेतदहर्वा इति दर्शनम् ॥ ७ ॥

The sentence in the Śruti (lit. in what is heard text) *ahar vā...* has a reference to the two cups (in the performance of the

Aśvamedha sacrifice containing the offering material), one made of gold and the other of silver, which are taken¹ before and after molesting the horse in the sacrifice, and called Mahiman. [7]

¹Read SP: *graho havaniyadravyayuktapātraviśeṣaḥ|taylor graho mantrasamiskṛtayor upādānam|* (*graho* is *grahaṇam* 'drinking (from it)')

व्यत्ययेनावबोद्धव्या प्रथमार्थे च सप्तमी ॥ ८ ॥

समुद्र ईश्वरो ज्ञेयो योनिः कारणमुच्यते ॥

सर्वस्य जगतो यस्मादीश एवेह कारणम् ॥ ९ ॥

(In the sentence *samudra eva*) the locative case is to be understood by interchange for the nominative [8]
(thus giving rise to the sense:) 'Let the sea¹ be known as the Lord.' The word *yonī* is used here for (conveying the sense:) the source or cause. (This is so) because the Lord himself is, for this Śāstra, the source of all (the universe). [9]

¹SP gives the derivation of *samudra* thus: *samutpadya bhūtāni dravanty asminn iti*. Incidentally, after explaining the meaning of *yonī* 'source', SP adds: *bandhuśabdasyāpy ayam evārthaḥ| tatra* (i) *yonitvam utpādakatvam* (ii) *bandhutvam sthāpakatvam* (iii) *samudrātā vilāpakatvam iti bhedaḥ|* He thus refers to *utpatti*, *sthi* and *pralaya*. Cf. BS 1.1.2: *janmādy asya yataḥ|*

|| iti prathamādhyāyasya prathamam aśvabrāhmaṇam samāptam||

BRHADĀRANYAKOPANIṢAD- BHĀṢYA-VĀRTIKA

(BUBV 1.2)

Aśvamedha Brāhmaṇa

अथाग्नेरुच्यते जन्म ह्यमेधोपयोगिनः ॥

तद्दर्शनविधित्सायै स्तुत्यर्थोत्पत्तिरिष्यते ॥ १ ॥

Now is stated the origination of fire which is useful for (the performance etc. of) the Aśvamedha. (Then) with the intention to prescribe the worship (lit. seeing) of it, it is desired (to state) its origination for the sake of praise. [1]

After stating the Upāsana 'worship' connected with the Aśvamedha and particularly the two Mahimāgrahas, the text now states about the worship of fire; cf. SP 1.1.1 and BUBV 1.2.220 below. The philosophical purpose is pointed out here. The words of the BU *naiveha*...do not have any reference to fire, yet it indicates the worship of fire. We do not take fire in the sense of the element. What is meant is the fire used for the performance of the Homa. Read SP: *agnidarśanasya vidhātum iṣṭasya vidhyartham agnistutiphālā tadutpattir iṣṭā*/śuddhajanmatvād utkr̥ṣṭatvenāyam upāsyo rājādivad ity arthaḥ/

नामवद्रूपवच्चेह कारणं यावदीक्ष्यते ॥

नाभूत्तत्प्राक्समुत्पत्तेः प्राणाद्युत्पत्तिसंश्रवात् ॥ २ ॥

(Verses 2-5 are an objector's view on the non-existence of both the cause and the effect. Verses 2 and 5 are the opinion of the Śūnyavādin and verses 3 and 4, of the Asatkāryavādin.)

Whatever is here accepted (lit. thought) as the cause has a name and a form. (But that) did not exist before its origi-

nation, (this we say) since there is a mention (in the Śruti) of the origin of Prāṇa etc.¹ [2]

Here the Śūnyavādin, who holds that there is total absence of any cause and its effect, argues that the Śruti says: 'Prāṇa was born', cf. verse 142 below. This means that it was not existent before for the reason that formerly the cause and the effect were not existent.

¹SP: *prāṇaḥ sūkṣmaḥ prapañcaḥ/ādisabdaḥ sthūlaprapañcārthaḥ/*

कार्यमुत्पत्तिमत्त्वाच्चेत्प्रागुत्पत्तेर्निषिध्यते ॥

कारणस्य त्वनुत्पत्तेरनिषेधस्तथा सति ॥ ३ ॥

[Verses 3 and 4 are views of the Asatkāryavādin and verse 5 makes an answer to these two by the Śūnyavādin.]

If, on account of its having origination, an effect is rejected (as existing) before its origination, then the cause could not be rejected just because it has not originated. [3]

A view of another Pūrvapakṣin, who is Asatkāryavādin—a follower of Kaṇāda—is stated in this verse. He holds that the cause and the effect both did not exist before the creation of the effect; only the cause existed; this points to the purposelessness of the Śruti statement: *naiveha...*; cf. SP: *siddhasādhyatvenāsatkāryavādī dūṣayati*. According to this Pūrvapakṣin, Agni's origination is acceptable, because it did not exist before. However, its cause did exist, since its origination has not been mentioned.

तथा चानुपलब्धेश्च कार्यस्यैवास्तु नास्तिता ॥

कारणस्य न नास्तित्वमुक्तहेत्वोरसंभवात् ॥ ४ ॥

So also, owing to the non-perception (of the effect), let there be (accepted) the non-existence of the effect alone. The absence of the cause however does not follow, because of the impossibility of these two reasons (in respect of it)¹. [4]

¹Anupalabdhi 'non-perception' is another Pramāṇa for acce-

pting the non-existence of fire before its origination. However, in respect of its cause, *Anupalabdhi* does not hold good; the Śruti clearly states its existence in *vāyor agniḥ* etc.

सर्वस्यानुपलब्धेस्तु मैवं वोचो यतः श्रुतिः ॥

नैवेह किंचनेत्याह कारणेतरनिहनुतिम् ॥ ५ ॥

(The Śūnyavādin says:) 'But on account of the non-perception of all this (viz. both the cause and the effect), do not say so, since the Śruti passage *naiveha kimcana*...has declared the absence (lit. concealment) of (both) the cause and the other (viz. the effect). [5]

Though the followers of Kaṇāda said that only the effect did not exist before its origination and the cause did exist, the Śruti contradicts their view on the basis of the Śruti *naiveha kimcana*. This is the answer of the Śūnyavādin.

This concludes the statement of the view(s) of the Pūrvapakṣins.

नैवं यतः श्रुतिः साक्षात्सत्त्वमेवावदत्स्वयम् ॥

कार्यकारणयोः स्पष्टं मृत्युनैवेति सादरा ॥ ६ ॥

[Verses 6-10 are an answer to the views of the Pūrvapakṣins.]

(This is) not so, because the Śruti¹ itself which has (full) regard (for the following statement:) *mṛtyunaiva*..., has declared the existence of (both) the cause and the effect in clear terms. [6]

¹The Śruti pertains to the object which is unmanifest and which has no name and form. Further that Śruti, which is controverted by the Pūrvapakṣins, and the subsequent Śruti, viz. *mṛtyunaiva*..., declare the existence of both the cause and the effect. In the earlier part of the Śruti is stated the non-existence of the cause and the effect but in the later, the existence of both.

मृत्युना कारणेनेदं कार्यं सर्वं समावृतम् ॥

इति नावश्यद्यद्येतदुभयं नाभवत्पुरा ॥ ७ ॥

If both of these (i.e. the cause and the effect) did not exist before, the Śruti would not have declared all this (that is called) effect as covered by the cause, viz. Mṛtyu.¹ [7]

¹This verse explains BUB *yadi hi kimcid api nāsid yenāvriyate yac cāvriyate tadā nāvakṣyan mṛtyunaivedam āvṛtam iti* / This points to the existence of both the cause and the effect even before the latter originated from the former. The next verse explains the significance of the word *mṛtyu*.

प्राणपिण्डादिकार्याणां समुद्रः परमेश्वरः ॥

बन्धुः कारणमात्मोक्तो मृत्युरत्र स एव तु ॥ ८ ॥

ज्ञानमात्रसतत्त्वं यद्ब्रह्माज्ञातसतत्त्वकम् ॥

मृत्युर्जनिमतः साक्षात्तत्र कार्याप्ययत्वतः ॥ ९ ॥

In the case of the effects such as Prāṇa, body¹ etc., the Supreme Lord (i.e. the maker) is Samudra. It is also (the great) relative, the cause, the Ātman—it is only He who is mentioned here by the term Mṛtyu. [8]

The Brahman, which is of the nature² of mere knowledge and whose nature is not known, is indeed but Mṛtyu in the case of whatever has birth, since there in that occurs the merger of all that is effect. [9]

Verses 8 and 9 explain the significance of the term Mṛtyu. It does not mean 'Death' as commonly understood. Reference is made here to *samudra evāśya bandhuḥ samudra evāśya yoniḥ* which is at the end of 1.1 above. The words *bandhu* and *kāraṇa* are synonymous.

¹*prāṇa* and *piṇḍa* refer to the collective and the individual forms.

²The word *satattva* means *yāthātmya* (NKL).

सद्बीजं सत्प्रतिष्ठं च सदायतनमेव च ।

प्रत्यक्षमेव सत्सिद्धं सदन्यस्याप्रसिद्धितः ॥ १० ॥

Whatever existent obtains under our eyes (i.e. is directly perceptible) has an existent as its origin, an existent as its support and an existent as its abode,¹ because anything else than the existent² is not known. [10]

¹The verse seeks to establish that all that is existent has originated in some existent. Thus it affirms its acceptance of Satkāryavāda.

²This is non-existent (*asat*) which could be imagined by one as the origin of what is directly perceptible existent.

असत्सदतिरेकेण यदि वाव्यतिरेकतः ॥
व्यतिरेके सदेवासदसद्वा तत्किमुच्यते ॥ ११ ॥

[Verses 11-16 explain why there does not obtain any non-existent which is the origin as hinted in verse 10 above.]

Here one would ask whether or not a non-existent stands apart from (i.e. is distinct from) an existent and?, in case it is distinct, is the non-existent itself not extant or what is (called) non-existent is extant¹? [11]

¹If a non-existent is considered to be distinct from an existent, then it must have some distinguishing property which does not allow it to remain a non-existent: cf. SP : *asad api sad eva syād bhedadharmitvād ghaṭavat* /

नेह सद्वाव्यतिरेकेण स्वमहिम्ना प्रसिध्यति ॥
सर्वस्य सदपेक्षत्वात्सत्तु नान्यदपेक्षते ॥ १२ ॥

Here (in this world) there does not obtain a non-existent apart from an existent on its own strength (lit. greatness), since all (that is existent) expects (i.e. depends upon) another existent¹ (as its origin, its support and its abode). But whatever is existent does not expect any other (origin, support or abode).² [12]

¹This is said with the view that there is no possibility of

accepting any such discrete objects as existent and non-existent.

²This argument proceeds from the notion: An existent is different from a non-existent, which is different in nature. The answer refers to the existent, viz. the Brahman, which is self-luminous; it does not expect the denial (*apoha*) of any non-existent.

मतमव्यतिरेकेण सतोऽसत्सत्तदिष्यताम् ॥

कुतोऽदो लभतेऽसत्त्वं यत्सदात्मनि निष्ठितम् ॥ १३ ॥

If it is held that the non-existent does not exist apart from the existent, then let that be accepted as an existent. Why does it get the character of a non-existent, since (i.e. if) it is supported¹ in what has the nature of the existent. [13]

¹This more or less means 'is identical with'.

अन्योन्यव्यतिरेकित्वान्नान्योन्यात्मकता तयोः ॥

विरोधित्वाच्च नान्योन्यं संबन्धस्तापशीतवत् ॥ १४ ॥

(Then) since they exist apart from each other, the two are not of the nature of each other and, since they are opposed to each other (in nature), they do not have any mutual relation as (there does not exist any) between heat and cold. [14]

In the previous verse, it was pointed out that the existent and the non-existent cannot be described as distinct from each other. Now it is stated that the two cannot be described as non-distinct either.

स्फुरताऽपि सतो नान्यदभिधातुं घटादिवत् ॥

शक्यते नाभिधानेन ह्यसद्वस्तु निरुच्यते ॥ १५ ॥

Even if there were to exist (according to someone¹) some relation, it is not possible for anyone to mention any non-existent by name as (one would be able to mention)

a pot. Indeed, a non-existent is never (or can never be) described by any name. [15]

This proceeds from the fact that use of words is possible only in the case of objects having some distinct characteristic or form. A non-existent cannot have it and therefore no words can be used to refer to any of its relation to the existent.

¹Literally, *sphuratā* = *prājñēna* 'some one very intelligent (who might see such a relation)'.

वस्तुनोऽतिशयः कश्चिदभाववचसोच्यते ॥
तस्य तेनाभिसंव्याप्तेर्न कथंचिदपह्नुतिः ॥ १६ ॥

An excellence of a thing is described by the statement of non-existence (of some defects etc.); since that (excellence) pervades that (thing), there cannot be concealment of the same (excellence) in any way. [16]

क्रिया वा तत्फलं वा स्यादभावो नात्महेतुहा ॥
यो यतो लभते सत्तां निरुणद्धि स तं कथम् ॥ १७ ॥
न नाशो हन्ति नष्टारं गन्तारमिव तद्गतिः ॥
यो यतो लिप्सते सिद्धिं स तं हन्ति कथं वद ॥ १८ ॥

[Verses 17-19 deny destruction of the cause of this (apparently) existent world. Verses 17-18 refer to Logicians who follow Kaṇāda and verse 19 refers to the Vijñānavādin (Yogācāra view) (NKL).]

Non-existence could be either an action or its result. But it would not destroy its own cause. (For) how can a thing which requires its existence from whatsoever (source), destroy (lit. stop) that? [17]

Destruction does not destroy the destroyer even as the going of one does not (destroy) the goer. (Just) tell me, how it can destroy that from which it wishes to obtain some acquisition (viz. existence.) [18]

Earlier the author set aside the existence of any non-existent beside the existent. And now he disputes even the destruction of some existent cause which could possibly be posited by someone. The verse intends to set aside the Logicians' notion that an existent pitcher—an effect—did not exist before and that it originated through *dhvaṁsa*. The author shows that *dhvaṁsa* can be either an action or a result and cannot therefore destroy its cause (*ātmahetuhā*). The second line hints at the presence of clay etc. even when the effect, viz. a pot, has come into existence.

विज्ञानाव्यतिरेकी चेदभावः स्यात्सहेतुकः ॥

ध्वंसादव्यतिरेकेऽपि धियो नित्यत्वमापतेत् ॥ १६ ॥

If destruction is not distinct from Idea (*viññāna*), then how could it have a cause¹? If (on the other hand) Idea were to be considered distinct from destruction, there would follow only eternity². [19]

The whole argument is based on the view that *dhvaṁsa* (= *abhāva*) has an origin (*hetu*) and it is eternal. This sets aside a possible opposition by the *Vijñānavādin*, who would equate *dhvaṁsa* with Idea. There are two possibilities: (a) *dhvaṁsa* is non-distinct from Idea, and (b) Idea is not distinct from *dhvaṁsa* either.

(1) This is to answer away (a). *dhvaṁsa*, being (pre-) *dhvaṁsa* of something, has some origin (i.e. cause). Therefore, it cannot be like Idea, without any cause, and therefore momentary.

(2) An answer to (b). If Idea (*dhi*) were to be non-distinct from *dhvaṁsa*, it would be permanent like *dhvaṁsa*—an unacceptable proposition for the *Vijñānavādins*.

अतोऽभावत्वसिद्धिचर्थमभावेनाप्यपेक्ष्यते ॥

स्वहेतुसिद्धिः कार्योऽर्थो न दृष्टः कारणं विना ॥ २० ॥

धर्म्यसिद्धिः प्रतिज्ञायां हेतुश्चानाश्रयो भवेत् ॥

न चास्ति कश्चिद्दृष्टान्तः सर्वशून्यत्ववादिनः ॥ २१ ॥

[The argument in these verses is against the *Mādhyamika*

view: *sarvaṁ śūnyam*—in other words: *sarvasya dhvaṁsasiddhiḥ*.]

Therefore¹ in order that there results non-existence, non-existence also² would expect the existence of its cause³; for, a thing, which is an effect, is not seen (to have come into existence) without a cause.⁴ [20]

If one were to state the enunciation ('All this world was absolutely non-existent'), there is not established any (subject⁵) having any property; then the reason⁶ would be without any basis and also there is not any example⁷ for the Śūnyavādin who negates everything. [21]

¹This means 'since an *abhāva* (= *dhvaṁsābhāva*) is some effect.' This argument proceeds from answers to (a) and (b) in the preceding verses.

²*api* points to the *dr̥ṣṭānta* of a pot which is necessary for understanding the *vyāptivākya*. See note 4 below.

³*svahetusiddhi* means *svakāraṇasattā*.

⁴This is a form of *vyāptivākya*: *sarvaṁ kāryaṁ kāraṇapūrvakam*. One can understand: *yathā ghaṭādi*—cf. reference to *ghaṭādi* in verse 15 above.

Verse 21 answers the argument of the Mādhyamika regarding *sarvasya dhvaṁsa* (= *abhāva*) owing to the momentariness of everything. It raises two questions about the absence of everything: (i) Is it grasped by Direct Perception? or (ii) is it inferred? Consequently, the purport of the verse is that the Mādhyamika cannot make any argumentative proposition.

⁵The Śūnyavādin could not state a proposition (*pūrvam*) *asya sarvasya nāstitvam*, since the *pakṣa* (= *idaṁ sarvaṁ*) was at that time not directly perceptible and therefore nothing could be predicated of it.

⁶This is *hetu* or *liṅga* in an *anumānavākya*. Where could one notice any characteristic of what did not exist? or, how could one postulate any characteristic of what did not exist? This means the *āśrayāsiddhi* and *svarūpāsiddhi* of the *hetu*.

⁷No example could be cited in respect of a proposition whose *pakṣa* itself is non-existent and therefore devoid of any property. Consequently, it would not help establish any conclusion (it would be *sādhyaavikala*).

विज्ञानमात्रं यस्यापि जगदेतच्चराचरम् ॥

प्रतिज्ञाहेतुदृष्टान्तैर्ज्ञानं तेनापि दृष्यते ॥ २२ ॥

मानाभेदाच्च मेयस्य नाज्ञातार्थः प्रसिध्यति ॥

तादात्म्येऽपि न चेज्ज्ञातो मानात्कोऽतिशयो मतः ॥ २३ ॥

अज्ञाताधिगमं कुर्वन्मानं स्यात्सर्ववादिनाम् ॥

न चेच्छुक्तितमोजस्य ज्ञानस्यापि प्रमाणता ॥ २४ ॥

विज्ञानाव्यतिरेकित्वादसिद्धादेस्तथैव च ॥

प्रामाण्यवत्प्रसङ्गः स्यादप्रमात्वेऽपि ते ध्रुवम् ॥ २५ ॥

(Now, the inability of the Mādhyamika to make any proposition regarding *dhvamsa*, as pointed out in the previous verse, is stated of the Vijñānavādin also.)

Similarly (lit. also) the person for whom all this universe, moving and non-moving, is but Idea (*vijñāna*), would render his own knowledge faulty thanks to stating faulty (or false) enunciation, reason and example¹. [22]

(Again,) owing to the non-difference (i.e. oneness) of the means of knowing with the object to be known, there does not become known (to a knower) any object that was unknown². Also, if it were not known, even in case (one accepted) their non-difference, (it has to be pointed out as to) how what is produced or accepted is distinct³ from the means of knowing. [23]

It is accepted among all thinkers that an authoritative means of knowing is what makes (the knower) know what was (earlier) unknown.⁴ If this were not so, the knowledge produced from darkness (i.e. ignorance) about a shell would also be valid (i.e. authoritatively true). [24]

So also there would arise the contingency of accepting as the authoritative means of knowing what are not properly established as such,⁵ in case they were not considered as distinct from Idea. [25]

¹Verse 21 above pointed out three faults, viz. (i) *dharmyasiddhi*

in *pratijñāvākya*, (ii) *anāśraya hetu* and (iii) *drṣṭāntābhāva*, in the argument of the Mādhyamika. This is a statement that these same three faults occur in the argument of the Vijñānavādin. This is *jñānadoṣa*. Also there is reference to *hetvābhāsas*.

²This has a reference to *Pratyakṣa* 'Direct perception'. Any means of knowing is known to grasp what was not grasped before. Now, if knowledge and its objects are both Ideas, the means of knowing has no purpose to serve, i.e. it does not grasp what was not grasped.

³This is on the supposition that the means of knowing and the object of knowing are distinct—the latter has either (i) its unknownness removed or (ii) the character of having become known, produced by the means of knowing. The intention is to point out the impossibility of the function of any means of knowing in respect of an object of knowing which is the same as the knower.

⁴An argument of the Vijñānavādin could be: What makes something known is a means of knowing—not one which makes only an unknown known. This is answered away by pointing out that what produces invalid or false knowledge would also be considered as proper means of knowing.

⁵*asiddhādi* are *asiddha* (either *āśrayāsiddha* or *svarūpāsiddha*) and *viruddhahetus*.

अजमेकं स्वतःसिद्धं प्रत्यग्रूपमनन्यदृक् ॥

वस्त्वेवं चेदिहाभीष्टं किमर्थं साध्यतेऽपरम् ॥ २६ ॥

[Verses 26-31 are an argument regarding opposition to Advaita resulting from the statement of the existential character of both the cause and the effect.]

(An objector asks:) If in this Śāstra (of Advaita) you have accepted (lit. desired) (only) one existent which is unborn, self-established, having the form of the inner self (of an individual), and unlike any other (thing), for what purpose is anything else¹ being established? [26]

¹This refers to the effect, viz. the *jagat*, which comprises

variety and would point to duality or absence of the uniqueness of the Brahman.

एवंभूतात्मसिद्धचर्थं कारणादि प्रसाध्यते ॥

उपायः सोऽवताराय तथा तज्ज्ञैश्च सूत्रितम् ॥ २७ ॥

Cause etc. are established (as existent) (only) with a view to establishing the Ātman of such nature; for, that is a means to introduce (the philosophical doctrine of the uniqueness of the Ātman)—so it is said (declared) by the knowers¹ of that. [27]

This verse is a reply to verse 26 above.

¹Reference to Gauḍapāda in the plural is indication of Sureśvara's great regard for him. Cf. *Gauḍapādakārikā* 3.15:

mṛllohavispṛhulīṅgādyaiḥ sṛṣṭir yā coditānyathā|
upāyaḥ so 'vatārāya nāsti bhedaḥ kathamcana||

कारणादिनिषेधेन न चाद्वैतमभीप्सितम् ॥

एकात्म्यबोधमात्रेण निषेधस्याप्यपह्नवात् ॥ २८ ॥

(Only) by the rejection of the cause etc. is not established (lit. obtained) non-duality (of the Brahman), for, by the knowledge of its uniqueness alone (is secured) the rejection (of the cause and the effect etc. as real). [28]

So far, it has been pointed out that the existent pot etc. has an existent for its cause. How does it prove the non-duality of the Brahman? To answer this, the verse points out the uniqueness of the Brahman being established.

सत्तत्त्वकमिदं सर्वमिति संसाध्य यत्नतः ॥

तस्यापि संविन्मात्रेण पूर्णतैवोच्यते सतः ॥ २९ ॥

Having thus established with effort that all this is of the nature of (the existent)¹, the Śruti now declares the wholeness of that existent on account of only sentiency. [29]

¹NKL reads the text as *sat-tattvakam* and not *sa-tattvakm* as in BUBV. According to this latter, the translation would be: 'all this that can be described as the cause and the effect etc. is but having the existent Ātman as its basic reality.' The reading in NKL seems better than that in BUBV, though we have rejected it.

सदेवागमतः सर्वं प्रत्यक्षाच्च सदीक्ष्यते ॥

अनुमानाच्च सत्सर्वं यथा तदधुनोच्यते ॥ ३० ॥

[This verse explains *anumeyatvāc ca...* (BUB p. 20)]

Now (i.e. hereafter) is stated (how) only the existent is all this, as declared by the Āgama (i.e. Śruti¹), and also (as experienced) by direct perception as existent. Also, it is (proved) by inference as to how all (this) is that existent. [30]

¹SP and NKL points to the Śruti text *mṛtyunaiva* in the BU and therefore the meaning of Āgama here cannot be 'tradition'.

अनुमेयं च सत्पूर्वं कारणं कार्यमेव च ॥

जगत्प्रसूतेस्तच्चेह प्रयोगेण प्रदर्श्यते ॥ ३१ ॥

[This verse explains *anumiyate ca* (BUB 1.2.1, p. 20)]

And both the cause and the effect can be inferred as preceded by the existent even (prior to) the creation of this universe; this is shown here (i.e. in what follows) by application (of the method of inference).

Verses 32-56 prove the existential character of both the cause (viz. Brahman) before creation and its effect with reference to kāryasya hi... (BUB p. 20).

विवादगोचरापन्नं सत्कारणमिदं भवेत् ॥

कार्यात्मकं मनोऽवादि कार्यत्वात्कटकम्भवत् ॥ ३२ ॥

This (world) which has for its cause the existent is what has become the subject of dispute¹. (And) *manas*, water etc.² of

the nature of the cause³, have been an effect comparable to a mat or a pot. [32]

¹The word *dispute* affirms the nature of all effects as the *pakṣa*, viz. it is *sandigdhasādhyaavat*, since, later, the word *kaṭakumbhavat* serves as the *drṣṭānta* in the proposed *prayoga*—cf. verse 31 above.

²Cf. BU 1.2.1 and 2.

³*kāryātmakam* puts *idam* (*jagat*) on par with *kaṭakumbha*.

हेतुमज्जनिमत्सर्वं कार्यत्वात्पटकुम्भवत् ॥
वियदादि च नः कार्यं तदप्येवं प्रतीयताम् ॥ ३३ ॥

All that has a birth has a (previously existing) cause, because it is of the nature of effect just like a piece of cloth or a pot.¹ May it be understood that the sky etc. is² for us effects, for that also³ is like this⁴. [33]

¹It is held by some that the world comes into existence, of itself, not from any cause (*svabhāvavāda*). This is here referred to.

²This is collective singular.

³Also can be understood for *samuccaya*: the first line refers to *anumāna* and the second to *Āgama*; refer to *antarikṣa* in BU 1.2.3—this (as also the translation) is according to the second alternative in SP.

⁴That is to say; *hetumat*.

The first alternative in SP (also in NKL) supplies *vibhaktatvāt* as the *hetu* for the affirmation in the second line; it means *svānyūnasattākabheda-pratīyogitvāt* (NKL).

असत्कारणकं कार्यं तद्विनाश्यास्य जन्मतः ॥
सर्वं स्वहेतुमुन्मूल्य जायतेऽङ्कुरकुम्भवत् ॥ ३४ ॥

[This presents a counter-argument in the form of a *prayoga*.]
Every effect has a (previously) non-existent cause because it originates after having destroyed that; (for) all is born (only) after uprooting (i.e. destroying) its own cause in the same way as a sprout and/or a pot.¹ [34]

¹It is argued thus: Being an effect should not be taken to mean that it has a cause necessarily existing before it. This is based on the common-place experience of the disappearance of a seed before the appearance of a sprout. The example of a sprout is not *sādhyavikala* 'deficient in respect of what is concluded'.

स्वकारणं चेदुत्साद्य कार्यं सर्वं प्रजायते ॥

तत्कारणविनाशाय तत्सूतेः प्राक्क्व ईर्यताम् ॥ ३५ ॥

स्वहेतूच्छित्तयेऽलं चेदजातमपि सद्यदि ॥

द्वयमप्यभ्युपेतं स्यान्न ह्यसद्वन्यतेऽसता ॥ ३६ ॥

[Verses 35-43 explain the meaning of *na* in *na mṛdādeḥ*.. (BUB p. 20). The next two verses (viz. 35-36) answer the counter-argument by pointing out how the example is *sādhyavikala*.]

If all effect¹ originated (only) after having destroyed its own cause, (then) let it be told as to where it was before its production for destroying its cause. [35]

If it were capable of destroying its own cause even while it had not originated and if it was then existent also, then you have accepted both of them (i.e. the cause and the effect) as existent before. Indeed, no non-existent can be destroyed by another non-existent. [36]

¹This is collective singular.

विनाशस्यापि कार्यत्वात्सोऽपि सत्कारणो मम ॥

न चेत्कार्यो विनाशः स्यान्नाशोऽकार्येण नेष्यते ॥ ३७ ॥

Since destruction also is an effect, even¹ that has, in my opinion, an existent cause. If destruction were not to be considered as (something) to be effected, then (I should say) destruction by what is not an effect (itself) cannot be entertained.² [37]

¹*api* shows that destruction has, like each of *paṭa*, *kaṭa*, and *kumbha* some existent cause.

²In other words what has not originated does not (or cannot) destroy.

स्वकारणविनाशाय सिद्धं वासिद्धमेव वा ॥

अङ्कुरादि मतं कार्यं नोभयत्रापि युज्यते ॥ ३८ ॥

If a sprout etc. is accepted (by you) as an effect, be it that the established (i.e. what has originated) or the non-established in respect of effecting the destruction of its own cause; both ways this¹ does not stand to reason. [38]

¹'This' means the character of an effect as the destroyer of the cause.

सिद्धं चेत्कारणात्सिद्धमुपमर्दं विनैव तु ॥

उत्पन्नेन च तन्नाश उत्पन्नत्वादन्तर्यकः ॥ ३९ ॥

[The two ways mentioned in the previous verse are discussed in verses 39 and 40.]

If it is argued that what is established (i.e. has originated) has come into existence from its cause, without having destroyed it and the destruction of it is effected by the established effect, then (this) destruction would be purposeless¹ since the effect has already come into existence. [39]

¹The reason is : The objector has posited the destruction of the seed etc. for purposes of the sprout's appearance (i.e. coming into existence).

उपमृद्नाति चेत्कार्यमथासिद्धं स्वकारणम् ॥

तत्कारणं कथं तत्स्यान्न चेत्तस्मात्प्रजायते ॥ ४० ॥

If it is said, 'an effect that is not established (i.e. has not originated) destroys its own cause', (then the question is:) how can that (cause) be its cause when it (viz. the effect) does not originate from it (viz. the cause)? [40]

उपमदोऽपि कार्यत्वात्किं न हन्यात्स्वकारणम् ॥

हन्तर्यसति हानोक्तिर्लक्ष्यते शिशुवक्तृका ॥ ४१ ॥

And, destruction also, being an effect, would it not destroy its own cause? (Indeed), in the absence of a destroyer, any statement about the destruction (of something) appears to have been made by a child (i.e. an ignorant person.) [41]

नष्टृतन्त्रो विनाशोऽपि गन्तृतन्त्रा गतिर्यथा ॥

नास्तीह कश्चिद्धात्वर्थो यः स्वहेतुं विनाशयेत् ॥ ४२ ॥

Destruction also depends on some destroyer, in the same way as any movement depends on someone who moves. There is not here (i.e. in worldly language) a single meaning of any verbal root (viz. action) which would indicate the destruction of its agent¹. [42]

¹The meaning of any verbal root is some action which is performed by an agent and which therefore cannot destroy that agent.

निर्हेतुनाशसंव्याप्तेर्न स्यात्कुम्भजनिर्मदः ॥

न बीजादग्निसंव्याप्तादङ्कुरोद्भूतिरीक्ष्यते ॥ ४३ ॥

It would not be possible that there is production of a pot from clay when there is pervasion (of that production) by the absence of the cause, viz. clay.¹ Indeed nowhere is seen the rise of a sprout from a seed which is pervaded (i.e. burnt) by fire.² [43]

¹SP explains: This is as an answer to the Kṣaṇikavādin, according to whom everything is momentary. There, in his view, clay which is considered as the cause of a pot, is yet momentary. Consequently, he cannot say that a pot etc. comes into existence from nothing.

²This is an example to prove : *nāśavyāptāt kāraṇāt kāryānutpattiḥ*.

घटादेः कारणं पिण्ड इति नाभ्युपगम्यते ॥

मृदेव कारणं यस्मात्पिण्डादेरवगम्यते ॥ ४४ ॥

It is not accepted (by anyone) that the cause of a pot etc. is a lump etc.; (they hold) only clay as the cause since it is understood (to be existent) from (its form as a lump). [44]

यदेव कारणं मानैरिह साक्षाद्विनिश्चितम् ॥

तदेवोत्तरकार्येषु न कार्यं कारणं मितेः ॥ ४५ ॥

[This is to explain the second line of the preceding verse.]

Whatever cause, which is established here¹ by various means of knowing² (only) clearly³, is itself (the cause) in respect of the later effects. (Indeed) it can be argued that an effect is not the cause of (any other effect of the same cause), thanks to (proper) way of knowing.⁴ [45]

¹That is to say; in respect of a lump (of clay) etc. which is the first form of an effect.

²These are: *anvaya*, *vyatireka*, *anusaṁdhāna* and *pratyaya*.

³That is to say; by direct perception, in the first instance.

⁴Form of the material cause (of clay) does not remain permanent and also that form, being an effect itself, does not persist in the effect; this is (i) *anvaya* of clay in a pot, and (ii) *anavasthāna* (non-existence) of the lump etc. in the pot etc. *miti* is *māna* = *jñāna*.

विनाशोऽतिशयः कश्चिद्वदि पिण्डादिवन्मतः ॥

प्रत्यक्षात्तद्वयं सत्स्यान्नो चेदस्तु ध्रुवो घटः ॥ ४६ ॥

If it was held that destruction of clay is some excellence of it just like the lump etc., then, since both of them (viz. destruction and clay), being directly perceptible, would be (ever) existent.¹ (And) if (it were) not so², (then) let the pot be (considered as) permanent.³ [46]

¹The argument in this verse proceeds to refute a possible

counter-objection. Like the lump of clay (i.e. a form of it), clay also is liable to destruction. This objection entails a doubt whether destruction of clay is some excellence (i.e. modification) of it. The answer is: Excellence of a thing and the thing must both be directly perceptible; therefore, clay and its so-called excellence, viz. destruction, must also be directly perceptible and consequently ever-obtaining.

²This is another part of the doubt, viz. destruction is not any excellence of clay, it is different from it.

³This is so, because destruction (which is *abhāva*, i.e. non-existence) is in no way related to the pot which is an existential entity. The pot is clearly an effect and a form of clay. And further, the nature of destruction is thus not in any way ascertained.

क्रिया वा तत्फलं वा स्याद्वस्त्वन्तरमथापि वा ॥

नाशोऽथ वा न किञ्चित्स्यात्सत्त्वं नैवमपोद्यते ॥ ४७ ॥

Or, whatever be (the nature of) destruction (e.g. of clay), either some action or the effect of the same something distinct from it or some non-entity, its existence cannot be declined. [47]

The nature of destruction could be understood in any of the four ways, but that (viz. the nature of destruction) would not establish the non-existence of an existent, which still continues to exist.

क्रियाप्यस्ति फलं चास्ति तद्वस्त्वन्तरं च सत् ॥

अथ नाशोऽपि नैवास्ति तं विना सदिदं जगत् ॥ ४८ ॥

[The second line of the preceding verse is explained here.]

Now destruction may be some action or some result (or modification) or some thing other (than an existent e.g. clay) or some non-entity. Even then this universe is existent despite its absence.¹ [48]

¹This is to be explained thus: If destruction is some action, the agent of the action has to be declared as existent and this

would not negate the existential character of a thing like clay. If it is some result (or modification), then what has undergone this change has to be considered as an existent. If it is another (existential) thing, it does not affect the nature of things like clay etc. Being a non-entity also, it does not affect the status of the same.

सन्नेव नाशोऽपीष्टश्चेत्सत्सता न विरुध्यते ॥

ऐकात्म्येऽपि विरोधश्चेन्नाशो नाशेऽपि शङ्क्यते ॥ ४६ ॥

If one were to accept destruction also as an existent, then (it has to be pointed out) the existent (clay) is not opposed (i.e. disproved as existent) by (another) existent (viz. destruction). And, if one were to say that even there is unity of nature (of the two, viz. destruction and clay), then (it would mean that) one would have to doubt that there is destruction (in the case) of destruction also. [49]

The last line implies that, like destruction of clay, there can be destruction of destruction also. Thus, the nature of destruction being unestablished, clay has to be declared as an existent.

पिण्डादिना विनापीदं मृदादेः केवलादपि ॥

घटाद्युत्पद्यमानं तु कार्यं दृष्टमतो ध्रुवम् ॥ ५० ॥

मृदाद्येव ततो ग्राह्यं करणं ह्यन्वयान्मृदः ॥

कार्यमेव तु पिण्डादि तस्य कार्येऽनन्वयात् ॥ ५१ ॥

[Verse 50 is an amplification of the idea in verse 45. Verse 51 gives the outcome of the argument of verse 50.]

It is invariably seen that the effect, a pot etc. is produced, even without (the form of) a lump (of clay) but from clay alone (i.e. clay having no form). Therefore, it (i.e. clay) is ever existent.

[50]

Therefore,¹ only clay etc. has to be accepted as the cause, indeed from its continued existence (in the effect, viz. pot). As against this (*tu*), the (form of a) lump etc. is but an effect, for it does not continue to exist in the effect.

[51]

Earlier, in the explanation of *miti* in verse 45, reference was made to *anvayavyatirekasambandha*. That is explained here. *piṇḍādinā* etc. is the amplification of *asati api*.. (BUB p. 20). The lines *dhruvam* etc. are the explanation of *tasmān na*.. (BUB p. 20).

¹'Therefore' has reference to 'it is invariably seen'.

विरुद्धानेककार्याणां युगपज्जन्म नेष्यते ॥

एकस्मात्कारणात्तस्मात्पिण्डाभावे घटोद्भवः ॥ ५२ ॥

It is not accepted that there is simultaneous production (lit. birth) of many mutually opposed effects from one single cause. Therefore, there is production of a pot (even) while there is absence of (the form) of a lump. [52]

This is a comment *sarvaṃ hi kāraṇam*.. (BUB p. 20). This is to explain why there does not originate a pot together with a lump which forms from clay. True, the lump is clay, but it is an effect of clay, a pot is not the effect of the lump.

पिण्डादिव्यतिरेकेण कारणानुपलब्धितः ॥

असत्त्वं चेन्मृदादेः स्यान्न मानानुपपत्तितः ॥ ५३ ॥

If one were to argue: Since one does not find the cause (as existent) apart from lump etc., therefore clay etc. have non-existence.¹ (The answer is:) No, that is not so, because there is invalidity of that means of knowing.² [53]

¹The objector means to add 'and therefore clay etc. is not the cause of a pot etc.'

²This means: The lump etc. cannot form without the presence (or existence) of clay etc. (*mṛdādyanugatava*). Therefore, the reasoning of the objector stands invalid.

पिण्डादिव्यतिरेकेण यदि मानं भवेत्ततः ॥

मृदादि कारणं लब्धं न मानं स्यान्मृदा विना ॥ ५४ ॥

पिण्डादिव्यतिरेकेण पिण्डादाविव चेत्प्रमा ॥

सिद्धं कारणमेवं स्यान्न मा मेयं विना यतः ॥ ५५ ॥

[This explains further what is stated in the previous verse.]

If (one were to say: The argument of the Vedāntin appears to be that) the means of knowing (the existent cause) obtains even apart from (i.e. in the absence of) a lump¹ etc., then (in that case, we answer that) there does obtain clay etc. as the cause; (for) there would not obtain any means (of knowing, i.e. ascertaining, the cause) in the absence of clay.² [54]

If (one were to say:) As in (the absence of) a lump (of clay) etc. there results the knowledge of the cause, apart from the lump,³ then (one has to declare that the existence of) the cause is proved this way (also); for, there results no knowledge in the absence of an object of knowledge.⁴ [55]

¹SP points out the argument of the objector thus: Clay and the form of a lump (of that clay) co-exist. Therefore, the form being destroyed, clay also must be said to cease to exist.

²The Siddhāntin answers that the *anugatatva* 'continued existence' of clay etc. decides the conclusion. This is stated by *vyatireka* mode of answer.

³The objector has this in mind: Clay (not in the form of a lump) and a lump of it cannot easily be distinguished from each other, therefore, it is difficult to say that the clay, which continues to exist even in the absence of the form of a lump, is the cause of a pot.

⁴The objector's argument is not really any objection. The knowledge of the continued existence of the clay etc. is the reason to prove it as the cause of the existing pot. A second proposition about the knowledge and its means points to this.

असाधारणरूपेषु व्यावृत्तेष्वितरेतरम् ॥

बहुष्वेकं यदाभाति प्रत्यक्षं कारणं तु तत् ॥ ५६ ॥

The one, that is directly perceptible in those many (of its forms), each of which has a distinct form and gets destroyed (lit. disappears) (in the process of the creation of some effect), is the cause.¹ [56]

¹Translation follows the latter of the two alternative explanations given by SP. The former alternative is: They recognize that as the cause of some effect which is preceded by those many forms that have mutually differed and ceased to exist. Of course, there is very little material difference between these two.

In verses 57-73, the topic pertains to the doubt about the perception of continued existence of something which results from its similarity with what could be the real cause.

सादृश्यादन्वयभ्रान्तिस्तन्निवृत्तावपीति चेत् ॥
नैवं पिण्डस्थदृष्टानां घटादावपि दर्शनात् ॥ ५७ ॥

If one were to hold that, there would be on the part of one an error as regards the continued existence (of the cause in what is held as its effect) on account of the similarity of any or (many of its so-called products with it) even when they have (gradually) ceased to exist (when the effect exists), then (we say:) This is not so¹, since the parts (of clay etc.) which are seen in its various forms are noticed even in the pot etc. [57]

¹This is denial of *bhrānti* 'error', for our experience of a clay-pot is thus; 'this is a pot of clay'. This experience does not get stultified as any *bhrānti* does.

प्रत्यभिज्ञायमानेऽर्थे तदेवेदमिति ध्रुवे ॥
लिङ्गमाभासतामेति प्रत्यक्षार्थविरुद्धमित् ॥ ५८ ॥

In the object (viz. the pot) that is being recognized as 'this is the same as that', while that object has remained unchanged, (what the objector holds as) the cause becomes apparently perceptible in the form (only) (to him)¹ but this (his) knowledge is opposed to the directly perceived object.² [58]

¹This is an argument of the Kṣaṇikavādin. He holds that all these so-called existent objects are but momentary even like a

lamp that illumines its surrounding only for a while (i.e. for a moment). Therefore, what is considered as the experience of the continued existence of clay etc. (*anvayadr̥ṣṭi*) is positively an error. This is actually some kind of inference of the oneness (or, the continuance) of the cause.

²This refers to the recognition of clay etc. In the momentary appearances of the objects of the Kṣaṇikavādin's knowledge, there is never such recognition. There is thus opposition of the objector's *anumāna* and the (*pratyabhijñā*) *pratyakṣa* of the Siddhāntin.

विरुद्धाव्यभिचारित्वं न च प्रत्यक्षलिङ्गयोः ॥

प्रत्यक्षापाश्रयान्नित्यं नानपेक्षं तदक्षवत् ॥ ५९ ॥

[A further argument in respect of *anumāna* in the face of *pratyakṣa* or (even) *pratyabhijñā*.]

And between Direct Perception and Inference¹, there is not any invariable opposition², for, it (*liṅga*) ever rests on Direct Perception; it is not independent (i.e. without any expectation of Direct Perception³). [59]

¹*liṅga* stands for *anumāna*. Cf. also the preceding verse.

²This is explained in the first line of the next verse.

³*akṣa* = *pratyakṣa* 'Direct Perception'.

विरुद्धाव्यभिचारित्वं समानवलयोर्यतः ॥

दृष्टं सर्वत्र लोकेऽस्मिन्न तु सिंहशृगालयोः ॥ ६० ॥

(And also) because the relation of being mutually opposed invariably (can) obtain (only) between two reasons of equal strength.¹ This is seen everywhere in this world, but it (i.e. such invariable opposition) is not noticed to exist between a lion and a fox (which are of unequal strength).²

[60]

Translation uses the word reasons for conveying the idea of *hetu* in *Anumāna*.

NKL clarifies the meaning of *viruddhāvyabhicāritva*; it consists in invariable association of something with what is opposed to it. Cf. the well-known idea expressed in the Nibandhas belonging to Prācīna Nyāya: *viruddhārthadvayabodhakahetvoḥ prayoge satpratipakṣā-paraparyāyatayā 'viruddhāvyabhicāri' iti vyavahārah*. Here *Liṅga* = *Anumāna* leads to the knowledge that there is no existent cause of a *ghaṭa*, and, as opposed to it, *Pratyakṣa* leads to the knowledge that the existent clay is its cause. Thus, the two means of knowing lead to *sādhyābhāva* and *sādhyā* both. Therefore, either of these two means of knowing (i.e. two *hetus*) can be called *satpratipakṣa* 'inconclusive or ambiguous' *hetus*. The argument in this verse is based on the dependence of *Anumāna* on *Pratyakṣa*. The continued presence of clay, therefore, shows the invalidity of the *Anumāna* so-called.

¹This explains the inequality (i.e. degree of adequacy) of the two *hetus* mentioned in the preceding verse. The two alleged *hetus* (i.e. the mutually opposed *Pratyakṣa* and *Liṅga*) are not equally strong.

²The statement in the first line is supported by citing a similar example from common life. There can be opposition worth the name between the two lions or two foxes, but not between a lion and a fox.

क्षणिकत्वे च भावानां प्रत्यभिज्ञाद्यसंभवः ॥

न ह्यन्यदृष्टं वस्त्वन्यैः प्रत्यभिज्ञायते क्वचित् ॥ ६१ ॥

[One more argument against *kṣaṇikatva*; *pratyabhijñā* etc. would be impossible.]

In case one holds that things of existence are momentary, there would be impossibility of recognition (of those things) etc.¹ (on the part of the onlookers of those things). Indeed, a thing which is seen by someone is not recognized by any other person.²

[61]

¹SP explains *ādi* 'etc.' on the basis of BS 3.2.9: *sa eva tu karmā-nusmṛtiśabdavidhibhyaḥ* which refers to some action that had remained incomplete at an earlier moment (or on an earlier day) to re-

collection or remembrance of what was seen or done earlier and also to scriptural passages such as BU 4.3.16 and CU 6.9.3. and 8.3.2. NKL follows suit. Better, however, refer to BS 2.2.25 which refutes the Buddhist's notion of momentariness of things (and also of knowers of them).

²This implies that the unity of a seer is denied by the Kṣaṇikavādin—this is amplified in the next verse.

क्षणिकं चेदिदं सर्वं प्रत्यभिज्ञाप्रमाणकम् ॥

अन्यतद्बुद्ध्यपेक्षत्वं तद्बुद्धेर्वः प्रसज्यते ॥ ६२ ॥

If all this, which has recognition as the means of knowing it, is (held by the Kṣaṇikavādin as) momentary, then he¹ will have to face the contingency of accepting that it (i.e. recognition of some object) is dependent on the knowledge (of it on the part) of another. [62]

¹'He' refers to the Kṣaṇikavādin, who is directly addressed in the verse.

इदं क्षणिकमित्येतत्क्षणिकत्वे न सिध्यति ॥

इदं क्षणिकताबुद्ध्योभिन्नाधिकरणत्वतः ॥ ६३ ॥

[This verse states the reason why momentariness of things etc. cannot hold.]

(Further) in the view that everything is momentary the proposition 'this is momentary' does not get established, because the knowledge 'this one' and 'momentariness' of (it) belong to two different substrata¹. [63]

¹Substrata:

(a) (reference to cognisers, i.e. individuals): This proposition, 'This is momentary' is said to imply the non-momentariness of the one who makes it, for one requires to live two moments to have two cognitions of (i) this, and (ii) its characteristic momentariness. If this implication is not accepted, it would mean two cognisers for the two cognitions which turn into one cognition.

And already, the second line of the 61st verse has pointed out the impossibility of such a happening in the case of a cogniser, viz. the second cogniser (of momentariness).

(b) (reference to cognitions, i.e. time): (a) entails that there are two cognitions (let us say, on the part of even one cogniser (and not two of them). And these two cognitions cannot obtain in just one moment—there would be two moments necessary. Consequently, there cannot be the cognition of this form: 'This is momentary.' !

अज्ञातं ज्ञायते यस्य तथाजातं च जायते ॥

प्रत्यभिज्ञामृते तस्य प्रतिज्ञार्थो न सिध्यति ॥ ६४ ॥

[This verse shows how even the Kṣaṇikavādin has to accept recognition as a means of knowing.]

For him, in whose opinion what was not known (before) becomes known and what was not born becomes born, the thing enunciated (i.e. mentioned as the subject of any of the propositions) cannot get established, unless it is recognised.

[64]

To say, 'This was not and is (now) born' or 'This was unknown and is (now) known' implies two moments for the one who says it. That should force the Kṣaṇikavādin to accept recognition as a proper/authoritative means of knowing.

अनवस्था च दुर्वारा ह्यविश्वासश्च जायते ॥

मृषात्वात्सर्वबुद्धीनां न क्वचिन्निश्चितीर्भवेत् ॥ ६५ ॥

(If the holder of the view of momentariness says that, 'we do not say: an unknown is known or an unborn is born',¹ then) there would follow inevitable *infinite regress* and further there would arise (among the people) want of faith (in the doctrine of momentariness). (Thus) on account of all knowledges (in that system or view) being false² (i.e. invalid), there would not be any definite decision.

[65]

¹This would mean 'what is (already) known is being known' or 'what is (already) born is being born'. Who could believe this as a reasonable talk?

²All statements made by the Kṣaṇikavādin will be held unauthoritative. The purport of philosophical inquiry would thus be defeated !

संबन्धानुपपत्तिश्च तदिदंज्ञानयोर्ध्रुवम् ॥

संबन्धकर्तर्यसति न च सादृश्यसंश्रयात् ॥ ६६ ॥

And certainly that relation between the two knowledges of that and of this would be unreasonable (or invalid), when there does not exist one who would relate them¹. And also, (that relation could not obtain) on the support of similarity² (between that and this). [66]

This argument proceeds from the fact that the statement of the cognition 'This is that' would require two moments of time or two places as the substratum of the cognition. Alternatively, it would require at least the knowledge of the similarity between this, and that and this knowledge would require the continued existence of the knower.

¹This means 'who is the knower of the relation.'

²This is explained in the next verse.

ध्वंसिनोरिव सादृश्यं स्थायिनोरपि नेष्यते ॥

ग्राहकेऽसति तद्भिन्ने बुद्धीनां चैकरूपतः ॥ ६७ ॥

That there is similarity is not accepted in the case of two objects that continue to exist as in the case of those which get destroyed (in a moment) when there is not a perceiver of them who is different from the two.¹ (This is so) also because the knowledges of two (or more) similar objects are held to be of but one form. [67]

¹Translation follows the reading *tadbhinne* whose variant reading *tad-bhitteḥ* is supported by NKL. In that case, the word *tad-*

bhitti means difference between the two knowers of the two. SP remarks that the difference in the reading does not change the conclusion. The thought is: There is need of but one knower who continues to live (at least) the two moments of the cognition of two similar things, whether they are momentary or permanent. *tadbhitti* means difference between two knowers of the two similar objects. This causes the difficulty: Similarity cannot be spoken of, in case there are two different cognitions of two different knowers! Cf. *aikyabuddher bhrāntitvabhaṅgena bhāveṣu kṣaṇitvam abhāṅkṣit*—the introductory remark in SP on the next verse.

नाशभेदविरुद्धार्थप्रमेये च व्यवस्थिते ॥

प्रत्यर्थिनि हि प्रत्यक्षे तद्विरुद्धः कुतोऽमितेः ॥ ६८ ॥

[This verse states yet another argument against *kṣaṇikatva*.]

When there exists thus an object of knowledge which is opposed (in nature) to destruction or discreteness (from one another) and (further) Direct Perception is an opponent (of the two¹), how could there be what is opposed to that²?—because there is (really) the absence of any (other) means of the knowledge (of the two). [68]

Here, the verse refers to the Buddhist view of *nirvikalpaka pratyakṣa*. *nirvikalpaka pratyakṣa* is opposed to destruction etc., it grasps only what exists. Yet this also does not prove momentariness of objects (NKL).

Translation follows the reading adopted by SP which reads: *amiter iti padacchedaḥ*. However, NKL reads *kutaḥ miteḥ*. Accordingly, translation of the second line would be: Whence, i.e. by what means could there be... (*kasmān mānād ityarthāḥ*) (NKL).

¹These are: destruction of what is considered as the antecedent, the cause, and discreteness of two cognitions which form the basis of *sādrśya*.

²'That' refers to Direct Perception.

अनुत्पन्नोत्पित्सूत्पन्नोऽनष्टो नाशादिकृत्तथा ॥

एवमष्टक्षणावस्थो भावोऽवश्यं त्वयेष्यते ॥ ६९ ॥

[Yet another argument about self-contradiction in the view of the Kṣaṇikavādin.]

(Do remember) even you have necessarily to accept that a thing exists for eight moments, for, (in your view) it is (i) not produced, (ii) wanting to be produced, (iii) being produced, (iv) produced, (v) not-destroyed, i.e. existent, (vi) wanting to destroy (itself), (vii) destroyer¹ (of itself), and (viii) destroyed.² [69]

¹This stands for *nāśakṛt*. It is difficult to say what *ādi* in *nāśādikṛt* means.

²This is comparable to six modifications of a thing (*ṣaṭ bhāva-vikāras*) mentioned in *Nirukta* 1.2: *jāyate, asti, vardhate, pariṇamati, apakṣiyate, vinaśyati*.

अन्योन्याविषयत्वे तु कुतः सादृश्यधीरियम् ॥

सदृशार्थं विनैवेयं क्लृप्ता सादृश्यधीर्यदि ॥ ७० ॥

[So far, Sureśvara has explained the meaning only of *na* in *na tadidambuddhyaḥ* ... (BUB p. 22). Now he explains the remaining part of the statement.]

In the first instance¹, since you hold that (in a cognition of similarity, the two similar objects) do not grasp each other², whence³ does this knowledge of similarity (arise) then? And, (you entertain that), if there is this knowledge of similarity, then (you have entertained that, viz. the notion of that knowledge) even without the existence of similar objects³. [70]

The Buddhists hold that knowledge occurs of itself (i.e. it is *svayamvedya*). Therefore, the question arises as to who grasps the similarity between 'this' and 'that'. The notion of *svayamvedyatva* stands therefore in the need of explanation of the problem: Do they, i.e. this and that, grasp each other as similar? It cannot be answered? Therefore, the question: 'Who grasps this similarity?' remains unanswered.

¹This is the meaning of *tāvat*.

²It literally means 'do not have the each other as the object of its knowing.'

³If both this and that are momentary then the notion of the knowledge of similarity between themselves on the part of each of them is baseless. This is so, because similarity can be grasped only when both the subject and the object co-exist and are not *svayam-vedya*.

मृगाम्बुधीवन्मिथ्यात्वं स्यादेवं तदिदं धियोः ॥

असद्विषयतैवेह सर्वासामपि चेद्वियाम् ॥ ७१ ॥

नैवं बुद्धेरपि तथा ह्यसद्विषयता भवेत् ॥

अस्त्वेवं सर्वबुद्धीनां मृषात्वमिति चेन्मतम् ॥ ७२ ॥

नैवं स्यात्सर्वबुद्धीनां मृषात्वे मित्यसंभवात् ॥

कारणस्यास्तित्ता तस्मात्सिद्धा कार्योद्भवात्पुरा ॥ ७३ ॥

[This is the refutation of the three Buddhist schools: In line 1 of verse 71, the Bāhyārthavādins; line 2 of verse 71 and line 1 of verse 72, the Vijñānavādin; and the line 2 of verse 72 and line 1 of verse 73; the Śūnyavādin—finally, line 2 of verse 73 states the Siddhānta.]

Thus¹, there would be two false knowledges: (i) of this and (ii) of that exactly as that of a mirage². (If it is said;) let all knowledges have (only) non-existent objects, [71]

this is not so, for in respect of momentary knowledge also, the situation would be that there is a non-existent object of knowledge. If it were held that all knowledges are but false, [72]

this would not be so, because there would then be no possibility of any knowledge. Thereby is established the existence of the cause before the production of the effect. [73]

¹It means to say: It follows from the above argument.

²The mistake in respect of a mirage lies in wrongly apprehending water in the place of thin air.

In verses 74-107 Sureśvara has undertaken to prove the previous existence of the cause and the effect before the latter came to be produced. In the earlier portion, he explained the existence of the cause; now, he explains how the effect (also) existed. This is an explanation of *kāryasya cābhivyakti-lingatvāta* . . (BUB p. 22).

कार्यस्यापि यथाऽस्तित्वं तथेदानीं प्रपञ्च्यते ॥
सत्त्वपूर्वमिदं कार्यं तमोन्तस्थघटादिवत् ॥
तस्याभिव्यक्तिधर्मत्वादन्यथा स्यान्नृशृङ्गवत् ॥ ७४ ॥

Now is explained in detail¹ how there is existence of the effect. This² effect has existence (even) before (it is produced) like that of a pot which remains in darkness,³ for it has the characteristic of being revealed⁴. If this were not so, it would be like the (never existing) horns of a human being.

[74]

¹The denominative root *prapañcaya-* means 'to explain in detail'.

²The word *idam* refers to what is directly perceptible, or, being revealed as the so-called effect.

³The example a pot that was covered in darkness before it came to be noticed is an alternative exposition of *abhivyaktidharmatvāt* which SP has explained as *sammatābhivyaktavaśād abhivyaktatvāt* (*anumeyam*).

⁴SP paraphrases: *abhivyajyamānatvāt*.

सत्यामपि च सामग्र्यां बन्ध्यापुत्राद्यसत्त्वतः ॥
विज्ञानालम्बनत्वं नो न कदाचित्प्रपद्यते ॥ ७५ ॥

Even while there exist the means¹ of knowing, the son of a barren woman etc.², they owing to their non-existence (are not seen); but (in respect of the knowledge of the cause and its effect) it does not stand to reason (to say that) there is no basis for knowing (these)³.

[75]

¹That is to say, eye, light etc.

²The word *ādi* refers to *nṛśṛṅga*, *khapuspa*, and other such falsely conceived existents (!).

³Idea (*viññāna*) is the basis for knowing them.

सर्वं सदेव चेदिष्टमुपलभ्येत ते सदा ॥

सामग्र्यां घटवत्सत्यां सर्वं सद्वादिनो ध्रुवम् ॥ ७६ ॥

[This is an objection.]

(One might object): If you accept that all this (world of effects, viz. objects of knowledge) ever obtains as existent, then, so long as there exist the means of knowing (the same), in the same way as a pot, everything would be for the Siddhāntin invariably existent. [76]

न विद्यमानमात्रेण ह्यभिव्यक्तिरपीष्यते ॥

सदेव वस्त्वभिव्यक्तं च तथाऽव्यक्तं लक्ष्यते ॥ ७७ ॥

[This is the answer to the objection in the previous verse.]

(We say:) (No, it is not so.) Indeed¹ we do not accept even² manifestation (of an object as previously existent) by its mere existence; (in our opinion); an existent object is noticed to become manifest and also (that which can remain) unmanifest.³ [77]

This argument is in answer to two doubts: (1) Whether being existent at this moment is alone the basis of the ever existence of the cause; and (ii) whether it is mere existence of the means of knowing it.

¹The word *hi* is paraphrased by SP thus: Accepting that all are ever existent (read: *sarvasammatidyotanārtho hiśabdaḥ*).

²The word 'etc.' refers to the existent object's use in human dealings.

³Only existent can manifest itself in various forms (*āvirbhāva*) or withdraw (i.e. conceal) some (or all) of its forms (*tirodhāna*).

अङ्गीकर्तव्यमेतच्च भवद्भिरविशङ्कितैः ॥

न चेद्वः सर्वसिद्धान्तो नश्येत्सैकतकूपवत् ॥ ७८ ॥

And this view is to be accepted by you without having any doubt.¹ If you do not do so, your entire doctrine would topple down (lit. get destroyed) like a well of sand.² [78]

¹The argument is: An effect cannot be said to exist while all the factors which cause it are noticeable, since (according to the Naiyāyika) there is a relation between the two as the antecedent and that which follows it. This sets aside the possibility that only a previously existent effect comes to get manifested.

²The Naiyāyika is a realist and, therefore, by accepting what is said in the previous line, he has to give up realism and accept the unreality (or, non-existence) of an effect—that is, he would be reduced to the position of a Kṣaṇikavādin.

प्रमाणव्यतिरेकेण प्रमेयोऽर्थो भवन्भवेत् ॥

मानादव्यतिरेके हि मानमेयौ न सिध्यतः ॥ ७९ ॥

An object of knowledge exists (only if it exists) apart from the one who knows (it)¹; (and) if the knower were not apart from the means of knowing, it would not be possible to hold that there exists knowledge and the means of knowing.² [79]

The verse has a basis in the Vijñānavādin's view that both the knowledge (of an object) and the object of knowledge are but Ideas and it answers in two separate lines, two questions: (i) Should one include knowledge in the means of knowing? and (ii) Should one include the means of knowing in knowledge?

¹This is the answer to the first question. It is possible to say that there is some object of knowing, if it were different from some knower of it.

²This is the answer to the second question. One cannot posit two entities as knowledge and the means to it, if they were but one idea.

कारणस्यापि नास्तित्वं कार्यासत्त्वे प्रसज्यते ॥

न हि कार्यमनाश्रित्य कारणं जगतीक्ष्यते ॥ ८० ॥

And, further, in case one accepted the non-existence of an effect (before its effect was produced), there would follow the contingency that the cause also did not exist, for indeed nowhere in the universe is seen any cause which is not related to an effect. [80]

This has a reference to the Asatkāryavāda of the Naiyāyikas, who hold that an effect did not exist before its production. There are two possibilities as to how this is so: (i) There never existed any effect, and (ii) there were no means of its production. The second question only has to be answered. This is done in this verse. The second line points out how cause and effect are only inter-related and, therefore, one cannot exist in the absence of the other.

सत्तामात्रेण किं कार्यसमवाय्यादि कारणम् ॥

साधयेद्व्यापृतं वेदं तथाऽपीष्टं न सिध्यति ॥ ८१ ॥

[The edition of NKL correctly reads *samavāyyādi* and *kāraṇam* as two words.]

[Up to verse 80 Sureśvara refuted Satkāryavāda represented by the Tārkika and some Buddhists who also are good logicians. Now, verse 81-87 are *anukta* portion in the comments of Saṅkara, but implied by him.]

(The question is:) Is it that causes, beginning with the invariable antecedent cause¹, produce any effect by mere existence of them? or (would they produce that), being active²? (Whatever be it), the desired³ (absence of relation between the cause and the effect) does not get established.

[81]

There are two possibilities which would be thought by the Tārkikas; viz. (i) the cause does not operate, yet it produces the effect by its mere existence; and (ii) the cause operates and then produces the effect. In verses 81 onwards, Sureśvara refutes Ārambhavāda of the Tārkika.

¹The Tārkika enunciates three causes, *samavāyi*, *asamavāyi* and *nimitta*.

²*vyāpṛtam vā* implies *avyāpṛtam*; this latter is the basis for verse 85.

³The Tārīkika wants to establish the absence of the effect.

सत्तामात्रेण चेत्कुर्यात्कारणत्रितयं तदा ॥

कार्योत्पत्तिस्थितिलयाः प्राप्नुयुर्युगपत्सदा ॥ ८२ ॥

अविशेषाच्च सत्तायाः सर्वतः सर्वसंभवः ॥

सर्व एव न संसिध्येद्व्यवहारश्च लौकिकः ॥ ८३ ॥

त्रीण्येव कारणानीति निष्फलावधृतिर्भवेत् ॥

यथा त्रयं तथा सर्वं सत्तया किं न कारणम् ॥ ८४ ॥

If the three causes would produce effects (i.e. results) by their mere existence, then (i.e. in that case) production, existence and merger of effects would ever be occurring (lit. obtaining) simultaneously¹. [82]

And (in this case), since (mere) existence (of the causes) has not undergone any change,² there would be the possibility of the production of all (kinds of) things from all other things and consequently all the worldly dealings of (cause and effect) would not be possible).³ [83]

(Furthermore) (the emphatic) assertion (i.e. enunciation) that there are only three causes would be meaningless. As you accept the three causes as mere existent (and responsible for the production of effects), why would you not accept (i.e. mention) that all things can together be the cause by their mere existence?⁴ [84]

¹This refers to the impossibility of making one cause from another.

²This means that each of them would remain as some existent and would be incapable of giving rise to any effect (that is change). There would be these causes existing in mere name—and not meaningfully so !

³NKL points out how one, who is desirous of obtaining oil, would not avoid using milk as the material for producing oil.

⁴This has reference to the statement *sarvataḥ sarvasambhavaḥ* in verse 83.

संभूय कार्यं कुर्याच्चैत्कारणत्रितयं तदा ॥
मेलनस्यापि कार्यत्वात्कथं तत्स्याचयं विना ॥ ८५ ॥

If the three causes would operate together¹ (i.e. produce an effect), then their coming together² also being an effect, (one should have to explain) how that would be possible without the three. [85]

¹See note 4 under verse 81 above.

²A variant reading is noted in NKL: *melaka* for *melana*. But this reading does not seem in any way significant. The text of NKL accepts *melaka*. In case the reading of NKL is accepted, the *melaka* should be distinct from the three causes, either related or unrelated to the three causes. But the words *melakasyāpi kāryatvāt* do not get explained satisfactorily. And NKL is silent about the same !

कारणत्रितये नाथ एकैकस्य प्रसिध्यति ॥
तस्य तस्य तथैवेति सानवस्था प्रसज्यते ॥ ८६ ॥

Also the (operation) of any one among the (group of the) three causes cannot stand to reason (i.e. cannot produce an effect), (for), then it would each require in the same way (an operator bringing the three causes together) (and) thus¹ there would result *infinite regress*. [86]

SP explains that the absence of Saṁdhi in *nātha ekaikasya* is purely the author's choice: *vivakṣito hi saṁdhir bhavatīti manyate*. The edition of NKL reads: *kāraṇatritayeṇātha*. Translation, in that case, would be difficult. Translation here follows the AnSS text. Further, SP shows *atho* as a variant for *atha* and points out that it would be the sense of *api ca*.

The argument in this verse would set aside the Ārambhavāda.

¹SP points out that *sā anavasthā* 'such *infinite regress*' would follow also if Kṣaṇikavāda is accepted.

वस्तुनः सदसत्त्वाय ह्यभिव्यक्त्येकहेतुतः ॥

ऐश्वर्यं न प्रमाणस्य सत्त्वं वस्तुबलाद्यतः ॥ ८७ ॥

The means of knowing does not indeed have any strength (i.e. capacity) for (establishing) the existence or non-existence of a thing, because it is only the cause of revealing the thing (and also) because the existence (of a thing gets established) in its own right.¹ [87]

¹SP points to the instance of a hidden treasure, which is not seen by one and yet exists in its own right. This sets aside a possible argument: *yad upalabhyate tad eva sat* 'only perceptible is existent'.

द्वैविध्यादावृतेः कार्यं नेक्षते तेन संवृतम् ॥

लब्धात्मकस्य कुड्यादि प्राक्सूतेः कारणावृतिः ॥ ८८ ॥

[Upto verse 87, Sureśvara explained the meaning of the word *na* in *na dvividhatvāt* of BUB (p. 23). Now follows the explanation of *vidyamānasya prāg anupalabdhinimittam dvividhatvāt*.]

Since what covers¹ effect (a thing) is of two types, one does not see the effect which is covered by that (viz. the covering).² (The two-fold covering is thus explained: (i) Thatched wall etc. (is the cover) for what has come into existence³ and (ii) (there is) covering (of the effect) by the (material) cause before the production.⁴ [88]

This explains why an (earlier) existent effect is not perceived (*anupalabdha*) before it is (said to be) produced.

¹This means 'It keeps the cause and the effect obscure'.

²There is a variant *neksyate*, whose translation could be 'an effect is not perceived covered as it is by that (covering).' It is possible that this variant could be the correct word intended by Sureśvara—cf. *kimartham nopalabhyate* in verse 90 below. However, both the AnSS edition and the NKL edition ignore this variant.

³A pot, for instance, or anything within a hamlet.

⁴That remains unseen and therefore *anupalabdha*.

मृदात्मनोपसंश्लिष्टं कार्यं कारणतामितम् ॥
कारणत्वाद्वि तत्स्थं तत्तदृते कारणं कथम् ॥ ८६ ॥

(Indeed) an effect (viz. a pot) which is covered by clay was (at that time) in the state of the cause¹. Because (clay) is its cause, that (viz. the pot) is abiding in it (viz. clay²). How indeed could (clay) be the cause without that (viz. the effect) (that was not in existence)?³ [89]

¹In normal life one notices a wall etc. as covering a pot etc. That means: The two exist apart from each other.

²Before the production of the pot, it does not have any shape and also the name pot. It remains in the form of clay—this is its being covered by the latter.

³Unless there was clay etc. (i.e. cause), the pot etc. (i.e. the effect) could not be produced.

यदि कारणसंस्थं सत्तन्निमित्तं च कारणम् ॥
व्यवधानान्तराभावात्किमर्थं नोपलभ्यते ॥ ८७ ॥

One might ask: If (an effect) is existent in (the state of) the cause and the cause is for (the manifestation of) the thing, then, in the absence of any other covering, why is it that it (viz. the effect) is not perceived¹? [90]

This means 'both the cause and the effect, being ever existent, the effect should be noticeable (*sadopalabdha*)'.

¹Cf. note 2 under verse 88 above.

कार्यान्तरेण संस्थानान्मृदादेर्नोपलभ्यते ॥
सदात्मनोपलब्धिस्तु न कदाचन हीयते ॥ ८९ ॥

[Now Sureśvara introduces the thought regarding *abhibyakti* 'manifestation' and *tirobhūti* 'concealment' of an effect.]

(A pot etc.) is not perceived since other effects (of clay etc.) are in existence, but the perception (of the effect) as of the nature of an existent is never wanting (lit. lost). [91]

The basis for this verse is a doubt as to whether a pot etc. has some other particular form at the time of its existence prior to its production. The answer is: A pot etc. existed only as clay etc., even though this latter took the shape of a lump etc. before it finally took the shape of a pot etc.

नष्टोत्पन्नसदभावशब्दप्रत्ययभेदधीः ॥

अभिव्यक्तिरोभूतिद्वैविध्यापेक्षयैव तु ॥ ९२ ॥

The various knowledge (about an effect, e.g. a pot) arises from the meanings of words, 'destroyed, produced, extant and (its) absence owing to its dependence on two-fold state, viz. manifestation (of the form) and the concealment (of the same, or of some of its parts). [92]

The linguistic usages do not cause the destruction etc. of an effect; they indicate the states in which the ever-existent effect has become perceptible.

कुड्याद्यावरणं दृष्टं भिन्नदेशं सदावृतात् ॥

कुम्भाद्यभिन्नदेशस्थं पिण्डाद्यावरणं कथम् ॥ ९३ ॥

(An objection is raised:) A covering such as wall etc. is ever seen to be abiding in a region different from that of what is covered.¹ Therefore, how can the cover, viz. lump etc. be said to exist in the same region as that of a pot etc.?

[93]

¹The idea is: We notice that a thatched wall, which can cover (i.e. conceal) a pot, can exist in a place where there is no pot etc.—that is to say: The thatched wall and the pot are perceived to be in two different places. So, what covers (*tirodhāyaka*) and what is covered (*tirohita*) should be perceived in different places.

नैवं पयोघृतादीनामेकदेशत्वदर्शनात् ॥ ९४ ॥

अनावरणता चेत्स्यात्कपालादेर्घटात्मनि ॥

अन्तर्भावान्न साध्वेतद्विभक्तानां भवेद्यतः ॥ ९५ ॥

आवृतत्वमथ मतं भङ्ग एव प्रसज्यते ॥

यत्नो न तु घटोत्पत्तौ नैवमप्युपपद्यते ॥ ९६ ॥

न हि लोकेऽस्ति नियमो घटाभिव्यक्तिहेतुकः ॥

अनेकसाधना यस्मादभिव्यक्तिरिहेक्ष्यते ॥ ९७ ॥

(In verses 94-97, Sureśvara discusses whether what covers and what is covered abide in the same place (*samānadeśatva*) or whether they are related to only one (common) cause (*ekakāranatva*). Verse 93 sets aside *samānadeśatva* and verse 95 refers to *ekasrayatva*.)

(The answer is:) This is not so, for we notice (different forms such as) milk, ghee etc. (of an existent) as abiding in just one region¹. [94]

If (one were to say that) a potsherd etc., that rests in (clay which is) the material cause² of the pot, does not have any covering (for the pot); then (we say;) it would not be proper (to say so), for there could be (in a potsherd etc.), the character of a cover³ (for the pot) only when they are different⁴, (from the pot etc.). [95]

If it is held that (what they call an effort (for producing a pot) is really an effort for destroying its covering (viz. potsherds) and not for the production of the pot; that also does not stand to reason, because there is not in this world [96]

only one particular rule⁵ with regard to the manifestation of the pot; and indeed that manifestation is noticed to result from many means (of production).⁶ [97]

The idea is: According to the objector's view, *mṛd* 'clay' first undergoes a change and becomes *kapālas* 'potsherds' and these later on go to make a pot. Thus both the potsherds and the pot

have but one material cause, i.e. they are *ekāśraya*. This objection is answered on two counts: (i) The potsherds are considered as the cause of the pot, while they persist only in that the clay that has formed the pot (and not any (other) clay)—that is, the objector's view suffers a defect called *siddhasāadhanatā*. (ii) While the pot is yet to be produced, the potsherds are also not there and, therefore, it could be easily understood that they cannot cover the pot—this is the fault called *hetvasiddhi*.

¹Milk and water (better, however, 'curds') are, contrary to the example cited by the objector, seen to obtain in but one place. The two have a capacity to cover each other (*parasparāvara*).

²*ghaṭātmani* = *ghṭāvasthamṛnmātravṛttitva*.

³Translation follows NKL reading *āvṛtitvam* for BUBV reading *āvṛtatvam* (in verse 96), for the author intends to convey the sense of *āvaraṇatva*.

⁴*vibhakta* = *bhinna* = *ghaṭasya kapālādeś ca svāśrayamṛdavavabhinnatā*.

⁵This is stated in the next verse.

⁶SP notes the variant which is not noted by the editors of both the AnSS edition and the NKL edition; viz. *ghaṭābhivyakti hetutaḥ* which means: 'Since there are more than one cause for the manifestation of the pot.'

āvaraṇabhāṅga alone is not sufficient for the production of a pot. This is clarified in the following verses.

दीपेनान्यो मथा चान्यस्तथा चक्रादिना परः ॥

अभिव्यक्तिं प्रयात्यर्थः पुरा सन्नेव सर्वदा ॥ ९८ ॥

Indeed some object becomes manifest by a lamp, some other (viz. butter) by the churning rod and yet another (viz. a plate made of clay) by a wheel etc., (each of these) being ever in existence before.¹

[98]

This refers to the removal of what obscured the perception of the so-called effect, not to its production.

¹This is to stress that, despite the different types of mani-

festations (mentioned here), there is but one single fact noticeable: *pūrvam sann evārtho vyajyate/na tatsattve bhedaḥ* (SP).

तमोविनाशनायैव प्रदीपोऽपीति चेन्मतम् ॥

नष्टे तमसि कुम्भोऽपि स्वयमेवोपलभ्यते ॥ ९९ ॥

If it is held that a lamp etc. are (used) only for the destruction (i.e. removal) of darkness, then even a pot etc.¹ would of itself be perceived (i.e. revealed) when darkness (etc.) is removed.

[99]

This verse refers to a possible objection by someone. He implies that the lamp etc. merely destroys darkness etc. and it does not make the pot etc. manifest; this implication is specifically brought out in the next verse.

¹The word *api* after *pradīpa* in the verse indicates to the other *sādhana*s, viz. *manthana-daṇḍa* and *cakra* which are mentioned in the preceding verse. So also, *api* after *kumbha* refers to *navanita* and *tamaḥ* indicated in that verse.

किमेवं भवतः सिद्धं यदि नाम तमोहनुतिः ॥

सदेव व्यज्यते सर्वमिति नैवापनुद्यते ॥ १०० ॥

What indeed do you have established, if it is held that there is (merely) removal of darkness (etc.)? (Indeed the rule, viz.) all that is ever existent before becomes revealed, cannot be set aside.

[100]

This verse answers the implication of the objector of the previous verse. It points to that the objector has unwittingly accepted Satkāryavāda.

अज्ञातत्वापमाष्टर्चर्थमुपादित्सन्ति मानिनः ॥

मानानि मानसंबन्धादज्ञातत्वं च नश्यति ॥ १०१ ॥

Those who have (i.e. employ) the means of knowing wish to take up (i.e. employ) the means for wiping away

(i.e. removal of) the unknownness (of the object that is unknown.) (Only) when there is a connection (of any object of knowledge) with a means of knowing, the unknownness (of that object) is removed (lit. destroyed).

[101]

The preceding four verses called for explanation of the function of manifestation of some object which is different from its actual production.

यतः सति क्रियाभेदे किं पूर्वमिति चोदना ॥

क्रियाभेदे न च न्याय्यं ध्वान्तनाशः क्रियाफलम् ॥ १०२ ॥

ज्ञातुर्ज्ञानाभिनिष्पत्तिर्निष्पन्नं मेयमेति सत् ॥

मेयाभिसंगतं तच्च मेयाभत्वं प्रपद्यते ॥ १०३ ॥

[These verses explain that it is not proper to raise the question of *paurvāparya* in respect of the manifestation of an object vis-a-vis its production. There is behind this discussion the following implied doubt that can be raised by someone: The previous verse refers to the connection of a means of knowledge with an object of knowing and also to the removal of ignorance in respect of that object. Which is earlier, knowledge of the object (e.g. a pot) or the removal of ignorance in respect of it?]

For, the question 'what is prior?' is raised (only) where there are different actions, and it is not proper (to ask that question) where there is non-difference in respect of them. (Now, in respect of the illustration of the lamp etc.), the removal of darkness is the result of the action. [102]

First, there is on the part of a knower the rise of the knowledge (that there is an object)¹ then it² touches (lit. goes to) the object of knowledge³ and then, coming into contact with the object, it assumes the form of the object.⁴ [103]

It is only clear that only after the removal of ignorance (in respect of a lamp etc.) there occurs the knowledge of it (on the part of one.) This is clarified in the next verse.

¹This is *viṣayābhāsa* 'appearance of (an earlier existing) object.'

²Translation follows the reading *tat* of BVS for *sat* in BUBV and NKL.

³The appearance of the object to one.

⁴This refers to *viṣayākāratā* of the intellect of the knower. This is to say: Intellect (*Buddhi*) grasps the appearances of an object before the knower and assumes its shape. Thus, it removes the cover on the object (i.e. manifests it) that is *ajñānahāni*. This is to say: *ajñānahāni* and *ghaṭajñāna* are not two actions or happenings—and that explains the significance of *kriyābheda* = *kriyā-abheda* in verse 102. All these make up a knowledge-situation. Cf. *jñānasya utpatti-viṣayasambandha-viṣayākārabhajana-ajñānahānānām kramah suprasiddha ity arthah* (NKL).

व्यवधानं तमो यस्माद्वटोज्यमिति संविदः ॥

प्रकाशवद्वटं चर्ते कुतस्तत्तमसो ह नुतिः ॥ १०४ ॥

Since darkness¹ is an obstacle to (i.e. the curtain over) the knowledge 'this is a pot', (there is no knowledge of it).² Whence can there be concealment (i.e. removal) of darkness, if there does not exist a pot which is pervaded by light?³ [104]

¹This means 'ignorance'.

²This is implied. Only then, the meaning of the first line becomes clear.

³There is need of light which manifests a pot. Thus, it is a means of knowing the pot. Knowledge of the pot is the result and that is equivalent to the removal of the ignorance about it—this was pointed out by *kriyāphalam* in verse 102 and is clarified in verse 105.

प्रमाणव्यापृतेर्ज्ञातोऽज्ञातत्वहानिकृत् ॥

घटोऽवगत इत्येतत्ततः संपद्यते फलम् ॥ १०५ ॥

A pot which was formerly unknown now becomes known thanks to the operation of the means of knowing and

therefore becomes the destroyer of its own unknownness. Thereafter follows this result, viz. (the awareness that) this pot is (now) known.¹

¹SP reads *tataś cādānādivyavahārasiddhiḥ*. Further, NKL makes a note-worthy observation: *ato vyañjakasya nāvaraṇabhaṅga eva yatnaḥ*—this refers to verses 96 and 97 above.

यद्यावरणभङ्गाय यत्नः स्याद्वटवित्तये ॥

कार्यान्तरं भवेद्भङ्गात्तेनाप्यावृतता घटे ॥ १०६ ॥

[Here follows further discussion of *āvaraṇabhaṅga*.]

(This is an objection:) The effort for destroying the cover (on a pot) were to be made (only) for knowing the pot, then there would arise another result (or effect¹) from the destruction (of the cover) and thereby also would there be the state of being covered (in respect of that) pot (yet further). [106]

¹This refers to the powdered clay of the lump etc. (*vidala-cūrṇādi*). And that would still cause the concealment of the pot.

व्यवधानान्तरं तस्मादन्यदप्यापतेत्तदा ॥

अतो नियत एवात्र व्यापारः फलवान्भवेत् ॥ १०७ ॥

Then there would follow from that yet another obstacle (to the perception of the pot) and therefore only a specific activity (of the means of knowing) would have here¹ the (desired) result. [107]

If one still persisted to hold *āvaraṇabhaṅga* in respect of *vidala-cūrṇādi*, there would follow further obstacles in the form of yet other effects in *infinite regress*. NKL adds: *tasmād arthavyaktyartho vyañjakavyāpāro 'rthavān*.

¹This means 'knowing a pot'.

अतीतैष्यद्घटज्ञानं सद्घटालम्बनं भवेत् ॥

घटज्ञानत्वतः साक्षादिहत्यघटबोधवत् ॥ १०८ ॥

अतीतोऽनागतोऽर्थोऽस्यदि वाभ्युपगम्यते ॥

अतीतानागतज्ञानं मिथ्येशस्य प्रसज्यते ॥ १०९ ॥

प्रत्यक्षं नापि चेशस्य केनचित्प्रतिहन्यते ॥

अपविद्धातिशीत्येव तज्ज्ञानं केन हन्यते ॥ ११० ॥

घटसत्त्वे पुरोत्पत्तेरनुमा च प्रदर्शिता ॥

तस्मात्सदेव कार्यं स्यात्प्रागुत्पत्तेरपि ध्रुवम् ॥ १११ ॥

[Verses 108-111 explain another reason for holding all-time existence of the effect. They explain *atitānāgatapratyayabhedāc ca* (BUB p. 25). Before verse 108, Sureśvara has refuted the arguments regarding (i) non-perception of a pot which had not been produced, and (ii) inference related to the non-manifest pot. But, since they make effort towards the production of a pot that will come into existence and also they accept the knowledge on the part of Yogins of the pots in the past and also of the future, he proceeds to discuss the same.]

The knowledge of a pot which has been existent in the past and of that which will be existent in future would be dependent on (only) an existent pot, since it is the knowledge of a pot comparable to the direct perception of a pot that exists here (in front of us). [108]

If one were to accept an object as non-existent in the past¹ and (also) in the future², there would follow the contingency that the knowledge of the Lord in respect of the past and of the future² is (or, has to be) held as false !³ [109]

And the direct perception by the Lord (of any object) is not objected to by any one. Who then can object to His knowledge which has set aside (the possibility of) any excelling (knowledge)? [110]

And we have (already) adduced the reason for proving the existence of a pot (even) before the production (of it).

Therefore, it is certainly that an effect exists even before its production. [111]

¹This means 'Before its production.'

²This means 'After it is destroyed.'

³The Tārkaika accepts that the Lord is possessed of *atīta-anāgata-jñāna* and, therefore, the knowledge of an object non-existent in the past and in the future which he has attributed to Him would have to be declared as false (*mithyā*). This should mean that the Tārkaika is involving internal contradiction in his philosophy (*bhrāntatva*).

एष्यद्घटनिषेधे च विरोधोऽपि प्रसज्यते ॥

भविष्यति न भाव्यर्थो वर्तमाननिषेधवत् ॥ ११२ ॥

[Verses 112-119 are refutation of the argument of those of who posit the non-existence of an effect.]

And¹ in case one rejects (the existence of) a pot which is going to come into existence also,² there forcefully follows opposition; to say that a forthcoming object will not be in existence is like denying the existence of an existent pot.

[112]

This argument pertains to the state of a pot at the time when one is active in producing it.

¹This connects the argument of the verse with that in verse 109 above.

²This implies the existence of a pot that existed in the past.

गृह्यमाणो घटो नासन्निति यद्वद्विरुध्यते ॥

अतीतैष्यन्मितघटप्रतिषेधस्तथाविधः ॥ ११३ ॥

As a pot which is being grasped (i.e. seen) cannot be denied by (saying that) it is not existent, so also there cannot be the denial of a pot known as of the past or as one coming into existence (in future).

[113]

This pertains to *atha prāg utpatter ghaṭo 'sann iti....* (BUB p. 26).

This first line of the verse has to be construed thus: *yadvad grhyamāṇo ghaṭo asann iti na virudhyate*. SP notes *no 'sanniti* as a variant for *nāsann iti*; this is confirmed by the edition of NKL.

प्रागभावादयोऽभावाः सन्तः स्युरतिरेकिणः ॥

व्यपदेशाद्धटेनैषामन्योन्याभाववद्ध्रुवम् ॥ ११४ ॥

(One might object:) The non-existences, viz. prior non-existence etc.¹, which are existents distinct² (from a pot etc.) would certainly be existents on account of their mention apart from that of a pot (etc.) just as in the case of mutually exclusive objects.³ [114]

The argument is based on two considerations: (i) *prāgabhāva* etc. are mentioned as distinct *padārthas*, and (ii) the notion of *anyonyābhāva* can be entertained (only) if there are two distinct *padārthas*.

¹There are in addition: *dhvaṁsābhāva*, *atyantābhāva* and *anyonyābhāva*.

²The word *atirekiṇaḥ* literally means 'having an existence apart from or over and above (a pot).'

³The idea is: As *ghaṭe paṭo nāsti* and *paṭe ghaṭo nāsti* point to two mutually exclusive existents, so also would *ghaṭe prāgabhāvo nāsti* and *prāgabhāve ghaṭo nāsti* show the two as distinct existents.

एवं च सति संबन्धो न भावाभावयोर्मिथः ॥

विरोधाद्भावयोर्यद्वदेकत्वान्नाप्यभावयोः ॥ ११५ ॥

[This is the answer to the objection above.]

In case this is so, there would be no mutual connection between an existent and its (previous) non-existence owing to their mutual opposition. (So) also, there cannot be any connection between two non-existences like that between two existents since these two are of but one nature. [115]

The idea is : When there is *prāgabhāva* (or any other *abhāva*) of a pot, there is no *bhāva* 'existence' of it and, consequently, any connection between them (e.g. *anyonyābhāva* of them) cannot be established.

असतश्च न संबन्धोऽकारकत्वात्कथंचन ॥

संबन्धश्च क्रियात्मत्वान्न सिध्येत्कारकं विना ॥ ११६ ॥

Further, what is non-existent does not have any connection whatever (with an existent), because it (viz. the connection) does not have a cause¹ for producing it. And since (bringing about) a connection has the nature of an action, it would not be brought about in the absence of any agent.²

[116]

This is yet another argument as to why the non-existence cannot get connected with an existent.

¹*akāraakatva* = *akāraṇatva*.

²*kāraka* = *kartr*. The idea is based on the explanation of *sambandha* which is either *samavāya* or *saṃyoga* and which gets established owing to some factor determining it (*kāraṇa*) or by the effort of some agent (*kartr*).

प्रागभावो घटस्येति घट एवोच्यते यदि ॥

घट एव घटस्येति व्यपदेशो न युज्यते ॥ ११७ ॥

If (one might argue:) By saying 'there is previous non-existence¹ of a pot, we refer only to that pot itself, then (our reply is:) In that case, the mention (which is tantamount to saying) 'there is a pot of a pot' would not stand to reason.

[117]

¹Previous non-existence is indicative of other *abhāvas* of the pot.

न चासत्त्वं घटस्यैवं प्रागभावो घटो न च ॥

अवध्यवधिमद्भूदे प्रागभावोऽपि सिध्यति ॥ ११८ ॥

And this cannot prove the (previous) non-existence of a pot; so also is not the prior non-existence of the pot the pot (itself), for when distinction is accepted (between a limiter¹ and the limited (viz. the pot) the prior non-existence (of the pot, for instance,) also gets established. [118]

¹NKL: *avadhiḥ pratiyogī, tadvān abhāvaḥ*. This points to a pot and its prior absence.

अथ प्रकल्प्य संबन्धं घटस्येत्यभिधीयते ॥

क्लृप्तस्यैव ह्यभावस्य व्यपदेशः प्रसज्यते ॥ ११६ ॥

Now, having imagined the relation of the prior non-existence (of a pot) and the pot, (one says) that there is prior non-existence of the pot, then it will be contingent that there is the name (pot) for even (this) imaginary non-existence. [119]

The argument in this verse is based on an imaginary connection between previous non-existence (of a pot) and the pot and which is similar to the imaginary connection between an individual (body) and sentience. SP significantly points to such a connection as is understood in the phrase 'Rāhu's head,' which, in reality, does not belong to a full intact body.

अर्थान्तरमभावश्चेदुक्तं संस्मर्तुमर्हसि ॥

शशशृङ्गादिकल्पस्य घटस्य स न युज्यते ॥ १२० ॥

स्वहेतुसत्तासंबन्धः संबन्धस्य सदाश्रयात् ॥

(If it is said:) non-existence is (altogether) a different object, then you (i.e. who say this) should remember our argument made earlier,¹ viz. that (connection) of the pot which is (imaginary) like the horns of a hare, [120]

with the existence of its own cause is not logically understood, since (such) connection rests (always) on what are existent objects. [121^{ab}]

¹This is verse 11 above : *vyatireke sad evāsat*. One cannot say that one of the two connected things is real and the other, unreal, for, in so saying, one makes a positive mistake.

अथास्त्वयुतसिद्धानां नासतोऽयुतसिद्धता ॥ १२१ ॥

[Verses 121^{cd}-122 are a discussion of the Tārkaika's notion of *janma* of an object which was non-existent before. It consists in either *sattāsamavāya* or *svakāraṇasamavāya*.]

Now if (someone were to say:) let that connection obtain between things which are inseparably associated, (our answer is:) There is no inseparable association of a non-existent (with an existent).

[121^{cd}]

न भावाभावयोर्योगो नापि चायमभावयोः ॥

सतोरेव यतो योगः सिद्धं कार्यमतः सदा ॥ १२२ ॥

[This explains *asmāt sad eva kāryam prāg utpatteḥ* (BUB p. 29).]

There is no connection between existence and non-existence; not also is there a connection between two non-existences, since there is a connection only between two existent things; therefore, the effect is ever an established entity.

[122]

द्वैतैकत्वात्मकं रूपं वैराजं कार्यमात्मनः ॥

समुद्र एव ह्यस्येति विराट्कारणमब्रवीत् ॥ १२३ ॥

[Verses 123-124 explain the meaning of the word *mṛtyu* in *mṛtyunaivedam āvṛtam āsit* (BUB 1.2.1).]

The form which is of the nature of oneness in duality is (the form of) Virāj and (also) an effect of the Ātman; (the Śruti¹) has declared Virāj as the cause of this (world) in the words 'just the Samudra...'

[123]

¹SP points to *agnir mūrdhā* . . as the Śruti passage and shows that it is followed by the Smṛti : *apa eva sasarjāda* . . (*Manusmṛti* 1.8^{cd})

संभूय कार्यभूतानि भूतयोनिं यतो विभुम् ॥
जन्मस्थितिलयान्यान्ति समुद्रस्तेन विश्वकृत् ॥ १२४ ॥

Since all the beings which have been effects, having attained their birth, sustenance and destruction in the all pervading source of the elements, merge (in it)¹, therefore, Samudra is called the maker of all (that exists). [124]

¹Cf. *janmādy asya yataḥ* (BS 1.1.2) and BSB on it.

Verses 125-148 explain how the notion about the Lord as the creator etc. of the world is but a product of Nescience.

तत्समुद्रं परं ब्रह्म संविन्मात्रसतत्त्वकम् ॥
अविज्ञातात्मयाथात्म्यं हेतुत्वेनेह शब्द्यते ॥ १२५ ॥

That highest Brahman, Samudra¹, which is merely of the nature of Sentience, and whose real nature has not been known, is mentioned here² as the cause (of the world). [125]

¹The use of the word *samudra* in the neuter is to be noted—that refers to the Brahman.

²In the sentence *mṛtyuneva*... (BU 1.2.1).

इदं जगदुपादानं सर्वशक्त्यजमव्ययम् ॥
स्वात्मैकाज्ञानवृत्तेन ग्रसिष्णु प्रभविष्णु च ॥ १२६ ॥

This, one who has this universe for the material cause (of its creation), who is omnipotent, unborn and imperishable, is, on account of the effect of its own ignorance¹ of itself, the devourer and the ruler (of this world).² [126]

¹This is to strengthen the notion of *avijñātātmayāthātmya* in the previous verse—the power of Nescience.

²Refer to the unborn Prakṛti which is the same as *avidyā*; see *Śvetaśvataropaniṣad* 4.5^{ab}: *ajām ekām lohitaśuklakṛṣṇām bahviḥ prajāḥ sṛjamānām sarūpāḥ*; *Sāṃkhyakārikā* 1^{ab}: *ajām ekām lohitaśuklakṛṣṇām bahviḥ prajāḥ sṛjamānām namāmaḥ*. However, the Brahman is not, like Prakṛti, to modify itself in reality. It appears that it has modified itself. The verse refutes a notion of those who would compare the modification of the Brahman to the modification of milk into curds.

स्वाभासवर्त्मनैवैतत्स्वात्माज्ञानजभूमिषु ॥

इतं बहुत्वमेकं सद्वियद्यद्वद्धटादिषु ॥ १२७ ॥

This unique existent has assumed multiplicity (i.e. multiple forms) in the different forms¹ (which are) produced from Ignorance of its own nature, through (its own) appearances²—(this happens) in the same way as the sky (appears) in (the form of) a pot etc. [127]

¹These are Hiranyagarbha, Virāj etc.

²This emphasises the unreal character of the worldly objects, or rather the notion that the variety of the world arises out of Nescience.

अकारणं सदज्ञानात्कारणत्वं यथैत्यजम् ॥

सर्वकारकतामेवं क्रियातत्फलतामपि ॥ १२८ ॥

As the existent which is not (in reality) a cause¹ becomes the cause² on account of Ignorance,³ in the same way it attains the character of the maker of all and the nature of all activity and its results. [128]

Here SP refers to the Śruti passages which seem to show that the Brahman is the cause.

¹The word *akāraṇa* can be alternatively translated as 'not having a cause (for its own existence),' but we prefer the translation above since the verse goes further to mention it thus:

kāraṇatvam and *sarvakāraṇatām ejati*. See also *tad etad brahmāpūrvam anaparam...* (BU 2.5.19).

²That is the origin of the world.

³This is the brief expression of the contents of the preceding verse.

साध्यसाधनतां तस्मादज्ञानैकव्यपाश्रयाम् ॥

उचैरनूद्य तत्तत्त्वं वेदान्ताः प्रत्यपीपदन् ॥ १२९ ॥

Therefore, having clearly (lit. loudly) declared time and again¹ the nature (of the Brahman) as the cause of the effects² which rests solely on ignorance (about the true nature of the Ātman), the Vedāntas have established the true nature of the same (i.e. the Brahman). [129]

This verse intends to point out the true significance of the Śruti passages which refer to the creation of the world by the Brahman (*śṛṣṭyādiśrutivākyāni*).

¹This is the force of *anu* in *anūdyā*.

²This means 'the world full of variety'.

अकारणमकार्यं सत्कार्यकारणतामगात् ॥

मोहादेव ततः शास्त्रं तदुच्छित्तौ प्रवर्तते ॥ १३० ॥

The existent which is neither a cause¹ nor an effect has attained the nature of a cause of an effect owing only to ignorance (lit. delusion); therefore, the (Upaniṣadic) lore proceeds to destroy that.² [130]

¹Cf. note 1 (on *akāraṇa*) in verse 128 above. This is supported by NKL which points to *Taittirīyopaniṣad* 2.6: *sac ca tyac cābhavat* and adds *iti sattārthabhavatiprayogāt pāramārthikam eva kāraṇatvam atrāha*.

²Read: *asyānarthahetoḥ prahāṇāya* (*ātmaikatvavidyāpratipattaye*) *sarve vedāntā ārabhyante* (BSB p. 45).

अपीताशेषसंसारं शुद्धसंस्कारसंश्रयम् ॥

अव्याकृतमिदं ब्रह्म ह्यन्तर्यामीति चोच्यते ॥ १३१ ॥

And this (very) Brahman which has withdrawn (lit. swallowed¹) the entire universe, which alone² affords support for (various) modifications,³ (and) which has not differentiated itself, is called the entrant within.⁴ [131]

¹BUBV reads *apitāśeṣasamsāram* but NKL edition reads *āpitāśeṣasamsāram*. The latter is possibly simplifying the text. Whatever be the reading, meaning remains the same.

²The word *śuddham* means *kevalam*, i.e. all by itself.

³SP rightly observes: *samśrayaśabdo bhāvapradhānaḥ samskārasya samśrayaḥ samśrayaṇam svasminn iti vā samśāradaśāto viśeṣam āha*.

⁴That which resides in every individual—the individual self. It is affected by the limiting adjuncts.

अज्ञानानुपमर्देन व्याकृतिर्यास्य जायते ॥

स्वप्नविज्ञानवन्नासौ सत्यमयव्यपाश्रया ॥ १३२ ॥

सम्यग्ज्ञानसमुत्पत्तौ हेतुत्वं तु निगच्छति ॥

निद्रां हत्वा यतः स्वप्नज्ञानादपि विबुध्यते ॥ १३३ ॥

Whatever modification¹ of this (world) is produced on account of the non-removal (lit. non-destruction) of ignorance has no basis in the true (existent) object of knowing² in the same way as the knowledge obtained (by one) in one's dream has no basis (in true objects).³ [132]

But it⁴ becomes⁵ the cause for the rise of the correct knowledge (of the true nature of the Brahman), since one is brought to reality (lit. is awakened) from the knowledge acquired in the dream after it has removed (lit. destroyed) one's sleep. [133]

¹It means appearance of the world.

²That is, the Brahman.

³This argument is similar to that in the *vaitathya-prakarana* of the *Gauḍpāḍakārikā*.

⁴SP refers it to some Śruti which might be false and can yet

become the cause for one's becoming aware of the true nature of the Brahman. This is like the argument in BSB (pp. 40 ff.) where Śruti, a false *pramāṇaprameyavyavahāra* is discussed as a means for removing ignorance.

It appears, nevertheless, that it here refers to *vyākṛti* mentioned just in the preceding verse and can include the *pramāṇaprameyavyavahāra*. It is not necessary, therefore, to follow SP.

⁵In *nigacchati*, the preposition *ni* causes no change in the sense of the root *gam*.

उपेयप्रतिपत्त्यैव प्रमाणानां प्रमाणता ॥

वस्तुस्थित्या न सत्यत्वमिति पूर्वमवादिषम् ॥ १३४ ॥

The means of knowing can really serve as the means of knowing by bringing about (the knowledge of) what is sought to be known (lit. approached). And I have said earlier that there is not (in these means) validity, owing to factual state of reality.¹ [134]

Cf. verses 126-128 and 132 above.

नामरूपादिना येयमविद्या प्रथतेऽसती ॥

माया तस्याः परं सौक्ष्म्यं मृत्युनैवेति भण्यते ॥ १३५ ॥

[Now follows the meaning of the word *mṛtyu*.]

The most minuteness of this one¹, viz. what is called Ignorance, and what (though) non-extant, amplifies itself by (bearing various) names, forms etc.² is (and is also called) *Māyā*³, is mentioned (here in the BU) by the word *Mṛtyu*.⁴ [135]

¹This refers to the commonly known ignorance also, not merely the one that is inferred from the apparent effects (as discussed in the preceding verses).

²The word 'etc.' stands for *karman*.

³The author has brought in *māyā* for showing that *avidyā* and *māyā* are but one.

⁴SP explains this as *avyaktanāmarūpa*, *adhyakṣādyayogya* and *apañcikṛtamahābhūtāvasthātirikta* and *māyārūpa*.

मृत्युर्वै तम इत्येवमाप एवेदमित्यपि ॥

अविद्या प्रथते मौली व्यक्ताव्यक्तात्मनानिशम् ॥ १३६ ॥

In the sentence 'Mr̥tyu is indeed darkness'¹ and also in the sentence 'Waters themselves are this universe'², there ever reveals the basic Ignorance³ in its form of the manifest and the non-manifest. [136]

¹*Taittiriya Brāhmaṇa* 1.4.7.5 and 7—this refers to an individual's natural (i.e. common) knowledge and activity.

²BU 5.5.1 ; this refers to it as the origin (*kāraṇa*) of waters.

³Here Sureśvara intends to convey that the two sentences refer only to *mūlāvidyā*.

एतेभ्योऽसौ समुत्थाय स्वाभासानात्मजन्मना ॥

याति क्षेत्रज्ञतामीशः कूटस्थोऽपि ह्यविद्यया ॥ १३७ ॥

[This verse shows how the Lord Himself appears as an individual self.]

Indeed, having arisen from these (known five) elements, i.e. through the rise of the modifications, that Lord¹, though immutable, becomes the knower of a field²—(this is) on account of Ignorance. [137]

¹The word *asau* refers to the one called Mr̥tyu, the Lord.

²A field is a body and the knower of a field is an individual self.

आपो ह्यणुतराः सत्यमसृजन्तेति हि श्रुतिः ॥

क्रियाविज्ञानशक्त्यात्मा सोऽपि ब्रह्मासृजत्परः ॥ १३८ ॥

Indeed the Śruti (has declared:) 'More minute (i.e. subtle) waters¹ created Truth². And that highest Lord,

who was (possessed) of the nature of knowledge for activity, created the Brahman. [138]

This verse refers to a *śṛṣṭivākya* in the Śruti which proves that the origin of the world is in fact the unmanifest and not Hiraṇyagarbha (or Mṛtyu) who is said to be overpowered by desire for food etc.

¹Read BU 5.5.1 : *satyam brahma* and BUB on it : *satyam brahma prathamajam, tad etad dhiranyagarbhasya sūtrātmano janma*—this refers to the most minute state of the waters, viz. *apañcikṛtapañca-bhūtātmakeśa*.

²This refers to the *apañcikṛta* state of them.

विराड्ब्रह्माथ ससृजे मनुं देवं प्रजापतिम् ॥

मनुर्देवान्मनुष्यांश्च स्थास्तु कृत्स्नं चरिष्णु च ॥ १३९ ॥

Then Virāj, the Brahman, created¹ Manu, the divine Prajāpati ('Lord of subjects') and Manu created Gods and human beings, the entire non-moving (lit. standing) and moving world (of objects). [139]

¹The word *sasṛje* is Vedic Ātmanepada for Parasmaipada. Possibly the Vedic passive sense is purposely conveyed by Sureśvara—that is to say; this creation is to be understood as appearance of creation.

साध्यसाधनवत्कृत्स्नकार्यरूपविवक्षया ॥

श्रुतिः प्रववृते सेयं नैवेहेतीह यत्नतः ॥ १४० ॥

This well-known (*sā*) Śruti passage, beginning with the words *naiveha* has commenced (to convey its contents) with the desire to declare specifically (the manifestation of) all the effects (comprising of) what is to be produced and what are the means of producing the same. [140]

NKL points out that Sureśvara intends to refer to BU 1.2.1—1.4.7.

अशनायापिपासाभ्यां मृत्यो रूपं प्रचक्षते ॥

प्राणस्य तत्र संवर्गाद्वागाद्यध्यात्मदैवयोः ॥ १४१ ॥

By the words *aśanāyā* and *pipāsā*, they declare the nature of Mr̥tyu. (that is) Prāṇa, owing to the absorption¹ into Prāṇa² of the different parts of the body such as speech etc.³ and of the deities superintending over them. [141]

¹The word *saṁvarga* refers to 'absorption'; cf. the story of Raikva in *Chāndogyopaniṣad* 4.3.1-3 (4.3.1 on *adhyātman* and 4.3.3 on *adhidaiva*).

²Prāṇa conveys two senses: (i) the Ātman and (ii) the wind.

³*vāgādadhyātma-* of AnSS edition is to be corrected *vāgādya-dhyātma-*

The word *adhyātmadaiva* is a peculiar compound; *adhi* is to be compounded with each *ātman* and *daiva*.

एतस्माज्जायते प्राणो मनः सर्वेन्द्रियाणि च ॥

खं वायुर्ज्योतिरापश्च पृथ्वी विश्वस्य धारिणी ॥ १४२ ॥

सृष्टिमेतां समुद्दिश्य तन्मनोऽकुरुतेति या ॥

श्रुतिः प्रवृत्ता निर्वक्तुं यावदव्याकृतं परा ॥ १४३ ॥

"From this one is born Prāṇa, *manas* and all sense-organs, sky, wind, fire, water, and further, the earth which is the supporter of all."¹ [142]

Keeping in view (the purport of) this (account of) creation (in the Śruti just quoted), the other Śruti (viz. BU 1.2.1) has proceeded to explain the same in (the passage beginning with the statement: *tan mano akuruta* etc. up to the later statement) this (world) was (then) not manifest (viz. BU 1.4.7). [143]

¹This is a quotation of the statement of creation in *Muṇḍako-paṇiṣad* 2.1.3.

यद्वा विराजमुद्दिश्य संकल्पमकरोन्मनः ॥

आत्मन्वी स्यामिति तथा साकूतः सृष्टिकारणः ॥ १४४ ॥

[This explains *tad iti manaso nirdeśaḥ* (BUB p. 29). It presents another explanation of *tan mano akuruta.*]

Or, (Hiraṇyagarbha) the cause of (this) creation, who had a thought (in mind): 'Let me be possessed of (a) self (or, a body¹), ' created *manas*, the one which collects impressions² in an orderly way (*saṁ*), having the intention of creating Virāj. [144]

¹*ātmanvi*—*ātmavān*—*aham anenātmanā manasā manasvi syām ity abhiprāyaḥ* (BUB p. 29); this should signify the sense 'possessed of a body'.

²The word *saṁkalpa* is used in apposition to *manas*; it means *saṁkalpaka*.

स्वविभूतीक्षणं सृष्टौ विभोरचनमुच्यते ॥

आपोऽजायन्त इति च सर्वभूतोपलक्षणम् ॥ १४५ ॥

[Now follows the explanation of *so 'rcan* (BUB 1.2.1).]

(This) thinking¹ about his own manifold form (lit. expansion) (on the part) of the (all-)pervader, in respect of the (proposed) creation, is called, (his) Arcana (worship). And (the Śruti sentence) *āpo 'jāyanta*² is indicative of all elements³ (to be created later). [145]

¹The root *ikṣ* means 'to think'; cf. *ikṣater nāśabdam* (BS 1.1.5). But read BUB (p. 30): *arcann arcayan pūjayan...arcataḥ pūjayataḥ* (*āpo rasātmikāḥ pūjāṅgabhūtā ajāyantotpannāḥ*) ! Also, cf. the derivation of the name Arka in verse 147 below from root *arc* 'to think'.

²SP holds the absence of *Samdhi* of *āpo 'jāyanta* and *iti* as an indication of Sureśvara's regard for the Śruti text. That is to say; one should not expect to have *āpo ajāyanteti* by mixing Vedic speech with the popular parlance.

³These are: *ākāśa*, *vāyu*, *tejas* and *prthivi* which were *pañcīkṛta*. But SP refers to *ākāśāditraya*, since the *Taittirīyopaniṣad* refers to *ākāśādiṣṛṣṭi* and Śaṅkara and Sureśvara belonged to the Taittirīya school. Read : *atrākāśaprabhṛtinām trayāṇām utpattyanantaram iti*

vaktavyam śrutyantarasāmarthyād vikalpāsambhavāc ca (BUB p. 30).
That means : *āpaḥ* is not intended.

विद्योत्पत्तिप्रधानत्वात्सृष्टिर्वा न विवक्ष्यते ॥
तथा च प्रतिवेदान्तं सृष्टिर्नानाविधेक्ष्यते ॥ १४६ ॥

[This is Sureśvara's comment on BUB p. 30 quoted above. Therefore, NKL's remark: *vārtikatvasiddhyartham vidyati*. It is to be understood, therefore, the verse 146 is a Vārtika in the sense of *duruktacintā*.]

Or (perhaps) (making any statement about) creation is not intended, owing to (the intent of the Vedānta on) considering the rise of knowledge as the principal (purpose). So indeed in the different texts of the Vedānta is noticed various (description of) creation.¹ [146]

¹SP points out that the account of creation in the *Taittiriya-paniṣad* begins with *ākāśa*, in the *Chāndogya-paniṣad*, with *tejas*, and in the *Muṇḍaka-paniṣad* with *prāṇa*. Then it remarks that the *Aitareya-paniṣad* does not have any specific order. Probably, this fact prompted Sureśvara to offer an alternative (and, perhaps, better) explanation.

अर्चतो मे यतो जज्ञे कमम्भः सुखकृत्ततः ॥
अर्काभिधोऽथ संवृत्तः प्राणो मृत्युः प्रजापतिः ॥ १४७ ॥

Because (he thought:) 'While I am thinking (i.e. offering worship) there was produced water which brought (me) pleasure', therefore *Prāṇa*, *Mṛtyu* and *Prajāpati* became known by the name *Arka*. [147]

This is derivation of the name *Arka* from root *rc > arc* 'to think' (cf. *arcana* in verse 145 above) and *ka* 'water'. A peculiar derivation from a verbal root and a noun !

उपासनमतोऽस्यापि नाग्नेरेवेति निश्चितिः ॥
अर्कनामाभिसंबन्धो नोपासनमृते यतः ॥ १४८ ॥
यदि वाऽग्नेरिदं नाम तस्य प्रकरणित्वतः ॥

[The verse states the purport of this derivation.]

Therefore, the decision is that there is (prescribed) the worship of this one (i.e. Arka) also and not only of Agni, since there cannot obtain any connection of the name of Arka (with worship) without the worship (offered to him).¹ [148]

Or rather this name (viz. Arka) belongs to Agni, for he is the subject of the section.² [149^{ab}]

¹This has a reference to the Śruti: *kaṁ ha vā asmai bhavati ya evam etad arkasyārkatām veda* (BU 1.2.1). This *phalaśruti* would have become meaningless if the name Arka did not mean Hiranyagarbha or Prāṇa or Mṛtyu.

²Arka as Agni could suggest itself on the basis of another derivation of that name, viz. from the root *ṛc* 'to shine'. But that does not seem to have attracted Sureśvara's attention !

आपो वा अर्क इति तु चित्यनामार्थमेव तत् ॥ १४६ ॥

[Verses 149^{cd}-162 pertain to BU 1.2.2.]

And (the Śruti statement) *āpo vā arkah* is for (conveying) the name of one which is to be collected (viz. fire)¹ (according to the dictate of the scriptures). [149^{cd}]

Cf. verse 145 above on this verse. Yet, worth noting is BUB p. 30: *āpo vā arkah/kaḥ punar asāv arka iti/ucyate/āpo vāiyā arcanāṅga-bhūtās tā evārko 'gner arkasya hetutvāt/apsu cāgniḥ pratiṣṭhita iti/na punaḥ sākṣād evārkaś tāḥ/tāsām aprakaraṇāt/agneś ca prakaraṇam/vakṣyati cāyam agnir arka iti/* And yet more worth noting is that Sureśvara has left this portion of BUB unconsidered !

¹The name here mentioned is Arka.

शर आसीदिति गिरा शक्त्यवस्था विवक्ष्यते ॥
सा पृथिव्यभवच्चेति विराजो जन्मशब्दनम् ॥ १५० ॥

In the statement of the Śruti *śara āsīt*,¹ it is intended to

convey the state (of the Brahman, the Sūtrātman) having the capacity² (for creation). And the statement *sā prthivy abhavat* is the assertion of (the fact, viz.) the birth of Virāj.³ [150]

¹The sentence reads: *tad yad apām śara āsit.*

²The word *śaktyavasthā* means *śakti-mad-avasthā*.

³This sentence completes the meaning of *tat samahanyata* 'it became consistent'.

तपोऽप्सु तप्यमानासु ह्यण्डं जज्ञे हिरण्मयम् ॥
इति श्रुतिर्जगादर्थं यथैवेह प्रपञ्च्यते ॥ १५१ ॥

Here¹ is explained the idea of (the fact, viz.) creation as another Śruti has declared it in the words 'while the waters were performing penance...in (the waters) being heated there was born a golden egg'.² [151]

¹That is; in BU 1.2.2.

²This is a quotation from the *Śatapatha Brāhmaṇa* which, in full, reads thus: *āpo ha vā idam agra āsuh|salilam eva tā akāmayanta katham nu prajāyemahiti|tā aśrāmyantās tapo 'tapyanta, tāsu tapas tapyamānāsu tāsu antar hiraṇmayam aṇḍam sambabhūva.*

एवं व्यष्टिसमष्ट्यात्मा वैराजं देहमात्मनः ॥
प्राचीक्लृपदथेदानीं सृष्टिस्तस्य विवक्ष्यते ॥ १५२ ॥

Thus the Brahman of the nature of individuality and collectiveness fashioned its own body in the form of Virāj. And now¹ it is intended to explain (this) creation by him.² [152]

¹That is; after the creation of the gross creation.

²To add hereafter: In the passage *tasyām aśrāmyat...niravartatāgniḥ* (BU 1.2.2). In this is established the connection of the Sūtrātman and the world of experience.

श्रान्तस्येति तु देहस्य कर्मयोग्यत्वमुच्यते ॥
श्रमहेतुरतस्तापस्तप्तस्येत्यभिशब्ध्यते ॥ १५३ ॥

But in (the adjective) *śrāntasya* is expressed the unsuitability of the body for the act (of creation), viz. the cause of fatigue (and), therefore, in the adjective *taptasya* is expressed *tāpa*, i.e. heat. [153]

This explains *tasya taptasya śrāntasya* (BU 1.2.2).

भास्वज्ज्ञानं भवेत्तेजो रसः प्राणो विवक्षितः ॥

क्रियाविज्ञानशक्तित्वात्प्रकृतस्य प्रजापतेः ॥ १५४ ॥

[Now, the significance of *tejo rasaḥ* is mentioned.]

tejo rasaḥ means brilliant knowledge—(by that) is intended Prāṇa—this is used of Prajāpati¹ (who is) the subject of this section, on account of his being possessed of the capacity for activity and knowledge. [154]

¹Prajāpati is the Sūtrātman, the creator.

अनवच्छिन्नवपुषः पिण्डावच्छेदहेतुतः ॥

खस्य कुम्भादिनेवासोर्निरवर्तत शब्दनम् ॥ १५५ ॥

Because of the delimitation in a body of Prāṇa¹, whose body was not delimited, in the same way as (the expanse) of the sky by a pot etc.², there is the use of the word *niravartata* 'came forth'. [155]

¹Sureśvara uses the word *asu* (normally used in the plural) in the sense Prāṇa, the Jīvātman.

²As sky is only one and yet becomes varied or divided as *ghaṭākāśa*, *karakākāśa*, *grhākāśa* etc.

नामरूपादिमद्देहसंबन्धात्तद्विधर्मकः ॥

अरूपोऽपि हि सूत्रात्मा लक्ष्यते रूपवानिव ॥ १५६ ॥

On account of his connection with a body that has a name, form etc.¹ the Sūtrātman, though possessed of their

(entirely) opposite properties² and even without a form³,
is seen like one possessed of some form. [156]

¹The word *api* implies *karman*.

²That is to say; it is *anāmaka*, *arūpaka* and *akāraka*.

³This indicates *anāmaka* also (SP); this justifies the reference to *nāmarūpādimattva*.

सूक्ष्मस्थूलशरीराभ्यां चिदाभाभ्यामविद्यया ॥

संवृतः परमेशोऽपि त्रैलोक्यात्माग्निरुच्यते ॥ १५७ ॥

The highest Lord, the self of the three worlds though he is, is called Agni, since he is wrapped by ignorance and by the two-fold bodies, viz. the subtle and the gross, which have the appearance of Sentience. [157]

अशरीरं शरीरेष्वनवस्थेष्ववस्थितम् ॥

महान्तं विभुमात्मानं मत्वा धीरो न शोचति ॥ १५८ ॥

“A wise man (then) pondering over (the nature of) Ātman which is without a body, which is (somehow) delimited in impermanent (i.e. perishable) bodies, the great one and the all-pervader, does not have to sorrow.” [158]

This is quoted from *Kaṭhapaniṣad* 2.22.

विराड्देहावनद्धोऽसुरध्यात्माद्याधिगः खवत् ॥

व्यष्टितामेति तद्धीनः समष्टित्वेन तिष्ठति ॥ १५९ ॥

Prāṇa, (when) bound by the body of Virāj, (thus) coming under (lit. entering into) limitations¹, viz. *adhyātma* etc.² comes to possess individuality³, just in the same way as a sky (becomes manifold in form)⁴. (But) (when it becomes) devoid of them (i.e. limiting adjuncts), it remains as collectivity. [159]

¹*ādhi* is short for *upādhi* ‘adjunct’.

²The word 'etc.' stands for *adhidaiva* and *adhibhūta*; cf. verse 127 above.

³Cf. note under verse 155.

⁴That is to say; comes to exist as many discrete individuals.

A man does some work, he gets exhausted, wants to rest and feels that he has done something. In the same way, Sureśvara points out, there are doings of Prāṇa, i.e. embodied Brahman.

उर्व्यामुत्पादितायां तु श्रमात्तापात्प्रजापतेः ॥

निरवर्ततेवास्यात्मा परिच्छेदाभिमानतः ॥ १६० ॥

Owing to the fatigue and heat (which he experienced) when the earth¹ was created, the self of Prajāpati became happy², as it were, on account of the (egoistic) feeling for the limitation (viz. the body). [160]

¹Sureśvara at times uses a synonym (or, synonyms) for the word in the Śruti. Thus, we come across the words *śṛṣṭi*, *prthivī*, *urvi* which signify the entire creation—not merely the earth.

²The word *niravartata* here has a sense different from that in verse 155 above. *niravarta* here is related to *nirvṛti* 'absolute joy or great joy', cf. also *nirvāṇa*, *niravartata* in that verse meant 'came forth'.

स्थूलदेहपरिच्छिन्नः स एवाद्यः प्रजापतिः ॥

अग्निरेष यतस्तस्मादुपास्योऽयं प्रयत्नतः ॥ १६१ ॥

[This verse reaffirms the thought in BUB on *teja eva rasa...*]

Since the very first Prajāpati, being delimited by a gross body¹, is this Agni², therefore, he has to be worshipped by one with (every) effort. [161]

¹Even the minutest (i.e. the most subtle) body could be considered as gross because it has some magnitude.

²See verse 157.

स वै शरीरी प्रथमः स वै पुरुष उच्यते ॥

आदिकर्ता स भूतानां ब्रह्माग्रे समवर्तत ॥ १६२ ॥

“Verily he is the first embodied form (of the Brahman); verily he is called Puruṣa; he is the first creator of elements¹, (for) the god Brahmā existed in the beginning (of creation²).”

[162]

SP and NKL report this to be a verse from a *Purāṇa*. This verse is (i) identical with *Mārkaṇḍeya Purāṇa* 45.64 and *Vāyu Purāṇa* 1.4.69 and (ii) closely similar to:

Brahmāṇḍa Purāṇa 1.3.25:

sa vai śarīrī prathamah purā puruṣa ucyate|
ādīkartā sa bhūtānām brahmā'gre samavartata||

and *Saura Purāṇa* 21.22:

sarvaiḥ śarīraiḥ prathamah sa vai puruṣa ucyate|
ādīkartā sa bhūtānām brahmāgre samavartata||

Sureśvara mixes up Purāṇic names of the creator with the name Sūtrātman, the Prajāpati.

¹These are thus various names/descriptions of but one creator.

²That is to say; before the creator attained individuality in every being.

अनुपाख्यतनुः सोऽयं व्यवहारप्रसिद्धये ॥

आत्मानं व्यभजत्स्थूलैस्त्रिधा वाय्वग्निभानुभिः ॥ १६३ ॥

[Verses 163-168 explain BU 1.2.3: The threefold division of Prajāpati and (his) worship.]

The known one, this (Ātman), who is possessed of an indescribable form (lit. body), differentiated (i.e. multiplied) himself into three forms, viz. in the three gross (form), the wind, the fire and the sun, in order that worldly dealings¹ became possible.

[163]

¹These are Upāsanā etc. SP mentions that Prajāpati's subtle body did not comprise of five gross elements, and was therefore incapable of worldly dealings.

स्वरूपानुपमर्देन स विराड्देवतात्मभिः ॥
उपासनादिसिद्धयर्थमात्मानं व्यभजत्स्वयम् ॥ १६४ ॥

[This is the first, viz. *prima facie*, view on the preceding verse.]

That Virāj divided itself on his own, in the form of various divinities¹, without destroying its own nature in order that different (sorts of) worship etc.² become established. [164]

¹Cf. *vāyvagnibhānubhiḥ* in the preceding verse.

²The word 'etc.' refers to various activities connected with worship.

मूलात्मैव त्रिधात्मानमभिनत्स प्रजापतिः ॥
इत्यस्य प्रतिपत्त्यर्थं स एष इति भण्यते ॥ १६५ ॥

[This is the other view, viz. Siddhānta view, on verse 163.]

It is stated in the Śruti: *sa eṣa...*¹, that, in order that one understands that it is Prajāpati, the prime Ātman, who, on his own, differentiated himself. [165]

¹This part of the Śruti together with the initial part, viz. *sa tredhātmānam vyakuruta* points but to two complementary views regarding creation.

तस्य प्रथमजस्याग्नेर्विराजोऽर्कस्य वाजिवत् ॥
दर्शनस्य विधानार्थं तस्य प्राचीति कीर्त्यते ॥ १६६ ॥

(Now) it is stated (in the Śruti) *tasya prāci...* for the purpose of laying down the worship of that first born Agni, (also called) Virāj (and) Arka, as (that) of the horse¹. [166]

¹*vājivat* = *vājinaḥ darśanam iva* (= *upāsanaṁ iva*); cf. Pāṇini: *tatra tasyeva-darśana* is equivalent to *upāsana* (cf. BUBV 1.1), and therefore, *vājinaḥ upāsana* means *vājimedha*, i.e. *aśvamedha*. This refers to *agnau vājidr̥ṣṭiḥ* (as discussed in BU 1.1).

यस्मात्कारणमुल्लङ्घ्य कार्यं नान्यत्र वर्तते ॥

अप्सु कारणभूतासु तस्मादग्निः प्रतिष्ठितः ॥ १६७ ॥

[This explains *sa eṣo 'psu pratiṣṭhitah* in BU 1.2.3.]

Since an effect does not (ever) exist elsewhere, going beyond its own cause, therefore, Agni has established himself (i.e. stays) in the waters¹ which have been its cause. [167]

AnSS edition needs correction of *ulaṅghya* to *ullaṅghya*.

¹SP points out that *apsu* stands for *bhūtāntarasahitāsu apsu*, i.e. in waters together with other elements, and *sūtrarūpāsu* 'in those having (now) the form of the Sūtrātman'.

अप्रतिष्ठागुणं देवमुपास्ते योऽनिशं नरः ॥

यत्र क्व चैति तत्रासौ प्रतिष्ठां लभते शुभाम् ॥ १६८ ॥

[This is the *phalaśruti* in *yatra kva ca...* in BU 1.2.3.]

Whichsoever a man ever worships the god whose characteristic is his being firmly established in waters, obtains auspicious steadiness¹ (in life) wherever he might go. [168]

¹'which is uncensured, i.e. praise-worthy, and also unopposed (even) in the yonder world' (SP).

योऽबादिपरिपाट्यैवं विराजमसृजत्स्वयम् ॥

कीदृग्व्यापारसंयुक्तः सोऽस्त्राक्षीदिति भण्यते ॥ १६९ ॥

[Now follows the narrative of the birth of Āditya as Saṁvat-sara.]

(Now) it is stated in the Śruti, 'he created...' ¹ in order to

explain with what kind of activities is connected he² who, on his own, created Virāj³ in the succession of waters etc.⁴ [169]

¹This is reference to the connection of BU 1.2.3 and BU 1.2.4 as stated in BUB. BUBV uses *asrākṣit* for *asrjata* in BUB.

²This refers to Mr̥tyu who has not differentiated himself in the five-fold elements (*apañcīkṛtaprapañcātman*).

³Virāj is of the nature of the five-fold elements and their effects (*pañcīkṛtabhūtapañcakatatkāryasṛṣṭīkramātmaka*).

⁴The word 'etc.' refers to Pṛthivī.

अतृसर्गोऽथवोक्तः प्रागन्नसर्गोऽधुनोच्यते ॥

अशनायावतो यस्मान्नास्त्यन्नविरहात्स्थितिः ॥ १७० ॥

[Now follows some *udbhāṣya* writing of Sureśvara regarding the connection between BU 1.2.3 and BU 1.2.4.]

Or there has been stated in (the earlier part of) the Śruti the creation of Eaters (viz. the divinities, Agni etc.) and now is stated the creation of the eatable(s) since there is no existence possible of one who has hunger in the absence of food.¹ [170]

¹This explanation keeps in view the sentence *kaniyo 'nnam kariṣye* in BU 1.2.5—this is for the Eater (*attr*) who was mentioned in *tejo raso niravartata* in BU 1.2.2 above.

त्रेधा व्यभजदात्मानमित्येतद्वा प्रदर्श्यते ॥

अग्निप्राणौ पुरैवोक्तावथ संवत्सरोद्भवः ॥ १७१ ॥

Or now is shown (the completion of the meaning of) the sentence 'He differentiated himself into three (forms)'¹ (thus:) Agni and Prāṇa (as being born of the Sūtrātman) have been mentioned before² and now (is mentioned) the birth of Samvatsara³. [171]

¹Cf. verse 163 above.

²Cf. *niravartatāgniḥ* in BU 1.2.2 and *vāyam tṛtīyam* in BU 1.2.3.

³This signifies Āditya owing to his most intimate connection with the year. This refers to BU 1.2.3: *ādityam tṛtiyam*.

मनसा ज्ञाननिर्देशस्त्रयी वागिति भण्यते ॥

सर्गक्रमं स वेदोक्तं ज्ञानेनालोचयत्प्रभुः ॥ १७२ ॥

[Now (i.e. after two different explanations of the connections between BU 1.2.2-3 and BU 1.2.4), follows the meaning of *sa manasā vācam mithunam samabhavat* (BU 1.2.4).]

In the word *manasā* there is reference to Knowledge (and) in the word *vāk* to the three Vedas. That Lord (viz. the Sūtrātman) thought¹ with (the power of) His (excellent) knowledge of the successive order of creation that is mentioned in the Veda.

[172]

¹Cf. BU 1.2.5: *sa aikṣata...*

ज्ञानेनाप्रतिघेनासौ वेदोक्तां सृष्टिपद्धतिम् ॥

समन्वालोचयच्छंभुः सिसृक्षुर्विविधं जगत् ॥ १७३ ॥

[This is a paraphrase of Manu's verse.]

(Indeed) that origin of bliss¹ well (*sam*) thought about the successive order of creation, mentioned in the Veda, by means of his unobstructed² (power of) knowledge, (when he became) desirous of creating (this) manifold universe. [173]

¹*sambhu* is said of the Lord in order to convey the idea of His compassion for the beings. He proposed to create.

²Cf. SP. *jñānam apratigham yasya...* (quotation not traceable)

आलोच्यालोचकयोर्हि योगो मिथुनमुच्यते ॥

प्रसिद्धं मिथुनं चात्र न कथंचन युज्यते ॥ १७४ ॥

(By the use of) the word union (lit. couple)¹ is mentioned the connection of what is to be thought about and the

thinker. The union (lit. couple), which is so well known in this (world) is in no way connected in this context.² [174]

¹In the sentence *sa manasā vācam mithunam samabhavat*.

²Here the context is of the embodied self (*adhyātmaprakaraṇa*); the idea of man and woman is entirely irrelevant in this context.

अनन्तराग्निसंबन्धप्रसङ्गविनिवृत्तये ॥

अशनायेति हि प्राह मूलकारणसंगतिम् ॥ १७५ ॥

[The verse explains the association of Mr̥tyu and Aśanāyā.]

The Śruti has used the word *aśanāyā*¹ as going with the prime cause (of creation) for warding off the contingency of the connection with Agni² which is immediately (mentioned) before. [175]

¹The word *aśanāyā* (f.) 'desire for food' is used in apposition to *mṛtyu* (m.) as its qualifier. This is in the Vedic style. Also cf. *aśanāyayā lakṣito mṛtyuḥ* (BUB p. 34).

²The reference to Agni is to emphasize the connection of *aśanāyā* with only the prime cause, the Sūtrātman, and not with Virāj.

जगतः प्रक्रियाबीजं यदवैषीत्पुरा गृही ॥

द्वैतैकत्वात्मकं ज्ञानं कर्म च ज्ञानसंभृतम् ॥

भावना च तयोरेतत्त्रयं रेतोऽभिधीयते ॥ १७६ ॥

[This verse explains the word *retah* of the sentence BU 1.2.4: *tad yad reta āsit*.]

The seed in the process (of creation) of the world¹ which the householder has understood formerly², is mentioned (in the Śruti passage, *tad yad retah*) as the generative seed, viz. this triad (i) knowledge of the oneness in duality, (ii) activity performed together with (possession of) knowledge, and (iii) the impulse caused by the two. [176]

¹This is *sr̥ṣṭikāraṇa* 'the cause of creation'.

²While he was trying to get to know the origin of creation with the help of Śāstra, that is to say; in his *sādhakāvasthā* (SP).

सृष्ट्यालोचनहेत्वेतत्सृष्टावाविरभूद्विभोः ॥

तद्भावभाव्यपः सृष्ट्वा रेतोबीजेन स प्रभुः ॥ १७७ ॥

सर्वलोकैकबीजेन गर्भ्यण्डेन बभूव ह ॥

अप एव ससर्जादौ तासु वीर्यमवासृजत् ॥ १७८ ॥

तदण्डमभवद्वैमं सहस्त्रांशुसमप्रभम् ॥

इत्येवं मनुनाप्युक्तः श्रौतोऽयं सर्गविस्तरः ॥ १७९ ॥

This (triad), the cause for His thinking about the creation, dawned on the All-pervader at the time of creation. Then, by means of that generative seed, that Lord, who was going to effect the creation, having (first) created waters, became possessed of a foetus within him by the unique seed of all the worlds, viz. the egg. [177]

Thus, viz. this long (narrative of) the creation mentioned in the Śruti, is stated by Manu¹ also: "Verily he first created waters and in them he released his generative seed; that golden egg became possessed of a lustre similar to that of the Sun (lit. one of thousand rays)." [178-179]

¹Cf. *Manusmṛti* 1.8^{cd} and 1.9^{ab}.

आपो ह वा इति तथा ह्ययमेव क्रमः श्रुतौ ॥

ज्ञानकर्मादिबीजस्य गर्भ एव प्रजापतेः ॥ १८० ॥

So also, this very successive order of creation is (stated) in the Śruti¹ which begins with (the words) *āpo ha vā...*, and in the same way is the foetus within Prajāpati formed from the seed for knowledge, activity etc.² (described). [180]

¹The verse is once again a reference to *Śatapathabrāhmaṇa*; cf. verse 151 above. Also cf. Taittirīya Br. 1.1.3.5; 1.5.2.5 and Jaiminīya Br. III. 318; Jaiminīya Upa. Br. I.56-1.

²The word 'etc.' stands for *bhāvanā* 'impulse' mentioned in verse 176 above.

स संवत्सरोऽभवदिति परिमाणोऽयमुच्यते ॥
अशनायादिमत्त्वात् स्वभावबलचोदितः ॥ १८१ ॥

सृष्ट्वाद्यं घस्मरः पुत्रं तमभिव्याददात्क्षुधा ॥
भिनत्ति सर्वमर्यादां नान्वयाद्यप्यपेक्षते ॥ १८२ ॥

अस्य दग्धोदरस्यार्थे को न कुर्यादसांप्रतम् ॥ १८३ ॥

In the sentence *sa samvatsaro 'bhavat*, this one is stated to be the measurer (of the products). (Then), on account of having hunger etc.¹, (and) being impelled by the force of his own nature, [181]

the devourer (lit. voracious) first created his first son, (and), out of hunger, opened his mouth towards him (i.e. to devour him). (Let it not be understood that) he sets aside all bounds of morality, (for) he does not pay heed to (lit. expect) what follows etc.² [182]

(Indeed) what man would not do wrong for the sake of this wretched stomach³? [183]

¹The word 'etc.' refers to thirst.

²The word 'etc.' refers to food and various enjoyments which are to follow.

³This is to justify the creator's voracity. SP remarks: *kṣutpipā-sāpiḍitaḥ putram api bhakṣayati* and also *vivekinām api paśvādibhir aviśeṣo vyavahāradaśāyām iti bhāvah*.

अन्न एव यतो वृत्तिरत्तुरन्नाद एव च ॥
अन्नस्य युक्तमेवातस्तमभिव्याददादिति ॥ १८४ ॥

Since existence of an eater (depends) on food and (the purpose of) food also (depends) on the eater¹, it is only proper, therefore, (that the Śruti) has stated 'he (the creator) opened his mouth towards him (i.e. son)'. [184]

¹The purpose is achieved by satisfying his hunger.

जन्मान्तरसमभ्यस्तविद्याकर्मादिहेतुतः ॥

जन्यकर्मप्रयुक्तः सञ्जिशुर्भाणित्यथाकरोत् ॥ १८५ ॥

(Then¹), on account of the lores and action etc.² which he has studied in his previous birth(s), the baby boy, being impelled by the activity to be performed,³ uttered the sound *Bhān*⁴. [185]

¹Or, at that time.

²The word 'etc.' refers to the impressions or desires of the previous birth(s).

³In the explanation here the baby boy which was produced by the Sūtrātman is described as any young one of human species who is wrapped in ignorance caused by action in the past lives.

⁴Cf. SP: *asaṁskṛtaśabdakarāṇe hetvantaram āha śiśur iti*.

यथोक्तहेतुवशगः स्वभावप्रहितोऽप्यसुः ॥

कुमारोत्थरवत्तस्तः स्वभावं चिच्छिदे भयात् ॥ १८६ ॥

And *Prāṇa*¹, being under the sway of the already stated cause and also being urged by (his own) nature, was disturbed by the cry coming from the young boy, and turned away from² his own nature³, out of apprehension. [186]

¹Or, *Mṛtyu*.

²That is to say; gave up or lit. cut himself away from.

³Namely, his cruelty.

अत्यन्तमपि शूराणां स्वस्वभावैकहेतुतः ॥

तित्तिरादिसमुत्पाते वेपथुर्जायते भयात् ॥ १८७ ॥

[This states the reason for the apprehension mentioned in the preceding verse.]

Verily (do we see that) even singularly brave men go in

tremor, out of fear, only by dint of their very nature², when there suddenly comes a Tittira¹ or another (similar) bird. [187]

¹This refers to the superstition that the note of a Tittira (or some such) bird portends evil.

²That is, by the deep-rooted fear which is so natural to human beings.

एवं स शिशुसंरावसंलब्धालोचनक्षणः ॥
ऐक्षतेह न कामार्तः कश्चिदालोचने क्षमः ॥ १८८ ॥

[Verses 188-196 explain BU 1.2.5: *sa aikṣata.*]

Thus he, who had now got (lit. obtained) a moment for thought owing to the cry of the baby boy, thought¹ (i.e. paused to think). Indeed no person who is overcome by desire (for food) is capable of (waiting for) a thought.² [188]

¹Sureśvara emphasizes that the Sūtrātman paused to think even if he was hungry.

²Cp. the popular adage: *bubhukṣitaḥ kiṁ na karoti pāpam* 'what wrong would he not do who is hungry?' Sureśvara suggests Prajāpati's great power of thought and also the great force in the young one's cry.

मन्यतिश्चाभिपूर्वोऽयं हिंसार्थः स्यात्प्रसिद्धितः ॥
यदीममभिर्हिंसिष्ये कनीयोऽन्नं भवेद्ध्रुवम् ॥ १८९ ॥

[This is on the Bhāṣya: *abhipūrvo manyatiḥ.*]

This (use of) root *man* preceded by (the preposition) *abhi* is in the sense of *himsā* 'destroying, violence'—for, it is (so known) from the established (usage).¹ (Therefore, the Śruti statement means:) 'If I shall kill this one, food will certainly be less.'² [189]

¹NKL remarks that this meaning of the root *abhimān* is not sanctioned by (grammatical) authority. Both SP and NKL

point out (as the basis for this usage) the Śruti statements: *rudro 'sya paśūn abhimanyeta/nāsyā rudraḥ paśūn abhimanyate/paśūn nābhima-nyate/paśūn nābhimaṁsyate*, and *tato vai rudraḥ paśūn nābhyamanyata*.

²This is the meaning of *yadi vā imam abhimaṁsyē kaṇīyo 'nnam kariṣye* (BU 1.2.5).

कारणादल्पमेव स्यात्तद्व्याप्तेरदितिर्यतः ॥

अन्नमल्पं ततोऽप्यल्पात्कनीयोऽन्नं भवेदतः ॥ १९० ॥

[This supplies consideration in Prajāpati's remark in the second line of the preceding verse.]

(Again), that (food)¹ would be positively less than its cause, on account of its pervasion (by the Sūtrātman), since (the Sūtrātman) is 'Unbound'². And therefore food would be less than that, (viz. the baby boy) who is already small. As such, food will indeed be less. [190]

¹Though *tat* is translated here as food, it really refers to its cause, viz. Virāj. As such, if the Sūtrātman were to devour Virāj, then there would not follow its product, viz. food. Therefore, it is smaller than what is already small—Virāj who is, as compared to the Sūtrātman, smaller since that is an effect and therefore smaller than the cause.

²The Sūtrātman is called also Aditi as known from the Śruti: *adirir dyaur aditir antarikṣam...* (SP). We have 'unbound' (i.e. limitless) as the translation of the word *aditi* and we thereby refer to the Sūtrātman which amplifies itself into all products, i.e. the universe. Yet Sureśvara seems to derive the name *aditi* from root *ad* 'to eat' to signify 'eater, devourer', cf. verse 194 below. Śaṅkara says regarding the derivation of Aditi at the end of BUB 1.2.5: *mṛtyoḥ prajāpateḥ sarvasyādanād adititvaṁ veda tasyaitat phalaṁ*

लोकेऽपीदं सुप्रसिद्धमाङ्गनाबालपण्डितम् ॥

जग्धनिःशेषबीजस्य तत्फलं नाप्यतेऽण्वपि ॥ १९१ ॥

[This is to justify the less quantity of food as stated in verse

190. That is to say: in the absence of Virāj, no food could be possible (cf. *sthūṇānikhanananyāya*).]

Even in the common-place world, among all people—right from women and children upto the learned—it is well known that the product of what has its entire seed eaten up (i.e. destroyed) would not be obtained even in the least measure. [191]

कुमारवक्त्रोद्गतया वाचर्गादीन्ससर्ज सः ॥

पञ्चादींश्च कुमारेण ह्यात्मनाजीजनज्जगत् ॥ १६२ ॥

[This explains *sa tayā vācā*... (BU 1.2.5.).]

He (i.e. the Sūtrātman) produced *rc*¹ etc. by the word uttered from the baby boy's mouth and also (produced) animals etc.² (and) this universe from the self, viz. the baby boy³. [192]

¹This seems to indicate the origin of all expressions of speech in the baby boy's cry *Bhāṇ*.

²This refers to birds, crawling beings and other creatures.

³The identity of the cause and the effect is implied in the *sāmānādhikaranyā* of *kumāreṇa ātmanā* 'the self, the baby boy'. This explanation is Sureśvara's variance with Śaṅkara. Read footnote 2 on NKL (p. 50): *...bhāṣyavyākhyānam kliṣṭam iti matvā kleśam anudbhāvya/vārtikakāraiḥ 'vācā' ity asya prakṛtakumāramukha-nirgataavākparatvam/ātmanā' ity asya prakṛtakumārāparatvam ca varṇitam iti bodhyam.*

स्रष्टृत्त्रोः कार्यभक्ष्याभ्यामन्योन्याव्यतिरेकतः ॥

स्रष्टृत्वात्स सृजत्येव खाद्यतेऽन्नं सदाद्यतः ॥ १६३ ॥

Since the creator and the eater, as also the effects produced (by the creator) and the food to be eaten (by the eater), do not exist apart from each other, he (the Sūtrātman), because of his capacity of being the creator, does create the food and it (also) is ever eaten while the eater is eating. [193]

This brushes aside a possible doubt that the creator and the eater are different—the doubt implies that, if they were one, there would not be any increase in food. But the Upaniṣadic description does emphasize the apparent paradox.

सर्वमस्ति यतः सृष्टं तस्माददितिरुच्यते ॥

नामज्ञस्तमुपासीनः सर्वस्यात्तादितिर्भवेत् ॥ १९४ ॥

[This explains *aditer adititvam* (BU 1.2.5).]

Since he devours all that is created, he is called Aditi. One who knows the (significance of this) name, worshipping him (lit. seated nearest unto him) would himself become Aditi, the eater of all.¹

[194]

¹This points to the significance of Upāsanā, as SP points out in *yathopāsanam hi phalam*. Also read NKL (last note on p. 50): *sarvasyaitasya jagato 'nnabhūtasya attā sarvātmanaiva bhavati/anyathā virodhāt/na hi sarvasya kaścid eko 'ttā dṛśyate/tasmāt sarvātmā bhavatīty arthaḥ*

सर्वतृत्वेन सिद्धेऽर्थे सर्वान्नोक्तिः किमीर्यते ॥

अन्नमेव भवेदन्नं नान्नमन्नस्य कुत्रचित् ॥ १९५ ॥

[This explanation averts the notion of repetition in respect of *sarvasyaitasyāttā bhavati/sarvam asyānnam bhavati* (BU 1.2.5).]

Why is there the statement: 'all (becomes His) food,' when (that) fact is (already) established by (the mention of Him as) capable of being the eater of all? (The purpose of so saying is to affirm:) Food alone becomes the food for the eater and nowhere does the food become the eater of this one (viz. the eater).

[195]

प्राणात्मातैव सोऽवश्यमुपासनबलाद्भवेत् ॥

य एवमभिधानज्ञ उपासीतादिति सदा ॥ १९६ ॥

[This is reaffirmation of the *phalaśruti* (cf. verse 194 above) as in *ya evam...* (BU 1.2.5).]

He, who is thus the knower (of the meaning) of the name Aditi, should ever worship Aditi; (for) certainly he will be (i.e. become possessed) of the nature of Prāṇa, the very eater (of every eatable), owing to the excellence of the worship.

[196]

अश्वाश्वमेधनाम्नोऽथ कारणप्रतिपत्तये ॥

सोऽकामयत इत्यादिः परो ग्रन्थोऽवतार्यते ॥ १९७ ॥

[Verses 197-205 explain the meaning of the word *aśva* (BU 1.2.6).]

Now is introduced the later section (of the Upaniṣad), beginning with (the words) 'he desired...'¹ in order that one comes to know the reason (why Prajāpati has) the name *Aśva* and *Aśvamedha*² (for Prajāpati). [197]

¹Sureśvara does not intend the Saṁdhi of *so 'kāmayata* and *iti* (as *°yateti*).

²These names are explained etymologically in verses 208 and 209 below. The use of the singular form *aśvāśvamedhanāmnah* indicates the oneness of *aśva* and *aśvamedha* which is implied and emphasized.

यज्ञेन भूयसा यक्ष्य इत्येवं स प्रजापतिः ॥

अश्वमेधो भवेद्भूयान्भूयोदक्षिणको हि सः ॥ १९८ ॥

'Let me perform the great¹ sacrifice,' thus (thought) that Prajāpati; that great (sacrifice) could be (only) the *Aśvamedha* since (it) involves great (i.e. amount of) *Dakṣiṇā* 'fees to be given to the priest'.² [198]

¹'great', because it is *bhūyodakṣiṇāka* as BUB explains and the next line points out. This is use of *significant* adjective (constituting the figure of speech *Kāvyaṅga*).

²SP refers to the prescription of *Āpastamba Śrauta Sūtra*: (where?) *prācyādidikcatuṣṭayasyādhvaryuprabhṛtibhyaś caturbhyo bhūmya vacchinasya cāvaśiṣṭasya dhanasya sadasyebhyo dakṣiṇātvena deyatā*.

यजेय भूयोऽपीत्येवमकामयत भावितः ॥

ऋत्वात्मेत्यभिमानेद्धः पूर्वजन्मन्यभूत्प्रभुः ॥ १९९ ॥

Prajāpati, inspired (by the performance) desired, 'Let me perform (that sacrifice) once again', since in his previous life the Lord was kindled with the pride: 'I am the soul of the sacrifice.'

[199]

This presupposes the continued cycle of births for Prajāpati; since he had an Ego that he was the performer or maker of the sacrifice. This naturally leads to the Upaniṣadic idea of the working of *mayā* in the form of one's entertaining the notion that one is the agent of so many ritualistic activities. Also it entails the notion of the Liṅgātman for every human being, just as Hiraṇyagarbha, the sacrificer, continued to have the Liṅgātman.

पूर्वजन्माभिनिर्वृत्तप्रयोगापेक्षयोच्यते ॥

भूयो यजेयेति वचः सदा तद्भावभावनात् ॥ २०० ॥

ऋत्वात्मैवाभिसंपन्नो द्वैतैकत्वात्मकः प्रभुः ॥

इह तत्फलतां यातो भूयोवाग्युग्यते ततः ॥ २०१ ॥

The statement (in the Śruti) *bhūyo yajeta* 'let me again sacrifice' is made with reference to the performance of a sacrifice accomplished in a previous life, for there would ever be its inspiration by the thought (i.e. the pride) of (having performed) it.

[200]

The Lord, having only the nature of oneness in duality, became (possessed of the thought that he was) 'the soul of the sacrifice'. Thus he has here become the result of that (sacrifice) and, therefore, the word *bhūyāḥ* 'again' is used (in the Śruti)¹.

[201]

¹SP well brings out the purport of these two verses thus: *sādhakāvasthāyām dirghakālam ādareṇa nirantaratayā hiraṇyagarbho 'smiiti bhāvanāvaśād ubhayavidhakatvātmā prajāpatir eva samaṣṭivyaṣṭy-*

*ātmā sampannaḥ sann etatkalpādaḥ kratuphalatām yato yātas tato
bhūyaḥśabdo yuktimān ity arthaḥ.*

कारणप्रवणं सर्वं कार्यं दृष्टं जगत्यपि ॥
प्रकृतिं यान्ति भूतानि निग्रहः किं करिष्यति ॥ २०२ ॥

In the universe¹ also it is seen that all effect is dependent on the cause²; (so it is said in *Gītā* 3.33³;) 'all beings act under the influence of nature, what (then) can restraint do?' [202]

¹This refers to *vyavahārāvasthā*.

²That is; Prakṛti is responsible for every performance of a human being. So then, it impels even Prajāpati to perform a sacrifice.

³This is the Smṛti support for the philosophical thought.

यशोवीर्यैकहेतुत्वात्प्राणा यश इहेष्यताम् ॥
यशः प्रकाशरूपेण वीर्यं तद्वलहेतुतः ॥ २०३ ॥

[This explains *prāṇā vai yaśo vīryam* (BU 1.2.6).]

Let it be understood here that *prāṇas*¹ are fame, since they are the only cause of fame and potency; fame they are, because of their being in the form of lustre or glory (i.e. known everywhere) and potency, thanks to being the cause of their strength.² [203]

¹Prāṇas are organs of sense, viz. eye etc.; cf. *prāṇas cakṣurādayaḥ* (BUB p. 39).

²*tadbalaheṭutaḥ* is *tadbalaheṭutvataḥ*, cf. SP *asti ca dehe teṣām balaheṭutvam...*

उदक्रामद्यशो वीर्यं विराजः श्रमकर्शितात् ॥
लिङ्गात्मेह यशो वीर्यमुभयं हि तदुद्भवम् ॥ २०४ ॥

[This explains *tad evaṁ yaśovīryabhūteṣu...* (BUB p. 39).]

Fame (and) potency (as well) departed from Virāj who was weakened by fatigue; for both fame and potency, originating from it, are here¹ the Lingātman 'the subtle self'.²

[204]

¹The word *iha* refers to the gross body.

²Read NKL: *sthūladehe prāṇasambandhe saty eva yaśo viryam nāśati ityanvayavyatirekasiddham ity arthah.*

पूर्वदेहेऽभिषङ्गोऽभूदपविद्धतनोरपि ॥

सङ्गत्यागो ह्यसंभाव्यो विनैकात्म्यावबोधनात् ॥ २०५ ॥

[This explains *tasya prajāpateḥ...śarīre mana āsit* (BUB p. 39).]

(Even at this time¹) Prajāpati had an attachment to the body of the previous life even though he was devoid of (i.e. removed from that former) body. Indeed giving up an attachment cannot be possible (for one) without becoming aware of the oneness (of the two bodies²). [205]

¹This is to be added in view of verses 199-200 above.

²These are: The body of the previous and the present birth. This really means the continuation of the same life in different bodies. But, even though the objects enjoyed in the earlier life do not any more exist, the longing for them persists (even in the subtle body). This is supported by SP which refers to *Gītā* 2.59: *viṣayā vinivartate nirāhārasya dehinaḥ/rasavarjam...*

जातदेहाभिषङ्गः संस्तादात्म्यप्रतिपित्तया ॥

मेध्यमित्यादिकं कामं सोऽकामयत कामुकः ॥ २०६ ॥

[Verses 206-227 explain BU 1.2.7. And this verse clarifies *sa tasminn eva śarīre...* (BUB p. 39).]

Having an attachment to the body that arose (in him), he, full of longing entertained a desire for what is fit for a sacrifice etc.¹, owing to his wish to obtain oneness in nature with it.

[206]

This verse stresses further the notion of *saṅga* mentioned in the preceding verse.

¹The word *medhya* has here a reference to the body and not to offerings of sacrifice, because already a reference is made to Prajāpati's wish for becoming *ātmanvi*—it is repeated here in BU 1.2.7 also.

अपविद्धयशोवीर्यं शरीरं कवियोगतः ॥

यतोऽश्वयदतोऽश्वोऽसुः संवृत्तः स प्रजापतिः ॥ २०७ ॥

(And) since the Prāṇa then swelled¹ (his) body, which was devoid of fame and potency on account of His separation from Prajāpati², he became a horse; (he became) Prajāpati.³

[207]

¹The word *aśvayat* is for a Vedic form *aśvat* from root *śvi* 'to swell, grow, increase'. Or, is it, by any chance, an archaic form of *aśvayat* from the denominative root *aśvaya* 'to act like a horse' (i.e. 'to enter like a horse')?

²The words '(his) body' refer to the gross manifest form of an individual sacrificer who is far removed from the status of Prajāpati, the Hiranyagarbha—this has reference to the disappearance of Prāṇas mentioned in verse 203 above. The verse uses the word *ka* in *kaviyogataḥ* for conveying the sense of Prajāpati in keeping with later (Upaniṣadic, or perhaps post-Upaniṣadic) tendency to do so. *kaviyoga* is understood from verse 204 above.

³This is said with a view to averting the idea of the non-identity of the horse in the form of the body and Prajāpati. This suggests that the horse, being Prajāpati, is worship-deserving.

व्यपेतसद्यशोवीर्यममेध्यं मेध्यतामगात् ॥

तत्प्रवेशाद्यतोऽतोऽयमश्वमेधोऽभवत्प्रभुः ॥ २०८ ॥

[This explains the reason for Aśvamedha to be Prajāpati's name.]

Since the body, from which (the earlier) extant fame and potency had disappeared and which had thus become unfit

for sacrifice¹, (now) became fit for sacrifice owing to the entry of that (i.e. Prajāpati) (into it); for this reason, the Lord has become this² Aśvamedha³. [208]

¹Cf. *medhya* in verse 206 above.

²That means 'well-known'.

³Cf. SP: *śarīram hi prāṇaviyogāt*.

अश्वाश्वमेधावेवं च प्राजापत्यात्मनाञ्जसा ॥
अभिष्टुतौ कथं नाम भवेतामिति भण्यते ॥ २०६ ॥

(The above) is stated with a view to (explaining) how the Aśva 'horse' and Aśvamedha 'the horse-sacrifice' would become praised in a proper manner, on account of their being of the nature of Prajāpati. [209]

काललोकादिवपुषस्त्वश्वस्याग्नेश्च सांप्रतम् ॥
समस्योपासनं वाच्यमित्यर्थो ग्रन्थ उत्तरः ॥ २१० ॥

[This explains the purpose of *eṣa ha vā aśvamedham* (BU 1.2.7).]

(Now) it is proper to prescribe (lit. state) the worship together of the horse, which has a body comprising of time, region etc.¹, and Fire together—therefore, for this purpose, follows the subsequent (part of the) work.² [210]

¹This refers to the contents of BU 1.1.1. The word 'etc.' refers to the deity (of the sacrifice).

²In BU 1.1.1 there was discussion of the worship of the horse; there was no mention of the worship of fire. Therefore, the section in BU which begins with *na ha vā aśvamedham* has the purpose of showing that the two so-called worships are not different and that they together form but one worship.

विधायकपदाभावादसंगानं परस्परम् ॥
पदानामिति मा प्रापदित्यर्थेयं परा श्रुतिः ॥ २११ ॥

[This verse explains the purpose of the injunction *aśvamedham veda* (BU 1.2.7).]

This later Śruti¹ proceeds indeed for the purpose of averting the undesirable contingent situation that the words (Aśva and Agni), which might not go together with each other owing to the absence of such words as prescribe (the worship of) Aśva.² [211]

Hereby is bridged over the apparent distance between ritual and philosophy. The purpose of the following passages is to assert that the worship of Aśva and the worship of Fire are not two different worships.

¹The injunction: *aśvamedham veda*.

²SP and NKL point out that, though the words *adititvam veda* are noticed in respect of the worship of Aśva (BU 1.2.5), they are not *pradhānavidhi* which is desired to be stated. Cf. also Ānandagiri on BUB: *pūrvatra kriyāpadasya...iti bhāvaḥ* (p. 39).

एष एवं यथातत्त्वमश्वमेधं विवेद यः ॥

वक्ष्यमाणेन रूपेण वेद विद्यादतस्तथा ॥ २१२ ॥

[This verse connects *ya enam evam veda* with the injunction kept in view by the preceding verse and gives the full meaning intended, viz. 'he should know the Aśvamedha according to the description which follows.']

He, who has thus known the Aśvamedha in its true nature and also as having that nature which will be described (hereafter), should therefore know (the same) accordingly¹. [212]

¹According to the description which follows.

आत्मानमश्वं संकल्प्य काललोकादिधर्मिणम् ॥

तथाविधशरीरः सन्सर्वलोकपितामहः ॥ २१३ ॥

यजेयमश्वमेधेन भूयोऽपीत्यभ्यमन्यत ॥

भूर्लोकाद्यात्मकं सोऽश्वमात्मानं निरवग्रहम् ॥ २१४ ॥

यावदब्दं मुमोचाश्वं स्वच्छन्दं मुक्तबन्धनम् ॥

ततः संवत्सराद्धर्वं तं चाप्यालभतात्मने ॥ २१५ ॥

[The following well compares with *aśvadr̥ṣṭi* etc. in BUBV 1.1—this is *aśvamedhadṛṣṭi* on the same pattern.]

Having formed a notion about his own body¹ as the horse, possessed of the properties of *kāla*, *loka* etc.² and being possessed of that kind of body³, the grandfather of all the world thought to himself, [213]

‘Let me perform the *Aśvamedha* once again.’ Then he let loose himself, a horse, who is possessed of the nature of earth, *lokas* etc. (and) who has no restraint whatever, [214]

till the end of the year, (to move about) according to its sweet will and without any check. Then, after a year was over, he killed that (horse) also for his own sake. [215]

¹The word *ātman* here means ‘body’.

²The word ‘etc.’ refers to the deity as in verse 210 above.

³A body on which are imposed the characteristics of *kāla*, *loka* etc.

स्वात्मावयवभूताभ्यो देवताभ्यो यथायथम् ॥

ग्राम्यारण्यान्पशून्प्रादादन्याभ्यः स प्रजापतिः ॥ २१६ ॥

[This is a comment on *paśūn devatābhyah...* (BU 1.2.7).]

That *Prajāpati* (then) offered domestic and wild animals to the other deities as had become the limbs of his own body in one way or the other as is laid down (in the scriptures). [216]

[There follows a comment on *tasmāt sarvadevatya...* (BU 1.2.7).]

यतोऽकरोद्विराडेवं तस्मादेवेह याज्ञिकाः ॥

प्रोक्षितं सर्वदेवत्यं प्राजापत्यं तुरंगमम् ॥ २१७ ॥

आलभन्ते यतस्तस्माद्यथाव्याख्याततत्त्ववित् ॥

कुर्यादेवं यथोक्तार्थं मृत्युत्वप्रतिपित्तया ॥ २१८ ॥

[There follows a comment on *tasmāt...sarvadevatya...* (BU 1.2.7).]

Since Virāj did thus, therefore, only do the ritualists in this world kill a horse dedicated to Prajāpati (and understand as one) made up of all deities, when it is sprinkled over with water.

[217]

Since (this is so,) therefore one, who knows the truth that is thus explained (in the Upaniṣad) should, with a wish (to obtain the nature of) Mr̥tyu, perform the said (ritual) accordingly.

[218]

कर्मोपासनमुक्त्वाऽथ तत्फलोपदिदिक्षया ॥

एष वा इति यत्नेन ह्याजगामोत्तरा श्रुतिः ॥ २१९ ॥

[Verses 219-227 are the explanation of the result of the worship of Aśvamedha.]

Having enjoined (lit. described) the nature of the activity of worship (i.e. performance of the ritual), now proceeds the later (portion of the) Śruti, with the specification: *eṣa vā...*,¹ indeed with a desire to state its result (lit. fruit). [219]

¹That is, *eṣa ha vā...*; the word *ha* is dropped in the verse for the sake of metre.

दर्शनाद्यभिनिर्वृत्तो यस्त्वेवं ह्यसाधनः ॥

प्रत्यक्षं फलरूपेण स एष इति दर्श्यते ॥ २२० ॥

And (in the Śruti beginning with) *sa eṣa...* is directly pointed out as the result the one¹ that is secured by *darśana*² etc. and has the horse as its means (for accomplishing the desired result³).

[220]

¹This refers to the Sun in the sky. That is to say, the performance of Aśvamedha results into the actual worship of Āditya.

²The word *darśana* is nothing but *upāsana* as seen in the be-

ginning of this Brāhmaṇa, viz. in 1.2.1 and also in 1.1.1, and the word 'etc.' means *manana*. This refers to the identification of the different parts of the ritual as the objects in the worship of fire.

³This refers to the actual performance of Aśvamedha.

अश्वमेधक्रियापूर्वपरिणामैकवर्त्मना ॥

अश्वमेधो रविः साक्षादुषा इत्यादिनोदितः ॥ २२१ ॥

In the Śruti beginning with *uṣā* is stated that the Sun itself is the Aśvamedha (which is accomplished¹) by the only way of (viz. creating) *apūrva* through the performance of the Aśvamedha. [221]

SP supports the meaning of the verse by a line from *Manu-smṛti*, viz. 3.76: *agnau prāstāhutih samyag ādityam upatiṣṭhataḥ...*

¹Accomplishing the performance of the Aśvamedha is performing the worship of the Sun and thereby becoming one with Him. This signifies the oneness of the *darśana* and *karman* (as in the preceding verse). Cf. NKL: (on that verse) *aśvamedhopāsanam aśvamedhaś cāditya evety arthaḥ*.

तस्य संवत्सर आत्मा तस्याऽऽदित्यैकहेतुतः ॥

तस्य कृत्वात्मनश्चित्यो योऽङ्गभूतः पुरोदितः ॥ २२२ ॥

फलात्मकः स एवैष पार्थिवोऽग्निः प्रदर्श्यते ॥

आत्मान एते तस्यापि त्रयो लोका यथोदिताः ॥ २२३ ॥

Year is the nature of that (Sun) because it has only Āditya as its cause and that fire, which was to be collected and which has been described before as an aspect of that (Āditya) who is the form of the sacrifice, as said before, [222]

is of the nature of the result, i.e. this very terrestrial fire. So are these three worlds the forms¹ of that (Āditya) as said before. [223]

¹*ātmanah* = *śarirāvayvāḥ*; the very body which has the worlds as its limbs.

क्रतुतत्साधनात्मानावादित्याग्नी यथोदितौ ॥

निर्वृत्तात्माधिकारौ तावेकैवासौ भवेदसुः ॥ २२४ ॥

As said before, Āditya and Agni, who are two forms (of the Aśvamedha), (of the sacrifice) being its means¹ and also the sacrifice, have, on performing their own duties², become but one, viz. the Prāṇa³. [224]

¹It signifies 'by producing the result of the performance'.

²Even these two deities have to perform their role in the Aśvamedha and then they attain the higher status of Prāṇa etc.

³The word *asu* is used here in feminine to indicate *prāṇadevatā* (f.) 'the deity of the name Prāṇa'. Or, is this a case of double sandhi?

अशनायावती योक्ता मृत्युः सर्वान्नघस्मरा ॥

सैवात्मा विदुषः साक्षादात्मा स्यादजरोऽमरः ॥ २२५ ॥

[This explains *apa punar mrtyum jayate* (BU 1.2.7).]

(And) Mr̥tyu¹, who is described as possessed of hunger and devourer of all foods, is himself the self of one who has known (the Brahman) and (also) the Ātman that would be without old age and without death. [225]

¹Like the word *asu* in the previous verse, the word *mr̥tyu* here is used in the feminine thereby to indicate *mr̥tyudevatā* that is identical with the Ātman.

नैनमाध्यात्मिको मृत्युस्तन्मृत्युत्वादवाप्नुयात् ॥

सकृन्मृत्वासुदेहेन मुच्यते सर्वबन्धनात् ॥ २२६ ॥

[This explains *mr̥tyur asya* (BU 1.2.7).]

And since he (the learned man) is (that) Mr̥tyu (himself), bodily death would not affect him¹. Once he dies (in the usual sense), he is liberated from all bonds by his form of Prāṇa. [226]

¹This is further described in the style of the *Brāhmaṇas* as *etāsāṃ devatānām eko bhavati* at the end of BU 1.2.7.

अग्न्यादिभेदभिन्नानां देवतानामशेषतः ॥
आत्माभिन्नो भवत्येष यथोक्तोपासनाद्बुधः ॥ २२७ ॥

[This explains *etāsāṃ devatānām...*]

By the performance of the worship as described (herein), a wise man becomes this Ātman which is non-distinct from all the deities which are differentiated by the variety (of names) Agni etc. [227]

[/ iti prathamādhyāyasya dvitīyam aśvamedhabrāhmaṇam samāptam]/

BRHADĀRANYKOPANIṢAD- BHĀṢYA-VĀRTIKA

BUBV 1.3

Udgītha Brāhmaṇa

शास्त्रोक्तज्ञानयुक्तानां कर्मणां ज्ञानतस्तथा ॥

सर्वत्र वेदशास्त्रेऽस्मिन्मृत्युभावः फलं श्रुतम् ॥ १ ॥

[In these verses Sureśvara, following Śaṅkara's Bhāṣya, points to the connection between the preceding portion of the BU and this Brāhmaṇa.]

Everywhere in this Vedic lore is heard (that) the result of the (various ritual) activities, joint with the instruction imparted by the scriptures as also (that which results) from knowledge¹, is becoming (one with) Mṛtyu². [1]

This verse aims at pointing out the distinction between the Udgītha Upāsanā and every other Upāsanā, as understood in this Brāhmaṇa. Though *mṛtyubhāva* is said to be the result of any of the other Upāsanās, it is not absolute liberation. This is the first point of distinction between the Udgītha Upāsanā and other Upāsanās. NKL says: The Brahman is called the Udgītha, because it refers to meditation on, or pondering over, the nature of Prāṇa (=Brahman) and not to any ritual.

¹This refers to *jñāna* about the true nature of the ritual activity which leads to non-eternal reward; this knowledge leads to *mukti*. But, there seems to be here only concessional acceptance of *jñānakarmasamuccaya*. The Udgītha Upāsanā is distinct from every other Upāsanā, for it is not *śāstroкта-karman* but it is a means to the acquisition of *jñāna* mentioned just before. The word *jñāna* mentioned in the first line refers to the instruction of the Śruti (*vijñāna*).

²Refer to BUBV 1.2. See Introduction to Sureśvara's *Vārtika*

on *Aśva- and Aśvamedha Brāhmaṇa* (Delhi: Motilal Banarsidass, 1990), pp. xv-xvii; and the next verse.

आध्यात्मिकपरिच्छेदव्यावृत्तिर्यत्समाश्रयात् ॥

स मृत्युर्मृत्युशब्देन फलभूतोऽत्र भण्यते ॥ २ ॥

That Mṛtyu, by resorting to which there results cessation of bodily limitations, is mentioned here¹ by the word *mṛtyu*² which has been the result³. [2]

¹In the word *ādhyātmika*, *ātman* means 'body', cf. 1.1.4; 144; 213; 223.

²This is a reference to BUBV 1.2 (cf. Introduction to *Sureśvara's Vārtika on Aśva- and Aśvamedha Brāhmaṇa*, pp. xvii-xviii) and also *mṛtyvātmabhāva* in BUB.

³Namely, the result of ritual activity performed after knowing its true nature as worship of Prāṇa, the inner self.

या त्वश्वमेधगत्युक्तिः सोपलक्षणसिद्धये ॥

कर्मज्ञानान्तराणां स्यान्नाश्वमेधगृहीतये ॥ ३ ॥

As to the statement of the result of the Aśvamedha, it is for effecting the indication of the various knowledges of (different) activities (i.e. worships); it is not for (understanding the result of) the Aśvamedha (only). [3]

NKL states that the Upāsanās other than the Aśvamedha Upāsanā (viz. Agni Upāsanā) do not bring about the same result, viz. *mṛtyuprāpti*; that is to say: they do not effect *brahmaprāpti*.

अल्पीयःफलसंप्राप्तिरल्पीचोज्ञानकर्मतः ॥

अल्पत्वमभिभूतेः स्यात्तयोरामुरपाप्मभिः ॥ ४ ॥

Accruing of a lesser¹ reward (results) from lesser activities and knowledge. Smallness comes from the overpowering (of those two²) by (their contact with) the demoniac sins³. [4]

¹The first 'lesser' refers to such an Upāsanā as implies subject-object relationship and the latter 'lesser' refers to anything else

than the worship of the knowledge of (the nature of) the Brahman.

²Namely, activity and knowledge.

³Such as *rāga*, *lobha* etc. These are defects of individuals; in other words, there is no purification (i.e. purging of the sins) of an individual's *citta*.

कुतस्तस्याभिभूतस्य रागाद्यामुरपाप्मभिः ॥

उद्भूतिः कर्मणोऽत्यर्थं ज्ञानस्य च निगद्यताम् ॥ ५ ॥

[An objection is being introduced:]

Be it told as to whence there originate the activity and the knowledge which are overpowered by the demoniac sins such as attachment etc. above (*ati*)¹ the desired end.

[5]

¹That is, setting aside. This refers to *pitṛlokaprāpti*; cf. CU 5.10.4; BU 3.1.8; *Jaiminiya Upaniṣad* 2.8.11.

मृत्युं साक्षादवाप्नोति ज्ञानयुक्तेन कर्मणा ॥

इत्येतद्बहुशोऽश्रावि पूर्वग्रन्थेषु चागमैः ॥ ६ ॥

That one obtains *Mṛtyu*¹ itself by means of activity joint with knowledge was declared on several occasions² by earlier Śruti texts³.

[6]

¹This *Mṛtyu* is *Prāṇadevatā* connected with various *Upāsanās*; viz. the status of *Hiraṇyagarbha*.

²This refers to *mṛtyur asyātmā* (cf. BUBV 1.2.225) etc., and other sentences connected with other (prescribed) *Upāsanās*.

³BU 1.2.7; 1.3.9; *Jaiminiya Upaniṣad* 3.12.5.

तज्ज्ञानोत्पत्तिविघ्नाय (? प) ध्वस्तिकृज्ज्ञानलब्धये ॥

उद्गीथदेवतावाप्त्यै प्रारब्धेहोत्तरा श्रुति ॥ ७ ॥

Now here starts the later (portion of the) Śruti in order that one is able to obtain the knowledge that destroys the obstacle¹ to the rise of the knowledge of that (*Sūtrātman*), and that one obtains (the knowledge of) the deity of the *Udgītha*.

[7]

¹The text of AnSS reads *vighnāya....labdhaye*, but it should read *vighnāpadhvasti...* as shown by the edition of NKL and by SP's explanation. The first line in AnSS text as it is is understood as an instance of *sāpekṣa samāsa*.

ननु मृत्योरतिक्रान्तेरुद्गीथज्ञानकर्मणोः ॥
फलस्य संश्रवान्नातो मृत्युप्राप्तिस्तयोः फलम् ॥ ८ ॥

[Now an objection is raised on the basis of BU 1.3.12: *mṛtyum atikrānto dīpyate*.]

But, since one hears that the result of (ritual) activity and Udgītha-*jñāna* (joined together) is transcending¹ Mṛtyu², therefore, obtaining Mṛtyu (i.e. oneness with it) from them (viz. Udgītha-*jñāna* and ritual activity) is not the reward of the two. [8]

¹Cf. *so 'gnir abhavat*, (BU 1.3.12)... *sa vāyur abhavat* etc.

²That is to say: becoming one with Mṛtyu = Sūtrātman.

नाग्न्यादिदेवतात्मत्वतत्फलावगमाच्छ्रुतेः ॥
स्वाभाविकासङ्गमृत्योरतिक्रान्तिः पृथक्फलम् ॥ ९ ॥

[This is an answer to the preceding.]

(This is) not (so), because (one hears) from the Śruti¹ that (the knowledge of) the result of that is oneness with the deities, Agni etc.² As for transcending Mṛtyu, (it consists in transcending) natural attachment (to bodily and other pleasures) (and) is (thus) a distinct reward. [9]

¹Sp cites: *etāsāṃ devatānām eko bhavati* (BU 1.2.7) and *so 'gnir abhavat* (BU 1.3.12) etc. mentioned in note 1 on the preceding verse.

²These are already mentioned in BUBV 1.2.

कोऽसौ स्वाभाविकः पाप्मा तस्योद्भूतिस्तथा कुतः ॥
तस्मान्निवृत्तिः केन स्यात्कथं वेत्येतदुच्यते ॥ १० ॥

[This verse states in brief the purpose of the narrative.]

What (then) is that natural defect (lit. sin)? so also, whence does it come into existence? by what would there be keeping away from it possible? and how? — all this is discussed (in what follows.) [10]

यथोक्तार्थप्रसिद्धयर्थं श्रुतिराख्यायिकात्मिका ॥
द्वया हेत्येवमाद्येयं प्रचक्राम परोक्षितुम् ॥ ११ ॥

In order to establish the things mentioned (thus)¹, this Śruti passage, which is of the nature of a narrative, proceeds to discuss (lit. examine or explain) (the nature of Prāṇa)², beginning with (the words) *dvayā ha*. [11]

¹This refers to the questions mentioned in the preceding verse.

²It is the Udgithadevatā, so-called in verse 7 above, the real nature of Prāṇa as pure, unaffected by any attachment to worldly objects and pleasure.

प्राजापत्यं पदं यो यो ह्यधिकारी परोक्षति ॥
तन्निर्धारयानया श्रुत्या पदमाप्नोत्युपासनात् ॥ १२ ॥

Verily, whosoever, entitled (to the Udgitha worship)¹, wishes to get the status of Prajāpati, attains it, having first ascertained that² by means of this Śruti³ and then by performing the worship⁴ (of Prāṇa). [12]

¹SP seems to refer this to the one who is entitled to perform Soma sacrifice.

²The nature of Prāṇa having the qualities like purity etc.

³BU 1.3.

⁴For the word *upāsanā* we use 'worship', since BU, BUB and BUBV appear to use it in different places with different nuances which are covered by this word. We shall specify the exact nuance wherever desirable. Cf. Introduction.

Sureśvara's discussion on BU 1.3.1 begins here and continues up to verse 126, touching various allied topics in passing.

पूर्वजन्मनि यद्वृत्तं वर्तमानप्राजापतेः ॥
तदवद्योतको हेति निपातोऽत्र प्रयुज्यते ॥ १३ ॥

The particle *ha* here¹ is used as indicative² of what happened in the previous life of the present day Prajāpati. [13]

Sureśvara refers to the changing cycle of Kalpas and, accordingly, even to the merger of Prajāpati into the Brahman for being born again as Prajāpati in every subsequent Kalpa.

¹The word *atra* is an adverb in locative sense and refers to the statement of the first line.

²SP points out that particles do not express any meaning, they only indicate the same. This refers to the view mentioned in *Nirukta* 1.4: *nāmākhyātaḥ tu karmopasaṁyogadyotakā bhavanti*.

भविष्यद्वृत्तिमाश्रित्य यजमानः प्रजापतिः ॥

इहाभिधीयतेऽन्यस्तु न कश्चित्सप्रयोजनः ॥ १४ ॥

Here is mentioned (as) the sacrificer Prajāpati, with his future status¹ in view, and not any other (sacrificer) who has (some other) purpose.² [14]

¹This is literally 'modification or transformation of a human sacrificer into Prajāpati (= Prāṇa)'.

²An ordinary sacrificer who wishes to achieve results of ritual actions such as riches etc., but not the status of Prāṇa. Those results are only temporary!

ज्ञानकर्मोपदेशो हि नरं प्रत्येव सर्वथा ॥

सर्वः श्रौतो यतस्तस्मात्स एवेहाभिधीयते ॥ १५ ॥

Since, everywhere the instruction of the Śruti¹ for (every) individual is in every way in respect of knowledge and activity, therefore, it is only that (individual sacrificer)² who is mentioned here. [15]

¹NKL understands *sarvaḥ* in the sense of both the Śrauta and the Smārta instruction; cf. *śrautaḥ smārtaś ca sarvaprakāra ity arthaḥ*.

²That sacrificer means such a sacrificer as wishes to know both the nature of the diet as Prāṇa and the procedure of the performance.

तत्कर्मज्ञानजत्वाच्च तत्प्राणाः शुद्ध्यशुद्धिजाः ॥
प्राजापत्या इहोच्यन्ते वागाद्युक्तेश्च लिङ्गतः ॥ १६ ॥

[This explains *tasyaiva prajāpateḥ*...(BUB p. 44).]

Further, here are mentioned the very *prāṇas* (sense-organs)¹ of that (sacrificer), produced as they are by his (ritual) activities and knowledge (in the earlier life or lives) as also from purity and impurity, as the off-springs of Prajāpati, because there is an indication (of the same) from the statement of Speech and others². [16]

This verse explains the significance of the suffix which forms the word *Prājāpatya* from *Prajāpati*.

¹For *prāṇa* in the sense of organs cf. BSB 2.4.1; 2.4.5 (and also in later verses of this Brāhmaṇa).

²They refer to BU 1.3.3ff. referring to Nose, Eye, Ear, *manas* etc.

उद्गीथोपास्तिसंबन्धाद्व्या हेत्यादिकस्य च ॥
उपास्यार्थविशुद्ध्यर्थं प्रवृत्ताख्यायिका ततः ॥ १७ ॥

And, therefore, because of the relation of the words *dvayā ha...* to the worship of the Udgītha, the narrative (here) has begun with the purpose of explaining clearly the nature (lit. the meaning) of the object of worship. [17]

Both SP and NKL point out that the narrative has inherent connection with the worship of Udgītha.

अभ्यारोहजपस्येह प्राण एवास्तु देवता ॥
कस्माद्वागादयो नेति तत्परीक्षात ईर्यते ॥ १८ ॥

Therefore, there follows (lit. is put forth) an examination (of the thought as to) why *Prāṇa* should be (accepted) in this section (as) the deity of (the *Abhyāroha-japa* =) the recitation for elevation¹, and not Speech and others. [18]

¹This refers to BU 1.3.28: *asato mā sad gamaya....mrtyor mā amṛtaṁ gamaya*. This recitation forms a part of the Udgīha worship as will be clear later.

अन्वयव्यतिरेकाभ्यां प्राणप्राधान्यसिद्धये ॥

प्रवृत्ताख्यायिका यत्नाद्वागादीन्द्रियनिन्दया ॥ १९ ॥

Therefore, with a view to establishing the pre-eminence of Prāṇa by means of (the method of) Anvaya and Vyatireka¹, the narrative has begun specifically with the censure² of the organ of speech and others. [19]

¹Read SP: *sati prāṇe vāgādivyāpāro nānyathā*.

²This is a literal translation of *nindā*, but the word *nindā* indicates here rejection.

शास्त्रस्वभावजज्ञानकर्मसंस्कारहेतुतः ॥

देवासुरत्वं प्राणानां नि (? वि) रुद्धोपाधिकारणात् ॥ २० ॥

The *prāṇas* (i.e. sense-organs) become possessed of the nature of gods and demons on account of the impressions of knowledge and activity which have resulted from (the teaching of) the scriptures and from their own nature, i.e. thus owing to the limiting adjuncts which are opposed¹ (in nature to one another). [20]

¹Translation follows the edition of NKL and SP which read *viruddhopādhi*...even though AnSS reads *niruddhopādhi*, obviously it is a mis-reading.

सहस्रादिर्यथा भेदः प्राणस्यैकस्य शब्दते ॥

भूयोधिकारभेदेन वागादीनां तथा भिदा ॥ २१ ॥

[Reference is made to *kati devā yajñavalkya iti* (BU 3.9.1), a question put to Yājñavalkya, the seer of BU.]

As it is said of one and the same Prāṇa that it has distinct forms (which are) counted (in) thousand etc., so also (is there) the division¹ of Speech and others, owing to the difference in their manifold (i.e. varied) capacity². [21]

¹The words 'into different forms' are to be supplied.

²This refers to the *upādhis* mentioned in the previous verse, *śāstriya* and *itara* (= *svābhāvika*) *jñānakarmāṇi*.

सहजं सर्वभूतानां वृत्तमासुरमिष्यते ॥

यत्नाधेयं यतो देवं ज्यायांसः स्युस्ततोऽसुराः ॥ २२ ॥

Since the natural behaviour (lit. activity) of all beings is described (as) demoniac (and) any divine activity has to be performed with effort, therefore, the demons are elders (lit. larger) in number. [22]

It is everyone's experience that the demoniac activities outnumber the divine activities, because it is in the nature of human beings to turn to the former, whereas the latter require special efforts.

इह वागादयः शब्दा देवतार्थाभिधायकाः ॥

मर्त्यत्वान्न तु गृह्यन्ते करणस्थानगोचराः ॥ २३ ॥

Here (i.e. in this section) the words *vāc* 'Speech' and others are expressive of (their relevant) deities and they are not taken to have the specific organs (of their activity) as their object (as their primary meaning), on account of their perishability (lit. mortality). [23]

देवतैकात्म्यमेवेह देवज्ञानक्रियाफलम् ॥

अध्यात्मादिपरिच्छेद आसुरत्वान्न गृह्यते ॥ २४ ॥

Here (i.e. in this Brāhmaṇa) only (attaining) oneness with the deity¹ is accepted as the result of the knowledge of the divine and the activity directed towards the divine. Limitation in the form of the body etc.² is not (so) accepted, because it is demoniac (in its origin)³. [24]

This is one more argument for understanding *devatā* from the words *vāc* and others.

¹This refers to the sentences like *so 'gnir abhavat* (BU 1.3.12 ff.)

²The word 'etc.' refers to *rāga*, *lobha* etc.

³It is *āsaṅgaja*.

हिंसाभिप्रवणं चेतः प्रायेण श्रेयसामपि ॥

भूयांसोऽतोऽसुरा देवाः कनीयांसोऽतियत्नजाः ॥ २५ ॥

Generally, the mind even of the elite is prone to violence. Therefore, the demons are larger¹, in number and the gods, who originate from the (necessary) great effort (towards the activities prescribed by scripture), are smaller (lit. younger) in number. [25]

¹Larger and smaller in translation contrast with each other. Cf. verse 22 above.

धर्माधर्मैकसाध्यत्वाद्ब्रह्मादेः स्थावरावधेः ॥

अस्पर्धन्त ततोऽन्योन्यं दैतेया विबुधैः सह ॥ २६ ॥

[This explains *lokeṣu nimittabhūteṣu...* (BUB p. 45)]

Since (the origin of this universe), beginning with the Brahman and ending with all that is steady, is effected from only (the practice of) merit and demerit, therefore¹, the sons of Diti and the gods rivalled with one another. [26]

¹This is explained by SP as *svābhāvīketarajñānavaśāt*.

आसुरेभ्योऽधिकारेभ्यो व्युत्थाप्येह प्रजापतिम् ॥

दैवीर्भूमीर्नयामैनमिति देवचिकीर्षितम् ॥ २७ ॥

[Verses 27-29 are the explanation of verse 26 above.]

What the gods wished to do was: 'Let us raise Prajāpati here (in the manifest universe) from his demoniac dispositions¹ and lead this one to the levels² of the divine.' [27]

¹Prajāpati (Hiraṇyagarbha) is conceived as the first sacrificer. In this regard, cf. BUBV 1.2.205-6. The word *adhikāra* literally means 'capacity for activity enjoined on the sacrificer (Prajāpati) by scripture', but here is meant his proneness to undertake the sacrificial activities.

²The plural is used in view of many sacrificers, each of whom is a Prajāpati.

दैवेभ्य एनमाच्छिद्य कामक्रोधादिसाधनाः ॥

आनयामासुरीर्भूमीरिति दैतेयनिश्चितिः ॥ २८ ॥

(As against this), the decision of the sons of Diti was: Let us, who are possessed of various means such as *kāma*, *krodha* etc., cut this one, viz. the sacrificer, (away) from his divine (dispositions) and bring him to the levels of the demons.' [28]

यत्नायत्नसमुत्थाभ्यां वृत्तिभ्यां देवदानवाः ॥

दैव्यासुरीभ्यामन्योन्यमस्पर्धन्त विरोधतः ॥ २९ ॥

[This explains *devānaṃ ca* (BUB p. 45).]

(Thus) the gods and the demons, who were possessed of the divine and the demoniac temperaments respectively (for) activities (which can be accomplished) with effort and without it (i.e. the effort¹), rivalled mutually, owing the opposition (in respect of their ends.) [29]

¹This refers to men's *svābhāvika karman*; cf. *svabhāvaja* in verse 20 above.

भूयो बलेन ते देवा आसुरेण निराश्रयाः ॥

अर्द्यमाना न शरणं लेभिरेऽल्पत्वकारणात् ॥ ३० ॥

[This explains *evam kaniyastvād abhibhūyamānāḥ* (BUB p. 45).]

Those gods, who were much (*bhūyaḥ*) oppressed by the demoniac strength¹ on account of the smallness (in their number), were without any support, (and) they did not find a shelter (i.e. protection). [30]

¹Or alternatively, 'who were oppressed by the greater strength of the demons...' (read *bhūyobalena*).

अनीक्षमाणास्ते शर्म संभूयोचुः परस्परम् ॥

क्रियतामविचारेण हन्तेत्यनुमतौ पदम् ॥ ३१ ॥

They (gods), not finding (lit. seeing) any shelter¹ assembled together and talked among themselves—(in this con-

text) the word *hanta* (in the Śruti sentence *hantāsurān...*) is expressive of the agreement (amongst them thus): 'Let (this) be done without a (moment's) thought²— [31]

¹Or alternatively, 'happiness (in store for themselves)'.

²This is parenthetical; the next verse is the gods' speech.

अस्मज्जिगीषूनसुराञ्जित्वोद्गात्रात्मसंश्रयात् ॥
अतिलङ्घ्यासुरं भावं देवतात्मानमाप्नुमः ॥ ३२ ॥

'Let us, having conquered the demons who wish to conquer us, by resorting to the nature of the Udgātr¹, overcome the demoniac state (that has befallen us) and attain the divine status.' [32]

¹This explains *udgīthena* (BU 1.3.1), following BUB on it, viz. *udgīthakarmapadārthakartṛsvarūpāśrayeṇa* 'resorting to the agent of the ritual called the Udgītha' (BUB p. 46). This emphasises the superior mystic power of the Udgātr priest, who is (later on shown as) identical with Prāṇa.

उद्गीथदेवतावाप्तिर्ज्ञानकर्मसमुच्चयात् ॥
अभ्यारोहजपः कर्म ज्ञानं त्विह परीक्ष्यते ॥ ३३ ॥

The attainment of the (nature of) the deity of the Udgītha becomes possible on account of the combination of the knowledge and the activity (i.e. performance of the Udgāna). Here (i.e. in this regard), the recitation for elevation is the activity.¹ But here (i.e. in what follows) is examined (only) knowledge². [33]

¹Cf. verse 18 above.

²It is the knowledge of the nature of Prāṇa, the deity of the Udgītha.

विधिशेषार्थवादत्वान्नेदं ज्ञाननिरूपणम् ॥
इति चेन्नैतदेवं स्यादेवं वेदेति तद्विधेः ॥ ३४ ॥

[Verses 34-40 refute the supposition that the narrative *dvayā ha...* does not intend to be an exposition of knowledge.]

If (one were to say:) ‘This is not a discussion of knowledge, for it is a eulogistic statement (Arthavāda) about the remainder of the injunction.¹’, (we say:) ‘This could not be so (understood), for there is an injunction (regarding the recitation) in (the sentence) *evam veda*.’ [34]

¹Injunction regarding recitation of the formula for elevation; this means: *evam veda* (= *evam vidyāt*), itself being formally an injunction, cannot be a statement eulogistic or ancillary to any other injunction. The objection is to be understood thus: “Is this narrative to be considered as ancillary to *japavidhi*? or to *udgīthavidhi*?”, as pointed out by NKL.

उद्गीथविधिशेषश्चेदुद्गीथप्रकृतौ श्रवात् ॥
नातत्प्रकरणान्याय्यमितोज्यत्र च तद्विधेः ॥ ३५ ॥

(Then) if (one were to say:) ‘This is an ancillary to the performance (which is meant) in the injunction regarding the Udgītha, i.e. the recitation of the Udgītha, on account of its being heard (i.e. stated in the Śruti) with reference to the injunction regarding the Udgītha’, (our answer is:) It is not reasonable (to say so), since the context is not of that (viz. the Udgītha); and also because the injunction regarding that is prescribed elsewhere.’ [35]

According to NKL, the first alternative which is discussed in verse 34 was regarding Abhyārohaṇa and the other regarding *udgīthavidhi*, in verse 35. SP points out the purport of this objection thus: The statement *dvayā ha...* is made in the nearness of the prescription of the activity of the Udgātr which is the principal action and therefore *dvayā ha...* does not form a part of the exposition of knowledge.

विद्याप्रकरणत्वाच्च नेहोद्गीथो विधीयते ॥
जपस्य चाप्यनित्यत्वात्स्यादेवंवित्प्रयोज्यता ॥ ३६ ॥

(And) because there is here the context of knowledge, the Udgītha is not prescribed here. Yet (*ca*) the recitation (for elevation), not being compulsory, it has to be enjoined for one who knows¹. [36]

SP points out that Abhyārohaṇa is prescribed also for one who has the knowledge of the nature of Prāṇa. It is not a compulsory requirement for such a knower. This implies that, even before the recitation, one may have known the nature of Prāṇa.

¹‘One who knows the purpose of the Udgītha Upāsana.’

उदारफलवद्यस्मादपि ज्ञानमिह श्रुतम् ॥

तद्वैतदित्यतो ज्ञानं फलवत्त्वाद्विधित्सितम् ॥ ३७ ॥

Also because here is heard knowledge as yielding abundant fruit, therefore, in the statement *tadd haitat*,....it is intended to prescribe knowledge owing to its having (an excellent) result¹. [37]

The prescription for knowledge means prescription of the Upāsana of the Udgītha.

¹The variant noted in SP in the AnSS *tasmāt tatphalavattvāt* is better and therefore it is followed in the translation.

शुद्धचशुद्धचुक्तितश्चेह प्राणोपासा विवक्षिता ॥

वागादिनिन्दया मुख्यप्राणोपासा न चेदिह ॥ ३८ ॥

विधित्सिताथ तन्निन्दा स्तुतिश्चानस्य किंफला ॥

अतोऽर्थवादाद्धि विधिर्लिङ्गादत्रानुमीयते ॥ ३९ ॥

And it is intended here to state the Upāsana of Prāṇa as there is the statement about purity and impurity (regarding Prāṇa and others). If, by the censure of Speech and others, the worship of the principal Prāṇa [38]

was not sought to be prescribed, then (the question is:)

‘What is the result of the censure of that (Speech)? and of the praise of Prāṇa¹?’ Therefore, in this context², we infer

the injunction (regarding knowledge) from Arthavāda³

‘the statement of (its) ancillary,’ the cause of (or reason for) inference. [39]

The argument uses the method of Anvaya and Vyatireka.

¹The word *ana* means Prāṇa.

²The word *prakaraṇe* is to be supplied after *atra*.

³Namely, *vāgādinindā*.

प्राणस्वरूपापत्तिश्च यतोपासाफलं श्रुतम् ॥

उपासनमतोज्ञस्य विधित्सितमितीक्ष्यताम् ॥ ४० ॥

Since¹ the result of the Upāsanā is heard (to be one's) coming to obtain the nature of Prāṇa, therefore, it should be understood (lit. seen) that (in this context of the narrative) the worship of Prāṇa is sought to be prescribed. [40]

¹SP points out that there is double Saṁdhi in *yatopāsāphalam* which is equal to *yata upāsāphalam*; this indicates the archaic tendency in Sureśvara's composition.

Verses 41-48 refute the supposition that Prāṇa, the object of an Upāsanā is 'possessed of properties like purity etc.' (like any other object)—this implies opposition to the idea of nirguṇa Brahman.

उपासनमसौः काममस्तु सूक्तोपपत्तिः ॥

शुद्ध्यादिगुणवत्ता तु न मानादुपपद्यते ॥ ४१ ॥

[This explains *bhavatu nāma prāṇasyopāsanam* (BUB p.47).]

(One might oppose thus:) 'Granted that the worship of Prāṇa is (understood here) on the basis of the supporting reason (which is) well adduced (lit. stated) above, yet (in the case of Prāṇa) being possessed of excellence such as purity etc.¹ does not follow from the authoritative means (adopted by you)².' [41]

¹Cf. verse 38 above.

²The word *māna* in the last part of the verse stands for *sūkta* which is mentioned in the earlier half; it refers to the *śabdapramāṇa*, i.e. Śruti.

गुणवत्ताप्यसोरस्तु यथास्योपासनं तथा ॥

प्रामाणिक्युभयत्रापि प्राप्तिर्यस्मादिहेक्ष्यते ॥ ४२ ॥

(The answer to this is:) 'Let it be (understood in the case) of Prāṇa that there is excellence also (as stated in the Śruti), since its worship (is understood); and also because,

in respect of both¹, the authoritativeness (of the Śruti) is desired (i.e. accepted) here (i.e. in the injunction regarding the worship of Udgītha).’ [42]

This argument is based on *devatādhikaraṇanyāya* (BS 1.3.26-33).

¹It means *upāsanā* and *prāṇadevatāśuddhi*. A well-known verse, viz. “*vigraho haviṣām bhoga aiśvaryaṁ ca prasannatā/phalapradānam ity etat pañcakam vighrahādikam*||” justifies this argument.

ननु स्युत्यर्थतैवास्य शुद्ध्यादेरवगम्यते ॥

उपासाविधिशेषत्वादर्थवादोऽत ईक्ष्यताम् ॥ ४३ ॥

[This explains *sa syāt* (BUB p. 47) in answer to the objection *syāt śrutatvāt*.]

(A counter argument is:) One might say: ‘From purity etc. is understood only the praiseworthiness of this (Prāṇa), since it is subsidiary to the injunction regarding the Upāsanā. Therefore, let it (viz. the statement of purity etc.) be understood as Arthavāda.’ [43]

प्रामाणिकोऽभिसंबन्धो यस्मात्प्राणस्य गम्यते ॥

किं बलं समुपाश्रित्य शुद्ध्यादेरर्थवादता ॥ ४४ ॥

(We answer:) ‘Since the relation of Prāṇa (to excellence etc.) is understood as authoritative, (then tell us) resorting to which strength¹ (you understand) the statement of purity etc. as Arthavāda.’ [44]

¹It means ‘strong proof’.

नहि मानं विहायेह साध्यसाधननिश्चितौ ॥

चक्षुरन्यत्रपश्यामो यद्वलात्स्यादयं मूषा ॥ ४५ ॥

‘Indeed we do not know (lit. see or find) here (in Śāstric dealings) any eye¹, leaving aside the means of knowing (viz. the Śruti) for purposes of deciding what is to be proven and what the means of proving it, whereby this one² could be considered as false.’ [45]

¹That is to say: the means of knowing.

²It means 'the Śruti which we have adduced as a proof of knowing that Prāṇa is possessed of excellence etc.'

आसन्यत्वादयोज्यस्य न च योषाग्निवद्यतः ॥

तेषां प्रत्यक्षतः सिद्धेरतः शुद्ध्यादिमानसुः ॥ ४६ ॥

Since the qualities such as (ever) abiding in the mouth¹ do not belong to anyone else (than Prāṇa) in the same way as (the character of) fire in a woman, because that (matter) is established (in its true nature) by direct perception; therefore, Prāṇa is (established as) possessed of purity etc. [46]

¹This is the force of the suffix *ya* added to *āsan*.

अक्षाद्यविषया ये तु गुणा आगतो मताः ॥

मानाविरोधात्केनैषां शुद्ध्यादीनां मृषार्थता ॥ ४७ ॥

By (what reason then) can these, viz. purity etc., as qualities of Prāṇa, though not the object of the eyes etc. (and) known from Āgama, be false, when there is no opposition to the (authoritative) means (viz. Śruti)? [47]

श्रोत्रादिवत्प्रमाणानामसाधारणमेयता ॥

तन्मेयप्रथने मानं न किञ्चिदनुभूतितः ॥ ४८ ॥

Like the ears etc., the various other means of knowing (also) have their own special objects of knowledge. (Consequently), there is nothing else than (one's own) experience which serves as a means of knowing which can reveal the object to be known¹. [48]

¹*tanmeyaprathane* of AnSS edition (also SP agrees) is read in the NKL as *tanmeyagrathane*. NKL paraphrases it as *mānameyasambandhe* (which is *viṣayaviṣayisambandhe*, following the note by the editor of NKL). Translation follows SP.

Verses 49-65 explain that, since falsity is difficult to explain, purity etc. of Prāṇa are not false.

परमार्थातिरेकाद्वाभेदाद्वा परमार्थतः ॥

वस्तुनः स्यान्मृषात्मत्वं नैवमप्युपपद्यते ॥ ४६ ॥

(A questions is asked:) 'Whether the nature of falsity of the existential entity, viz. Prāṇa, would be in addition to (i.e. besides or apart from) the ultimate reality, or as non-distinct from that reality.' (The answer is:) 'Thus also, it cannot be explained.' [49]

The qualities attributed to Prāṇa, viz. purity etc. are disputed. There are two alternatives posited: (i) Prāṇa is distinct from the ultimate reality; and (ii) Prāṇa is not distinct from it.

लभते व्यतिरेकं चेत्परमार्थात्ततोऽपरम् ॥

स्वमहिम्नैव तत्सिद्धेः किमिव स्यान्मृषार्थता ॥ ५० ॥

If it has distinction from the ultimate reality, then (this) other¹ has its proof (i.e. gets established) by its own strength.² What would (then) be 'being false object'? [50]

This answers away the first alternative.

¹Namely, Prāṇa which is posited as false.

²This falsity has to be declared as self-established, for there is not seen any connection of it whatever with either the Reality or a non-existent.

परमार्थात्मकत्वे तु न किञ्चिद्विषयं क्वचित् ॥

असत्यस्याप्यसत्यत्वं परमार्थसदात्मना ॥ ५१ ॥

As against this, no thing which has the nature of the ultimate reality can anywhere (or ever) be untrue because the untruth of the untrue also would be of the nature of the ultimate reality. [51]

This answers away the second alternative mentioned in verse 49 above.

This points to the Reality which is explained by SP thus: *asatyasyāpi svarūpaṁ sadvastvātmanā vācyam ato bhedapakṣānu-papatteḥ sad advaitam ity arthaḥ.*

सत्यासत्यविभागोऽयमविभागात्मवस्तुनि ॥

प्रत्यगज्ञानहेतूत्थस्तद्विधादेव तद्धतिः ॥ ५२ ॥

This division of the true and the false is in respect of that thing which is of the nature of what is partless (and) it (viz. the division) arises from the cause, viz. ignorance, regarding (the nature of) the inner self. On knowing (the nature of) that¹ (viz. the inner self), there occurs the destruction of that (viz. ignorance). [52]

This verse is an answer to the possible objection: Even the Siddhāntin holds the division of the universe into true and false; (cf. *satyānrte mithumikṛtya...vyavahāraḥ* in Śaṅkara's BSB (*adhyāsabhāṣya*).)

¹The first *tat* 'that' refers to the *pratyak* and the second to ignorance about its nature.

This explains the effect of the knowledge of the real absence of division into true and false.

स्वाभासफलकारुढस्तदज्ञानजभूमिषु ॥

तत्स्थोऽपि तदसंबद्ध ईश्वराद्यात्मतां गतः ॥ ५३ ॥

(The Self) which has mounted on the plank in the form of its own appearance¹ in the states resulting from the ignorance of itself (*sva*) is not connected with them, even while existing in them, and has (later) become identical with Īśvara and others.²

This is an explanation of *tadbodhāt eva taddhatiḥ* in the preceding verse.

¹This refers to Sureśvara's theory of Ābhāsa 'appearance'.

²The word 'etc.' stands for *sākṣin*, *kāraṇa*, *antaryāmin* (SP); cf. *avidyākṛtanāmarūpopādhyanurodhīśvaro bhavati* (BSB 2.1.14). In other words, the expressions Īśvara etc. also are owing to the ignorance about the Reality.

तदज्ञानं तदुत्थं च जगत्कृत्स्नं तदात्मकम् ॥

यतोऽतस्तदनूद्याह ह्यात्मैवेति श्रुतिः स्फुटम् ॥ ५४ ॥

Since ignorance about that (ultimate reality) and the entire world which, having the nature of that (Īśvara), has arisen from that, therefore, having restated that, indeed, has the Śruti clearly said 'ātmā ...eva'¹ [54]

This verse points to an authoritative Śruti in support of the argument in the preceding verse, viz. *seśvaram jagad āvidyam*.

¹This should refer to *ātmety evopāsīta....*

ऐकात्म्यमेव मानानां सर्वेषां मेयमिष्यते ॥
यथा तथा प्रवक्ष्याम उदर्कज्युपपत्तिभिः ॥ ५५ ॥

Even¹ in later portion², we shall explain with cogent arguments (and) in such a way as shows that all the means of knowing can be said to have only the oneness of the Ātman as the object of knowing³. [55]

¹The word *api* 'even' refers to what is said in SV.

²The word *udarke* refers to the discussion of *vyākṛta* according to SP and *avyākṛta* according to the editor of NKL!

³Cf NKL: *dvaitasya mithyātve pratyakṣāder anālambanasyā-mānatvam* (the editor explains: *anālambanasya* as *vastvaviṣaya-kasya*).

मिथ्येतिप्रत्ययोत्पत्तिस्तथा कारणदोषतः ॥
बाध्यज्ञानस्य हेतुः स्यान्नातोऽन्यद्बाध्यकारणम् ॥ ५६ ॥

So also the rise of the knowledge, that the notion of (Prāṇa's purity etc.) is false, would be, owing to (some) fault in reasoning¹, the cause of knowledge to be stultified. There cannot, therefore, be anything else than this as the cause² (of the knowledge) to be stultified. [56]

This verse is intended to explain the need of knowing the uniqueness of the Reality (*aikātmya*) because the objector would raise an objection: 'Since the Śruti expressive of the uniqueness of the Reality is false, there is no means to prove it, viz. the uniqueness.' It explains the cause of the unauthoritative knowledge. This has a basis in verse 50 above.

¹This refers to reasoning (*jñāpaka*).

²This refers to the so-called productive cause (*kāraka*).

न चेहोभयमप्यस्ति कुतो मिथ्येति भण्यते ॥

मितेर्मये समाप्तत्वान्मिथ्यात्वं न मितेर्भवेत् ॥ ५७ ॥

(One would then ask:) 'In this case¹, both of them² are not noticed (to exist); why is it then said to be false? (The answer is:) Knowledge (is said to) have occurred when the object of knowledge is obtained;³ whatever is knowledge cannot be false.' [57]

¹The word *iha* stands for *śrutijanya-aikātmya-jñāna*.

²This means 'there is no *kāraṇadoṣa* and no *svarūpadoṣa*'; cf. note on the preceding verse.

³This obtaining is in reality the becoming one of the so-called knower and the so-called object of his knowing; cf. SP: *miter aikyabodhasya meye paramārthasatye paryavasānāt*.

तस्मादविपरीतार्थज्ञानाच्छ्रेयो ह्यवाप्यते ॥

विपरीतार्थतायास्तु न हेतुर्जगतीक्ष्यते ॥ ५८ ॥

[*aviparītārthapratipatteḥ*...(BUB p. 47) is explained.]

Therefore, bliss is certainly¹ obtained from the knowledge of the (Real) object which is not otherwise (grasped). However, no purpose is known (lit. seen) in this world for (the Real) object being known as otherwise.² [58]

¹It seems from SP that the verse read as...*cchreyo avāpyate* (without the Samdhi of *o* and *a*; but only without any purpose! *hi* 'certainly' makes it quite emphatic. Read SP: *samyagbodhā-dhīnā śreyovāptir iti sthāṇvādaḥ prasiddham iti vaktum hiśabdah, viśamdhīpāṭhas tv aphalatvād upekṣitaḥ*.

²Earlier it was pointed out that the purpose of the knowledge of the Real as it is securing liberation. There is however no purpose served by understanding it otherwise. Read in this context BUB (p. 47): *yo hy aviparītām artham pratipadyate loka sa iṣṭam prāpnoty aniṣṭād vā nivartate, na viparītārthapratipattyā*.

वस्तुनिष्ठैव मा यस्मान्न तदज्ञानजाश्रया ॥

तस्मात्तन्मोहविध्वस्तौ ध्वस्तिः स्यान्मोहजस्य च ॥ ५९ ॥

Since valid knowledge¹ depends only on (the knowledge of) the (Real) object itself and not dependent (lit. resting) on what is produced from the ignorance about it,² therefore, when there is destruction of the ignorance of that, there follows the destruction of what is produced from (that) ignorance. [59]

The argument in this verse is based on the acceptance even by the Siddhāntin that knowledge arising from words is *viparīta* 'false', for it has for it an object that is connected with (i.e. affected by) *upādhis* and that which is not directly experienced by one. Cf. SP: *asaṃsr̥ṣṭāparokṣaṃ vastv ekam evādvitīyaṃ yatsākṣyād ityādiśruteḥ...*

¹*mā*=*pramā*.

²It refers to *vastu* 'Real object'. Here we feel the cryptic or terse way of Sureśvara's writing: *vastuniṣṭhā*=*vastu(yāthārthya)-niṣṭhā*. In *tadajñāna...tat* refers only to *vastu*.

न चैवं सति मानानां द्वयवर्थता स्यात्कथंचन ॥

यथाभूतार्थबोधित्वमेवमेव मितेर्भवेत् ॥ ६० ॥

This being the situation, the means of knowledge would not in any way give rise to the knowledge of twofold nature (viz. both real and unreal)¹. Only thus there would be the character of the knowledge as informing about the object as it is. [60]

¹This is to say: the word is used in the sense 'this is right and this is not right'. Cf. SP: *saṃvidekarase mānapravṛttiḥ*.

ईश्वरादिविकल्पानां प्रत्यग्वस्त्वविकल्पितम् ॥

विषयो न मृषाबुद्धिः परमार्थं विना यतः ॥ ६१ ॥

Among the various notions of Īśvara and others, the inner self stands uniform¹ (i.e. not variously understood), since an object of knowledge would not be that about which

there arises false knowledge, unless there is some one Reality (to prove that as false). [61]

So far, i.e. from verse 58 up to this verse, Sureśvara refuted the falsity in respect of the purity of the Ātman as understood or implied by the opponent of Vedānta. Now, this verse aims to point out how the Siddhānta differs from Śūnyavāda.

¹That is to say: various notions cannot be formed about it.

यावत्किञ्चिन्मितेः प्राप्तं न तन्मिथ्या मितत्वतः ॥
मिथ्येति ग्राह्यच्छास्त्रमनर्थार्थं यतो भवेत् ॥ ६२ ॥
नास्मि ब्रह्मेति दृष्टं चेन्न भेदप्रतिपत्तिः ॥
प्रतिमावद्धि नामादौ ज्ञाते ब्रह्मेति धीरियम् ॥ ६३ ॥

[Sureśvara now states in verses 62-65 a second (i.e. an alternative) meaning of the word *prakaraṇa* (BUB p. 47): *nāviparītārtha* ...in respect of the falsity associated with Prāṇa by an opponent. The second line of verse 63 explains *na pratimāvad*... (BUB p. 48).]

‘Whatever is obtained from the knowledge of the means of knowing (viz. the Śruti)¹ cannot be false on account of its being known (from the Śruti), because scriptures would be (considered as) conveying some undesirable information, if it informed (about the purity of the Ātman) as false.’ [62]
(It might be argued:) ‘We have already known that the name (etc.) is the Brahman.’ (We reply:) ‘No, because of the knowledge of the distinction (between the two). This knowledge, viz. (it is) Brahman, (which arises) when a name (etc.) is known, is like (that) when (the true nature of) an image² (is known).’ [63]

¹This is in consonance with the Siddhānta position that the knowledge of the Ātman is obtained by only one means, viz. Śruti.

²This is explained fully in the following verse.

यथा निर्जातभेदे हि विष्णुधोरुपलात्मनि ॥
विधीयते तथा नास्मि ब्रह्मबुद्धिविधीयते ॥ ६४ ॥

‘As (in common life) they entertain the notion of Viṣṇu in what is in reality a stone, even though the distinction between the two is known, so it is enjoined (in the Śruti to entertain that) a name is to be taken as the Brahman.’ [64]

अज्ञातरज्जुतत्त्वो हि रज्जुं सर्पधियेक्षते ॥
नामादौ तु यतो नैवं तस्मादसदिदं वचः ॥ ६५ ॥

Indeed, one who has not known the true nature of a rope sees (the rope) with the notion of a serpent. As against this (*tu*), since it is not (i.e. one does not do) so, this (your) say is incorrect (*asat*). [65]

ब्रह्म नैवेह वस्त्वस्ति दृष्टिरेवेति चेन्मतम् ॥
नर्गादिषु सतामेव सत्सु दृष्टिसमन्वयात् ॥ ६६ ॥

[Verses 66-68 state and refute the object that the Brahman does not exist and yet is seen in name etc.]

If it is held: ‘There does not at all exist an entity (called) the Brahman, it is merely seeing (something as the Brahman).’¹ (We reply:) ‘Not so, because in respect of a *rc*² etc., which are existent (things) indeed, there is seeing connected only with what are existents.’³ [66]

¹The opponent implies similarity between *nāmni brahma-drṣṭi* and *rajivām sarpadrṣṭi* where (in the pairs) are involved one real and another non-existent.

²Cf. CU 1.6.1: *iyam evarg agniḥ sāma*.

³SP: *rgādiṣu satsu satām prthivyādīnām āropadarśanān nāmā-dāv api saty eva sato brahmaṇo drṣṭir āropanīyety arthaḥ*. Also SP points to a number of Śruti passages (CU 6.2.1; Kaṭha U 6.13; TU 2.6.1) which declare the reality of the Brahman, and to the discussion on this point in SV.

गौणस्य मुख्यापेक्षत्वान्मुख्यं ब्रह्म विना न सत् ॥
गौणं ब्रह्म यथा गौणो वह्निर्मुख्याग्निपूर्वकः ॥ ६७ ॥

‘Since what is metaphorically conceived is dependent on what is primarily (intended), therefore, the metaphorically

conceived Brahman is like the metaphorically conceived fire which (fire) has necessarily pre-existed (the man).¹ [67]

¹This point is clarified in BUB (p. 49-50): *pañcāgnyādiṣu cāg-nitvāder gaṇatvān mukhyāgnyādisadbhāvavan nāmādiṣu brahma-tvasya gaṇatvān mukhyābrahmasadbhāvopapattiḥ kriyārthaiś cāviśeṣād vidyārthānam*. This is an instance of *gaṇamukhyādhi-karaṇanyāya* (Mīmāṃsā Sūtra 3.2.1.1). The commentary cites the known example of metaphorical speech *agniḥ māṇavakaḥ* whose truth depends on the existence of a real fire already known or seen by a speaker.

न चासद्विषया काचिद्बुद्धिर्जगति वीक्ष्यते ॥

सर्वार्थव्यभिचारेऽपि संविदव्यभिचारिणी ॥ ६८ ॥

‘And there is not known (lit. seen) in the world any knowledge which has some non-existent as its object. (Contrary to this) Sentience (i.e. the knowing one) is ever invariably existent even while all objects¹ (of knowledge) have variance’². [68]

¹This indicates the structure of any worldly understanding or the so-called knowledge situation, viz. the knower, the object of knowledge, the means of knowing and the decision in knowing; they are time and again referred to in BUBV etc. as *mātrādi*. Sentience is *saṁvid* or *cidvastu*.

²That is to say: the so-called objects might or might not exist.

न चापीहागमाभासोऽचोदनालक्षणत्वतः ॥

क्रियार्थैरविशिष्टत्वाद्विद्यार्थोक्तेः परात्मनि ॥ ६९ ॥

[Verses 69-77 pertain to the objection that ‘the Vedānta sentences are unauthoritative, since they do not have injunctive force’ and its refutation.]

And further (one should) not (argue that) ‘there is not here (merely) the semblance of a (scriptural) text, because the text is not characterised as injunction(s) and because the statement of the lore in respect of the Ātman is not

marked by (or, does not refer to) some object(s) to be achieved by some action.' [69]

SP points out that the objection in the above is raised by one who is not aware of the portion of the SV (viz. 672ff.) pertaining to his argument: The instruction regarding the knowledge of the Brahman is not authoritative scripture owing to the lack of injunctive force in it.

ज्योतिष्टोमादिका यद्वद्विशिष्टानेकसाधना ॥

एवंक्रमप्रयुक्ताङ्गा तथा चैवंपला क्रिया ॥ ७० ॥

अन्यप्रमाणाविषया वाक्यादेवावगम्यते ॥

यथा तथेहापूर्वादिवस्तुक्तेरेव गम्यते ॥ ७१ ॥

As the (ritual) activity such as Jyotiṣṭoma etc. which has the means specified (in the scripture) and consists in parts with their order (enjoined) in some way¹ and also has some particular reward, [70]

is not the object of (any) other means of knowing and is known only from the Vedic sentence, so also here (in Vedānta) the (existential) entity (which is described as *apūrva* and so on² becomes known from the statement (in the Śruti). [71]

¹Literally it means 'such and such'.

²Cf. *tad etad brahmāpūrvam anaparam anantaram abāhyam* (BU 2.5.19)

न च वाक्याद्विपर्यस्ता यदि वा संशयात्मिका ॥

बुद्धिरुत्पद्यतेऽस्माकं यथाभूतार्थबोधिः ॥ ७२ ॥

And from the Vedic sentence that informs (us) about 'the existential entity as it is, there does not arise on our part the knowledge which is either otherwise (than right) or¹ beset with any doubt. [72]

This verse has a basis in the possible doubt that knowledge gained from the Vedic (=Vedāntic) sentence, being like any other knowledge, could be false or subject to doubt.

¹*yadi vā=atha vā.*

कार्याभावादयुक्तं चेन्नोक्तिबुद्धेस्तथार्थतः ॥

भावनार्थस्य नैवेह भाव्यर्थत्वात्तथार्थता ॥

किंतु मानापितत्वात्सा यथाभूतार्थतेष्यते ॥ ७३ ॥

If (it is said by the opponent:) ‘It is not proper (to hold a *jñānaparavākya* as an injunction) since there is absence of (any) effect to be produced.’, (the Vedāntin answers:) ‘This is not so, because the knowledge (which arises) from the statement (of the Śruti) has for its object (that which has that nature)¹. Since the thing conveyed by the impulse² here³ is a thing to be produced (in future), it does not at all have the nature of that kind (of the thing).’ Yet (the Vedāntin answers:) ‘That (nature of) the thing conveyed by the (so-called or formal) impulse is the nature of the thing as it is⁴, because it is conveyed by the authoritative means (viz. the Śruti)’.

[73]

The argument concerns and answers an alternative question regarding the nature of the thing conveyed by an injunction.

¹*tathārthataḥ* is for *tathārthavattvataḥ*—an instance of Sureśvara’s cryptic style, or rather, use of unusual forms in place of the right/precise ones; it stands for *yathābhūtārthavattvataḥ*.

²This means ‘the force behind any injunction’.

³*iha*=*karmakāṇḍe*—SP and NKL.

⁴The Brahman, as it is or in its true nature, is made known by the so-called injunction, or alternatively, any matter conveyed by any injunction. The injunction is understood here as *ajñātārthajñāpaka*.

नापि तद्विषयायाश्च कार्यत्वात्स्यात्तथार्थता ॥

प्रमाणाभिजनादेव यथाभूतार्थता धियः ॥ ७४ ॥

Not also is there authoritativeness¹ of the knowledge arising from that² as what is to be produced; (indeed) knowledge has the nature of what has for its object a thing as it is only when it has its origin in what is an authoritative means of knowing.

[74]

The argument pertains to what makes the impulse in the Śruti about *jñāna* authoritative.

¹*tathārthatā=pramāṇatā* (SP), *prāmāṇyam* (NKL).

³*taddhiṣaṇā=tasyāḥ* (*śruteḥ janitā*) *buddhiḥ*.

अन्योन्याश्रयतादोषः कार्यप्रमाण्यवादिनः ॥ ७५ ॥

प्रमाणाधिगतौ सत्यां पुंसो मेयानुरोधतः ॥

अनुष्ठेयोऽननुष्ठेय इति पञ्चान्मतिर्भवेत् ॥ ७६ ॥

In the case of him who understands the authoritativeness (of the Śruti sentences) on the basis of what is to be performed, there is the fault, called interdependence, (viz. thus:)—

[75]

(Only) after (one has understood a Vedic sentence) in consonance (with the knowledge of) what is to be known (viz. what is to be accomplished), there is the acceptance of (that sentence as) the means of right knowledge; (and, at the same time, it is held that) there results (only) later the knowledge (of what is prescribed as) something to be accomplished or not to be accomplished.

[76]

Verse 76 explains the mutual dependence of *pramāṇavākya* and *pramāṇavākya*janitārtha.

एकरूपं यतो मानं विरुद्धानेकरूपिणाम् ॥

भानुबद्धोधकं दृष्टं नातोऽनुष्ठेयतो मितिः ॥ ७७ ॥

Since an authoritative means (of knowing) is, like the Sun, a uniform conveyer (of the objects) which have many mutually opposed forms, therefore, knowledge does not arise (only) from (a rule regarding) what is to be performed. [77]

The nature of an authoritative means of knowing does not depend upon the various or opposed natures of the objects. This is seen from the Sun's revealing objects of all kinds. Therefore, the Śruti can, in the same way, be authoritative in respect of what is to be accomplished and what is not to be accomplished. The important character of the Śruti is that it should be informative of what is not known (from any other source).

नन्ववाक्यप्रमाणत्वमननुष्ठानतो भवेत् ॥
पदानां संहतिर्यस्मान्न दृष्टेह क्रियां विना ॥ ७८ ॥

[Verses 78-83 discuss whether the Brahman is the meaning of word(s) or that of sentence(s).]

It might be argued: 'On account of the absence of effecting (a product), (the statement about the Brahman) would have unauthoritativeness, since no construe of words is seen (as possible) here¹ without (any reference to) any action (connected with the same)'.² [78]

This is the argument of the objector: the Brahman is not the meaning of the word(s).

¹In the Vedic sentence. Such is the view of the Mīmāṃsaka.

²This implies the presence of a verb which expresses some action in conjunction with various words in the sentence. In Vedāntic sentences, it is argued, the Brahman which is the subject in them is not connected with action and, therefore, with verbs.

पदार्थत्वे च तत्सिद्धिर्लिङ्गप्रत्यक्षसंश्रयात् ॥
आगमैकप्रमाणत्वान्न पदार्थत्वमिष्यते ॥ ७९ ॥
अस्यस्मीत्यभ्युपेतत्वान्नैवमप्युपपद्यते ॥
अस्ति मेरुर्यथा वर्णचतुष्टयविशेषणः ॥ ८० ॥
अकार्येऽपि हि मेवादावस्ति मेरुरिति श्रुतेः ॥
सम्यग्धीर्जायते यद्वत्तथा तत्त्वमसीत्यतः ॥ ८१ ॥

'And that¹ would be established (only) if it² were accepted as the meaning of the word(s), by resorting to inference³ and direct perception; it cannot (however) be accepted that (the Brahman is) the meaning of the word(s) (without any connection with action) having only Śruti as the authoritative means of knowing it.' [79]

'(And) this objection also cannot be considered as reasonable since the verbs *asi* and *aṣmi* are accepted (as verbs connected with the subject of the sentence, viz. *tat* and *aham* for Brahman). (To explain:) This is (so) because there

occurs in a sentence (the subject) Mt. Meru only qualified by (a word expressive of) four colours (and it is taken as connected with *asti* 'is'). [80]

'As, indeed, in respect of Mt. Meru etc., which is not what is to be accomplished⁴, there arises from the Śruti the right knowledge (of it), viz. 'There is Mt. Meru.', so will there arise right knowledge from the statement 'That you are.'. [81]

Verses 79-81 concern the argument of the objector regarding that the Brahman is not the meaning of the word(s).

¹Namely, connection of words.

²Namely, the Brahman.

³The word *liṅga* stands for *liṅga-liṅgi-parāmarśa* 'inference'.

⁴The emphasis on *akārye* has be noted.

मेवादिज्ञानवच्चेत्स्यान्निष्फलत्वादमानता ॥

नैवं तत्फलसाक्षात्त्वाज्ज्ञानोद्भूतेरनन्तरम् ॥ ८२ ॥

If one were to say: 'There is unauthoritativeness (of the Śruti sentence in this case also) as in the case of the knowledge about Mt. Meru etc. owing to their being devoid of any effect', this is not so, since the effect of them (viz. such sentences) has been directly experienced¹ subsequent to the rise (of the knowledge of the Mt. Meru). [82]

¹The Siddhānta emphasises on the direct experience as an unfailing means to right knowledge; this is in contrast with inference.

भिद्यते हृदयग्रन्थिर्ब्रह्माप्येतीति च श्रुतेः ॥

न चार्थवादतैतस्यां जुह्वामिव फलश्रुतेः ॥ ८३ ॥

And (thus we see, in this respect) from the Śruti (statements); 'The knot of heart is broken'¹ (and) '(Becoming the Brahman) he merges into the Brahman'.² Also, there is no nature of Arthavāda in this (Śruti)³ in the same way as in the Śruti statement regarding the reward of the use of a ladle (made of Palāśa wood).⁴ [83]

¹Muṇḍakopaniṣad 2.2.9.

²BU 4.4.6: *brahmaiva san brahmāpyeti*.

³SP controverts the variant reading...*vādataitasyāh* for *tasyām*; NKL and AnSS editions agree in respect of the latter reading.

⁴This *phalaśruti* has a reference to some subordinate or secondary reward in a ritual. In respect of the Śruti regarding *brahmāpyaya* (cf. *brahmāpyeti* in the preceding verse), there is no notion of primary and secondary rewards, i.e. results.

Verses 84-95 explain that the Mahāvākyas 'That you are.' etc. as authoritative just like any prohibitive statement even when they merely refer to certain things as they are and not to the things that are to be accomplished.

निषिद्धानिष्टसंबन्धो वाक्यादेवावगम्यते ॥

न चानुष्ठेयता तस्य मनागप्युपपद्यते ॥ ८४ ॥

Connection of what is prohibited and/or what is undesirable (with action) is understood only from a Śruti statement and its character as what is to be accomplished¹ cannot be proved by any reason, even to a little extent. [84]

¹This is to emphasise that there can be authoritative Śruti statements even if they pertain to what is not to be accomplished (or) effected.

निषेधसंस्कृतधियो निषिद्धविषये न च ॥

पलाण्डादावकरणादन्या धीर्जायते श्रुतेः ॥ ८५ ॥

And, indeed, in the case of one whose intellect¹ is impressed by a prohibitive rule in regard to what is prohibited, there does not arise from a Śruti statement any knowledge¹ other than that of not taking an onion etc.² [85]

¹The first *dhī* stands for the sense-organ (*buddhi*) and the second for the impression on it (*jñānākāra*).

²Cf. *Manusmṛti* 5.19: *palāṇḍum grñjanam caiva laśunam grāmakukkuṭam/chatrākam viḍvarāham ca matyā jagdhvā paten narah* (quoted in NKL); this is an example of a prohibitive sentence.

यथा निषेधवाक्येभ्यो नान्याकरणतो मतिः ॥

तत्त्वमस्यादिवाक्येभ्यस्तद्वदेवेति निश्चयः ॥ ८६ ॥

[Verses 84-86 refer to the agreement between Vedānta-sentences and Brāhmaṇa-sentences as regards prohibitions.]

As from the prohibitive Śruti statements there does not arise any thought other than of not doing (certain things), so also from the sentences 'That you are.' etc. (there does not arise....doing)—this is the decision.¹ [86]

¹Verse 85 stated the illustration and verse 86 explained its application to the Vedāntic sentences—and thus established the conclusion.

मृगतोये प्रवृत्तस्य तृडार्तस्योषरेक्षणात् ॥

तमोध्वस्तौ निवृत्तिः स्यात्तथात्मज्ञानतोऽपि नः ॥ ८७ ॥

As in the case of one afflicted by thirst, who moves towards mirage (for drinking water), (there results only his turning back) when his ignorance (about it) is removed on his seeing the marshy land, so also (is removed), according to us, the turning back of one (from the false transmigratory world when one's ignorance is destroyed) by knowing the Ātman. [87]

तस्मान्निषेधशास्त्रस्य यथा भूतार्थनिष्ठता ॥

पुंव्यापारस्य गन्धोऽपि न तत्रास्तीति निश्चयः ॥ ८८ ॥

आत्मयाथात्म्यविज्ञाननिष्ठता तद्वदीक्ष्यताम् ॥

तत्त्वमस्यादिवाक्यानां नानुष्ठानं मनागपि ॥ ८९ ॥

Therefore, the decision is such that, as in the prohibitive scripture there is no reference to even a little of human activity, and that it is based on an existential entity, [88]

so, be it accepted (lit. seen) that in the case of sentences 'That you are.' etc. they pertain (only) to the knowledge of the true nature of the self and that there is no reference to any activity, even to a little extent. [89]

कलञ्जभक्षणस्येव ननु न श्रौतकर्मणः ॥

अज्ञानहेत्वन्तार्थकारिता गम्यते मितेः ॥ ६० ॥

(The objector answers:) 'But, as in the case of eating of *kalañja*,¹ it does not become known from the Śruti that the knowledge of a ritual activity, which is prescribed by scripture, has the nature of being the cause of ignorance and of some undesirable result.'

[90]

This is an argument of the Mīmāṃsaka who holds that every sentence must have relation to some activity; it is not merely *ajñātajñāpaka*.

¹It refers to poisoned meat.

नैवमज्ञानहेतुत्वानर्थार्थत्वेन तुल्यता ॥

कलञ्जभक्षणेनातस्तन्निवृत्तौ निवर्तते ॥ ६१ ॥

(We answer:) 'There is no similarity¹ between (knowledge of the Brahman arising from the Śruti) and that about a *niṣiddha-karman*, like the eating of *kalañja*, in being the cause of ignorance and of some undesirable result². (A person) desists (from every ritual activity) when his ignorance is removed (lit. warded off)³.'

[91]

This is the Siddhānta, an answer to the argument in the preceding verse.

¹It literally means 'equality'.

²The eating of *kalañja* is owing to ignorance about its true nature and it brings about an untoward result, viz. death. So does the performance of a ritual activity proceed from ignorance about the nature of the self and brings about the continuation of the cycle of transmigration.

³*tannivṛtti* refers to *tamodhvasti* in connection with the knowledge of the Brahman, cf. verse 87 above.

शास्त्रमात्रनिमित्तत्वान्नित्यानां नैवमिष्यते ॥

मिथ्याज्ञानादिहेतुत्वं काम्यानामिव चेन्मतम् ॥ ६२ ॥

नाविद्यारागद्वेषादिदोषदुष्टस्य तद्विधेः ॥

स्वर्गादिकामिनो यद्वदग्निहोत्रविधिस्तथा ॥ ६३ ॥

मोहकामादिदुष्टस्य नित्यं कर्म विधीयते ॥

न स्वतः काम्यनित्यत्वविवेकोऽस्तीह कर्मणः ॥ ६४ ॥

If it is held: 'We do not accept such nature of being the cause of false knowledge (about the self) etc. in the case of obligatory (rites) known only from the Śruti, as in the case of desired rites.' [92]

(To this the answer is: 'This is not so), since the injunction regarding them¹ is affected by the fault of ignorance, hankering (for some reward), hatred etc., as, for example, there is an injunction (for the performance) of Agnihotra for one who is desirous of heaven etc.'² [93]

'(Even) an obligatory rite is enjoined on one who is affected by ignorance, desire etc. (And) here (in Veda) there is not held any essential³ distinction between rites being desired and obligatory.'⁴ [94]

¹This is a reference to the obligatory rites.

²Desire for heaven etc. signifies the undesirable identification of the self with a body, its pleasure and its transmigration etc. This explains *yathā ca darśapaurṇamāsādikriyedaṃphalā...* (BUB p. 50)

³This literally means 'of their own'.

⁴This is to say: the nature of the fourfold injunction, viz. *utpattividhi*, *vinīyogavidhi*, *prayogavidhi* and *adhikāraavidhi*, remains the same in the case of both kinds of rites.

कर्तृस्थेन हि स्वर्गादिकामदोषेण काम्यता ॥

अतो नान्येन काम्यत्वं कर्मणः स्यात्कथंचन ॥ ६५ ॥

'The desirable nature of a ritual activity is on account of the faults such as the desire for heaven etc. which abide in a performer¹ (and) there would not be (in any rite) the nature of what is desirable on account of anything else, in any way.'² [95]

¹NKL observes here: *kāmaprayuktaṃ kāmyam, jīvanaprayuktaṃ nityam*.

²SP supports this by citing a line from Manu Smṛti: *yad yadd hi kurute jantus tat tat kāmasya ceṣṭitam* (2.4).

Verses 96-111 explain the distinction between two types of persons, those eligible for knowledge and those for action.

आविरिञ्चाद्विरक्तस्य तद्विविक्तात्मकामिनः ॥

मोक्षे पुंसोऽधिकारः स्यान्न कामापहृतात्मनः ॥ ९६ ॥

(As against the above, only) that man is eligible for liberation who has turned averse to (the world) beginning with the creator (Viriñca) and who has a desire for (knowing) the Ātman¹ which is distinct from that (world); but not he whose mind² is carried away by desire. [96]

¹This refers to the Supreme Self.

²This refers to the inner self, identical with a human body, this is the meaning of the (second) ātman.

पराचः कामानित्येवं कामानित्यपरं तथा ॥

योऽकाम इति तद्वच्च श्रुतिः कामनिषेधनी ॥ ९७ ॥

There is a Śruti statement¹: *parācaḥ kāmān*; so also another, viz. *kāmān* and likewise yet another: *yo'kāmaḥ* (all of) which are prohibitive of (entertaining) desires. [97]

¹Refer to *Kaṭhopaniṣad* 3.2: *parācaḥ kāmān anuyanti bālās te mṛtyor yanti vitatasya pāśam*; *Muṇḍakopaniṣad* 3.2.2: *kāmān yaḥ kāmāyate manyamānaḥ sa kāmabhir jāyate tatra tatra*; BU 4.4.6: *athākāmāyamāno yo'kāmo niṣkāma āptakāma ātmakāmo na tasya prāṇā utkrāmanti*—this is *niśedhaśruti* (NKL).

अविद्याया न चोच्छित्तौ ज्ञानादन्यदपेक्ष्यते ॥

ज्ञानोत्पत्तौ न चैवान्यच्छमादिभ्यो ह्यपेक्ष्यते ॥ ९८ ॥

And for securing the removal of ignorance nothing else than the knowledge of (the true nature of) the Ātman is expected and for securing the rise of (that) knowledge is expected nothing else than tranquillity etc. (which are the effects of purification (of one's mind) etc. [98]

शमाद्युत्पत्तये नान्यद्बुद्धिशुद्धेरपेक्ष्यते ॥

बुद्धिशुद्धौ च नित्यादिकर्मभ्यो नान्यदिष्यते ॥ ९९ ॥

For achieving (lit. effecting) tranquillity etc. is expected nothing else than purification of intellect and for the purification of the intellect is desired nothing else than (the performance of) the obligatory and other rites. [99]

आत्माज्ञानैकहेतुत्वाद्वाङ्मनःकायकर्मणाम् ॥
आत्मज्ञानेन तद्वाधात्कर्मपिक्षा कुतो भवेत् ॥ १०० ॥

The activities of speech, *manas* and body which originate from (only) ignorance about the self that is (within) and gets stultified¹ by the knowledge of the self, whence can there be the expectation (i.e. need) of any ritual activity? [100]

¹Or alternatively, 'which has its stultification...', that is to say: the effects of these performances are removed.

यदज्ञानात्प्रवृत्तिर्या तज्ज्ञानात्सा कुतो भवेत् ॥
प्रत्यग्ज्ञानोद्भूते तस्मात्समाप्तिः सर्वकर्मणाम् ॥ १०१ ॥

How can an activity (= *pravṛtti*) that (proceeds) from the ignorance about something continue after (the rise of) the knowledge of that (thing)? Therefore, on the rise of the knowledge of (the true nature of) the inner self, (there occurs) the cessation (lit. securing the end) of all activities.¹ [101]

¹SP refers this to *Bhagavadgītā* 6.3: *yogārūḍhasya tasyaiva (=karmanah) śamaḥ kāraṇam ucyate.*

न चोच्छिन्नात्ममोहस्य सदैवात्मधियः स्थितेः ॥
प्रतीच्यवसरोऽस्तीह वाङ्मनःकायकर्मणाम् ॥ १०२ ॥

And since in the case of him, whose ignorance about the Ātman is destroyed, there ever abides in his inner self the awareness of (the true nature of) [the Ātman, there is no occasion for the activities of speech, *manas* and body. [102]

कर्मणोऽवसरश्चेत्स्यात्त्वद्भिक्षावसरो यथा ॥
नात्मवस्तुनिमित्तत्वात्सम्यग्बुद्धेः सदा स्थितेः ॥ १०३ ॥

If (the objector would say:), 'As there is an occasion for you to accept (going for) begging,¹ so there would be an occasion for activity (in the case of the knower of the Brahman).', (our reply is:) 'That is not so, since the right knowledge does ever remain², caused as it is by the Reality, viz. the Ātman³. [103]

¹Begging is understood to be a duty of a Saṁnyāsin; cf. *Manusmṛti* 6.55 (note on verse 107 below).

²NKL states: *prāvāharūpeṇeti śeṣaḥ* (at the end of the verse).

³This refers to the condition of *jīvanmukti*.

न वस्त्ववसरापेक्षं स्वतःसिद्धत्वकारणात् ॥

क्रियैवावसरापेक्षा तस्याः कारकतन्त्रतः ॥ १०४ ॥

Reality does not expect (i.e. depend on) any occasion for its existence, since it has the nature of a self-established (thing). (Contrary to this) an effect¹ (lit. activity) expects an occasion, dependent as it is on some agent.² [104]

¹Read SP: *kāryamātraṁ kriyāśabdena grhyate*.

²It could as well be thus: on some means of production, time for it etc. connected with the verb (*kāraka*).

सम्यग्ज्ञानशिखिप्लुष्टं कुतोऽज्ञानं पुनर्भवेत् ॥

शुद्धदोषोद्भवत्वाच्च न तु कर्मैवमिष्यते ॥ १०५ ॥

How could the ignorance which is (once) burnt by the fire of right knowledge arise again? An activity, however, is not accepted (lit. desired) to be such (viz. of such nature¹), since it has its origin in the faults (that affect) what is (essentially and originally) pure. [105]

¹Namely, what would not arise again.

क्षुधादिदोषहेत्वेव त्वस्मद्भुज्यादि नो मतम् ॥

नियतानेकहेतुत्वान्नातो भुजिसमा क्रिया ॥ १०६ ॥

[Here Sureśvara explains *śāstranimittakāldyapekṣatvāt*...(BUB p. 55)]

Our activity of eating etc. is, as we know, what merely

arises out of the faults, hunger etc. Therefore, here¹ there is no action of ours² which is similar to the common eating of food etc., because it has arisen from various causes, viz. specified (rules of conduct). [106]

Here is the amplification of the idea of verse 105 above. A Saṁnyāsin's eating is not for satisfying hunger. See note on verse 103 above.

¹It means 'in the state of *jīvanmukti*'.

²i.e. performed by us.

दोषहेतावपि तथा कालादिनियमस्तथा ॥
भवद्भिक्षाटनादौ स्यादिति चेन्नैतदेव तु ॥ १०७ ॥

If (it is still argued:) 'Even in the case of (an act which is) effected by faults, there are rules regarding time etc., so they are there in your going abegging etc.'¹, (our reply is:) 'It is indeed not just this.' [107]

¹That is to say: Such rules as *cāturvarṇyam cared bhaikṣyam* (untraceable); *ekakālam cared bhaikṣyam* (*Manusmṛti* 6.55); *yaśnām tu caturguṇam* (*Śaṅkhasmṛti* 16.24; *Viṣṇusmṛti* 60.26 and *Manusmṛti* 5.137 which uses *ca* instead of *tu*).

नैवायं नियमोऽस्माकं परिसंख्या हि सा यतः ॥
क्रियाप्रयोक्त्री नाप्येषा तस्माद्विषममुच्यते ॥ १०८ ॥

'Indeed, this is not our rule; because it is, according to us,¹ a rule of exclusion.² And this rule (of exclusion) is not promotive of any activity.³ Therefore, what you have said is only an indication of disagreement (between the two activities under reference).⁴' [108]

¹It literally means 'for us'.

²*parisaṁkhyā* is a rule which is thus defined: (*vidhir atyantam aprāptau niyamaḥ pakṣike sati*,) *tatra cānyatra ca prāptau parisaṁkhyeti gīyate* (*Śloka-vārtika*).

³Sureśvara points out that what seem as rules regarding the time etc. for 'a Saṁnyāsin's going abegging do not promote his activity but they intend to exclude any other point of time for him, if at all he intended go for it.

⁴The objector's comparison of a ritual activity with a Samnyāsin's going abegging is only inapt. The two are totally dissimilar.

नातोऽपवादकृत्सा स्यादैकात्म्यज्ञानजन्मनः ॥
 सर्वकर्माधिकाराणां निषेधायात्मधीभवः ॥ १०६ ॥
 निषेधविधिवत्तस्मात्प्रत्यग्याथात्म्यधीविधिः ॥
 प्रत्यङ्मोहैकहेतुत्वाद्वाङ्मनःकायकर्मणाम् ॥ ११० ॥

‘Therefore, it (viz. *parisaṁkhyā*) does not cause any fault, since there is the rise of the knowledge of the uniqueness of the self. (Indeed) the rise of the knowledge of the Ātman results into (lit. is for) the removal (lit. annihilation) of all the sources of eligibility for (ritual) activity.’ [109]
 ‘Therefore, the (so-called) injunction in respect of (acquiring) the knowledge of the true nature of the inner self is like the prohibitive rule, because (all) activities of speech, *manas* and body have only ignorance about the inner self as their cause.’ [110]

These two verses point to the similarity of between *pratyagyāthātmya-vidhi* (which is granted to be a *parisaṁkhyā-vidhi*) and *niṣedha-vidhi* and yet emphasise the real nature of the so-called *parisaṁkhyā-vidhi*.

तस्माद्वस्त्वेकनिष्ठस्य प्रामाण्यं वचसो ध्रुवम् ॥
 प्रतिषेधविधेर्यद्वदुभयोरविशेषतः ॥ १११ ॥

Therefore, the authoritativeness of the statement (of the Śruti) resting only on the Reality is positively certain, exactly in the same way as of a prohibitive rule, since there is no difference between them. [111]

Sureśvara summarizes the argument given so far: The prohibitive rule causes the rise of knowledge of what one should not do and does not promote (i.e. enjoin) any activity. Similarly, a rule regarding obtaining the knowledge of the self only gives rise to the knowledge and does not promote any activity.

स्वाभाविकैकदोषोत्थो व्यवहार इहासुरः ॥

शास्त्रैकहेतुर्देवः स्यात्तयोः स्पर्धा विरोधतः ॥ ११२ ॥

[The meaning of BU 1.3.2 beginning with *te ha vācam* is taken up, by referring to the myth of the fight between the gods and the demons who represent different tendencies of the twofold doings of individuals.]

In this (legend), the demoniac activity has arisen from the faults which are related only to their nature and that connected with the gods would have only the scripture as its basis.¹ Thus, the rivalry of the two² occurred on account of the conflict (of their natures). [112]

¹The notion of gods and their favour of gifts etc. becomes known only from the scriptural texts.

²This is a reference to the gods and the demons, mentioned in the myth.

The story of the rivalry between the gods and the demons, given in BU and CU, is supported by the division of qualities as *daiva* and *āsura* in the *Bhagavadgītā*, i.e. the *Mahābhārata*.

प्राकृतासङ्गविज्ञानकार्ये ह्यधिकृतिः स्वतः ॥

सुरद्विषां सुराणां तु शास्त्रोत्थज्ञानदीपितः ॥

कर्मज्ञानाधिकारः स्यात्संग्रामस्तद्विरोधतः ॥ ११३ ॥

Indeed the haters of the gods have by their very nature an inclination (lit. eligibility) towards activity which is the effect of (such) knowledge (as is) rooted in natural attachment.¹ Contrary to this, the gods' inclination towards activity and knowledge is revealed (lit. illuminated) by knowledge arising from the Śāstra.² Therefore, there ensues³ a conflict (between the gods and the demons) from the conflict between the same.⁴ [113]

¹This means 'the innate ignorance of an individual about the true nature of the inner self'.

²The scriptural texts give rise to such knowledge and activity as is (in almost every case) opposed to natural tendencies of an individual.

³The word *syāt* '(lit.) would be' is freely translated thus.

⁴That is, natural tendency and Śāstric impulse.

उत्कर्षो मानुषादूर्ध्वं पुंसः केवलधर्मतः ॥

अधोभावस्त्वधर्मात्स्याद्वाभ्यां मानुष्यसंभवः ॥ ११४ ॥

The ascendance of a man above the status of a human being is¹ on account of only *dharma*,² but his descendance from that (status) is on account of *adharma*.³ On 'account of both of these, there is (in store for one) the status of a human being. [114]

¹It literally means 'would be'.

²It refers to 'the performance of duties according to the scriptural prescriptions (Śāstra)'.

³It refers not to 'the absence of the performance of prescribed duties' but to 'doing what is opposed to *dharma*'.

आग्रजस्थाणुपर्यन्तशरीरग्रहणान्यतः ॥

लोकेष्विति श्रुतिर्वक्ति विरोधस्तन्निबन्धनः ॥ ११५ ॥

Therefore, the Śruti declares, '(There occurs) assuming of (different) bodies beginning from that which was born first¹ and ending with a pillar (lit. an immovable). The conflict² is then based on that³.' [115]

¹This refers to Prajāpati Hiranyagarbha who was the first embodied being and sacrificer.

²The words 'of the gods and the demons' are to be supplied.

³It means 'variously assuming bodies'.

अधोलोकफलेष्वेव प्राकृतज्ञानकर्मसु ॥

यत्नादासञ्जनीयोज्यं पितेत्यसुरनिश्चयः ॥ ११६ ॥

प्राकृतासङ्गतो मुक्त्वा पितायं दैवसाधनैः ॥

उत्कृष्टव्यो यथाशक्ति विबुधानां चिकीर्षितम् ॥ ११७ ॥

The decision of the demons was this: 'Let us with an effort get our father¹ attached to the activity and knowledge which arise from his very nature and which have the lower world(s)² for their result.' [116]

What the gods wished to do was, 'Having freed³ this our

father from his natural attachment, let us, to the best of our ability, have him raised⁴ (above the low levels) by divine means⁵ (of activity and knowledge).’ [117]

¹That is, Prajāpati.

²*prākṛtasaṅgavijñānakārye* of verse 113 above.

³*muktvā* is for *mocayitvā*—the casual sign is suppressed.

⁴*utkr̥ṣṭavya* is for *utkar̥ṣṭavya*.

⁵That is, Śāstric activity and knowledge.

नरप्रजापतितनावेवं देवासुरा मिथः ॥

स्वस्वभावानुरोधेन तेऽस्पर्धन्त स्ववृत्तिभिः ॥ ११८ ॥

[This confirms what is explained in verses 116-117.]

Thus, the gods and the demons in the body of the human¹ sacrificer rivalled with one another, following their own inclinations. [118]

¹This refers to the status of the Brahman, viz. Prajāpati, the subtlest human form, which was the first manifest form of the Brahman.

यदोद्भवति शास्त्रोत्था देवी वृत्तिस्तदासुरी ॥

व्येति यस्मात्ततोऽशेषं देवानां स जयः स्मृतः ॥ ११९ ॥

आसुरी तु यदा सेना कामक्रोधपुरःसरा ॥

जायते ह्यजयस्तेषामसुराणां जयस्तु सः ॥ १२० ॥

Since, when the divine inclination¹ that arises from (learning and following) scriptures prevails,² the demoniac (inclination¹) disappears entirely;³ therefore that is known to be the victory of the gods. [119]

As against this,⁴ when the demoniac army, led by desire and anger, appears, there follows the defeat of them (=the gods). And⁵ that is the victory of the demons. [120]

¹Or alternatively, ‘activity’.

²It literally means ‘appears’.

³Or alternatively, ‘in its entirety’.

⁴This *tu* refers to ‘contrary to the statement above’.

⁵This *tu* means *ca*.

स्वाभाविकत्वादासुर्या भूयस्या सेनयादिताः ॥

न शर्म लेभिरे देवाः स्वात्मत्राणासमीक्षणात् ॥ १२१ ॥

Afflicted by the army of the demons, which was very large on account of its being prompted (i.e. produced) by (their) nature,¹ the gods, not finding (lit. seeing) any protection for themselves,² did not find peace. [121]

¹That is, natural inclination. Cf. verses 22 and 25 above.

²In other words, as they could not find a way to protect themselves.

स्वभूमेश्चाव्यमानानां सुराणामसुरैस्तदा ॥

प्रादुरासीन्मतिः साध्वी दैतेयभयनाशिनी ॥ १२२ ॥

[Here is stated the purpose of BU 1.3.2: *te ha...udgītheti.*]

Then¹ there arose a good thought (in the mind) of gods who were being shaken from their own state by the demons—(a thought which, they felt or considered) could ward off the fear of the sons of Diti (=demons). [122]

¹Or alternatively, 'At that juncture'.

उद्गीथं समुपाश्रित्य ज्योतिष्टोमकृताविह ॥

तिरस्कृत्यासुरं दैवं भावं यामोऽधुना वयम् ॥ १२३ ॥

'Having resorted to Udgītha¹ in this Jyotiṣṭoma sacrifice and having (suppressed) the demoniac nature, let us now attain² (our) divine nature³.' [123]

¹This refers to the deity of the Udgītha—SP, note of the editor of NKL.

²The Present Indicative *yāmaḥ* is used for Present Imperative.

³The word *bhāva* can be connected with the demoniac and/or the divine.

कर्तृत्वादीह यत्सिद्धं वागादिद्वारमीक्ष्यते ॥

आत्मनस्तदविद्योत्थं निरविद्ये निषेधतः ॥ १२४ ॥

लौकिको वैदिकः सर्वो व्यवहारश्च वक्ष्यते ॥

अन्नत्रयाधिकारे हि मनआदावनात्मनि ॥ १२५ ॥

भूतेहानुविधायित्वात्क्षेत्रज्ञस्य तमस्विनः ॥

कूटस्थात्मातिरेकेण रूपमन्यन्न लक्ष्यते ॥ १२६ ॥

[Verses 124-26 explain that the daily dealings exist in Speech and others.]

Whatever is known here in an individual¹ as the capacity for activity etc. (and) is noticed to have come to exist (lit. got established) through Speech and others, has (really) arisen from ignorance (about the true nature of it²) —for,³ there is a denial (in the Śruti) of (the existence of that) in one who is free from ignorance.⁴ [124]

And (every) dealing,⁵ (be it) worldly or Vedic, will be declared in the section referring to three foods⁶ (to be resting) on *manas* etc.⁷ (which are) the non-Ātmans. [125]

A form of the knower of the field who is overpowered by darkness⁸ (viz. ignorance) on account of its following (lit. imitating) the activities⁹ of the elements is seen as apart from the immutable Ātman; (in reality) no other form (i.e. distinct from it¹⁰) is noticed. [126]

¹The words *iha ātmanah* refer to the inner self of an individual being.

²It means 'the inner self'.

³Or alternatively, 'the reason for saying so is that...'

⁴Cf. *yatra vā asya sarvam ātmaivābhūt tat kena...tat kena kam paśyet...* (BU 2.4.14)

⁵Cf. BSB (*adhyāsabhāṣya*): *tam etam avidyākhyam ātmānātmanor itaretarādhyāsam puraskṛtya sarve pramāṇaprameyavyavahārā laukikā vaidikāś ca pravṛttāḥ...* (p. 40)

⁶TU 2.8.

⁷Speech and Prāṇa are meant (SP).

⁸The Ātman is referred to in verse 124 as qualified by the word *niravidya* and here by *kṣetrajña* and *tamasvin*.

⁹The word *bhūteha* generally stands for *bhūta-icchā*, but Sureśvara uses it in the sense of 'activity' (= *bhūta-ceṣṭā*); cf. the note of the editor of NKL.

¹⁰Or alternatively, 'the other, viz. real, (form of the Ātman as such) is not noticed'.

Verses 127-153 explain BU 1.3.2.

एवं ताः संप्रधार्योचुरुद्गीथं साधनं परम् ॥

तत्परीक्षां प्रयत्नेन चक्रुः संभूय देवताः ॥ १२७ ॥

Having thus thought, those deities, coming together, said, the 'Udgītha (is) the best means' and then they tested it¹ with care.² [127]

¹It means 'wished to ascertain the potence/usefulness of it'.

²SP explains *prayatna* as an *anvayavyatirekākhyā-vyāpāra*. Possibly it meant: The gods feel that, not resorting to the Udgīthadevatā, they have lost (i.e. not succeeded) in the strife with the demons—this is Vyatireka. Now they would like to find if resorting to the same would bring them success—this is Anvaya.

वाचं संभावयामासुरियं ह्युद्गीथकर्मणि ॥

अत्यर्थं व्यापृता दृष्टा वाचमूचुस्ततः सुराः ॥ १२८ ॥

त्वं न उद्गाय उद्गानं त्वत्प्रधानं भवत्वित्दम् ॥

उद्गीथ इति चोद्गानं कर्मवेहाभिधीयते ॥ १२९ ॥

They thought (about) the Speech (thus): "Indeed, this one is seen to be the most active¹ in the ritual connected with the Udgītha."² (And) those gods then addressed the Speech: [128]

Do you sing aloud for us.³ May this singing aloud have you (as) the prominent (singer). Here the activity of singing aloud is mentioned by the word *udgītha*.⁴ [129]

¹*vyāprta*=*vyāprtavati*, i.e. *vyāpāravati*.

²This refers to one of the divisions of a Sāman (= *sāmbhakti-viśeṣa*); cf Introduction.

³Note the absence of Saṁdhi in *udgāya udgānam*—an archaic tendency in Sureśvara.

⁴This refers to the *sāmbhaktiviśeṣa*. This is according to the view of the objector.

स्तोत्रेणास्याभिसंबन्धाद्भक्तिमात्रं न तु क्वचित् ॥

वाग्भिगानिनी चेह वाक्शब्देनाग्निरुच्यते ॥ १३० ॥

On account of the close connection of this one with the (entire) prayer,¹ (we must understand that) this (word) does not refer merely to a part (of the Sāman) anywhere (in this context) and further by the word *vāc* is mentioned Agni, the superintending deity of speech.² [130]

This is the Siddhānta; an answer to the objector's view in the preceding verse. Accordingly, the Udgītha refers to the activity of the Udgātṛ priest.

¹This is a reference to the Pavamāna Stotra in the Agniṣṭoma. Cf. *athātaḥ pavamānānām...sa yatra prastuyāt tad etāni japet* (*Śatapatha Brāhmaṇa* 14.4.1.30; BU 1.3.28). Also, since the prayer contains a request, the addressee must be a sentient being who is capable of granting the request.

²Cf. *Aitareya Brāhmaṇa* 1.2.4: *agnir vāg bhūtvā mukham prāviśat...*

विषयोऽध्येषणाया हि चेतनावान्यतो मतः ॥

उपासिक्रियया योगो देवताया इहेष्यते ॥ १३१ ॥

Because it is indeed one, who is possessed of Sentience, can be the object of some impulse; therefore, here¹ is required the connection of a deity with the act expressed by the verbal root *upa√ās*. [131]

This verse is an address to those who consider the deities such as Speech, Eye and others as non-sentient.

¹Namely, in this context, i.e. in respect of the section on *upāsti* 'worship'.

अतोऽपि देवतैवेह वाक्शब्देनाभिधीयते ॥

तद्भूतेः पुरुषार्थत्वाद्देवता हीश्वरा परा ॥ १३२ ॥

For this reason also, here it is only the deity that is expressed by the word *vāc*. Since becoming¹ that (deity in the end) is the goal (or reward) of human activity,² the deity here³ is the highest ruler. [132]

¹*bhūti*=*bhāva* 'becoming'.

²The words 'which is connected with the Udgītha' are to be supplied.

³It means 'in this Upaniṣad, Agni is the highest'—cf note 2 on verse 130 above.

सैवातः प्रतिपत्तव्या सर्वासु ध्यानभूमिषु ॥

न त्विह प्रतिपत्तव्याः करणस्थानगोचराः ॥ १३३ ॥

Only that (deity) has therefore to be understood (lit. accepted) in all the phases of the meditations; and not (those deities) which have various organs of activities as the objects (of their superintending)¹;

¹The deity of any particular meditation—here Agni. [133]

पाराथ्यचित्तनत्वाभ्यां मर्त्यत्वाच्चापि कारणात् ॥ १३४ ॥

since they serve the purpose of another and have insentience as their nature, and also for the reason of their mortality. [134]

एवं वागादयः शब्दा देवतार्थाभिधायिनः ॥

सर्वत्र प्रतिपत्तव्या यत्रोपासा विवक्षिता ॥ १३५ ॥

Thus, the words Speech and others are to be understood as expressive of the meaning, the deities, wherever it is intended to state about meditation. [135]

जपमन्त्राभिधेयेयं वागित्येवं विनिश्चिताः ॥

उपासांचक्रिरे देवा एषैवोद्गीथदेवता ॥ १३६ ॥

Those gods who had thus decided that this deity (of) speech, addressed (lit. expressed) in the Japamantra,¹ worshipped (it), and, also (they decided) 'This is the deity of the Udgītha.' [136]

¹This is: *asato mā sad gamaya...*; the Abhyārohaṇajapa.

देवाभ्युदय उद्गानं देवेभ्योऽर्थाय वागियम् ॥

यथाशक्त्युदगायत्तं यो भोगो वाङ्निबन्धनः ॥ १३७ ॥

[Here is the purpose of BU 1.3.2: *tatheti tebhyo...vadati tadātmane.*]

(Then) this Speech sang aloud, with whatever was her might, the Udgītha¹ for securing the rise of the gods,² (yes,) for (securing) the purpose of the gods—that (enjoyment) which was the enjoyment resting in Speech.³ [137]

¹The *udgāna* is for Udgītha, referring to the *sāmabhaktiviśeṣa*.

²This use of the locative is for expressing the purpose.

³That is to say: which would arise from the employment of Speech; this explains *yo vāci*...

येन भोगेन वाग्देवांश्चक्षुरादीनहन्तिशम् ॥

साक्षादवति तं भोगमुदगायदशेषतः ॥ १३८ ॥

With what enjoyment, Speech directly favours the deities Eye etc. day and night, that enjoyment it sang aloud in its fullness. [138]

पवमानेषु सोद्गात्री याजमानं यथाविधि ॥

फलमुदगाय शेषेषु ह्युदगायदथात्मने ॥ १३९ ॥

Speech, being the Udgātṛ (priest), and having sung the (Sāman-)song for (securing) the end of the sacrificer,¹ in the Pavamāna Stotras, according to the procedure, (towards securing) the reward,² sang in the remaining (chants) (for a reward) for itself.³ [139]

¹Namely, the gods.

²That is to say: having sung to the effect that the reward was secured.

³Among the twelve Stotras that are sung in the Agniṣṭoma, there are three Pavamāna Stotras which produce a reward for the sacrificer. The nine others are the Udgātṛ Stotras: The singing of these Stotras secures a reward for the Udgātṛ. Here Speech is the Udgātṛ, and therefore it brings a reward for itself.

स्तोत्रेषु परिशिष्टेषु वागागायदथात्मने ॥

यत्कल्याणं वदत्येषा ह्यात्मने तदचीकल्पत् ॥ १४० ॥

[The word *śeṣeṣu* in the preceding verse is explained here.]

Then Speech sang in the remaining Stotras (a reward) for itself, viz. whatever auspicious (*kalyāṇa*) it speaks (in these nine Stotras), it secures (the same) just¹ for itself. [140]

¹The purpose of the word 'just' (*hi*) is explained by SP thus: *uktakāryasya karaṇāntareṣu asambhavaprasiddhyartho hiśabdaḥ*.

यथाशास्त्रं यथायोगं वर्णदोषविवर्जितम् ॥

वर्णोच्चारणसामर्थ्यं ममैवास्तु तदीदृशम् ॥ १४१ ॥

It is thus: 'May I indeed have the capacity of pronouncing different letters, thus: It should be in accordance with the science (of rituals) and in accordance with (the science of language¹), i.e. in language free from faults in respect of letters.'

[141]

¹This refers to the science of etymology.

कल्याणवदनोत्थं यत्कृत्स्नं देवेभ्य एव तत् ॥

फलं वदनमात्रं तु वाच एव न दैविकम् ॥ १४२ ॥

Whatever reward arises from the utterance of (the) auspicious is all of it for the sake of gods, but (that which arises) only from the pronunciation is for Speech is not (intended) for the deity.

[142]

तमस्युत्सार्यमाणे तु वाचोद्गात्रा सुरद्विषाम् ॥

स्वाधिकाराच्चयाव्यमानास्ते विदुर्देवहृद्गतम् ॥ १४३ ॥

[*te viduḥ* (BU 1.3.2) is explained.]

And when the darkness (in the form) of the haters of the gods¹ was (thus) being dispelled by Speech, the Udgātr, they, being thrown away from their own position (of superiority)², understood what had passed (i.e. the thought) in the mind (lit. heart) of the gods.

[143]

¹*suradviṣām tamah* is explained fully in the next verse.

²The gods became strong by the purity of speech etc. (= *śāstravihitakarman*) and, therefore, the natural tendency of the sacrificer for securing worldly pleasure became weaker and weaker. This was the beginning of the defeat of the demons, who were described in verse 22 above as *jyāyāmsaḥ*.

अनेन वाचोद्गात्रा नो बलं ध्वान्तं तु देवताः ॥

ज्योतिषा स्वेन निजित्य यास्यन्त्यग्न्यादिरूपताम् ॥ १४४ ॥

(Thus did they understand:) 'These gods will have won by their own lustre¹ our strength², this darkness, through, (the

help of) this Speech, the Udgāṭṛ, and will attain the forms³ of the deities Agni and so on.' [144]

¹This symbolises their knowledge of the rituals etc. from Śāstric works.

²Or alternatively, 'army', by way of pun.

³That is to say: Their true nature as deities. Or, excellence; cf. *svaṁ vapuḥ* (mentioned in verse 146 below).

महन्नो भयमायातमिति बुबुधिरेऽसुराः ॥

कर्मण्यनुचिते तेषां प्रहीणमनसां तदा ॥

वदनादावभिष्वङ्ग आत्मसंभावनादभूत् ॥ १४५ ॥

The demons knew that a (matter of) great fear had come to them. Then they, of minds given to bad inclinations, came to have addiction to the improper deed, speaking etc.,¹ out of their pride for themselves. [145]

¹This means 'speaking bad words, and so on'. This is in opposition to *kalyāṇavadana* of Vāc mentioned in verse 140 above.

यत्कल्याणमिति चिद्राद्विदुः सुरचिकीर्षितम् ॥

अनेन वै न उद्गात्रा वाचात्येष्यन्ति स्वं वपुः ॥ १४६ ॥

(Indeed) they¹ understood from the loop-hole,² expressed in their³ words, 'whatever is auspicious...' (BU 1.3.2)⁴ what the gods wished to do. (Thus:) 'Indeed they⁵ will attain through Speech, the Udgāṭṛ, their own form, despite us⁶.' [146]

¹It means 'the demons'.

²The word *chidra* is 'short coming' (according to Roer) and it is 'some spot through which you understand'; cf. NKL: *chidrāt kalyāṇavadanāsaṅgarūpād ity arthaḥ*.

³That is, of the gods.

⁴*yat kalyāṇām...vadati tad ātmane*.

⁵That is, the gods.

⁶We construe thus: *eṣyanti svaṁ vapuḥ naḥ ati* where *ati* is a *karmapravacanīya* which governs the accusative form *naḥ*.

इति ज्ञात्वा ह्यभिद्रुत्य स्वैरासङ्गशरोर्मिभिः ॥

विविधुस्तानथोद्गातृं स्ते विद्धास्तत्यजुः क्रियाः ॥ १४७ ॥

[*tam abhidrutya...*(BU 1.3.2) is explained.]

Indeed, having known thus, they attacked (the gods) by means of the surging waves of their arrows (made up of) attachment (to worldly pleasures), first pierced them (the gods) and then the Udgātr̥s.¹ (Subsequently) they,² (thus) pierced, gave up their ritual activity. [147]

The intention of this verse is to emphasise the conflict between the natural tendencies of a human being and the knowledge acquired from Śruti—and not what really happened. Therefore, reference to the giving up of ritual activity of the Udgītha refers merely to the activity of the sense-organs. This means Prāṇa 'vital force' remains, in reality, unaffected, i.e. it alone can resist and overcome the natural tendencies.

¹They are the priests chanting the Udgītha.

²It refers to the gods.

नानादन्यस्य सामर्थ्यं विद्यतेऽसुरनाशने ॥ १४८ ॥

अनेनाप्रतिरूपेण वचसा कार्यशायिना ॥

पाप्मादिदोषसंपर्कः कारणस्थोऽनुमीयते ॥ १४९ ॥

(Indeed) none else than Prāṇa¹ has the capacity for destroying the demons. [148]

The association with faults, viz. sin etc., that abides in the cause,² is inferred by the matchless Prāṇa from this speech which is noticed as extending into (lit. lying in) the effect. [149]

This reference to the activities of the sense-organs is only indicative of the basic ignorance, sin etc. on the part of an individual who does non-scriptural activities.

¹ana=Prāṇa.

²This stands for the different sense-organs which performed various activities that are their *kārya*.

व्युत्थायाख्यायिकारूपाच्छ्रुतिः स्ववपुषाधुना ॥

आचष्टे कारणे वृत्तं कार्यगेणामुरात्मना ॥ १५० ॥

[sa yaḥ sa pāpmā...sa eva sa pāpmā (BU 1.3.2) is explained.]

Having risen above (i.e. given up) this form of the narrative, the Śruti itself¹ now informs about the behaviour in the cause, (viz. the sense-organs), (inferring it) from the effect which is the demoniac nature. [150]

¹That is, in the form its own statements.

दृष्टेनाप्रतिरूपेण कार्यगेणानुमीयते ॥

कारणे पाप्मवेधोऽभूद्यो वाचि प्राक्प्रजापतेः ॥ १५१ ॥

The affliction (lit. piercing) caused by sin which earlier (or formerly) occurred in the case of the cause, viz. the speech of Prajāpati, is inferred from what is seen as a singular (characteristic) in the effect.¹ [151]

¹This is to state the result of usual inference. In fact, the Brahman (or Prāṇa), which is the cause, is never affected by any fault. Cf. CU 8.12.1: *na vai saśarīrasya sataḥ priyāpriyayor apahatir asti; apāpaviddham....* (Īśopaniṣad 8); *na ha vai devān...* (BU 1.5.20) (SP).

स यो वाच्यसुरैः क्षिप्तः पाप्मा कार्ये स दृश्यते ॥

प्रमाविरोधि यद्वाक्यं तत्तत्कार्यसमाश्रयम् ॥ १५२ ॥

That sin which the demons had put into Speech is seen in the effect. Whatever statement is opposed to the right knowledge (about the true nature of the Ātman) is all related to the effect (viz. ignorance).¹ [152]

¹The second line of this verse explains: *sa yaḥ sa pāpmā....* (BU 1.3.2). This means, ill or false speaking is noticeable in the descendents of Prajāpati.

स एव स इति ह्युक्तिः कार्यकारणसंस्थयोः ॥

प्रजासु साक्षाद्यः पाप्मा यश्च तत्कारणाश्रयः ॥ १५३ ॥

[Verses 154-163 convey the purpose of BU 1.3.3-6.]

For the statement in the Śruti *sa eva saḥ* is related to the two states of the cause and the effect, namely that whatever sin is actually seen in offsprings and that which has a basis in its cause. [153]

घ्राणं चक्षुस्तथा श्रोत्रं मनश्चैवमनुक्रमात् ॥
वब्रुर्देवा यथा वाणीं विद्धाः सर्वे तथासुरैः ॥ १५४ ॥

All the gods (then) chose the sense of smell,¹ the sense of sight, the sense of hearing and *manas*, one after another, as they (first) chose Speech when they were pierced by the demons; (they chose these others) in the order (mentioned in the verse). [154]

¹The NKL edition reads *prāṇam* in the place of *ghrāṇam*! NKL also cites *prāṇam iti* as the *pratika* of the Mantra, but does not comment on the same!! Possibly this is a reference to the principal among five breaths.

कर्मेन्द्रियाणां सर्वेषां वागेवात्रोपलक्षणम् ॥
चक्षुःश्रोत्रे धीन्द्रियाणां मनो बुद्धेस्तथैव च ॥ १५५ ॥

In this,¹ only Speech is indicative of all the organs of activity. Eyes and ears (are indicative) of the sense-organs and likewise *manas* (is indicative) of the intellect.² [155]

¹Context of the narrative of the gods and the demons: the sin which affects divine nature of the deities superintending over the sense-organs.

²SP accepts from *buddhi* the implication of *citta* and *ahamkāra* also, but NKL does not. It is difficult to say if *citta* is meant by Śaṅkara.

कृत्स्नं जगदनादाय नैकस्यापीष्यते क्रिया ॥
प्राणस्य किमु वक्तव्यं कृत्स्नाध्यात्मेन्द्रियग्रहः ॥ १५६ ॥

They do not accept even in the case of a single (organ) any activity without having (lit. taking up or making use of) all of (this) world.¹ What then can be said about Prāṇa? There is (on the part of it) the use of the entire (group of) the organs abiding in the body. [156]

¹SP refers to *iyam pṛthivī sarveṣām bhūtātām madhu* in BU 2.5.1 and adds *iti śrutau sarvasya sarvatra kāraṇatāyā vakṣya-māṇatvāt*.

यद्यपीदं जगत्कृत्स्नं गृह्यते संहतत्वतः॥

तथापि चोदितोऽत्रार्थ उपास्यो नागतोऽर्थतः ॥ १५७ ॥

Even if this entire world is taken up (for use) owing to its being one collected (mass)¹, yet here (i.e. in this context) only that object which is put forth in the Śruti² is (alone) to be worshipped and not the one which is understood by implication.³ [157]

¹This has a basis in a possible doubt originating in the need of the entire world for any activity (as said in the preceding verse).

²This refers to *vāgādi* as the objects of worship.

³Both SP and NKL point to the rule of interpretation: *yaś cārthād artho na sa codayitavyaḥ*.

कल्याणतरूपेण परिशिष्टेष्वपीक्ष्यते ॥

विभाग आसुरो वेधस्तेन तेष्वनुमीयते ॥ १५८ ॥

In (the case of) the remaining (i.e. other, organs¹ also) is accepted (i.e. inferred) the demoniac part (or aspect)² obtaining in the form of what is other than auspicious; therefore, the piercing (by demoniac inclination) of them also is inferred. [158]

¹That is, *tvac* etc. which are not mentioned in the Śruti.

²This has a reference to *daiva* and *āśura* categories among all objects of creation as in the case of Prajāpati's offsprings.

अतस्तदर्थमाहेयमेवम्विति पुनः श्रुतिः ॥

यथा वागादयो विद्धास्तद्वज्जोयास्त्वगादयः ॥ १५९ ॥

Therefore, in order to convey that (happening), the Śruti once again stated (the words) *evam u ...* (BU 1.3.6). (That is to say:) as Speech and others were pierced, in the same way, the sense of touch and others (also) are to be understood (as pierced). [159]

सिद्धान्वागादिदृष्टान्तान्पुरस्कृत्यात उच्यते ॥

एवम्वित्युक्तशेषाणां पाप्मविद्वत्त्वसिद्धये ॥ १६० ॥

Therefore, having brought forth the well-proven examples of Speech and others, the Śruti states *evam u ...* (the piercing by sin) (in the case) of the remaining (organs also), in order that their being affected by that sin is proved. [160]

अविध्यन्निति योऽर्थोऽस्य तद्व्याख्यानाय यत्यते ॥

स्वैः स्वैस्तानिन्द्रियासङ्गैः पाप्मभिस्त उपासृजन् ॥ १६१ ॥

And now we make an effort to explain that, which is expressed by the verb *avidhyan*. (This is to say:) they (viz. the demons) attacked them (viz. the gods)¹ by their own attachments to the organs, their sins. [161]

¹This refers to the gods which superintend over the sense of touch etc. Mark the masculine form *tān*.

यत्संसर्गं पुरा चक्रुरविध्यंस्तदिहोच्यते ॥

या विद्धा देवतास्तासां प्रक्रियासंहतिः पृथक् ॥ १६२ ॥

Since they first became attached to (the pleasures of the sense-organs), (therefore) it is stated here: *avidhyan* 'They pierced'; whichever of the deities were pierced had each a different (statement about) the happening and its end.¹ [162]

¹Namely, being attached to pleasures in the case of them, first being pierced and later getting freed. This is stated with a view to pointing out the purposefulness of the Śruti statement, *evam u khalu devatāḥ...*

आसङ्गपाप्मभिविद्धा यस्माद्वागादयोऽसुरैः ॥

वर्जनीयास्ततस्ताः स्युर्नोपास्याः श्रेय ईप्सुभिः ॥ १६३ ॥

Since Speech and others were pierced by the demons by means of the sins in the form of attachment, therefore, they are to be avoided; they are not to be worshipped by those who wish for bliss.¹ [163]

¹It would look better if *śreyā ipsubhiḥ* is read as a compound word. AnSS edition and NKL edition however read two words; *śreyāḥ* and *ipsubhiḥ*—such (rare) use of this latter word as an unbound form is noticed in *Mahābhārata* 12.84.44: *tasmāt sarvair*

*guṇair etair upapannāḥ supūjitāḥ/mantriṇaḥ prakṛtijñāḥ syus trya-
varā mahad īpsavaḥ//; Nilamata Purāṇa 493.760 (which belongs
to a period between 500—1000 A.D.): umāsampūjanam kāryam
tasyām saubhāgyam īpsunā.*

Verses 164-93 explain BU 1.3.7.

एवं निराशाः पूर्वासु देवतास्वसुरार्दनात् ॥
पारिशेष्यादथाजग्मुर्मध्यमं प्राणमादरात् ॥ १६४ ॥

[*atha heman* is explained.]

Thus, feeling despair in respect of the previously mention-
ed (superintending) deities (of organs), on account of the
afflictions inflicted by the demons, (the gods) then respect-
fully approached the individual self (= *madhyama prāṇa*)¹,
as the remaining (i.e. last possible, resort). [164]

¹Between the heavenly wind and the earthly wind, there is the
middle one (viz. *madhyama*), called *Prāṇa*.

अथेत्यनन्तरोक्तिः स्यात्तथाभिनयवृत्तये ॥
इममित्यप्रसिद्धत्वात्प्राणस्येह त्वगादिवत् ॥ १६५ ॥

The word *atha* is expressive of the sense 'then'; so also
does the word *imam* (serve) the purpose of conveying the
(symbolic) activity¹ (of them), because the *Prāṇa* is not
(primarily or easily) known (in daily life) like the sense of
touch and others.² [165]

¹*abhinaya* is explained in SP as *vivakṣitārthadyotako dehatada-
vayavavyāpāraviśeṣaḥ* and in NKL as *saṁketavaśāt vivakṣitārtha-
prakāśakaḥ kāyāvayavavyāpāraḥ*.

²SP explains *iha* as *dehe*. Our translation 'in daily life' has the
force of 'in the life of the embodied state'. The idea is: *Prāṇa* is
not known to have one particular organ as its abode. Also, it is
not necessarily known to be abiding in their ensemble.

अस्ति यस्मादसुनित्यमासन्योऽयमतो मतः ॥
वागादिभ्यो विभागार्थं विशेषणमसोरिदम् ॥ १६६ ॥

Since Prāṇa is ever abiding (in the mouth), therefore it is known as this (viz. having the name) Āsanya and this (*āsanya*) is an adjective of the Prāṇa for making it from Speech and others. [166]

Prāṇa is the life principle and moves in the whole body.

जपमन्त्राभिधेयोऽत्र पारिशेष्यात्प्रतीयताम् ॥
उद्गीथदेवता प्राण इत्यभूत्सुरनिश्चयः ॥ १६७ ॥
मन्त्रप्रयोगे सर्वेषां संनिधौ तत्प्रकाशितम् ॥

Finally, let it be known as the remaining possible conclusion that the decision of the gods was thus: 'Here,¹ Prāṇa is the deity of the Udgītha and (it is) addressed in the Japamantra.² [167]

That³ is revealed in the employment of the Mantra⁴ in the presence of all.⁵ [168^{ab}]

¹This is a reference to 'the ensemble of organs of sense and also other organs in the body and their activities.'

²See note 1 on verse 136 above; *abhidheyaḥ* 'one (to be) addressed'.

³This means 'the fact about Prāṇa as the deity of the Udgītha'.

⁴Namely, in the Japamantra *asato mā sad gamaya...*

⁵It appears to us probable that Sureśvara made verse 167 a verse of three lines—the third line is read in the printed editions as the first line of verse 168. For such a construction, cf. verse 145 above. This last line of the verse 167 then justifies the first word of the verse.

भारमुत्सहते वोढुं योजनो यामस्तमाश्रयम् ॥ १६८ ॥

We shall approach him, that Prāṇa, who can bear the burden (of protecting us)¹, (as) our resort. [168^{cd}]

¹It is possible to read the second line of verse 168 as one full verse. For such a verse of one line, cf. verses 134 and 148 above.

परीक्षमाणास्ते त्राणं यथोक्ताख्यानवर्त्मना ॥
क्रमेणासेदुरासन्यं प्राणं पाप्मपराभवात् ॥ १६९ ॥

Looking around¹ for protection (against defeat²) in their course (of search), as described in the course of the narrative, they found (lit. arrived at) Prāṇa that resides in the mouth, after overcoming the sin. [169]

¹It is necessary to read the literal meaning of *pari-īkṣamāṇāḥ*.

²That is the defeat by the demoniac tendency, viz. sin etc.

श्रेयोर्थिनां मनुष्याणामुपास्यप्रतिपत्तये ॥

इयमाख्यायिका चक्षुर्नान्यथोपास्यनिश्चितिः ॥ १७० ॥

This narrative is an eye for men who wish for bliss, (that is to say:) in order that they understand (the real) object of the worship; the object of worship cannot (indeed) be decided otherwise.¹ [170]

¹That is, to be other than Prāṇa.

यः प्राणे भोग इति न पूर्ववद्भूष्यतेऽत्र किम् ॥

वागादीनामिव यतो नासोर्भोगो विशिष्यते ॥ १७१ ॥

(A question is asked:) 'Why is it not stated in the Śruti here *yaḥ prāṇe bhogaḥ*....as (it did) before?'.¹ (Our answer is:) 'Because the enjoyment of Prāṇa cannot be distinguished (from any other) as (that) of Speech and others (from any other enjoyment)'. [171]

¹The argument proceeds from the notion of *prakaraṇabhaṅga*. This is to say: The Śruti does not state here *yaḥ prāṇe bhogaḥ tam devebhya āgāyat*....This is thus not in continuation of the tenor of the whole argument.

अकृत्स्नभोगतो युक्तं वागादिषु विशेषणम् ॥

सर्वस्यैवासुभोगत्वात्किं कुतोऽत्र विशिष्यते ॥ १७२ ॥

‘(Such) distinguishing of enjoyment in the case of Speech and others is proper, since theirs is not full enjoyment.’. (To this the answer is:) Since all (enjoyment) is (but) the enjoyment by the Prāṇa, from what¹ (enjoyment) then can that be distinguished here?². [172]

This contains the answer which began in the second line of the preceding verse.

¹The word *kutaḥ* can be alternatively translated as 'for what reason?'.
²SP supports this (last line) by verse 165 above: *aprasiddhatvāt ...tvagādivat*.

अभिसंधिरविव्यत्सन्नित्यभूत्सुरविद्विषाम् ॥
 अनिष्ठितक्रियारम्भोऽविव्यत्सन्निति भण्यते ॥ १७३ ॥

There arose in the mind of the haters of the gods a thought (lit. an intention) which was (finally) not going to pierce (them¹). The word *avivyatsan* is used (to bring out the sense of) the beginning (or undertaking) of an activity which is not finally accomplished. [173]

¹Namely, a thought which did not materialize; this is explained in the second half of the verse. The word 'them' refers to the gods.

विव्यत्सोद्देशमात्रेण प्राणो हन्ता सुरद्विषाम् ॥
 इत्यर्थप्रतिपत्त्यर्थमीदृग्दृष्टान्त उच्यते ॥ १७४ ॥

On account of (the) mere desire to pierce (the gods),¹ Prāṇa is the destroyer of the haters of the gods. (Now), in order to convey this is given an illustration which is as follows: [174]

This explains the meaning of *saḥ* in *sa yathā*....(BU 1.3.7).

¹The words 'which was entertained by the demons' are to be supplied.

बिभित्सायै यथा वेगाल्लोष्टः क्षिप्तोऽश्मनोऽन्तिकात् ॥
 नश्येत्स्ववेगाच्छतधा ह्याख्यानाश्मसमागमात् ॥ १७५ ॥
 अप्रधृष्यं तथा प्राणमृत्वा नेशुः सहस्रधा ॥
 दैत्यास्तन्नाशतो देवा देवा एवाभवन्सदा ॥ १७६ ॥

[*yathāśmānam ṛtvā*...(BU 1.3.7) is explained.]

As a sod of clay is forcefully thrown with the desire of breaking¹ (a stone²), even from nearness to it, would (itself) get destroyed, by its own force, into a hundred (pieces), at the very contact with the unbreakable³ stone. [175]

In the same way, (the demons) having attacked the invulnerable Prāṇa got destroyed into thousands (of pieces), then, on account of their destruction the gods could ever remain gods. [176]

¹NKL reads *bibhitsayā* instead of *bibhitsāyai*.

²An unbreakable stone is meant.

³Read NKL: *na khanitum śakyate ṭaṅkādibhir iti akhaṇa eva ākhaṇaḥ*.

अत एव मनुष्यत्वहेतवोऽप्यसुराः समम् ॥

विनेशुर्विष्वगतयो लोष्टः क्षिप्तो यथाश्मनि ॥ १७७ ॥

For this very reason, the demons who are the cause of manhood,¹ fleeing into all directions, got at once destroyed, in the same way as a sod of clay (when) thrown on a stone. [177]

¹This refers to any gross or subtle form of a human sacrificer, viz. any manifest form of Prajāpati.

प्राणस्वभावसंपत्तेः प्राणवद्देवता अपि ॥

देवा एवाभवन्दैत्यकृत्स्नपाप्मविनाशतः ॥ १७८ ॥

[*tato devāḥ abhavan* (BU 1.3.7) is explained.]

On attaining the nature of Prāṇa,¹ the deities also, like Prāṇa,² became gods³ on account of the destruction of all the sins (inflicted on them) by the demons, [178]

¹Read NKL: *asmād upāsanāt prāṇabhāvāt*.

²That is to say: as it retained its nature of a deity (by remaining unaffected by the demoniac sins).

³Read NKL: *cakṣurādayaḥ evaṁ cādityādibhāvaṁ gatā ity arthaḥ*.

वागादीन्द्रियसंघातो यजमानो यथा पुरा ॥
प्राणात्मभावाद्धत्वागो वैराजं रूपमाप्तवान् ॥ १७६ ॥

[*bhavaty ātmanā* (BU 1.3.7) is explained.]

as formerly the sacrificer, who was a conglomeration of the organs, speech and others, obtained the form of (=became) Virāj after having struck down sin¹ by becoming possessed of the nature of the Prāṇa. [179]

This verse is a continuation of the sentence in the preceding verse.

¹*āgaḥ* = *pāpam* (as paraphrased in the next verse).

तथा यस्तमुपासीत यथोक्ताख्यानवर्त्मना ॥
विराजैवात्मना हत्वा पापं भवति सोऽचिरात् ॥ १८० ॥

[*tathā purā kalpena varṇitaḥ*....(BUB p. 63) is explained.]

In the same way, whosoever worships that (Prāṇa) in the manner stated in the narrative that is told soon becomes (identical with Prāṇa) after having struck down sin by having the nature (i.e. strength) of Virāj.¹ [180]

¹Read SP: *virāḍātmanopāsako bhavati*.

जीवाविष्ट उपास्योऽत्र देवताविग्रहः सदा ॥
प्राणो हिरण्यगर्भत्मा यावत्तदभिमान (?) नितः ॥ १८१ ॥

In this context, what is to be worshipped is ever the body of a deity which is pervaded by Sentience, i.e. Prāṇa of the nature of Hiraṇyagarbha, so long as there remains (or exists) consciousness on its part of being that.¹ [181]

¹We follow translations and the reading *abhimānitā* which the NKL edition has adopted and shown by the AnSS edition as a variant because that makes a better sense.

भावनोपचयाद्धत्वा परिच्छेदं स्वमासुरम् ॥
देवतात्मानमेत्याशु सदा तद्भावभावितः ॥ १८२ ॥

Having (first) destroyed his own demoniac limitation by increase in devotion,¹ (that sacrificer) soon² attains the nature of the deity, ever full of thought of becoming that.³ [182]

¹*bhāvanā* = *bhakti* '(awareness) of being that'. SP invites attention to *Bhagavadgītā* 8.6: *yaṁ yaṁ vāpi smaran... tam tam evaiti kaunteya*. The Upaniṣad has this sense of *bhakti*: One becomes what one thinks about at the time of death; therefore, one thinks of becoming a deity at the time of death and becomes that.

²That is, within very short time.

³Or alternatively, 'ever devoted'.

तत्तमोमात्रविध्वंसान्तु प्राणादिराप्यते ॥

कार्यत्वात्कारणं मुक्त्वा न हि तत्कार्यसंभवः ॥ १८३ ॥

देवो भूत्वेह देवोऽसौ भावनोपचयाद्भवेत् ॥

पुंव्यापारोद्भवत्वं नः श्रुत्यापि प्रतिपादितम् ॥ १८४ ॥

(The state of) *Prāṇa* etc.¹ is not obtained by mere destruction of ignorance about (the nature of) it, because that (viz. being *Prāṇa* etc.) is itself an effect. Indeed, leaving aside the cause, there does not follow (what is) an effect (of it).² [183]

The worshipper becomes a god (i.e. the deity) in this (mundane existence) and becomes the god (i.e. that deity) owing to the increase in devotion; (this so happens) thanks to human activity—so it is told us even by the Śruti.³ [184]

SP reiterates the importance of the statement of the *Bhagavadgītā* noted under verse 182 above.

¹This is the purport of 'Prāṇa etc.' which is the literal meaning.

²This verse anticipates an objection: As the knowledge of the Brahman is attained by mere destruction of the ignorance about it, so does one obtain the knowledge of (the deities) *Prāṇa* (and others) by mere removal of the ignorance about them and consequently there is no need of any worship (*upāsana*) of the same. The answer is: Attaining the nature of *Prāṇa* etc. is itself an effect (*kārya*) and therefore it needs some means, i.e. cause (*kāraṇa*); this *kāraṇa* is, it is implied, worship (*upāsana*).

³SP cites the purport of the Śruti passage: *ihaiva dehe bhāvanā-prakarṣād devabhāvam anubhūya dehapātād ūrdhvam upāsyō devaḥ*

syāt. Becoming Prāṇa etc. is thus pointed out as what is attainable by human effort or activity (*puruṣatantra*)—this implies the short-time-lasting nature of the result which is unlike the attainment of the nature of the Brahman which is irrespective of human effort or activity (*vastutantra*). This is expressed in the following verse.

ब्रह्मैवाप्येति ब्रह्मैव प्रागप्यासीद्यतोऽद्वयम् ॥

तन्मोहमात्रविध्वंसादित्यपि श्रुतिशासनम् ॥ १८५ ॥

And also there is instruction (i.e. declaration) in the Śruti: 'By mere destruction of ignorance about it, he merges into the Brahman itself, since he was, even before, only the unique Brahman'.¹ [185]

¹*Nṛsiṃhottaratāpanī* U. 5.

स्वतःसिद्धौ तदन्येषां श्रुतिकोपः प्रसज्यते ॥

अतोऽन्यदार्तं तद्वच्चाप्येकमेवेति च श्रुतिः ॥ १८६ ॥

If (it is held that) those others (viz. the deities who are other than that Brahman) are self-established, there would arise the contingency of the opposition to (lit. anger of) the Śruti. (Indeed, there is a statement in) the Śruti: 'Everything else than this is affliction'; so also '(it is) but one'.¹ [186]

¹NKL cites the following Śruti passages: *ato 'nyadārtam* (BU 5.4.2): *neha nānāsti kiṃcana* (BU 6.4.19); *sarvaṃ khalv idam brahma* (CU 3.10.1). Cf. SP: *eko devaḥ sarvabhūteṣu gūḍhaḥ* (Śvetaśvararopaniṣad 6.11) and *eka [eva tu bhūtātmā* (Brahma-bindu U.12)

नाव्याकृतादेः संसिद्धौ परमात्मातिरेकतः ॥

ब्रह्मवन्मानमस्तीह तथा निर्मोक्षतापतेत् ॥ १८७ ॥

There is no proof here¹ for establishing (the existence of) the unmanifest (Prāṇa) etc. apart from the highest Reality as there is one² in respect of the Brahman. (If that were) so,³ there would result absence of liberation. [187]

¹That is, in *pramāṇaprameya* relation which is accepted in the discussion.

²This refers to *anubhava*, cf. BSB (*adhyāsabhāṣya*):....*sarvo hy ātmāstīti pratyeti* (pp.79-81)

³That is, if the unmanifest were self-established.

अथात्माविद्याव्यक्तादिरूपेण प्रथते तदा ॥

तन्निवृत्तौ निवृत्तिः स्यान्निवृत्तिः केवलात्मता ॥ १८८ ॥

If (it were argued that) ignorance about (the true nature of) the Ātman reveals itself in the form of the unmanifest etc., then, in case ignorance ceases to be, there would be the ceasing to be (of even the unmanifest); but cessation (of ignorance) consists indeed in the Ātman's being alone. [188]

In the preceding verse, the argument was based on the assumed reality of Prāṇa etc. Now, in this verse, the argument proceeds from the assumption that the ignorance about Prāṇa etc. consists in the ignorance about the Brahman—this latter ignorance being removed, the former ignorance also would be removed only naturally. The removal of the latter ignorance is but the absence of duality.

प्राणस्येव पराभूतो द्विषन्प्राप्तासुरोऽखिलः ॥

उपासीनस्य तं प्राणं कृत्वो नश्येत्तथासुरः ॥

द्विषंश्चाप्यद्विषञ्छत्रासुरादन्य इष्यते ॥ १८९ ॥

[*parāsyā dviṣan bhrātrvyo bhavati* is explained.]

The entire demoniac sin, hating Prāṇa as it were, was defeated. In the same way, the entire demoniac (sin), (hating) him who is worshipping that Prāṇa, would perish (i.e. get destroyed). (A person) who is (actually) hating and even he who is not, is considered as an enemy, (but he is) other than the demoniac sin. [189]

नित्यविघ्नकृदेवैष प्राणाप्तावासुरो मतः ॥

अतो विशेष्यते श्रुत्या द्विषन्भ्रातृव्यरूपया ॥ १९० ॥

In respect of attaining (i.e. becoming one with) Prāṇa, this demoniac (sin) is known to be a cause of obstacles forever. Therefore, the word '(who is) the hating' is specified (by the Śruti) in the form of the word 'rival'. [190]

This explains how the word *dviṣan* in the phrase *dviṣan bhrātrvyah* is significant.

उक्तासुरपराभूतौ नान्योऽरिरवशिष्यते ॥

य एवं वेदेति विधिः फलोक्तेरर्थवादतः ॥ १९१ ॥

When there occurs the defeat of the demoniac (sin) as mentioned (in the narrative), there does not remain any other enemy. Then the words: *ya evaṃ veda* are an injunction,¹ since there is the statement of the result, (i.e. there is) an Arthavāda.² [191]

¹Regarding the worship of Prāṇa, or rather the Sūtrātman.

²The argument is: There cannot be any Arthavāda unless it is connected with some injunction already laid down. The statement of a reward becomes meaningful, only if a performance has been already prescribed by some injunction.

आनुषङ्गिफलोक्त्या वा तदुपासा विमुक्तये ॥

आत्मविद्याधिकारेऽस्मिस्तदुपासाविधानतः ॥ १९२ ॥

Or by the statement of the incidental reward is prescribed the worship of that (viz. the Ātman) so that liberation is achieved; for, in this discussion on the topic of the knowledge (of the Ātman), there is prescription of the worship of that (viz. Sūtrātman). [192]

आत्मविद्योपकारित्वं तस्माद्वाक्याच्च गम्यते ॥ १९३ ॥

And from that statement (in the Śruti)¹ is understood the usefulness (of that) for the lore of the Ātman.² [193]

¹SP quotes BU 6.2.1: *uktopeniṣatkah ito vimucyamānāñḥ kva gamiṣyasi* which refers to *kramamukti*, i.e. first there occurs the *sūtrātmatvaprapṛti* and later *mokṣaprapṛti*.

²The significance of the Śruti is clarified in the next verse.

Verses 194-197 state the purpose of BU 1.3.8-1.3.16.

अथायास्याङ्गिरोद्भिर्विशिष्टमसुकर्मकम् ॥

उपासनं विधास्यामीत्यारब्धेषोत्तरा श्रुतिः ॥ १९४ ॥

This subsequent section of the Śruti has begun with the intention: 'Now let me prescribe the worship which has the

Ātman as its object that is specified by (the names) Ayāsyā, Āṅgiras and Dūr.'. [194]

अनुवादाद्विधिर्जयाननुवादे वृथा श्रमः ॥
पुरुषार्थाभिसंबन्धादतो विधिरिहाश्रितः ॥ १९५ ॥

(One might say:) 'An injunction is more important than its Anuvāda (re-statement); therefore, there is a futile effort in stating an Anuvāda.' (Our answer is:) 'Here (i.e. in the Anuvāda) is taken an injunction as its basis, because of its close connection with the purpose of human activity.' [195]

श्रूयते फलसंबन्धो यासूपासासु तास्विह ॥
दध्नेन्द्रियादिवज्ज्ञेयो विधिर्गुणसमाश्रयः ॥ १९६ ॥
प्रधानफलसंबन्धो यत्र तु स्याच्च्छुतेर्मुखात् ॥
विशिष्टः स विधिर्ज्ञेयो यथाग्नेयादयस्तथा ॥ १९७ ॥

[Verses 196 and 197 clarify the characteristics respectively of a Guṇavidhi and (Guṇa-) Viśiṣṭavidhi.]

In those various worships, in which is heard (in the Śruti) the connection of a reward (with the knowledge about the nature of the Ātman), an injunction related to some subordinate aspect of it is to be understood in the same way as (in the subordinate injunction) 'by curds, (one desirous of) organs etc.' [196]

Where, however, the connection of a reward with the principal reward is heard directly from the statement in the Śruti, that (injunction) has to be understood as a Viśiṣṭavidhi, like (the injunctions) pertaining to Āgneya (*aṣṭākāpāla*) etc. [197]

This example from the ritual-procedure is introduced for explaining how Ayāsyā Upāsanā is to be considered as a means towards the Ātman Upāsanā. Curds are a means towards the principal rite, viz. that prescribed in *juhuyāt svargakāmaḥ*. The sentence *dadhnā indriya*...refers to the pouring of curds into fire by the use of the instrumental form *dadhnā* in *dadhnā juhoti* and it is somehow related to the principal rite by (1) prescribing the *yāga* and (2) prescribing the material for the *yāga* in addition.

SP refers to the discussion of *pradhānānuvādena guṇavidhiḥ* in the SV. NKL states the similarity between *bhartā śreṣṭhaḥ purogantā* (which is relevant here) and *dandhnā...juhuyāt*.

Verses 198-208 explain BU 1.3.8.

अवाप्तान्यादिरूपास्ते प्राणालिङ्गनसंश्रयात् ॥

कृतोपकारं स्मृत्वोचुः प्राणा वागादयस्तदा ॥ १९८ ॥

Those *prāṇas*,¹ viz. speech and others, which obtained the nature of Fire etc. by resorting to Prāṇa, remembered the good turn done to them (by it) and said (to themselves). [198]

¹The word *prāṇa* refers to the Sūtrātman in its various manifest forms (viz. the various organs), not to the principal Prāṇa; cf. BSB 1.1.23.

अनन्ताग्न्यादिभावेन यो नः सञ्जितवानसुः ॥

क्व न्वसौ वर्तते ह्यात्मा योऽस्मच्छद्ब्रविनाशकृत् ॥ १९९ ॥

“Where indeed is that Prāṇa who won (i.e. united) us together by granting perennial nature of Fire etc., (the Sūtrātman), the Ātman, which has destroyed our enemies?” [199]

वितर्कयन्तस्ते प्राणा उक्तवैवं प्रत्यगात्मसु ॥

कुर्वाणमुपकारं तं द्दृशुः प्राणिवादरात् ॥ २०० ॥

Thus wondering (about Prāṇa), those *prāṇas* (=sense-organs) said this to themselves and then, as before, respectfully looked upon him, who had done good turn to them, in (i.e. connected with) all the inner selves (i.e. individuals). [200]

लोकेऽपि हि विचार्यार्थमथ संविदते जनाः ॥

यथा वागादयस्तद्वद्विज्जुः प्राणमात्मनि ॥ २०१ ॥

As in worldly life also,¹ people indeed first think about things and then come to realize (their nature etc.), so also did Speech and others come to know the Prāṇa² within themselves.³ [201]

Here is stated the basic principle which guides people's behaviour.

¹The word 'also' implies the ritualistic activities.

²This is *mukhya prāṇa*, the Ātman.

³The word *ātmani* refers to the body; cf. SP: *kāryaka*(v.1. *kā*)-*raṇasaṁghātaḥ*.

सामान्योक्तावास्य इति तद्विशेषणमुच्यते ॥

अन्तरित्यन्यथा मा भूत्प्रसङ्गः प्राणनिश्चितौ ॥ २०२ ॥

After stating (merely) *āsye*, in order to convey the general sense, there is used in the Śruti a modifier *antaḥ*¹ with a view to that, in respect of ascertaining (the exact) *Prāṇa*,² there might not arise any contingency (viz. difficulty). [202]

¹After the word *āsye* wherein the locative case-suffix was otherwise sufficient to convey the sense of the location.

²The word *āsye* alone would refer ever only to the sense of touch that occupied the place in the mouth. This is *clearly stated* in the next verse.

त्वगादयोऽपि सन्त्यास्ये यतोऽतस्तद्विशेषणम् ॥

विशिनष्टि ततः प्राणमास्यान्तर्बिलचारिणम् ॥ २०३ ॥

Since the sense of touch etc. also are (seen to abide) in the interior of the mouth, therefore, there is the modifier of that (*Prāṇa*)¹, that specifies the *Prāṇa* which moves in the hollow within the mouth. [203]

¹Namely, *antaḥ* after *āsye* as referred to in the preceding verse.

आस्यपर्यन्तशायीनि त्वगादीनि न मध्यतः ॥

प्राणस्तु मध्य आस्यस्य तस्मादन्तर्विशेषणम् ॥ २०४ ॥

The sense of touch etc. (are seen to) abide only up to the (farthest visible) end within the mouth, but (they are) not (seen occupying) the interior (hollow) of it; contrary to this, *Prāṇa*¹ (abides) in the interior (hollow) of the mouth (also). Therefore, there is here the use of modifier *antaḥ*. [204]

¹This is *mukhya prāṇa*.

सर्वेन्द्रियाणामथवा प्राण आत्मेति कथ्यते ॥

अयमास्येऽन्तरित्येवमरनाभिनिदर्शनात् ॥ २०५ ॥

Or 'the nature¹ of all organs is (finally that of) Prāṇa'; this is said (in the words) 'this one in the interior (hollow) of the mouth'. This (is stated on the basis of) the example of the spokes of a wheel (fixed in the hub²). [205]

¹This is an alternative explanation of *antaḥ*; cf. NKL: *antaḥśabdena vāgādīnaṃ svarūpam prāṇa ucyate*.

²Cf. BU 2.5.15. The intended comparison is: As the spokes lie within (i.e. inside) the rim of a wheel, being firmly fixed in the hub, so do the organs, being firmly fixed (i.e. dependent) on the Ātman, lie within the circle of worldly existence.

अयमास्येऽन्तरित्येवं प्राणं दृष्ट्वा यतः पुरा ॥

व्याजह्, रुमरास्तस्मात्प्राण आयास्यसंज्ञितः ॥ २०६ ॥

[The meaningfulness of the name Āyāśya for Prāṇa is explained.]

Since, (on that occasion) in the past, the gods thus saw Prāṇa to be abiding in the interior of the mouth and affirmed it, therefore Prāṇa is named Āyāśya.¹ [206]

¹Sureśvara cites the name as Āyāśya, this can be explained thus: *ayāśya eva āyāśyah*.

अङ्गानां करणानां च रसः सारो यतस्ततः ॥

प्राण आङ्गिरसः प्रोक्तस्तद्विद्विस्तन्दगुणाश्रयात् ॥ २०७ ॥

Since it is the essence, i.e. strength, of the limbs, i.e. organs; therefore Prāṇa is called Āṅgirāsa by them who have known that, (and as such) basing (the name) on that property (of that). [207]

कथमाङ्गिरसः प्राण इत्यस्य प्रतिपत्तये ॥

अन्वयव्यतिरेकाभ्यामुपरिष्ठात्प्रवक्ष्यते ॥ २०८ ॥

In order that it may be known as to why Prāṇa is called

Āṅgīrasa, there will be stated (an argument) later by the method of Anvaya and Vyatireka. [208]

तथान्योऽपि गुणोऽनस्य दूरिति प्रतिपाद्यते ॥
उदारफलसिचचर्थे सा वा एषेत्यतः श्रुतिः ॥२०६॥

[Verses 209-218 explain BU 1.3.9 which states that Prāṇa is away from having any property.]

In the same way, another quality of Prāṇa also is conveyed in (the name) Dūr. (And the statement) in the Śruti *sā vā eṣa* (proceeds) to establish the excellent reward (accruing from Prāṇa). [209]

उपास्तिक्रमसिद्धचर्थं क्रमभङ्गोऽयमिष्यते ॥
यतोऽतोऽङ्गिरसं त्यक्त्वा दूरित्येवाभिधीयते ॥ २१० ॥

Since this deviation from the order¹ (in the names of Prāṇa stated in the Śruti) is accepted with a view to establishing the process in worship,² therefore (the name) Dūr is expressed (i.e. explained) earlier, having set aside (the name) Āṅgīrasa. [210]

¹This refers to the *Pāṭhakrama* in the *Brāhmaṇa* (i.e. the Upaniṣad).

²It literally means 'order in the various acts which comprise worship'.

विशिष्टोपास्तिरेवेयं प्रधानफलकीर्तनात् ॥
नायं गुणविधिर्ज्ञेयस्तत्फलस्याश्रुतत्वतः ॥ २११ ॥

This (worship of Dūr) is but the worship of what is qualified, since there is the mention of the principal reward (as accruing from it). (Indeed) this should not be taken as a Guṇavidhi, for there is no mention (lit. hearing) in it of its reward.¹ [211]

¹That is to say: the reward for the worship alone is going to accrue to the worshipper; there being no separate reward for the worship of Dūr, which is but the same as Prāṇa, merely qualified by the name. This is explained in the next verse.

क्रियायां गुणभूतोऽर्थो देवतेत्युपदिश्यते ॥

अस्त्युपासिक्रियायोगो देवतातोऽन उच्यते ॥ २१२ ॥

A live being (lit. thing) which has been subordinate¹ in any activity is called the deity and since here (in respect of the act of worship to Dūr) there is such a connection with the act of worship, therefore, it is Prāṇa that is mentioned as the deity. [212]

Rites comprise *dravya* 'material', *devatā* 'deity (to whom material is offered)' and *ḥarman* '(towards which) the act (is directed)'. These three and the pleasure of the gods are regarded as subordinate; i.e. they contribute to make the rite full.

¹That is, of secondary importance. Read SP: *yāgādau kartra-tirekeṇa cetano guṇo'gnyādir devatā*.

दूरमेवंविदः पाप्मा कथमध्यवसीयते ॥

एवंवित्त्वविरोधित्वाद्दूरं पाप्मा भवेदतः ॥ २१३ ॥

(A question may be asked:) 'How is it decided that the sin of the knower of this (is sent) afar?'. (The answer is:) 'Since the sin goes away on account of its being opposed to the state of one's being the knower of such (a name of Prāṇa).' [213]

विषयेन्द्रियसंबन्धजो हि पाप्मासुरो यतः ॥

श्रौतानन्तादहंमानात्परिच्छिन्नो विरुध्यते ॥ २१४ ॥

Since the demoniac sin is what results from the contact of organs and their objects, (therefore, that sin), limited as it is, is distinguished from (lit. opposed to) the infinite Ego (which is) heard in the Śruti.¹ [214]

¹This refers to the (so-called) Ego (*aham brahmāsmi*) which arises from the knowledge of the Śāstra.

चक्षुरादिपरिच्छेदः प्राकृतज्ञानहेतुतः ॥

युक्तोऽध्यात्मैकरूपस्य बाधः शास्त्राभिमानतः ॥ २१५ ॥

Being limited by the eye etc.¹ is on account of the

ignorance which is natural to human beings. Therefore, it is only proper that there is the removal of it which has the form only of some bodily organs by coming to have the awareness (of the true nature of the inner self) by (knowing i.e. with the help of) the Śāstra. [215]

¹This refers to *cakṣurādyabhimāna* on the part of the deities other than Prāṇa.

परिस्पन्दात्मिका वृत्तिः श्रोत्रादिष्वपि विद्यते ॥
 प्राणस्याथेन्द्रियाणां तु शब्दाद्यर्थावलेहिनी ॥ २१६ ॥
 शब्दादिग्राहिणी वृत्तिः स्वैरासङ्गात्मपाप्मभिः ॥
 दूषिता न परिस्पन्दो दूरं मृत्युरसोस्ततः ॥ २१७ ॥

The function of Prāṇa which is of the nature of throbbing is noticed to exist in the case of the ear etc. also.¹ But the function of the organs relates to (lit. touches, i.e. is connected with, various) objects, viz. words and others.² [216] (Yet,) the function, viz. getting connected with the objects, viz. words etc., is affected by the sin in the form of wanton attachment (to these objects); not so the throbbing of Prāṇa. Therefore, death is far (from that).³ [217]

¹This explains how Prāṇa would be noticed as connected with sin.

²This is an expression of doubt against the said connection. The argument is: Ear etc. are connected only with their own objects—not with sins!

³Verse 217 answers away the doubt. The reason for the said connection is attachment to the objects. The throbbing Prāṇa does not get attached to any of the objects and is therefore away from death.

मृत्युर्दूरं यथा प्राणात्तदात्मत्वात्तथासुरः ॥
 तद्विदश्च भवेन्मृत्युर्दूरमित्युपदिश्यते ॥ २१८ ॥

As death is far from Prāṇa, so also is the demoniac (sin far from it¹) since it is the nature of that (viz. death). And it is declared here that death would be far from him who is the knower of that (viz. Prāṇa).² [218]

¹Namely, Prāṇa.

²This indicates the purity, freedom from the fear of death etc. of the worshipper of Prāṇa, even as Prāṇa is away from death etc.

Verses 219-227 explain BU 1.3.10.

दिशामन्त इह ग्राह्यो मध्यदेशोपलक्षितः ॥

अनन्ताकाशदेशत्वान्नाञ्जसान्तो दिशां यतः ॥ २१९ ॥

[This explains *yatrāsām diśām antaḥ*...(BU 1.3.10). Here the explanation given by Śaṅkara—and Sureśvara following him—is not wholly philosophical; it is socio-philosophical, since it reveals some of the bias of their times as is noticed from SP.]

Here the end of quarters is to be taken as that which is defined (or indicated)¹ by the middle region,² since it is not reasonable to say that there is the end (i.e. boundary) of quarters, for the region is very wide in space. [219]

¹The word 'indicated' shows that the division of regions is not so rigid; it only points to two regions of people of two different tendencies.

²Region described in the Smṛtis as *Āryāvarta*, viz. the region between Mt. Himalaya and Mt. Vindhya (rather the plains of the Gaṅgā). People of those times believed that the people of *Āryāvarta* followed the religion prescribed by the Śruti and the Smṛti. Therefore, they were pure in their mind and activity and the people other than these did not follow the religion (prescribed by the Śruti and the Smṛti). Therefore, they were impure. Thus there is a division of persons of divine tendencies and those of demoniac tendencies. Consequently, Mṛtyu or death is for them who did not follow the religion of the Śruti and the Smṛti—this religion prevailed in the form of (worldly) religion.

श्रुतिस्मृतिसदाचारसंस्कृताशयवज्जनम् ॥

अवधीकृत्यान्तत्वोक्तेर्नतु दोषो मनागपि ॥ २२० ॥

Since there is a statement (made in the Śruti) about the boundary, after having marked out the people who has

thoughts purified by (the study of) the Śruti, the Smṛti and the exemplary conduct (of the elite), there is not even a little defect.¹ [220]

NKL states the purpose of this verse: A Smṛti text reads; *vindhyasya dakṣiṇe bhāge kalau vāsaḥ praśasyate/tatra vedāś ca yajñāś ca yatra godāvarī nadī ||* (untraceable); and this indicates that the middle region is the one which is a suitable abode for the learned men (*śrautas-mārtakarmasamśkrītabuddhīnām puruṣāṇām vāsayogyah*). This is the purpose of *upalakṣita* in *madhyadeśo-palakṣita*; cf. verse 219 above.

¹This stands for 'defective doing'.

मध्यदेशावधिस्तस्माद्दिगन्त इति गृह्यते ॥
 प्रात्यन्तिकजनोद्देशः पापीयोजनसंश्रयात् ॥
 वर्ज्यतेऽतः प्रयत्नेन तद्विद्विरधुनातनैः ॥ २२१ ॥

Therefore, by the boundary of the middle region is understood the boundary of the quarters. (And) because the region of the people residing beyond that boundary is resorted to by people that are full of sin(s), it is hence carefully avoided by (even) the moderns who know (that). [221]

This underlines the significance of the contents in the note on the previous verse.

तेषु प्रत्यन्तदेशेषु तन्निवासिषु चासुरान् ॥
 यतो विन्यदधात्प्राणस्तस्मात्तद्वर्जयेद्द्वयम् ॥ २२२ ॥

Since Prāṇa fixed the demons down there in those regions beyond the limits (of the middle region) and also in the people residing there, therefore, one should avoid the two of them. [222]

This explains the reason (briefly) stated in the preceding verse.

जनो विशिष्टो देशेन देशो जनविशेषितः ॥
 पाप्मोषस्पृष्टमुभयं शिष्टास्तद्वर्जयन्त्यतः ॥ २२३ ॥

A people is marked out by (its own) region and (so also) is a region marked out by the people (residing in it). Therefore, the elite avoid them both, both of them being affected by sin. [223]

This makes the word *dvayam* 'the two of them' in verse 222 doubly clarified.

समाहारोऽथवा भेदो नेदित्येतत्पदं भवेत् ॥
अनीप्सितानिवृत्तिः स्यात्समाहारेऽविवक्षिते ॥ २२४ ॥

The word *net* could be either a compound or two different words (joined in Saṁdhi). When the compound (i.e. a single word) is not intended, it would be (in the sense:) 'not desisting from some undesired (activity or tendency)'. [224]

इत्थं न चेदहं कुर्या प्रतिषेधश्रुतीरितम् ॥
अन्ववायानि पाप्मानं प्रतिषेधातिलङ्घनात् ॥ २२५ ॥

(In that case, the meaning of the sentence would be:) If I shall not do this way (i.e. behave in this manner), as is declared by the prohibitive Śruti,¹ I might incur (lit. follow) sin by transgressing the prohibition. [225]

¹The prohibitive rule is *tasmān na janam...* (BU 1.3.10).

इति भेदविवक्षायां व्याख्या कार्या पदद्वये ॥
माङ्गर्थस्तु तथाभेदे व्याख्येयः प्रतिषेधकृत् ॥ २२६ ॥

Such should be the explanation given of the two words, if it is the intention to understand (*net*) to be two different words. So also, if there is (intended) non-difference, (i.e. there are not two words),¹ it is necessary to bring forth the meaning of the prohibitive particle *mā* which conveys the sense of prohibiting.² [226]

¹That is, (if) '*net*' (is accepted) only as one word.

²That is, it should mean 'let me not follow sin'.

सामान्यविषयश्चायं निषेधो नानविद्गतः ॥

बलवत्प्रक्रियातो हि वाक्यं सामान्यमात्रगम् ॥ २२७ ॥

And this prohibition pertains to (individuals in general), it does not pertain to the knower of Prāṇa, because the sentence of the Śruti pertains only to individuals in general, thanks to the (accepted) procedure in respect of a strong (proof which determines the meaning). [227]

Mīmāṃsā holds relative strength of proofs for determining the meaning of scriptural texts: *śruti*, *liṅga vākya*, *prakaraṇa*, *sthāna* and *samākhyā*. Here *prakaraṇa* 'context' or 'topic' is in conflict with *vākya* and is considered inferior to its precedents, in accordance with the rule regarding the weakness of the subsequent in comparison with its preceding (*pāradaurbalya*).

The basis for the verse is the following (possible doubt): 'What does the prohibition (*māṇārtha*) in the preceding verse pertain to, to the worshipper of Prāṇa (the subject of the *prakaraṇa*) or to the worshipper of all deities (the subject of *vākya*)?' The answer is: 'to the latter'.

आसुरेणावरुद्धांस्तान्वागादीन्हृतपाप्मनः ॥

देवत्वं प्रापयत्प्राणः कथमित्येतदुच्यते ॥ २२८ ॥

[Verses 228-236 explain the purpose of BU 1.3.11-16, i.e. worship of Speech and others secures the reward, viz. becoming the deities, Agni etc.]

(An objection is raised:) 'How has Prāṇa brought to (the divinities) Speech and others who were (first) overpowered by the demoniac (nature) and who had their sins later destroyed?'—this is (now) answered. [228]

ज्ञानतोऽज्ञानहानिः स्याद्देवत्वं भावनाबलात् ॥

आनन्तर्ये क्रियाद्वित्वादथशब्दो भवेद्ध्रुवम् ॥ २२९ ॥

'From (the acquisition of) knowledge there follows the destruction of ignorance, and, owing to the strength of devotion, there would be divine character (secured). (As

such), the word *atha* (here in this context) is certainly for (conveying) the sense 'then' or 'later', for there are two actions¹. [229]

This explains: *athainā mrtyum atyavahat*.

¹Namely, meditation (or worship) and knowing.

मृत्युमत्यवहत्प्राणः सामान्योक्तेर्विशेषतः ॥

विशिष्टदेवतावाप्तिर्वागादीनां प्रपञ्च्यते ॥ २३० ॥

By the general statement (is conveyed the meaning:) 'Prāṇa took (them) beyond (or over) Mrtyu' and by the particular statement is explained in detail the attainment of (the nature of) some particular deities by Speech and others. [230]

नेदीयसी यतोऽन्यभ्यो वागेवोद्गीथकर्मणि ॥

प्राणस्य तेन सोद्गातुः प्रथमेत्याभिधीयते ॥ २३१ ॥

Since, in the Udgītha ritual, Speech is, in comparison with others, nearer to Prāṇa,¹ therefore, it is described as the first (among the deities of the organs) of the Udgātr. [231]

This explains the qualifier *prathamām* of *vācam* in *sā vai vācam eva prathamām atyavahat*.

¹SP significantly adds: *audgātre karmaṇi sādihakamatvena prāṇasyodgātur atyantasaṁnihitatvāt*.

वागाद्यन्याद्यवाप्त्यैवं पाप्मनोऽपास्य सर्वतः ॥

वैराजं पदमेत्येवं यजमानः सुभावितः ॥ २३२ ॥

Having wholly separated (lit. thrown away) Speech and others from the sin by the attainment of (the nature of) Agni etc. (who are their deities), the sacrificer, who is thus well developed in devotion,¹ attains to the status of Virāj. [232]

¹That is, who has strengthened the devotion, or who is ardently devoted.

कल्याणासङ्गसंबन्धाद्वागाद्यधर्मकारणम् ॥
 त्यक्त्वानं मुख्यमात्मानमाश्रयेन्मृत्युवर्जितम् ॥ २३३ ॥
 वागाद्यैः पञ्चभिर्युक्तं विराजं साधिभौतिकम् ॥
 हित्वाध्यात्मपरिच्छेदं ततस्तं प्रतिपद्यते ॥ २३४ ॥
 साधिभूताधिदैवं च नामरूपक्रियात्मकः ॥
 सूत्रं प्राणोऽङ्गिराः सत्यमृक्सामेत्यन उच्यते ॥ २३५ ॥

Having abandoned (i.e. thrown away) the cause, viz. impiety of Speech and others, (which had resulted) from the connection (of them) with an attachment to the (so-called) auspicious, (the sacrificer) should resort to the Ātman, the principal Prāṇa, who is free from death, [233] (that sacrificer), having abandoned the limitation of the body, (resorts to) that Virāj, together with what has a basis in the elements (viz. body) which is connected with the five (sense-organs) speech and others,¹ attains Prāṇa.² [234] Sentience³ is called the Sūtrātman,⁴ the (principal) Prāṇa, Aṅgiras, Satya, Ṛc and Sāman, having the nature of name, form and activity and being connected with the elements and divinities. [235]

¹SP and NKL point out; 'this indicates the inclusion of the sense of touch etc.'

²That is, status of Prāṇa.

³Translation distinguishes *ana* from *mukhya Prāṇa*. Sentience is for *ana*.

⁴Read SP: *napuṃsakam sūtrenādhyāhṛtaprapaṇcena ca pumān sambadhyate*.

तमेकं सर्वभूतेषु ज्ञानकर्मफलाश्रयम् ॥
 आस्वभावात्मविज्ञानादुपास्ते यः स तं व्रजेत् ॥ २३६ ॥

He, who worships that one, the unique, who alone exists in all beings, who is the support of knowledge, (ritual) action and rewards, till (he acquires) the knowledge of (his own) nature (as that) of the Ātman,¹ becomes one with it.² [236]

¹The editor of NKL writes the following note: *sūtram prāṇa iti ābhyām padābhyām kriyātmavām uktam, aṅgirāḥ satyam ity*

ābhyāṁ rūpātmakatvam, ṛksāmapadābhyāṁ nāmātmakatvam ca prāṇasyoktam bodhyam.

²It literally means 'attains to that'.

Verses 237-245 explain BU 1.3.17.

उक्तमभ्युदयार्थं यद्वागादीनामथाधुना ॥

आगानमवशिष्टेषु स्तोत्रेषूद्गातुरुच्यते ॥ २३७ ॥

As to what was stated in the case of speech and others, (viz. the singing of the Udgītha) is for the material prosperity (for them, i.e. the sacrificer); (now) is stated, in respect of the remaining prayers, (that which is for the sake) of the Udgāṭṛ (priest). [237]

Among the twelve prayers (*pavamānas*) earlier referred to, the first three are said to bring the reward to the sacrificer, viz. material prosperity. The remaining prayers stand in similar connection with the Udgāṭṛ priest.

सामान्यभोज्यविषयस्त्वन्नशब्दो यतस्ततः ॥

आद्यमित्युच्यते तस्य विशेषणतया वचः ॥ २३८ ॥

Since the word *anna* refers to the commonly accepted eatable (foods), therefore, a statement is made about that in the word *ādya* 'fit to be eaten'¹ (which is) its qualifier. [238]

This verse explains the second member *ādya* in the compound *annādya* and sets aside the possible doubt of repetition.

¹Cf. SP: *tasyaiva (=annasya) saṁskṛtatvam viśeṣam*.

यत आदाविदं वृत्तमन्नागानमनात्मनि ॥

तस्मात्तत्कार्यभूतासु प्रजास्वद्यापि दृश्यते ॥ २३९ ॥

Since this incident, viz. the singing for food, first¹ occurred in respect of the non-Ātman,² therefore that³ is noticed even today in the case of people (lit. the offsprings of that Prāṇa) who are but the product of the same. [239]

¹This refers to Prajāpati who was connected with Speech and others. Therefore, there is a reference to this as the first occurrence. Prajāpati is understood as other than the Ātman.

²This emphasises the notion about Prajāpati as non-Ātman.

³It signifies people's satisfying their own desire for food (cf. the note of the editor of NKL: *svārtham annasvikaraṇam iti śeṣaḥ*).

यद्धि किंचेति सर्वार्थमेवेत्यत्रावधारणम् ॥

प्राणेनैव तु तत्सर्वं लोकोऽन्नं ह्यति सर्वदा ॥ २४० ॥

In the words *yadd hi kiṃ ca* (in the Śruti statement), there is the specification: 'for the sake of all', (expressed) in the word *eva*. (The sense of the sentence is:) Therefore, people ever eat all food only through Prāṇa indeed. [240]

अन्नोपकारः सर्वेषामविशिष्टः समीक्ष्यते ॥ २४१ ॥

अथावधारणं कस्मादनेनैवेति भण्यते ॥

प्राणद्वारक एवेषामुपकारो न तु स्वतः ॥ २४२ ॥

This benefit (resulting) from food is noticed to be the same¹ for all. [241]

Now (a question could be asked:) 'Why then is this specification "only through Prāṇa"?'. Therefore, (to answer this, it is said:) 'This benefit for (all) these (people) occurs only through Prāṇa and not on (the basis of merit or strength) of their own.' [242]

¹It means 'not specified or distinguished as different for different individuals'.

कथं तद्द्वारकस्तेषामुपकार इतीर्यते ॥

ननु दूरिति हि प्राण उक्तो वागादिवत्कथम् ॥

आत्मार्थान्नाद्यसंगीतेविद्धो नासुरपाप्मभिः ॥ २४३ ॥

Now is stated¹ as to how this benefit (accrues) to them (i.e. the people) through that (Prāṇa). (A question is asked:) 'How indeed is Prāṇa, who is called Dūr was not, like

Speech and others, pierced by the demoniac sins, on account of the singing for food for its own sake²?’ [243]

¹This refers to the sentence: *iha pratitiṣṭhati*.

²The word *ātman* in the compound *ātmārtham* is a reflexive pronoun.

स्थितिमात्राभिसंबन्धान्नायं दोष इहेष्यते ॥ २४४ ॥

(The answer is:) ‘It is understood here¹ that this is not a fault, for there is connection (of food etc.)² merely for the sustenance (of worldly life.)³’ [244]

¹The word *iha* means ‘in the statement of the Śruti’: *ihānnam pratitiṣṭhati* where *iha* stands for *Prāṇa*.

²The words ‘with *Prāṇa*, the inner self called *Dūr*’ is to be supplied.

³There is no common ‘desire’ for food and, therefore, no sin.

असावन्नं स्थितं यस्माद्देहं प्राणानवत्यतः ॥

यत्नाच्छ्रुतिरतो वक्ति त्विहान्नं प्रतितिष्ठति ॥ २४५ ॥

Since food is resting on the *Ātman*,¹ therefore, it protects *prāṇas* (the sense-organs) (and) the body—therefore, the Śruti states, with emphasis (or special care): *ihānnam pratitiṣṭhati*. [245]

A first interpretation is made here of *ihānne pratitiṣṭhati*. Read SP: *iha prāṇe doṣo nodbhāvyah sarvasādhāraṇasthityarthatayā tenānnasvikārāt prāṇasthityadhīnā hi vāgādisthitiḥ*. Or NKL: *tasmin prāṇe pratiṣṭhitam sad annam deham prāṇānś cāvati*.

¹That is *mukhya prāṇa*.

Verses 246-252 explain BU 1.3.18.

स्थितिमात्रं ह्यसोरन्नं यद्वासङ्गो न शङ्क्यते ॥

भर्ता श्रेष्ठः पुरो गन्ता ह्यन्नादोऽधिपतिस्तथा ॥

इत्यादिगुणविधयर्थं परो ग्रन्थोऽवतार्यते ॥ २४६ ॥

Or rather, food (for the *Prāṇa*) is merely for the sustenance (of the body); any attachment to food (and the consequent

sin) cannot be thought of (in the case of Prāṇa).¹ (Now) the subsequent Śruti is introduced for prescribing the Guṇavidhi: 'the supporter, the best of them, the one who marches ahead, the eater of food and the Lord etc.'² [246]

¹A second interpretation of *ihāṇne pratitiṣṭhati*. Read SP: *sarvasādhāraṇasthityarthānnayogāt prāṇasya pāpmavedho na*. This is Śaṅkara's alternative explanation: *iha dehākārapariṇate āṇne prāṇaḥ tiṣṭhati*.

²The word 'etc.' refers to gold and other belongings. This is the ultimate result of the Śruti statement: *te devā abruvan/etāvad vā idaṁ sarvaṁ yad annam ātmana āgāsīḥ/ anu no annam ābhajasva*.

अयं गुणविधिर्ज्ञेयः प्रत्येकं तत्फलश्रुतेः ॥ २४७ ॥

जग्धमन्नं यतो देहलिङ्गभावेन याति नः ॥

परिणामं व्रजत्तस्मादेतावदिति भण्यते ॥ २४८ ॥

Let this¹ be understood as a Guṇavidhi, because there is heard a reward in the case of each (of the two sentences).² [247] Since the food that is eaten by us becomes transformed into the body and (also) its subtle form, thus developing its monification(s); therefore, is the word *etāvat* 'this much' stated in the Śruti.³ [248]

¹Refer to *te devā abruvan*...quoted in note 2 on the preceding verse. But this verse explains the significance of *etāvat*.

²The second sentence (i.e. *vidhi*) is: *so ayāsyā*...(BU 1.3.19).

³This refers to *etāvad vā idaṁ sarvaṁ yad annam ātmana āgāsīḥ*.

त्वयैवात्मार्थमागीते त्वय्येवान्नमतोऽखिलम् ॥

वयं चान्नमृते स्थातुं नालं क्षणमपीश्वर ॥ २४९ ॥

When you yourself have sung for your own sake, all food is (resting, lit. obtained) in you. And, as for us,¹ we cannot live without food even for a moment, O Lord! [249]

This explains: *tad ātmana āgāsīḥ*.

¹Refer to the word *ca*. And the popular maxim: *svāmini bhṛt-*

yenātmīyāpan nivedyā; simile of master-servant relationship, viz. the feeder-fed or the supporter-supported relationship'. (cf. *Lauki-kanyāyāñjaliḥ*. vol. 2, Bombay, Nirnaya Sagar Press, 1925, p. 90)

संतर्प्यातः स्वमात्मानमन्नेनास्मानपीश्वर ॥

आभाजयस्व क्षुधितांश्छान्दसत्वाणिचोऽश्वरः ॥ २५० ॥

Therefore, 'O Lord! Having satisfied yourself by this food, make us, the hungry ones,¹ also share of that food. (In the Śruti) is not heard the causal form, owing to its character of Chandas.² [250]

This verse explains: *anu no 'sminn anna ābhajasva*.

¹The use of 'O Lord' and 'us, the hungry ones', which are used in contrast, points to the relation of one who favours and the one who is favoured. 'The Lord' is a reference to the sacrificer(s); (cf. note by of the editor of NKL: *īśvaraśabdaḥ yajamānaparaḥ*). The hungry ones are then the priests.

²The Śruti uses the verbal form *ābhajasva* which Sureśvara has paraphrased as *ābhājayasva* (a causal form). Then, he points to the practice of Chandas, i.e. Veda, of using primitive verbal forms in the place of causal ones.

मामृतेऽन्नं न वः शक्तं पोष्टुं क्षणमपि क्वचित् ॥

अन्नार्थिनोऽतो मां सर्वेऽप्यभिसंविशताशु वै ॥ २५१ ॥

"Without me (i.e. in my absence) food cannot, by any chance (*kvacit*)¹, nourish you even for a moment, therefore, all of you, who desire for food, (do you) enter into me quickly indeed." (So said Prāṇa to them). [251]

This explains: *te vai mābhisaṁviśateti/ tatheti taṁ samantam pariṇyaviśanta/ tasmād yad annenānnam atti tenaitās tṛpyanti*.

¹Or alternatively, 'anywhere'.

Verses 253-280 explain how the deities of Speech and others are satisfied when Prāṇa has eaten the food.

तेनेता देवताः सर्वास्तृप्यन्त्यन्नेन सर्वशः ॥

इत्यर्थस्य कुतः सिद्धिरिति चेदुच्यते यतः ॥ २५२ ॥

त्रिधा जग्धं भवत्यन्नं परिणामविशेषतः ॥
 स्थवीयान्मध्यमोऽणीयानित्येवं कालतोऽग्नितः ॥ २५३ ॥
 स्थवीयान्यात्यधोभागो रसादिक्रमशोऽपरः ॥
 स्थूलं ह्युपचिनोतीमं कुड्यं मृत्स्नेव सर्वदा ॥ २५४ ॥
 यस्त्वणीयान्त्रसः सूक्ष्मः स ऊर्गमृतमुच्यते ॥
 नाडीः सूक्ष्माः प्रविश्यासौ देवताः प्रीणयत्यथ ॥ २५५ ॥

[SP states that verses 253 ff. are an explanation which has no basis in both BU and BUB. NKL states: there is *udgrantha* (-*parihāra*).]

(The Śruti says:) 'All these deities ever¹ become satisfied by that food²'—whence³ can this meaning be established?' If (this is asked), here is given the answer: 'Since [252] food that is eaten becomes threefold owing to the particular (and different) modifications of it: digested in the forms: gross, subtle and of middle size, owing to passage of time and to the fire (within the belly). [253] The gross (modification) goes as the lower part⁴ (i.e. bodily excretion) and the other as *rasa* etc. in order and that (all these being together) ever forms 'this (gross body) like the soft clay⁵ which forms a thatched wall. [254] And⁶ that (part) which is thinner (than the first two), is the subtle (*rasa*) that is called *ūrj* (or, 'energy'), the nectar, after it has entered (these) very thin veins, it pleases the deities⁷ also.⁸ [255]

This has a basis in some other Śruti: *annam aśitam tredhā vidhīyate* (CU 6.5.1), (NKL).

¹Translation follows the variant *sarvadā* for *sarvaśaḥ* 'in every way' as read in the in AnSS and NKL texts.

²That is, through Prāṇa's eating of food.

³That is, on what basis...

⁴This should be *adhobhāgam* 'to the lower part (as excretion)'.
⁵Cf SP: *praśastā saṁskṛtā mṛn mṛtsnety ucyate*.

⁶Or alternatively, 'As for, that...(two), it is...'

⁷This signifies the different sense-organs.

⁸This is for *atha* in the sense of *api* (SP).

स्वाम्यर्थ एव चोत्तम्भस्तृप्तिरापूर उच्यते ॥

ततस्तु या सुखोद्भूतिर्विज्ञानात्मन एव सा ॥ २५६ ॥

The sustenance (of the body) is only for the sake of the master (i.e. Prāṇa)¹. Satisfaction is what is called filling and, whatever happiness then results is for (i.e. accrues to) only the knowing Ātman (the inner self, viz. Prāṇa)². [256]

¹The stress on the *svāmi-bhṛtya* (or *sva-svāmi*) relation is for ruling out the elemental nature (*bhautikatva*) of Prāṇa. *svām-yartha* is *kāryakaraṇasaṃghātārtha* (i.e. *dehārtha*).

²This sets aside the possible doubt that happiness also belongs to the *kāryakaraṇasaṃghāta*.

ता एता देवताः सप्तदश ज्ञानक्रियात्मिकाः ॥

सोऽयं सप्तदशग्रामो भोक्तुः करणलक्षणः ॥ २५७ ॥

Thus, these are the seventeen deities, having the nature of knowledge and activity and this is the group of the seventeen, having the form of the organs of the enjoyer. [257]

This explains the nature of the deities pleased by *rasa* (mentioned in verse 255 above).

बुद्धीन्द्रियाणि पञ्चैव तथा कर्मेन्द्रियाण्यपि ॥

वायवः पञ्च बुद्धिश्च मनः सप्तदशं विदुः ॥ २५८ ॥

They¹ know (the group of) the seventeen thus: The five organs of sense and also (the five organs) of activity, the five winds, intellect and *manas*. [258]

This refers to the *lingaśarīra* 'subtle body' (SP).

¹Namely, those who can make out (i.e. who are knowers).

अपास्ताध्यात्मरूपाणां देवतानां समाश्रयः ॥

भूतपञ्चकमेवेदं साधारण्याद्भूतेऽसदा ॥ २५९ ॥

(And) ever¹ this group of five elements itself became the support of the deities which have (thus) given up their

bodily forms, owing to its being (shared by them) in common. [259]

¹This stresses the idea of the support available for both the gross and the subtle bodies.

पयोम्भोवदिदं लिङ्गं नानारूपैः समन्वितम् ॥
आविर्भावतिरोभावैः कारणात्मनि वर्तते ॥ २६० ॥

This subtle body, which is possessed of many forms on account of the manifestations and concealments (of some of them), remains (permanently) in the nature of its own cause,¹ just like milk and water.² [260]

¹This is a reference to the manifestation of the Ātman in the collective and individual (*samastavyasta*) forms.

²That is to say: As milk appears in the form of curds etc. and water, in the form of ice etc. The illustration and terminology reveal the basic Sāṃkhya notion about the so-called creation.

कूटस्थबोधतन्मोहचिदाभासैकमात्रया ॥
जाग्रत्स्वप्नावयं पीत्वा ह्यास्ते प्राणात्मना प्रभुः ॥ २६१ ॥

[The stress on the word *ābhāsa* may be noted. This is of cardinal importance in Sureśvara's writing. Verse 261 is the description of the deep sleep state of the Ātman, viz. Prājñā, verse 262 of the Sūtrātman and verse 263 of the waking state of the Ātman. These verses are *anukta* portion 'not in Bhāṣya but implied elsewhere'.]

By means of the unique *mātrā*,¹ which is but the appearance of Sentience owing to the widely known ignorance or knowledge about (then ature of) in respect of the immutable (i.e. Ātman), this Lord first absorbs into Himself (lit. drinks) the waking and dream states of Himself and then remains in the state of Prāṇa alone. [261]

¹*mātrā*=Prājñā state of the Ātman. It seems that NKL holds this verse as an explanation of *m* in *aum*; it symbolises sleep.

अपास्ताशेषबाह्यार्थस्तज्जवासनयाञ्चितः ॥
अध्वस्तप्रत्यगज्ञानो विरिञ्चः पर उच्यते ॥ २६२ ॥

(And Prāṇa) who is beyond this (i.e. the inner self etc.) is called Viriñca (=the first sacrificer), the one who has thrown away all of the external objects, who is marked by the impressions produced by them¹ and whose ignorance about the inner self is not (yet fully) destroyed. [262]

NKL holds this as an explanation of what is symbolised by *u* in *aum*, viz. the Sūtrātman.

¹This refers to *aśeṣabāhyārtha*.

जाग्रत्काले विशेषेण स्थित्वा हृदयसञ्चनि ॥
द्वासप्ततिसहस्राणि नाडीर्व्याप्यावतिष्ठते ॥ २६३ ॥

Residing in the home, viz. the heart, at the time of the waking, in some particular way, (the Lord) remains there occupying the seventy-two thousand veins. [263]

This is, according to NKL, referring to *a* in *aum*.

स एष परमात्मैव स्वात्ममोहसहायवान् ॥
प्राणात्मना करोत्येष पश्यत्यग्न्यात्मना तथा ॥ २६४ ॥

And this one¹ is but (i.e. none other than) the highest Ātman Himself—He, who has a companion in² the ignorance about His own nature. He does His functions, being in the form of *prāṇas* (organs) and also sees (all), being in the form of Agni. [264]

¹This one who is described in verses 261-263 above. It asserts the oneness of all the three mentioned in those verses.

²In other words; who is aided by.

इन्द्राग्नी ताविमावुक्तौ प्राण इन्द्रस्तयोर्मतः ॥
प्रकाशकत्वाद्वाग्निरेवमेकः प्रजापतिः ॥ २६५ ॥
अन्त्राद्यभेदतो द्वौ वा यदि बाध्यर्ध उच्यते ॥
यदि बायं त्रयांस्त्रिंशद्द्वासप्ततिरथापि वा ॥ २६६ ॥

These two¹ are called Indra and Agni and *prāṇa* is understood to be Indra of the two on account of his illumining.² Thus is Speech Agni³—thus, there is (but) one Prajāpati⁴. [265] If he is declared to be two owing to (the existence of) the two discrete individual objects, viz. the eater and the eatables, or (perhaps as) one and half,⁵ or thirty-three⁶ or seventy-two⁷ (he is just one yet). [266]

¹*prāṇa* 'organs' and Agni mentioned in the preceding verse.

²That means 'bringing sensation etc. or knowledge'.

³Cf. verse 324 below.

⁴Read SP: *uktanītyā kriyāśaktimadrūpeṇa kartā jñānaśaktimadrūpeṇa jñātety ekaḥ paramātmānaiva sūtradeham āpannaḥ san kartrādyātmāna tiṣṭhatīti*.

⁵*Prāṇa* is one and the world is half—thus one and half (NKL).

⁶These are eight Vasus, eleven Rudras, twelve Ādityas, Indra and Prajāpati—these are the *vibhūtis* 'special manifestations' of *Prāṇa*.

⁷The same as in the preceding note with minor divisions of them, so that they correspond to the number of the veins in a body.

अनन्तभेदभिन्नो वा एक एवान उच्यते ॥

सर्वोऽप्येष विकल्पश्च पुनरेकैकशस्तथा ॥ २६७ ॥

Or, even though only one, *Prāṇa* is differentiated in innumerable discrete individual objects and each of all these is further divided in the same way (infinitely). [267]

देवासुरादिभेदेन जातिरूपक्रियागुणैः ॥

एकैकोऽनन्ततां याति पुनरेकात्मतामतः ॥ २६८ ॥

(Thus) by (such) division into the gods and the demons, on the ground of the (different) genera, forms, activities and qualities, each one (of these distinct objects) becomes infinite and finally once again attains the nature of only one (*Ātman*). [268]

समस्तव्यस्ततैवेह प्रत्यगज्ञानभूमिका ॥

न त्वपास्तसमस्तान्ध्ये नेति नेति परात्मनि ॥ २६९ ॥

Here unity and multiplicity¹ is but the phase of the ignorance (about the nature) of the inner self, but (it does) not (exist) in the highest Ātman from whom all darkness (i.e. ignorance) is removed (as expressed) in the words *neti neti*. [269]

¹Or alternatively, 'collectivity and individuality'.

सर्वेणैव विकल्पेन यथोक्तेनावतिष्ठते ॥
यथाधिकारं सर्वत्र परो जगति सर्वथा ॥ २७० ॥

At all events (then), the highest one abides in the world in the form of all these discrete objects etc., as described before, according to the requirement of each (of them). [270]

न हि कृत्स्नमनादाय जगदेतन्मनागपि ॥
क्रियायै कारकं किञ्चित्स्मात्सर्वात्मनेहते ॥ २७१ ॥

Indeed, no agent is capable of any activity without taking even a little of this entire world, therefore (it is said: it is the highest Ātman) who, assuming the forms of all of these, acts.¹ [271]

¹The verbal root *ih* has the sense 'to act'; cf. the word *ihā* in verse 126 above.

कारणात्मा जगत्कृत्स्नं श्रौतदर्शनसाधनः ॥
यतः प्रागकरोत्कर्म तत्कार्येऽपि तथा ततः ॥ २७२ ॥

Since the Ātman, who is of the nature of the cause (of everything and) who has as his means what is prescribed (lit. seen) in the Śruti, has formerly produced (lit. made) the whole of the world (consisting in varied objects), therefore, there exists similar activity in his products (viz. in the world) also. [272]

एकापूर्वप्रयुक्तत्वात्समस्तव्यस्तरूपिणाम् ॥
सर्वः सर्वमुपादाय सर्वत्रातः प्रवर्तते ॥ २७३ ॥

Since they are impelled by the unique *apūrva* 'not preceded

by anything' (viz. the Sūtrātman), therefore, all of (those who have the) forms of unity and of multiplicity proceed to act everywhere, taking up all (other things as the means of activity). [273]

अध्यात्माद्यधिभूताधिदैवतं सर्वदाखिलम् ॥
सर्वं सर्वक्रियाः कुर्यादिकापूर्वप्रयुक्तितः ॥ २७४ ॥

All of it,¹ viz. what begins with bodily forms² and what rests on elements and what on deities, would ever³ perform all activities, thanks to the impulse by the unique *apūrva* (viz. the Sūtrātman), [274]

¹This refers to the agents of various activities noticed in the world.

²The word 'etc.' indicates minor divisions of these forms (SP and NKL).

³SP remarks: *sarvadety ādāne karaṇe ca sambadhyate*. This should require the following translation: '...would ever perform all activities, always taking up the various means, thanks...'

यतः प्रजापतिः पूर्वमेतस्मिन्दर्शने स्थितः ॥
यज्ञेन कर्मणास्त्राक्षीज्जगदेतच्चराचरम् ॥ २७५ ॥

since, in this lore (of this Upaniṣad), Prajāpati, who has appeared earlier (than all creation), has therefore produced by his activity (viz. the performance of sacrifice) this world, movable and immovable. [275]

नाड्योऽस्य रश्मयोऽनन्ता हृदयं मण्डलं रवेः ॥
अहोरात्राणि तावच्च शतसंवत्सरायुषः ॥ २७६ ॥
एतया संपदा पूर्वं यजमानेन तद्विदा ॥
अग्नयोऽर्काश्रिता आसन्षट्च त्रिंशत्सहस्रशः ॥ २७७ ॥

The innumerable veins of this one¹ are rays, this one's heart, the orb of the Sun. Of him,¹ who has the life of a hundred years, the days and nights are also as many; [276] as the thirty-six thousand (bricks), (called) Agni and Arka, were earlier collected with this amplitude² (of trans-

formation in the sacrifice performed) by him, the sacrificer who knows that (amplitude). [277]

¹Namely, the sacrificer.

²This refers to *saṁkhyāsāmānyayoga* 'connection with similarity in number'.

एकैकस्मिन्परिस्पन्द एवं सर्वापि देवता ॥
एका चानेकरूपा च ह्यध्यात्मादिविभागतः ॥ २७८ ॥

Thus, the deity in its fullness was present in each of the activities (of that first sacrificer) of one (particular form) and of many forms on account of the division based on bodily forms etc.¹ [278]

¹Cf. verse 274 above and the next.

विभ्वी सर्वगतानन्ता समाप्ता च प्रतिक्रियम् ॥
प्रतिद्रव्यफलं कृत्स्ना खण्डादौ गोत्ववत्स्थिता ॥ २७९ ॥

(That) one deity, all-pervading, residing in many, infinite and fulfilling¹ its purpose in every activity, abides in its full form (in all the effects) in the same way as cowness abides in various parts (i.e. bodies of cows). [279]

¹The word *samāptā* is for *samāptavātī* (= *samāpayantī*).

एष प्रजापतेरुक्तो महिमा तद्वदेव तु ॥
यजमानोऽपि तादात्म्यात्तथैव भवति ध्रुवम् ॥ २८० ॥

Thus is described (here) the greatness of Prajāpati. And, indeed, just in the same way does the sacrificer also become possessed of similar greatness owing to his (attaining) oneness with him (=Prajāpati). [280]

Verses 281-285 explain *evam ha vā enam...ya evam veda* (BU 1.3.18).

गुणोपास्तिफलोक्त्यर्थमेवं हेति श्रुतिः परा ॥
यथोक्तार्थमुपासीनं प्रति प्रववृतेऽधुना ॥ २८१ ॥

The subsequent Śruti text *evam ha...* now proceeds with the purpose to state the reward of the subordinate (form of) worship with reference to a worshipper of him (i.e. Prajāpati), who has been described (before). [281]

वागादयोऽभिसंविष्टा जीवनाथमनं यथा ॥

ज्ञातयोऽभिविशन्त्येवं तद्विदं जीवनाथिनः ॥ २८२ ॥

As Speech and others entered into Prāṇa from all sides (*abhi*) for their life, so do the relatives enter (him) who knows that (viz. Prāṇa) from all sides, having a longing for life. [282]

भर्ता च संनिविष्टानां श्रेष्ठश्च गुणतो भवेत् ॥

यथोक्तगुणवैफल्यं पुरेता न चेद्भवेत् ॥ २८३ ॥

And he would be the supporter of those who have resorted to him (and) the most prominent (among them)¹ because of his excellence (only) if he does not go at the head (of them)² and if there does not result (from that doing) futility of excellence which is stated earlier. [283]

¹SP points out the significance *bhartr* and *śreṣṭha* as the qualifier of a Kṣatriya and a Brāhmaṇa sacrificer respectively.

²This implies; marching at the head of others is permissible in the case of a king; a Brāhmaṇa, though possessed of excellence, should not march ahead of the king; if he does so, his excellence would be useless.

सर्वमेतद्वृथैव स्यान्न चेद्दीप्ताग्निमान्भवेत् ॥

अन्नाद इत्यतो वक्ति साफल्यप्रतिपत्तये ॥ २८४ ॥

All this would be futile indeed, if he would not have enkindled the fire,¹ therefore, (the Śruti) states: 'He is the eater of the food', in order that one understood (thereby) the fruitfulness of his activity. [284]

¹The words 'for the performance of a sacrifice' are to be supplied.

द्विषत्सु स्वेषु च न चेदाधिपत्यं तथापि च ॥
प्रोक्तवैफल्यमाशङ्क्य ह्याहाधिपतितां फलम् ॥ २८५ ॥

And, indeed, (the Śruti) declared rulership as the result, because it feared that there might be failure¹ in respect of what was said earlier and if (the sacrificer) would not have mastery over his relatives and those who are his haters. [285]

¹It literally means 'fruitlessness or inutility'.

Verses 286-289 explain the purpose of *ya u haivam...bhārye-bhyo bhavati*.

प्राण आत्मेत्युपासीनो यथोक्तं फलमश्नुते ॥
तज्ज्ञातयोऽपि फलिनो यथा वागादयस्तथा ॥ २८६ ॥

One, who has performed worship with the notion that Prāṇa is the Ātman, enjoys the reward as stated in the Śruti (and) his relatives also would have received rewards in the same way as Speech and others (have received that reward through Prāṇa). [286]

प्राणसंस्पर्धिनो यद्वद्विनेशुरसुरास्तथा ॥
प्राणविद्विद्विषः सर्वे नालं भार्येभ्य एव च ॥ २८७ ॥

And as the demons who had rivalry with Prāṇa perished, so do (perish) all those who hate the knower of Prāṇa and they are not capable of (offering protection to) their dependents.¹ [287]

¹The word *bhārya* means 'who is to be supported, a dependent'. SP justifies this by citing *brāhmaṇebhyo vedavidbhyo dive dive namaskuryān nāślilam kīrtayet* (Taittiriyaṛaṇyaka 2.15.1).

उद्बुभूषति यो द्वेषात्स्वेषु प्राणविदं प्रति ॥
प्रतिस्पर्धी न सोऽलं स्याद्भूरणाय कथंचन ॥ २८८ ॥

[Here is the explanation of *pratibubhūṣati*.]

Whosoever amongst his relatives would seek to be superior to the knower of Prāṇa,¹ owing to his hatred (towards him), and (also) to be his rival would not in any way be able to support (them²). [288]

¹That is, who would try to overpower the knower of Prāṇa.

²It means 'his own relatives'; the word *bhārya* from the preceding verse is understood.

नासौ श्रेष्ठः पुरोगन्ता नान्नादोऽसुरवद्भवेत् ॥
न च ज्ञातिष्वधिपतिः स्पर्धमानोऽनवेदिना ॥ २८६ ॥

He, the one moving at the head of them, would not be the most prominent, and the eater of food; he would be like a demon. He would not be the overlord among his relatives; (he) who is vying with the knower of Prāṇa.¹ [289]

¹It means 'the worshipper of Prāṇa' (*ana-vedin*).

सोऽयास्याङ्गिरसः प्रोक्तस्तत्रायास्यो यथा तथा ॥
निर्णीतः प्रागथेदानीमाङ्गिरस्त्वविनिर्णयः ॥ २८७ ॥

[Verses 290-294 explain BU 1.3.19; Prāṇa is Āṅgīrasa.]

That one (i.e. Prāṇa) was mentioned earlier as Ayāśya Āṅgīrasa¹ and the word *ayāśyaḥ* there was herebefore (i.e. in the above) explained somehow.² Now (follows) the decision regarding his being Āṅgīrasa.³ [290]

¹This refers to the Śruti passage *so 'yāśya āṅgīrasaḥ āṅgānām rasah...*; in this verse, Sureśvara adopts double Saṁdhi of *ayāśyaḥ āṅgīrasaḥ*.

²For *yathā tathā*.

³It is noticeable that Sureśvara made no difference between Āṅgīrasa and Āṅgīras. And also between Āṅgīras and Āṅgīrasa.

पूर्वोक्तस्यानुवादोऽयं सोऽयास्येत्याद्युपक्रमः ॥
श्रुत्याङ्गिरस्त्वसिद्धयर्थमुच्यते न्यायपूर्वकम् ॥ २८९ ॥

This introductory *so 'yāsyā...* is Anuvāda (=re-statement) of what is said earlier. (Now) the (following) is stated by the Śruti, putting forth first an illustration for establishing the nature (of Prāṇa) as Āṅgiras. [291]

This is to justify how *so 'yāsyā...* (BU 1.3.19), though far from *ayam āsye antar iti so' yāsyā āṅgirasō 'ṅgānām hi rasah* (BU 1.3.8) is connected with the former.

सिद्धोऽङ्गानां रसः प्राणः प्राणोऽङ्गानां रसः कथम् ॥
हीति हेतावतः प्राह तद्व्याख्यानाय चोत्तरः ॥ २९२ ॥

(A question is asked: '(You say), "it is established that Prāṇa is the essence of the limbs." (Tell me then) how Prāṇa is the essence of limbs.' (The answer is:) 'The word *hi* is expressive of the reason; therefore, the subsequent (part of the Śruti follows, with a view to explaining that (viz. how etc.)'. [292]

यस्मात्कस्माच्चिदङ्गाद्धि प्राण उत्क्रामतीह नुः ॥
नीरसं सत्तदेवाङ्गमाशु शुष्यति तत्र च ॥ २९३ ॥

'Because, in this world (*iha*), only that limb of a man, from whichsoever Prāṇa departs, dries up very soon, then and there, becomes devoid of the essence.' [293]

यत एवमिदं दृष्टमन्वयव्यतिरेकतः ॥
तस्मादाङ्गिरसः प्राणो ज्ञेय आत्मेति पण्डितैः ॥ २९४ ॥

Since this is so seen (i.e. understood) by the method of Anvaya and Vyatireka, therefore, the learned have to know the Āṅgirasa Prāṇa as the Ātman. [294]

Verses 295-300 explain BU 1.3.20-21. [Prāṇa is Bṛhaspati and Brahmanaspati.]

कार्यस्य रूपभूतस्य कर्मणः करणस्य च ॥
न केवलं प्राण आत्मा नास्नोऽप्यात्मेति भण्यते ॥ २९५ ॥

Prāṇa is the Ātman not merely of the product¹ which has been (his) form and of the activity of his organ; but he is called the Ātman of the name also. [295]

Thus begins the explanation of *eṣa u eva brhaspatiḥ*...

¹This is a reference to the word *jagat*. The use of the singular forms *kāryasya* and *karmaṇaḥ karaṇasya* is in the sense of the plural.

एवं सर्वात्मकत्वेन स्तुवन्प्राणं प्रयत्नतः ॥

आदरं कुरुते शास्त्रमुपास्यत्वाय देहिनाम् ॥ २६६ ॥

Thus specially praising¹ the Prāṇa as being the nature of all (that makes up the world), the Śruti shows great regard (for Prāṇa), in order that it becomes the object of worship for human beings. [296]

¹In other words; praising with particular care.

बृहस्पत्यादिभिर्धर्मैरसोरन्यदुपासनम् ॥

विशिष्टमभिधित्स्वाह शास्त्रं पूर्ववदेव च ॥ २६७ ॥

(Now), even as before, the Śruti states (what follows), wishing to prescribe some other special¹ (form of) worship (of Prāṇa) by (referring to) the other properties, viz. (his being) Brhaspati etc.² [297]

¹That is, as having reference to the properties of Brhaspati and others.

²SP observes that these injunctions are not Gaṇavidhis; they are Viśiṣṭavidhis. The reason for this is: All of them have but one (viz. the principal) purpose—*sāmnāḥ sāyujya*.

वाग्व्यापृततमा दृष्ट्वा यत उद्गीथकर्मणि ॥

देवता सैव न प्राण इत्याशङ्क्येवेदमुच्यते ॥ २६८ ॥

This is so stated after keeping in view the doubt “Since Speech is the most active (lit. functioning) in the ritual of the Udgītha, therefore it is the deity (of that service), not Prāṇa.” [298]

This is another purpose served by the Śruti. Since Vāc is but Prāṇa (i.e. not different from it), therefore, Prāṇa itself is the deity of the Udgītha.

कौष्ठ्याग्निप्रेरितो वायुर्नानास्थानसमाहृतः ॥

वर्णतामेति येनातः प्राण एव बृहस्पतिः ॥ २६६ ॥

Since the wind (which is) sent up by the fire in the belly, (being) obstructed at different places (in the body) becomes one Varṇa¹ (or another), therefore, Prāṇa is Bṛhaspati.² [299]

Bṛhaspati means Lord of Bṛhatī metre which is a form of speech; therefore, Prāṇa which controls speech, is called the Lord of speech, i.e. Bṛhaspati.

¹It signifies 'syllable or letter'.

²This is to explain the oneness of Vāc and Prāṇa, though these two are not synonymous.

यजुर्ब्रह्मेति श्रवणादन्ते साम्नो ग्रहादपि ॥

ऋग्यजुःसामनिर्वेशः क्रमेणेति प्रतीयते ॥ ३०० ॥

Because in the text *yajur brahma* is heard (in the beginning and) in the end and also there is a mention¹ of Sāman; therefore, it is understood that there is the mention (of Prāṇa) in the order (of the names) Ṛc, Yajus and Sāman.² [300]

This is to explain why Bṛhaspati in the passage under discussion is not one who is the priest of the gods.

¹It literally means 'inclusion of the word *sāmnaḥ*'.

²This refers to the earlier statement *sa evarkpatiḥ* and the following: *eṣa u eva brahmaṇaspatiḥ/ vāg vai brahma tasyā eṣa patiḥ/ tasmād u brahmaṇaspatiḥ*; in this passage, *brahman* means *yajus*. The tenor of the passage ends with *eṣa u eva sāmna.....sāmatvam*.

Verses 301-316 explain BU 1.3.22.

सेति वाचोऽभिधानं स्यादमः प्राणाभिधा तथा ॥

सामोभयं समुदितं गुणप्राधान्यरूपतः ॥ ३०१ ॥

एकार्थवृत्तिता यस्मात्तेनैकवचनं कृतम् ॥

शब्दयोः सामयोस्तस्मात्प्राणः सामाभिधीयते ॥ ३०२ ॥

[Prāṇa is of the nature of Śāman.]

sā is¹ the name of speech; in the same way, *ama* is the name of Prāṇa. Then the two (viz. *sā* and *ama*), uttered together, are, on account of the prominence of their quality (of creating), 'Śāman'.² [301]

And since (there is in them) the capacity to function (together) for conveying a unitary sense, therefore, (the compound of) the two words *sā* and *ama* is made into (*sāma*) expressive of one (individual). (It is) for this reason that Prāṇa is called 'Śāman'. [302]

¹*syāt*=*asti*, but it is literally 'would be', Sureśvara has used this word in this sense earlier also.

²Though this is *Sāma*, the verse uses the neutre form 'Śāman'.

इतरस्यापि सामत्वं प्राणनिर्वर्त्यतो मतम् ॥

प्राण एव ततः साम युक्तो वागुपसर्जनः ॥ ३०३ ॥

The character of being *Sāman* of the other¹ is also accepted because it is brought about by Prāṇa. Therefore, Prāṇa himself is *Sāman* (and thus) it is reasonable to mention it as accompanied by the modifier, 'Vāc'². [303]

That is to say: Since a *Sāman* can exist depending upon Prāṇa, the latter can be called *Sāman*.

¹The word 'other' refers to Prāṇa and that is other than the song (*gīti*). Cp. the Mīmāṃsā rule: *gītiṣu sāmākhyā* (*Mīmāṃsā Sūtra* 2.1.36).

²This is the metaphorical use of the word Prāṇa, i.e. not in its primary sense: '*mukhya prāṇa*', but in the secondary sense: *vāgyukta prāṇa*. SP points to the example *mañcāḥ krośanti* which means *mañcasthāḥ krośanti*. Those who occupy the bedsteads, viz. the children, are the principally intended subject, yet the secondarily intended bedsteads stand for them.

निःशेषभूतसाम्याद्वा साम प्राणोऽभिधीयते ॥

प्रत्यगज्ञानहेतुत्वात्तज्जस्यानन्त्यमुच्यते ॥ ३०४ ॥

Or¹, Prāṇa is called *sāma* because of its being the same (or, similar)² to all the beings without exception. This infinity (in respect of the number) of what is produced from Prāṇa is stated on account of the ignorance about (the nature) of the inner self. [304]

¹It shows an additional explanation, on the basis of the Upaniṣad: *yad v eva samaḥ pluṣiṇā samo maśakena...*

²By this is meant 'similar in size'. Cf. the next verse. Or perhaps the following grammatical explanation is meant: *sama eva sāmaḥ* (like *prajña eva prājñah*).

अतिसूक्ष्मशरीरा हि पुत्तिका प्लुषिरुच्यते ॥
पुत्तिकादिशरीरेण समः प्राणस्तदाश्रयात् ॥ ३०५ ॥

Indeed an ant, which has a very small body, is called *pluṣi* 'a gnat' (and) Prāṇa, because it can reside in it, is similar (in size) to the body of a gnat etc.¹ [305]

¹This supports the suggestion above that Sureśvara has in mind the grammatical explanation *sama eva sāmaḥ*.

मशकेभविराड्देहैः समः प्राणो यथोदितः ॥
तथा हैरण्यगर्भेण लिङ्गात्मा सम एव तु ॥ ३०६ ॥

As Prāṇa has been described in the Śruti (to be) similar (in size) to (the bodies of) a gnat, an elephant and the Virāj, so is Prāṇa known to have the most subtle manifest from, viz. that of Hiraṇyagarbha. [306]

This stresses the fact that Prāṇa is both *kriyāśaktimat* and *jñānaśaktimat*.

वाय्वात्मनि समाप्तत्वात्करणानामशेषतः ॥
सर्वदेहसमत्वं स्यात्प्राणिकर्मानुरूपतः ॥ ३०७ ॥

Since there has been a fulfilment (of the functions) of all the organs, without exception, on account of Ātman in the form of the wind (in the body), therefore, (Prāṇa has)

similarity (in size) with all bodies, according to the deeds of (those) beings (in their previous lives). [307]

प्रतिप्राणिपरिच्छेदो ज्ञानकर्मानुरोधतः ॥

धर्माधर्मानपेक्षः सन्नानन्त्येनावतिष्ठते ॥ ३०८ ॥

The (defined or limited) dimension (of the body) of each being is in accordance with the knowledge and activity (of the self residing in it in an earlier life). Therefore, Prāṇa exists in infinite number (of them) irrespective of (their) merit and demerit. [308]

साम्न आप्नोति सायुज्यमैकात्म्यं प्राणरूपताम् ॥

समानलोकतानेन सालोक्यमिति शब्दते ॥ ३०९ ॥

It is said (in the Śruti) that one obtains through a Sāman union (with Prāṇa), oneness (with it), viz. the nature of Prāṇa; this is belonging to the same region as of Prāṇa, that means being in the same world as that of Prāṇa. [309]

The world would comprise multiplicity of forms. This indicates the existence of different products/transformations of Prāṇa together with it.

विकल्पासंश्रवाद्विद्वानश्रुतेस्तः फलद्वयम् ॥

वैचित्र्याद्भावनादेर्वा त्रिविधं फलमुच्यते ॥ ३१० ॥

Therefore, owing to the non-mention of any further division,¹ there is only the twofold reward.² But, on account of the variety of the impulse to activity etc., the same is described as threefold.³ [310]

¹Basic division (*bheda*) is Prāṇa(= Hiraṇyagarbha) and individuals, and there is no further mention of anything beyond Prāṇa and its products/transformation, the individuals.

²They are Sāyujya and Sārūpya.

³This reference (as the third) is to Sālokya in the preceding verse.

भूयोल्पीयःफलत्वं चेत्तुल्यसाधनयोर्न तत् ॥

योगैश्वर्यात्समा सिद्धिः कालादेरीश्वराद्यतः ॥ ३११ ॥

(If someone would argue:) ‘In the case of the two causes¹ which are equal, would not there result the state that there are greater and smaller reward?’. (To this our answer is:) ‘It is not so, because the reward is equal on account of the excellence of Yoga,² as coming from the Lord, the beginning³ of time’.

[311]

¹It means ‘knowledge and activity’.

²It means: ‘which stands for knowledge and activity functioning: together’.

³Could the word *kālādi* be alternatively translated as ‘coming from Time, the first (of life), i.e. the Lord, viz. Hiraṇyagarbha’?

एकमेव जगद्वीजमीशाभिप्रायाहेतुतः ॥

भूरिनानाप्रभेदेन प्रत्यात्मं व्यवतिष्ठते ॥ ३१२ ॥

Only one seed (i.e. cause) of this world abides in each of the bodies¹ in the numerous and various forms (in the same), owing to the (varied) intention of the Lord.²

[312]

This explains the idea of *samānalokatā* mentioned in verse 309 above.

¹Or (better) alternatively ‘in each individual self’.

²Or alternatively, as SP and NKL state, ‘on account of the (various) appearance of the Lord’.

कुर्यान्मेरावणुधियमणौ मेरुधियं तथा ॥

सर्वत्राप्रतिघात्येव प्रत्यगज्ञो महेश्वरः ॥ ३१३ ॥

As one (who is ignorant) would entertain the notion of an atom in the case of Mt. Meru or the notion of Mt. Meru in the case of an atom, (so also) the great Lord (Prāṇa), though everywhere unobstructed, is (in that embodied state) ignorant of (itself as) the inner self.

[313]

This explains how variety in the world exists through *Māyā*, the Lord remaining unchanged.

अतत्त्वज्ञस्य तमसो रज्ज्वज्ञानोरगादिवत् ॥
अष्टावस्थाप्रभेदेन मिथ्याज्ञानं प्रजायते ॥ ३१४ ॥

In the case of that one, who does not know the true nature (of the self within), there arises, owing to ignorance, false knowledge, (which one is) in the variety of eight states,¹ like the knowledge (that there is a) serpent etc. from the ignorance about (a real) rope (etc.) [314]

This verse continues the thought of *pratyagajñā* in the preceding verse.

¹According to the editor of NKL, these eight states are: *śarīra, indriya, manas, buddhi, viśaya, virāj, sūtra* and *antaryāmin*. In SP, these are mentioned as: *piṇḍa jāti, virāj, sūtra, daiva, avyākṛta, antaryāmin* and *sākṣin*.

प्रत्यगज्ञानविध्वस्तौ रज्ज्वज्ञानहताविव ॥
तत्कल्पितनिवृत्तिः स्यादष्टावस्थस्य बोधतः ॥ ३१५ ॥

When the ignorance about (the true nature of) the inner self is destroyed thanks to the knowledge about the one having eight states, there is removal of (the awareness of) whatever is imagined (as the modification) of it, just as (the cognition of a serpent arising from a rope is struck down) when the ignorance about the (true) rope is removed. [315]

अनात्मवस्तु सकलं प्रत्यगज्ञानहेतुजम् ॥
यथा तथोत्तरत्रापि युक्तिभिश्चाभिधास्यते ॥ ३१६ ॥

As (is said here) all the non-Ātman (i.e. the world) is born of the ignorance (on the part of an individual) about (the true nature) of the inner self, so also will it be explained in later portion, and with reasons. [316]

There is reference to SV, where Śruti and reasoning are used for proving *anātmajñāna* as *pratyagajñānaja*. In the Śruti passage, *tadd hedam...*, the same mode of reasoning is employed.

Verses 317-320 explain BU 1.3.20.

औद्गात्रमेव चोद्गीथो भक्तिर्वा काचिदिष्यताम् ॥
प्रसिद्धेरिति चेन्मैवमुद्गीथो ह्यसुरेव तु ॥ ३१७ ॥

[Prāṇa is the Udgītha.]

(If one were to say: 'Tell us) if the Udgītha should be taken as only the activity of the Udgātr priest or as any one of the divisions of the Udgītha song, because it is so known.'. (Our answer is:) 'Let it not be so¹ (understood); the Udgītha is indeed only Prāṇa.' [317]

¹It means: 'let it not be in two ways'.

उपसर्ग उदित्येष स चात्यन्तक्रियाश्रितः ॥
संयोज्य क्रियायास्तत् व्याचष्टे श्रुतिरञ्जसा ॥ ३१८ ॥

This *ut* (element in the word *udgītha*,) is a preposition and it is connected with a vigorous action. Therefore, the Śruti, after connecting (it) with (the verb expressive of) action, has explained it smoothly (clearly). [318]

उत्तब्धं विधूतं यस्मात्प्राणेन जगदित्वरम् ॥
उत्प्राणोऽतः प्रसिद्धस्तु गुणादुद्गीथ उच्यते ॥ ३१९ ॥

Since this flitting world is supported, i.e. held up, by Prāṇa, therefore *ut* has become known as Prāṇa and (*tu*) is on account of (this) property, called Udgītha. [319]

NKL and the text of BUBV with NKL read *prasiddhiḥ* for *prasiddhaḥ*! In that case, the translation could be: '...*ut* is Prāṇa; the (commonly) accepted (knowledge about is:), owing to its excellence, it is called Udgītha.' Not a satisfactory reading!

अनया गीयते यस्माद्गीथा वाक्तेन भण्यते ॥
उच्च गीथा च तद्योगादुद्गीथ इति शब्द्यते ॥ ३२० ॥

Since (the song) is sung by this (speech), therefore speech is called Gīthā. (Thus there are these two words) *ut* and

gīthā and by the joining of them there is uttered the word *udgītha*.¹ [320]

¹Sureśvara derives the word *udgītha* from *ut*+*gīthā*.

Verses 321-322 explain BU 1.3.24: *tadd hāpi...*

उद्गाता नैमिषीयाणामयास्योपासनादभूत् ॥
अयास्यनामा सोऽगायद्वाचा प्राणप्रधानया ॥ ३२१ ॥

(Some Ṛṣi) Ayāśya by name became, on account of his worship of Ayāśya (Prāṇa), the Udgātr of the dwellers of Naimiṣa¹ forest; he sang (the Sāmans) by his speech devoted to Prāṇa. [321]

¹NKL edition reads *naimiaśa*! Not so in verse 328 below.

बृहस्पत्यादिभिर्धर्मैरुपास्यानमनो भवेत् ॥
भावनोत्कर्षतोऽतोऽयं विचारस्तं प्रतीष्यते ॥ ३२२ ॥

One would become mindful of Prāṇa after having worshipped Prāṇa with its appellations Bṛhaspati etc. Therefore, on account of the excellence of devotion (*bhāvanā*), this (=the following) thought about it is discussed (hereafter).¹ [322]

¹SP adds: *śastrārthadārḍhyārtham*.

हृदयेनाभिसंबन्धाद्देवतात्र प्रजापतिः ॥
उद्गीथदेवतेहास्तु सविता वा मनःश्रितः ॥ ३२३ ॥
वागीश्वरत्वादिन्द्रो वा यदि वा वर्णदेवता ॥
पदवाक्यस्वरस्थाननादादिविषयापि वा ॥ ३२४ ॥

(One might say:) 'Because there is a connection of the heart (with this activity of the Udgātr), therefore, the deity here (would be) Prajāpati. Or, let the deity of the Udgītha be Savitr who rests in the mind.' [323]

'Or, (may the deity be) Indra, because he is the Lord of speech.

Or, (may the deity be) that of each of the letter, the word,

the sentence, the accent, and the place of articulation, and sound etc.¹. [324]

These two verses refer to different views about 'who is the deity of the Udgītha?. These are the different deities: Prajāpati, Savitr (=the Moon; cf. SP and NKL), Indra (refer to verse 265 above) and other linguistic features.

¹The word *ādi* at the end refers *sūkta*, *prakaraṇa* and *kāṇḍa* etc.

एवं विप्रतिपक्षेषु नानावादिषु निश्चितः ॥
 प्राणप्रधानया वाचा ह्यास्यास्योजायदित्यतः ॥
 ब्रह्मदत्तश्चकारोच्चैः शपथं वादिनः प्रति ॥ ३२५ ॥
 यदितोऽनप्रधानाया वाचो ह्यन्येन केनचित् ॥
 देवान्तरेण सोजायदयास्यः प्राणविग्रहः ॥ ३२६ ॥
 सर्वप्रमाणभूतोऽभूदुद्गाता सत्रिणां पुरा ॥
 विसंवादस्त्वभूत्तेषामुद्दिश्योद्गीथदेवताम् ॥ ३२७ ॥

When there are thus variously speaking opponents; (Brahmadatta) was decided as to that; since Ayāśya, with his speech devoted to Prāṇa, sang aloud. Therefore, he loudly announced this (i.e. he is Ayāśya Prāṇa) with an oath to those who held a contrary view [325]

(thus:) 'If he, Ayāśya, in the form of Prāṇa, recited the song through a deity other than speech, which was devoted to Prāṇa¹— [326]

There was, formerly, for the sacrificers (of Naimiṣa forest) an Udgātr priest, (who was) accepted by all (of them) as the authority, (and yet) there arose a dispute among them as regards the deity of the Udgītha.² [327]

¹This is to be connected with (i) verse 328 below and (ii) the principal clause in verse 329 below, though some details of the narrative intervene between this line and the principal clause.

²This verse should really serve as introductory to verse 324 above.

उद्गाता नैमिषीयाणां मदभ्युपगताद्यदि ॥
 प्राणवाग्द्वयोऽन्येन देवेनासौ प्रयत्नवान् ॥ ३२८ ॥

उदगायत्तदा सोमो भक्ष्यमाणः शिरो मम ॥

मिथ्याभिवादिनः साक्षाद्विपातयतु सत्वरः ॥ ३२६ ॥

‘If, for the dwellers of the Naimiṣa (forest), an Udgātṛ (other) than the one known to me (viz. Ayāśya), exerting, sang through a deity other than the pair of Prāṇa and speech,¹ [328]

then may this Soma, which I am drinking, (itself), hastening, cut off the head of me who am speaking untruth.’. [329]

¹This is the restatement of the contents of verse 326.

श्रुतिः समर्थयामास वाचेति शपथक्रियाम् ॥

शपथस्यापि मानत्वमस्मादेव तु कारणात् ॥ ३३० ॥

The Śruti has justified this announcement with an oath (of Brahmadatta) by the word *vācā* ‘through speech’; therefore, just for this reason, an oath also can be an authoritative means (even today).¹ [330]

¹This is, in a way, an expression of what is known as Bandhutā philosophy of the Brāhmaṇas adopted by Sureśvara in his explanation of the narrative. Cf. SP for a little longer discussion on an oath as an authoritative means of knowing or ascertaining the truth, based on *Mīmāṃsā Sūtra* 1.3.1-2; 15-16.

वाचः प्राणस्य च यत उद्गीथे व्यापृतिः स्फुटा ॥

प्राधान्येन तदन्येषां न तथा लक्ष्यते सदा ॥ ३३१ ॥

Since the functioning (lit. activity) of speech and Prāṇa (together) is ever clearly visible as the predominant, therefore, (the activity) of others¹ is not noticed in a similar way. [331]

¹It means ‘organs and their superintending deities’.

आकृत्यर्थाभिसंबन्धादभिधानस्य न श्रुतेः ॥

ब्रह्मदत्ताभिसंबन्धादनित्यत्वं प्रसज्यते ॥ ३३२ ॥

Since a name has connection only with the shape (of what is named), therefore, (in the narrative of Brahmadatta),

there does not forcefully follow the contingency of impermanence (i.e. unauthoritativeness) (in respect) of the Śruti (statement) on account of¹ its connection with Brahmadata. [332]

This is in answer to the implied objection: 'Since Brahmadata is, like us human beings, liable to perish, the statement of the Śruti about his doing, viz. announcing with an oath, is not authoritative.' Cf. *Mīmāṃsā Sūtra* 1.3.33: *ākṛtis tu kriyārthatvāt* '(a name mentioned conveys) the shape only (of an individual), and nothing else' ('nothing' includes the name also!), for that serves the purpose of *kriyā* 'what is to be done'—Sureśvara bases his answer on this. [For relevant details on the application of the Mīmāṃsā rule, cf. SP].

¹That is, though it has connection...

Verses 333-338 explain BU 1.3.25.

उद्गीथदेवतामेवं परीक्ष्याथाधुना श्रुतिः ॥
स्वादिधर्माभिसंबन्धं प्रचक्राम प्रभाषितुम् ॥ ३३३ ॥

Having thus fully considered¹ (as to who is) the deity of the Udgītha, the Śruti now proceeds to explain the relation (of the sacrificer) to (him, who is) his own beginning (i.e. Prāṇa)². [333]

¹It literally means 'examined'.

²*svādi* = *syasya ādi*; cf. *kālādi* in verse 311 above (one of the alternative explanations).

याजमानमिदं ज्ञानं स्वादेः प्राग्यत्समीरितम् ॥
पञ्चमाद्युक्तिदृष्ट्यास्य ह्येकवाक्यत्वहेतुतः ॥ ३३४ ॥

What has been stated before, viz. this worship¹ (offered) by the sacrificers, is the knowledge of his own beginning (viz. Prāṇa)², because it forms unity (of sense) of the statement with what is stated in the beginning of the fifth chapter.³ [334]

¹It means *jñāna* (of the Ātman) and (also) *viññāna* (of the procedure of ritual service) in this context; this is *upāsanā*; cf. note 1 by the editor of NKL (p. 131) *atra praghaṭṭake jñanaviññānaśabdau upāsanaparau vācyau*.

²Cf. the word *svādi* (and note thereon) in the preceding verse.

³This is traditional reference to BU ch. 3. This is to say that the sentence *kena yajamāno mṛtyor āptim atimucyate* (BU 3.1.3) has connection with *yajamāna* and the meaning is: 'worship offered by a sacrificer'.

स्वमुवर्णप्रतिष्ठाधीरुद्गातुरिति गम्यते ॥

ऋत्विङनामाभिसंबन्धान्न त्वसौ यजमानगा ॥ ३३५ ॥

It is understood that the property,¹ (viz.) gold, steadiness, and intelligence belong to (i.e. are obtained by) the Udgātr; and² not³ to the sacrificer, because of its connection with the name of the *rtvij*.⁴ [335]

¹It literally means 'his own (belongings)'.

²The word *tu* is understood in the sense of *ca*.

³Cryptic for 'it does not go'.

⁴Namely, the Udgātr, this is understood from *tasmād ārvijyām kariṣyan*.

एष एवंविदुद्गातेत्यमुतो लिङ्गतो भवेत् ॥

उद्गातुरपि विज्ञानं दृष्टार्थत्वाच्च कारणात् ॥ ३३६ ॥

From this indication, viz. *eṣa evaṁvid udgātā*, follows that the worship¹ is by the Udgātr, also (it is his) for the reason, viz. the purpose, (already) seen. [336]

¹This is for *viññāna* 'knowledge of the procedure of worship, viz. ritual'; cf. note 1 on verse 334 above.

कर्त्राश्रितं स्वं विज्ञेयं माधुर्यादीह सामनि ॥

यतस्तद्धनवत्तस्मात्स्वरार्थं यत्नमाचरेत् ॥ ३३७ ॥

Since the sweetness etc. in the Sāman (in the Udgāna¹) is to be known as his own (wealth²), (and) that (Sāman) is

full of riches,³ therefore, (the Udgātr) should make an effort for (uttering) that sound. [337]

¹This is meant by the word *iha*.

²It means 'the property belonging to the agent'.

³Cf. SP: *tat sāma sausvaryopetaṁ dhanavad bhūṣitam rddhimat*.

धनवन्तं यथा यत्नाद्दृक्षन्तीह संघशः ॥

तथा यत्नात्समीक्षन्ते स्वरसंपत्समन्वितम् ॥ ३३८ ॥

As, in this world, people, in flocks, wish to see with effort¹ someone possessed of wealth, similarly,² they³ see with effort¹ him who is possessed of the wealth of speech.⁴ [338]

¹It means 'being devoted to'.

²But read SP on *tathā*: *athośabdo yathārthaḥ*. Further, SP adds, after *yathārthaḥ*, *tasmācchabdas tathārthaḥ*. Should this indicate that SP reads the first line as *dhanavantam atho yatnād...*?

³Namely, sacrificers.

⁴This is Udgātr who can sing sweet Sāman(s).

Verses 339-344 explain BU 1.3.26.

बाह्यवित्तेन संबन्धमुक्त्वाथान्तर्धनात्मना ॥

संबन्धं वक्तुकामेयं प्रचक्रामोत्तरा श्रुतिः ॥ ३३९ ॥

Having (thus) stated the relation (of the Udgātr or Prāṇa) to the external wealth, this subsequent Śruti has now proceeded with a desire to state the relation (of the same) to the internal wealth. [339]

बाह्योऽस्य धर्मः सौस्वर्यं सौवर्ण्यं त्वान्तरं धनम् ॥

तदन्तरतमोऽनस्य प्रतिष्ठागुण उच्यते ॥ ३४० ॥

Sweetness (of pronunciation) is the external property and the richness of good syllables, (viz. the pronunciation of good syllables), the internal property of this one (i.e. the Udgātr, Prāṇa). However, for Prāṇa, the property of steadiness is the innermost (as compared to them).¹ [340]

¹Namely, *sausvarya* and *sauvarṇya*.

जिह्वामूलीयकादीनि ह्यष्टौ स्थानानि वागिह ॥
गानप्रतिष्ठाहेतुत्वाद्धीति हेतुवचस्तथा ॥ ३४१ ॥

Here¹ speech means the eight places (of articulation), the root of the tongue etc.² themselves (*hi*), on account of their being the cause of the steadiness of the (Sāman-)song. And *hi* in the (Śruti) statement is expressive of the cause (viz. the steadiness). [341]

¹That is, in the Śruti sentence under discussion.

²The word 'etc.' refers to *uras*, *śiras*, *kaṇṭha*, *danta*, *oṣṭha*, *nāsikā* and *tālu*.

अन्नप्रतिष्ठमागानमेक आहुर्विपश्चितः ॥
अनिषेधाद्द्वयोरेका प्रतिष्ठेहावसीयताम् ॥ ३४२ ॥

Some learned men have declared that singing (of the Sāman) is steady in food.¹ (However) let this be concluded here that there is here² the one basis of the two,³ since there is no rejection (of it). [342]

¹That means 'steady on account of it'.

²That is, in Prāṇa.

³It means *anna* and *āgāna*.

अन्नस्य परिणामेऽनः स्थितो गीतित्वमेति हि ॥
अनप्रतिष्ठा देहोऽतः श्रुत्येह प्रतिपाद्यते ॥ ३४३ ॥

Indeed Prāṇa becomes the (Sāman-)song when it becomes steady in the digested form of food, therefore; (thus) it is declared by the Śruti here that the body is the basis for Prāṇa. [343]

उपासनं विकल्पेन वागन्नाख्यप्रतिष्ठयोः ॥
वाक्प्रतिष्ठमुपासीत यदि वाग्नप्रतिष्ठितम् ॥ ३४४ ॥

(Therefore) the worship prescribed here is alternatively of

the two which have their bases in what are called speech and food; (that is to say:) one may worship Prāṇa resting in speech or Prāṇa resting in food. [344]

Verses 345-377 explain BU 1-3-28: explanation of Abhyāroha-japa and the meanings of its Mantras.

यदर्थमतियत्नेन महिमानस्य कीर्तितः ॥
अभ्यारोहजपः सोऽथ प्राप्तावसर उच्यते ॥ ३४५ ॥

Now, as there is occasion for it,¹ (here) is stated that Abhyārohajapa with reference to which the greatness of Prāṇa has been so far stated with great effort. [345]

There is reference to the sentence *athātaḥ pavamānānām...*
¹This is meant by the word *atha*.

यथोक्तज्ञानवत्तायामिदं कर्म विधिस्त्यते ॥
कात्स्न्येन तस्य चोक्तत्वादतस्तदभिधीयते ॥ ३४६ ॥

This (ritual) activity will be described (in the following) when (one is) in possession of the knowledge as stated (before). And since it is (earlier) described in its fullness, therefore, that is (now) discussed (hereafter)¹. [346]

¹This is meant by the word *ataḥ*.

एवं विद्वत्प्रयोज्यत्वादत एव न सूत्रितम् ॥
नित्यकर्मैव सूत्रेषु तेन विद्वत्प्रयोज्यता ॥ ३४७ ॥

Only, therefore, it is not mentioned in the Sūtra texts, in the same way as an obligatory rite (is not mentioned), since it is prescribed for one who has thus known; hence the nature of it as what is prescribed for the knower.¹ [347]

¹That is, as optional, or not invariable.

उद्गीथलिङ्गसंयोगाद्गानमात्रेऽस्य शक्तिः ॥
नियमोऽस्यैवकारेण पवमानेषु कथ्यते ॥ ३४८ ॥

Since this one¹ has potence (or capacity) in respect only of the singing (of the Udgītha part of the Sāman-)song on account of its² association (lit. connection) with the characteristics³ of the Udgītha, therefore there is stated a restriction⁴ of it in relation to the Pavamāna Stotras, by the word *eva*.⁵ [348]

This is the significance of *pavamānānām*.

¹That is, Abhyāroha-japa.

²It means 'the association of the prescription of Abhyāroha-japa'.

³Refer to *udghītena atyayāma*. This is indicative of the relation of the Abhyāroha-japa to the Udgītha.

⁴This is in point of time, that is to say: It should be recited only at the time of singing the Pavamāna Stotras.

⁵If such a restriction was not stated, one could understand that the Udgāna 'loud singing' would be necessary at the time of (all Parts of Sāman:) Udgītha, Pratihāra Prastāva etc.

ततोऽपि कालसंकोचं स वा इत्यादिनावदत् ॥

प्रस्तोता प्रस्तुयाद्यत्र तदैतानि जपेदिति ॥ ३४६ ॥

And, yet further, the Śruti mentioned a restriction in respect of time¹ in the passage beginning with *sa vai*...and ending in *prastotā...japet*. [349]

This refers to the purpose of the sentence *sa vai khalu....*

¹Cf. note 4 on the preceding verse.

एतानीति च निर्देशाद्यजूंषीत्यवगम्यते ॥

श्रुतावेव च दृष्टत्वात्स्वरः शातपथो जपे ॥ ३५० ॥

And from the use of the word *etāni* it is understood that the *yajus* (formulas) are also (to be recited). And, since this is seen only in the Śruti, therefore, the accent in the recitation (of the Abhyāroha-japa Mantra) should be that seen in the *Śathapatha Brāhmaṇa*.¹ [350]

¹Though there is a reference to a Mantra, one should recite

in accordance with the rules of accent of the Śatapatha Brāhmaṇa whose concluding portion is BU. The Samhitā accent should not be followed.

जपकर्माभिधा चेयमभ्यारोह इतीष्यते ॥

यौगिकी चाभिधा ज्ञेया क्रियायोगस्य संभवात् ॥ ३५१ ॥

And, this mention of the act of recitation is known as Abhyārohajapa; this name is, it should be remembered (lit. known), one based on etymology, for it is possible to connect it (i.e. the etymology) with action. [351]

हित्वाध्यात्मपरिच्छेदं देवं बीजमतः परम् ॥

अभ्यारोहत्यनेनातो ह्यभ्यारोहो जपः स्मृतः ॥ ३५२ ॥

(To explain the above:) Having thrown away the limitation of the body, (the worshipper) thereafter rises to (the status of) the cause (lit. seed) of the divine (form), by means of this (Mantra); therefore,¹ the recitation (of it) is called Abhyārohajapa. [352]

¹That is, on account of this explanation of the etymology.

तिरोहितार्थरूपत्वान्मन्त्राणां न नृधीगतिः ॥

मन्त्रार्थं स्वयमेवातो व्याचष्टे श्रुतिरञ्जसा ॥ ३५३ ॥

Since the Mantras are of such nature that they have a meaning-form which is concealed, therefore, there is no approach to them for human intellect.¹ Therefore, the Śruti itself clearly explained the meaning of that Mantra. [353]

¹This is a general statement about the Mantras and, therefore, the second line justifies the name and significance of the Abhyārohajapa.

पूर्वं पदार्थान्वयाख्याय पश्चाद्वाक्यार्थमब्रवीत् ॥

फलं पश्चाद्यथोक्तस्येत्येष व्याख्याक्रमः श्रुतेः ॥ ३५४ ॥

Having first explained the meanings of the words, it later declared the meaning(s) of sentence(s); then (it stated) the

reward of what was explained—this is the order of (the items in) the explanation given in the Śruti. [354]

यत्स्यात्स्वाभाविकं ज्ञानं यच्च कर्म स्वभावजम् ॥
तदधःपातहेतुत्वान्मन्त्रेऽसदिति भण्यते ॥ ३५५ ॥

Whatever might be the natural¹ knowledge and whatever, the natural¹ activity (for one), they are, owing to being the cause of one's fall; stated in the Śruti Mantra² as *asat*. [355]

This verse explains the purpose of the use of the word *asat* in the Abhyārohaṇa.

¹That is *svabhāvataḥ prāpta (-jñāta)*; not *śāstrataḥ jñāta*.

²In the Mantra: *asato mā sad gamaya*.

सदेवभावहेतुत्वाच्छास्त्रीये ज्ञानकर्मणी ॥
सत्पदेनाभिधीयेते मन्त्रेऽस्मिन्प्राग्यथोदिते ॥ ३५६ ॥

Since knowledge and ritual activity, prescribed or declared in the Śruti, have *sat* as the cause for their rise to the (eternal) state of the divine being, (therefore), the two, as explained before, are mentioned in this Mantra by the word *sat*. [356]

असन्मृत्युस्तथोर्ज्ञेयः पूर्वयोर्मृत्युहेतुतः ॥
अमृतं मृत्युघातित्वाच्छास्त्रीये ज्ञानकर्मणी ॥ ३५७ ॥

asat should be understood (in the sense of) the death of the first two,¹ because it is the cause of the death for one (in the world), and knowledge and ritual activity, which are prescribed in the Śāstra, (are to be understood as) imperishable, because they avert (lit. destroy) death. [357]

¹These are *aśāstriya*, i.e. *svabhāvataḥ prāptejñānakrmanī*; cf. *āsurañjñānakarmans* mentioned in just the next verse.

आसुरज्ञानकर्मभ्यां मां व्युत्थाप्याथ तज्जिते ॥
गमयाशु ततो दैवे शास्त्रीये ज्ञानकर्मणी ॥ ३५८ ॥

Having raised me up above the demoniac knowledge and activity, then, by the victory over them, reach me quickly (away from them) unto the divine knowledge and activity, which are prescribed by the Śruti. [358]

This is the meaning/paraphrase of the Abhyārohajapa-Mantra.

मन्त्रार्थं यत्नमाहाथ ह्यमृतं मामिति श्रुतिः ॥
द्वितीयमन्त्रानूक्तिः स्यात्तमसो मेत्युदीरणम् ॥ ३५६ ॥

The Śruti *amṛtam mām* (for *mā*) has stated the specific (purpose) in (i.e. of) the meaning of the Mantra. (And) the statement *tamaso mā...* should be understood as a re-statement (in the explanation) of the earlier Mantra. [359]

आपेक्षिकत्वान्यृत्युः स्याच्छास्त्रीये ज्ञानकर्मणी ॥
स्वार्थं फलमपेक्ष्यैते परार्थत्वात्तमो मते ॥ ३६० ॥

Knowledge and activity, prescribed in the Śruti, would be (i.e. would result into) death (for one), since they are rooted in some desire(s). Since these two (viz. the knowledge and activity prescribed in the Śāstra) serve (now as a means) to the acquisition of the highest,¹ (only) after they have first expected² their own result, they are considered to be darkness.³ [360]

¹The knowledge of Prāṇa or Ātman.

²That is, secured.

³Namely, ignorance.

साधनात्तमसो मां त्वं ज्योतिः साध्यं नयामृतम् ॥
फलाप्त्यैव तमोर्ध्वंसादमृतं मेत्यतोऽवदत् ॥ ३६१ ॥

Therefore (the Śruti) stated: From the means, the darkness, do you lead me to the goal, the imperishable lustre by securing for me the fruit, by destroying the darkness. [361]

पूर्वयोर्मन्त्रयोर्योऽर्थो विस्तरेणोदितः पुनः ॥
मन्त्रेण स तृतीयेन संक्षेपेणाभिधीयते ॥ ३६२ ॥

The meaning of the first two Mantras which is stated in the Śruti at length is again stated in brief by the third Mantra. [362]

This re-statement of a thought, in brief, should not be taken as repetition. This holds good in respect of verse 359 which is a re-statement of what is stated in 356 above. Such is the procedure of the Śruti followed by later writers of Śāstra—cf. SP: *ata eva hi saṁgrahavivaraṇarūpaṁ grantham āracayanti śāstrakṛtaḥ*.

प्रसङ्गमुत्तरे मन्त्रे पूर्वयोरिव वीक्ष्य हि ॥

तिरोहितार्थतामाह नात्रेत्यादिवचः श्रुतिः ॥ ३६३ ॥

Having seen that, in the case of the subsequent (i.e. the third) Mantra, there would be a contingency, viz. the obscurity of its meaning, as in the case of the two previous (Mantras), the Śruti states the words *na atra...* [363]

यथाप्रार्थितमागाय याजमानं फलं परम् ॥

त्रिष्वेव पवमानेषु यथा वागादिभिः पुरा ॥ ३६४ ॥

After having first sung only three Pavamāna (Stotras), according to the request (by the sacrificer¹), the highest (as the) reward for the sacrificer,² as did Speech and others in former times, [364]

The paraphrase in SP and NKL shows that they regard this verse as difficultly worded.

¹The compound *yathāprārthitam* is *sāpekṣa samāsa*, therefore *yajamānena* has to be supplied.

²The word *yājamāna* is understood as *yajamānāya phaladam*.

अथ यानीतराणीति ह्युद्गातान्नाद्यमात्मने ॥

आगायेद्वचनात्कर्तुः कामयोगोऽपि गम्यते ॥ ३६५ ॥

‘Let the singer (now) sing *yānitarāṇi* ‘which are others’,¹ (viz. resulting in) food and the eatable for his own sake.² (Here) from the mention of the agent is understood also his connection with a desire. [365]

This verse explains *atha yānītarāṇi stotrāṇi* (BU 1.3.28).

¹i.e. remaining verses.

²Read SP: *yājamānam pavamāneṣūdḡānam ārtvijyam anyatrety arthah/ āgānasya dvaividhyaprasiddhyartho hiśabdah.*

कस्मादात्मन आगायेदिति हेतुरिहोच्यते ॥

यस्मात्स एष एवंविदुद्गातातोऽन एव सः ॥ ३६६ ॥

Now here is stated the reason as to why he should sing for himself: Since the one who is that (viz. the singer), viz. a knower of such (nature of the Udgāna), therefore, he is Prāṇa himself. [366]

Sureśvara refers to BU: *sa eṣa evamvid...* in accordance with the maxim, *pragīta-mantrasādhyagunabuddhistotram arthāc ca* (SP).

अतोऽलमात्मने कामानागातुं स्वामिने तथा ॥

यस्मादीश्वर उद्गाता कामावाप्तावतः शुभम् ॥ ३६७ ॥

तस्मात्तेषु वरं कामं यजमानो यथारुचि ॥

नवसूद्गीयमानेषु तं वृणीताविचारयन् ॥ ३६८ ॥

Therefore, he is capable to sing for himself as also for his (worldly) master; since the singer (of the Sāman) is the Lord in respect of obtaining the reward, therefore from him (comes) the auspicious (reward). [367]

Therefore, may the sacrificer choose without any hesitation whatever excellent desire, as he likes, while the (other) nine (prayers) are being sung. [368]

प्रयोगानुगमे चैतद्दर्शनं येन चोद्यते ॥ ३६९ ॥

तस्मात्स्याद्देवतावाप्तिर्ज्ञानिकर्मसमुच्चयात् ॥

तस्मान्न काचिदाशङ्का कर्मिणं प्रति विद्यते ॥ ३७० ॥

[Here is the explanation of *evam tāvad...* (BUB p. 87)]

And since¹ this worship (*darśana*) is enjoined in respect of the performance (of the Jyotiṣtoma sacrifice), [369]

therefore, there would be the attainment of (the nature of) the deity, through the combination of knowledge and ritual activity. As such, there is not (to be entertained) any doubt as regards the one who performs the rite.² [370]

¹It literally means 'by which'.

²That is to say: as regards his attainment of the nature of the deity.

कर्महीनेऽपि विदुषि स्यान्न वेत्यतिशङ्क्यते ॥
तदाशङ्कापनुत्त्यर्थं तद्वैतदिति हि श्रुतिः ॥ ३७१ ॥

It is (now) doubted further, whether (the attainment of the reward) would be possible in the case of one who knows (this importance of the Udgāna and is yet) without the performance of the ritual; therefore, for removing that doubt, indeed, proceeds the Śruti *tadd haitat...* [371]

इहैव देवभूतत्वादाशङ्का किंनिबन्धना ॥
जपकर्मानबोधाभ्यां लोकप्राप्तौ हि शङ्क्यते ॥
ज्ञानादेव भवेन्नेति तद्वैतदिति हि श्रुतिः ॥ ३७२ ॥

(The Siddhāntin asks:) 'With what basis is this doubt (entertained) when (the knower) has already become the deity here itself?'. (A possible answer to this question is:) 'Indeed, the doubt is entertained because (the Śruti has conveyed that) there is the attainment of the (higher) world by means of the recitation of the Abhyārohaṇa(-Mantra) and the knowing about the (nature of) Prāṇa.'. (But, there is this answer:) 'No. That¹ would follow merely knowledge, because the Śruti *tadd haitat...* (averts that opinion).'. [372]

¹Namely, attainment of the higher world.

जीवतो देवभूतस्य भावनोपचयात्कुतः ॥
देवावाप्तौ भवेच्छङ्का मनुष्यस्य तदाप्तिवत् ॥ ३७३ ॥

Since (it is thus clear that the singer) has become the deity on account of the increase in (his) devotion, while a man

is leading this very life, therefore, whence should there be the doubt entertained as regards his attaining the nature of the deity just as (one could entertain a doubt) as regards his attaining that.¹ [373]

¹An ardent worshipper of the Udgītha becomes in this very life one with the deity Prāṇa. Therefore, there cannot be any doubt about his final attainment (viz. *brahmajñāna=brahma-bhūtatva*). The word *tadāpti* refers to this final attainment which it is impossible for a human being to achieve so long as he remains (only) a human being. Cf. *devāpti* in the next verse.

कर्मिणोऽपि हि देवाप्तिर्ज्ञानादेव न कर्मणः ॥
समुच्चयात् तत्प्राप्तावागमादेव निश्चितिः ॥ ३७४ ॥

In the case of one who performs the ritual also, the attainment of the nature of the deity is only from knowledge but not from (mere) ritual performance. And there is (already) the decision known from, or made by, the Śruti itself as regards the attainment of that,¹ viz. (it can be) from the combination of (the two). [374]

¹It means 'the nature of the deity as stated before'.

तद्वैतप्राणविज्ञानं यथाव्याख्यातरूपकम् ॥
भवेत्लोकजिदेवेह कर्मशून्यमपि ध्रुवम् ॥ ३७५ ॥

The words *tadd haitat* (mean:) This knowledge about Prāṇa, whose nature has been thus explained, will certainly be the winner of the (higher) world¹ here,² even if it is without the performance of any ritual. [375]

¹That is, it will win for the worshipper the state of desirelessness.

²That is, in this life itself. This holds good in the case of one who has acquired that knowledge.

न हैवालोक्यतायै नुरस्याशापीह विद्यते ॥
इहैव लोकभूतत्वादप्राप्तेऽर्थे हि शङ्क्यते ॥ ३७६ ॥

Here,¹ in the case of this man there is not any hope indeed for fame, because he has in this very (world) become one with the world (beyond²). (Having a hope) can be thought of, when the end³ is not attained. [376]

¹It means 'When one has attained the knowledge of the deity, viz. Prāṇa'.

²That is, the higher world or the state of desirelessness.

³This refers to the state of oneness with Prāṇa.

इहैवासुरभावस्य प्राणोऽस्मीत्यभिमानतः ॥

प्रध्वस्तत्वात्कुतः शङ्का तन्मूलासंभवाद्भवेत् ॥ ३७७ ॥

Since, in this very life, there is the destruction of the demoniac (sort of) existence on account of the strong feeling 'I am Prāṇa', whence could there arise a doubt (regarding hope etc. as stated in the previous verse), while there cannot be its root cause? [377]

इदमत्र विचिन्त्यं स्याज्ज्ञानकर्मसमुच्चयात् ॥

देवभावः किमुद्गातुर्यजमानस्य वाथ किम् ॥ ३७८ ॥

Yet, this should be considered here (i.e. at this juncture): 'Is oneness with the deity (viz. Prāṇa), which results from the combination of knowledge and ritual activity (of the Udgāna), obtained by the Udgātr? or is it obtained by the sacrificer? [378]

Verses 379-383 are an objector's view and verse 384 disproves the same.

न समुच्चय उद्गातुः कर्माभावादिहेष्यते ॥

परकर्मप्रवेशात्स्यादुद्गाता न स्वकर्मणि ॥ ३७९ ॥

It is not held here (i.e. in this regard) that the (said) combination is possible on the part of the Udgātr, for there is absence of (his performance of) ritual activity; (the reason is:) if he had participated (lit. entered upon) an activity of another, i.e. the sacrificer, (he would not be engaged) as the Udgātr in his own activity. [379]

There is exception to the idea of the worshipper's becoming one with Prāṇa.

क्रियायोगाच्च तन्नाम्नो ज्ञानाभ्यासोऽपि दुर्लभः ॥
साक्षात्कृतिश्च संतत्या संततिश्च न विद्यते ॥ ३८० ॥

Further, owing to the association with activity of the one of that name,¹ even repeated (attempt for obtaining) knowledge is very difficult. Direct acquisition (of knowledge) results only from continuity, and this continuity² is not, however, seen here. [380]

¹That is, the Udgātr.

²This refers to knowing and meditating on what is known.

न च धीजन्ममात्रेण परमात्मप्रबोधवत् ॥
संभाव्यो देवभावोऽस्य देवो भूत्वेति च श्रुतेः ॥ ३८१ ॥

Further, from the statement of the Śruti *devo bhūtvā*, 'having become one with the deity'¹ becoming the deity is not possible (in the case of this one, i.e. the Udgātr) only by the rise of the knowledge (about the deity²), as by (the acquisition of) the knowledge about the highest Ātman.³ [381]

¹That is, attaining the nature of the deity.

²It means absence of repetition mentioned in verse 380.

³This knowledge results from the repetition of hearing, pondering over and meditating.

उद्गातुर्विदुषो नापि परकीयेन कर्मणा ॥
समुच्चयप्रसिद्धिः स्यात्तयोर्भिन्नाश्रयत्वतः ॥ ३८२ ॥

And also in the case of the Udgātr, who has become a knower (of the nature of Prāṇa), there would result the combination of knowledge and ritual activity by the performance (to be done) by another, for the reason that the two have (two) different supports.¹ [382]

¹That is, knowledge on the part of the Udgātr and performance on the part of sacrificer.

यजमानस्य कर्मास्ति ज्ञानं तूद्गातृसंश्रयम् ॥
समुच्चयोऽतस्तस्यापि भिन्नाधिष्ठानतो न च ॥ ३८३ ॥

(Now), ritual activity belongs to¹ the sacrificer, whereas knowledge rests in the Udgāṭṛ. Therefore, there does not follow the combination (of knowledge and ritual activity) in the case of him (i.e. the sacrificer) also, owing to their different supports.² [383]

¹That is, is performed by.

²As explained in note 1 on the preceding verse.

मतं तद्याजमानं स्याज्ज्ञानं यत्प्रागुदीरितम् ॥
स्वयमेव कृतार्थत्वात्कापेक्षास्यर्त्विजं प्रति ॥ ३८४ ॥

Therefore (*tat*), it is held that the knowledge, which has been discussed earlier, belongs to the sacrificer. (Here an objector asks:) 'Then, since he has acquired his end, why should he have expectation about the assistance of the (Udgāṭṛ) *rtvij*?' [384]

The second line is one more question put by the objector.

कर्मण्युद्गात्रपेक्षावज्ज्ञानेऽपीति मतं यदि ॥
उद्गातुरपि तत्तुल्यं नोद्गातर्ते क्रियां यतः ॥ ३८५ ॥

If it were held that, like the assistance of the Udgāṭṛ in the performance, (assistance) is expected in acquiring knowledge also; then that (condition) is commonly shared by the Udgāṭṛ also, since there is no Udgāṭṛ without a (ritual) activity. [385]

याजमानं यथा कर्म ह्याश्रित्य फलवद्भवेत् ॥
अन्नाद्यागानमुद्गातुस्तज्ज्ञानं तद्वदाश्रितम् ॥ ३८६ ॥

As the singing of the food and eatables by the Udgāṭṛ becomes rewarded only after resorting to the performance by the sacrificer, his knowledge also is likewise dependent (on the same). [386]

समुच्चयाच्चेदुभयोरुद्गातृयजमानयोः ॥

देवभावः किमर्थं तद्वैतदिति हि श्रुतिः ॥ ३८७ ॥

If becoming one with the deity would result from the combination (of knowledge and ritual activity) for both the Udgāṭṛ and the sacrificer, for what purpose does there occur the Śruti statement *tadd haitat*? [387]

सर्वाश्रमाणां तर्होदं सामान्येनाभिधीयते ॥

तद्वैतदिति सिद्धत्वादुद्गातृयजमानयोः ॥ ३८८ ॥

Indeed, then, the statement *tadd haitat* is uttered for all the Āśramas in general, since it has been already established for the Udgāṭṛ and the sacrificer (together). [388]

देवभावेन विज्ञानं संस्करोत्येव तद्वियम् ॥

परार्थमपि सत्कस्मादनपेक्षं न सिद्धये ॥ ३८९ ॥

The knowledge (about the Udgāṇa), though being used for another (sacrificer), does purify his intellect,¹ by (bringing unto him) the nature of the deity. (Then,) how would it not acquire that end without expectation (of anything else)? [389]

¹This leads him to the knowledge of Prāṇa.

iti udgīthabrāhmaṇam samāptam

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

(BUBV 1.4)

Puruṣavidha Brāhmaṇa

ज्ञानकर्मफलं चैतत्कर्मकाण्डप्रचोदितम् ।
आत्मैवेत्यादिशास्त्रेण सृष्ट्यादौ कर्तृतोच्यते ॥१॥

And,¹ this reward of knowledge and² (ritual) activity is what is told (lit. prescribed) in the section on ritual activity. (Now) in the scripture (beginning with the) words 'Ātman alone' is told (i.e. discussed) the nature of the agent in respect of creation etc.

[1]

¹This is for *ca* which is merely stylistic flourish.

²This can be alternatively taken as *vā* 'or'. SP and NKL both explain the compound *jñānakarmaphala* as *kevalasya jñānasya* and (*jñānasya*) *karmasamuccitasya phalam*. The earlier portion of BU up to the end of 1.3 spoke of the fruit of the combination of knowledge (about the nature and effect of rituals) and ritual activity, viz. attaining the nature of Prajāpati (or the Ātman, the Sūtrātman). This is so understood in BUBV 1.5.11.

SP points out: This portion, viz 1.4ff. is intended to convey that Prajāpati is in respect of the act of creation etc. of the world an independent agent — this is clear from *tad dhedam* ... (1.4.7). (Actually this is stated in the very next verse).

जगदुत्पत्तिसंहारस्थित्यादौ जगदात्मनः ।
क्रियाधीफलभूतस्य स्वातन्त्र्यमुपवर्ण्यते ॥२॥

(That is to say:) Here is described the independence of the Ātman of the world, who has become the very fruit of activity and knowledge¹, in respect of the origin, destruction and sustenance etc.² of the world.³

[2]

¹The inversion *kriyādhī* for *jñānakarman* is due to metrical exigency; cf. *kriyājñāna* in just the next verse.

²The word *ādi* means: control (*niyamana*) etc., according to SP.

³NKL states that *parātman* as understood from *tad ddeham* is the Prajāpati (i.e. Sūtrātman) and therefore the statement in this verse holds good — this is the meaning of *jagadātman* mentioned earlier.

स्तुत्यानया च वेदोक्तक्रियाज्ञानस्तुतिर्भवेत् ।
 कृता विवक्षितं त्वत्र सर्वमप्येतदीरितम् ॥३॥
 वैदिकं साधनं ज्ञेयं ज्ञानकर्मात्मकं पुरा ।
 महानर्थफलायैव न मोक्षायेति निश्चितिः ॥४॥

By this (statement of) praise is to be understood the praise of the ritual activity and knowledge which is taught in the Veda¹. However, the intended (meaning) here is that all this which comprises knowledge and ritual activity and the means (towards happiness etc.), as (earlier) stated in Veda (i.e. this scripture), (viz. it) culminates (in reality) in great calamity and not in liberation — this is the decision. [3-4]

¹This has a reference to *tad dheham* in 1.4.7 which follows, though a general term *veda* is used. This is the purpose of the statement about the independence of the Ātman mentioned in note 2 on verse 1 above.

वैदिकं साधनं सर्वमविद्योत्थत्वकारणात् ।
 तीव्रानर्थफलायेति ब्रह्मविद्याधिकारतः ।
 विवक्षितो ऽर्थो यत्नेन तद्वैराग्यविधित्सया ॥५॥
 यतो ऽविरक्तः संसारान्नात्मज्ञानाय कल्पते ।
 तदेतदात्मतत्त्वं हि पदनीयमितीरणात् ॥६॥
 पुत्रादिभ्यस्तथा प्रेयानिति वक्ष्यति सादरम् ॥७॥

Since every means (to happiness etc.), which is taught in Veda, results into acute calamity on account of its having an origin in ignorance (and) since this is a topic of the knowledge of the Brahman, therefore, the purpose is to state (the nature

the agent), specifically with a desire to advise (lit. prescribe) aversion to that¹; [5]

since one, who is not averse to transmigratory existence, is not eligible (lit. able) to acquire the knowledge of the Ātman and (there is in this Śruti) the statement 'This very truth of the Ātman is to be known ...';² [6]

and also the Śruti will say with great regard that (that Ātman) is dearer (to one) than a son etc.³ [7]

¹Namely, ritual activity. SP refers to CU 5.3.8: *tasmāj jugupsata*.

²The first line of verse 6 states a pre-requisite for acquiring the knowledge of the Ātman, viz. aversion to transmigratory existence and the second line implies a question: Does not *vairāgya* arise on acquiring the fruit of *jñāna* and *karman*? Where then is the need to state what is said in the first line? Cf. BU 1.4.7: *tad etat padanīyam* ... The word *padanīya* can be translated as 'to be attained', i.e. *ātmatattva* is considered to be related to *puruṣārtha*. But, verbal roots in the sense of movement convey the sense of knowing also; cf. *tad etad eva prakṛtaṁ gamanīyam* (BUB p.134).

³Cf. BU 1.4.8.

Verses 8ff. refer to the *sādhana*catuṣṭaya as stated in BSB: They are *nityānityavastuviveka*, *ihāmutrārthabhogavirāga*, *śamadamādisādhana*sampat and *mumukṣutva*.

वेदोक्तं निखिलं पुंसः सत्त्वशुद्धिफलं स्मृतम् ।
कर्म ध्यानादिकं यत्नाच्छ्रेयो ऽर्थभिरनुष्ठितम् ॥८॥

The entire activity such as meditation etc. that has been stated in the Veda is known to result into the purification of the mind¹ of a man (and) it is performed by those who wish for happiness, with every effort.² [8]

Verse 8 states that *karmakāṇḍa* etc. does not directly lead one to liberation, yet it is indirectly conducive to it — thus, meditation etc. (even its impression or desire, as the word etc. points out) causes the purification of one's mind.

¹SP states that *sattva* is *antaḥkarana*. Yet, it is better under-

stood as *citta*.

²SP supports this by citing some passages from Śruti and Smṛti respectively: *yena kenacana yajeta* and *yasyaite catvāriṃṣat saṃskārāḥ* (both untraceable).

सम्यक्संशुद्धधिषणः संसारं वेत्ति तत्त्वतः ।
दृष्टसंसारतत्त्वश्च वैराग्यं संसृतेर्ब्रजेत् ॥९॥

He, who has fully purified his mind¹, knows the transmigratory world in its true nature and he, who has known (lit. seen) the true nature of the transmigratory world¹ comes to have aversion to worldly life. [9]

The verse states the process of *karman* → *tattvaśuddhi* → *saṃ-sāratattvadrṣṭi* → *vairāgya*.

¹The word *dhīṣaṇa* means a sense-organ with which one comes to know and it is used here as a synonym for *sattva*. See note 1 on the preceding verse.

आविरिञ्चाद्विरक्तो हि संसारान्निविवृत्सति ।
न चोक्तज्ञानकर्मभ्यः सा निवृत्तिः प्रसिद्ध्यति ॥१०॥

Indeed, he who has turned averse to transmigratory world, beginning with Hiranyagarbha, wishes to turn away from it. And this turning away is not possible to achieve from knowledge and action as stated (in the preceding sections).¹ [10]

¹SP supports by citing *nānyaḥ panthāḥ vidyate 'yanāya* (Śvetāśvataropaniṣad 3.8; 6.15): *nāsty akṛtaḥ kṛtena ...* (Muṇḍakopaniṣad 1.2.12).

वाङ्मनःकायकर्मभ्यस्तत्साध्यकटुकत्वतः ।
व्युत्थायानर्थीनिःसारसाधनान्यनुमार्गीति ॥११॥

After rising above the actions of speech, *manas* and body for the disagreeableness in what is acquired through them, he looks for the means of warding away the undesirable (results). [11]

This is a statement of the means to liberation. It is the right knowledge (*samyagjñāna*) which arises on one's hearing etc. that is preceded by renunciation.

नित्यान्यपि च कर्माणि तत्संस्कारफलाश्रयात् ।
परित्यजति सर्वाणि कृत्स्नसंसारदोषदृक् ॥१२॥

(And) also, seeing the undesired effects in the entire transmigratory world, he gives up all the obligatory rites, for they are related to the fruits produced from (even) their impressions (or desire). [12]

Activity prescribed in scriptures is useful for liberation only at certain stages; it does not function as a direct means; rather, it causes defects or undesirable effects. Therefore, it has only to be given up.

संसारवह्निजं दुःखं संभावयति ना परम् ।
भूयो दुःखं किमन्यत्स्यान्नित्यानुष्ठानहानितः ॥१३॥

A man¹ considers misery resulting from the fire in the form of transmigratory world to be very great; indeed, what other misery can there be if not (that which results) from abandoning (the performance) of the obligatory rites? [13]

As the Smṛti says *akurvan vihitam karma ...* (*Manusmṛti* 11.44), it is not proper to keep from performing the obligatory rites, because that would cause obstruction (*pratyavāya*) to one's collecting merit.

¹The word *nā* is understood in the sense of *śuddhadhīḥ*, *viraktaḥ*, and therefore *adhikārī* for acquiring the knowledge of the Brahman.

मुक्तेर्बिभ्यत इत्यादि तथा च श्रुतिशासनम् ।
तन्मूला च स्मृतिः साक्षाद्वेदानित्यादिका स्फुटा ॥१४॥

And, to this effect, there is an instruction in the Śruti, *mukter bibhyataḥ* 1... Moreover, there is (a statement in) some Smṛti,

which has its root in the Śruti,² that clearly states (the same) in the words: to the Vedas etc. [14]

¹The quotation is untraceable.

²This shows equal authoritativeness of the Smṛti.

अविज्ञातं परं तत्त्वं जनिमत्कारणं श्रुतौ ।
आन्त्यात्कार्यात्तदेव स्यात्सर्वकार्यविशेषणम् ॥१५॥

[Verses 15-21 refer to the Brahman, the cause of the world.]

In the Śruti (it is said) that the highest Reality, which is (generally) not known,¹ is the cause of what has a birth (or origin) and that alone would be the producer of all effects ending with the final of them². [15]

¹Because the highest Brahman is in reality *avikārya* 'not undergoing any modification' and it is really the ultimate cause.

²This refers to the earth. See SP: *antyam kāryam pṛthivī tat-paryantam sarvasya kāryasya vyāvartakam sūtrādyātmanā param eva brahmety arthaḥ*.

तेन तेनात्मकार्येण स्वात्माभासतमोवधिः ।
विशिष्टः ससृजे विष्णुस्तेजोबन्नादि मायया ॥१६॥

Viṣṇu,¹ affected by the limiting adjunct² of ignorance (lit. darkness) in the form of the semblance of Himself³ (and) distinguished (lit. qualified) by each one of His own products, has created⁴ fire, water, food etc. by his own power (Māyā). [16]

This verse describes the creation by Viṣṇu. Viṣṇu, affected by *upādhis*, is the creator (*sraṣṭṛ*), the protector (*pālayitr*) and the withdrawer (*saṁhatṛ*) of the universe. This is a verse expressive of Sureśvara's Ābhāsavāda.

¹According to SP, only Viṣṇu is mentioned here for avoiding the notions of different gods being responsible for each of creation, sustenance and destruction. Only He is the creator etc. It should

be noticed that Sureśvara, under the influence of his time, mentions Viṣṇu for the Brahman. Or, possibly, he resorts to the etymological explanation of Viṣṇu from the verb root $\sqrt{\text{viṣ}}$ 'to pervade', in the sense of 'pervader'.

²In *tamovadhiḥ* 'having the limiting adjunct of darkness', *avadhi* is to be taken to mean *upādhi*; cf. *avadhiśabditopādhinā* (SP) and *svasya ātmanaḥ avadhiḥ yasmin ajñāte tad eva tamaḥ* (NKL).

³SP explains the word *svātman* as *cid-dhātu* 'one's own (basic) element, viz. *cit*', which is Self. This is an indication of Sureśvara's Ābhāsa-vāda.

⁴The use of the Ātmanepada in *sasṛje* is in Vedic fashion. This reflexive use shows how the creation is but illusion (*mithyā*)—it indicates absence of any object apart from the creator.

अविद्ययास्य स्रष्टृत्वं कूटस्थस्यापि सर्वदा ।
यथावस्तुधियः सूतेः प्राङ्नित्यं तेन तन्मतम् ॥१७॥

On account of ignorance is this One said to be the creator, even though He is ever immutable. And since the production of (the universe) is from this thought of the things as are going to be, it is for that reason (known to be) ever eternal.

[17]

ज्ञानकर्मादितन्त्रं सत्सुत्रं जज्ञे ततो विभोः ।
ज्ञानक्रियाशक्तिमद्यद्यत्रेदं जगदाहितम् ॥१८॥

[Here follows in verses 18-21 a statement of the process of creation from the Brahman.]

Being controlled¹ by knowledge and action etc.², the existent Sūtrātman³ was born from the (all-)pervading⁴ — that which was possessed of the powers of knowledge and activity⁵ (and) in which rests this world.⁶

[18]

¹It literally means: dependent on ...

²The word *ādi* means *vāsanā* (SP).

³The Sūtrātman is *apañcīkṛtapañcamahābhūtataatkāryātmakam liṅgam*.

⁴The word *vibhu* means *avyākṛta brahman*.

⁵*jñānaśaktimat* is Hiraṇyagarbha and *kriyāśaktimat* is Prāṇa — these two are the aspects of the Sūtrātman.

⁶The Sūtrātman is minute and cannot be a substratum of the world; but cf. *vāyunā vai gautama sūtrenāyaṃ ca lokah* (BU 3.7.2) which states that the Sūtrātman — identified there as Vāyu, viz. Self (Ātman) — supports everything. That the Sūtrātman is a substratum is made known by the visible gross effects.

विराडपि ततो जातस्त्रैलोक्यात्मकदेहवान् ।
यथोक्तज्ञानकर्मभ्यां मनोर्जन्म ततो ऽपि च ॥१९॥

Also, from that (Sūtrātman) was born Virāj¹ having a body in the form of the three worlds. And there was the birth of Manu also² from that (Virāj), on account of (his) knowledge and activity as stated before. [19]

¹Virāj is *pañcīkṛtāpañcamahābhūtataatkāryātmaka*. Cp. note 3 on the preceding verse.

²The word *ca* implies all the creation which proceeded from Manu and also that it is controlled by knowledge and action.

या महाप्रलयात्सृष्टिः सा विरिञ्चस्य वक्ष्यते ।
आन्तरप्रलयाद्या तु विराजो ऽधीयमुच्यते ॥२०॥

Whatever creation arises from the great dissolution (lit. deluge), is said (to be) from Viriñca (the Sūtrātman¹); (and) that after the intermediate dissolution is said to arise from Virāj.

[20]

Verses 18-19 clarified the relation of the Sūtrātman and Virāj to a certain extent. But the origination of Virāj mentioned in verse 19 from the Sūtrātman was already explained in BUBV 1.2 (Aśvamedha Brāhmaṇa). But where can we see the origination of Manu etc. from Virāj? — to this an answer is given in the second line. Also, BU 1.4.3: *sa imam evātmānam dvedhāpātayat* 'He (Virāj) parted this very body into two.' is also expressive of the same.

¹Viriñca is the Sūtrātman who has two powers; see verse 18 note 4.

स वै शरीरी प्रथमः स वै पुरुष उच्यते ।
आदिकर्ता स भूतानां ब्रह्मा ऽग्रे समवर्तत ॥२१॥

It is said: He is the first embodied being, he is Puruṣa. The (god) Brahman, the first creator of all beings, existed before.¹

[21]

This is *Mārkaṇḍeyapurāṇa* 45.64; *Vāyupurāṇa* 1.4.68; *Brahmāṇḍapurāṇa* 1.3.24.

¹That is, in the beginning of all creation.

प्रत्यग्भूतः परार्थेभ्यो यो ऽनन्यानुभवं प्रति ।
प्रथते स इहात्मेति जगत्यस्मिन्निगद्यते ॥२२॥

[Verse 22-30 are *udbhāṣya*; Sureśvara's addition to what Śaṅkara said on *ātmaivedam agra āsīt*.]

That is described in this world as the Ātman who, residing in each being¹ apart from other objects², reveals himself in the experience of every being as in none other.

[22]

¹Translation follows the reading in the AnSS edition. The NKL edition reads: *pratyag-rūpaḥ* instead of *pratyag-bhūtaḥ*. Possibly that is better, meaning; 'who has the form of the inner self of every being'.

²These stand in the relation of cause and effect.

आत्माभासैकसंसिद्धेस्तदज्ञानसमुद्भवम् ।
आत्मैव भण्यते मोहात्तदात्माव्यतिरेकतः ॥२३॥

On account of the existence of only the semblance of the Ātman, all that results from the ignorance about that Ātman is called the Ātman on account of illusion itself and not apart from that Ātman.

[23]

This is yet another indication of Sureśvara's Ābhāsavāda; cf. verse 16 above.

एवेत्यवधृतावेतदात्मीयार्थनिषेधकृत् ।
मन्वादि जन्मनः पूर्वमात्मैवेदमभूज्जगत् ॥२४॥

The word *eva*, which is used for the sake of restricting the meaning, is expressive of the denial (of the world) of things which have the nature of the Ātman. This world whose beginning¹ is Manu was before its origin only the Ātman. [24]

The first line explains the intention of the word *eva* of *ātmai-vedam* and the second line paraphrases *ātmā eva idam āsīt*.

¹SP explains *ādi* of *manvādi* as *ākāśa* etc. and also takes *manvādi* as the qualifier of *jagat* ! The NKL edition reads *manvādi janmanah* as one word. In that case, *ādi* can stand for *ākāśa*; but this seems to be unintended, for Sureśvara refers to the creation beginning with Manu is clear also from verse 30 below.

अध्यात्मादिविभागे स्यादात्मात्मीयादिभेदधीः ।
तस्मिन्नसति सा न स्यादपेक्षाविरहाद्विभोः ॥२५॥

Cognition of distinction such as Ātman and what belongs to Ātman would be (possible) when, there is division made of things as those resting in body etc. But in the absence of that (division, such creation) would not be there, for in the case of the all-pervading (Ātman) there is (total) absence of any relationship (to another). [25]

At the initial stage there are no distinct entities as the Ātman and *idam* (viz. *jagat*) and therefore the Ātman does not know the existence of *jagat*. If the Ātman were to know it as some existent, that would mean the Ātman has *bhedadhī*, i.e. the Ātman is the knower and *jagat* is the object of its knowing. Then there would be duality even at an initial stage. Here Sureśvara emphasises that *bhedadhī* is possible only with reference to *adhyātmādivibhāga*.

मिथोपास्तव्यपेक्षं हि नामरूपादिमज्जगत् ।
प्रत्यङ्मात्रप्रमाणं स्यात्परागेवैति चित्रताम् ॥२६॥

This world, which is made up of name, form etc. and as such has set aside any mutual relationship, would indeed have (only) the inner/individual self as the means of knowing it. Or rather, outside (the Self¹) only, it assumes variety. [26]

¹Following the preceding verse, this verse explains the relation of the Ātman and the objective world (if it existed). Also it explains away the possible argument that the absence of any variety of objects before creation meant nihilism (Sūnyavāda). Also note that NKL reads *parāḡ evaiti citratām*. The AnSS edition does not present a happy reading. The word *parāṇ* is an adjective.

अपामार्गलतेवायं विरुद्धफलदो भवः ।
प्रत्यङ्दृशं विमोक्षाय संसाराय पराङ्दृशाम् ॥२७॥

This mundane world¹ yields, like the *apāmārga* creeper², fruits of opposed nature. For those who consider it as only the inner/individual self, (this transmigratory world) ends in liberation (and) for those who see it apart from the self it results in (further) transmigratory existence. [27]

¹*bhava* 'mundane existence' is *samsāra* according to SP. It means existence in this world which might end either in liberation or in rebirth.

²Refer to SP and NKL regarding *apāmārgalatā* (*Achyranthes aspera/bidentata*). Better NKL: *apāmārgamañjarī yathā agrata ārabhya adhaḥ sprśyamānā susparśā sukhakarī bhavati vaiparītyena duḥsparsā duḥkhakarīty arthaḥ*.

व्याकृताव्याकृतं विश्वं प्रत्यक्प्रत्ययमात्रकम् ।
मोहोत्थाहमितिज्ञानाद्भयारत्यादिमद्भवेत् ॥२८॥

All this (i.e. world), manifest and unmanifest, is only to result into the awareness of the individual self, but on account of the awareness, 'I (am this).'¹, which arises from infatuation,

it comes to have fear, displeasure etc.

[28]

This verse restates the latter case, resulting into *samsāra*.

¹'I am this.' implies 'This is mine.'; cf. *aham mameti vijñānam* in the next verse.

अहंममेतिविज्ञानं विद्यया ध्वंसितं यदा ।
तदा ऽद्वये दृशौ दृष्टे न भयादि तमोहतेः ॥२९॥

When this awareness¹, 'I am this (and) this is mine.', is destroyed by the lore (of the Ātman)², then, the seer, who is without any duality,³ being seen, there does not exist fear etc., for there has been the removal of darkness. [29]

¹This is knowledge based on subject-object relationship.

²The word *vidyā* is for *ātmavidyā*.

³Or alternatively, who does not have a second.

इदं धीनामगम्यं यच्चित्रं सत् प्रथते हिरक् ।
मन्वादि सृष्टेस्तत्पूर्वमात्मैवाभूदिदं जगत् ॥३०॥

This (world), which is understood as the object of knowledge and (as having a) name (etc.), extends afar, being full of variety. This world, beginning with Manu¹, is, before (its) creation, only the Ātman.² [30]

¹Cf. verse 24 note above.

²This implies: and nothing else.

एतावद्वास्तवं वृत्तं मोहोत्थं भण्यते ऽधुना ।
कोशपञ्चकतां यातः प्रत्यगज्ञानतो यतः ॥३१॥
स एष परमो ऽप्यात्मा कामाविद्याद्युपप्लवात् ।
संवृत्तः पुरुषाकार इत्यनुक्रोशतीव नः ॥३२॥

[Verses 31-34 are the explanation of the word *puruṣavidhah*. Here, Sureśvara explains Ātman as Paramātmān 'Supreme Self'.]

This much is described as the nature of the thing¹ (which

is) (ever) existent. Now is described (the nature of) what arises from ignorance, since the individual self has assumed the five sheath state². [31]

This³ highest Ātman also becomes possessed of the shape of a man because of the obstructions of desire, ignorance etc. and therefore shows compassion on us, as it were.⁴ [32]

The Śruti *puruṣavidhaḥ* helps us in getting release from bondage — in this way, it emphasises that whatever man experiences is nothing but the appearance of the Ātman.

¹This refers to the Ātman, i.e. Brahman.

²The five sheaths are: *ānanda*, *prāṇa*, *manas*, *viññāna* and *anna*.

³Translation follows the reading *sa eṣa* in the AnSS edition. The NKL edition reads *sa eva*. But both SP and NKL do not give any indication about the reading.

⁴This indicates that *puruṣavidhatva* of the Ātman is not real (*mithyā*).

आनन्दाद्यन्नपर्यन्तान्कारणेतररूपिणः ।

पुरुषादिप्रकारांस्तान्प्रत्यक्तत्त्वानलक्षयत् ।

पुरुषविध इत्युक्त्या ह्यूर्ध्वं चैवं प्रवक्ष्यते ॥३३॥

Since (the Śruti) has pointed out (or described) in the statement *puruṣavidhaḥ* the (various) forms, beginning with a Puruṣa, of the one who assumes those forms of things, viz. the causes and others (i.e. effects), beginning with *ānandamaya* (and) ending with *annamaya*,¹ as having the nature of the individual self; (and) that this (is so) will be explained later². [33]

¹*puruṣavidha* = *puruṣākāra* = *kōśapañcaka*; cf. note 2 on the preceding verse. And among the five sheaths, the first *ānandamaya* is a causal sheath, the last *annamaya* is a sheath of the nature of an effect, and the three sheaths (*prāṇamaya*, *manomaya*, *viññānamaya*) are sheaths of the nature of both cause and effect.

²This refers to the context of *anna* in the next Brāhmaṇa (traditional scholars call it Saptāṇna Brāhmaṇa), viz. BU 1.5.3.

वाङ्मनःप्राणकोशास्त्रीन्विराडन्नमयः स्वयम् ।
तद्वेदमिति चानन्दो नैवेहेति तथोच्यते ॥३४॥

[The words *ūrdhvaṃ ca* of the preceding verse are clarified in verses 34-36 below.]

(In the Śruti it is later stated that) the three sheaths of *vāk*, *manas* and *prāṇa* are (but) Virāj, who himself comprises food. It is said (already) in the Śruti passage *tad dhedam* that this is referred to as *ānanda(maya)*; and so also in the passage *naiveha*. [34]

The Śruti passages and *pañcakośas* can be thus co-related: *mano vācam prāṇam ...* (BU 1.5.3) refers to *manomaya*, *vijñānamaya* (*vijñāna* = *vāk*) and *prāṇamaya*; *ānandamaya* to *tad dhedam* (BU 1.4.7) and *naiveha kimcanāgra āsīt mṛtyunaivedam āvṛtam āsīt* (BU 1.2.1).

अग्निर्मूर्धेति च तथा मन्त्रेणापि प्रकाशितः ।
सामानाधिकरण्यं च तद्वेदमिति युक्तिमत् ॥३५॥
पृथिव्याद्यक्षरान्तश्च प्रश्नो वाचकनवस्तथा ॥३६॥

In the Mantra *agnir mūrdhā ...*¹ is explained (the nature of the Ātman) to be likewise (viz. *annamaya*). And this mention (of the Ātman and the five sheaths) in the same substratum² as stated in *tad dhedam* is (supported) with reason. [35]

So also the question of Vācaknavī, which begins with the word *prthivī* and ends with the word *akṣara*³, (will state) the same.

[36]

The Vārtikas on *ātmaivedam ... puruṣavidhaḥ* are concluded here. It is Virāj that is understood by the word *ātman*, and, before getting another body, it only existed and from that are created all discrete beings and things; the beings take human forms (in particular), (thus) having a head, hands etc.

¹Cf. *agnir mūrdhā cakṣuṣī candrasūryaṃ diśaḥ śrotre vāg iva vṛtās ca devāḥ* (Muṇḍakopaniṣad 2.1.4).

²The word *sāmānādhikaranyā* is explained in SP: *bhinna-*

pravṛttinimittānām śabdānām ekasminn arthe pravṛtṭiḥ sāmānādhikaranyam iti sthiter ity arthah.

³BU 3.8.8-9.

प्रत्यग्दृष्ट्यनुविधाहंप्रत्ययैकप्रमाणकः ।

सो ऽनुवीक्ष्यात्ममोहोत्थदृष्ट्याविद्योत्थरूपकम् ॥३७॥

[Verses 37-39 are the explanation of the words *so 'nuvīkṣya* of BU 1.4.1.]

(Virāj¹) has the only (one) authoritative means of knowing in the experience of 'I' which is permeated by the awareness of the inner self. The words *so 'nuvīkṣya* is a metaphorical form of expression arising from ignorance, i.e. the awareness originating in the ignorance (about the nature) of the Ātman.

[37]

¹Śaṅkara has used Virāj in the sense of the Ātman, viz. individual/inner self. In this verse, Sureśvara adopts Śaṅkara's view. Already, Sureśvara has explained Ātman as Paramātmān 'Supreme Self' (NKL). Cf. introductory note to verses 31-34 above.

यदभ्यस्तं पुरास्याभूदहमेवेदमित्यदः ।

दर्शनं तदपेक्षायामनुशब्दः प्रयुज्यते ॥३८॥

This prefix (lit. word) *anu*¹ is used (in the Śruti) with reference to whatever was then, i.e. earlier, repeatedly uttered (in the state of a sacrificer) in the awareness, 'I myself am this (Virāj).'

[38]

¹*anu* requires something to have occurred before; but there did not exist such a knowable object before Virāj. Hence this explanation is given. Sureśvara has thus answered away a difficulty on linguistic ground: The word *anu* expresses either the subsequence or nearness of something to another; how then was this expression *anuvīkṣya* used by the Śruti *so 'nuvīkṣya nānyad ātmano 'paśyat so 'ham asmīty agre vyāharat tato 'hamnāmā- bhavat ... athānyan nāma prabrūte yad asya bhavati* (BU 1.4.1)?

अहमेवेदमस्मीति दर्शनं यत्सुभावितम् ।
तत्फलं यत्तदन्वीक्ष्य नात्मनो ऽन्यद्दर्श सः ॥३९॥

After having thought about whatever was the fruit of that which was well thought over, i.e. awareness 'I myself am this.', he did not see anything else than the Ātman itself. [39]

Here is described the fruit or result of *anvīkṣaṇa*; *anvīkṣaṇa* is only *īkṣaṇa*.

तस्मादर्थान्तरासतेरेकपिण्डात्ममात्रतः ।
नापश्यदपरं किञ्चित्सो ऽहमित्यभ्यधादथ ॥४०॥

[Verses 40-42 are the explanation of *anyad ātmano 'paśyat so 'ham asmīty agre vyāharat.*]

Due to non-production of anything other than that (Virāj¹), he (Virāj) did not see anything else than merely himself as one whole (lump) and, therefore, in that instant,² he uttered so 'ham 'I am he.' [40]

¹ *tasmād arthāntarāsūter is virāḍdehād bhinnasya dehasyānupa-patteḥ* (NKL).

² SP: The word *atha* refers to *agre* in the Śruti. Cf. SP: *sva-vyatiriktādarśanānantaryam athaśabdārthaḥ*.

त्रैलोक्यात्मकदेहात्मा नापश्यदपरं पृथक् ।
भिन्नार्थानभिसंबन्धात्प्रतीच्येवास्य धीरभूत् ॥४१॥

The embodied Ātman having the form of the three worlds¹ did not see any other (thing) as distinct. On account of the absence of contact with any distinct thing (i.e. object), he became aware of the inner self. [41]

This is the explanation of the word *atha* in the previous verse.

¹ Variant reading in AnSS -*dehāt sa nātmāpaśyat*; accordingly, the translation would be: That Ātman did not see anything else

(as) different from his own body in the form of the three worlds ...

सशब्दं दर्शनं यादृक्प्रागभ्यस्तं तथैव सः ।
व्याजहार फलावस्थो ह्यहमित्यात्मवाचकम् ॥४२॥

[The preceding verse is explained further in the first line.]

(And) in the same way as he was earlier used to see himself, viz. possessing (the capacity for) the word¹, he, who resided in the state of the result², declared about himself, 'I (am) he, (the sacrificer).'. [42]

There is an attempt here to explain as to how there was on the part of Virāj the awareness of himself, viz. the inner self, and his own body (the last *pāda* of verse 41, *prāṇi dhīr ābhūt*).

¹NKL reads: *śaśabdadarśanam*; translation follows this reading. The reading in AnSS would lead to this translation: He is just like that as is repeatedly studied (in the Śruti).

²*phalāvastha* = *yajamānāvastha*, identified with Prajāpati.

उपासनार्थं नामास्य तस्योपनिषदित्यतः ।
अतो ऽहमित्यनेनैव ह्यात्मनात्मानमभ्यधात् ॥४३॥

From the Śruti (statement) *tasyopaniṣat* (is understood the word) *aham* for the name of him (viz. Prajāpati); (which is so used) for the sake of (recitation in) worship.¹ Therefore, in this statement 'I am he.', 'he' refers to himself of his own accord. [43]

'How is the name *aham* used for Prajāpati?' — this is explained in this verse. The name comes from Upaniṣadic usage (NKL puts it as *rahasya*). This means: No word other than *aham* can express or refer to the Ātman.

¹For *upāsana*(ā), see our book [Vol.4:1991] Introduction.

अहमित्यभ्यधादग्रे यस्मादात्मानमात्मना ।
अहंनामाभवत्तस्माद्विराडेष प्रजापतिः ॥४४॥

Since, in the beginning (i.e. in the earliest/first moment) he expressed himself by (the word) *aham*, of his own accord, therefore, this Virāj, Prajāpati became known by the name *aham*. [44]

This is the explanation of *ahamnāmābhavat*.

तत्कार्यगेण लिङ्गेन ज्ञापयन्कारणाभिधाम् ।
तस्मादपीति वक्त्येतां प्रसिद्धिं लोकसाक्षिकीम् ॥४५॥

The Veda, which informs about the name of the cause by means of (i.e. citing, the) characteristic of his (=Prajāpati's) effect, utters the words *tasmād api* (and thereby) expresses the popularly accepted notion in this statement.¹ [45]

This is the explanation of *tasmād api*.

¹BU, which follows *tasmād api*, viz. *etarhy āmantrito 'ham ayam ity evāgra ukvāthānyan nāma prabrūte yad asya bhavati* 'Being addressed, one first says 'It is me.', and then conveys one's other name (which one might bear).'

यथोक्तमहिमः कस्मात्संवृत्तः पुरुषो विराट् ।
इति हेतूपदेशाय स यदित्यादि भण्यते ॥४६॥

In order to explain as to why Virāj of the greatness thus described¹ became a man, there follows the statement *sa yat ...* [46]

Since it is difficult to explain why the word is used in a Smṛti for Virāj, though it contradicts the Śruti *sa vai puruṣa ucyate*, therefore, the verse answers away that difficulty.

¹The word should have been *yathoktamahimā* ! Cf. SP: *nakāralopam vaikalpitam manyante*.

मिथो जिगीषतां पुंसां ज्ञानकर्मादिसाधनैः ।
पुरा देवात्मतां यो ऽगात्प्लुष्टास्तेनेतरे जिताः ॥४७॥

Whosoever amongst the men, formerly wishing to conquer one

another by means of knowledge, action etc., became for them *deva*¹ and by him were others burnt (as it were)² and conquered. [47]

This gives the meaning of the Śruti passage *sa yat puruṣo ... tasmāt puruṣaḥ*.

¹The definition of Puruṣa is understood here thus: *pūrvam auṣat* which conveys the meaning of the Śruti *sa yat ... auṣat* (BU 1.4.1). And this Puruṣa is Virāj. This is Brāhmanical derivation from the verb root *purā-√uṣ* 'to burn'!

²Cf. SP: *dagdhavaj jitāḥ*. See the next verse.

वैराजपदसंप्रेप्सोर्यजमानमहाजनात् ।
एनांस्यौषधतो ऽग्ने ऽतः संवृत्तः पुरुषाभिधः ॥४८॥

Since he formerly burnt (all) sins of (lit. amongst) a multitude of sacrificers that was wishing to secure (*prepsu*) the status of Virāj, therefore, later he became known by the name Puruṣa.

[48]

The meaning of *tasmāt puruṣaḥ* is stated; this supports the etymology given in the preceding verse.

औषत्स्वान्पाप्मनः पर्वं ज्ञानाद्यतिशयाग्निना ।
वैराजपदलिप्सुभ्यस्तेनासौ पुरुषाभिधः ॥४९॥

(Since) having first burnt his own sins by the fire of the excellence of knowledge etc. (he did so afterwards) for the sake of those who wanted to get the status of Virāj, he became known by the name of Puruṣa.

[49]

Now this verse also goes to support it on the basis of the Śruti. It takes into account the Śruti *sarvān pāpmana auṣat* (BU 1.4.1) and seeks to affirm that the name *puruṣa* for Prajāpati was not merely a fancy or metaphor.

यथोक्तोपासनफलं वक्ष्यामीत्युत्तरं वचः ।
ओषतीत्यादिकं ज्ञेयं वेदोपासीत यः सदा ॥५०॥

[Verses 50-52 are the explanation of *oṣati ha vai sa tam yo 'smāt pūrvo bubhūṣati ya evaṃ veda.*]

With the intention, 'Let me declare the result of the worship already stated.', there follows the later statement *oṣati ...* (In this) it is to be understood that one who knows the object of knowing is one who ever worships it. [50]

This verse states the purpose of the Śruti, *oṣati ... ya evaṃ veda.*

यो ऽसावतीन्द्रियो ऽग्राह्यः सूक्ष्मो ऽव्यक्तः सनातनः ।
सर्वभूतमयो ऽचिन्त्यः स एव स्वयमुद्भवः ॥५१॥

He himself¹ appeared (in a human form) by his own wish (*svayam*), who is beyond the sense-organs, imperceptible, subtle, unmanifest, eternal,² comprising all beings and incomprehensible. [51]

¹This is following the reading *eva*; also one in the *Manusmṛti*. The variant reading *eṣa*, followed by NKL, would entail the translation: This, thus known, (Virāj) appeared ... The nature of Virāj is thus clarified by a citation from *Manusmṛti* 1.7. This one is so subtle that he is beyond the sense-organs ...

²Alternatively, existing from the days of yore.

पुरुषो ऽस्मीत्युपास्त्यर्थं पुरुषार्थो ऽयमुच्यते ।
ओषतीत्युक्तिः साक्षाद्गुणोपास्तिफलश्रवात् ॥५२॥

[This is the concluding Vārtika on BU 1.4.1.]

This end of human endeavour is stated for the sake of worship, in 'I am Puruṣa.'. (This is so,) on account of the statement '(He) burns.' which is the direct statement (lit. hearing) of the result of the worship of some qualities etc. [52]

The purpose of this verse is to point out that the worship of Virāj, that possesses the qualities of Puruṣa, leads one to become

one with the Sūtra (i.e. Virāj) itself.

Verses 53-104 are regarding BU 1.4.2 and verses 53-70 in particular are the explanation of that the fruit (i.e. result) of knowledge and action is transmigratory.

अभिष्टुतं प्रयत्नेन फलं यज्ज्ञानकर्मणोः ।
एवमहिममप्येतत्संसारं नात्यवर्तत ॥५३॥

Whatever fruit of knowledge and action has been praised with effort/care as having this potentiality¹ has not transgressed/overcome the transmigratory existence. [53]

The purpose of BU 1.4.2: so 'bibhet is stated. The fruit of knowledge and action may be anysoever great; it is related to transmigratory existence! Not to liberation.

¹The word *evammahima* is, like *yathoktamahima* in verse 46 above, ending in a vowel.

प्रत्यग्याथात्म्यविज्ञानविरहादन्यसाधनः ।
यावत्किञ्चित्फलं नादः सर्वानर्थनिवृत्तये ॥५४॥

On account of the absence of accurate knowledge of the real nature of the inner self, Prajāpati has taken to other means of knowing; whatever be its fruit, (viz. transmigratory existence), that is (indeed) not for warding away all evils/disasters.¹ [54]

¹There ever remains the fear/sorrow of transmigration, even if a person has become the Sūtra or Virāj.

निरस्तातिशयं कर्म ज्ञानं चाप्यापि बालवत् ।
यतो ऽबिभेदविद्यावानतो ऽसावस्मदादिवत् ॥५५॥

Since, even after accomplishing action and acquiring knowledge, (both of) which surpassed excellence, he became afraid like a child; therefore, he was possessed of ignorance like (all of) us. [55]

A view like the following could be held: The status of Prajāpati which is of the nature of the fruit of knowledge and action is characterized by pure knowledge and, therefore, there cannot be transmigration. To this, there is an answer in this verse.

न ह्यविद्यामनादाय वस्तुयाथात्म्यसंश्रयात् ।
कश्चिद्विभेत्यविभेच्च तैनाविद्वान्प्रजापतिः ॥५६॥

No person would be afraid, since he has taken resort to the (knowledge) of the true nature of the thing (viz. Ātman), unless he had taken to ignorance; and (it is said) 'He was afraid.', therefore Prajāpati must be (taken as) an ignorant being.¹

[56]

¹SP comments: That Virāj was afraid was stated, in pursuance of the method of Anvaya. The present verse states the same thing, following the method of Anvaya.

प्रत्यग्याथात्म्यविद्यैव निःशेषपुरुषार्थकृत् ।
इत्येतत्प्रतिपत्त्यर्थं विराट्स्थानस्य कुत्सनम् ॥५७॥

In order to understand that only the knowledge of the true nature of the inner self brings about the fulfilment of all human aims, there is blame given to the state of Virāj .

[57]

This verse answers one's fear that the preceding verse might appear contrary to the statement (which was made before) about the excellence of Virāj and what gives blame to the same Virāj.

यतो ऽविभेद्विराट्पूर्वमेकाक्यस्मीति मृदवत् ।
तस्मात्तत्कार्यभूतो ऽज्ञ एकाक्यश्च विभेति ना ॥५८॥

Since, like an ignorant person, Virāj became afraid, feeling thus 'I am alone.', therefore, a person, who is only a product of him and ignorant, becomes afraid (when) alone (even) today.

[58]

The meaning of *tasmād ekākī bibhēti* is stated. This leads one to infer that the fear in the effect (i.e. a human being) leads

to the conclusion that fear is found in the cause, viz. Prajāpati.

एवं भयाभिभूतः स ईक्षाचक्रे ऽथ लोकवत् ।
भयाहेतु यथातत्त्वदर्शनं कृतवान्विभुः ॥५९॥

Thus, overpowered by fear, he then thought in the manner of a person in the world. (And) then the pervading Ātman acquired¹ that knowledge (i.e. sight) of the truth as what is not the cause of fear. [59]

This is the meaning of *sa hāyam īkṣāmcakre*. The second line conveys that Prajāpati becomes possessed of the knowledge of the truth, that which cannot be the cause of fear.

¹That is, understood.

स्रजीव कल्पिताहिर्ना तत्त्रासादाकुलेन्द्रियः ।
आलोचयेद्यथातत्त्वं भीष्टवस्तौ तद्वदीश्वरः ॥६०॥

As a man, who has first taken (or seen) a serpent in the place of a garland, is, owing to fear, disturbed in (all) his sense-organs and would later find out the true nature of the thing (which he really saw) when there is removal (lit. destruction) of (his) fear; so also did the Lord (Virāj, Prajāpati).

[60]

The simile *lokavat* (of the preceding verse) is explained here with an illustration.

आलोचयन्यथातत्त्वमपास्तध्वान्ततद्ववम् ।
अनन्यानुभवं साक्षाद्दर्शैकात्म्यमात्मनि ॥६१॥

Thinking well about (or finding) the truth as it is and having (thereby) removed the ignorance (lit. darkness) and its effect, (he) directly perceived the uniqueness in respect of (himself or) the Ātman, the experience of which was unique. [61]

The result of *ālocana* stated in the preceding verse is explained.

प्रत्यग्याथात्म्यविज्ञानशिखिप्लुष्टमहत्तमाः ।
आप्ताशेषपुमर्थो ऽथ सो ऽमन्यत ततो विराट् ॥६२॥

When¹ that Virāj, who had consumed (i.e. burnt) the great darkness (of ignorance) by the fire of the knowledge of the truth about the inner self and who had thus acquired all the ends of human endeavour, (then) thought (of having achieved the end of human endeavour)². [62]

The result of *aikyasākṣātkāra* above is stated.

¹The words *atha*, *tataḥ* can be replaced by *yat*, *tat* respectively.

²Read SP: (*amanyata*) *ātmānaṁ kṛtārtham*.

देहेन्द्रियमनोबुद्धिभावाभावादिसाक्षिणम् ।
प्रत्यञ्चं मदिति प्राह तदृष्ट्या नेक्षते द्वयम् ॥६३॥

Virāj declared in the sentence *mad* ... that the inner self, who is the witness of the origin and the loss of the body, sense-organs, *manas* and the intellect, is (not different) from himself. (And) on account of that sight (i.e. knowledge), he does not see duality (*dvaya*)¹. [63]

The meaning of *yat mad anyan nāsti* 'since there is nothing else than myself,' is stated in the first three *pādās*. The last *pāda* conveys the fruit of the knowledge of the meaning of the word *mat*.

¹It literally means: pair, i.e. himself as the seer and another thing as the object of seeing.

प्रतीच्येव यदेहात्मा प्रत्यगात्मानमीक्षते ।
अन्वयव्यतिरेकाभ्यां ब्रह्मास्मीति तदेक्षते ॥६४॥

When a person¹ here² sees himself (i.e. the individual self) in his inner self by the method of Anvaya and Vyatireka, he comes to think 'I am Brahman.' [64]

¹The word *ātman* refers to one who is eligible for the knowledge of Truth.

²That is, in his pursuit of the knowledge of the truth.

प्रत्यग्दृष्ट्या तदज्ञानतज्जं नैवेक्षते स्वतः ।
ब्रह्मप्रतीचोरैकात्म्यात्तद्वरीकृत्य गर्जति ॥६५॥

By the sight of the inner self¹ he does not at all see in himself any ignorance about that and the result thereof; on account of the oneness of the Brahman and the inner self, he drives it (ignorance) away and speaks aloud ('I am Brahman.'). [65]

The purport of *kasmān nu bibhemi* 'what am I afraid of?' is thus stated.

¹That is, on acquiring the knowledge of the true nature of it.

प्रत्यक्तां मदिति प्राह त्वन्यन्नास्तीति चैकताम् ।
कस्मादिति च हेतूक्तिर्भीत्याचिक्षिप्यसया परम् ॥६६॥

(Prajāpati declared in the words) 'from me' (originates) 'characteristic as the inner self' and¹ (in the words) 'there is nothing else', the uniqueness (of himself). Further, in the word 'on what account', (he made) a statement of reason — with a wish to avert any fear. [66]

This explains the sentence *mad anyan nāsti*.

¹*tu = ca*.

प्रत्यक्ता ब्रह्मणो यस्माद्ब्रह्मता चात्मनः स्वतः ।
एवं सति कुतो मे भीरिति विद्वांस्त्रपायते ॥६७॥

Since the characteristic of the inner self (originates) from the Brahman and the characteristic of the Brahman (only) from itself, therefore, i.e. such being the case, the knower (Prajāpati himself) feels ashamed at the thought, 'whence can there be my fear?'. [67]

ब्रह्मविद्यामृते नान्यद्व्यहेतुविनाशकृत् ।
संभाव्यमिति नः प्राह तत एवेति च श्रुतिः ॥६८॥

And¹ the Śruti has thus declared to us in the words, *tata eva* ... that anything else than the knowledge of the Brahman could not be considered as a (possible) destroyer of the cause of fear. [68]

Here is clarified *tata evāśya bhayaṃ vīyāya*.

¹SP understands *ca* as implying the *anubhava* of the learned but NKL adds the Smṛti (*Gītā* 18.12) to this effect: *aniṣṭam iṣṭam miśraṇ ca trividhaṃ karmaṇaḥ phalam*— this latter is somewhat difficult to explain.

प्रत्यगज्ञानमेवैकं भीतिहेतुर्भवेद्यदि ।
तत एवेति वचनं तदेवं स्यात्समञ्जसम् ॥६९॥

The statement *tata eva* ... would thus be reasonable, if only ignorance (about the true nature) of the inner self is the sole cause of fear. [69]

कस्माद्ध्यभेष्ट्यदिति च पूर्वोक्तार्थसमर्थनम् ।
श्रुत्याकारि कुतो भीतिर्ध्वस्ताज्ञानतदुद्धवे ॥७०॥

The Śruti has justified the earlier stated purport in the words 'Of what indeed was he afraid?',¹ (since there would have been a doubt:) whence could there be fear,² when ignorance and its effect were destroyed?'. [70]

¹*kasmād dhy abheṣyat* is justified by *tata eva*; thus there is no repetition — it is merely a reaffirmation.

²SP adds 'in the case of a knower of the Brahman (or, of the true nature of the inner self)'.

प्रजापतेराविरभूत्कृत एकत्वदर्शनम् ।
शास्त्राचार्यादितद्धेतोरसत्त्वात्तदसंभवः ॥७१॥

[Verses 71-76 put a possible objection with various reasons that the knowledge of the truth cannot dawn on Prajāpati.]

How could (there come to Prajāpati) the awareness of the uniqueness, for it would be impossible in the absence of the cause of it (viz. that awareness) such as scriptures, teacher etc.¹ [71]

It has been so far stated that the fear is destroyed by the knowledge of the oneness of Prajāpati and the Brahman. Yet, the objector says that the knowledge does not dawn on Prajāpati, for there is no cause of it.

¹The word etc. refers to renunciation, *śamadamādi*.

अन्यानपेक्षं तदभूदिति चेन्नैवमिष्यते ।
अस्मदादेरपि तथा प्रसङ्गः स्यान्न चेक्ष्यते ॥७२॥

If it be held that (the awareness) resulted without an expectation of any other (factor), this is not acceptable, for such an awareness would then result in the case of us all; and it is not so held (by anyone). [72]

A possible view could be thus: The knowledge of Prajāpati does not depend on any other factor, viz. Śruti, teacher etc. But it does not sustain, since the knowledge of the truth is held as arising from hearing the Śruti; only for this reason, it is differentiated from our ordinary knowledge.

मतं जन्मान्तराभ्याससंस्कारोत्थमिदं यदि ।
नैरर्थक्यप्रसक्तिः स्यात्सम्यग्ज्ञानस्य सर्वतः ॥७३॥

And if it be accepted that this awareness has arisen from the impression of repeated thought about it in the previous life¹, there would result total uselessness of the proper knowledge². [73]

¹The opponent's argument could be: A sacrificer rises to the state of Prajāpati and becomes aware of the uniqueness of his own. This is the effect of the impression of hearing the Śruti etc. in his previous life while he was a sacrificer.

²Namely, knowledge arising from hearing the Śruti sentence etc.

in the case of all, for that would mean this knowledge does not produce its immediate effect, viz. removal of ignorance and consequent liberation.

दग्धाशेषान्तरायस्य विराजो ऽपि महत्तमः ।
नाधाक्षीदात्मविद्या नः काशाविद्यापनुत्तये ॥७४॥

If even in the case of Virāj who had consumed all the obstructions (to the knowledge of the true nature of the Ātman), the lore of Ātman did not burn away the great darkness, what hope¹ (could we entertain) for the removal of ignorance? [74]

This entails the uselessness of *vākyārthajñāna*.

¹That is, certainty.

अन्त्य एव तमोघाती प्रत्ययश्चेन्मतं यदि ।
स्यादनैकान्तिको हेतुरन्यान्त्येष्वसमीक्षणात् ॥७५॥

If only the final knowledge (or experience) is held to be the destroyer of darkness, this cause would lead to diverse conclusions since it is not noticed in other final (experiences). [75]

If what occurs to one as the final knowledge is alone held responsible for liberation, then any knowledge which occurs to one finally would be *mokṣaphalada* (that which brings about the fruit of liberation); but this is not so. Liberation has not resulted in the case of the sacrificer from the final experience of his previous life. Thus *antyatva* in *antyajñāna* is *anaikāntikahetu*, i.e. it would lead to diverse effects, not to some one definite effect.

नान्त्यो ऽविद्यापनुद्धोध इति सर्वत्र गम्यताम् ।
ऐकात्म्यवस्तुबोधित्वाद्दुपान्त्यप्रत्ययो यथा ॥७६॥

Let it be noted everywhere that the final knowledge (at the end of one's endeavour) is not the remover of ignorance, exactly in the same way as its previous knowledge; also the final

knowledge, being informative of the uniqueness of the thing (viz. Ātman), (cannot be the remover of ignorance in the same way as its previous knowledge). [76]

While verse 75 has refuted *antyapratyaya* as the remover of ignorance, thanks to its finality, this verse refutes its *jñānatva* to be the remover of ignorance, that knowledge (*jñāna*) of the last moment cannot be the cause of liberation, for it is similar to its other previous knowledges which, as knowledge, have not resulted into liberation.

Verses 77-90 are *Sureśvara's* answer to the objection.

स्याद्वा सत्साधनोत्पत्तेर्लोकवज्ज्ञानमात्मनः ।
यथेह कार्यकरणैः पुण्यकर्मोद्भवैर्नृणाम् ॥७७॥
प्रज्ञा मेधा स्मृतिः स्थैर्यं ज्ञानादाववसीयते ।
वैशारद्यं तथैव स्याद्विराजो ऽपि महाधियः ॥७८॥

(This is to the contrary:)¹ There might be the knowledge of the Ātman due to the rise of good means, as (is noticed) in the world; as in the case of men, intelligence, power of grasping, memory, firmness and clarity culminate into knowledge etc. through the instruments of action which have originated from (earlier) holy acts, so also (would they be) in the case of the highly intelligent Virāj. [77-78]

The first line of verse 77 is explained in the following three lines (viz. the second line of verse 77 and verse 78). The first line of verse 77 refutes the objector's view that there does not arise any knowledge on the part of Prajāpati.

¹ *vā* is *pakṣavyāvṛttyartha* (cf. SP).

ज्ञानमप्रतिघं यस्य वैराग्यं च जगत्पतेः ।
ऐश्वर्यं चैव धर्मश्च सहसिद्धमिति स्मृतिः ॥७९॥

Thus it is stated in a Smṛti¹ 'In the case of the Lord of the world, (the four, viz.) *vairāgya*, *aiśvarya*, *dharma* and unbounded (or, unobstructed) knowledge are born together

with him.'

[79]

Here is a citation to prove the clarity of Prajāpati's knowledge. Prajāpati and his knowledge etc. co-exist.

¹Though Sureśvara calls it, it is *Vāyuprāṇa* 1.1.3: *jñānam ... dharmaśca siddhicatṣṭayam* (cp. also the same text 1.5.23-24).

सहैव सिद्धं चेज्ज्ञानं भीतिहेतोरसंभवः ।

ध्वान्तापध्वंसिरविणा न तमः सह जायते ॥८०॥

If (one said that) knowledge is natural to (or inborn for) Prajāpati, (the situation would be:) There is no possibility of the rise of (any) fear, for darkness never comes into existence together with the sun that destroys darkness. [80]

If knowledge is already existing together with Prajāpati there cannot be any room for fear. The objection is based on the Smṛti (viz. Purāṇa) which declares the *sahasiddhatva* of ignorance, viz. there would be the contradiction of the Śruti so 'bibhed ... Cf. *Raghuvamśa* 5.13: *sūrye tapaty āvaraṇāya dṛṣṭeḥ kalpeta lokasya katham tamisrā*.

नैवमन्योपदेशार्थप्रतिषेधपरत्वतः ।

सहसिद्धगिरस्तस्मान्नैष दोषः प्रसज्यते ॥८१॥

This is not so since the statement about the natural origination of Prajāpati's knowledge is intent (only) on denying the (possibility of) instruction by any other person (to him); therefore, this fault¹ does not become contingent. [81]

The intention of the description in the Smṛti about the *sahasiddhatva* of Prajāpati's knowledge is properly explained (by the Siddhāntin); he holds that the Smṛti also is as much authoritative and purposeful as the Śruti. Thus, he nullifies the supposed contradiction of the Śruti and the Smṛti.

श्रद्धातात्पर्यशुश्रूषाप्रणिपातादि साधनम् ।

विद्याजन्मैकहेतूनां वैफल्यं चेन्न तद्यतः ॥८२॥

गुणवद्दोषवद्रूपविकल्पितसमुच्चितम् ।

विद्याजन्मैकहेतुत्वाल्लोकवत्स्यात्समञ्जसम् ॥८३॥

If (one said:) Faith being devoted (to the teacher), desire to hear (from the teacher), salutation (to him) etc.¹ are the means (and therefore) there is uselessness of various (productive) causes (that are adduced as) giving rise to knowledge; (we say:) That is not so, because — [82]
the entire combination (of the means) made up of what has merit, what has demerit and what is understood (lit. imagined) by its form is reasonable, as in the common world, for it gives rise only to knowledge.² [83]

Verse 82 implies opposition to Śāstras, e.g. *gurum evābhigacchet, tad viddhi pranipātena* ... as the basis of the objection to be discussed.

¹The word etc. refers to *śama* and others, viz. *śamadamādi-sādhanaśampat*.

²*vidyā* = *vijñāna* 'common knowledge'. This conveys the usefulness of instruction in the practical life; that is the purpose of *gurūpadeśa*.

रूपादिज्ञानसंभूतौ तद्वेतुनामनेकधा ।
विकल्पो दृश्यते लोके तथेहापीति निश्चितिः ॥८४॥

For the rise of the knowledge of form etc. there is noticed in the world variety (lit. numerous divisions) of causes of it (viz. knowledge of form etc.) So also (it is noticed) here (in the case of the knowledge of the uniqueness); this is the decision. [84]

The word *lokavat* in the previous verse is clarified here.

गुणवद्दोषवत्त्वं च तथैव च समुच्चयः ।
प्रबोधोत्पत्तिहेतूनां दृष्टो बोधादिकार्यकृत् ॥८५॥

It is noticed that in the case of the causes for the rise of the knowledge (of the uniqueness of the Ātman) there is merit, fault and (also) combination of them¹ which are the causes of the rise of the knowledge² etc. [85]

Not only *vikalpa* (stated in the preceding verse) but *guṇavat-tvādika* are seen (NKL).

¹This refers to *śraddhā*, *tātparya* etc. mentioned in verse 82 above.

²*rūpādidhikāryānurodhī ca samuccayādiḥ* (SP); i.e. the word *ādi* means: behaviour (*vyavahāra*).

वृषदंशादयो रात्रौ नेत्रगोचरसंगति-
मात्रेण रूपं वीक्षन्ते नापेक्षन्ते ततो ऽपरम् ॥८६॥

A cat etc. do see the form (of an object) during night by mere contact of that which falls in sight.¹ They do not expect any (means) other than that. [86]

This has a reference to *vikalpa* mentioned in verse 84. SP refers it to the option regarding the performance of a *homa* before or after sunrise.

¹This is based on the experience of the cats' catching mice etc. even in the dark of the night. The cat stands for other beings who are active in the night. Not a properly scientific reason!

अतीतानागताद्यर्थज्ञानोत्पत्तौ च हेतुताम् ।
योगिनां मन एव स्यादस्माकं सर्व एव तु ॥८७॥

In the case of the Yogins it is *manas* that becomes the cause for the rise of the knowledge of the objects of the past, the future etc.; but in our case, all (viz. the combination of all the means of knowing is the cause). [87]

vikalpa 'variety (or, numerous divisions)' in the above discussion is clarified by reference to the Yogins as against common men.

दोषवद्गुणवत्त्वेन विकल्पो ऽनेकधा पुनः ।
मातृमानप्रमेयाणां गुणवद्दोषवत्त्वतः ॥८८॥

Variety is multifold on account of (the common knowers) being possessed of merit, demerit etc. and also on account of the knower, the means of knowing, the object of knowing being

possessed of excellence and fault.

[88]

Yet further explanation is offered of *vikalpa*. NKL explains merit etc. of *mātr*, *māna* and *meya*.

नातिक्रान्तभवे त्वासीद्ब्रह्मविद्या प्रजापतेः ।
इत्येतद्गम्यते ऽविद्याभयारत्यादिमत्त्वतः ॥८९॥

Indeed, Prajāpati did not have the knowledge of the Brahman in his past life — this is inferred from his being possessed of ignorance, fear, want of delight etc.¹ [89]

When Prajāpati was a sacrificer (*yajamāna*), there was not on his part the knowledge of the true nature of the inner self (or the Brahman). This is clarified by citing the reason for it in the second line.

¹The word etc. stands for hunger and the like.

विद्यायां चेन्न मोक्षो ऽभूत्कस्याशा नो वृथा भवेत् ।
मोक्षे भयश्रुतेर्नार्थस्तत्र को मोह इत्यतः ॥९०॥

If there did not result liberation (for one), after one acquired the knowledge of the true nature of the Brahman, whose hope (for it) would not be in vain? If there was heard (the existence of) fear¹ in (the state of) liberation, what would be the purpose (served by the Śruti) 'What ignorance (would) there (be) ...?'²?

[90]

¹NKL reads *mokṣe 'bhayaśruteḥ* ! Also, NKL's construe of the verse is difficult to follow.

²*Īsopaniṣad* 7.

The destruction of fear on the part of Virāj has resulted from the knowledge of its oneness with the Ātman. On the contrary, the objector holds that the destruction of fear in Virāj is caused by the knowledge of the uniqueness of itself. Now will follow the objection in verses 91 to 102 and the answer to it in verses 103

and 104.

एकाकिनो विराजो वाविद्यासंवीतचेतसः ।
पूर्वजन्मोत्थसंस्काराद्भयमाविरभूदिह ॥९१॥

(Or perhaps such is not the case:¹ Here) in the case of the lonely Virāj,² whose mind was wrapped (lit. woven) with ignorance, there arose fear on account of the impression arising (i.e. continuing) from (its) previous life. [91]

Firstly, the objector states the purpose of *so 'bibhet*.

¹The word *vā* is there to object to Sureśvara's view and to declare the beginning of an objection.

²That is, which existed without the manifestation (of any second object).

भयप्रद्वंसिनं हेतुमीक्षाचक्रे ऽथ जातभीः ।
मत्तो यन्नान्यदस्तीति ह्यथ कस्माद्विभेम्यहम् ॥९२॥

He, who was overcome with fear, thought over the cause which would destroy (his) fear, (viz. thus expressed in the sentence:) 'Since there is nothing else than myself, what then I am afraid of?' [92]

The first line states the meaning of *sa hāyam* etc. and the second line states that of *yan mad anyan nāsti*.

एक एवाहमस्मीह द्वितीयाद्वि भयोत्थितिः ।
द्वितीयो न मदन्यो ऽस्ति कस्माद्वेतोर्भयं मम ॥९३॥

Here (i.e. in this world) I am the only one. (And) there (can be) the rise of fear (only) due to the existence of some second (person). A second person other than myself does not exist. Therefore,¹ what should I be afraid of? [93]

This is the paraphrase of the thought in the second line of verse 92 above.

¹This is for *iti* which is explained by SP as *īkṣāsamāptiyartha*.

तत एव विराडैक्यविज्ञानादेव तद्वयम् ।
वीयाय न परज्ञानादतो ऽरतिरपीष्यते ॥९४॥

Only from that, i.e. by means of the knowledge of (his own) uniqueness, Virāj overcame that fear, not by means of the knowledge (the non-existence)¹ of another apart (from himself). Therefore, (his) want of delight is also understood (i.e. expressed). [94]

The meaning of *tata evāśya* ... is stated.

¹This can also mean the highest, i.e. Ātman = Paramātmān.

एकाक्यस्मीतिविज्ञानात्त्रैलोक्यात्मैकगोचरात् ।
अगाद्धयं यतो ऽतो ऽभूदरतिस्तस्य कामिनः ॥९५॥

Since he was afraid on account of that knowledge 'I am all alone.' which has within purview himself as the only object, in the three worlds; therefore, there was want of delight on the part of him, who had desire, [95]

The fear-removing knowledge of the oneness of Virāj with the Ātman might also remove his want of delight; yet it was not there! Only the feeling of loneliness caused the want of delight.

सम्यग्विज्ञानविध्वस्तावविद्यायाः कतो ऽरतिः ।
ध्वस्तान्धयस्यापि सा चेत्स्यादनिर्मोक्षः प्रसज्यते ॥९६॥

(This was so because,) where could (at that time) be there the want of delight which would result from the destruction of (ignorance) by the right knowledge (viz. knowledge of the true nature of the Ātman)? And if it be said that (want of knowledge) was there even in the case of the one, whose darkness was destroyed, then it would be contingent that there is no liberation ! [96]

This verse answers a possible doubt that there can be want of delight on the part of Prajāpati owing to his not keeping from

sacrificial activity. That is to say, the knowledge of the oneness (cf. verse 94 above) does not remove Prajāpati's fear.

नाविद्याघातिविज्ञानाद्व्यध्वस्तिरभद्विभोः ।
अरत्युद्धूतिलिङ्गेन ह्ययमर्थो ऽवसौयते ॥९७॥

In the case of the all-pervading (Virāj), the removal of fear did not follow from the knowledge which destroyed (his) ignorance; indeed, this thought can be gathered from the characteristic, viz. the rise of the want of delight. [97]

It is concluded that the removal of the fear of Prajāpati does not result from *parajñāna*.

न चेहावसरो ऽस्त्यस्य सम्यग्ज्ञानस्य कश्चन ।
पिण्डसृष्टौ प्रवृत्तायां नाकस्माज्ज्ञानगीः शुभा ॥९८॥

Also, there is not any chance for (the rise of) of the right knowledge (of the true nature of the Ātman) whatsoever. When there has begun (the statement about) the creation of beings,¹ a sudden statement about the rise of knowledge is not welcome. [98]

The first line says that it is not the case that the removal of fear on the part of the Virāj has resulted from *parajñāna*. Then, the second line says that there is no scope for the statement of *parajñāna* when the matter of creation of Manu etc. is on hand.

¹The argument pertains to avoidance of discontinuity of the topic (*prakaraṇaviccheda*)— this is thus clarified: *piṇḍaśabdena manvādideho grhyate; akasmāt prakaraṇavicchedam vinety arthah* (SP).

प्रक्रियानुचितं वस्तु सुसाध्वपि समीरितम् ।
अकालकुसुमानीव नैव प्रीतिकरं सताम् ॥९९॥

Indeed, even an extremely well-expressed (idea) which is unsuitable in some (particular) process of thought¹ does not

bring delight to the good, (even) as untimely blossoming flowers
(do not bring delight.) [99]

¹That is, context.

²Sureśvara thus illustrates the thought of BUB: *viśiṣṭaphalam
api paraikyajñānam avasaradustham viduṣām na hṛdayaṃgamam.*

मिथुनारतिमोहादेः प्रत्यग्याथात्म्यवेदिनः ।
आगमैस्तु निषिद्धत्वात्कुतस्तस्येह संभवः ॥१००॥

Since it has been denied by the Śrutis that, in the case of the knower of the true nature of the Ātman, there exists a couple (pair/duality), viz. want of delight and ignorance etc.¹, how can there be then the existence of that (i.e. of one who has desires etc.) here (in the state of Prajāpati/Virāj)?² [100]

¹The word etc. stands for a second object, its characteristics and so on.

²That is, when there is the context of the origin of Prajāpati.

आत्मक्रीड आत्मरतिः क्रियावानिति चागमः ।
तथात्ममिथुन इति यस्त्वात्मरतिरित्यपि ॥१०१॥

And there is the Śruti statement 'He (viz. the knower of the real nature of the Ātman) plays with himself, takes delight in himself, and thus acts (alone); and also he is paired only with himself.'; so also there (the Śruti statement) *yas tv ātma-ratiḥ* ... [101]

कार्यकारणसंबन्धः साविद्यस्यैव युक्तिमान् ।
अपूर्वानपराद्युक्तेर्न ध्वस्तान्ध्यस्य युज्यते ॥१०२॥

The cause and effect relation can reasonably be spoken of in the case of only the one who is overpowered by ignorance. It is not mentioned (lit. employed) in the case of one whose darkness (viz. ignorance) is destroyed; (this is so,) on the basis of the statements (in the Śruti) about *apūrva*, *anapara* etc.

There is another reason why it is said that the knowledge of Virāj is the destroyer of fear; but not *parajñāna* (is the destroyer of it).

अप्युत्पन्नात्मबोधानामधिकारासमाप्तिः ।
 अरत्यादि यथा दृष्टं तथैव स्यात्प्रजापतेः ॥१०३॥
 अप्रविष्टस्वभावस्य सशब्देन परिग्रहात् ।
 स एष इत्यत्र वाक्ये नैवाकस्मिकशब्दनम् ॥१०४॥

[To the elaborately stated view of the objector, Sureśvara makes an answer in the following two verses.]

(The answer to this is:) The fact is that, as we see want of delight etc. in the case of those who have not acquired the knowledge of the Ātman up to the end of the period of their performing duties which are enjoined (on them), so also it is that it could be in the case of Prajāpati as well.

[103]

Since in the sentence, *sa eṣa* ..., the word brings in (the idea of the Brahman) which has not entered into (i.e. undergone a change into) its own modification, there is thus not a sudden¹ mention (of the Brahman).

[104]

SP points to Vaśiṣṭha and Vāmadeva and others who continued to perform their duties, even after attaining the knowledge of the Ātman.

There was a reference to 'untimely blossoming flowers' (verse 99); that meant untimely or uncalled-for discussion. This verse answers away that point. The Brahman, stated in *yan mad anyan nāsti*, intends to praise the Brahman. By the word *sa* of *sa eṣa iha praviṣṭaḥ* (1.4.7) there is praise of the Brahman. So also in *tad dheham* (1.4.7) — this is *prastutaparāmarśa* (eva) (NKL).

¹It means: unreasonable.

असंतोषाक्षमाहेतोश्चेतसो या ऽनवस्थितिः ।
 सा विध्वस्तात्ममोहस्याप्यरतिः संबभूव ह ॥१०५॥

[Verses 105-118 are Sureśvara's Vārtika on BU 1.4.3. The creation of Manu and human beings is explained.]

That unsteadiness of mind (of Virāj) which had its cause in the absence of satisfaction, the absence of forbearance, (in other words), the want of delight did¹ result in the case of him (Prajāpati) whose ignorance of the inner self was destroyed.

[105]

The meaning of the word *arati* in the beginning of BU 1.4.3: *sa vai naiva reme* 'he did not feel pleasure at all' is explained.

¹This is the force of *ha* which is *avadhāraṇārtha* (SP).

यतो ऽरतिग्रहस्तधिषणो ऽभूत्प्रजापतिः ।

एकाकी तेन तत्सृष्टावेको न रमते नरः ॥१०६॥

Since Prajāpati had his intellect overpowered by (the clutches of) the evil being, viz. *arati* 'want of delight', a man¹ in his creation (also) does not feel delight when he is alone. [106]

This explains *tasmād ekākī na ramate*. Note NKL: *kāryagatam aramaṇam kāraṇasthasya gamakam*.

¹*naraśabdenāvidvān manuṣyatvādyabhimānavān ucyate* (SP).

श्रौत्यानया प्रसिद्ध्या तु कार्यलिङ्गैश्च कारणम् ।

सदानुमिन्वते सांख्यास्तथा चान्ये ऽपि वादिनः ॥१०७॥

The Sāṃkhyas (even) infer (the existence of Puruṣa or Prajāpati) the cause from the characteristics of the effect and also from this well known statement of the Śruti. And the propounders of different views also¹ (infer) in the same way.

[107]

In verse 106, it is said that *arati* found in the effect is derived from that which had occurred in the cause. Such a view is held by others (i.e. the Sāṃkhyas and the Naiyāyikas etc.) who hold that the cause is inferred from its characteristics persisting in its

effects.

¹The word 'also' refers to the thinkers who do not hold *svabhāvavāda* in respect of creation (SP). This is, according to the Vedāntin, *bhrānti* 'wrong understanding' (NKL).

अरत्यपनुत्सुः सन्स द्वितीयं यथारुचि ।
विराडैच्छदृते ऽविद्यां नेच्छेशस्योपपद्यते ॥१०८॥

Virāj, who was desirous of driving away the want of delight, wished for (some) second according to his choice; (for) indeed, without ignorance, a desire cannot be (considered as) reasonable on the part of that Lord. [108]

Here is stated the meaning of *sa dvitīyam aicchat*. It is before the rise of the knowledge of the Ātman that the ignorant has any desire.

सो ऽरत्यतिग्रहाविष्टस्तदपध्वस्तये विराट् ।
संसक्तजायापुंमानो यावांस्तावान्बभूव ह ॥१०९॥

That Virāj, who was overpowered by the evil being (in the form) of the want of delight became possessed of that measure which a man and wife together in union (are known to have) in order that the want of delight be destroyed. [109]

This explains *sa haitāvānāsa*.

स्त्रीपुमांसौ परिष्वक्तौ यावन्मानौ बभूवतुः ।
स तावत्परिमाणो ऽभूद्योगेन परमेश्वरः ॥११०॥

By his Yogic power¹ that highest Lord became possessed of that measure which a man and wife have, when engaged in union. [110]

This explains *yathā strīpumamsau sampariṣvaktāu*. The NKL edition reads *strīpumsau sampariṣvaktāu*.

¹The word *yoga* is explained in SP: *dhyānakarmatadvāsanāśahita-saṃkalpasāmarthya*; in NKL: *upāśanakarmasāmarthya*.

इच्छामात्रमरत्युत्थं पुंस्यलब्धस्थिति स्त्रियम् ।
प्रयुङ्क्ते योग्यतस्तस्यास्तदलब्धवारतिः प्रभोः ॥१११॥

Mere desire, which has arisen from the want of delight, does not find (its fulfilment) in a man and, then, employs a woman because of her suitability (for effecting the fulfilment); therefore, there was want of delight on the part of the Lord when (i.e. since) he did not find that (viz. woman). [111]

An answer is given to the possible question: How is it possible to say he wished for a woman on the basis of the Śruti 'He wished to have a second one.'? Also, how is there the example of a woman?

उपस्थिते च मनसि तस्य योषिदभूत्क्रतोः ।
सत्यसंकल्पहेतोः स स्त्रीसक्त इव चाभवत् ॥११२॥

When (such a desire) appeared in his mind, there appeared (i.e. came out) a woman from the very thought of him whose thought (i.e. desire) always proves (i.e. shows to be) true and he became attached to the woman, as it were¹. [112]

An argument can be made thus: There is the removal of the want of delight due to the contact with a woman — then why is not mentioned the birth of a woman? The first line answers it. The second line then states the reason, viz. the ever coming true of Prajāpati's desire. Therefore, after a woman was born from his mind, he has attachment towards her, as seen in the world.

¹The words *strīsakta iva* can be alternatively translated as 'like one attached to a woman'.

मिथुनद्वारिका यास्य सृष्टिः सैवाधुनोच्यते ।
यतो ऽसाविममेवाथ द्विधात्मानमपातयत् ॥११३॥

Now is described that creation of his which came through the creation of a couple, because that one later on made this body¹ itself into two. [113]

This explains *sa imam evātmānam dvedhāpātayat*.

¹ *ātmānam = ātmadeham*.

इममेवेत्यवधृतेर्न विराजो द्विधाभिधा ।

यः स्त्रीपुंस्परिमाणो ऽभूत्स एवातो द्विधाकृतः ॥११४॥

Since there is the assertion *imam eva*, there is no mention of Virāj as divided into two.¹ And what was his modification in the form of woman and man itself became his division into two.

[114]

In the case of the act of parting into two, a single Virāj being the *karṭṛ* 'agent' cannot have the nature of both *karṭṛ* and *karman* 'object'. Hence, in order to answer away that difficulty the first line points to his being the *karṭṛ* and the second line to the *piṇḍa* (viz. body — cf. the preceding verse) as the *karman*; and, therefore, there is no contradiction involved therein. This is the purpose of *sa imam eva dvidhā (ātmānam) apātayat*.

¹That is (i) Virāj as he was born and (ii) Virāj who assumed the form of a couple in union (as referred to above in verse 110).

पातनादेव निर्वृत्तेः पतिपत्न्यौ जगत्यपि ।

योषिद्विदलवद्भाति पुंसः शक्त्यादिभागवत् ॥११५॥

Because there was the creation of man and woman from the division (of Virāj), therefore, in this world a husband and a wife (come into existence as two persons); (and) the woman appears as a part divided from the man like two parts of a shell etc.¹

[115]

This is the meaning of the word *tataḥ* in BU 1.3.4.

¹The word etc. refers to a bamboo and the like.

स्त्र्याकाङ्क्षो हि तु भागो ऽयं पुमाकाशस्ततः स्त्रिया ।

सम्यगापूर्यते व्योम शक्तिसंपुटवद्ध्रुवम् ॥११६॥

This part of (Virāj) is indeed desirous of a woman and therefore it¹ is satisfactorily filled by a woman like the hallow

of a shell.

[116]

This explains *tasmād ayam ākāśaḥ* in BU 1.3.4.

¹The word *vyoman* means *pumākāśa* (NKL).

विराजमसृजद्ब्रह्मा सो ऽसृजत्पुरुषं विराट् ।
पुरुषं तं मनुं विद्धि यस्येयं मानवी प्रजा ॥११७॥

The Brahman created Virāj (and) that Virāj created a man. You should know that man to be Manu from whom¹ has proceeded this creation of human beings. [117]

In *dvedhā 'pātayat* it is intended to say that there was the creation of Manu and Śatarūpa. One should not doubt that the creation of them was not mentioned (*anukta*).

¹Translation follows the reading in the AnSS edition, viz. *yasyeyam*. The NKL edition reads instead: *kasyeyam mānavī prajā* (to be translated as) 'The human race is (thus) the offspring of Prajāpati (= Ka)'.

तां स्त्रियं मैथुनेनाथ मनुः समभवत्तदा ।
स्वकर्मभिर्नियुक्तः संस्तथा चोत्पाद्य कर्मभिः ॥११८॥

Then¹ Manu united with that woman in a sexual intercourse, enjoined as he was in (the performance of) his own duties and also having created (offsprings) as his duties¹. [118]

This explains *tām samabhavat, tato manuṣyā ajāyanta* in BU 1.4.3.

¹The word *atha* means: when Manu was together with Śatarūpa, i.e. after Prajāpati made himself into two: Manu and Śatarūpa.

²To tell the truth, we are not sure of our translation of *tathā cotpādya karmabhiḥ*.

भूरिजात्यभिसंबन्धो जन्यकर्मवशात्स्त्रियाः ।
मनोश्चैवं ससर्जेदमापिपीलिकमात्मनः ॥११९॥

[Verses 119 and 120 briefly state the meaning of BU 1.4.4.]

There is the connection of a woman as also of Manu with various species on account of the action(s) to be produced. Thus he (Virāj) created from himself this (world) up to an ant. [119]

The intention of *sā gauḥ* is thus brought out. And *evam ... ātmanah* states the meaning of *evam eva yad idaṃ kiṃ ca mithunam ā pipīlikābhyah tat sarvam asṛjata*.

द्वंद्वयुक्तं जगत्स्मिन्यावत्किञ्चित्समीक्ष्यते ।
तदस्राक्षीन्मनुः सर्वं स्त्रीपुं द्वंद्वप्रयोगतः ॥१२०॥

Whatever is seen in this world as made up of pairs, all that has Manu created by employing the pair of man and woman. [120]

This explains the contents of the preceding verse. The creation of a cow etc. as said above is alone not meant. The creation of man and woman also is intended.

मनोः सशतरूपस्य पिण्डसृष्टिरिहोदिता ।
सोमाग्नीन्द्रादिका यापि साप्युक्तवदपेक्ष्य सः ॥१२१॥

[Verses 121-124 are the explanation of BU 1.4.5.]

Here is mentioned the creation of all beings (of this world) from (lit. of) Manu, who was united with Śatarūpa, (that creation) beginning with Soma, Agni, Indra etc.; (for) he (created) that also, having thought about it (in the manner) already stated. [121]

जगत्सृष्ट्वात्मनः साक्षाज्ज्ञानकर्मादिसाधनः ।
अवेत्सृष्टं जगत्स्रष्टा ह्यहं वावाखिलं जगत् ॥१२२॥

He (Manu/Virāj), who was possessed of the means (of creation), viz. knowledge and action, created the world from himself. He (fully) knew the world that was created and (thought to himself) I, the creator, am indeed (this) entire world. [122]

This explains *so 'vet ... sarvam asṛkṣīti*.

अहं वाव जगत्सृष्टं यतो ऽसृक्ष्यहमेव तत् ।
सृष्टिनामा मनुर्जात एतस्मादेव कारणात् ॥१२३॥

Indeed I am this world which is created, since I myself have created that. For this very reason, Manu became known by the name *sṛṣṭi*. [123]

This explains *tataḥ sṛṣṭiḥ abhavat*.

यथा मनुरिदं सृष्टमहमस्मीत्यबुध्यत ।
एवमन्यो ऽपि यो वेद सृष्टिकृत्स्यादसावपि ॥१२४॥

As Manu knew 'I am all this creation.', similarly would another person also, who (thus) knew, be the creator of (some) creation. [124]

This explains *sṛṣṭyām ...*, i.e. *phalavacanaśruti*.

BU 1.4.6 is to be explained hereafter. Verses 125-142 are the explanation of the creation of favouring fire etc.

सृष्टानामथ भूतानामग्न्यादिप्रमुखा इमाः ।
अनुग्रहीत्रीर्वक्ष्यामीत्यतः प्रववृते श्रुतिः ॥१२५॥

And then proceeded the Śruti (statement) 'I shall describe these helpful ones, viz. Agni etc. who are the principal (deities and) would be helping (the created beings).' [125]

The first line conveys the meaning of *athety abhyamanthat ... antataḥ*.

भेदादधिकृतेरेषामग्न्यादीनामनेकधा ।
भेदो वर्णेषु सर्वेषु ब्रह्मक्षत्रादिलक्षणः ॥१२६॥

Since in the case of Agni and others there is various distinction in respect of their fields of activity enjoined on them, therefore, in the case of them also, there is differentiation into all castes characterized as Brāhmaṇa, Kṣatriya etc. [126]

We see here the mythological trends: Gods also have among them division as the human beings have among themselves, viz. Brāhmaṇa etc. SP and NKL refer to Śākalya Brāhmaṇa as a pointer to this.

अनुग्राहकदेवानां सर्गो ऽयं प्रस्तुतो महान् ।
तत्राग्नेरुदितोत्पत्तिर्न त्विन्द्रादेरिहोच्यते ॥१२७॥

This extensive creation of the favouring deities is begun (i.e. introduced) here. In that, the origin of Agni is stated, but (that) of Indra etc. is not so expressed. [127]

The creation of Indra etc. is not stated in that Śruti passage. The intention for so doing is stated in the next verse.

अविद्याधिकृतौ तेषां सृष्टिरूध्वं प्रवक्ष्यते ।
कर्माधिकृतिसंबन्धप्रतिपत्त्यर्थमेव तु ॥१२८॥

Creation of them will be stated later at the time of enjoining some ritual activity (influenced by) ignorance (and that will be) in order to convey their relation to the injunction of action. [128]

Gods are subordinate to action which is of the nature of ignorance, therefore, some information about them is necessary for the performance of their action; they are not so related to knowledge.

तं सर्गमुक्तवत्सर्वमपेक्ष्येहोपसंहतिः ।
अविद्वद्देवताभित्तिप्रतिषेधाय सांप्रतम् ॥१२९॥

Having kept in view that creation as the one stated (before)

there is here the conclusion (of the *kaṇḍikā* in the Śruti). It is proper (to have it there) for denying the notions of the not-knowing about the deities. [129]

An objection could be: If it is intended to state the creation of Indra etc., the concluding statement *eṣa u hy eva sarve devāḥ* would not be proper. The first line is an answer, viz. the Śruti statement *tad yad idam āhuḥ ... eṣa u hy eva sarve devāḥ* intends to deny multiplicity of gods — rather, it asserts the existence of only one deity in various forms.

गुणोत्पत्तिक्रियारूपस्तुतिनामाद्यपाधिभिः ।
बिभित्सन्ति स्वतो ऽभिन्नां दैवतां मूढदृष्टयः ॥१३०॥

Those, whose sight is blinded (i.e. who do not see), seek to differentiate (into multiplicity) the god, who is not differentiated (into many deities), by means of (a number of) limiting adjuncts, viz. quality, origin, activity, form, praise, name etc.¹

[130]

There is the differentiation of but one god into many gods due to various factors responsible for distinction such as *guṇabheda* in *agnaye pāvakāya*, *agnaye śucaye* etc.; cf. SP: *karmabhedavat tad-antarbhūtadevatābhedaḥ*.

¹The word etc. refers to some particular attribute, repetition etc.

यदिदं कर्मिणः प्राहुः कर्मभूमावमेधसः ।
अमुमग्निममुं सोमं यजेति यजिसंश्रवात् ॥१३१॥

What the ritualists, the ignorant ones,¹ have said in relation to ritual, viz. 'Offer to this Agni, to this Soma etc.', is on account of their resorting to the action of ritual or to the use of the verb root \sqrt{yaj} . [131]

The words *amum yaja amum yaja* are explained.

¹They are ignorant about the real nature of one god or the highest Ātman.

यजेति लिङ्गान्निन्दैषा कर्मिणामेव गम्यते ।
न तु विध्वस्तमोहानां प्रत्यङ्मात्रैकशायिनाम् ॥१३२॥

It is understood from the characteristic word *yaja*¹ that this is merely a censure of the ritualists,² but not of them who have their ignorance destroyed and thus rest only in the inner self. [132]

¹This stands for *amum agniṃ yaja, amum indraṃ yaja*.

²Because they understand the Ātman as otherwise, viz. differentiated in multiplicity of gods; cf. SP's reference to the Smṛti passage *yo 'nyathā santam ātmānam ...* (*Mahābhārata* 1.68.26).

यस्त्वात्मरतिरेव स्यादात्मतृप्तश्च मानतः ।
आत्मन्येव च संतुष्टस्तस्य कार्यं न विद्यते ॥१३३॥

But there is nothing to be done by that man, who would take delight in himself¹, who would be pleased in himself, and who would be satisfied with himself.² [133]

¹The word 'himself' stands for the inner self which is not different from the Ātman (Supreme Self).

²This is a citation from *Gītā* 3.17. SP points out that this verse follows another, viz. *na hi kaścit kṣaṇam api ...* which could be misunderstood as a censure of those who possess knowledge about the Ātman.

उत्पन्नैकात्म्ययाथात्म्यभास्वद्विज्ञानभास्कर-
संप्लुष्टाविद्याबहुलतमसां कर्मनिहृतिम् ॥१३४॥
सर्वकर्माधिकाराणां निषेधं प्रत्यपीपदत् ।
पुराणः शाश्वतो विष्णुः प्रपन्नाय किरीटिने ॥१३५॥

The Lord, the ancient eternal Viṣṇu, declared to Arjuna the absence of action in the case of them whose thick darkness of ignorance is fully removed (lit. burnt) by the bright sun of knowledge whereby the awareness of the uniqueness, viz. of the true nature, has arisen and the complete denial of

all action and injunctions¹.

[134-135]

One would object: In the *Gītā* passage cited in the previous verse, it is said that there is no action in the case of the liberated, but such is not the case with a knower. To this, these two verses are an answer; they bring out the purport of the *Gītā* passage.

¹This indicates the various qualifications of a sacrificer.

मिथो भिन्नं यदाहुस्त एकैकं देवमध्वरे ।
तदसत्प्रतिपत्तव्यं यतो ऽभिन्नैव देवता ॥१३६॥

It should be taken as untrue (i.e. wrong) that they have described each of the deities of the sacrifices as different from another, since that deity is (in reality) not distinct (from the one divinity).¹

[136]

This explains *tan na* in BUB. This has a reference to *yad idaṃ karmināḥ* ... in verse 131 above.

¹The basis for this argument is: *viśvam bhūtam bhuvanaṃ citraṃ bahudhā jātam jāyamānam ca yat sarvo hyeṣa rudraḥ* (*Taittirīya Āraṇyaka* 10.16.1) and *ātmaiva devatāḥ sarvāḥ* ... (*Manusmṛti* 12.119 (SP)).

भेदग्राहि न नो मानं घटादावपि विद्यते ।
किमु निःशेषभिन्नार्थव्यापिन्यात्मन्यसौ मयि ॥१३७॥

In the case of even a pitcher etc., we do not have such an authoritative means of knowing as grasps its distinction from another. How then can there be that in the case of the Ātman which pervades all the (so-called) different entities? That one (viz. Ātman) exists in me, (thus does one understand). [137]

The question is: There is difference in the individual selves in different bodies, how then could it be said that there is oneness of deities? There is no differentiation in the case of individual selves that could ever be grasped, since there is no authoritative means for grasping it.

नाभावरादिवद्विश्वमध्यात्मादिभागवत् ।
ओतप्रोतात्मना तस्थौ विराट्सूत्रादिवस्तुषु ॥१३८॥

As the spokes (of a wheel) etc. rest in the hub (of it), so also does (this world) which comprises division into bodily forms etc. remain in the things (lit. the existents), viz. Virāj, Sūtra etc., that run through it as woven length-wise and cross-wise. [138]

The Śruti alone can be the authority for accepting the absence of differentiation; here the Śruti intended is: *tad yathā arā nābhau samarpitāḥ* (Cp. BU 2.5.15; CU 7.15.1; *Kauṣītakyupaniṣad* 3.8).

विविधास्यैव सा सृष्टिरिति हेतुसमीरणम् ।
कारणं न विहायेह कार्यमन्यत्र वर्तते ॥१३९॥

There is a statement of a cause, viz. the varied creation is his; for here an effect does not exist apart from (lit. leaving) its cause. [139]

There is the assertion which explains the non-distinction of the deities: *eṣa u hy eva sarve devāḥ*. Here is stated a reason for this.

यत एवमतो देवाः सर्वे ऽपि स्युः प्रजापतिः ।
तस्यां तस्यामधिकृतौ तत्तद्रूपं प्रपद्यते ॥१४०॥

Since this is so, all the gods also are (lit. would be) only Prajāpati¹, (and) in respect of each injunction, (Prajāpati) assumes a different form². [140]

¹This is the sentence of assertion (*pratijñānāvākya*).

²All the world of gods in various forms is the effect of Prajāpati, i.e. not different from him — this clarifies the assertion.

एक एव तु विश्वात्मा मायया मोहयञ्जगत् ।
एकतां बहुतामेति कुम्भवन्मणिसंश्रयात् ॥१४१॥

Indeed one single Ātman (resting) in all, causing by his own power a sense of wonder in the (whole) world (remains) single or becomes many in the same way as a pitcher (appears one or many) by resorting to¹ some jewel. [141]

When Prajāpati is in contact with the effect here and there he takes the forms of this or that, viz. Indra, Varuṇa etc.

¹That is, reflecting itself in its various cuts.

अभिन्न एव भूतात्मा प्रतिभूतसमाप्तिः ।
एकधा बहुधा चैव दृश्यते जलचन्द्रवत् ॥१४२॥

The Ātman (of all beings)¹, not being distinct (from them), is (yet) seen as one or many as it has assumed the form of that (or those) being(s), in the same way as the moon in water (in different places).² [142]

¹This is Virāj.

²NKL cites a similar verse of the *Yogavāsiṣṭha*:

*eka evānubhūtātmā bhūte bhūte vyavasthitah /
ekadhā bahudhā caiva drśyate jalacandravat //*

[variant of first pāda = *eva hi bhūtātmā*] Not traced. But see in *Yaśastilakacampū*, vol.2, p.273, line 9 (by Somadevasūri, <a Jain work of the 10th cent. A.D.> *Kāvya-mālā* 70, 2 vols., Bombay: Nirnayasagar Press, 1903 & 1916)

अत्र विप्रतिपद्यन्ते तदन्यात्मनिषेधिनः ।
हिरण्यगर्भ एवात्मा यः परात्मेति गीयते ॥१४३॥
संसार्येवेह स इति तथान्ये ऽपि प्रचक्षते ।
पक्षयोरनयोः श्रेयान्कः पक्ष इति चिन्त्यते ॥१४४॥

[Verses 143-148 confirm the nature of Prajāpati who is said to be of the nature of all gods. Prajāpati is understood in two alternatives: (i)He is transmigratory *samsārin*), (ii)he is non-transmigratory (*asamsārin*).]

In this regard, (thinkers) who (want to) deny the (existence of any) other Ātman, hold different opinions: Hiranyagarbha

himself is the Ātman who is described (lit. sung) as the highest Ātman; so also others say that he is but a transmigratory (being). (Therefore) it is now considered as to which of these two views is better (i.e. acceptable). [143-144]

The first alternative occurs in second half of the first and the second lines of verse 143, and the second alternative in the first line of verse 144.

विरिञ्च एव तु परो मन्त्रब्राह्मणवाक्यतः ।
इन्द्रमित्यादिमन्त्रोक्तिरेष ब्रह्मेति च श्रुतिः ॥१४५॥

From the sentence in the Mantra Brāhmaṇa (it is indeed¹ known that) Viriñca himself is the highest (Ātman). The statement of the Mantra is *indram* ...and the Śruti *eṣa brahma*.² [145]

¹This is for *tu*.

²These are the basis for the first alternative: Cf. *indram mitram varuṇam agnim āhuḥ* (*Rgveda* 1.164.46) and *eṣa brahmaiṣa indra eṣa prajāpatir ete sarve devāḥ* (*Aitareyopaniṣad* 5.3), cited in BUB.

एतमेके वदन्त्यग्निं यो ऽसावितिस्मृतेरपि ।
संसार्येव स विज्ञेयः श्रुतिमन्त्रस्मृतीरणात् ॥१४६॥

And¹ some state that he is Agni, (this) on the basis of (a verse in) a Smṛti² which begins with the words *yo 'sau* ...³ They state that he has to be known as a transmigratory being, for there is the statement in Śruti, Mantra and Smṛti⁴. [146]

The second line supplies the basis for the second alternative mentioned above.

¹This is the meaning of *api*.

²*Manusmṛti* 12.123ab: *etam eke vadanty agniṃ manum anye prajāpatim*.

³*Manusmṛti* 1.7.

⁴Śruti and Mantra are cited in the previous verse; Smṛti in this.

पाप्मदाहारतिभीतिमर्त्यत्वादिश्रुतेर्मितेः ।

हिरण्यगर्भमिति च स्मार्तान्यपि वचांसि नः ॥१४७॥

(This is to be said) on the basis of inference from the Śruti statement about the evil, burning want of delight, fear, mortality etc.¹; (and also there are known) to us the statements of the Smṛti (such as) *hiranyagarbham* ... [147]

The first line shows the Śruti and the words signify the Śruti, *sa dvitīyam aicchat*. And the second line cites the Mantra, *hiranyagarbham* ...

ब्रह्मा विश्वसृजो धर्म इति कर्मफलात्मता ।

स्मृत्याप्यभाणि बहुशः कस्य संसारिरूपता ॥१४८॥

Also, the Smṛti has declared in many ways¹ the nature of Prajāpati² to be transmigratory existence, the result of (ritual) activiti(es), viz. Brahman, the creator of this world³, and Dharma⁴. [148]

The basis of this verse is *Manusmṛti* 12.50ab: *brahmā viśvasrjo dharmah mahān avyaktam eva ca*. The word *mahān* stands for Prakṛti and *avyakta* for the Sūtrātman; but these last two are not mentioned by Sureśvara (though SP and NKL cite the full line and explain the same).

¹Or alternatively, so many times.

²This is Ka.

³This is Manu and others (SP and NKL).

⁴This is Yama.

मिथोविरुद्धवादित्वाद्द्वयोरगमयोरपि ।

अप्रामाण्यप्रसक्तिश्चेन्न क्लृप्त्यन्तरसंश्रयात् ॥१४९॥

[In verses 149-153, in contradiction to the objector's view: Virāj is transmigratory, the Siddhānta is explained.]

If it is argued that there results in the case of the two sets

of Āgamas unauthoritativeness, on account of their making mutually contradictory statements,¹ (we say) 'no,' by resorting to another² mode of construing them. [149]

¹The mutual contradiction lies in saying that Virāj, though non-transmigratory, undergoes transmigration on his own.

²That is, proper.

प्रत्यगज्ञानजानेकविविधोपाधिसंगतेः ।

विरुद्धार्थत्ववचसां स्यादेकत्रापि संभवः ॥१५०॥

It is possible that statements expressing contradictory senses¹ can occur together (in a smooth construe) on account of the association of numerous and various adjuncts (in them) which have been understood (lit. resulted) from ignorance about the inner self. [150]

This is an explanation of *klptyantarasaṁśraya* in the preceding verse or of *kalpanāntaropapatti* in BUB. Either phrase can be called *saṁgrahavākya* i.e. *siddhāntasya saṁgrahena pratipādakavākya*.

¹That is, they seem to convey contradictory senses.

अपास्ताविद्यातज्जत्वदस्थूलाद्युक्तिगोचरः ।

स्वाभासाविद्योपाधिः सन्साक्ष्यन्तर्यामितां व्रजेत् ॥१५१॥

Being within the purview of the statement 'not gross' etc., on account of having set aside ignorance and its effect and also being possessed of the limiting adjunct, viz. ignorance, which is but his own appearance¹, the seer can become one² within (a body). [151]

¹This refers to Sureśvara's theory of Ābhāsa.

²It can be literally expressed thus, 'can attain the state of the one within'.

तथा हिरण्यगर्भत्वं बुद्ध्युपाधिः स एव तु ।

तमःसत्त्वरजोयोगाद्याति क्षेत्रज्ञतामजः ॥१५२॥

So also is the character of Hiranyagarbha possible, for he is only possessed of the limiting adjunct, viz. intellect and thus on account of his possessing (lit. contact with) *tamas*, *sattva* and *rajas*,¹ the unborn one becomes *kṣetrajña* 'knower of the field (i.e. body)'. [152]

¹Cf. note on verse 148 above where reference is made to *mahat* (*mahān*) or *Prakṛti*.

अभिन्नबुद्ध्याभिन्नत्वं भिन्नधीभिश्च भिन्नताम् ।
एति चित्स्वतमोहेतोर्न किञ्चिदपि दुःस्थितम् ॥१५३॥

Sentience becomes (known as) non-different (from a person's self) and becomes different through knowing that it is not different (from that person's self) — (this happens) on account of the darkness (i.e. ignorance) of its¹ own; (in this) there is nothing like a bad statement (about the Truth). [153]

¹It means: of sentience.

Verses 154-184 explain the Śruti 'atha yat kiñca ...' (BU 1.4.6).

अशनायावदुत्पत्तेरुत्पन्नाः प्राणिनो ऽखिलाः ।
अत्तारो ऽतो ऽन्नविरहान्नालं स्थानाय संहताः ॥१५४॥

Since the (entire) creation has proceeded from the one who had felt hunger, therefore all the beings have become eaters, and, in the absence of food, they are not able to stand intact¹. [154]

¹This is for *saṃhatāḥ*; though it could be alternatively translated as 'together', yet the togetherness of the beings is not intended.

तस्मात्सोमान्नसृष्ट्यर्थं परो ग्रन्थो ऽवतार्यते ।
यत्किञ्चेदं जगत्सिमन्नार्द्रं वस्तुपलक्ष्यते ।
रेतसस्तत्ससर्जेश उत्पन्नस्थितये ऽशनम् ॥१५५॥

Therefore, the subsequent portion (of the Śruti)¹ is introduced for the sake of (stating) the creation of Soma and (other) food. Whatever liquid (lit. moist) thing is (noticed) in this world, that the Lord has created from His semen, as food for the sustenance of the created (beings). [155]

This is: *atha yat kimcid ārdram tad retaso 'srjata tad u somah ... agnir annādaḥ* (BU 1.4.6).

जगत्कारणरूपिण्य आपो रेतोभिधा इह ।
सोम एवेत्यवधृतेरग्नीषोमव्यवस्थितिः ॥१५६॥

Here,¹ waters, which are of the nature of the cause of this world, are called the semen; from the restrictive words² *soma eva*, it is established that Agni and Soma (were created).³ [156]

An objection on the basis of the Śruti *tā annam asrjanta* (CU 6.2.4) is taken into account. The verse establishes that the universe is of the nature of Agni and Soma.

¹That is, in the Śruti statement *tad retaso 'asrjata*; cf. *apa eva sasarjādaḥ* (*Manusmṛti* 1.8cd).

²Or alternatively, from the assertion.

³Supply: as the eater and the food.

नानाक्रियाभिसंबन्धादग्निः सोमश्च गम्यताम् ॥१५७॥
सोम एवेति तं विद्याद्यद्यग्निरपि हूयते ।
सोमो ऽप्यग्निरिति ज्ञेयो यदि तत्रापि हूयते ॥१५८॥

(And) let it be known that Agni is (called) Soma as well, on account of its relation to different (ritual) activities. [157]

One should know that when Agni also is offered (*hūyate*) it is to be taken as Soma and Soma also is to be taken as Agni if (Soma oblation) is offered in (i.e. unto) him. [158]

This argument rests on the position of Agni or Soma as the grammatical object in the statement about a ritual.

द्वेधा भिन्नं जगत्सर्वमन्नमन्नाद एव च ।
अन्नं चराचरं कृत्स्नमन्नादः प्राण उच्यते ॥१५९॥

This whole universe is divided into two, viz. food and eater of food; all the movable and immovable is food and Prāṇa (i.e. Hiranyagarbha) is called the eater of food. [159]

This verse intends to emphasise that the twofold world (viz. food and eater) culminates into being the Sūtra (Ātman) and, therefore, one who understands all this world as the Ātman is free from every blemish.

फलाभिधित्सयेदानीं देवसृष्टिविदः श्रुतिः ।
प्रवर्तते ऽथ सैषेति तत्स्तुतिस्तावदुच्यते ॥१६०॥

Now proceeds the Śruti about the knower of the creation of the god(s)¹ with a desire to state the fruit (of the Upāsanā²) (and) to begin with, there is made the statement *atha saiṣā* ... as the praise of it (*devasṛṣṭi/phala*). [160]

The verse states the purport of *saiṣā brahmaṇo 'tisṛṣṭih ... bhavati ya evaṃ veda* (latter half of BU 1.4.6).

¹ *deva* = *anugrāhakadeva* 'favouring gods' (already mentioned in verse 127 above).

² That is, worship of the favouring god(s).

अनुग्राहकदेवानां या सृष्टिरुदिता पुरा ।
अतिसृष्टिरनुग्राह्यसृष्टेः सा स्यात्प्रजापतेः ॥१६१॥

The creation of the favouring gods which was earlier mentioned is (lit. would be) Prajāpati's *atisṛṣṭi* 'superior creation' in comparison with the creation of those who are to be favoured. [161]

This is the literal meaning of the sentence *saiṣā brahmaṇo 'tisṛṣṭih*.

अश्रेयोभ्यो ऽनुग्राह्येभ्यः ससर्ज श्रेयसः सुरान् ।

यतो ऽतिसृष्टिस्तेनेयं यैषेहाग्न्यादिरीरिता ॥१६२॥

Since he creates the gods as superior to those who are to be favoured and as such inferior, therefore, this is superior creation (produced) by him, the one which is stated here with the word *agnyādi* in the beginning. [162]

This explains why the creation of favouring gods is superior creation (*atisrṣṭi*).

मर्त्यो वा यजमानः सन्नस्राक्षीदमृतान्सुरान् ।
अतिसृष्टिरतः प्रोक्ता सातिसाध्वीति निश्चिता ॥१६३॥

Or rather¹, the sacrificer (viz. Hiranyagarbha/Virāj), (though) being mortal, created the immortal gods (i.e. this creation of immortal gods); therefore, it is called a superior creation and is decided as extremely good (i.e. excellent). [163]

This meaning of *atha martyaḥ sann amṛtrān asṛjata tasmād atisrṣṭih*.

¹This is an alternative explanation for the superiority of the creation of gods.

प्रजापतिरिवैतस्यां सृष्टौ स्यात्सर्गकृन्नरः ।
यथोक्तसृष्टिविद्यः स्यात्तस्यैतत्फलमीरितम् ॥१६४॥

A man would be a creator as Prajāpati is in respect of this (superior) creation; he would be possessed of the knowledge of (effecting) creation — this is stated as the fruit of that¹. [164]

This states the meaning of *atisrṣṭyām hāsyaitasyām*.

¹Namely, worshipping (or being devoted to) Prajāpati, thereby knowing 'I am Prajāpati.'

अविद्यापटसंवीतचक्षुषामियदेव तु ।
वैदिकं साधनं ज्ञेयं ज्ञानकर्मस्वभावकम् ॥१६५॥
कर्त्रादिकारकापेक्षं विरिञ्चान्तफलप्रदम् ।

व्याकृतं तदशेषेण श्रुत्या व्याख्यायि यत्पुरा ॥१६६॥

It is to be known that, for those whose eyes are covered with the band of ignorance, only this much is the Vedic means having the nature of knowledge and action; [165]

it is expectant of the means of producing (effects), such as an agent etc., and it yields the result up to (the status of) Viriñca. That is expounded in its entirety in the Śruti, as is explained before. [166]

SP and NKL together point out that the knowledge and ritual activities (that is to say, knowledge about the ritual activities and the performance of them as well) would lead only to an impermanent result, i.e. the state of Hiranyagarbha, since they depend on a person (i.e. they are *kāraśādhya* or *puruṣatantra*). They do not lead to liberation which is *mānatantra* or *vastujñānatantra* 'dependent on the knowledge of the nature of Reality'. Also it is known that the state of Hiranyagarbha is affected by fear, want of delight etc. whereas liberation is not so affected.

अथैतस्य यथोक्तस्य साध्यसाधनरूपिणः ।
जगतो व्याकृतस्याभूद्वीजावस्थाविनश्वरी ।
तन्निर्दिदिक्षया यत्नात्प्रवृत्तैषा परा श्रुतिः ॥१६७॥
संसृत्यनर्थस्य यतो निदानं सैव नापरम् ।
यतो मूलमनर्थानामात्माज्ञानं जगत्यपि ॥१६८॥

Then, this subsequent Śruti passage now¹ begins with a specific effort with a wish² to say that this manifest universe which appears in the form of the ends (*sādhya*) and the means (*sādhana*), as stated before, came to attain the imperishable³ state as the seed⁴, [167]

since⁵ that⁶ itself is the root-cause of the undesirable result in the form of transmigratory existence and nothing else, and also since, in the world as well, the root of all untoward events is one's ignorance of about oneself⁷. [168]

Now is introduced BU 1.4.7, viz. *tad dhedam ... tarhy avyākṛtam āsīt*.

¹That is, after stating the result (fruit) of knowledge and ritual.

²SP affirms that the state cannot be pointed out, though spoken of; (cf. *na sākṣān nirdeśyatvam anirvācyatvāt*).

³That is, endless, in the absence of knowledge of the Ātman. SP explains *avinaśvarī* could have an alternative reading *vinaśvarī* which meant *vidyayā naśvarī* 'perishable through knowledge (of the true nature of the Ātman)'(!).

⁴This is ignorance about the true nature of the Ātman and responsible for transmigration. It has the form of 'I am this body etc. ...,' which has the inner self as the semblance of the Ātman (*sābhāsapratyagavidyā*).

⁵In order to justify the preceding verse two reasons are mentioned here using twice *yataḥ*.

⁶This refers to *bījāvasthā* mentioned in the preceding verse.

⁷This is to say: Not knowing one's own status etc., one commits mistakes or follies.

तद्धवसादेव निःशेषपुमर्थीप्तिरतो भवेत् ।

जिहासितस्यानर्थस्य हेतुः स्यात्सशरीरता ॥१६९॥

Therefore¹, there would follow acquisition of all of the ends of human endeavour only by the destruction of that (ignorance); (for) the condition of having a body² would be the cause of the undesirable end which is sought to be given up.³ [169]

¹That is, as understood from scriptures and worldly life also.

²Supply: as one's own (cf. *dehābhimāna*).

³This phrase precludes the involuntary absence of *karṣṇā* 'agency' etc. in sleep.

न वै सशरीरस्येति श्रुतेरध्यवसीयते ।

धर्माधर्मौ च देहस्य योनिरित्यागमाश्रयात् ॥१७०॥

(This) is concluded from the Śruti beginning with *na vai sa-śarīrasya* ... and by resorting to the Āgama¹: Merit and demerit are (understood to be) the origin of this body. [170]

Once again there is a stress on the absence of the knowledge

about the nature of the Ātman; this sets aside the notion of temporary ignorance in sleep.

¹CU 5.10.7: *tad ya iha ramanīyacaraṇāḥ ...*

विहितं प्रतिषिद्धं च कर्म मूलं तयोरपि ।
न ह्यक्रियस्य संबन्धो धर्मैणास्तीतरेण वा ॥१७१॥

(Again) action, both prescribed and prohibited, is the origin of them¹. Indeed, in the case of one who is without action, there is no connection (whatever) with merit or the other (viz. demerit). [171]

¹Namely, *dharmādharmau* of the preceding verse.

नाकारकस्य जगति क्रियया संगतिस्तथा ॥१७२॥
तद्भावभावहेतुत्वात्कारकत्वस्य कारणम् ।
रागद्वेषौ न तौ मुक्त्वा जगत्यन्यत्प्रवर्तकम् ॥१७३॥

So also, in this world, there is no association with any action of what is not instrumental to action, [172]
since the existence of that¹ is the cause of its² becoming³. Attachment and hatred are the cause of a thing being instrumental to some action, because, leaving them (aside, one finds) in this universe nothing else as productive of action. [173]

Verse 173a completes the sentence begun in the one-line verse 172. It implies the method of Anvaya and Vyatireka. Verse 173b and the word *rāgadveṣau* in the following line form the principal clause to become meaningful by the subordinate clause in the remaining part of the verse (*na tau ...*).

¹This means: which is instrumental.

²This means: of an effect.

³That is, coming into existence.

स यथाकाम इत्युक्त्वा कृत्वादेः प्रसवं श्रुतिः ।
कामाभावे च तद्भानि यो ऽकामश्चेति चावदत् ॥१७४॥

Having stated the words *sa yathākāmaḥ*, the Śruti¹ declares the origin of sacrifice etc. and then in the words *yo 'kāmaḥ* (it² has declared) the loss of it (viz. the sacrifice), in the absence of desire. [174]

¹BU 4.4.5: *sa yathākāmo bhavati tatkratur bhavati, yatkratur bhavati tat karma kurute.*

²BU 4.4.6: *yo 'kāmo niṣkāma āptakāmaḥ ... brahmaiva san brahmāpyeti.*

साधवसाधिवति चाध्यासौ मूलं विद्यात् तयोरपि ।
रागद्वेषौ यतो दृष्टौ नैवर्ते साधवसाधुनी ॥१७५॥

That (a thing is) good and (another) bad¹ are but superimpositions and² one should know³ attachment and hatred to be the root(-cause) of them, for two things, viz. good and bad, are not at all known (lit. seen) without (them⁴). [175]

¹It literally means: not-good.

²The word *api* is used in the sense of *ca*.

³We follow the reading in the NKL edition and not *mūlam vidyā tayor api* in the AnSS edition, for it does not convey a meaning which is suitable in the context — unless, of course, *vidyā* is taken for *viññāna* (= *avidyā*).

⁴Namely, *rāga dveṣau*. This is understood by repetition of the word which stands midway between the two lines of the verse (*dehaśīdīpanyāya*).

अन्तरेण प्रमेयार्थं नापि ते साधवसाधुनी ।
साधवसाधिवति वा ज्ञानं ज्ञातमेयस्य जायते ॥१७६॥

And (those two superimpositions this is) good and (this is) bad are not (possible) without any object to be known; or rather, even the knowledge of something as good or bad arises (only) in respect of some known object of knowing¹. [176]

¹'Object of knowing' for literal 'object to be known' for avoiding clumsy repetition of words in the translation, cf. NKL editor's

note: *jñātatvaviśiṣṭārtha*.

प्रमातृत्वादिसंबन्धो नासदात्मकवस्तुनि ।
नञ्घटाद्यर्थविज्ञानं सत्येव जगतीष्यते ॥१७७॥

In the case of a thing which is of the nature of non-existence there cannot be any connection of a knower etc.¹ in this world, the knowledge of an object as a non-existent pitcher etc. is entertained (i.e. understood) while there has/had been some existent (object). [177]

¹*pramātrtvādi*— *ādi* refers to *pramāṇa*, this is possible when there exists some *prameya*.

प्रत्यग्याथात्म्यसंमोहमृते सत्त्वं न कुत्रचित् ।
प्रत्यग्याथात्म्यसंबुद्धौ न सत्तन्नासदुच्यते ॥१७८॥

There is no existence (of an object)¹ possible anywhere² except without ignorance of the true nature of the inner self. (And) when there is the awareness of the true nature of the inner self, there is a statement that there is no existent and no non-existent.³ [178]

¹This signifies non-existence also. SP points out: *sattvam asattvam ceti cchedaḥ*; for both these are intended as indicated in the second line.

²That is, at any time or place.

³This is to say: The expressions existent and/or non-existent would be possible only in worldly dealings (*vyāvahārikaḍaśāyām*).

असाधारणमज्ञानं प्रतीच्येव यतः स्थितं ।
एतत्प्रमेयमेवातः प्रमाणं नान्यदिष्यते ॥१७९॥

Since incomparable ignorance remains/exists only in the case of the inner self, therefore it has to be known¹ and no other means than this is accepted. [179]

¹That is, it is indeed the object to be known.

एवं प्रमेयसिद्ध्यर्थं प्रवृत्तैषोत्तरा श्रुतिः ।
 क्रियाकारकरूपे ऽस्मिन्व्यवहारे तमोन्वयात् ।
 अक्रियाकारकं वस्तु पारोक्ष्यान्नैव लभ्यते ॥१८०॥

This subsequent Śruti proceeds to establish the object thus to be known, for there is connection with darkness¹ in this dealing² which comprises action and the means of (effecting it) and because the thing which is not of the nature of action and its means cannot be obtained (i.e. known) on account of its being beyond direct perception.³ [180]

¹That is, ignorance about the true nature of the inner self.

²This signifies the common world where, Śaṅkara has already pointed out in his Adhyāśabhāṣya (p.40), worldly dealings comprise *śāstriya* and *laukika* dealings based on *pramāṇa* and *prameya*.

³It means: because of (its) imperceptibility; SP cites *parāṇci khāni vyatṛṇāt svayambhūh ... (Kāthopanīṣad 4.1)*.

तद्ध्यदृष्टम् सदज्ञानकार्यं स्रगिव पन्नगम् ।
 सर्वं बिभर्त्यसक्तं सदसक्तमिति च स्मृतेः ॥१८१॥

That, indeed, not being¹ seen, is (but) the product of ignorance and it bears (i.e. gives the impression of) all that is not attached to it like a garland (which gives the impression of) a serpent. (This becomes clear) from the Smṛti *asaktam* ...² [181]

¹It means: no being perceptible.

²*Gītā* 13.14: *asaktam sarvabhṛc caiva nirguṇam guṇabhoktr ca*.

अपूर्वाद्यात्मकं वस्तु यत्र साक्षात्प्रसिध्यति ।
 तत्कात्स्न्यर्याल्लभ्यते तत्र व्यवहारो न मोहजः ॥१८२॥

Where (however) the existent entity which is of the nature of *apūrva* etc.¹ is directly established (i.e. obtained) and that (an existent thing) is obtained (=grasped) in its fullness, there is no dealing produced from ignorance. [182]

SP says *asambhāvanādi-tiraskāreṇa* 'by setting aside the notion of impossibility'.

¹This has a reference to the Brahman (= Ātman/inner self) which is *apūrva*, *anapara* etc.; cf. BU 2.5.19.

यथासिद्धानुवादेन पूर्वं नो ह्यभ्यधात्स्फुटम् ॥१८३॥

(This subsequent Śruti, viz. BU 1.4.7 now proceeds) ¹ because the Śruti has not clearly declared to us earlier ² (the nature of the thing for avoiding) it as a repetition of what is already established (in worldly dealings). ³ [183]

The objector's argument is: When BU 1.1-2 have already declared the nature of the thing (which is *upāśya*), why now the subsequent Śruti? To this, this is an answer.

¹We have to understand *pravṛttaiṣottarā śrutiḥ* from verse 180 above.

²Namely, in the Aśva and Aśvamedha Brāhmaṇas which pertained to the worship of fire, cf. our book [Vol.3:1990].

³This implies: acceptance of duality in *upāśya* and *upāśaka*.

पदानीह तदर्थान्च प्रसिद्धानेव लोक्तः ।

आदाय कर्मशास्त्रं तन्निषेधविधिबोधकृत् ॥१८४॥

(Now) here ¹ (we should remember that) the science of ritual takes words and the things signified by them as they are known from the world itself and then prescribes (for us) the prohibition or performance of the same. ² [184]

¹That is, while accepting instruction regarding the true nature of the Ātman.

²This is to say: The science of ritual does not pertain to *vastu* 'Reality'.

इतः परं वस्तुतत्त्वपरीक्षणकृतक्षणा ।

श्रुतिः प्रवृत्तातस्तावत्प्रमेयो ऽर्थो ऽत्र चिन्त्यते ॥१८५॥

[Verses 185-190 explain the purport of BU 1.4.7.]

Hereafter begins the Śruti¹ which has decided to examine the true nature of the thing²; therefore, here is considered the object to be known, to begin with³. [185]

¹Namely, *tad dhedam* ...

²That is, Reality.

³SP points out: *tadadhīnatvād upaniṣatprāmāṇyasya*.

संसारारुख्यमहाव्याधेः किं मूलमिति चिन्त्यते ।
तद्धवस्तये चिकित्सेयं तदा फलवती भवेत् ॥१८६॥

It is (now) considered as to what is the root of the great disease called transmigratory existence (and) this desire to discuss (lit. to know), (viz.) for the sake of the destruction of that (root). Only then it¹ would be fruitful.² [186]

¹It means: the Śruti which disusses the root of transmigratory existence.

²Cf. NKL: *saṃsāraroganirāsāya nidānajñāne sati śravaṇādicikitsā phalavatī syāt*. Further, SP quotes *Caraka Saṃhitā* 1.2.36:

*smṛtimān yuktihetujño matimān prtatipattimān /
bhiṣag auśadhasaṃyogaiś cikitsām kartum arhati //*

and NKL joins by quoting *Suśruta* 1.21.36:

*saṃcayam ca prakopam ca prasaram sthānasaṃśrayam /
vyaktibhedam ca yo vetti doṣāṇām sa bhaved bhiṣak //*

ऊर्ध्वमूल इति तथा मन्त्रवर्णो ऽपि विद्यते ।
गीतास्वपि तथैवैतदूर्ध्वमूलमितीरणम् ॥१८७॥

So also, (to this effect) there is the text of a Mantra¹, viz. *ūrdhvamūlaḥ*. In the *Gītā*² also, there is statement in the same way, viz. *ūrdhvamūlam* ... [187]

¹*Kāthopanīṣad* 6.1: *ūrdhvamūlo 'vāksākha eṣo 'śvattaḥ sanātanaḥ*.

²*Gītā* 15.1: *ūrdhvamūlam adhaśśākhā aśvattham prāhuravyayam*.

अशेषानर्थमूलस्य प्रत्यगज्ञानरूपिणः ।

ध्वस्तौ ध्वस्तिरनर्थानां पुमर्थश्च समाप्यते ॥१८८॥

There occurs the destruction of all the undesirables when there is the destruction of the root of all the evils that is in the form of ignorance of the individual self¹ (and thereby) is obtained the end of human endeavour.² [188]

¹Now *pratyak* is translated as the individual self wherever there is reference to a human being. Elsewhere it is translated as the inner self in contrast with the Supreme Self.

²The thrust of this is well brought out by SP thus: *jñānād ūrdhvam bandhadhir bādhitānuvṛttir ity uktatvāt* and also *na kevalam anarthadhvastir eva ... ānandaprāptir api*.

निरस्तातिशयानन्दरूपता प्रत्यगात्मनः ।

अथैष यो वै भूमेति श्रुत्यैव प्रतिपाद्यते ॥१८९॥

The Śrutis *athaiṣa...*; *yo vai bhūmā* ... itself¹ asserts the nature of the individual self as the essence of joy that has surpassed every (other) excellence. [189]

¹In reality, these are two different statements in two different Śrutis *athaiṣa eva paramānandaḥ* (BU 4.3.32), and *yo vai bhūmā tat sukham* (CU 7.23.1).

स्वत आनन्दयाथात्म्यात्कुतो दुःखेन संप्लुतिः ।

तथापि निहृते शास्त्रं न लिप्यत इतीरणात् ॥१९०॥

Because, in its own right¹, it has the true nature of (only) joy, how then can it (viz. Ātman) be overpowered (lit. inundated) by misery? Even then,² the Śruti statement *na lipyate* ...³ negates (the existence of sorrow). [190]

¹That is, independently of any other cause.

²That is, despite this.

³*Kāthopaniṣad* 5.11: ... *na lipyate lokaduḥkhena bāhyah*.

अज्ञातात्मैकसंसिद्धबीजावस्थमिदं जगत् ।
तदित्यनेनाभ्यधायि परोक्षार्थाभिधायिना ॥१९१॥

[Verses 191-210 explain the meanings of words of BU 1.4.7: *tad dhedaṃ tarhy avyākṛtam āsīt.*]

This world in the state of a seed that existed only in the form of the Ātman¹ and is referred to by the statement *tat* ..., which expresses an object beyond senses.² [191]

This verse intends to explain the Śruti-idea conveyed by words *tad dha*. This world already exists in the form of the seed though not known to people. The word *tat* is used to convey the world beyond sense perception.

¹This has a reference to *sābhāsapratyagavidyā* understood in verse 167 above; it pertains to the Ātman, not known in its true nature.

²That is, *parokṣārthakena sarvanāmasamjñakena* (NKL editor's note on the basis of SP and NKL).

अव्याकृतस्य जगतो भूतकालाभिसंगतेः ।
सुखावबुद्धये हेति निपातो ऽत्र प्रयुज्यते ॥१९२॥

The particle *ha* is used here (in this sentence) for the easy understanding of the undifferentiated world which has been¹ through the time in the (long) past. [192]

¹It literally means: which has gone together with ...

नामरूपादिविकृतं पराङ्मानैकगोचरः ।
सहस्रभेदवत्साक्षादिदमा जगदुच्यते ॥१९३॥

This world (which is) differentiated by name, form etc.,¹ is in the purview of² only that means which is operative in respect of objects beyond perception³ (and) composed (lit. possessed) of thousand (and one) differences, is directly expressed by the pronoun *idam*⁴. [193]

¹The word etc. refers to action (*karman*).

²Or alternatively, is the object of.

³This means Anumāna 'inference', for that grasps distant objects. Or alternatively, it might refer to the self-illuminating Ātman (*parān*).

⁴Cf. the well-known *kārikā*: *idamaḥ pratyakṣagatam samīpavartī caitado rūpam, adasas tu viprakṛṣṭam tad iti parokṣe vijānīyāt* (quoted by NKL editor). This justifies understanding Anumāna earlier, for that pertains to what is *parokṣa*.

सामानाधिकरण्यस्य तदिदंपदयोः श्रुतेः ।
कार्यकारणयोर्नित्यमभेदो ऽध्यवसीयते ॥१९४॥

Here is noticed the capacity for referring to one and same object (*sāmānādhikarāṇya*) in the two words (viz. pronouns) *tat* and *idam*; for the oneness of (the two as) the effect and the cause¹ is (easily) understood. [194]

¹These are *idam* (= *jagat*) and *tat* (= *brahma*); cf. the usually accepted notion of *kāryakāraṇayor abhedah*— this *abheda* here is *sāmānādhikarāṇya*, viz. suitable to be expressive of only one object.

न क्रियाकार्यविरहे कारणं सिद्ध्यति क्वचित् ।
निष्क्रियं कारणं चेत्स्यात्तद्वन्नित्यं फलोत्थितिः ॥१९५॥

Indeed, nowhere is there any cause established (as existent) when the performance of an action (viz. production of an effect) by it is absent.¹ If it be said that a cause is (i.e. can be) non-operative, then there would ever be the existence of the effect. [195]

This verse denies the existence of a *niṣkriya-kāraṇa* 'cause without any action'.

¹NKL edition reads *na kriyākāryavirahāt* and explains it as *kriyārūpakāryābhāvāt*. AnSS edition shows no awareness of this reading. Translation follows AnSS edition (*sati saptamī*).

तयोश्च युगपद्भावे न स्यात्कारणनिश्चितिः ।
क्रियान्तरप्रसक्तेश्च तत्कार्यत्वे ऽनवस्थितिः ॥१९६॥

If the two (viz. the cause and the action)¹ are held to be simultaneously existing, one would not be able to decide which (exactly) is the cause. And because it would involve the contingency of (accepting) another action (of the cause for producing the action). Further, that (itself) being an effect, there would result *infinite regress*. [196]

This verse denies *sakriyakāraṇa* 'cause accompanied by action'. This is possible in two ways: (i) Both cause and action exist simultaneously, and (ii) there is a sequence of them. The first possibility is discarded on the ground stated in the first half of the verse. The second possibility is considered in the second half. The argument here is: If the sequence is understood to be first the cause and then the action, even then the (later) action would expect some earlier action which, in its turn, would expect yet earlier action and so on — this is *infinite regress*!

¹Cf. *kāryakāraṇa* in verse 194 above and *kriyākārya* in verse 195.

कार्यं चाक्रियमाणं सन्न कार्यत्वं समश्नुते ।
अकर्तृकं चेत्कार्यं स्यात्कारणं कार्यतां व्रजेत् ॥१९७॥

An effect (lit. action), (which is said to be) not being produced (lit. done), cannot attain the status (i.e. nature) of an effect. (And) if it were held that an effect is (produced) without (there being) an agent, then the cause itself would be (considered as) the agent. [197]

कारणत्वात्सदन्यस्य कार्यत्वाच्च सतस्तथा ।
अन्योन्याव्यतिरेकाच्च कुतो नाशादिसंभवः ॥१९८॥

Since it is the cause, it is real; since the other is an effect of that real (it also) is real. And since these do not exist apart (from each other), where (or whence) could there be their destruction etc.? [198]

It was earlier argued that the Brahman and the world are related as the cause and the effect. Therefore, their reality has to be argued. There should be *samānaguṇavattva* between a cause and its effect. If there would be *asamānaguṇavattva* between them, then it is not possible that an *asat* effect arises from a *sat* cause. Therefore, to say that there comes into existence the *asat* (=perishable) *jagat* (=effect) from the *sat* (=imperishable) Ātman. The second line of the verse expresses rejection of the idea of their *real* difference (as two distinct things). The difference is merely indescribable or imaginary.

क्रिया वा तत्फलं वा स्यात्कारकं वा न किञ्चन ।
निरन्वयो ऽयं नाशः स्यादेषामन्यतमो ऽपि न ॥१९९॥

(An argument is made:) If action or effect or agent or any instrument of action does not exist, that would mean¹ destruction which does not have any subsequent to it.² (The Siddhāntin answers: In reality) there exists none of them. [199]

¹The words 'that would mean' is 'there would be'.

²This is an argument of the Vaiśeṣikas. In this, they would imply an all-time existing absence of every thing. But, the Siddhāntin holds that *tad idam* suggests the continuous existence of the Brahman, i.e. permanence of the Brahman. This is in opposition to the Vaiśeṣikas' Asatkāryavāda.

क्रियायाः फलरूपेण दृक्स्तिर्नावस्थितेर्भवेत् ।
तेन तेन विशेषेण कारणं प्रथते सदा ॥२००॥

Since there is continued existence of a certain action in the form of its effect, therefore, there cannot be destruction. Ever does a cause extend itself¹ (in the form of its effect). [200]

The argument in the preceding verse is stated in this and the following verses (up to verse 203).

The first line explains away the first alternative of the Asatkāryavādins. In the second line, it is stated that the same

result (viz. *na abhīṣṭā dhvastih*) would follow in the case of the other alternatives also. Only the real appears to be existing in one form or another — this is the Siddhāntin's view.

¹That is, it extends its existence.

यथा जन्मादिकर्तृत्वाद्बीजं नैव विनश्यति ।
नाशो ऽपि तस्य नष्टत्वाच्च नष्टः स्याद्विनाशिता ॥२०१॥

As the seed does not at all perish, by its being an agent of the birth etc.¹ (of a plant) and it (viz. the seed) is the destroyer (also) even in respect of its destruction², therefore, there is no perishability in (this) destroyer. [201]

This verse reaffirms the argument in the preceding verse by an illustration.

¹The word etc. refers to the continued existence or growth of the plant.

²That is to say: The plant would perish but not the seed. It seems to be called the destroyer because the seed remains even when the plant perishes.

एवं चेन्न सतो नाशो नोत्पत्तिरसतस्तथा ।
अव्याकृताभिधानाच्च कार्यस्य स्यात्कदाचन ॥२०२॥

Such being the case, there cannot be the destruction of the existent (*sat*), nor (can there be) the origin of the non-existent; likewise, in the case of the effect, which has the name of what is not differentiated, also there cannot ever be perishability. [202]

The verse implies the non-manifest existence of the *sat* when its so-called effect has (it is said) perished.

तत्त्वबोधातिरेकेण न नाशो ऽन्यो यथा तथा ।
महतातिप्रयत्नेन ह्युदर्के ऽपि प्रवक्ष्यते ॥२०३॥

It will be stated with great care in the later portion of the text also, (as stated here before), that there is no other

destruction beside (that, viz.) the knowledge of the truth. [203]

Destruction is for the Siddhāntin *svarūpajñapti*. But there is no *niranvayanāśa* 'destruction involving no subsequent' as understood by the Asatkāryavādin. It is held that there is destruction only of bondage, together with desires, of the individual self. There is no destruction subsequent to *svarūpajñapti*; the *vastu*, viz. the Brahman continues to exist.

नामरूपाद्यभिव्यक्तेः प्राक्तनः काल उच्यते ।
तर्हीति ह्यनभिव्यक्तमव्याकृतगिरोच्यते ॥२०४॥

[The words *tarhi* and *avyākṛta* are explained.]

Time preceding (the moment of) manifestation (of Reality as having) of name, form etc. is mentioned (by the word) *tarhi* (and) by the word *avyākṛta* is mentioned the unmanifest. [204]

अविद्याकर्मसंस्कारास्तेजोऽक्षमासूत्रसंश्रयाः ।
खे लीनास्त्वस्तितामात्रा अव्यक्ताख्याः सहात्मना ॥२०५॥

Impressions originating in ignorance and (ritual) activity, which have resorted to fire, water, earth and wind¹ and² merged in sky, with mere existence (as their character)³, have, together with the Ātman, the name of the unmanifest. [205]

¹This is the meaning of Sūtra, cf. verse 148 above; cf. *vāyur vai gautama tat sūtram* (BU 3.7.2). NKL states: Sūtra signifies two elements!

² = *tu*.

³That is, in their subtle form.

कार्यकारणभेदेन प्रपञ्चो यः पुरोदितः ।
यश्चोर्ध्वं वक्ष्यते तस्मात्परस्तादेतदुच्यते ॥२०६॥

It is this (Brahman) which was explained earlier as this world comprising differences (such as) the cause(s) and the effect(s) and which will be later described as beyond that.¹ [206]

¹Namely, the world.

प्रथते वैश्वरूपेण यतो ऽविद्यैव सर्वथा ।
अविद्यामात्रयाथात्म्यादतस्तद्धेदमुच्यते ॥२०७॥

Because only ignorance extends itself everywhere in a variety of forms¹, (therefore) on account of (its manifest) nature being mere ignorance, there is stated *tad dhedam*. [207]

¹This verse states one more argument for establishing the identity of the cause and the effect; cf. verse 194 above.

¹This is *prapañca* mentioned in the preceding verse.

मा भूद्व्याकृतधीः पुंसां नामरूपात्मवस्तुनि ।
ऐकात्म्यव्यक्तितो ऽन्यत्र तस्मादेवेति गौरियम् ॥२०८॥

Lest there be apprehension by men of the (variously) modified (Reality which appears before them) in the objects having the nature of name and form, i.e. elsewhere than in the manifestation of the uniqueness of the Ātman, there is made the statement *tasmād eva*. [208]

This justifies the restriction (*avadhāraṇa*) in *nāmarūpabhyām eva*.

सामानाधिकरण्योक्तिर्व्यक्तस्याव्यक्तसिद्धये ।
न हि कात्स्नर्यमभिव्यक्तेर्व्यक्तस्याकात्स्नर्यदर्शनात् ॥२०९॥

The Śruti statement, which contains two words, expressive of only one object, is intended for establishing the unmanifest becoming the manifest; indeed, fullness is not (understood) of the manifest, since the manifest is seen (in it) to be not full. [209]

This is to support the *sāmānādhikarāṇya* of *tat* and *idam*, even though *idam* refers to what is *parimita* and *tat*, to *aparimita*.

तद्वित्तिसाधनाभावात्कथं तदवगम्यते ॥२१०॥

The Śruti mentions the differentiated (world) by negating (the notion of) the knower etc.¹ (And) how can that become known since there is absence of the means of knowing it? [210]

The verse presupposes an objection regarding the means of ascertaining the nature of the unmanifest. There are alternatives; (i) *mānam asti* and (ii) *mānam nāsti*. The first and the second lines have refuted the first and the second alternatives respectively.

¹This refers to *pramāṇa*.

विधूताशेषसंबन्धमनन्यानुभवात्मकम् ।
कूटस्थसंविन्मात्रैकं ब्रह्मास्मीतिस्वभावकम् ॥२११॥
अतिरोहितसंवित्कं सदानस्तमितोदितम् ।
निःसामान्यविशेषं तत्प्रत्यगात्मैकनिष्ठितम् ॥२१२॥
स्वतो ऽवबुद्धं तद्यस्मान्निरविद्यमतः सदा ।
संगतिर्निरविद्यस्य नाविद्याहेतुर्जैर्मलैः ॥२१३॥

[Verses 211-214 describe *nityānubhavasādhana*.]

That (Brahman) is such as has shaken off all relations (to various worldly objects), as is of the nature of having experience of none else (than itself)¹, as is immovable and mere sentience, and is aware of its own state (in the form) 'I am Brahman.', [211]

has its sentience never concealed (i.e. overpowered) by anything else²; as has never perished or originated; as is not possessed of any general or particular character³; as has remained only in the inner self⁴; [212]

(and) as is ever awake and is, therefore, without (any influence of) ignorance (on it). As such, there cannot be any association of it, that is devoid of ignorance, with sins/taints caused by ignorance. [213]

¹The first line stresses that there exists nothing else than the Brahman.

²That is, since there exists none else than the Brahman

³This is the same as *avyāvṛttānanugata*.

⁴That is, it is not different from the inner self.

एवंसवभावमप्येतदविज्ञातं स्वभावतः ।
तमोवृत्तमपेक्षयैतन्न तु यद्वास्तवं स्वतः ॥२१४॥

Though it is of this nature, yet, only by its very nature, it remains unknown. This is (so said) keeping in view the effect of darkness (i.e. ignorance) but it is not a real situation. [214]

There can be an objection: 'The Brahman is *nityabuddha*, then how is it that no one knows it?'. The answer is: Though the Brahman is *nityabuddha*, yet due to ignorance it remains usually unknown.

स्वानुभूत्यनुसारेण यथोक्तो ऽर्थो ऽवसीयताम् ।
मानहैत्वतिवर्तित्वान्नेह मात्रादिसंभवः ॥२१५॥

[Verses 215-220 explain that the unknownness of the Brahman is established by our usual experience.]

Let this thing, (which is) thus described, be ascertained in accordance with one's own experience. There is no possibility of having the means of knowing etc., because the Ātman is beyond the (usual act of) knowing. [215]

तस्मिन्नपहतध्वान्ते ऽप्यविद्या स्वानुभूतिः ।
स्वानुभूतिर्न वेद्मीति प्रागैकात्म्यप्रबोधतः ॥२१६॥

There is ignorance even on the part of that (Ātman) whose darkness (i.e. ignorance) is (by its very nature) far-removed (lit. destroyed); there is ignorance (as understood) from one's own (i.e. the individual self's) experience. There is on the part of one the experience, 'I do not know.', (but this is so) before (i.e. so long as there is not) the awareness of the uniqueness of the Self. [216]

ज्ञातात्मतत्त्वो जानाति त्रिकालं तदसंभवम् ।

अन्यतः संगतिः सेयमविचारितसिद्धिका ॥२१७॥

One who has known the true nature of the Ātman knows that it is in all the three periods of time impossible (to think 'I do not know myself.');

[217]

¹ *anyah* = *anyena* (NKL), i.e. *ajñānena*.

स्वभावव्यतिरेकाभ्यां ध्वान्तसिद्धेरसंभवात् ।
न चेत्प्रमाणतः सिद्धिरस्याव्याकृतरूपिणः ।
न चैकात्म्यस्वभावेन कुतस्तन्मानगोचरः ॥२१८॥

Because there is no possibility of existence of darkness (i.e. ignorance) unless (one accepts the existence of) the Ātman and the other. Also, if it is not possible to establish the existence of what has not appeared (manifested) in discrete forms or by its nature of uniqueness, how would it be within the ken of knowing?

[218]

This asserts the inutility of the *mātrādi* in respect of Ātmajñāna.

तद्धेदमित्यनेनोक्तिर्व्याकृताव्याकृतात्मनोः ।
प्रमाणयोग्यतैवोक्ता न त्वैकात्म्यमितात्मता ॥२१९॥

By the sentence *tad dhedam* there is the statement of the two of manifest and unmanifest natures. (But) here is thus stated the possibility of its becoming known by some means of knowing and (there is) not (stated) the uniqueness (of the Ātman) and the limitedness (of the non-Ātman).

[219]

The universe (*jagat*) was unmanifest and it is manifest now. The words *tad dhedam* are not for conveying the possibility of knowing the oneness of what is unmanifest (= Ātman) and what is manifest (= non-Ātman).

अव्याकृतमविज्ञातं प्रमाणाविषयं मतम् ।

प्रमाणानभिसंबद्धं प्रमाणाच्चेति साहसम् ॥२२०॥

(The Brahman) is understood to be unmanifest, unknown, non-object of the means of knowing, not connected with any means of knowing. And still to say that (it is understood) by the means of knowing is (but) folly¹. [220]

¹The word *sāhasa* means: thoughtless statement. SP does not explain it and NKL says *vyāhata* which means paradoxical.

अविज्ञातार्थगन्तृणि प्रमाणानीति वादिनाम् ।
सर्वेषामभ्युपेतो ऽर्थः कुतो ऽसाविति चिन्त्यते ॥२२१॥

Now is considered (a question:) By what¹ does it (become known) (even though) it is an object understood (lit. accepted) by all who state that the means of knowing pertains to (lit. reaches up to) object(s) that are not known?² [221]

¹Or, 'on account of what?'. SP makes this clear thus: *sa ca kutah sphurati svato vā parato vā parataś cen mānād vā sākṣiṇo veti vicārya nirdhāryam*.

ज्ञातो वा ऽर्थो ऽथवा ऽज्ञात उभयं वा न चोभयम् ।
प्रमाणानां प्रमेयः स्यात्सर्वमेतद्विचार्यते ॥२२२॥

All this is discussed, viz. whether the object is known or not known or both (known and not known) or not both could be the object knowable by the means of knowing. [222]

There are here four alternatives mentioned regarding the nature of the object sought to be known. These are discussed in the verses hereafter.

मेयमानत्वसंभितौ न पश्यामो ऽत्र साधनम् ।
ज्ञातस्याव्यतिरेकित्वादज्ञातस्याप्यमानतः ॥२२३॥

As regards *meyatva* 'the character of an object to be known' and *mānatva* 'the character of a means of knowing', (we have

to say that) we do not see here any means of distinguishing (between the two), because what is to be known does not exist apart (from the means) and what is not known does not have any means of knowing it. [223]

In the case of the Ātman, there is no distinction between *meya* and *māna*, unlike in the normal knowing-situation.

As intended by verse 221 above, there follows a discussion as to how an object to be known becomes known. First, the views of the Vaiśeṣikas and other logicians. The argument of the Vedāntins is: If they hold *meya* as *jaḍa* (and they do so), then, *māna* also being *jaḍa*, how could one distinguish between the two? If again the *meya* and *māna* are accepted by them as *viṣaya* and *viṣayin*, a question can be asked: Whether the *meya* is already known or unknown? The first half of the second line of the verse answers away the first alternative and the second half, the second. The answers are clarified in the next two verses.

जगत्तथो हि यः कश्चिज्ज्ञात एव स बुद्धिर्वत् ।
मानादेव स विज्ञात इत्येतत्स्यात्कुतो ऽमितेः ॥२२४॥

In this world,¹ whatever be the object of knowing, that has got to be known (i.e. existent for becoming known) even like the intellect (itself)²; that³ would become known only by that knowing one⁴ (— hence we ask:) How can it be (objected to) on the ground of the absence of the object of knowing? [224]

This explains *jñātasyāvyatirekitva*.

¹This refers to worldly dealings (*vyavahārabhūmi*).

²*buddhi* 'intellect' reveals itself; it does not remain unknown, for it is in contact with the inner self.

³This refers to the object of knowing which is mentioned earlier.

⁴= *māna*— this refers to the knower, the inner self.

मानातिरेकासंसिद्धेर्मेय एव तथा न किम् ।
न हि दीपान्तराद्दीपो भारूपत्वं प्रपद्यते ॥२२५॥

So also, since it cannot be established that the object to known exists apart from knowing, why should it not become similarly known¹? Indeed, a lamp does not attain the nature of a lamp from another lamp. [225]

¹That is to say: Like *jñāna*; it is self-evident; it cannot remain unknown.

ज्ञातरूपातिरेकेण नान्यद्रूपं समीक्ष्यते ।
एवं चेन्मानतो मेयो विज्ञात इति का प्रमा ॥२२६॥

They do not accept (or grasp) any form apart from the form which has been known. If this is so, how can it be right knowledge (to hold) that an object to known is known from knowledge? [226]

न चापर उपायो ऽस्ति मेयसद्भावसिद्धिकृत् ।
मानेभ्यस्तत्फलासूतेरन्धकारप्रनृत्तवत् ॥२२७॥

There is no other means¹ of establishing the existence of what is (the object) of knowing (in Vedānta) since there would not result any fruit from the (known) means of knowing, exactly as (from) the act of dancing in darkness.² [227]

This verse presupposes an objection that the *jada* object can be known by some means of knowing.

¹That is, other than the usually accepted means of knowing.

²This would lead to the absence of any dealings (*sarvavyavahāralopa*).

स्वत एव प्रसिद्धश्चेत्प्रमेयो ऽर्थस्तथा ऽपि न ।
अनन्यायत्तसंसिद्धेर्मेयत्वं किंनिबन्धनम् ॥२२८॥

If it be held that the object to be known is established as existent on its own (i.e. in its own right), (we answer:) Even that is not the case; (for we ask:) In what is rooted the character of the objects' capacity to be known whose existence does not depend on another? [228]

Here is denied another alternative objection, viz. the *jaḍa* can be known in its own right or, by itself.

निःसाधनो न साध्यो ऽस्ति नासाध्यं साधनं क्वचित् ।
तुल्यशक्तिमतां नापि मिथो ऽपेक्षा ऽस्ति कुत्रचित् ॥२२९॥

There cannot be any *sādhya* (object) which is without a *sādhana*, nor can be there any *sādhana* which is without its *sādhya* (object). And, there is no mutual expectancy on the part of two (*sādhya* objects) having equal capacity also.¹ [229]

¹SP points out that *api* 'also' suggests *anavasthā* as the result if a knowledge of some *sādhya* is held to depend upon that of another.

नासिद्धयोः स्वतो ऽपेक्षा सिद्धयोश्चापि नेष्यते ।
नापेक्ष्यापेक्षकत्वं हि लोके ऽप्यतिशयं विना ॥२३०॥

Two objects which are not self-established do not have expectation (of each other¹); so also two objects which are self-established do not expect (anything) of each other. For, in this world, we do not indeed find the relation of something as expected and something (else) that expects, unless there is a certain excellence (in the object desired.) [230]

This verse answers a question whether two *jaḍa* objects get established by each other, be they *svataḥsiddha* or *svato 'siddha*. Two possibilities are discussed here, the third is considered in the next.

¹It literally means: of themselves. SP refers to the son of a barren woman and a sky-flower as instances.

नापि सिद्धः स्वतो ऽसिद्धं नृशृङ्गवदपेक्षते ।
तथा ऽसिद्धः स्वतः सिद्धं नात्यन्ताभावरूपतः ॥२३१॥

So also, one self-established¹ (object) does not expect another (object which is) not established², like a man (expecting) a

(non-existent) horn. Similarly, what is not self-established does not expect what is established because it itself has the form of absolute non-existence³. [231]

¹This refers to an existent object.

²That is, non-existent object.

³For example, a man's horn.

अपेक्षते चेत्सिद्धो ऽसौ नासिद्धो ऽपेक्षितुं क्षमः ।
येनातो ऽज्ञानतः सिद्धिं स्वतःसिद्धो ऽप्यपेक्षते ॥२३२॥

If it is held that if a (self-established) thing expects (some *māna*), then (it has to be said that) a non-existent (object) does not expect (it). Therefore, since (this is so), even a self-established (object) expects to be established by ignorance.¹

[232]

¹NKL reads: *yenāto jñānataḥ* for the reading of the AnSS edition *yenato 'jñānataḥ(?)*. Possibly, *ajñānataḥ* suggests that falsely conceived *pramāṇaprameyavyavahāra*?

विश्वेश्वरो ऽपि प्राहैतत्प्रपन्नाय किरीटिने ।
भावाभावत्वमज्ञानादतद्वत्येव कल्पितम् ॥२३३॥

The Lord of the world declared this to Arjuna who (approached) Him (as a pupil), viz. that the state of Reality and non-reality is experienced (i.e. imagined) (by all) in what does not possess (the character of) that, due to ignorance.

[233]

SP points out that all *pramāṇaprameyavyavahāra* is like *raju-sarpa(jñāna)*.

नासतो विद्यते भावो नाभावो विद्यते सतः ।
उभयोरपि दृष्टो ऽन्तस्त्वनयोस्तत्त्वदर्शिभिः ॥२३४॥

The non-existent has no being (and) the existent never ceases to be; the truth of both has been seen by the seer of the

truth.

[234]

This is *Gītā* 2.16.

ज्ञेयं यत्तत्प्रवक्ष्यामि यज्ज्ञात्वा ऽमृतमश्नुते ।
तथा न जायत इति विध्वस्ताशेषकल्पनम् ॥२३५॥

‘I shall explain the nature of that which is to be known and, having known which, one attains immortality.’¹ So also, (the statement of the Lord), *na jāyate*² ... declares the entire (cluster of) imaginary suppositions (that are) destroyed (i.e. set aside). [235]

¹ *Gītā* 13.12.

² *Gītā* 2.20.

वासुदेवः सर्वमिति प्रत्यक्षश्रुतिपूर्वकम् ।
अहं कृत्स्नस्य जगतः प्रभवः प्रलयस्तथा ॥२३६॥

(So also He declares) ‘(I), son of Vāsudeva, am all this.’¹, which has a direct statement of the Śruti as its forerunner² and, later, (He states), ‘I am the origin and merger of the entire universe.’³ [236]

Kṛṣṇa described in these verses of the *Gītā* is the Paramātmā. And, according to SP, the statement of Kṛṣṇa is preceded by the direct statement of the Śruti (*pratyakṣaśruti*), viz. *aitadātmīyam idaṃ sarvaṃ* (CU 6.8-16).

¹ *Gītā* 7.19.

² This refers to *idaṃ sarvaṃ yad ayam ātmā* (BU 2.4.6).

³ *Gītā* 7.6.

सत्यज्ञानादिरूपस्य प्रत्यगात्मन एव च ।
कारणत्वं सुविस्पष्टं श्रुतौ हि बहुशः श्रुतम् ॥२३७॥

Indeed, in the Śruti, it is many times clearly heard that it is only the individual self, which is of the nature of truth, knowledge etc., that is the cause of the universe. [237]

In the preceding verse, the CU is taken into account and here the *Taittirīyopaniṣad*, for pointing out the *śrutimūlatā* of the statement of Kṛṣṇa. In other words, the *Taittirīyopaniṣad* is the Śruti conveying the same idea as in the *Gītā*. That is: Kṛṣṇa declares *aham* (*pratyagātman*) as the creator, sustainer and destroyer and this same idea is already conveyed by the Śruti (*Taittirīyopaniṣad*:) *satyaṃ jñānam anantam brahma, yo veda nihitaṃ guhāyām* (2.1); *tasmād vā etasmād ātmana ākāśaḥ sambhūtaḥ* (2.1); *idaṃ sarvaṃ asṛjata* (2.6); and *yato vā imāni bhūtāni ...* (3.1).

अज्ञातात्मातिरेकेण ब्रुवतः कारणं तथा ।

सम्यग्ज्ञानान्न मुक्तिः स्यान्न ज्ञानं वस्तुनृत्ववचित् ॥२३८॥

There cannot be liberation (which results from) the right knowledge in the case of one who states that the cause (of this universe) is apart from the Ātman that is not known (to him). Nowhere does (such) knowledge (as his) negate the existence of the real (object)¹. [238]

This is a remark about those, like the Sāṃkhyas, who hold, in opposition to the Śruti, that the world is caused by some other thing, like Pradhāna etc.

¹Namely, the Ātman.

कर्मभ्यो ऽपि न मुक्तिः स्यात्कर्मापि न हि वस्तुनृत् ।

तस्यानित्यफलोत्पत्तौ प्रभविष्णुत्वकारणात् ॥२३९॥

Even by ritual activities there cannot be (attainment of) liberation. Indeed, action also cannot negate the real object, for it is capable of causing the rise of the impermanent fruit.¹

[239]

¹This implies the incapacity of *karman* for effecting the permanent result, viz. liberation.

कूर्मलोमादिवच्चेत्स्यादबुद्धत्वं तथा ऽपि वः ।

स्वतः सर्वज्ञतैव स्यान्न वस्त्वज्ञातमस्ति हि ॥२४०॥

(If the objector says:) As in the case of the hair of a tortoise etc.¹ there could be unknownness (i.e. absence of the knowledge) (about the nature of the Ātman), in your (view); (we answer:) There is (lit. would be) only omniscience (of the Ātman which is) on its own account²; for, the (real) thing³ is not unknown.⁴ [240]

¹The word etc. implies the milk of the tortoise; this signifies non-existent objects.

²That is, not caused by any other thing.

³Namely, the Ātman.

⁴Cf. Śaṅkara's assertion in the Adhyāśabhāṣya (p.81): *sarvo hy ātmāstitvam pratyeti* ... This sets aside the idea of holding Anumāna as necessary for knowing the Ātman in the way of the Sāṃkhyas who require it for knowing the Pradhāna.

न च मानात्प्रसिद्धिः स्यात्कूर्मलोमादिवस्तुनः ॥२४१॥
ज्ञातार्थव्यतिरेकेण मानानां मानता यतः ।
मेयार्थापह्नुतिश्च स्यान्नाज्ञातमिति जल्पतः ॥२४२॥

And one would not be able to establish a thing like the hair of a tortoise etc. with (the help of) the means of knowing since (it would mean that) the means of knowing the character of the means of knowing (even) in the absence of the known (i.e. existent) object(s) and also there would result the negation (lit. concealment) of the object to be known for one who states that there is not (any object which is unknown).

[241-242]

The argument regarding the hair of a tortoise is still the basis for argument. The question is: 'How can this non-existent object become known?' Neither knowledge nor false impression about it is possible.

ततश्च वेदसिद्धान्तसंत्यागः कारणादृते ।
न भिद्यते प्रमेयो ऽर्थो मानाद्येषां च वादिनाम् ।
तेषां दुःशकमत्यन्तमबुद्धार्थावबोधनम् ॥२४३॥

From that there follows, without any reason,¹ abandoning of the doctrine of the Veda². And, in the case of those who argue that the object to be known cannot be distinguished from the means of knowing³, it is extremely difficult to get to know what is not known.⁴ [243]

Earlier, as implied in verse 222 above, there was a discussion about the view that the object to be known by philosophical query is a directly perceptible object. This was the view of the realists, viz. the Sāṃkhyas. Now, follows a discussion of the views which are like the Buddhists' opinions — the third alternative. In this verse, there is reference to the view that there is no distinction between *māna* and *meṃya*.

¹Or, for no reason.

²The authoritativeness of the Veda is accepted in the field of Dharma. Therefore, the contingency would be in denying the authority of the Veda which is accepted as *ajñātārthajñāpaka*.

³This is the view of the Yogācāra Buddhists.

⁴It is implied that every argument is based on the relation between *māna* and *meṃya* as two distinct objects.

ज्ञानमेयप्रभेदो ऽपि मानस्य स्वार्थरूपिणः ।

बौद्धराद्धान्तसक्तिः स्यात्स्वार्थस्य क्षणिकत्वतः ॥२४४॥

And, when a distinction (is accepted) between the means of knowledge and the object to be known even while that means of knowing has (i.e. is) to be taken as having the form of its object, there would result inevitable acceptance of the Buddhist doctrine, on account of the fact that its (viz. of the *māna*) object of knowing has (only) momentary-existence. [244]

The argument is: *māna* and *meṃya* are distinct, but the latter was not known (as existent) until the *māna* became operative. But while there results the knowledge of the object, the means of knowing has ceased to exist. Thus there results *kṣaṇikatvavāda*, as acceptable even to one who holds the *māna* and *meṃya* as reals.

This argument is adduced after accepting the need of vyava-

hārasiddhi.

स्वार्थं प्रत्येव संसिद्धेः परार्थस्येह वस्तुनः ।
स्वप्नादिवदनात्मार्थो मृषा स्यात्क्षणिको ऽपि वा ॥२४५॥

Since, in worldly dealings, every object which exists for the sake of another¹ gets established (only) with reference to its own object², the object which is non-Ātman would be either futile like one in a dream etc. or (it would be) momentary.³ [245]

¹The word *padārtha* is paraphrased by SP as *meya artha* and by NKL as *jaḍa artha*. Possibly this refers to the view that *jñāta* and *jñāna*(=*māna*) are both *jaḍa*— cf. the concept of the Sāṃkhyas: *saṃghātasya parārthatva*.

²This refers to the object of knowing. (Or, *ajaḍa* Ātman).

³The argument is: If this *svārtha* also were *jaḍa*, then it has to be considered at the time of its being known by the means as non-existent, and that would resemble the view of the Sautrāntika and Vaibhāṣika Buddhists.

न च सौगतसिद्धान्तस्तत्तिसिद्धौ मित्यभावतः ।
मेयमानैकतो ऽभावादज्ञातत्वस्य तत्क्षणे ॥२४६॥

And (in this regard we do) not (hold) the doctrine of the Buddhists (as correct) owing to the absence of the knowledge which leads to establish that,¹ on account of (the fact that) there could not be oneness of the object of knowing and the means of knowing² there would be unknownness of the object at the moment (time)³. [246]

¹Namely, the object to be known (*jñāta* which is also *jñeya*).

²*meyamānaikataḥ* = *meyamānaikatvataḥ*.

³Supply: of knowing it.

अथाभ्युपेयते ऽज्ञातः प्रमेयाव्यतिरेकतः ।
एकत्रापि प्रमाणत्वप्रसिद्ध्यर्थं क्षणात्मनि ॥२४७॥

Well then (*atha*) it is accepted that the character of being unknown is apart from the object to known, in order that its nature of being the means of knowing becomes established even while it is as momentary in nature. [247]

This is the argument of a Vijñānavādin — a concessional acceptance for the sake of arguing that the means of knowing is informative (*jñāpaka*) of an earlier unknown object.

मानात्मके ऽपि मेये ऽर्थे यद्यबद्धत्वमिष्यते ।
अज्ञातत्वापनुन्मानात्किमन्यदिति कथ्यताम् ॥२४८॥

If, in respect of the object to be known which is of the nature of the knower (lit. a means of knowing), it is held that it cannot be known, then let this be told: What else is there, apart from the means of knowing, (so that it is capable of) removing the unknownness (of the object to be known)? [248]

This is in answer to the Buddhist concessional argument stated in the preceding verse.

स्वतो वा परतो वेदमज्ञातत्वं भवद्भवेत् ।
स्वतश्चेत्तत्तमोवत्स्याज्ज्ञातत्वं रज्जुसर्पवत् ॥२४९॥

This character of being unknown would be either self-established or established by another (means). Then, if it is self-established, it would be (ever) accompanied by (lit. possessed of) darkness¹ (and) the character of being known (would be) like that of the serpent in a rope. [249]

¹That is, what is *ajñāta* would ever remain so.

²It means: it would be false apprehension.

अथान्यतस्तदज्ञातं किंरूपं वस्त्वतीर्यताम् ।
मानादवगतं तच्चेन्मैवमव्यतिरेकतः ॥२५०॥

Now, if (it is held that) it remains unknown owing to another (factor), let it be told me as to what form it¹ has? And

if it is (said to become) known by some means, let it not be said so, for it does not exist apart (from the thing). [250]

This has a reference to the fourth alternative: *na cobhayam* mentioned in verse 222 above. It means: the object of knowing remains unknown owing to non-knowing and also becomes known owing to knowing — not on account of its own nature!

¹It means: the object of knowing, viz. Reality.

अन्वयव्यतिरेकाभ्यां यथोक्तो ऽर्थः प्रसिध्यति ।
ताभ्यां विना कुतो ऽज्ञायि त्वेवंरूपमितीर्यताम् ॥२५१॥

The object which has been so far discussed gets ascertained by the method of Anvaya and Vyatireka¹ (and) from what other than these two (viz. Anvaya and Vyatireka) is known such a form (of object) — tell me. [251]

This is the explanation of the verse 250. The theory of an opponent does not establish the nature of Reality. This method is not applicable to the means of ascertaining the nature of Reality. AnSS reads *tvevaṃ rūpam* (!)

¹Cf. see our book [Vol.1:1982] Introduction, for the method of Anvaya and Vyatireka.

न चेह वास्तवं रूपं तदध्यासेन बाध्यते ।
रज्जुसर्पीधिया लोके न रज्जुरिति धीवृत्तिः ॥२५२॥

And further, here,¹ the real form of the thing is not stultified by a superimposition (of anything on it). In this world, the knowledge 'this is a rope' is not anywhere concealed² by the knowledge 'there is a serpent' in the place of a rope.

[252]

This verse refers to two possible views regarding the nature of the object which is not known: Its unknownness is (i)imaginary, or (ii)real. The first possibility has not to be considered at all! The second is answered by the whole verse.

¹That is, in *vyavahāra*.

²That is, stultified.

स्वसंवित्त्वमात्रे च न तमःसंभवः क्वचित् ।
तथाभ्युपगमे तस्य नापनुत्तिः कुतश्चन ॥२५३॥

And, there cannot be any time¹ a possibility of ignorance when the object to be known is held to be what has the nature of mere sentience of one's own; for, that view being accepted, there cannot be its stultification on account of anything.² [253]

According to SP, this refers to the view of the Yogācāra Buddhists, incidentally.

¹ = *kvacit*.

²Or, for any reason.

दुर्बलानां विरुद्धानां बलवद्विरपाक्रिया ।
विरुद्धैरेव दृष्टा सा तदैकात्म्ये कथं भवेत् ॥२५४॥

It is noticed that removal¹ of the weak in opposition is effected only by the strong ones (who are) opposed (to them). How can that² be in the case where there is uniqueness of that³?

[254]

It seems that the verse refers to the view that real ignorance is removed by some sudden knowledge of Reality; but this does not have to be answered since the generally accepted maxim is not relevant upon matter in hand.

¹That is, setting aside or disproving.

²This refers to *apākriyā* explained in note 1.

³It means: self-illuminating Reality or sentience.

बाध्यबाधकयोर्योगः स्वशक्त्यनपहारतः ।
यो ऽन्यथा संगतिं ब्रूते चर्मवद्वेष्टयेत्स खम् ॥२५५॥

Whatever connection we notice between *bādhyā* and *bādhaka* knowledges occurs on account of the non-removal of their own essence (i.e. strength); (and, therefore) he who holds that

the connection (between unknownness and knownness) can exist in some other way would be trying to wrap the sky with some skin.¹ [255]

¹It refers to an impossible task. A skin does not lose its capacity to cover something and the sky also does not get covered (i.e. does not lose its expanse) — yet the connection between the two as the wrapper and the wrapped is not at all possible.

नच जाड्यातिरेकेण ह्यविद्या काचिदिष्यते ।
अविद्यां गमयित्वेति श्रुतितो ऽप्यवसीयताम् ॥२५६॥

Ignorance¹ (or any absence of proper knowledge) is not understood (to be) apart from (some) non-sentience. Let this be concluded also from the Śruti 'Having dispelled (i.e. overcome) ignorance ...'. [256]

This verse adduces one more argument for holding any association of the unknownness of the real with sentience.

¹It literally means: non-sentience; but the second line refers to it as *avidyā*.

²Cf. BU 4.4.3: *evam evāyam ātmedaṃ śarīraṃ nihatya avidyāṃ gamayitvā anyam ākramam ākramyātmānam upasaṃharati*.

अज्ञातं न यथा मानान्मिथ्याधीसंशयौ तथा ।
न्यायः पुरोदितः सर्वो यस्मादस्ति तयोरपि ॥२५७॥

As what is unknown does not get established by any means of knowing, so also do not wrong knowledge and doubt get established (by any means of knowing), since, in the case of these two also, there holds good the method of thought¹ already stated. [257]

¹Namely, the object to be known (in this case) is not such as can be established by any means of knowing.

अपि सर्वप्रमाणानामज्ञातत्वादिसिद्धये ।
नेक्ष्यते ऽन्यतमं मानं स्वतःसिद्धं न चापि तत् ॥२५८॥

Further, not any one of all the means of knowing is capable of establishing the unknownness etc.¹, so also that, viz. any of the means, is not self-established. [258]

This is to argue that *avidyā* is not self-established (*svataḥsiddha*) either.

¹The word etc. refers to *mithyādhī* and *saṁśaya* mentioned in the preceding verse.

न तावदिह संभाव्यं प्रत्यक्षं तदसंभवात् ।

विषयेन्द्रियसंबन्धविरहात्तदसंभवः ॥२५९॥

Here (i.e. in this inquiry), the direct perception (of Reality) is just not to be considered (as the means of knowing it), since the possibility of direct perception cannot arise — (this) impossibility of that is owing to the absence of any connection between the object of reality and the sense-organs. [259]

Reference was made to the means of knowing (in verse 257 above). Therefore, there is yet further discussion whether that means is external (*bāhyapratyakṣa*) or mental (*mānasa*) or inferential. This verse is to deny the first alternative.

न च दुःखादिधीवत्स्याज्ज्ञातस्यैवानुभूतितः ।

प्रत्यक्षार्थवदेवैषा मिथ्याधीरनुभूयते ॥२६०॥

And (that unknown thing) would not be (possible) like the experience (i.e. awareness) of misery etc.¹ for the reason that there is experience of only that which is known. This knowledge, which is (according to us) false, is experienced entirely like an object of direct perception.² [260]

Here are discussed the second and third alternatives mentioned just before.

¹This is to say that *mithyādhī* is not imaginary.

²Experience is the result of some knowledge. At the most, the object known in that knowledge can be inferred from it, but not

anubhūti which is *pratyakṣa* 'direct perception'.

प्रत्यक्षादिफलं ज्ञानं कथं तस्य प्रमेयता ।
माफलं न च मेयस्थं क्रियाफलवदिष्यते ॥२६१॥

Knowledge¹ is the result (lit. fruit) achieved by direct perception etc. How can that have the character of an object to be known? The result of right knowledge is not taken to exist in the object to be known like the result of an action.²

[261]

¹Namely, the character of what is known (*jñātatva*).

²For example, the act of cutting results into a thing's division into two (at least); this division is seen in the thing cut.

अपि मानाभिसंबन्धो मेयार्थेनैव युक्तिमान् ।
नाफलस्य तु मात्रैव ह्यतो ऽन्यत्र वृथा श्रमः ॥२६२॥

And, further, it is reasonable to hold a relation of a means of knowing to only an object to be known. As against this, the result of knowing (has connection) indeed only with the known; (accepting it¹ to exist) elsewhere (than in the knower) would mean an effort (of knowing) for nothing.

[262]

¹That is, the result of knowledge.

माफलस्य तु मेयत्वे प्राप्नोतीहानवस्थितिः ।
प्रमाफलाभिसंबन्धः किंमान इति कथ्यताम् ॥२६३॥

But, (if it is accepted that) the result of knowledge has the character of an object to be known, then here follows *infinite regress*. It has to be explained¹ as to what is the means (that brings the awareness of) the relation between knowledge and its result.

[263]

¹It literally means: let this be pointed out.

इहापि चानवस्थेति नानुमातो ऽत्र युज्यते ।

न च रागादिसंसिद्धौ मानव्यापार ईक्ष्यते ॥२६४॥

Therefore, it is not proper to employ inference¹, since, here (in this case) also, there arises *infinite regress*. And, indeed, in the case of the rise of attachment etc. one does not expect any function of the means of knowing. [264]

¹Namely, to understand from the characteristic in the form of some effect (called the result) its relation to some means (which has produced it).

रागादेर्नापि चाभावो भावात्तदनुभूतितः ।
न च कश्चित्फले भेदो मेयमानप्रमातृषु ॥२६५॥

As for attachment etc. also, there is no non-existence of the same, as it proceeds from experience. And, in respect of a result, there is no difference (in relation to) the object of knowing, the means of knowing and the knower. [265]

मानकार्यं फलं चेत्स्यान्न स्यात्तन्मातृमानयोः ।
तदभावे च माभावात्कुतस्तत्स्यात्प्रमां विना ॥२६६॥

If the result¹ were (to be taken as) the effect (or product) of knowing (activity), then it would not exist in the knower and the means of knowing since, in the absence of them, there is the absence of knowledge. How could that (effect of knowing) follow (exist) when there is no knowledge? [266]

¹Namely, knowledge.

प्रमात्रादेरभावे च नाप्यभावः प्रमेष्यते ।
सुषुप्ते मातृपूर्वत्वात्सर्वमाव्यापृतेरिह ॥२६७॥

And, while there is the absence of the knower etc., one would not entertain non-existence to be *pramā*, because in deep sleep everything of knowing activity is preceded by a knower (etc.).¹

[267]

¹That is, even if there is no apparent activity of any knower there is a complete process of knowing.

न प्रत्यक्षानुमानाभ्यामतो ऽर्थापत्तितो ऽपि न ।
न हि दृष्टं श्रुतं वर्ते सार्थापत्तिः प्रसिद्ध्यति ॥२६८॥

It cannot be known by direct perception and inference, not also by *arthāpatti*, for *arthāpatti* cannot get established (lit. be effective) indeed without what is seen or heard. [268]

सादृश्यासंभवाच्चेह नोपमानस्य संभवः ।
मिथ्याज्ञानादिसंसिद्धौ न चाभावो ऽपि शङ्क्यते ॥२६९॥

Because there is no possibility of (there being) its¹ similarity (with any other thing); there is no possibility of any analogy (for knowing it). And (the idea of) its absence also cannot be entertained in respect of the experience of false knowledge etc. [269]

¹This means: of what is unknown.

अत्यन्तापूर्वदृष्टे ऽर्थे प्राङ्नाद्राक्षमिमं नगम् ।
प्रत्यभिज्ञायते साक्षाद्दृष्टपूर्वो यथा तथा ॥२७०॥

As in the case of an object which was never seen before (there arises only such awareness as) 'I have not seen this mountain.' and there arises the recognition, this one is like that as one had directly perceived earlier. [270]

This verse intends to point out how some unknown thing becomes known even if it cannot be established by any known means of knowing, its existence and non-existence.

न च मात्रादिसद्भावस्तस्यात्यन्तमदृष्टतः ।
न प्रमाणान्न चाभावात्प्रत्यभिज्ञात इष्यते ॥२७१॥

There does not exist any knower etc., for it is absolutely unseen; nor is there any recognised means of knowing¹; not can it be taken (as a thing to be) recognised just because of the non-existence (of any directly perceptible object).² [271]

This verse denies recognition of the unknown as implied by the preceding verse.

¹The NKL edition reads *na prāmāṇyāt* for *na pramāṇāt* of the AnSS edition. But NKL itself does not offer any help to decide if this is correct.

²Which is responsible for recognition as in the illustration of the preceding verse.

तस्मात्प्रमाप्रमाभासाप्रमाणानामशेषतः ।

स्वार्थानन्यप्रमाणात्स्यात्प्रसिद्धिस्तमसस्तथा ॥२७२॥

Therefore, (right) knowledge, what appears as knowledge¹ and absence of (right) knowledge — all of these can get established only on account of the unique means (of knowing) itself²; so also is darkness (i.e. *avidyā*) established (by that).

[272]

This is the conclusion: *avidyā* can be known only through experience, because it is not knowable by any accepted means of knowing and has the character which is not known (as similar to that of any other thing known); cf. SP: *ajñātātīvāder aprameyatīvād anubhavād eva taddhir ity upasamharati*.

¹ = *ābhāsa*.

²It means: the inner/the individual self which is that means.

आन्तरं मेयमाश्रित्य स्वतःसिद्धमनन्यमम् ।

भावाभावादिमद्विश्वं सर्वमेतत्प्रसिध्यति ॥२७३॥

All this universe¹ which is made up of existence and non-existence etc.² gets established only by resorting to the object to be known which is within (every being or thing), self-established, and having matchless knowledge. [273]

¹It means: the universe under discourse, viz. *mātr*, *meva*, *māna*

²The word etc. refers to their modifications (*parināmas*).

मेयार्थानभिसंबन्धान्न यथावस्तुधीरियम् ।

ज्ञातत्वात्तदभावो ऽपि प्रात्यक्ष्यान्नेष्यते स्मृतिः ॥२७४॥

[Verses 274 -280 discuss that false knowledge is established by experience in case knowledge does not correspond to the object.]

This knowledge of the thing, not arising in the absence of the contact (of intellect) with the knowable things and the absence of them,¹ is not taken as remembrance on account of their being known and directly perceptible.² [274]

¹That is, their character as non-essence.

²Hereby is discarded the Ākhyātivāda.

इदं रजतमित्येवंरूपं वस्तु न कुत्रचित् ।

न शुक्तौ रजतज्ञानं नेदंता रजते ऽस्ति नः ॥२७५॥

(There is) not anywhere a thing which is taken as 'this is silver.', for, there is no knowledge of silver in a shell and, for us, the character of being this thing (viz. thisness) does not exist in silver. [275]

An example of *mithyājñāna* is *idaṃ rajatam*. The questions raised are: This form (*rūpa*) qualified as it is, — does it belong to (i)the shell?, (ii)silver itself?, (iii)only the speaker's mind (*buddhi*)?, (iv)some other place?, or (v)some other moment? The second line answers the first two questions. The next verse answers the rest. This refers to the Anyathākhyātivāda.

तदन्यत्र द्वयाभावात्साक्ष्यादावपि नेष्यते ।

न नेहार्थावबोधो ऽस्ति मिथ्याज्ञानत्वकारणात् ॥२७६॥

Elsewhere than in those two (viz. silver and shell), (i.e.) where the two are absent, is it not taken to exist in the knower¹ etc.² also. Again, it is not that there is no knowledge of the

thing which has the nature of being the cause of false knowledge.³ [276]

¹That is, *buddhi*.

²The word etc. means: place and time.

³This is according to the Anirvacanīyakhyāti.

मिथ्याज्ञानादिसंसिद्धौ क उपाय इतीर्यताम् ।
सम्यग्धीतो ऽथ तत्सिद्धिर्न तस्या मेयसंगतेः ॥२७७॥

(The opponent remarks:) Let it be told as to what is the means of establishing this as false knowledge etc. (If¹ it is asked:) Is it established by (lit. from) right knowledge?², (then the answer is:) No, since that³ is related to (or associated with) what is to be known.⁴ [277]

¹This is to be understood thus: *atha ... cet*— this refers to the possibility of *mithyājñāna* being *mānasa pratyakṣa*.

²It means: knowledge of the thing as it is.

³It is *samyagdhī*.

⁴False knowledge cannot be associated with it (i.e. any object to be known)! For, if it were so, false knowledge would also be right knowledge — it would cease to be false.

मेयप्रमामृते कार्यं मानानां नान्यदिष्यते ।
न च सत्त्वादिमात्रेण रूप्यादिमितिसंभवः ॥२७८॥

No other purpose than the right knowing of the objects of knowing is expected of the means of knowing¹; and also there is no possibility of the knowledge of silver etc. by mere existence (of them) etc.² [278]

This further clarifies the thought in the preceding verse.

¹This presupposes an objection that even *mithyājñāna* could be an object of *samyagdhī*.

²This means the capacity of an existent shell which arouses the impression of its similar, viz. silver, and also its shining.

तस्यासाधारणात्मोत्थविज्ञानविषयत्वतः ।

तस्माद्रजतसंस्कारसंस्कृतात्स्वान्ततः स्मृतिः ॥२७९॥

That (false knowledge)¹ being an object of specified knowledge² that has arisen from what has the unusual nature³, there is a remembrance from that which has acquired the impression of silver etc.⁴ within.⁵ [279]

This is the reason for the statement in the preceding verse.

¹*idam rajatam iti jñānam.*

²Knowledge requiring subject-object relation (*prapañcajñāna*).

³This is not the knowledge of common experience.

⁴This is *bhrānti*. SP points out that this *mithyājñāna* cannot be considered as some kind of *anumāna*. It cites:

svīkāre vibhramāṇām syāt svīyasiddhāntabādhana /

anabhyupagame teṣām āśrayāsiddhir uddhatā //

Tattvapradīpikā p.63, lines 1-2. (*Tattvapradīpikā* = *Citsukhī* with *Nayanaprasādinī* of *Pratyagrūpa*. ed. by Raghunāth Kāshīnāth Shāstrī, Bombay: Nirnayasagar Press, 1931)

⁵There is no such cognition as 'This is like silver.'; but it must have been within and therefore the cause of *mithyājñāna*.

प्रथते ऽविकृतात्मैकनित्यदृष्टेः परात्मनः ॥२८०॥

ज्ञानज्ञात्रतिरेकेण तमस्यपि न विद्यते ।

मेयं वस्तु ततो ऽज्ञानं प्रत्यक्षं सप्रमातृकम् ॥२८१॥

False knowledge becomes evident on account of the highest Ātman which has ever the knowledge of himself as unmodified¹ (by anything else). [280]

An object of knowing does not exist as apart from knowledge and the knower even in darkness. Therefore, ignorance is an object of direct perception and has a knower (of it). [281]

¹That is, unaffected.

न हि संविदनारूढः प्रमात्रादिः प्रसिध्यति ।

संविन्मात्रैकयाथात्म्यात्प्रमात्रादेरनात्मनः ॥२८२॥

[Verses 281-299 discuss that ignorance along with the knower is established by experience.]

A knower etc. that has not mounted (=is not connected with) knowing does not get established for the reason that the true nature of knowing consists only in knowing itself, and also on account of the fact that the knower etc. are (but) the non-Ātman(s). [282]

This verse explains how while knowing the immutable Ātman there is existence (or need) of the knower etc. (*mātrādi*) which are declared as *jadapadārthas*.

ज्ञातो ऽयमर्थो ऽज्ञातो वा धीरियं कर्तृसंश्रया ।
स्मृतिः सा न यथावस्तु तेनासावप्रमोदिता ॥२८३॥

That this thing has become known or remained unknown — this knowledge has its basis in its agent and that (basis) is not memory¹ (of it) as the thing is; therefore, that is called ignorance. [283]

¹SP paraphrases *smṛti* as *bhrānti*, i.e. superimposed *karṭṛtvādi*.

न हि वस्त्वनुरोधयेतज्ज्ञाताज्ञातत्वलक्षणम् ।
रूपं वस्त्वपरिज्ञानसमुत्थं ज्ञातृसंश्रयम् ॥२८४॥

This form which is characterized as being known and/or unknown does not follow (=is not in accordance with) the thing (=Reality) as it is, it has (really speaking) arisen from the absence of the (right) knowledge of the thing and has the support in the knower¹. [284]

¹To whom the act of knowing is attributed.

ज्ञाताज्ञातविभागो ऽतः स्वतःसिद्धात्ममातृकः ।
संविदा ज्ञाततासिद्धिर्मितेरपि न मात्मना ॥२८५॥

Therefore, the division (of things) into known and unknown

has its origin in the self-established Ātman. It is on account of knowledge that its character (as a thing known) gets established; and knowledge also does not (get established)¹ by what is (called) right knowledge. [284

¹That is, become known as knowledge.

वस्त्वज्ञातं समुद्दिश्य तत्प्रमित्सन्ति मानिनः ।
ज्ञातत्वकार्यतश्चातः सिद्धं तत्फलतो ऽथवा ॥२८६॥

Keeping in view the unknown thing, those (persons), who have the means of knowing, seek to know it (and) (that unknown thing) gets established by its being known (by some means of knowing) or by its being the effect¹ (of its knowledge by some means of knowing it) but (ca) that is not so;² (it is known) by its being the result of experience. [286

The idea is: *jñātatva* and *ajñātatva* would belong to two moments of time and the Brahman cannot be said to be related to them. Therefore, only *anubhavagamyatva* has to be accepted.

¹*jñātatvakāryatvataḥ* is cryptic for *jñātvataḥ kāryatvataḥ* (ca).

²Cf. SP: *uktakalpadvayadūṣaṇadyotanārthaś cakāraḥ*.

यतो ऽज्ञातत्वसंसिद्धिर्ज्ञातत्वस्यापि चाञ्जसा ।
तत एव च मानत्वं संविदते न तत्त्रयम् ॥२८७॥

Since unknownness and also, of course, knownness (thus) get established smoothly, there follows from the same their being the means of knowledge; there cannot indeed be the three without the (real) knowing one. [287]

¹Cf. NKL: *ajñātatvam jñātatvam mānatvam ca*.

षष्ठगोचरवन्नेदमज्ञातत्वं समीक्ष्यते ।
न च प्रत्यक्षवत्सिद्धं स्वानुभूतिसमाश्रयात् ॥२८८॥

This character, viz. being unknown, is not considered to be like what is (within the scope of) the sixth (sense organ).¹

Nor does it get established like what is directly perceptible, since it has resorted to one's own experience. [288]

¹The object of the sixth organ means a non-existent object, for there is no sixth organ and also its object. See our book [Vol.1:1982] p.280.

प्रमात्रादिविविक्तार्थमनुभूयोत्थितस्ततः ।
नावेदिषमिति प्राह स्वानुभूत्यनुसारतः ॥२८९॥

A person, who has awakened from (sleep) after having experienced various objects, viz. the knower and others, as discrete (objects), says in accordance with his own experience 'I did not know.' [289]

¹This verse explains how, in deep sleep, one sees various objects only to find after waking that there was in reality nothing whatever experienced.

प्रमात्राद्युत्थितेः पूर्वं चिदन्यानन्वयात्तमो-
विशेषणां चिदेवैका स्वानुभूत्यैव गम्यते ॥२९०॥

Before the rise (from ignorance), with ignorance as its attribute, since there was no connection of anything else than sentience that persisted, there was the knower etc. which in reality was sentience itself, (and) that (sentience) becomes known by experience alone. [290]

This explains the difference between experience of Reality and experience even in the waking state.

आसीदिदं तमोभूतमप्रज्ञातमलक्षणम् ।
अप्रतर्क्यमविज्ञेयमित्येतत्स्वानुभूतितः ॥२९१॥
प्रथते यः स्वयं साक्षादज्ञातत्वादिभूमिषु ।
स प्रमेयः स्वयंज्योतिः प्राक्प्रसिद्धेः प्रमातृतः ॥२९२॥

This (world) was (only) darkness, unknown, not having any characteristics (which would help any inference), beyond any

guess, unknowable¹ — this (is known as true) from experience. [291]

The one, who himself continues to be present, in (all) those states of unknownness etc., is to be known; the self-illuminated, (as existent even) before there was awareness of the knower etc. [292]

¹This is Manu's statement; *Manusmṛti* 1.5a-c.

एष एवानवगतः स्वतो ऽवगततत्त्वकः ।
एतावन्मात्रसंख्याप्तेरज्ञानादेः पुरा मितेः ॥२९३॥

Before right knowledge (occurs), this one whose real nature is understood from itself is itself unknown on account of ignorance etc. whose extent is only this much. [293]

यथेह घटविज्ञाने घटाकारो ऽनुभूयते ।
ज्ञातृतत्साक्षिणौ चैवं नाज्ञाने साक्षिणो ऽपरम् ॥२९४॥

As here¹ the shape of a pitcher is experienced (i.e. becomes known) when there is a specified knowledge² about the pitcher, so there are not in ignorance a knower and the experience of it (existing) apart from the experiencer himself. [294]

¹That is, in our worldly dealings.

²Namely, information known.

अज्ञातत्वं न मानेभ्यो ज्ञातत्वं तत्कृतं यतः ।
तैरप्यज्ञातता चेत्स्यात्कातिशीतिर्मितेर् भवेत् ॥२९५॥

Because the nature of being unknown (in the case of the Ātman) does not (originate from) the means of knowing and the nature of being known is caused (i.e. effected) by the same, therefore, what could be the excellence of the right knowledge if with those means of knowledge also the Ātman continues to have unknownness? [295]

स्वानुभूत्यैव संसिद्धेर्नाज्ञातः खरशृङ्गवत् ।

संवित्तेरप्यसंबोधात्स्यात्तन्मानव्यपेक्षिता ॥२९६॥

(Therefore,) the Ātman gets established on account of its own experience; it is not unknown like the horn of a mule; in the case of knowledge also, there is absence of it before (its rise) and there will be its dependence on the means of knowing it. [296]

This stresses the need of hearing etc. the Śruti-sentences like *tat tvam asi* (NKL).

प्रत्यक्षकुम्भवत्साक्षात्सुषुप्ते ऽनन्यबोधगम् ।
आत्मा ह्यात्मानमैकात्म्यादात्मना वेत्यकारकः ॥२९७॥

As (in the waking state one knows) directly an actually existent, so also does one know (the pitcher) in deep sleep which arises from none elser¹. But, it is the Ātman indeed who, because of its uniqueness, knows itself (even though) it does not have any means of knowing (lit. activity). [297]

¹In both the states, viz. waking and sleep (signifying dream), one sees an object through the so-called means of seeing.

पराक्प्रवणया दृष्ट्या धीस्थो ज्ञो ज्ञानमात्मनि ।
व्योमकाष्ण्यादिवत्तज्जं सम्भावयति न स्वतः ॥२९८॥

The knower¹, who has resorted to intelligence acquires (lit. sees) in himself some knowledge by an eye, which is directed outwards, as (they see) the dark of the sky etc.² and its products; but indeed not (what comes from) itself.³ [298]

The idea of the verse is to explain our everyday experiences of objects. These proceed when sentience has on it the superimposition of an individual, his sense-organs etc. — this superimposition is *anādisiddha* for that individual.

¹This refers to sentience (within an individual).

²Cf. the Śruti passage *devātmaśaktim svaguṇair nigūḍhām ...* (Śvetāśvataropaniṣad 1.3).

³Cf. Śaṅkara's Adhyāśabhāṣya (p.39): *apratyakṣe 'py hy ākāṣe bālās talamalinatādy adhyasyanti.*

नैवाज्ञानं मृषाज्ञानं संशयज्ञानमीक्ष्यते ।

प्रत्यक्प्रवणया दृष्ट्या जाग्रत्स्वप्नसुषुप्तिषु ॥२९९॥

Not indeed is ignorance, false knowledge, or doubtful knowledge obtained by the eye which has turned within,¹ in (all) the (three) states of waking, dream and deep sleep. [299]

This answers away a doubt if the Self also could be ignorant like the Self with the superimposition of a body etc. on it.

¹Or, the seer within, viz. the Self.

न सुषुप्तगविज्ञानं नाज्ञासिषमिति स्मृतिः ।

कालाद्यव्यवधानत्वाच्च ह्यात्मस्थमतीतभाक् ॥३००॥

[Verses 300-319 discuss that the knowledge arising after deep sleep in the form 'I did not know the real things for all this time.' is not dream.]

The specified knowledge¹ obtained in a dream, (which is later) memory² in the form 'I did not know.'; for it has no delimitation³ by time etc. (and therefore) does not belong to the Ātman. [300]

¹*vijñāna* which has the usual complex of a knower etc. (*mātrādi*).

²Memory of the basic *ajñāna*, since every experience of the state(s) of waking (etc.) gets sublated — basic *ajñāna* however gets sublated only after one has obtained the knowledge of the Self.

न भूतकालस्पृक्प्रत्यङ्गं चागामिस्पृगीक्ष्यते ।

स्वार्थदेशः परार्थो ऽर्थो विकल्पस्तेन स स्मृतः ॥३०१॥

The individual self does not belong to (lit. touch) the past and not also to the future¹. On that account,² an imaginary thing which exists in itself (lit. own region) is remembered

by him as another object.

[301]

The verse points out that the concepts of time and place are rooted in the superimposition of a body etc. (*adhyāsa*) on the Ātman.

¹Cf. *Kāthopanīṣad* 2.14: *anyatra bhūtāc ca bhavyāc ca*.

²That is, owing to *adhyāsa*.

न हि प्रत्यक्षविज्ञानादतीतत्वं समीक्ष्यते ।
न चानागतता मेये मिथ्याज्ञानमतो भवेत् ॥३०२॥

Indeed the quality of belonging to the past (in the case of things) is not grasped by direct perception and so also the character of not having come into existence in respect of an object to be known¹. And, therefore, there would be false knowledge.

[302]

¹That is to say: The Ātman that was never produced or will never be produced (*aja*).

यत्तत्त्वकं स्याद्यद्वस्तु न तत्तदतिवर्तते ।
नाज्ञातरज्जुजः सर्पो रज्जुमुल्लङ्घ्य वर्तते ॥३०३॥

Of whatever nature a thing is, from that it cannot be apart.¹ A serpent, born of a rope (whose nature is) not known, does not exist beyond the rope.

[303]

¹Or alternatively, that it does not abandon (lit. transcend) it.

तस्मात्तिसृष्ववस्थासु ह्यागमापाधिनीष्वजः ।
स्वतो ऽलुप्तदृशा यस्मादात्मात्मानं सदेक्षते ॥३०४॥

Therefore, in all the three states which arise and end, (there exists) the unborn, since the Ātman forever sees itself by its sight which is never losing (lit. lost).

[304]

देहान्तरेष्वपि तथा ह्यन्योन्यव्यभिचारतः ।
प्रत्यक्प्रत्यय एवैकः सर्वत्राव्यभिचारवान् ॥३०५॥

In the same way, even in different bodies which are discrete from one another, the experience of the inner/individual self is but one,¹ (and) everywhere certain. [305]

¹That is to say: There is no means by which one could ascertain that the Ātman in each body is different.

चैतन्यमात्ररूपं सत्प्रथते ऽज्ञानमात्मनि ।
प्रत्यक्कूटस्थनिष्ठत्वात्तद्वाध्यं कारणेतरत् ॥३०६॥

In the Ātman there exists (lit. extends) knowledge (even) being in (or having) the form of mere sentience (and) since it permanently exists in the individual self, the cause and the other¹ are stultified by it.² [306]

¹That is, effect.

²The cause and effect relation belong to worldly dealings — for the Ātman has remained ever unchanged (*kūṭhastha*).

नैवं तत्स्यात्स्वकार्येषु तेषां ताद्रूप्यहेतुतः ।
जडस्वभावतो नान्यद्रूपं कार्येषु गम्यते ॥३०७॥

That would not have been so (as described before) for the reason that they¹ attain the sameness of nature with theirs. (This is so because) in respect of their own effects, there is not experienced a form (=nature) other than what is non-sentience. [307]

¹They refer to *kāraṇas* mentioned in the preceding verse — these are *indriyas*, *antahkaraṇa* etc., which assume the shape of their objects (*tadākārabhavana*).

एवं चेत्को ऽनयोर्भेदः कार्यकारणयोर्मितेः ।
अन्वयव्यतिरेकाभ्यां न जाड्यमतिवर्तते ॥३०८॥

If this be so, what difference is there in respect of the knowledge of the two which are the cause and the effect?

Non-sentience does not transgress the method of Anvaya and Vyatireka. [308]

It was shown that in respect of the inner self there is no means by which one could ascertain the difference between the cause and the effect. Now, in this verse, is stated that the difference arose only from ignorance.

कार्यकारणरूपाभ्यामतद्वत्तत्त्विका ततः ।
आत्माविद्यैव सर्वत्र प्रथते स्वात्मसाक्षिका ॥३०९॥

Therefore¹, in the form of the cause and the effect there extends everywhere ignorance about (the nature of) the Ātman which has (in reality) the nature of what does not have that (Ātman)², (and) has the Ātman as its experiencer (= witness). [309]

¹That is, because it is impossible to entertain the existence of the cause and the effect (as discussed before).

²Cf. NKL: *kāryakāraṇanirmuktātmatattvikā*.

नैवात्मना स्वभावेन स्वात्मानं लभते जडः ।
यतो ऽतः स्वार्थदेशः स स्वार्थश्चानन्यसिद्धिकः ॥३१०॥

Since the non-sentient does not of itself ever come into existence, possessing its nature; therefore, the region of its own nature and itself are not produced by another. [310]

स्वतो बुद्धे कुतो ऽविद्या तामृते संसृतिः कुतः ।
इति बुद्धात्मतत्त्वस्य गीरियं न तमस्विनः ॥३११॥

How could there be ignorance in the case of the one (who is) self-awakened and how could there be transmigratory existence without ignorance? This is the speech about (i.e. description of) the one who has known its own true nature (to be) thus, (and) not of one who is possessed of darkness.

[311]

यथोच्छिन्नात्ममोहस्य निहोतुरपि निहुतिः ।
एवं प्रागात्मसंबोधादद्वयैकात्म्यनिहुतिः ॥३१२॥

As in the case of the one whose ignorance about the Ātman is destroyed there follows the concealment of the one who conceals,¹ so, before knowing about/of the Ātman, there remains the concealment of the uniqueness of the (Ātman) without duality. [312]

¹This refers to *avidyā* and its effect(s).

काकोलकनिशेवायं संसारो ऽज्ञात्मवेदिनोः ।
या निशा सर्वभूतानामित्यवोचत्स्वयं हरिः ॥३१३॥

For an ignorant one and for the knower of the Ātman, true existence is like the night for a crow and an owl¹ (respectively); Lord Hari himself has declared (this) in the words *yā niśā* ...² [313]

¹A crow sleeps at nightfall, while an owl begins its activity then.

²This is *Gītā* 2.69.

तस्मान्न वास्तवं रूपं तद्धवान्ताद्यपनोदकृत् ।
तस्मिन्सत्येव मोहादि व्युत्पत्तेः प्रागभूद्यतः ॥३१४॥

Therefore, it is not the real form which is the remover of darkness etc. because ignorance etc. existed before that (true) knowledge (of the inner self occurred) even while it existed. [314]

This verse reaffirms the usefulness of *mānameyādivyavahāra*, i.e. ignorance/*adhyāsa*, before and for the rise of the knowledge of the nature of the Ātman.

प्राणारूढमेवैतद्वन्त्यविद्याद्यशेषतः ।
ब्रह्मविद्विरतो यत्नात्प्रमाणमिह संश्रितम् ॥३१५॥

This (sentience), which has resorted to the means of knowing

etc.,¹ fully destroys ignorance etc. Therefore, in this respect, the knowers of the Brahman² have resorted to the means of knowing with effort. [315]

¹This refers to *tattvamasyādivākyavicāra* which involves *mātrādi* (i.e. *śāstrīya vyavahāra*).

²That is, the seekers of the knowledge about the Brahman.

उताविद्वानिति तथा प्रश्नपूर्वं स्वयं श्रुतिः ।
निर्णेनेक्ति स्फुटं वस्तु यथोक्तेनैव वर्त्मना ॥३१६॥

And, further, the Śruti itself clearly decides the truth by first asking the question *utāvidvān*¹ in the way we have stated before.² [316]

¹Cf. *Taittirīyopaniṣad* 2.6 and 2.7 for the relevant question and answer.

²Namely, by the accepting sentience as having the means of ascertaining what is Reality.

आत्मासाधारणार्थोत्थरूपमात्रसमाश्रयात् ।
तन्मानमपि मानत्वं लभते न तु केवलम् ॥३१७॥

(It is) on account of resorting only to that form which has become (=arisen) from the unique nature of the Ātman that the means of knowing it becomes a means (of removing ignorance) but not by itself.¹ [317]

¹That is, when unaided by sentience. This is asserting once again how only sentience is responsible for the acquisition of right knowledge about the Ātman.

तावन्मात्रैकयाथात्म्यप्रत्यगात्मत्वकारणात् ।
पराक्षिवव न भेदो ऽत्र मात्रादेः प्रत्यगात्मनि ॥३१८॥

On account of their having only that, viz. the inner self in its true nature as their cause, the knower etc. do not have mutual distinction among themselves with regard to (knowing)

the inner self as (they have the same) in respect of the objects outside. [318]

स्वचिदाभासवन्मोहपृष्ठेनैवेति कर्तृताम् ।
कूटस्थो ऽपि स्वतः प्रत्यङ्नात्मवृत्तव्यपेक्षया ॥३१९॥

The individual self, even though immovable (by nature), becomes the agent, (riding) on the back of ignorance which has the form of the appearance of sentience¹, that is its own, and not by resorting to its own activity. [319]

¹This is the state of having lost the original state, owing to ignorance.

सर्वधीविक्रियासाक्षिण्येवं सिद्धे स्वतो दृशौ ।
कार्यं ये ऽनुभवं प्राहुर्वाच्यं तैः कार्यसाधनम् ॥३२०॥

[There now follows up to verse 348 a discussion whether *anubhava* is an effect.]

When the experiencer, the witness of all the modifications of intellect, himself a seer — is thus established, those, who have described experience as (some) effect, should (i.e. have to) declare (what) is productive of the effect¹. [320]

¹The effect is 'knowledge of the sentience' and the cause 'its means'.

न जायते ऽज इत्यादि विज्ञानघन इत्यपि ।
कृत्स्नपुंविक्रियोत्सारि वाक्यं कस्मादुपेक्ष्यते ॥३२१॥

(Our question is:) Why ignore the statements of the Śruti (i) *na jāyate*,¹ *ajah*,² and (ii) *viññānaghanah*³ ..., which set aside (= disregard/reject) all modifications of Puruṣa? [321]

The verse makes the following argument: *anubhava* of the sentience (as an individual) is not merely without any cause but also is opposed to the thought in the Śruti.

¹Cf. *Kāthopanīṣad* 2.18.

²Cf. BU 4.4.2.

³Cf. BU 2.4.12.

प्रमात्राद्युत्थितेः पूर्वं कारकं दुर्लभं मितेः ।
तदभावात्क्रियाभावस्तामृते कार्यता कुतः ॥३२२॥

Before the rise of a knower etc., it is difficult to get (=posit) any means (of knowing); then, in the absence of it, there would be absence of any action and, without that (=action), how could there be anything like an effect? [322]

एतच्चानुभवादेव भवताप्यभ्युपेयते ।
कारकव्यापृतिस्तत्र निपुणेनापि नेक्ष्यते ॥३२३॥

And this is accepted by yourself also on the basis of (=from) experience only; (for) in that connection, no activity of any means is seen by even a well-observing person. [323]

अकुर्वत्कारणं चेत्स्यात्तद्वत्कार्यं सदा भवेत् ।
कार्यैतरानवसितिः संभूतौ युगपत्तयोः ॥३२४॥

If there is a cause which is not functioning, an effect would be always there likewise, and there would not be any decision with regard to making between an effect and a cause, while they are existing together.¹ [324]

¹This refers to the case when the cause and the effect co-exist.

विरुद्धानेककार्याणामेकस्मादेव कारणात् ।
अकुर्वतः प्रसक्तिः स्यादकुर्वत्त्वाविशेषतः ॥३२५॥

There would follow the contingency that mutually opposed defects would result from one and the same (non-operative) cause, since there is no specific non-operation (for their rise). [325]

This refers to the case when there is a sequence, of course,

first the cause and then the effect.

अथ कुर्वदभीष्टं तत्तत्कार्यं तर्हि भण्यताम् ।
अकार्यं कारकमिति सुप्तोन्मत्तप्रभाषितम् ॥३२६॥

If it is accepted that that (viz. a cause) is operative, then it has to be pointed out as to what is its effect. (For, a statement) that there is a cause without any effect would be the speech of one who is either in sleep or mad. [326]

मयाध्यक्षेण प्रकृतिः सूयते सचराचरम् ।
इति श्रीमत्सुरेशस्य वाक्यमेवं समञ्जसम् ॥३२७॥

(In this situation) the statement of the Lord of gods: 'As the superintending one, I urge Prakṛti (consisting in) the movable and the immovable.'¹; becomes only thus reasonable. [327]

¹Cf. *Gītā* 9.10

प्रमेये च क्रियायां च प्रमाणे ऽथ प्रमातरि ।
तच्छक्त्युपाधिहेतुत्वाज्जायमानेव चिद्ध्रुवा ॥३२८॥

In respect of an object of knowing, an activity (of getting to know), the means of knowing, and also the knower, it is the immovable sentience, that is, as it were, being born (variously) on account of the limiting adjuncts consisting in its own power. [328]

यथा सद्व्यतिरेकेण न किञ्चिद्वस्तु सिद्ध्यति ।
तद्वदव्यतिरेकेण घटाभावाद्यसंभवात् ॥३२९॥

As nothing apart from the existent¹ can get established, so also the absence of a pot etc. as non-apart from it cannot (get established).² [329]

¹Namely, *cit* mentioned in the preceding verse, the Brahman.

²Be it *bhāva* or *abhāva* of the discrete objects of the world.

it cannot have an existence independent of *cit*, i.e. unless through *adhyāsa*.

न हि सद्व्यतिरेकेण त्वसद्वस्त्वपि सिद्ध्यति ।
तस्यापि सदपेक्षत्वात्किमन्यत्स्यात्सता विना ॥३३०॥

Indeed not even a non-existent thing gets established¹ as apart from the existent thing,² since even that (non-existent thing) has the expectancy of³ some existent (thing). Therefore, what else could there be than the existent? [330]

¹That is, can get established.

²Namely, *cit*.

³That is, depends on.

यथैवं संविदते ऽसन्नैति संभावनामपि ।
सदप्यभावरूपं वा तद्वदव्यरितेकतः ॥३३१॥

As this is so, without knowledge¹ no non-existent could possibly come to exist and likewise even an existent², having the nature of non-existence, (could not come to exist), if apart from it¹. [331]

¹That is, the existent or *cit*.

²Namely, that which is accepted in the world as existent.

अविद्या वाथ तत्कार्यं नाभेदान्नातिरेकतः ।
सिद्धायते यतो ऽतः स्यादविचारितसिद्धिकम् ॥३३२॥

Since ignorance or its effect would not get established as non-distinct or apart from it¹, therefore, let that be (considered) as established without reasoning.² [332]

¹This is sentience, *cit*.

²Or, call it indescribable (*anirvācyā*).

नीलोत्पलदलाभं खं द्विरेफोदरवत्तमः ।
अविचारितसिद्ध्येवं तमस्तज्जं च वीक्ष्यताम् ॥३३३॥

That sky is of the colour of the petal of a blue lotus (and) darkness is like the belly of a bee gets established without any reasoning, in the same way, let this darkness and its effect (also) be seen (as established). [333]

The verse refers to two popularly known instances of two figures of speech which involve attribution of some property of one thing to another — these are, in Vedāntic context, instances of *adhyāsa*; they help to establish the Vedāntic doctrine of *adhyāsa*. Incidentally, this refutes the Bhāṭṭa view that the sky has blue/dark colour.

स्वमहिम्ना न संसिद्ध्येत्स्वतो ऽनवगतात्मकम् ।
भावाभावौ न वस्त्वेति प्रत्याख्यातं यदात्मना ॥३३४॥

What is by nature not known in its own right would not get established by its own extent (=greatness). Existence or non-existence (of any worldly thing) is not an existent thing, since this thing gets disproved (as real) owing to (the existence of) the Ātman. [334]

तस्मादजायमानैव जायमानेव लक्ष्यते ।
अनूभूतिस्तदज्ञानहेतूत्थानात्मजन्मना ॥३३५॥

Therefore, experience which, though it does not arise (lit. it is born), appears like arising (i.e. being born) on account of the rise of (i.e. awareness of) the non-Ātman which springs from the ignorance about that (=Ātman, viz. *cit* above); [335]

तद्विनाशे ऽपि तत्साक्ष्याद्विनश्यन्तीव लक्ष्यते ।
यतो ऽतः कार्यतां तस्या नेश्वरो ऽपि प्रसाधयेत् ॥३३६॥

since, when that¹ gets destroyed, it² also gets destroyed on account of the character (of the Ātman) as the seer. Therefore, even the Lord would not be able to establish experience as an effect. [336]

¹This means: the awareness of the non-Ātman.

²This means: the experience.

स्वात्मसाक्षिकतां मुक्त्वा भावाभावात्मवस्तुनः ।
यतो ऽसिद्धिरतः प्रत्यङ्गनिरस्ताखिलविक्रियः ॥३३७॥

Since a thing of the nature of existence and non-existence cannot get established except with the capacity of one's own Ātman (=the inner self) to be the witness, therefore, the inner self is completely devoid of all modifications. [337]

कार्यं सर्वं यतो दृष्टं प्रागभावपुरःसरम् ।
तस्यापि संवित्साक्षित्वात्प्रागभावो न संविदः ॥३३८॥

Since every effect is seen¹ to have a preceding non-existence of it and that (preceding non-existence) has the character of being witnessed by the knowing one², there is (therefore) no non-existence of *samvid* 'the knowing one'. [338]

The argument is: The thing and its *prāgabhāva* are both knowables for *samvid* which exists now and which existed before also. Therefore, it is ever-abiding.

¹ = *samvidavagata*.

² *samvid* = *cit*.

प्रमात्राद्यतिरेकेण ह्यसंविदितरूपकम् ।
मेयं सिद्धमिहैवैतन्न वेदादन्यतः क्वचित् ॥३३९॥

Only here (=in the *samvid*) is established this object to be known¹, (viz. that) whose form (etc.) is *indeed* not known as apart from its knower etc.; not from anywhere else than in the Veda (viz. Vedānta). [339]

¹It means: the uniqueness of the Ātman.

वस्तुवृत्तमपेक्षयैतन्न स्वतः परतस्तमः ।
तज्जं वा तत्तमो ऽपेक्ष्य ह्यव्याकृतगिरोच्यते ॥३४०॥

With this happening of things in view it is that this darkness

(=ignorance) or its effect (gets established) in its own right or on account of another (and), therefore, only with that darkness kept in view it is expressed by the word *avyākṛta*.

[340]

This verse rejects the *anirvācyatā* 'indescribability' of *tamas* on the ground that it was mentioned in the Śruti as 'difficult to explain (ineffable) — *durnirūpa*'. NKL points to earlier statement to this effect in SV 176.

चिदाभासं तमो ज्ञेयं नाज्ञासिषमितीक्षणात् ।
जगज्जनिस्थितिलया एवंभूते परात्मनि ॥३४१॥

Darkness is to be known as the appearance (or semblance) of sentience, since there is the experience 'I did not know.'. Origin, sustenance and merger of the world (can be postulated) when the highest Ātman has been (accepted as) such. [341]

तमःप्रधानः क्षेत्राणां चित्प्रधानश्चिदात्मनाम् ।
परः कारणतामेति भावनाज्ञानकर्मभिः ॥३४२॥

The highest, who is principally darkness and who is principally sentience, becomes the cause respectively of the fields¹ and of those who have sentience as their nature² on account of (thier earlier) impression(s), ignorance and actions. [342]

This verse explains why there originated this varied world (*viṣamā sr̥ṣṭi*).

¹They means: inanimate things, or bodies.

²These are beings or knowers of the fields.

यावत्कार्यगतं किञ्चिद्भावनादि समीक्ष्यते ।
तमसा बीजभूतं तद्व्यज्यते संस्कृतेः पुनः ॥३४३॥

Whatever (viz.) impression(s) etc. belonging to the effect is seen here becomes the seed and it becomes revealed again thanks to darkness because of the impression(s). [343]

This refers to *pralayasarga*.

तमो नियामकं यस्मात्स्वकार्याणां तदन्वयात् ।
ऊर्ध्वं व्यक्तेः पुरा चैव तदेवातो नियामकम् ॥३४४॥

Since ignorance is the determining factor in respect of its products — for it continues to be in them — therefore the same (viz. ignorance) is the determining factor after the products have become manifest and also before (they appear).

[344]

नियम्यं कार्यमापेक्ष्य नियन्तैष तमोवधिः ।
तेष्वेव चित्स्वभावः सन्साक्षितां प्रतिपद्यते ॥३४५॥

In those very (products), this controller which has the nature of sentience attains the character of a witness, limited as it is by darkness, with respect to the products to be controlled.

[345]

निगीर्णं सज्जलकादि दुष्टं देशं यथाश्रयेत् ।
भावनाज्ञानकर्माणि तथा यान्ति तमस्विनम् ॥३४६॥

As wasps which have sucked (blood in one part of the body) resort to another (part), that is a spoilt part¹, so do impressions, ignorance and actions accompany (lit. go to) one who is possessed of darkness.

[346]

¹SP and NKL quote: *samprktād duṣṭaśuddhāśrāj jalūkā duṣṭa-śonitam, ādatte prathamam haṁsaḥ kṣīram kṣīrodakād iva* (untraceable).

उत्पत्तिस्थितिनाशेष कारणं नातिवर्तते ।
कार्यं सर्वं यथा लोके तथेहाप्यवसीयताम् ॥३४७॥

Let this be concluded that in origin, sustenance and destruction (of the world) the cause does not vary, but as all products in this world (vary) here also (do impressions, ignorance and actions vary) as well.

[347]

कार्येष्वपि च सर्वेषु कर्तृत्वं यत्समीक्ष्यते ।
अस्यैव तद्विजानीयादतः सर्वकृदुच्यते ॥३४८॥

And the agency which is seen here in respect of all these activities, that may one know as of this one only; therefore he is called the maker of all (of them). [348]

तत्तेज ऐक्षत इति तेजोदेहं सदेव तु ।
उत्तरोत्तरकार्याणां श्रुत्या स्रष्टृतयोच्यते ॥३४९॥

In the Śruti *tat teja aikṣata* that cause itself, being the existent and having *tejas* as its body is declared as the creator of every subsequent product. [349]

तथा संवर्गविद्यायामप्राणः प्राणतां गतः ।
अध्यात्ममधिदैवं च प्राणवायुतयोदितः ॥३५०॥

So (also), in the (context of) the lore of *saṁvarga*,¹ (some) non-*prāṇa* (i.e. non-sentience) has become *Prāṇa* with reference to the embodied self, and with reference to the deities, the same is called *prāṇavāyu* 'the vital breath'. [350]

¹Cf. CU 4.3.3.

नामोपक्रममाशान्तामरनाभिनिदर्शनात् ।
ओतप्रोतं जगत्सर्वं प्राण एवोपदिश्यते ॥३५१॥

By citing the example of the spokes and the hub (of a wheel), the Śruti has declared that this whole world, (whose description has) the beginning (in) *nāma* and the end in *āśā*, is only *Prāṇa*, fully woven by it length-wise and cross-wise. [351]

¹Cf. CU 7.1.3; 7.15.1.

तथैवाकाशशब्देन तत्र तत्रैष एव तु ।
तदेतत्सत्यमिति च सबीजः पर उच्यते ॥३५२॥

So also, only this one, the highest one, is mentioned at various places by the word *ākāśa*¹ and in the passage *tad etat satyam*² as possessing the seed (of creation). [352]

¹Cf. CU 1.9.1.

²Cf. *Muṇḍakopaniṣad* 1.2.1; 2.1.1.

प्राणो ह्येष सर्वभूतैरिति चाथर्वणे वचः ।
प्राणबन्धनं सोम्येति सर्वकारणमुच्यते ॥३५३॥

There is a statement of the *Ātharvaṇopaniṣad* also: *prāṇo hy eṣa sarvabhūtaih*¹ and in (the Śruti passage) *prāṇabandhanam somya*² (also) it is described as the cause of everything. [353]

¹*Muṇḍakopaniṣad* 3.1.4.

²CU 6.8.2.

एष स्वकार्यं संश्रित्य नानाभेदान्प्रपद्यते ।
स्वोत्सृष्टतोयधाराद्यैर्वैश्वरूप्यं रविर्यथा ॥३५४॥

Having resorted to its own effect (which is varied) this (Ātman) transforms into a number of varied objects as the sun transforms into variety of forms by means of (i.e. having resorted to) showers etc.¹ of waters sent down by itself. [354]

¹The word etc. refers to a mirror and other bases of reflections.

प्राणभूतादिजन्मैव जन्मात्मन इहोच्यते ।
वियतौ ऽजन्मनो जन्म यथा कुम्भादिजन्मना ॥३५५॥

Here¹, the origination of *Prāṇa* and *bhūta(s)* etc. itself is called the origination of the *Ātman* (=individual self), as the birth of ether, which does not (really) become born (is described as such) on account of the pitcher etc. having a birth. [355]

¹That is, in scriptures and among people.

एतस्माज्जायते प्राणो मनः सर्वेन्द्रियाणि च ।
नाव्याकृतं परादन्यदागमादवगम्यते ॥३५६॥

From this (Ātman) are born Prāṇa, *manas* and all sense-organs and the unmanifest is not anything else than the highest (Ātman) — (so) is known from the Śruti. [356]

स्वकार्याण्येव संश्रित्य मृदसाधारणा यथा ।
सामान्यरूपतामेति स्वकार्यैः कारणं तथा ॥३५७॥

As clay is uncommon (i.e. single), with reference to its own effects, so also does a cause become the common characteristic with (i.e. by becoming) the effects. [357]

तदेतन्नित्यमज्ञानं तज्जकालाद्यनाप्लुतेः ।
सर्वकालानुवर्त्येव लोके नित्यमितीर्यते ॥३५८॥

This ever existing ignorance is described in this world as eternal and existing at all times on account of the non-destruction of time etc. which are its effects. [358]

नित्यस्यानुच्छित्तिरिति चोद्यस्यापि न संभवः ।
नित्याज्ञानसमुच्छित्तौ यतः प्रामाण्यमाश्रितम् ॥३५९॥

There is no possibility of also the hypothetical argument, viz. whatever is eternal does not get destroyed ..., since in respect of the destruction of this eternally existing ignorance is accepted the authority (of the Śruti). [359]

प्रमान्तरैरविज्ञातं प्रमेयं वस्तु भण्यते ।
तत्तत्त्वमात्रं तत्स्थध्वान्तनुन्मानमुच्यते ॥३६०॥

What is called (by us as) the object of knowing (in the Vedānta) is what is unknown by any other (forms of) right knowledge (and) what exists only in the reality (described therein¹) and removes the darkness residing in it² is called the means of knowing that (object). [360]

¹This refers to the Vedānta.

²This means: by superimposition.

आगन्तु चेदिहाज्ञानमनिर्मोक्षः प्रसज्यते ।
पुरेवानागतं भूयो नैष्यतीत्यत्र का प्रमा ॥३६१॥

If ignorance (is considered) here as adventitious, there would result the contingency of the absence of liberation. What right knowledge could there be, viz. holding that it will not come (once) again — the one which had not come (earlier)? [361]

¹Namely, the Ātman and the world.

कार्यकारणरूपेण द्वयोरव्यतिरेकतः ।
गुणप्रधानरूपेण कार्यकारणगीरियम् ॥३६२॥

On account of the non-difference of the two¹ apart from (that they are) the cause and the effect, (the Śruti makes) this statement of the effect and the cause in the form of the subordinate and the principal. [362]

न कारणं विना कार्यं न कार्यं कारणं विना ।
अन्योन्यापेक्षतः सिद्धेर्विनान्योन्यं न तद्वयम् ॥३६३॥

There cannot be any cause without an effect (and) there cannot be any effect without a cause. Thus, on account of their existence with mutual expectation, the pair of them does not exist as either without the other. [363]

भावनाज्ञानकर्मादि कार्योत्पत्तेः प्रयोजकम् ।
तद्वृत्तौ तदभिव्यक्तेस्तत्स्वापे ऽव्याकृतात्मता ॥३६४॥

Impressions, ignorance and actions etc.¹ is conducive to the rise of the effect.² There is the manifestation of that (viz. the effect), when that (viz. impressions³ etc.) has manifested. (Therefore,) during the sleep of that³, there is the character of (the world) being unmanifest. [364]

¹The word etc. stands for Īśvara, atoms, Prakṛti, effort etc.

²This refers to the various beings principally.

³That is, impressions etc. not manifesting.

स्वकर्तृरुपभोगार्थं कर्माव्याकृतरूपकम् ।
व्यक्तीभूतं प्रयुङ्क्ते क्षमाबग्न्यन्तं साधनत्रयम् ॥३६५॥

When activity, which had not manifested for its own agent's enjoyment, becomes manifest, then it produces (lit. employs) the triad of the means (of activity), viz. earth, water and fire.

[365]

वाय्वाकाशौ समाश्रित्य पूर्वेषां साधनात्मता ।
त्रयाणामप्यतस्तानि वाय्वाकाशौ प्रयुञ्जते ॥३६६॥

The nature of being the means (of further manifestation/production) which obtains in the earlier (mentioned) three also, after they have resorted to wind and ether. Therefore, (it is held that) they¹ produce them².

[366]

¹Namely, impressions etc.

²That is, earth, water and fire.

प्रयोजकप्रयोज्यत्वं कर्मसाधनयोर्भवेत् ।
स्वस्वामिभोगसिद्ध्यर्थमेवं व्याकृततेष्यते ॥३६७॥

The character of being the impeller (i.e. productive force) and being what is to be impelled would belong to activity and its means (respectively). Thus is accepted (lit. expected/desired = explained) the manifestedness (of the activity etc.) for (securing) the enjoyment of their own master.

[367]

व्यक्तिर्नियतकालैव जगतो ऽव्यक्तरूपिणः ।
अन्तर्यामिकृता चैषा नान्यः संभाव्यते प्रभोः ॥३६८॥

(This) manifestation (of the world), which is (in the early stage) unmanifest, is bound by a definite time (for it) and it is caused by the inner self. Nobody else than that master (viz. the

Ātman = the inner self) can be (the cause/producer). [368]

वायोरिव प्रवृत्तिः स्यात्तथा चैवोपसंहतिः ।
निर्निमित्तात्तथैवेशाज्जगज्जन्मस्थितिक्षयाः ॥३६९॥

As there would be (produced) an activity (in a body) as well as its cessation by the wind, even when there is no cause for it, in the same way, origin, sustenance and destruction of the world (would be produced) by the master. [369]

This sets aside the possible notion that the creator is an embodied being.

न प्रयोज्यो यदा भोगः स्वाम्यर्थः कर्मणस्तदा ।
हित्वा कर्माखिला व्यक्तीरविशेषात्मतां व्रजेत् ॥३७०॥

When there is no enjoyment for the master to be produced by activity (etc.), then, having given up activity and all these manifestations, (the master) goes (back) to the state of being qualitless. [370]

अस्य द्वैतेन्द्रजालस्य यदुपादानकारणम् ।
अज्ञानं तदुपाश्रित्य ब्रह्म कारणमुच्यते ॥३७१॥

Having resorted to that ignorance, which is the material cause of this magic show of duality (=manifest or patent to each one of us), it is said that the Brahman is the cause of it. [371]

अज्ञानमात्रोपाधित्वादविद्यामुषितात्मभिः ।
कौटस्थ्यान्निर्द्वयो ऽप्यात्मा साक्षीत्यध्यस्यते जडैः ॥३७२॥

The dull-witted, whose (consciousness of the) Ātman is overpowered (lit. robbed) by ignorance on account of (their Ātman having) the limitation of ignorance alone, superimpose the character of the witness on even this Ātman who is unique, being immovable (=unchangeable). [372]

ज्योतिषामपि तज्ज्योतिरसद्दीपरिमोषणात् ।
तमोरूपमिवाभाति भानुर्नक्तंदृशामिव ॥३७३॥

It is the light of all lights on account of (its) removing (lit. robbing away) the false notion (and yet) it appears to be having the form of darkness as the sun (seems to be dark) for those who see (only) at night. [373]

¹Cf. BU 4.4.16.

मोहतत्कार्यनीडं यत्कूटस्थाभासरूपकम् ।
ज्ञानं तदविनाभूतः परः साक्षीति भण्यते ॥३७४॥

The highest one, who is not separated from the knowledge¹, which is the nest (basis/support) of ignorance and its effect and has the appearance of the immovable (Ātman), is described (in the Śruti) as the highest witness.² [374]

¹This is *vijñāna*.

²Cf. Śvetāśvataropaniṣad 6.11.

इदं तत्सर्ववेदेषु यथाभूतार्थवित्तये ।
सदेवेत्यादिभिर्वाक्यैः कारणं ब्रह्म गीयते ॥३७५॥

This is that known Brahman, (the one which is) declared (lit. sung) in all the Vedas, in such statements as *sad eva ...*¹ in order that there is (on the part of the hearers) the acquisition of the knowledge of Reality as it is. [375]

¹For instance, CU 6.2.1: *sad eva somyedam agra āsīd ekam evādvitīyam ...*

सर्वज्ञः सर्वशक्तिश्च सर्वात्मा सर्वगो ध्रुवः ।
जगज्जनिस्थितिध्वंसहेतुरेष सदेश्वरः ॥३७६॥

This Lord is ever omniscient, omnipotent, self of all, present in all, immovable, and the cause of origin, sustenance and destruction of the world.¹ [376]

Cf. *Muṇḍakopaniṣad* 1.1.9.

यः पृथिव्यामितीशो ऽसावन्तर्यामी जगद्गुरुः ।
हरिर्ब्रह्मा पिनाकीति बहुधैको ऽपि गीयते ॥३७७॥

The Lord, who is thus, on this earth¹ the one existing inside, (everyone) and the teacher of the world, is, though one, variously sung as Hari, Brahmā, Pinākin (etc.) [377]

¹Or, is it possible that Sureśvara cites *yaḥ pṛthivyām* ... as the *pratīka* of some verse to the effect that the Lord is *īśo 'sav* ...'?

कूटस्थस्य न साक्षित्वं द्वितीयासंगतेर्भवेत् ।
नाशिनो ऽपि न साक्षित्वं नाशेनाव्यतिरेकतः ॥३७८॥

The immovable could not have the character of a witness unless it has association with another; so also the perishable cannot have the character of a witness, on account of its not being apart from destruction.¹ [378]

¹That is to say: A perishable is associated with some other which is perishable.

अज्ञानमात्रहेतौ तु सर्वमेतत्समञ्जसम् ।
कर्तृत्वाद्यन्यथाज्ञानहेतुत्वादात्मरूपिणः ॥३७९॥
प्रत्यग्रूपस्य स्थास्नुत्वाज्ज्ञातुर्मोहेन चान्वयात् ।
कूटस्थस्यापि साक्षित्वमागमापायिनं प्रति ॥३८०॥

But all this is reasonable when it is (accepted that the world) is caused by ignorance alone, since agency etc. of what is the inner self has false knowledge as the cause for it; [379] (and) since what is of the nature of the inner self is perennial (lit. ever-abiding) and has association with ignorance; even the immutable has the character of a witness with respect to what originates and perishes. [380]

आत्मात्मवत्त्वसंबन्ध आत्मात्माज्ञानयोर्मतः ।

परो ऽविवेको भूतानामात्माविद्येति कथ्यते ॥३८१॥

The relation between the Ātman and what has the Ātman is held to be that which obtains between the Ātman and ignorance about the Ātman. It is (therefore) that the highest (degree of) non-discrimination among (i.e. about one and the other of) the elements is called ignorance about the Ātman.

[381]

ईशादिविषयान्तं यत्तदविद्याविजृम्भितम् ।
मायां तु प्रकृतिं विद्यान्मायिनं तु महेश्वरम् ।
इति वेदशिरःसूक्तिस्तथा चोदघृष्यते स्फुटा ॥३८२॥

Whatever (is described as) beginning with īśa 'Lord' and ending with (various) objects is (but) the effect of ignorance (because) the most predominant statement of the Veda, which is extremely clear, is expressed in the passage 'One should know Prakṛti as Māyā and Maheśvara as māyin.'¹

[382]

¹Cf. Śvetāśvataropaniṣad 4.10.

दैवी ह्येषा गुणमयी मम मायेति च स्मृतिः ।
वैष्णवी खल्वियं मायेत्यपि लोके ऽपि गीयते ॥३८३॥

Also there is the Smṛti text 'This divine Māyā is but mine, which is made up of three qualities, ...'¹ That this Māyā which in fact belongs to Viṣṇu is sung even in the world.

[383]

¹Gītā 7.14

मानान्तरानधिगतं मेयं तावन्निरूपितम् ।
स्वानुभूत्यनुसारेण प्रत्यङ्मात्रसतत्त्वकम् ॥३८४॥

So far (=thus or to begin with), what is to be known and is not known by any other means of knowing is explained according to one's own experience, viz. as consisting in only the inner self together with its true nature.

[384]

¹That is: *ātmana evā jñātatvam ajñātatvam cānubhavaikagamyam iti 'tad dhedaṃ' ityādinoktam* (NKL).

एतन्निदानमधुना मिथ्याज्ञानं निरूप्यते ।
यतो बिभ्यति भूतानि संसारानर्थलक्षणात् ॥३८५॥

Now is discussed the cause of this,¹ viz. the false knowledge about (that one) having the character of the undesirable end, viz. the transmigratory existence, which (all) the beings fear.

[385]

¹ Cf. SP: *karmavyutpattyā jñānaśabdo viṣayam api viṣayīkaroty etad ajñānam vastu*.

यदेव नित्यमज्ञानं मिथ्याज्ञानं तदेव तु ।
कारणैतरूपेण तयोरव्यभिचारतः ॥३८६॥

Only that, which is ever ignorance about the (nature) of the Ātman, is false knowledge alone, since they, in the form of the cause and the effect, cannot be apart from each other.

[386]

हेत्वन्तरानपेक्षं सत्तदव्याकृतरूपकम् ।
व्यक्तां स्वयमेवैति निमित्तं नास्त्यसंहतम् ॥३८७॥

That existent, which has not manifested itself in any form, does not depend on any cause other than itself (for becoming manifest). Of itself, it becomes manifest. There is no cause, (for it is) not brought in.¹

[387]

¹Activity of any *indriyas* etc. which were mentioned earlier are not necessary for *avidyā* or *ajñāna* which can by itself create the world. Also, at the time of *pralaya*, activity of *indriyas* was completely withdrawn.

सुषुप्तादुत्थितो राज्ञः स्वयमेव यथा तथा ।
जग्धाशेषजगन्मूर्तेरव्यक्तादव्याकृतिर्मुहुः ॥३८८॥

As a king awakens from his sleep, of himself, so also there is the manifestation (once again) from the unmanifest of one that had devoured the entire (collection of) worldly things.

[388]

अनिश्चिता यथा रज्जुरिति न्यायोपबृंहितम् ।
स्फुटार्थं गौडपादीयं वचो ऽर्थे ऽत्रैव गीयते ॥३८९॥

It is only in this context (sense) that there is the clear statement of Gauḍapāda made (lit. sung) – and it is accompanied by an example – viz. ‘As a rope, not definitely ascertained, ...’

[389]

Cf. Gauḍapādakārikā 2.17:

*anīcitā yathā rajjur andhakāre vikalpitā /
sarpadhārādibhir bhāvais tadvad ātmā vikalpitaḥ //*

तदिदं नामरूपाभ्यामनामकमरूपकम् ।
एवं व्याक्रियताज्ञानहेतुमात्रव्यपाश्रयात् ॥३९०॥

Thus, this one, having no name and no form, was thus manifested by name and form by resorting to only one cause, viz. ignorance.

[390]

अभिधानाकृतिर्नामशब्देनेहाभिधीयते ।
अभिधेयाकृतिस्तद्वद्रूपमित्युपदिश्यते ॥३९१॥

Here the word *nāma* expresses what is called *abhidhāna*¹. In the same way, the word *rūpa* is used (lit. enunciated) for conveying what is described.²

[391]

¹Namely, *śabda* ‘a word, signifier’.

²Namely, *artha* ‘meaning, the signified’.

एवं द्वाभ्यां प्रकाराभ्यामीशो व्याकृतजन्मनाम् ।
व्यवहाराय पर्याप्तो न त्वव्यक्तात्मना यतः ॥३९२॥

Thus, by these two ways is the master capable of the dealing

related to the things that have become manifest; since he is not (able to do so) in his own unmanifest form. [392]

This verse clarifies the idea that *nāmarūpābhyām* (dual form) can be related to multitude of objects created because the two members of the compound word necessarily signify two linguistic categories.

नाम्नः सामान्यमात्रस्य त्वसाविति समीरणम् ।
विशेषनाम्ना संयोज्य देवदत्तादिनोच्यते ॥३९३॥

The word *asau* is expressive of a name which has only general (character); it is uttered after connecting it with a proper name such as Devadatta. [393]

This explains BUB: *devadatto yajñadattaḥ iti vā nāmāsyā ity asaunāmāyam*.

¹Cf SP: *nāmasamānyam devadattādinā viśeṣanāmnā saṃyojya*.

तद्वद्रूपस्य सामान्यं रूपमित्युपदिश्यते ।
तदुपात्तविशेषं सच्छुक्लकृष्णादिनोच्यते ॥३९४॥

In the same way, the general character of a form is expressed by the word *rūpa* (and) that, which has assumed particularity, is mentioned (lit. uttered) as white, black etc. [394]

एवेत्यवधृतावेतदात्मवृत्तव्यपेक्षया ।
आत्माविद्यासमुत्थाभ्यामेव व्याक्रियते परः ॥३९५॥
न तु विध्वस्तनिःशेषप्रत्यगज्ञानतद्भव-
सामान्यभेदैकात्म्याख्यतदनन्यप्रमात्मना ॥३९६॥

In the use of the restriction by the word *eva*, (it is emphasised that), the highest (Ātman) is differentiated only by (name and form which have) arisen from ignorance about (the nature of) the Ātman — (yes, only) after keeping in view the unique nature of the knowledge which is called oneness of collectivity and particularity that have arisen from that one who has destroyed the entire ignorance about the inner self.¹ [395-396]

¹Cf. verse 208 above; the thought in that verse is here clarified further.

आदावव्याकृतं तत्त्वं नामरूपक्रियात्मना ।
स्वयं तद्व्याकृतिमगाद्यथैतर्हि तथैव तत् ॥३९७॥

As, in the beginning, Reality which was undifferentiated, became differentiated as having the nature of name and form; so that is even today.
This is the meaning of *tad idam*. [397]

नामरूपाभ्यामेवेति न समुच्चयनिश्चितौ ।
समस्तव्यस्तरूपाभ्यां लोके ऽपि व्याकृतिर्यतः ॥३९८॥

The words *nāmarūpābhyām eva* are not for determining that there is the ensemble of the two (responsible for the creation of the world), since there is in the world the manifestation (of things by both of these) in collected and differentiated forms. [398]

This is to say that differentiation of the worldly things can be either by name or by form or by both of them together.

जातितो बधिरस्येह व्यक्तिः स्याद्रूपमात्रजा ।
जात्यन्धादेश्च नाम्नैव तथा चोभयथाप्यसौ ॥३९९॥

As appearance (of the things) would be for one, who was born deaf, only in respect of their form and for one, born blind etc.¹, merely in respect of name (etc.), so also is the Ātman (manifest) in two ways: (That is) by name and form (only). [399]

This explains the thought in the preceding verse.

¹Cf. NKL: *ādipadena utkhātanetrasamgrahaḥ*.

अज्ञातात्मैकहेतूनां मिथोपेक्षात्मनां श्रुतौ ।
नेयत्तास्तीह तत्त्वानामानन्त्यान्न क्रमस्तथा ॥४००॥

Here (in the world of things), which have only the unknown Ātman as their cause, there is not any limit in respect of hearing about such things as have the nature of expectancy of one another¹ and also there is no specific order in them because of their infiniteness. [400]

This verse explains why there is no mention of the number and order of the things differentiated among themselves.

¹That is, being dependent on.

प्रक्रियानियमो नापि पुंव्युत्पत्तिप्रधानतः ।
प्रतिश्रुति विगीतिश्च प्रक्रियाणां समीक्ष्यते ॥४०१॥

So also there is not any definite process (of creation meant in the Śruti statement) for the reason that importance (is accepted only) of the knowledge of the Puruṣa (=Ātman); also in every Śruti text, there is noticed varied exposition (lit. singing) of the processes (of creation)². [401]

This rests on an objection, arising from the preceding verse, that there is no definite form of 'creation'.

¹This mention of the Ātman as Pum (=Puruṣa) is significant in the context of the name of the Brāhmaṇa, viz. Puruṣavidha Brāhmaṇa.

²*prakriyāṇām vigitiḥ* is for *prakriyāṇām vigīṭayah*; so also *samīkṣyate* for *samīkṣyante*. SP points out: *kvacid ākāśādikā sṛṣṭiḥ kvacid agnyādikā kvacid akramaiveti vipratipattiḥ* and also refers to the reason for it, viz. *sṛṣṭer avivakṣitatva*.

यया यया भवेत्पुंसां व्युत्पत्तिः प्रत्यगात्मनि ।
सा सैव प्रक्रियेह स्यात्साध्वी सा चानवस्थिता ॥४०२॥

By whichever (of the processes of creation) there might (dawn) on men the knowledge about the inner self; each process (among them) would, in this context¹, hold good (and) that would not be firmly established which refer to creation. [402]

This verse presupposes a question: Which among these various statement in the Śruti regarding creation [cf. note 2 on the preceding verse] should be considered as authoritative? The answer is implied: Not any of them, since creation is merely imagined; this becomes clear from the next two verses.

¹That is, in these Śruti texts.

²That would be contradicted by some other.

उद्धृतिस्थितिहानीनां न क्वचित् संभवो यथा ।
मुख्यां वृत्तिं समाश्रित्य तथोदके ऽपि वक्ष्यते ॥४०३॥

As (explained here that) there is at no time (*na kvacit*) any possibility of origin, sustenance and dissolution (lit. loss) (of the world), when we resort to the primary purport (lit. function) (of the Śruti passages), so will it be explained in the later portion as well. [403]

न जायते जन्यते वा नापि हन्ति न हन्यते ।
तमःसंवृतदृष्टीनां षड्विकारादिवीक्षणम् ॥४०४॥
यदर्थं सर्वशास्त्राणां प्रवृत्तिरतिविस्तरा ।
आत्मज्ञानावतारार्थः सर्वशास्त्रसमुद्यमः ॥४०५॥

That is not born, nor is it produced; neither it kills, nor does it get killed; (it is only) on the part of those whose sight is wrapped by darkness that there is seeing (viz. the thought) of six modifications etc.¹ [404]

(The word He in 'He has entered here.' is that) for the explanation of which² there is an extensive activity of all³ Śāstras — (indeed) the effort of all Śāstras⁴ is for introducing the knowledge of the Ātman . [405]

Verse 405 presents what is expected by the word *saḥ* in *sa eṣa iha praviṣṭaḥ*. It explains *yadārthaḥ sarvaśāstrārambhaḥ* in BUB.

¹SP points out that the word etc. refers to the entire *anātmavarga* 'all the objects which are non-Ātman'.

²*yadartham* (adv.) replaces *yadārthaḥ* (adj.) in BUB. It can be translated alternatively as: for explaining the meaning of which. That is, for the explanation of which.

³The word all signifies all the different systems of philosophy, Vedic and non-Vedic.

⁴NKL only refers to the Śāstras of 'Vātsyāyana etc.', but offers no comment. Yet, it is interesting to note Madhusūdhana Sarasvatī on *Mahimnastotra* verse 7: *kāmaśāstram apy āyurvedāntargatam eva ... tatra vātsyāyanena pañcādhyāyātmakam kāmaśāstram prañītam, tasya ca viṣayavairāgyam eva prayojanam, śāstroddīpitamārgenāpi viṣayabhoge duḥkhamātraparyavasānāt*. Also see verse 408 below.

विरोधः सर्वशास्त्राणां स्वाभिधेयव्यपेक्षया ।

निवृत्त्यर्थे ऽविरोधित्वादत एतत्समीरितम् ॥४०६॥

Mutual opposition among all Śāstras (occurs) owing to (their giving prominence to) their own subject matter; (but) on account of (their) being non-opposed to the purpose, viz. cessation of transmigratory existence, therefore this¹ is stated (in the Bhāṣya). [406]

¹Namely, BUB: *yadarthah sarvaśāstrārambhah*.

स्वत एव यतः पुंसां प्रवृत्तिः स्वार्थसिद्धये ।

तत्रानुवादि शास्त्रं स्यान्ननिवृत्तावेव तन्मितिः ॥४०७॥

Because activity of men is of itself for the achievement of what is desired by themselves, the Śāstra (merely) follows that (lit. is only repetitive in that respect); but the knowledge (acquired) from that (ends) only in withdrawing (from activity). [407]

The verse proceeds from this idea: While the Śāstras prescribe various activities towards some purposes of men, they are only following men's desires — they are to be performed for some result, which cannot, therefore, be permanent. Therefore, the Śāstric prescriptions are in reality towards the purpose of withdrawing from attachment etc.

अपि वात्स्यायनादीनां शास्त्राणामुक्तहेतुतः ।

प्रामाण्यमविरुद्धं स्यादैकात्म्यज्ञानजन्मने ॥४०८॥

In the case of the Śāstra(s) of Vātsyāyana (etc.) also, their authority is unopposed owing to the reason (already) stated; viz. (their teaching is) for the rise of the knowledge of the Ātman.¹ [408]

¹Cf. note 1 on verse 405 above.

प्रवर्तमानः पुरुषः शास्त्रोद्दीपितवर्त्मना ।
प्रवृत्तिविषयं दुष्टं दृष्ट्वातो विनिवर्तते ॥४०९॥

A man proceeding to activity by a path illumined (for him) by Śāstra, recedes from it on seeing the object towards which is his activity (directed) as affected by impurity. [409]

This clarifies how Śāstras propounded by Vātsyāyana and others lead one to cessation from activity described in them. Cf. the remark of Madhusūdhana Sarasvatī mentioned in verse 405 note 1 above. SP has a longish explanation with citations, to the same effect, viz. *śāstrāntarāṇy api ... brahmaṇi paryavasyantīti bhāvaḥ*.

अनित्यदुःखशून्यत्वं पदार्थानां ब्रुवन्स्फुटम् ।
बुद्धो ऽपि रागाद्युच्छित्तौ यतते नात्मनिहुतौ ॥४१०॥

Even the Buddha attempts towards (i.e. preaches to bring about) the destruction of attachment etc., declaring clearly that objects of desire are impermanent (and also causes of) misery, and void; (and thus) he does not (attempt) for concealing (the nature of) the Ātman.¹ [410]

This verse shows how Sureśvara views the Buddha's Nihilism. That is in reply to an opinion expressed in *nairātmyamārgam adhi-gamya bhavanti muktāḥ tasmād asāv atīsayena vicāryate 'tra* (cited by SP-untraceable). Also, *yathāha: sarvajñavacanārtho nāma kṣaṇi-kanairātmyādicāturārthysatyatattvaparijñānena sakalasamsāraduḥkha-nivṛttyākhyāḥ paramapuruṣārtha iti* (cited by SP).

¹That is, negating the Ātman. NKL points out: *nirākartur*

ātmatvena tannirākaraṇāsiddheh.

त्याग एव हि सर्वेषां मोक्षसाधनमुत्तमम् ।
त्यजतैव हि तज्ज्ञेयं त्यक्तुः प्रत्यक्परं पदम् ॥४११॥

All the Śāstras verily hold only renunciation (of desires) as the best means towards (achieving) liberation and, therefore, one who renounces alone can find (lit. know) it; for the highest one is the inner self of the renouncer.¹ [411]

This emphasises the unity of all Śāstras in holding renunciation (of desires) as the means to liberation. Thus, any possible notion regarding Digambara Jainas' opposition is averted.

¹ = SV 215. SP under this explains: Liberation implies knowledge (of Reality). Also, the second line of the verse is intended to set aside the notion that (ritual) activity can be the means to liberation, for it has differentiation of things as its basis.

एकवाक्यत्वतो तद्वा ऐकात्म्यज्ञानजन्मने ।
वेदशास्त्रस्य कृत्स्नस्य तथा पूर्वमवादिषम् ॥४१२॥

Or rather, the entire Vedic Śāstra is for (giving) rise to the knowledge of the uniqueness of the Ātman on account of its having (only) one purport of it; so have I declared before¹.

[412]

This is another interpretation of BUB: *yadarthah sarvaśāstrā-rambhah.*

¹ Cf verse 401 above.

प्रमाणानि च शास्त्राणि तत्प्रामाण्यं न चान्यतः ।
अज्ञातात्मावबोधित्वात्तथा पूर्वमवादिषम् ॥४१३॥
यस्मिंश्चाविद्ययाध्यासः संसारानर्थलक्षणः ।
स्वाभाविक्या कृतो मिथ्या श्रुत्यादौ रजतादिवत् ॥४१४॥

Śāstras are authoritative and their authoritativeness is not from anything else¹, for they are informative about the Ātman that is not known before; so have I declared before.² [413]

(That Ātman) on which there is superimposition that has the characteristic of the undesirable (end, viz.) transmigratory existence, is caused by the natural (i.e. beginningless) ignorance as (also by the false superimposition of) silver etc. on a shell etc.³ [414]

¹Supply: (than the teaching about the uniqueness of the Ātman).
Cf. *Kāthopaniṣad* 1.2.15: *sarve vedā yat padam āmananti*.

²Cf. verse 405 above.

³Cf. *Adhyāśabhāṣya* (p.32): *sarvathāpi tv anyasyānyadharmāva-bhāsatām na vyabhicarati*.

ननु सामान्यविज्ञानविशेषाज्ञानसंश्रयात् ।
जातरूप्यस्मृतेर्लोके मिथ्याज्ञानं प्रसिद्ध्यति ॥४१५॥

Indeed one might say:¹ In this world, false knowledge can occur on account of the remembrance of gold (which originates) from one's resorting to (some) general (characteristic of it) (and) ignorance of some particularity of some object. [415]

¹The objection to accepting the superimposition of non-Ātman on the Ātman proceeds from the following reasons: Absence of any *sāmānya* and *viśeṣa* as related and also the remembrance (i.e. memory) of an object that was seen earlier.

यत्राध्यासो यदध्यस्तं भेदसिद्धौ तयोर्मृषा ।
ज्ञानं जगति संसिद्धं सा चैकात्म्ये ऽतिदुर्लभा ॥४१६॥

There is in this world known (lit. established as existent) false knowledge for establishing the difference between two things, viz. that on which there is superimposition (of another) and that which is superimposed (on it). But¹ that² is extremely difficult (to find/obtain) in respect of the uniqueness of the Ātman. [416]

This argument proceeds on the ground that every superimposition is based on existence of differences, but they do not exist if one

accepted *aikātmya*.

¹*ca* is literally 'and', here meaning 'but'.

²This is for *sā* referring to *saṃsiddhi* 'getting established or known' (of *mithyājñāna*) in contrast with *mṛṣājñānam saṃsiddham*.

समस्तव्यस्तमैकात्म्यं येषां चापास्तभेदकम् ।
चोद्यमेतत्समानं स्यादुभयोरपि पक्षयोः ॥४१७॥

This objection is also in the case of (to be held against) those for whom the uniqueness of the Ātman consisting in totality as well as severality (of things) and (also such) as has cast off these distinctions. In the case of both the views, (the objection) is the same. [417]

The argument is extended, i.e. directed towards also those who hold *bhedābheda* in respect of Reality.

न नः परिहृतेनार्थश्चोद्येनानेन कश्चन ।
प्रत्यङ्मोहैकहेतुत्वात्सर्वानर्थमृषामतेः ॥४१८॥

(The Siddhāntin answers:) No. We have nothing to do with any matter which is set aside¹ by this objection, on account of² (our) opinion that all the undesirable things are false and having the cause, only in ignorance about the inner self. [418]

¹In Māyāvāda, the three causes of *adhyāsa*, which are earlier referred to, are not accepted and therefore the objection is untenable.

²That is, because of the strength in (our) opinion ...

अज्ञानमेव बाध्यं नो मानस्येह यतस्ततः ।
तच्चोद्यपरिहारो ऽतः क्रियते नाफलत्वतः ॥४१९॥

Since here (i.e. in this inquiry) ignorance (about the knower¹) alone is to be set aside by knowledge², therefore, there is no refutation, by this,³ of the objection to that (knowledge), that being purposeless. [419]

¹That is, the Ātman.

²It means: which is not apart from the knower.

³*ataḥ* 'by this argument'. SP: *ataḥ aprāptaparāmarśī* (?)

मिथ्याज्ञानातिरेकेण नान्यदज्ञानमिष्यते ।

येषां तान्प्रति चोद्यं स्यान्न त्वज्ञातात्मवादिनाम् ॥४२०॥

The objection could be (valid) in the case of those who hold that there does not exist ignorance apart from false knowledge; and (*tu*) (it would) not (be valid against) those who hold the (usually) unknown Ātman (as Reality). [420]

नन्वज्ञानमवस्तुत्वात्कथं संसारकारणम् ।

मिथ्याज्ञानस्य वस्तुत्वात्तदेवास्तित्वह कारणम् ॥४२१॥

तथा च युक्तिमद्यत्नान्महद्भिरपि भाषितम् ।

अप्रामाण्यं पुनस्त्रेधेत्यत एतत्सुसंस्थितम् ॥४२२॥

Now a question is asked: How can ignorance, being a non-real entity, be the cause of transmigratory existence? (Therefore), since false knowledge is an entity, is it to be (considered as) the cause here (in respect of transmigratory existence)? [421] So also is it stated, with specific effort and with the support of reasoning, by even the great; viz. unauthoritativeness is three-fold¹? Therefore, this (objection) is well-adduced. [422]

In this verse, the objector points out how he derives support for his argument from the learned authority Kumārīlabhaṭṭa according to whom, unauthoritative knowledge has three forms: *ajñāna*, *mithyājñāna* and *saṁśaya*.

¹Cf. *Ślokovārtika* 2.54:

*aprāmāṇyam tridhā bhinnam mithyātvājñānasamśayaḥ /
vastutvāt dvividhasyātra sambhavo duṣṭakāraṇāt //*

SP and NKL quote *Ślokovārtika* 2.55:

*avijñāne tu doṣāṇām vyāpāro naiva vidyate /
kāraṇābhāvatas tv evaṁ tatsiddham nas taduktivat //*
[NKL reads *vijñāne*]

किं भोः सदपि मानेन वस्तु साक्षान्निरस्यते ।
तस्मिन्निरस्ते किं शेषं यस्मिन्मानस्य मानता ॥४२३॥

(The Siddhāntin replies:) Tell me, if an existential entity, which is directly perceptible, is also discarded (by you). If it is discarded, what remains there and, in respect of what is there authoritativeness of the means of knowing? [423]

व्यञ्जकत्वात्प्रमाणानां मेयाभिव्यक्तितो ऽपरम् ।
कार्यान्तरं न संभाव्यं नितरां वस्त्वपाक्रिया ॥४२४॥

Since there is revealing (i.e. manifestation/making known) an object to be known by a means of knowing on account of its nature (or natural function) of revealing (it), there cannot be thought of any other purpose (or effect) of the same, be it superior or inferior¹. Indeed, negating an existential object (is altogether impossible). [424]

This is one more argument: A means of knowing cannot negate an existential entity.

¹Cf. *aparam nikṛṣṭam utkrṣṭam vety arthaḥ na tv aparāśabdo 'nyaviśayo 'ntarāśabdena punarukter iti draṣṭavyam* (SP).

मिथ्याज्ञानं कथं वस्तु न हि मिथ्येति वस्तु सत् ।
मिथ्या तद्वस्तु चेत्युक्तिर्महतामेव शोभते ॥४२५॥

Since an entity which is taken as false cannot be existent, how can false knowledge be an entity? (Therefore,) a statement, viz. that is false and that is also an existential entity, can befit only the great.¹ [425]

¹This refers to Kumārilabhaṭṭa's argument meant in verse 422 above. Cf. NKL: *bhrāntijñānasya svarūpabādhābhāvāt viśayamātra-bādhāt tasya (= bhrāntijñānasya) vastutvam uktam bhaṭṭapādaiḥ*.

स्वतो ऽपि यदि सा वस्तु रज्ज्वां सर्वादिका मतिः ।
रज्ज्वात्मना तथापीयमवस्त्वेवात्र बाध्यते ॥४२६॥

While the cognition in a rope that it is a serpent etc. and also that it (rope) is an existential entity, in its own right, even then that (serpent) in the form of a rope is a non-existential entity; and that gets negated. [426]

This sets aside the argument that a thing itself is negated when the wrong acceptance of another thing for it is negated.

मिथ्याज्ञानस्य कार्यत्वात्किं तत्कारणमुच्यताम् ।
अकारणं सत्कार्यं चेद्भिम्भकैरपि हस्यते ॥४२७॥

If false knowledge is taken as an effect, let it be told as to what is the cause of that. If you were to say, there is an existential effect and that is without a cause, even children would laugh (at that)!¹ [427]

There is discussion here whether *mithyājñāna* is some effect.

¹The second line presupposes an objector's view that *mithyājñāna* is an effect without any cause.

रागादिकारणं चेत्स्यात्कार्यं सत्कारणं कथं ।
अवस्त्वपि च वस्त्वेव वस्तुरूपात्तदन्यतः ॥४२८॥

If (*mithyājñāna* as) an effect were to have its cause in attachment etc.¹, how could it be said to have an existent as its cause? Further, even a non-thing would be the thing itself on account of its having the form of some (other) thing as apart from it. [428]

This verse considers the nature of *mithyājñāna* either as an effect or non-effect.

¹NKL edition and the *pratīka* in NKL read *rogādi* for *rāgādi*!

उपात्तमेयरूपत्वं मानानां सत्यतोच्यते ।
तद्वलेनैव मेयस्थं घनन्ति मोहादि नान्यतः ॥४२९॥

It is said that being possessed of the form of the objects of knowing¹ that are grasped is the true nature of the means

of knowing² (and) only by the strength of that they destroy false knowledge (= ignorance³) etc. connected with (lit. abiding in) the object of knowing; not in any other way. [429]

The verse presupposes the objection: What is the nature of *ajñāna* as a real/existential means?; is it like that of any means of knowing?, or of any object of knowing? There is here an answer to the first doubt.

¹This is *mānānām meyakārabhavanam*.

²Namely, *meyakārabhavane eva satyatvam*.

³It means: of the true nature of the object of knowing. Hereafter, the word ignorance is used in such context.

तद्विपर्ययतो मिथ्या सर्वं मोहादि भण्यते ।
वस्त्वसाधारणं रूपं मोहादेर्न प्रमीयते ॥४३०॥

Ignorance etc. is all held (lit. called) as false because of its contrariness to that¹. The particular form of a thing² is not understood with (or by) ignorance etc.³ [430]

¹Namely, the means of knowing; the contrariness lies in its not assuming the form of the object of its knowing (*meyarūpākārabhavanasya abhāvaḥ*)— this is explained in the second line.

²It means: the object of knowing.

³This is to say: Ignorance does not operate like any other means of knowing.

न च वस्तुसत्त्वं तद्वाधात्तस्य प्रमाणतः ।
मेयप्रबोधनं मुक्त्वा न मितेः सत्यतान्यतः ॥४३१॥

Again (ignorance etc.) is not of the nature of the object of its knowing¹ on account of its² stultification by the means of knowing it³, for (any) knowledge could not have validity except from that it has caused knowing of the object (of its knowing); (it) cannot be for any other reason. [431]

This is an answer to the second doubt, mentioned under verse 429 above.

¹We follow NKL reading. That means: *vastusvarūpam*; this means: real or existential entity. The explanation *vastuvat satattvam satyam* in SP suggests the use of the compound word. (And, usually, *satattvam* in this sense does not occur uncompounded.)

²It means: of ignorance etc.

³It means: of a real/existential entity.

Verses 432-445 state that mithyājñāna is removed by the knowledge of Reality.

कारकाणां हि सत्यत्वं स्वकार्यापेक्षयेष्यते ।

इतो ऽन्यथा तत्सत्यत्वं निष्फलं न च लभ्यते ॥४३२॥

[Verses 432-436 point out, on the strength of inference, that *moha* etc. are *mithyājñāna*.]

The validity of productive causes is accepted (lit. desired) indeed (only) with reference to their own effects. (Validity) other than such as this would be futile and (that kind of validity) is not noticed (anywhere). [432]

The first line of this verse states the Siddhāntin's acceptance of the reality of ignorance etc. as the means of knowing the Ātman on account of its usefulness in achieving the purpose (*arthakriyā-kāritva*). In the second, he discards its absolute usefulness (*pāramārthikatva*).

यद्वस्तु स्वात्मनैवास्ति तत्परार्थं न बोधकृत् ।

पारार्थ्येनैव सद्यच्च तत्परस्माद्विरुद्धं सत् ॥४३३॥

Whatever thing exists on its own strength (=in its own right) does not cause knowledge¹ for the sake of another. But,² whatever, accepted as existent, is for serving the purpose of another is apart from the highest (Ātman) — it is not real.³

[433]

¹We accept for translation the variant reading *bodhakṛt* noted in the AnSS edition, despite both the AnSS and NKL editions.

Of course, *bodhavat* can be paraphrased as *bodhayukta*: Also, there can be only one such thing, viz. the Ātman.

²*ca* for *tu*.

³This is to declare ignorance etc. as unreal.

सर्वमन्यानपेक्षं सदीक्ष्यमाणं स्वमात्रया ।
स्वात्मरूपात्पृथग्रूपं न वस्तूत्प्रेक्ष्यते ऽण्वपि ॥४३४॥

Every thing, not dependent on not another¹ (and) experienced (lit. seen) by (i.e. through) its own essence is an existential entity². Even a small thing, having a nature different from what is its own,³ cannot be imagined (as an existential entity).

[434]

¹This implies the Ātman which is really the essence of the real thing. NKL edition reads: *ananyāpekṣam* for *anyānapeṣkam*.

²*svamātrayā*, paraphrased as *svātmanā*, refers to the all-encompassing Ātman; naturally, of an existential entity.

³This again refers to the Ātman.

आत्मनैव स्वभावेन वस्त्वात्मानं बिभर्ति हि ।
नात्मनो विद्यते ऽपेक्षा वस्तुनो ऽन्यसमाश्रया ॥४३५॥

The (existential) thing¹ sustains itself by itself, viz. its own manifestation — so it is heard.² There is on the part of the Ātman, the existential thing, no expectation which depends on another.

[435]

¹It refers to Ātman, Reality.

²Cf. SP: *ātmanah svamahimapratisthitatvam śrautam iti hiśabdārthah*.

तस्मादविद्यासंभूतं नानात्वं प्रत्यगात्मनि ।
ब्रह्मास्मीति हि तद्धवंसान्न क्वचिद्वेदधीर्यतः ॥४३६॥

Therefore, (has arisen) variety in the inner self as produced from ignorance (and) owing to its destruction (which comes from¹ the awareness) 'I am Brahman.'; there is nowhere any

awareness of differentiation (as various things).

[436]

¹We have taken *yataḥ* as Ablative singular together with *taddhvamsāt*.

मित्युत्पत्तावनुत्पत्तिर्विरोधाद्वाध्यते यतः ।

तद्वाधे नाप्यपेक्षास्ति मिथ्याधीबाधनं प्रति ॥४३७॥

Since, on the rise of the knowledge (of the Ātman), there is no rise (of duality) owing to (their mutual) contradiction, therefore (it follows that), on the removal of that (ignorance), there is no need (lit. expectation) of the stultification of false knowledge.

[437]

मिथ्याधियो ऽपि बाध्यत्वमज्ञानैकसमन्वयात् ।

मूलध्वस्तौ हतं तच्चेन्मिथ्याधीः किं करोति नः ॥४३८॥

In the case of false knowledge also, there is the (possibility of) stultification owing to its congruence¹ with ignorance; if that² becomes stultified, when its root³ is destroyed, what would false knowledge do to us (i.e. what misery will it bring to us)?

[438]

This verse anticipates a question in the light of the preceding verse: Is false knowledge never stultified then?

¹Congruence is more for *tattādātmya* 'having the nature of it'; or, this could signify *tatkāryatva* 'being its effect' also.

²It means: the congruence of ignorance and false knowledge.

³It is ignorance.

मेयरूपानुरोधित्वं मिथ्यासंशययोर्यदि ।

सम्यग्ज्ञानात्तयोर्भेदो गम्यतां केन हेतुना ॥४३९॥

If (then) false knowledge and doubt accord with the form of the object of knowing, let it be pointed out; on what ground there is distinction of the two from right knowledge .

[439]

अज्ञानं संशयत्वान्नो मिथ्याज्ञानात्तथैव च ।

तयोस्तत्त्वविवक्षायामज्ञानं तत्त्वमुच्यते ॥४४०॥

Ignorance does not arise from being a doubt, so also (not) from being false knowledge; since, while ascertaining the true nature of the two¹, their true nature is called ignorance. [440]

¹Namely, ignorance and doubt.

अज्ञात एव यद्यत्र ज्ञाते तस्मिन्न तद्वेत् ।
सर्वत्रासिद्धिरूपत्वान्मिथ्याज्ञानमिदं मतम् ॥४४१॥

That¹, which exists when what (viz. the other²) is not known, would not exist when that (other) is known and that (false knowledge) does not exist when that (viz. the Brahman) is known. Therefore³ this false knowledge is, in every way⁴, held (or known) as having the nature (that has) no basis.⁵

[441]

This verse states by the method of Anvaya and Vyatireka that false knowledge is not an existential entity.

¹ = *mithyājñānādi*.

² = *sat* 'existent', viz. the Ātman.

³ That is, by the method of Anvaya and Vyatirteka adopted in the first line.

⁴ Cf. NKL *sarvatra* = *sarvaprakāreṇa*.

⁵ It literally means: whose form cannot be or is not proven (i.e. established) — i.e. non-existent.

मिथ्याज्ञानस्य वस्तुत्वं येनैव स्यात्सदात्मना ।
अज्ञानस्यापि तेनैव सत्यत्वं केन वार्यते ॥४४२॥

Who could ward off the existential character of ignorance by means of that thanks to which, viz. the existential Ātman, is (established) the existential character of false-knowledge? [442]

This is based on a doubt whether *mithyājñāna*, being a form of the inner-self, would be a non-product (i.e. permanent) — whether by its own nature or by being real! This verse answers

away the first alternative.

रज्जुसर्पो यथा रज्ज्वा सात्मकः प्राग्विवेकतः ।
अवस्तु सन्नपि ह्येष इति पूज्यैरपीरितम् ॥४४३॥

As the serpent seen in a rope is taken as real, owing to the rope, before (there arises non-discrimination (the two)), so also this (duality) is (real) [on account of the immutable Ātman]¹ — thus is it said by our respectable (teacher). [443]

The statement of Śaṅkara; 'Ignorance is real, because it is based on the Ātman.' is established with an example.

¹SP points out to this part in square brackets as necessary.

स्वतस्तु सत्यता साक्षान्नोभयोरपि विद्यते ।
अविचारितसिद्धित्वान्न स्वतः परतो ऽपि ते ॥४४४॥

The truth of the two¹ does not obtain in their own right (i.e. on account of themselves) and, on account of their being established only without thought. (The truth is) that they (do not exist) on their own account or on account of another. [444]

This answers away the second alternative mentioned under verse 442 above.

¹*mithyājñāna* and *saṁśaya*.

तदेवानुप्रविश्येति तत्त्वं यत्पारमार्थिकम् ।
सच्च त्यच्चादिकां भित्तिं मोहात्प्रापदिति श्रुतिः ॥४४५॥

[Verses 445-449 point to *sāmānyajñāna*, *viśeṣajñāna* and *smṛti* (cf. verse 415 above) as not the cause of any error.]

The Śruti states: 'What is absolute Reality (truth) itself first entered that (and afterwards, attained that which is) the existent and it secured that differentiation¹ on account of ignorance.'²

[445]

This verse refers to BU 1.4.7: *tat sṛṣṭvā tad evānuprāviśat tad anupraviśya sac ca tyac cābhavat.*

¹*bhitti* = *bheda* (NKL).

²The argument is: The Śruti points to the imaginary character (*kalpitatva*) of the distinction between the Ātman (on one hand) and ignorance and false knowledge (on the other).

न चापि त्रयसद्भावे मिथ्याज्ञानं जगत्यपि ।
मोहमात्रप्रयुक्तत्वान्न सामान्यात्स्मृतेश्च तत् ॥४४६॥

And, further, false knowledge cannot be said to exist in this world while the three exist, for that¹ is caused only by ignorance and not by the common characteristics and remembrance. [446]

This is an argument pertaining to what is said above with reference to the knowledge of some general characteristics, ignorance about some peculiarity and memory of it as the basis. There is thus justification of Anirvacanīyakhyāti.

¹That is, false knowledge.

सामान्यान्तरनिर्मक्तं तथासाधारणैरपि ।
असामान्यत्वमेवैति शैवल्यमन्यानपेक्षतः ॥४४७॥

Whiteness, which is distinct (lit. free) from any other(s) (as a common (characteristic(s)) and also from any uncommon (characteristic(s)), attains uncommon nature, because it is independent of (any) other (whiteness).¹ [447]

This verse points out that whiteness (in a shell), that is responsible for *mithyājñāna* 'false knowledge', is not related, in any way, to *sattva*, *jaḍatva* etc. which are the common characteristics (among things, or particularly between things of the world) and also some particular characteristics, viz. the shell-ness, the triangular shape etc. As such the whiteness of the shell itself becomes the common characteristic between the shell and silver which is conceived in its place — it does not depend upon any other whiteness for this mistaking of silver.

¹According to SP, any common characteristic, being observed, cannot be the cause of error (*bhrānti*).

न चेदं स्मरणाज्जातं नापि सामान्यहेतुजम् ।
शुक्लस्य गृह्यमाणत्वात्पुरोदेशावलम्बिनः ॥४४८॥

Not again is this (whiteness) produced from (lit. born of) memory; nor does it originate from some common (characteristic), because the whiteness is being grasped as belonging to an object (lit. the region) existing before one. [448]

This purports to deny that ignorance comes from memory.

एवं प्रत्यक्ष एतस्मिच्छुक्तिकोदरवर्तिनि ।
तद्विरुद्धमभूज्ज्ञानं रजताभमबोधजम् ॥४४९॥

Thus, in what actually exists inside of a shell and is directly perceptible, there has arisen a knowledge which is opposed to that which resembles silver and is born of non-knowing. [449]

This is reaffirmation of the statement: There is ignorance as regards this (*idam*) in the cognition: 'This is silver.' (*idam rajatam*).

Verses 450-465 discuss how other *khyātis* are unreasonable, thereby confirming the correctness in holding the *Anirvacanīyakhyāti*.

अप्रत्यक्षं मतं येषां ज्ञानं तान्प्रति भण्यते ।
इदं रजतमित्येतज्ज्ञानं शुक्तौ कुतो ऽन्वभूत् ॥४५०॥

Now, (the following) is stated for them in whose opinion this knowledge is not directly perceptible: 'On what basis did this knowledge (having the form) 'This is silver.' arise in the (object which is) a shell?' [450]

The purpose of this verse is to show that the opponents cannot hold ignorance (*bhrānti*) in respect of 'This is silver.'

विशिष्टाकृतिदेशेहाकालधर्मं प्रतीयते ।

शुक्तिकाज्ञानतो नर्ते वस्तुवीकृक्साध्यते ऽन्यतः ॥४५१॥

A thing which has some specific form, region, activity¹, time and property², cannot be understood (as silver) unless from ignorance about a shell; such a thing (as described) cannot be established by another. [451]

The argument is: Even if it were granted that the false knowledge 'This is silver.' was produced by a similar/common characteristic; such an one cannot be established by the opponent.

¹ *ihā = ceṣṭā* (SP, NKL).

² Each of silver and shell has its own specific properties (*vastu-dharmas*).

असाधारणधर्मोत्थो न साधारणकारणः ।

रजतं शुक्तिकेत्यादिव्यपदेशो ऽप्रसिद्धितः ॥४५२॥

This cognition,¹ viz. (this) shell is silver, is one that arises from some particular (lit. uncommon) properties and not caused by general (lit. common) properti(es); because (that) is not established.² [452]

¹ *vyapadeśa = pratyaya* (SP, NKL). But it could better be: This mention of that shell as silver arises from ...

² It is possible to treat the two lines as two different sentences. Thus: Cognition (of any particular thing) arises from ... properties. (Therefore) cognition such as (*ādi*) '(this) shell is silver.' does (not arise from any other cause), on account of its being unknown. Cf. *atrāpi pūrvārdhān nañanuṣaṅgaḥ* (SP).

न चेह राजता धर्माः कुतो ज्ञानं तदाकृति ।

न ह्याकारमनालिङ्ग्य ज्ञानमाकारवत्क्वचित् ॥४५३॥

Further, there are here¹ no properties belonging to silver. Whence then would there be the knowledge having that shape of it? Indeed, without touching (lit. embracing) a shape, there is nowhere any knowledge having a shape.² [453]

¹In the cognition of a shell as silver.

²This has a reference to the sense-organ assuming the shape of the object of its knowing (*viṣayākārabhavana*).

शुक्तिकानुविधायित्वान्नेदं स्मर्तव्यसंश्रयम् ।
अनालिङ्गितबाह्यार्था बुद्धावेव स्मृतिर्यतः ॥४५४॥

This (cognition) is not dependent on an object of memory since it is related ¹ to a shell, for memory arises only in intellect and does not touch (lit. embrace) any external object. [454]

¹That is, a basis in.

धर्मादिहेतुकं ये ऽपि परिणामं प्रचक्षते ।
सम्यग्ज्ञाने ऽपि तुल्यत्वादनाशवासस्तथा सति ॥४५५॥

And (we say), also those who say that (the cognition 'This is silver.') is a modification (of intellect) arising from some property etc. (have to hold that) in the case of right knowledge also, there is similarity (of the modification of intellect) and, that being so, there is want of satisfaction.¹ [455]

¹That is, satisfactory explanation.

भूतकालोपलब्धो ऽर्थः स्मृतेश्चेद्गोचरो मतः ।
नासौ भूतात्मनाज्ञायि भूतज्ञानमनाश्रयम् ॥४५६॥

If it is held that it is an object that is obtained in the past which is within the purview of memory; then (we say that) it is not known as having the nature of (the thing of) the past; for (in that case) the knowledge of (the thing of) the past is baseless.¹ [456]

¹To say that it is the knowledge of the thing of the past would have no basis in a shell/silver in the past.

स्वोत्पत्तिव्यतिरेकेण ज्ञानकालो ऽपि नेष्यते ।

is a shell.'.

[464]

न च प्रत्यक्षविज्ञानात्स्मृतेर्भेदं लभेमहि ।
प्रध्वंसात्तस्य चार्थस्य नातो ऽर्थस्पर्शिनी स्मृतिः ॥४६५॥

Nor do we ascertain the difference of memory¹ from direct perception on account of the destruction of its object. Therefore, memory does not touch the object. [465]

¹Memory here signifies false knowledge (*bhrānti*).

किं न्वेतदिति जिज्ञासोर्निषिद्धे ऽप्यन्यथाग्रहे ।
तावतो व्यवधानत्वाद्बुभुत्सा च न युज्यते ॥४६६॥
शुक्तिकेयमिति ह्युक्ते यथार्थं प्रतिपद्यते ।
रजताद्यन्यथाज्ञानप्रतिषेधादृते ऽपि हि ॥४६७॥

[Verses 466-475 seek to establish *ajñāna* as apart from *mithyā-jñāna*.]

Even after the apprehension (of a thing as) another — by one who is seeking to know (the nature of it) — is denied/declined, there (still) remains an obstacle¹ (of that desire to know ...) and it is not proper (that there remains) the desire to know. [466]

Indeed, one obtains the right knowledge when one is told 'This is a shell.'; even without the denial of wrong cognition² of silver etc. [467]

In the AnSS edition the verse begins with *kim tu* ... But, in the NKL edition and the *Bṛhadāraṇyakavārtikasāra*, it begins with *kim nu*. We follow this latter, for that yields a better construe and meaning.

¹*tāvato vyavadhānāt* is very cryptic! This suggests the necessity of knowing the real nature of the thing (*vastuyāthātmyajñāna*).

²It means: cognition of a thing to be otherwise than what it is.

नीलोत्पलदलाभं खं सामान्येतरवर्जितम् ।

न पश्येयुस्त्रयासत्त्वान्न हि तच्चाक्षुषं यतः ॥४६८॥

(Indeed) they would not (be able to) see the sky, which has the hue of a petal of a blue lotus and is devoid of (any characteristic) common or another.¹ They do not see them owing to the absence of the three, for the triad is not verily an object of the eye. [468]

¹*sāmānyetara* could be *sāmānya* and *viśeṣa*, but the force of *trayāsattva* reminds one of *sāmānya*, *viśeṣa* and *smṛti* mentioned in verse 405 above.

दिग्विभागादिवद्ध्योम प्राग्यानं च रवौ तथा ।
स्वप्ने नानाप्रपञ्चाद्भ्यं मिथ्याज्ञानमृते त्रयात् ॥४६९॥

Similarly, there occurs even without this triad (the knowledge of) the sky having a division into quarters, the movement to the east in the case of the sun and (this universe) full of variety in a dream. [469]

The argument is: All these three are cases produced by ignorance; not by the three mentioned above (or in verse 405).

यत एवमतो ग्राह्यं शुक्तिकाज्ञानमेव तु ।
रजताद्यन्यथाज्ञानकारणं युक्तिगौरवात् ॥४७०॥

Since this is so, therefore it should be accepted that the knowledge of the shell itself¹ is the cause of the wrong cognition (of it) as silver etc. — this on the strength of reasoning (so far adduced). [470]

This concludes: *ajñānam eva bhramakāraṇam*.

¹*tu* for *eva*.

कर्मज्ञानादिहेतुत्वान्नियमस्य यथा तव ।
सामान्याद्यविशेषे ऽपि नियमो ऽप्येवमिष्यताम् ॥४७१॥

As in your opinion there is (accepted) a rule that the activity,

knowledge¹ etc.² are the cause of wrong knowledge,³ even while there is not any specific (one/two) among the common characteristics)⁴; so also should it be accepted (by you, in the same way as that obtains in my opinion). [471]

¹Knowledge stands for memory or experience in the past (referring to silver that was seen earlier).

²The word etc. refers to the desire for having silver (and the like of it).

³This wrong knowledge is 'mistaking a shell for silver'.

⁴*sāmānyādyaviśeṣa*— not any specific among *sāmānya*, *ajñāna* or *smṛti* which were discussed earlier; cf. verse 447 above. This leads to the acceptance of *adrṣṭa* as the cause for mistaking a shell for silver and not for an elephant.

भूरिसामान्यविज्ञानाच्छ्रौक्त्वमेव करोति किम् ।
सदप्यन्यदुदास्ते किं स्वाश्रयग्रहणं प्रति ॥४७२॥

What does only whiteness do in preference to knowledge of greater similarity? Does any other property, even though existent (there), remain inactive towards its own substratum?

[472]

The purport of the verse is: Why does only whiteness in a shell cause the error?, why not any other property which is (or, can be) similar? and why is there apprehension only of silver? and not of anything else? Therefore, the Siddhāntin also can hold likewise that only Dharma (etc.) can be the cause of *ajñāna*. Such is the thought in verses 472ff.

अनेकार्थाभिसंबन्धाच्छ्रौक्त्वस्य रजते च कः ।
पक्षपातो विना हेतुं बलाकाज्ञानकृन्न किम् ॥४७३॥

(Tell me) again, what partiality (or particular inclination) is there of whiteness towards silver, despite its connection with many (other) objects, (and) without any reason? why should not a crane cause the wrong cognition?

[473]

This is an illustration of what is stated in the preceding verse in general terms.

स्वाकारमात्रनिष्पत्तेर्नालं कार्यान्तराय हि ।
सामान्यं वा विशेषो वा नातः स्याद्वाजती स्मृतिः ॥४७४॥

Be it a common¹ or particular property of a thing, it is not sufficient for (lit. capable of) for giving rise to a cognition (lit. an effect) other than producing the shape of the thing itself; therefore, there would not (arise) the memory of silver.²

[474]

This is one more reason why *sāmānya* etc. do not cause error.

¹That is, in common with another thing.

²What arises is ignorance about the real nature of the shell.

न ह्यसंनिहितं बोद्धुर्वस्तु बुद्धौ करोति हि ।
ज्ञानमाकारवल्लोके सर्वाकारप्रसक्तिः ॥४७५॥

Cognition, which has a shape (of the object of its knowing) does not indeed, in this world, put into the intellect of the knower a thing which is not in the vicinity (of him)¹; (if it were otherwise) there would follow the contingency of all shapes (appearing in his intellect).

[475]

This is one more reason why silver, existing in another place, does not cause the error of shell-silver.

¹There is no impression (*ākāra*) on the intellect of a person of a thing that is not present before him.

पदार्थान्तरसद्भावमपेक्ष्यान्यस्य वस्तुनः ।
यस्य सिद्धिर्मृषा तत्स्याद्रज्जुसर्पीद्विचन्द्रवत् ॥४७६॥

That (thing) whose existence follows from¹ its dependence on the existence of some other object(s) should be false like in the case of a rope-serpent and two moons.²

[476]

This and the next verse state that this world is false (*mithyā*),

since the cognition of its existence depends upon the acceptance of cause-and-effect relation.

¹It literally means: is established by.

²As silver in a shell depends for its cognition (in other words, for being an object of someone's cognition) on a shell and is, therefore, false, so is this world false because it depends on the Ātman. Or, the moon is only one, but owing to some defect in the eye of one, seems to be accompanied by another. Cf. also Adhyāśabhāṣya (pp.32-34): *śuktikā hi rajatavad avabhāśate and ekaś candrah sadvitiyavad iti.*

प्रमात्रादीह यत्किञ्चित्प्रत्यगज्ञानहेतुजम् ।
अन्योन्यापेक्षसिद्धित्वान्मिथ्या तदपि पूर्ववत् ॥४७७॥

Whatever, viz. a knower etc., (is understood here) has originated from the cause, viz. ignorance about the inner self; (but) that is, as (shown in the illustrations) before,¹ false since there is mutual dependence of them for their existence. [477]

¹This is a reference to *rajjusarpa* and *dvicandra* in the preceding verse.

आत्मन्यध्यासरूपो ऽयं संसारः प्रतिपादितः ।
अध्यासश्च विना हेतुं न लोक उपपद्यते ॥४७८॥

This transmigratory world is explained to be having the nature of superimposition (of certain things and properties) on the Ātman and it does not stand to reason that this superimposition is without any cause. [478]

This introduces the discussion of BUB: *yaḥ kāraṇam sarvasya jagataḥ.*

तस्माद्धेतुपदेशाय यः कारणमितीर्यते ।
यस्मिन्न्विद्ययेत्येवं ननु कारणमीरितम् ॥४७९॥

Therefore is made (lit. uttered) the statement *yaḥ kāraṇam* ... in order to explain the cause (viz. the superimposition of

that). But (the objector asks:) In the statement *yasminn avidyayā* ... (the nature of) the cause is (already) stated. [479]

The verse contains an objection: BUB contains repetition, for already the sentence *yasminn avidyayā* ... has explained what is now being introduced in *yat kāraṇam* (these are two successive statements!) — the first is explained in verse 414ff.

प्रधानवादमाशङ्क्य यस्माद्भूयो ऽपि भण्यते ।
अज्ञात आत्मा जगतः कारणं न गुणत्रयम् ॥४८०॥

Since this is so said (now) once again, with the apprehension about the theory of Pradhāna (as the origin of this world), (therefore, it should not be considered as repetition). (The correct view is:) The unknown Ātman is the cause of this world and not the three *guṇas*. [480]

This explains why one should not entertain the idea of repetition.

श्रुतितो युक्तिश्चापि स्वयमेव प्रवक्ष्यति ।
उदर्क इममेवार्थं नातो ऽन्यत्कारणं ततः ॥४८१॥

He¹ himself will say about this matter later² on the basis of the Śruti³ and also of reasoning. There is no cause (of the world) other than this⁴. [481]

¹This is Śaṅkara, the Bhāṣyakāra.

²In the Madhu Brāhmaṇa etc.

³SP cites: *ātmana ākāśaḥ sambhūtaḥ* (Taittirīyopaniṣad 2.1); *etasmā jāyate prāṇaḥ* (Muṇḍakopaniṣad 2.1.3); *yaḥ sarvajñaḥ sarvavid* (Ibid. 1.1.9).

⁴This refers to the Ātman.

यदात्मके नामरूपे इत्यज्ञानात्मता तयोः ।
भण्यते ऽतो ऽप्रमाणत्वं शुक्तिकारजतादिवत् ॥४८२॥

(Since) it is stated (in the Bhāṣya) *yadātmake nāmarūpe* that the two are of the nature (of the products) of ignorance,

therefore, (the knowledge of the two) is not authoritative¹ like (that of) silver in a shell etc. [482]

This explains BUB: *yadātmake nāmarūpe salilād iva svacchāt malam iva phenam avyākṛte vyākriyate*.

¹SP points out the purpose of this word as *bādhyatā* 'liability to be stultified'. NKL explains this as *bādhyatva*.

न कारणातिवर्त्यस्ति कार्यं जगति कुत्रचित् ।
स्वकारणाविशिष्टत्वे सलिलादिति हेतुगीः ॥४८३॥

In this world, there nowhere abides an effect apart from (lit. beyond) its cause. There is a statement of the reason, viz. 'from waters' (which is) expressive of the state (of the world) as non-distinct from its own cause. [483]

This is the purport of the illustration in *salilād iva* ...

वस्तुवृत्तं न पर्याप्तं तदज्ञानापनुत्तये ।
अनुपात्तप्रमाणं सदित्यर्थप्रतिपत्तये ॥४८४॥

The nature of the thing¹ is not by itself sufficient for the removal of ignorance (about it) unless it has taken (the support of) an authoritative means (viz. the Śruti statements) for establishing that it is existent. [484]

This explains the meaning of BUB: *yaś ca tābhyām nāmarūpābhyām vilakṣaṇaḥ svato nityaśuddhabuddhamukta- svabhāvaḥ*.

¹Namely, the Ātman which is *nitya* ...; but *buddha* = *bodhaikarasa* (having only knowledge as its essence) though it is, it by itself cannot remove ignorance.

स्वतो बुद्धमिदं यस्मादतः शुद्धमसद्वयम् ।
द्वितीयसंगतिर्यस्माल्लोके ऽशुद्धेः प्रयोजिका ॥४८५॥

Because this itself has knowledge as its essence¹, it is pure and is without duality in it²; for, in this world, association of a second is a bringer of impurity to one. [485]

¹See the note on the preceding verse.

²SP notices a variant reading ... *śuddham ato 'dvayam* (not noticed by the AnSS edition). Following that, the translation would be: 'Because ... pure, and therefore, without duality.' But that hardly serves any better purpose. *asaddvaya* literally means: that in which there is no pair, i.e. which is (one) without duality (in purport).

यथोक्ततत्त्वे नाविद्यामृते स्याद्द्वयसंगतिः ।
अतो ऽशुद्धिनिषेधोक्तिस्तदविद्यानिषेधतः ॥४८६॥

In respect of the Reality which is thus explained, there cannot be its associatin with duality (lit. a pair) except without ignorance.¹ Therefore, the statement for the denial of impurity (follows) from (the statment of) the denial of ignorance about it.

[486]

¹That is, such association can be only when there is ignorance.

ईश्वराव्याकृतप्राणविराड्भूतेन्द्रियादिकम् ।
नाविद्योपाश्रयं मुक्त्वा संभाव्यं प्रत्यगात्मनि ॥४८७॥

It is not possible to entertain (that there exists) in the inner self (the group of what are called eight states, viz.) Īśvara¹, Unmanifest, Prāṇa, Virāj, element(s)², sense-organs³ etc.⁴, without (having the support of) ignorance.

[487]

This is based on an objection: How can one deny duality in Reality (= Ātman) whose eight states are mentioned in the Śruti? — such is the view of Bhartṛprapañca.

According to Sureśvara, the eight forms are (1)Īśvara, (2)Avyākṛta, (3)Prāṇa, (4)Virāj, (5)Bhūta, (6)Indriya, and the remaining two (not mentioned). Regarding this, SP describes in 1.3.314 or 1.4.1043 that they are *sākṣin*, *antaryāmin*, *avyākṛta*, *daiva*, *sūtra*, *virāj*, *jāti*, *piṇḍa*. SP refers to the relevance thus (as given in the notes): *īśvara* = *antaryāmin/sākṣin*, *indriya* = *daiva*, *prāṇa* = *sūtra*, *ādi* = *jāti*, *bhūta* (= *vyakti*) = *piṇḍa*; thus is Sureśvara's enumeration justified.

But NKL enumerates in a confusing way as *antaryāmin*, *sūtra*, *virāj*, *viṣaya*, *buddhi*, *manas*, *indriya*, *śarīra* (in 1.3.314) and *avyākṛta*, *antaryāmin*, *sūtra*, *virāj*, *piṇḍa*, *deha*, *indriya*, *antaḥkaraṇa*, *viṣaya* (in 1.4.1043). Even considering the explanation as given in the notes below, some vagueness remains.

¹SP points out: *Īśvara* is for the inner self and the witness. But cf. NKL: *jagato 'ntaḥ sthitvā niyantā* 'the inner controller'.

²This stands for the world in the form of Tanmātras – *bhavanayogyā vyaktayaḥ* (SP).

³That is, deities (SP).

⁴The word etc. stands for *jāti* (SP) but *śarīra viṣaya saṁgraha* (NKL).

प्रत्यग्याथात्म्यदृष्ट्या तन्निपुणो ऽपि न वीक्षते ।
न च प्रत्यग्धिष्यं मुक्त्वा पराबुद्धिर्मितिर्भवेत् ॥४८८॥

Even a clever person, (when) with the vision of the true nature of the inner self, would not (be able to) see that¹, (for) the knowledge of the outside world of objects, (which arises only) after giving up the knowledge of the inner self, cannot be right knowledge. [488]

¹Namely, the world in its eight forms, as understood above in the preceding verse.

पराञ्चि खानीत्येतच्च साटोपमभिधीयते ।
प्रत्यङ्मानैकमेयत्वं वेदान्तेष्वात्मवस्तुनः ॥४८९॥

And it is stated in Vedānta sentences (such as) *parāñci khāni* ...¹ with the purport² that the thing (called) *Ātman*³ is to be known only by one means of knowing, viz. (seeing it as) the inner self. [489]

This verse presupposes an opponent's argument the knowledge of the inner self occurs through the help of external sense-organs since it (viz. the inner self) is described as knowable from all experiences (*sarvapratyayavedya*).

¹*Kāthopanīṣad* 4.1; cf. verse 180 note 3 above.

² *sātopam* = *satātparyam* (SP).

³ This is the inner self.

इतो विरुद्धमानत्वं स्वतो ऽपास्तद्वयात्मनः ।
शक्यं वैश्वानरवरात्प्रवक्तुं न तु मानतः ॥४९०॥

It is possible to state that the Ātman, which has of itself given up duality, has (a means for knowing it) which is opposed (to the Śruti) only on the strength of the boon of Vaiśvānara¹; but not on the strength of an authoritative means! [490]

¹ This is an oft-mentioned fact about Bhartṛprapañca. He is said to have obtained a boon from Agni Vaiśvānara for excellent knowledge. Cf. our book [Vol.2:1988] p.25 for *vaiśvānaraprasādāt* ... SP states that this is jeopardizing Bhartṛprapañca.

नित्यशुद्धश्च बुद्धश्च यस्मादात्मा परः स्वतः ।
मुक्तश्चातो ऽवसेयो ऽसौ सद्बेदान्तोक्तिमानिना ॥४९१॥

Because that highest Ātman is ever pure, having knowledge as its essence, and, of itself liberated, it is therefore to be ascertained (to be thus) by one who respects that authoritative statement of Vedānta.¹ [491]

¹ NKL points to sentences such as ... *na lipyate lokaduḥkhena bāhyah*. (Kāthopaniṣad 5.11).

एवंभूतो ऽप्यसंबुद्धस्वात्मतत्त्वो महेश्वरः ।
आपेदै कारणात्मत्वं नामरूपादिसर्जने ॥४९२॥

The great Lord¹, even though of such nature, was (yet) ignorant (lit. not enlightened) about his own nature (and therefore) became the cause of creation of name, form etc. [492]

¹ SP points out the significance of the word *maheśvara*; *sraṣṭuḥ*, *saṃhartuś cābhedam abhipretya maheśvaragrahaṇam*.

स एष इत्यनेनापि सुविरुद्धात्मतां ब्रुवन् ।
विरुद्धवस्तुसंसृष्टिं ब्रूते ऽज्ञानैककारणम् ॥४९३॥

Bringing out the nature of the mutually very much opposed (cause and effect) in words *sa eṣa* ...¹ also, (the Bhāṣyakāra) declares that the creation of the mutually opposed things has only ignorance as its cause. [493]

व्याकुर्वन्निति वाक्येन स्वतो ज्ञो ऽपि तमोन्वयात् ।
ब्रह्मादिस्तम्बपर्यन्तम् कार्यं प्राविशदुच्यते ॥४९४॥

By the statemnt *vyākurvan* ... is declared that (the highest Ātman), though knower in its own right, entered the effect (lit. products) beginning with the Brahman and ending with the blade of gross on account of its association with darkness. [494]

स्वानुभूत्यनुरोधेन यो ऽज्ञातार्थः पुरोदितः ।
प्रकृतार्थावलेहित्वात्सर्वनाम्ना स उच्यते ॥४९५॥

That unknown thing, which was earlier spoken of, in consonance with one's own experience is mentioned by the pronoun *sa*, owing to its capacity to refer to the thing under discussion. [495]

परामृश्य स इत्येवमव्याकृतसतत्त्वकम् ।
तथारूपः स्वकार्यस्थः प्रात्यक्ष्यादेष उच्यते ॥४९६॥

Having referred to (the highest Ātman) which was of the nature of the essence of the unmanifest, this one is (now) called (=referred to) as *eṣa* on account of its direct perceptibility, abiding as it is in its own effect, in that form (i.e. still unknown). [496]

विरुद्धरूपयोरेवं निर्द्वयद्वयरूपतः ।
स एष इति निर्देशः कथं स्यात्कृष्णसर्पवत् ॥४९७॥

(An objection could be raised:) Thus, since there are two

things of mutually opposed nature and also because they have the forms of non-duality and duality, how could there be the reference *sa eṣaḥ* which is like (the reference) 'a black-serpent'? ¹ [497]

¹In the word black-serpent we notice its two elements: black and serpent in *sāmānādhikarāṇya* 'referring to the same substance'; therefore the question is: How could mutually opposed qualities obtain in one and the same substratum? That is, it is impossible to hold the identity of *saḥ* and *eṣaḥ*.

कारणान्नान्यतः कार्यं तथा कार्याच्च कारणम् ।
इत्युक्तन्यायहेतुत्वान्न विरोधो ऽत्र कश्चन ॥४९८॥

Because of the maxim which has been already stated, viz. that the effect is not different from the cause, nor is the cause different from the effect, there is not any contradiction (involved) here. [498]

अज्ञातवस्तुतत्त्वस्य दुष्करं नास्ति किञ्चन ।
नीलीकृतं नभः पश्येच्चक्षुषा नीलवस्त्रवत् ॥४९९॥

For the one to do who has not known the true nature of the thing ¹ there is nothing difficult. For example, one would see the sky as painted with blue just like a blue piece of cloth. [499]

Here is an answer to the question in the preceding verse.

¹Namely, the real nature of the Ātman.

योग्यायोग्यव्यपेक्षेयं मानव्यवहृतौ भवेत् ।
कल्पनामात्रनिष्पत्तेर्नापेक्षाज्ञानभूमिषु ॥५००॥

Such (lit. this) specific vision of (what is) proper ¹ and (what is) not proper would be (possible) in dealings which involve the use of various means of knowing; (as against this) there will be no such vision (lit. expectation) in dealings (based

on) ignorance, since they have proceeded from only imagination. [500]

¹Namely, the thing in its real nature.

इत्युक्तप्रतिपत्त्यर्थं हेतुरेषो ऽभिधीयते ।
प्रविष्ट इत्यनेनात्र स्वाभासैकतमोन्वयात् ॥५०१॥

In order to confirm (establish firmly) what is thus¹ stated, this reason is (now) stated (in the words) *praviṣṭaḥ* ..., for there is here² association of darkness (i.e. ignorance) which is only a appearance of one's own inner self. [501]

¹That is, in the statement with the *sāmānādhikarāṇya* in *sa eṣaḥ* (noted above).

²This means: in respect of *parasya praveśaḥ*.

ब्रह्मादावित्यनेनापि जनिमत्सर्वमुच्यते ।
कृत्स्नसंसारधर्मार्थं देहेष्विति च भण्यते ॥५०२॥

By the statement *brahmādaḥ* ...¹ also is stated the entire (group of things) that has an origin (lit. birth)² and (the word) *deheṣu* is stated (lit. expressed) for (referring to) all the properties of transmigratory existence.³ [502]

This verse has a reference to BUB: *brahmādistambaparyanteṣu deheṣv iha karmaphalāśrayeṣu āśanāyādimatsu praviṣṭaḥ*.

¹This stands for *brahmādistambaparyanteṣu*.

²This clarifies the word *iha*.

³This is for justifying the plural for *deheṣu*.

ब्रह्मादिस्तम्बपर्यन्तं देहेष्विति तथोच्यते ।
क्रियाफलाभिसंबन्धो देहेष्वेवेति नात्मनि ॥५०३॥

So also is stated in the sentence *brahmādistambaparyantaṁ deheṣu*, that the relation of action and result (lit. fruit) can exist only in the case of bodies and not in the Ātman. [503]

प्रत्यङ्मोहमरुद्धुद्विचक्षुर्देहादिरूपिणाम् ।
प्रविष्टवचसैकात्म्यं गुणप्राधान्यमुच्यते ॥५०४॥

By the expression *praviṣṭa* is conveyed the uniqueness (of the Ātman and) the relation of the principal and the subordinate (in the case) of those that have (the various) forms (of the inner self¹), viz. wind,² intellect,³ eye,⁴ body,⁵ etc. owing to ignorance about the inner self. [504]

¹These are the limiting adjuncts of the Self.

²This is Prāṇa, the limiting adjunct of the Sūtra.

³This is the limiting adjunct of Hiranyagarbha.

⁴Eye stands for all sense-organs.

⁵This stands for individuality, activity etc.

न द्वौकते पराचीनं प्रत्यक्त्वासङ्गतः परः ।
नेहाज्ञामनादाय ह्यात्मानात्मानमीक्षते ॥५०५॥

The highest Ātman, who is not associated with characteristics of the inner self, does not push ahead what is external. Indeed, here (in worldly existence), the Ātman does not see the non-Ātman without having resorted to ignorance. [505]

स्थाण्वज्ञानमनादाय न चोरादीक्षणं यथा ।
आत्माज्ञानमनादाय तद्वन्नानात्मवीक्षणम् ॥५०६॥

As there is no awareness (lit. seeing) of a thief etc. without having developed (i.e. resorted to) ignorance about a pillar (etc.), so (also) there is no seeing of the non-Ātman without (the Ātman) having been enveloped by ignorance. [506]

This is strengthening the thought in the preceding verse by an illustration.

येनान्वितो ऽयं संसारी सुषुप्ते कर्मणः क्षयात् ।
तत्स्वाभाव्यावशेषः स्यात्तत्कार्यत्वाद्घटादिवत् ॥५०७॥

This transmigratory being (viz. the inner self) would in sleep

come to have only a remnant of the quality of the one by whom he is accompanied, since there is the cessation of activity. (This is so) because he is a product (lit. effect) of that (i.e. him), in the way as a pitcher etc. (of clay). [507]

This is a very cryptically expressed verse! The illustration in it is also somewhat strained. A pitcher made of clay retains the qualities of clay. In the same way, a transmigratory being, a product of the Self, is in sleep inactive and yet retains the capacity (really that of the Self) to know. Thus, though related to the Self as its product, it is non-distinct from it.

स्वात्माभासप्रवेशो यः प्रत्यङ्मोहनिबन्धनः ।
तज्जेष्वपि स एव स्यान्मरुद्बुद्ध्यादिरूपिषु ॥५०८॥

That entry, (of the Self), viz. really the semblance of its own nature, which is rooted in (lit. based on) ignorance about the inner self, would be the same in (the case of) its products also, (viz. those) which have the form of wind, intellect etc. [508]

Read SP: *na cābhāsasyābhāsino 'nyatra sattvam ity aikye praviṣṭaśabdaḥ paryavasyatīty arthaḥ.*

पयोम्भोवत्सूत्ररूपं क्रियाविज्ञानशक्तिमत् ।
कर्तृस्थभावकं स्थास्नु चलं कर्मस्थभावकम् ॥५०९॥

[There now follows a description of the various products of the Self's entry into the manifest, the inner self.]

Like (the mixture of) milk and water is the form of (the Brahman that has become) the Sūtra; it is possessed of (the capacity for) knowledge and action, it is residing in an agent and yet immutable and it is residing in activity (also) and (therefore) unsteady.¹ [509]

¹SP: *ādyantavat* 'having a beginning and an end'.

बुद्ध्यात्मनो ऽभिनिर्वृत्तिर्व्यवसायात्मनस्ततः ।
हिरण्यगर्भं यं प्राहुरपादानं जगद्धियाम् ॥५१०॥

From that¹ there comes to be produced the one who is of the nature of the knowledge (and) who has the nature of the activity; (the one) whom they² call Hiraṇyagarbha, the material (cause) of the various notions of the world.³ [510]

This presupposes an objection: Since Hiraṇyagarbha is without any gross body and, as such, devoid of absence of sentience, the Upaniṣadic sentence *hiraṇyagarbham paśyata jāyamānam* (*Mahā-nārāyaṇīyopaniṣad* 8.12) is contradicted! In other words, it cannot be said to be born from the Supreme Self.

¹ *tataḥ* stands for *ajñātāt paramātmānaḥ*.

² SP states: These are Śruti and Smṛti.

³ Hiraṇyagarbha (or Sūtrātman) is the cause of the manifest effects; cf. SP: *kāryalingakam anumānam sūcayati*.

वैराजं स्थानमासाद्य क्षमादिदेशविभागवान् ।
देवताकरणो देव एष एवोच्यते विराट् ॥५११॥

This shining one¹, the maker of deities, after having resorted to the status of Virāj², and (there) being possessed of the differences such as regions, earth etc.³, he is called Virāj.

[511]

¹ For this translation of *deva*, as 'shining *deva*' cf. *Gauḍa-pāḍakārikā* 2.12.

² The status of the gross world (*sthūlaprapaṇcātmaka sthāna*).

³ This refers to Agni, sun and others.

तथा च मन्त्रवर्णो ऽत्र ह्यग्निर्मूर्धोति दृश्यते ।
तदुपादानमात्राः स्युर्देवताः स्वाभिमानजाः ॥५१२॥

To that effect there is seen the text of a Mantra, viz. *agnir mūrdhā ...*¹ (and the various) deities which are born of his ego (are) just his material (for creation). [512]

¹ *Muṇḍakopaniṣad* 2.1.4. But SP refers this Mantra to Smṛti — cf. *Vāyupurāṇa* 1.9.112: *dyaurmūrdhānam yasya viprāḥ stuvanti*.

आधिभौतिकभूतानां तथैवाध्यात्मरूपिणाम् ।
पूर्वोक्तानां परिच्छेदो ह्यविद्याकामकर्मभिः ॥५१३॥

The differentiation of the beings originating from him, viz. the elements and also those having the form of embodied beings, which are mentioned earlier,¹ is indeed owing to² ignorance, desire and actions. [513]

¹ See verses 504 and 508 above.

² Or, on the basis of.

सूत्रादिस्थाणुपर्यन्तं जगत्सृष्ट्वात्ममायया ।
स्वाभासैकसहायात्मा तदेव प्राविशद्वरिः ॥५१४॥

Having created by his own power this universe beginning with Sūtra up to a tree, Hari¹, the Ātman, who has only one helper in his own semblance, entered into that (creation) itself. [514]

¹ This reference to the Lord as Hari = Viṣṇu is an indication of the effect of popular Vaiṣṇavite religion on Sureśvara.

ननु व्याक्रियतेत्युक्तं स्वयमेव जगत्परा ।
कर्मकर्त्रुक्तितो ऽकस्मात्कथं कर्ताभिधीयते ॥५१५॥

[In verses 515-528, there is a discussion if there is involved a self-contradiction in the Upaniṣadic reference to the creator's entering into the creation.]

(There is an objection:) But, indeed, it is said before that the world became manifest of itself, as understood to Impersonal Absolute construction. How then suddenly there is mentioned the agent of the activity (of manifesting it)?¹ [515]

Similarly, in *idam* (*jagat*) *vyākriyata* it is meant that 'it became manifest' (of itself). There was no need therefore of the mention of any agent. But there is a reference to an agent of that creation now! Therefore, the objection has been raised.

परात्मनः प्रवेशो ऽपि न्यायं संगच्छते न च ।
नेहासौ प्रकृतो यस्मादतो नासौ प्रवेशभाक् ॥५१६॥

So also, the entry of the highest Self does not follow logically. (Thus) since that one¹ is not relevant (in the context of the creation), therefore he is not the one who enters.² [516]

This is the additional part of the objection.

¹This refers to the agent.

²That is, who can or should enter. Not also, into the discussion!

नैष दोषः परस्यापि ह्यव्यक्तजगदात्मना ।
विवक्षितत्वादाक्षिप्तनियन्त्राद्यभिधीयते ॥५१७॥

(The Siddhāntin answers:) This is not a fault. Because it was intended¹ to refer also to the highest Ātman (as the origin) of the unmanifest world, therefore the role of the controller etc., which is objected to, is mentioned here. [517]

¹SP points out: There was in the Impersonal Absolute construction stress only on creation; there was not the mention of any controller etc. of the same. Yet that was implied.

इदंशब्दाभिधानेन ह्येकाधिकरणश्रवात् ।
अव्याकृतपदस्यातो यथोक्तो ऽर्थो ऽत्र युज्यते ॥५१८॥

(And) because the word *avyākṛta* is heard as referring to just one substratum (expressed) by the expression in the word *idam*, therefore, in this context, the meaning, as already stated, is reasonably understood. [518]

इदं जगन्नियन्त्रादिविभिन्नानेकरूपवत् ।
यथाधना निश्चिनमः प्रागप्येतदभक्तथा ॥५१९॥

As we now determine that this world possesses many varied forms such as the controller etc., so was it (determined) then (i.e. in the initial stage) also. [519]

नामरूपाद्यभिव्यक्तेः प्राग्व्यक्तापह्वे ऽप्यभूत् ।
अव्यक्ताद्यक्ष एकाकी व्यक्तं यत्साक्षिकं जगत् ॥५२०॥

For the reason that (there followed) manifestation of name and form etc., the unmanifest witness, all alone, was (the cause) for the concealment of the formerly manifest, the one with whom the witness this world became manifest. [520]

जगज्जनिस्थितिध्वंसनृत्तसाक्ष्यतिरेकतः ।
शिष्टस्येह प्रवेश्यत्वात्पर एवाविशेदतः ॥५२१॥

Because what is to be entered here is to be mentioned as apart from the witness of this world's origin, sustenance, destruction and dance, therefore, the highest (self) alone would enter that. [521]

Read SP: *sākṣiṇo bhedena śrutam dṛṣṭam vā yad avaśiṣṭam tasya sarvasya praveśaviśayāntarbhāvāt parātmaiva jagati praveṣṭā.*

विवक्षातश्च शब्दानां प्रयोगो जगतीक्ष्यते ।
यथा ग्रामादिशब्दानां तथेहाप्यवसीयताम् ॥५२२॥

And it is seen that in this world the employment of words proceeds from some (particular) desire to state (something), as, for example, (in the employment) of words, village etc.¹; so also let it be understood (i.e. concluded) here. [522]

¹The word etc. signifies cities etc. (NKL).

निवासश्च निवासी च तथा चोभयमुच्यते ।
ग्रामशब्देन लोके ऽस्मिस्तथेहापि जगद्गिरा ॥५२३॥
क्वचिदात्मैव निर्देश्यो ऽनात्मैव क्वचिदुच्यते ।
तथोभयविवक्षापि व्याकृताव्याकृतोक्तिः ॥५२४॥

In this world, a (place of) residence and a resident are both expressed by the word *grāma*; so also here by the word *jagat* is to be mentioned in some places (or at some time) only the Ātman and at other(s) the non-Ātman. Thus, there is a desire to mention by the Vedāntic statement both *vyākṛta* and *avyākṛta*. [523-524]

यत्र नाशादिमद्वस्तु प्राधान्येन विवक्ष्यते ।
तत्रानात्मैव वाच्यो ऽर्थः प्रत्यगात्मोपसर्जनः ॥५२५॥

Where it is intended to express principally a thing, which is liable to destruction etc., there the expressed sense is only the non-Ātman, with the inner self as its subsidiary. [525]

अस्थूलो ऽजो ऽजरः शुद्धो यत्र चाप्यभिधीयते ।
प्रत्यगात्मविवक्षैव तत्र ज्ञेयाभिधानतः ॥५२६॥

And where the non-gross, unborn, ageless (and) pure one is stated, there is the desire to express there only the inner self as the expression of the object of knowing. [526]

अव्यक्तं व्याकृतं विश्वं यत्र चाप्यभिधीयते ।
आत्मानात्मद्वयार्थैव विवक्षा तत्र गम्यते ॥५२७॥

And, further, where there is expressed the world both as unmanifest and manifest, there is understood a desire of expressing (both) what has the meaning of the Ātman and what, the non-Ātman. [527]

यन्मदन्यदिति चोक्तेः परस्य प्रकृतत्वतः ।
सशब्देन परामर्शः परस्येह भवेदतः ॥५२८॥

Further, from the statement *yan mad anyat*¹ (it is understood that) the highest Ātman is meant²; therefore, there would be reference made (only) to the highest Ātman by the word *sah*. [528]

¹This is BU 1.4.2.

²Or, principally intended.

Now follows, up to verse 633, a detailed discussion about 'entry' of the Ātman into the manifest.

अव्यावृत्ताननुगतयाथात्म्यादात्मवस्तुनः ।
ननु प्रवेशस्तस्येह कथं श्रुत्योपदिश्यते ॥५२९॥

[Verses 529-548 state the *prima facie* view: It is the inner self (*jīva*) that has entered the manifest.]

(There is an objection:) How indeed does the Śruti declare the entry of that existent thing, viz. the Ātman, for the true nature of it is that it is not differentiated¹ from (any other) and not followed by² (any other)? [529]

¹It is not distinguished (*aviśeṣa*).

²That is, not similar to (*āsāmānya*).

अप्रविष्टं यतो वेश्म परिच्छिन्नेन शक्यते ।
प्रवेष्टुं पुरुषेणैवं न खेनैतद्विधर्मतः ॥५३०॥

(We ask this) because (we notice that) it is possible for a person (who is) limited (in size) to inhabit an (earlier) uninhabited house, not by the sky which has the opposite property.¹ [530]

¹Namely, which is unlimited in size.

सर्वगाणामपि यथा भूतानां परिणामतः ।
सर्पादीनां प्रवेशः स्यादुपलादौ मतं यदि ॥५३१॥

If it is held that like the entry into stones etc. that is possible for the serpent etc.¹ on account of (their) being the modification of elements which have entered into all things, (it is possible for the highest Ātman to enter into all things). [531]

¹This refers to the then-accepted belief that a serpent could be produced in a stone as a modification of the elements that entered into it from outside it!

युतसिद्धनिवृत्त्यर्थं सहजोक्त्याभिधीयते ।
अश्मनः परिणामत्वात्सर्पादेः परिपाकतः ॥५३२॥

(The answer is:) The statement (that the serpent entered into a stone) is made by the word *sahaja* in order to establish the two as existing apart from each other — (this) for the reason that the stone etc. are (one) modification (of the elements) and the serpent etc. are modification (of another modification). [532]

दृश्यते ऽन्तःस्थतोयानां बहिष्ठः परिपाकतः ।
परिणामः पदार्थानां क्रिमिसर्पादिलक्षणः ॥५३३॥

It is noticed that waters which are inside¹ have their modification outside; so also are noticed substances which have the characteristics of insects, serpents etc. (inside some others). [533]

This points to the modification of the five elements into serpent etc.; and implies the entry of the highest Ātman into beings by assuming the form of the inner self.

¹This refers to the waters inside a coconut, a modification of waters. But we feel that the illustrations are not wholly apt.

नैवं यस्मादनापन्नधर्मान्तर इहोच्यते ।
कार्ये प्रविष्टः स्रष्टैव पुमान्वेशमेव तत्कृतम् ॥५३४॥

(The objector persists:) Because here is stated that one, who has not developed any other¹ properties, has entered into a product² like a man that enters into a house built by himself.³ [534]

¹This is literal translation of *dharmāntara*; but it should not be forgotten that the highest Ātman has no property. All that

can be understood is: It, of its own accord, wished to create and did create the world.

²Namely, creation.

³This refers to the voluntary acceptance of the limiting adjuncts by the highest Ātman.

यथा भुक्त्वैति नगरं भुज्येतिक्रिययोर्नरः ।
अविशिष्टो भवेत्कर्ता भिन्नकालस्थयोस्तथा ॥५३५॥
सृष्ट्वेदं सकलं विश्वं पश्चात्तत्प्राविशद्विभुः ।
अनुपात्तान्यधर्मः सन्न तु पाषाणसर्पवत् ॥५३६॥

As (in the sentence) 'A man, having eaten (his meal), goes to a town.', the agent of the two actions of eating and going is but one unchanged man, at two different points of time, so also has the all-pervading Lord, after having created this entire universe, entered into it later, not being possessed of any other properties; not indeed like a serpent into a stone.

[535-536]

This has a reference to *tat sṛṣṭvā tad evanuprāviśat* (*Taittirīyopaniṣad* 2.6).

न चानवच्छिन्नतनोर्निर्विभागात्मवस्तुनः ।
पूर्वस्थानवियोगेन स्थानान्तरसमागमः ॥५३७॥

Also, there is no going to any other place by leaving an earlier (occupied place on the part of) the existent thing (viz. the Ātman) which has not a body that is limited and which is of the nature of what is without any parts.

[537]

मतं प्रवेशश्रवणादस्तु सावयवः परः ।
इति चेन्नैतदेवं स्यादागमोक्तिविरोधतः ॥५३८॥

If it is held on account of the Śruti statement about its entry (into the world) that the highest Ātman comprises/has parts, that also would not be so, for that would be in contradiction to the statement in the Śruti;

[538]

दिव्यो ह्यमूर्तः पुरुषो नेति नेतीति चासकृत् ।
गीर्मनोगम्यधर्माणां सर्वेषामात्मनि हुतेः ॥५३९॥

also because, in the case of the Ātman, there is the denial (lit. concealment) of all properties which can be conceived by *manas*¹, as it has been several times² (declared in the Śrutis, for example in) *divyo hy amūrtaḥ puruṣaḥ*³, and *neti neti*⁴.

[539]

¹Or, understable for *manas*.

²It literally means: not once.

³*Muṇḍakopaniṣad* 2.1.3.

⁴*athāta ādeśo neti neti* (BU 2.3.6); *sa eṣa neti nety ity ātmā* (BU 3.9.26; 4.3.4; 4.4.22; 4.5.15).

रविबिम्बादिवत्तर्हि प्रवेशो ऽस्तु परात्मनः ।
नैतन्न्याय्यमसद्भावात्तत्संयोगवियोगयोः ॥५४०॥

(It may be argued:) Let the entry of the highest Ātman be like that of the reflection of the sun. (To this we say:) This is not in accordance with reasoning, since the union as well as the separation (of the highest Ātman) have the character of the unreal.

[540]

संयोगश्च वियोगश्च यस्य येनेह वीक्ष्यते ।
प्रतिबिम्बप्रवेशो ऽयं तत्र न त्विह युज्यते ॥५४१॥

Here¹, this entry of the reflection (of the sun) is noticed in that with whom (there is a) contact and from whom (there is its) separation. (But that is) not reasonably acceptable here².

[541]

¹That is, in this world.

²This means: in respect of the entry of the Ātman into the inner self.

गुणप्रवेशवद्द्रव्य इति चेन्नानपाश्रयात् ।
द्रव्यैकपरतन्त्राणां गुणानामेव युक्तिमान् ॥५४२॥

तादृक्प्रवेशो नेशस्य स्वातन्त्र्यादुपपद्यते ।

If it is said that (the entry of the highest Ātman into the inner self) is like the entry of properties into a substance, (then also, we say:) No, because of its not needing any support.¹ It is reasonable to hold (the entry into substances) by only properties which have a support in (lit. are dependent on) only the substances. [542]

That kind of entry by the Lord cannot be held reasonable, for it has his independence. [543ab]

¹Or, its non-resorting (anybody else).

एष सर्वेश्वर इति स्वातन्त्र्यं श्रूयते ऽसकृत् ॥५४३॥

(Also) in (such phrases as) *eṣa sarveśvaraḥ*, the independence (of the Lord) is heard many times (lit. not once). [543cd]

बीजवत्स्यात्प्रवेशश्चेन्नैवमप्युपपद्यते ।
जन्मादिविक्रियाधर्मप्रसक्तेरात्मवस्तुनः ॥५४४॥

If (it be said:) The entry (of the highest Ātman into the inner self) can be like that of the seed (into the fruit). (We say:) It also is not reasonable, for that would involve contingency of having properties of such modifications as birth etc. by the thing called Ātman. [544]

स्थलादिविक्रियाषट्कप्रतिषेधश्रुतेर्न च ।
प्रवेशो ब्रह्मणो ऽयुक्तः फले बीजादिवत्सदा ॥५४५॥

From the Śruti statement of denial of the six modifications¹ of the gross etc. also (it follows that) the entry of the Brahman (into its product) is not ever unreasonable like that of the entry of seed etc. into the fruit (etc.) [545]

¹These are six *bhāvavikāras* mentioned in *Nirukta* 1.2.

ननु पाषाणसर्पेण पुनरुक्तमिदं कथम् ।

फले बीजवदित्युक्तं नैष दोषो भवेत्कुतः ॥५४६॥

(One might ask:) Why indeed is this repetition of what is said by (the illustration of) the serpent in the stone, viz. the statement (that the entry of the Ātman into its product) is like that of seed (etc.) into a fruit etc.? (We answer:) This would not be a fault. 'Why is this so?', (the opponent asks.)

[546]

भागभाग्यभिसंबन्धः ख्यातो बीजफलात्मनोः ।
आधाराधेयसंबन्धस्तत्राश्मोरगयोः स्फुटः ॥५४७॥

(It might be said:) It is declared that there exists between what are of the nature of seed etc. and of fruit etc. the relation of a part and a whole¹, while there is a clear relation between a stone and the serpent (in the simile) of the supporter and the supported.

[547]

¹It literally means: what is made up of parts.

परस्मादन्य एवेह संसारी प्राविशज्जगत् ।
परिच्छिन्नस्य लोके ऽपि प्रवेश उपपद्यते ॥५४८॥

(On this, the objector says:) Here¹, (it is to be accepted that) a being different from the highest Ātman entered into the world. Even in this world, only the entry of one, who is limited (in size), is (accepted as) reasonable.

[548]

So far, there was a statement of the *prima facie* view in its extensive form, viz. with counter-questions and answers to them.

¹It means: in the passage under consideration.

स्रष्टृप्रवेष्ट्रोरेकत्वान्नैवमप्युपपद्यते ।
सृष्ट्वा जगत्सृष्टिमनु तदेव प्राविशच्छ्रुतेः ॥५४९॥

[Verses 549-559 present the Siddhāntin's answer.]

(The Siddhāntin answers:) This (conclusion) is not reasonable,

since there is oneness¹ of the creator and the entrant; (this is clear) from the statement of the Śruti 'having created the world, it later entered into that very creation.' [549]

¹That is, identity as one existential entity.

पर एव प्रविष्टश्चेत्प्रविष्टानामनेकतः ।
तदनन्यत्वतः प्रापन्महेशस्याप्यनेकता ॥५५०॥

(There arises a doubt:) If it be thus accepted that the highest Ātman has entered (into this world), then on account of the multiplicity of the substances, which are entered into, and on account of the entrant's being not different (from them), there follows manifoldness even of the great Lord. [550]

नैष दोषो यतो नेह भेदेनेशस्य संगतिः ।
आत्मत्वरूपतस्तस्य ह्यात्मा चाभेदसंगतेः ॥५५१॥

(The Siddhāntin answers:) This is not a fault, because there is no any association of the Lord with any differentiated (thing) on account of its¹ being (only) the Ātman. It is the inner self of that² on account of its¹ association with (the Ātman) as non-different (from it). [551]

¹It refers to 'differentiated thing'.

²Namely, the differentiated thing.

अनन्यत्वं प्रविष्टैः स्यान्नानात्वमिति दुर्भणम् ।
बहूनामेकयोगित्वादेकत्वं किं न चोद्यते ॥५५२॥

It is (lit. would be) difficult to say that here would be non-difference of the Ātman with those that are entered into and has also difference (from the same). (Our question is:) Why is it not said (by you) that there is oneness of those many which are united with only one (the Ātman) and, (their consequent) oneness (with it)? [552]

न च नानात्वकृल्लोके संयोगो ऽभेदकारणात् ।

तथागमविरोधश्च बहुत्वं चेत्परात्मनः ॥५५३॥

And, in the world, conjunction does not bring about maniness, since it is (only) the cause of non-difference (of the conjoined) and also there will be contradiction to the Śruti if maniness of the highest Ātman (were accepted.) [553]

एको देवो बहुधेतिमन्त्रब्राह्मणयुक्तिः ।

वियद्वेदकलस्तस्मादीश्वरो ऽभ्युपगम्यताम् ॥५५४॥

Therefore, from the argument in Mantra and Brāhmaṇa such as *eko devo bahudhā ...*¹, let the Lord be understood as alone (i.e. one without a second) like the sky. [554]

¹ *Taittirīya Āraṇyaka* 3.14.1.

आस्तां तावत्प्रवेशो ऽयं न्याय्यो ऽन्याय्यो यथा तथा ।

दोषान्तरमिह प्राप्तं तत्तावत्प्रविचार्यते ॥५५५॥

[Verses 555-559 discuss some counterargument.]

(One might yet say:) Well, let this entry (of the highest Ātman into many) be left aside, be it reasonable or unreasonable; there is (nevertheless) another fault, that is now considered.¹

[555]

¹That is, it is to be considered now.

संसारित्वात्प्रविष्टानां परस्य तदभेदतः ।

संसारित्वं प्रसक्तं चेन्न क्षुदाद्यत्ययश्रुतेः ॥५५६॥

On account of the transmigratoriness of those (objects) which are entered into and the non-distinction of the highest from them, there becomes contingent transmigratoriness (in the case of the highest Ātman also). (The Siddhāntin's answer is:) If (this is said), then (we have) to reject (this argument) on the (strength of) the Śruti about the cessation of hunger etc.¹

[556]

¹Cf. BU 3.5.1: *aśanāyāpipāse śokam moham jarām mṛtyum atyeti.*

सखिदुःखित्वमोहादिदर्शनान्नेति चेन्मतम् ।
नैवं वेदान्तवाक्येषु न लिप्यत इति श्रुतेः ॥५५७॥

If it is argued (against this) that (the highest Ātman is transmigratory) on account of the sight of the happy and miserable conditions and ignorance etc. (of it); (it has to be told that) this is not so in the Vedānta sentences, (as follows) from the Śruti statement *na lipyate ...*¹ [557]

¹*Kāthopanīṣad* 5.11.

ननु प्रत्यक्षमानेन साक्षाद्दुःखादिदर्शने ।
प्रत्यक्षबाधसिद्ध्यर्थं न न्याय्योक्तिपरंपरा ॥५५८॥

But, indeed, (it may be argued) the experience of misery etc. is patent to one by means of direct perception (and) therefore, it is not reasonable to quote Śruti passages for denying what is directly perceptible.¹ [558]

¹The argument is based on contradiction between Pratyakṣa and Śruti: What is proved by Pratyakṣa cannot (or, should not) be denied on the ground of Śruti.

नोपाध्याश्रयजनितविशेषविषयत्वतः ।
प्रत्यक्षाभासतासिद्धेस्तेन नोक्तिविरोधिता ॥५५९॥

(The Siddhāntin's answer is:) (this is) not so, because the character of (that) direct perception gets established by being some appearance of specific object (i.e. product) (which has) resorted to (some) limiting adjuncts (of the highest Ātman), and, therefore, there is not any opposition of the Śruti. [559]

दुःखी यदि भवेदात्मा कः साक्षी दुःखिनो भवेत् ।
दुःखिनः साक्षितायुक्ता साक्षिणो दुःखिता तथा ॥५६०॥

[Verse 560-572 argue that sentience cannot have misery.]

If the Ātman were miserable¹, (it has to be said as to) who would become a witness of the miserable. (Also) the character of a witness is not reasonable in the case of the one who is miserable and the character of being miserable, in the case of a witness. [560]

¹That is, an experiencer of grief.

नर्ते स्याद्विक्रियां दुःखी साक्षिता का विकारिणः ।
धीविक्रियासहस्राणां साक्ष्यतो ऽहमविक्रियः ॥५६१॥

Without any modification (in one), one cannot be miserable; how can there be then the character of a witness on the part of the one who undergoes modification? Therefore, the non-modifying 'I' is the witness of thousands of modifications of the intellect. [561]

सुखदुःखादिसंबद्धं यथा दण्डेन दण्डिनम् ।
राधको वीक्षते बुद्धिं साक्षी तद्वदसंहतः ॥५६२॥

A pursuer of knowledge sees intellect as associated with happiness, misery etc., (himself) remaining unaffected (thereby)¹ like an onlooker sees (another as) a holder of a staff by his holding a staff (himself not associated with him or not being a holder of it). So is the witness (of misery etc.) unassociated with it. [562]

¹It literally means: unassociated with it. This word qualifies all the three: the pursuer of knowledge, an onlooker and the witness (i.e. Ātman).

शरीरेन्द्रियसंघात आत्मत्वेन गतां धियम् ।
नित्यात्मज्योतिषा दीप्तां विशिषन्ति सुखादयः ॥५६३॥

Happiness etc. modify (lit. distinguish) intellect which has

attained the character of the Ātman¹ in the collection of body and sense-organs and which has been illuminated by the eternal lustre of the Ātman.² [563]

¹That is, the character of the knower.

²Read SP: *ātmacaitanyavyāptabuddhidharmatvād ātmadharmatva-prasiddhir ity arthaḥ*.

पराञ्चयेव तु सर्वाणि प्रत्यक्षादीनि नात्मनि ।
प्रतीचयेव प्रवृत्तं तत्सदसीति वचो ऽञ्जसा ॥५६४॥

All these means of knowledge, viz. direct perception etc., exist outside — they do not abide in the Ātman. Therefore, the statement 'You are that *sat*.' which is applicable only in the case of the inner self (is thus understood) in a smooth manner.

[564]

विज्ञातारमरे केन न दृष्टेरिति च स्फुटम् ।
अन्यदेवेति वाक्याच्च प्रत्यक्षं नात्मगोचरम् ॥५६५॥

Also from the Śruti (statements) *vijñātāram are kena ...*¹ and *na dr̥ṣṭeḥ ...*² and also from the statement *anyad eva ...*³ it is clear that direct perception does not have Ātman as its object. [565]

¹BU 2.4.14; 4.5.15.

²BU 3.4.2.

³*Kenopanīṣad* 1.4.

किंतु बुद्ध्याद्युपाधौ तदात्मच्छायैककर्मकम् ।
तथा दुःख्यहमित्यादौ प्रत्यक्षमुपचारतः ॥५६६॥

But (direct perception) has for its object only what are the reflections of the Ātman in its limiting adjuncts such as intellect and, therefore, in the experiences such as 'I am unhappy.', direct perception is (merely) metaphorical.¹ [566]

¹That is, not true.

सामानाधिकरण्यस्य तथैवेहोपचारतः ।

अयं दुःख्यहमस्मीति विषयेण तदीक्षणात् ॥५६७॥

So also, because of the secondary usage here regarding the existence in the same substratum,¹ the phrases 'Here, I am unhappy.' etc. (arise) from seeing some object by that.² [567]

¹I am a Brāhmaṇa, I am fat, etc. show such superimposition of (or oneness between) a body and the Ātman.

²Namely, the Ātman.

नासिकाग्रे महद्दुःखं पादाङ्गुष्ठाग्र एव च ।

देहावयवदुःखादेः प्रात्यक्ष्यान्नात्मदुःखिता ॥५६८॥

There is great pain only at the tip of the nose, and also at the tip of the toe of the foot. (Thus) on account of the direct perceptibility of pain etc. of the limb of a body, there is no condition of misery on the part of the Ātman. [568]

प्रतीचि चेद्भवेद्दुःखं व्यापि चैतन्यवद्भवेत् ।

द्रष्टृस्थत्वान्न कर्मस्थं द्रष्ट्रा दृश्येत बोधवत् ॥५६९॥

If pain were to be on the part of the inner self, it (also) would have been, like sentience, pervading (all the body). On account of its abiding in the agent of seeing it, it would not be seen (viz. experienced) by the seer as what is abiding in some object (of that seeing)¹, even like knowledge (that occurs to one and cannot be seen by the one). [569]

¹The object has a limited dimension. Therefore, misery affecting it, i.e. modifying it, can be witnessed by the witness. If, then, misery is said to have affected the witness, the Ātman, who could see it? and how?, for, it also has become all-pervading like the Ātman?

स्वात्मनस्तवेव कामाय ह्यात्मार्थत्वश्रुतेर्भवेत् ।

आत्मैकविषयं सौख्यमिति चेन्मन्यसे न हि ॥५७०॥

'If, on the basis of the Śruti *ātmanas tu kāmāya* ...¹ which explains the nature of the Ātman, you think that happiness would become the only object for the Ātman,' (we have to say:) 'No, not indeed (so)!' [570]

¹BU 2.4.5; 4.5.6. *sva* is prefixed to *ātmanah* with a view to stress the idea of the inner self (of one's own).

यत्र वा अन्यदित्युक्तेरविद्याविषयं तु तत् ।
दुःखित्वं नात्मनि ज्ञेयं यत्र त्वस्येति निहुते ॥५७१॥

Indeed, on the basis of the Śruti *yatra vā anyad* ...,¹ that is only the object of ignorance. The character of being miserable should not be held in the case of the Ātman, since there is a denial (of the misery etc. by the Śruti) *yatra tv asya* ...² [571]

¹BU 4.3.31.

²BU 4.5.15.

मम तावदिदं बुद्धौ भवद्भ्यो यन्न रोचते ।
प्रत्यक्प्रवणया दृष्ट्या संसारो नात्मनीक्ष्यते ॥५७२॥

This is, in my (opinion), what obtains in intellect and what you do not like (i.e. accept). Yet the fact is: Transmigratory existence is not seen in the case of the Ātman by the sight (viz. knowledge/acceptance) of (it as) the inner self. [572]

This purports to say that the Ātman is not connected with any sorrow for that is so directly perceived/experienced by the knower of the Ātman.

Verses 573-596 discuss how it is not proper to hold, on the basis of logic that the Ātman is transmigratory.

मतं तार्किकसमयविरोधश्चेत्प्रसज्यते ।
इच्छाद्वेषादिमानात्मा यतस्तैरभ्युपेयते ॥५७३॥

If (it be) held that there would be contingent the opposition to the on-all-hands-agreed opinion among logicians, since they also accept that the Ātman possesses desire, hatred etc., [573]

नैवं निःशेषतर्कैश्चेदविरोधो ऽभ्युपेयते ।
सिद्धान्तो दुःस्थितो ऽत्यर्थं तदा वः प्राप्नुयाद्ध्रुवम् ॥५७४॥

(then, we answer that) this is not so. Your conclusion would indeed be in an extremely precarious condition, if it were accepted that it should be in non-disagreement with all the modes of reasoning.¹ [574]

¹This argument refers to the mutual opposition among those thinkers who base their opinions on logical reasoning. It is noticed that the Jaina logicians do not agree with the Naiyāyikas. It is pointed out that the logicians themselves are not at one. Thus, the possible opposition to the logicians cannot be a valid ground for opposition to the Siddhāntin's view.

न च तार्किकयुक्त्यापि प्रतीचीहासुखात्मता ।
यतो ऽवगम्यते तस्मान्निर्भीतिः सुखमास्यताम् ॥५७५॥

And also, since even by the (logic-based) argument of the logicians it cannot be accepted that there is in the case of the inner self any unhappiness, therefore may you stay happily, devoid of any fear.¹ [575]

¹Need for agreement with all logicians is not thus any weighty argument.

पराक्प्रत्ययगम्येन दुःखेन स्याद्विशेषणम् ।
न प्रत्यङ्मात्ररूपस्य विरोधादुष्णशीतवत् ॥५७६॥

By the misery experienced by what is outside (the inner self)¹ there would not be any modification of what has only the inner self as its form; (for this happening so) would be like opposition existing between hot and cold in but one thing.²

[576]

¹Namely, transmigratory body etc.

²As both the properties of hot and cold cannot belong to something at one and the same time, being immutable and transmigratory on the part of the inner self cannot be possible.

प्रत्यक्षाविषयत्वं च प्रतीचः प्रागवादिषम् ।

तच्छायापाश्रयाद्यस्मात्प्रत्यक्षस्यापि मानता ॥५७७॥

And I have already¹ stated before that the inner self has not the nature of an object of direct perception, since even direct perception has the character of a valid means of knowing on account of its resorting to the apparent reflection of that (viz. the inner self).

[577]

¹Cf. SV 150.

यो यतो लिप्सते नासावकिञ्चित्को ह्यनर्थिने ।

भिक्षां दातुमलं तद्वज्ज्ञेयं स्वार्थपरार्थयोः ॥५७८॥

Since he, who wishes to get from whomsoever (he comes across) that has nothing, would indeed not be able to give any alms to the one who does need any thing, in the same way, should be known (the relation) between one's own self and the highest (Ātman).¹

[578]

¹One's own self refers to an individual possessed of a body, sense-organs etc. These owe their origin to the Ātman, whose nature cannot be grasped by them or the usual means of knowing. Cf. *na hi citprakāśyam jaḍam pratyakṣam tatprakāśakam ity arthah* [tat = Ātman] (SP); cf. *svātmanah* in verse 570 above.

प्रत्यक्षमन्तरेणापि भवेद्दुःखविशेषणः ।

वियच्छब्दगुणं यद्वत्प्रत्यक्चेन्नैवमिष्यते ॥५७९॥

एकमानानधिगतेर्न सुखग्राहिणात्मनः ।

नित्यानुमितरूपस्य गृहीतिः स्यान्मनागपि ॥५८०॥

If it be argued that the inner self would become modified

by misery even without being an object of direct perception just as the sky (can become) possessed of sound as its property, it is not so accepted (lit. desired) by us. [579]

It is not possible for a person who holds that happiness belongs to the Ātman whose nature is (in his view) ever inferred to grasp even a little (of the nature of) it since he has not accepted the one means of knowing it (viz. the Śruti). [580]

¹This is an argument against the Sāṃkhyas. They infer the existence of the Ātman and hold it to be ever happy. They do not accept the Śruti as the authoritative means to getting to know about the Ātman.

एकत्वादात्मनश्चैवं विषयीकरणे सति ।
असंभवात्तदन्यस्य द्रष्टृभावः प्रसज्यते ॥५८१॥

Also, owing to the uniqueness of the Ātman, if one were thus to make it an object of knowledge there would be contingent the absence of the seer (of it) owing to the absence of anyone else than it. [581]

¹This is an argument against the Vaiśeṣikas for whom the Ātman is an object of knowing by the usual means of knowing. Their view suffers the fault that the knower and the object to be known are but one entity. Argument against the Vaiśeṣikas continues in the next two and half verses.

विषयित्वमथैकस्य विषयत्वं च दीपवत् ।
मतं चेन्नैतदेवं स्याद्युगपद्भूत्यसंभवात् ॥५८२॥

If it be held that only one individual becomes the subject as well as the object like a lamp, this also would not be so on account of the impossibility of the simultaneous occurrence of both. [582]

न व्यनक्ति प्रदीपो ऽपि स्वतो भास्वरूपतः ।
विषयत्वाच्च पुंबुद्धेर्न दीपस्योभयात्मता ॥५८३॥

The lamp also does not reveal (itself) as an object, though it is by its own nature bright¹ and also because it is an object of man's intellect; thus, there does not belong to the lamp the nature of both (the subject and the object). [583]

¹That is, illuminating.

प्रतीचश्च निरंशत्वान्न दीपेन सधर्मता ।
ग्राह्यग्राहकतैतेन विज्ञानस्याप्यपोदिता ॥५८४॥

And the inner self does not have (any) similarity with a lamp because it (=the inner self) is devoid of any parts. Hereby is explained away the character of Vijñāna also, viz. it can be both the object and also the subject (of knowledge). [584]

¹The second line sets aside the Vijñānavāda of the Buddhists.

तथा गुणगुणित्वेन ह्यक्षलिङ्गाधिगम्ययोः ।
दुःखात्मनौर्मिथोयोगे नानुमानप्रमाणता ॥५८५॥

So also in the case of the conjunction of misery and the Ātman who are to be grasped by the sense-organs and (by their) characteristics there is no authoritativeness of inference for understanding them as a property and its substratum. [585]

¹Cf. *samyoga* in verses 587-588 below.

नित्यमक्षजगम्यत्वाद्दुःखस्योत्पलनीलवत् ।
रूपाद्यक्षजगम्यैश्च सामानाधिकरण्यतः ॥५८६॥

And since misery is ever experienced through perception by sense-organs, like the blue of a lotus (it is not a property of the Ātman) for (this is) on account of its being in the same substratum along with (other objects which are) perceptible by sense-organs such as form etc. [586]

This points out the fault in holding the Ātman as perceptible like misery which, like form, burning etc., is noticeable only in

a body. This entails that the Ātman does not have a body as its necessary substratum.

दुःखस्यात्मनि संयोगजत्वाभ्युपगमे ऽपि च ।
सभागविक्रियानित्यत्वादिदोषः प्रसज्यते ॥५८७॥

And even if it is accepted that misery can affect the Ātman as it is produced from its conjunction (with *manas* etc.),¹ then also would necessarily follow the fault that it is made up of parts, it is subject to modification and it is non-eternal etc.,
[587]

This is the view of the Vaiśeṣikas.

¹Supply: of an individual self.

नाविकृत्य हि संयोगि गुणो द्रव्यं कदाचन ।
उपयन्नपयन्वेह लोके दृष्टः प्रमाणतः ॥५८८॥

because, in this world, there is not seen (i.e. known) by any means of knowing a property approach or separate from a substance, with which it is united, without having modified it.
[588]

This controverts the Mīmāṃsakas' (i.e. Bhāṭṭas') view.

न चानवयवं वस्तु क्वचिदप्युपलभ्यते ।
विक्रियामाप्नुवन्नापि नित्यं द्रव्यसिगुणाश्रयम् ॥५८९॥

Further, there does not obtain anywhere a thing which is not made up of parts (and) which undergoes modification also; so also, (there is no) eternal thing that is the basis of perishing properties.
[589]

The views of Bhāṭṭas and the Vaiśeṣikas are controverted.

आकाशस्य च नित्यत्वं नेष्टमागमवादिभिः ।
तत्कार्यश्रवणान्नापि दृष्टान्तो ऽस्ति ततो ऽपरः ॥५९०॥

And those, who hold the authority of the Āgamas, do not accept that the sky is eternal and also there is hearing about its being product.¹ And there is not any other example.² [590]

¹The followers of the Vedānta do not hold, like the Vaiśeṣikas, that Ākāśa is eternal, because there are the Śruti statements like *ātmana ākāśa sambhūtaḥ*.

²This points to that the *paramāṇus* (which are held by the Vaiśeṣikas as eternal) are also products and, therefore, not eternal; this is so because *paramāṇus* are to have belonged to (i.e. they are the products of) some earlier moments of time (before any element came to exist) and time is according to the Vedāntins not eternal — cf. *sarve nimeṣā jajñire*.

विक्रियावदपि द्रव्यं तत्प्रत्ययसमन्वयात् ।
नित्यमेवेति चेन्नैवमन्यथात्वातिरेकतः ॥५९१॥

If it were argued that any substance which undergoes modifications is permanent because there is continued awareness of that, (it has to be observed that) it is not so, because there are then its modifications (lit. changes) in addition (to itself). [591]

This is the refutation of view of the Pariṇāmavādins (viz. the Sāṃkhyas).

अनित्यत्वम् क्वचिन्नास्ति यथान्येषां प्रवादिनाम् ।
सन्नेवाभावरूपो ऽपि त्विष्टः शून्यत्ववादिनाम् ॥५९२॥

(Also), as in the opinion of other disputants, viz. the Mādhyamikas, there is nowhere (what is called) non-eternity.¹ It is, nevertheless, desired by the Śūnyavādins as (that what is of the nature of absence² is an existent (only). [592]

This is the view of the Mādhyamikas.

¹This stands for Atyantābhāva.

²The argument is: If it is established by some means of knowing, as a pitcher is, then it ought to be existent, though not

actually present.

संवित्प्रमाणसत्त्वेन विना वस्तु न लौकिकम् ।
प्रमाणवादिभिर्दृष्टमनन्यायत्तसिद्धिकम् ॥५९३॥

Those who hold the validity of the means of knowing have not seen any worldly thing unless it has the characteristics of being known by sentience, (for) that is not established by (its) dependence on any other (means of knowing). [593]

That Atyantābhāva 'absolute non-existence' which reveals itself is thus refuted.

भागान्यथात्वाद्द्रव्यस्य नानित्यत्वं क्वचिन्मितम् ।
निर्भागत्वात्प्रतीचस्तत्कया युक्त्योपपद्यते ॥५९४॥

Impermanence is not understood anywhere (i.e. in any thing) unless its parts have not undergone a change (or modification). (And) since (the inner self is) devoid of any parts, by what reason could it be understandable in respect of the inner self? [594]

अथ सावयवत्वे ऽपि नित्यं स्यात्कुलिशादिवत् ।
संयोगपूर्वतो नैवं तद्विभागावसानतः ॥५९५॥

Now (one might argue:) Even while a thing is made up of parts, it can be permanent, like the *vajra* 'thunderbolt'¹, since it² is preceded by conjunction. (To that we say:) This is not so, for it ends into division (of the parts again).³ [595]

This is an argument of the Jainas who hold that the Ātman changes its shape in accordance with the body it occupies. Also there is its refutaion.

¹It is made up of parts and is yet held as having permanent existence. Translation, viz. 'thunderbolt', is merely convenient!

²Namely, its being made up of parts.

³This means: The example of *vajra* for proving the permanence of the Ātman, which undergoes modification in size, is not proper.

As counterexample one could point to a pitcher.

वज्रादेरविभागश्चेत्तस्यासंयोगपूर्वतः ।

नानुमेयत्वतो ऽस्त्येव तस्यावयवसंयुतिः ॥५९६॥

If (it be argued that) in the case of *vajra* etc. there would not be division (into parts again) since that *vajra* (having parts) is not preceded by any conjunction (of the parts); this also is not so, on account of the inferability (of that conjunction) — there certainly is the conjunction of its parts.¹ [596]

¹The argument is: A pitcher, which is made up of parts and is therefore like *vajra*, has first its parts assembled when it came into existence. This is clarified in the next verse.

न हि सावयवं किञ्चिदृते ऽवयवसंयुतिम् ।

घटादिवद्यतो दृष्टमतो ऽदुःखित्वमात्मनः ॥५९७॥

Indeed, there is not seen any such thing as is made up of parts and has come to exist without its parts being brought together (lit. conjoined) as (for example there is seen) a pitcher (that is produced only by joining of parts). Therefore, the Ātman does not have misery. [597]

निर्दुःखित्वे परस्येष्टे तदन्यस्याप्यभावतः ।

कस्य दुःखनिवृत्त्यर्थं प्रारब्धोपनिषत्त्वया ॥५९८॥

[Verses 598-604 establish the *raison d'être* of the Upaniṣad and refute any possible notion of transmigratory character of the Ātman.]

(A doubt is raised:) When you have accepted (lit. decided) that the state of the highest Ātman consists in being free from misery (and also) owing to the absence of anything else than that (= Ātman), then (the question is:) Why have you begun (the discussion of) this Upaniṣad for effecting cessation of misery? and whose? [598]

प्रत्यगज्ञानहेतूत्थदुःखित्वमतिविभ्रम-
ध्वंसमात्रस्य सिद्ध्यर्थमारब्धोपनिषन्मया ॥५९९॥

(The answer is:) I have begun (the discussion of) the Upaniṣad for establishing that there is only destruction of the error concerning the (worldly) awareness of the miserable state (of the Ātman) arising from ignorance about (the nature of) the inner self. [599]

नवसंख्येयमात्रेक्षी दशमो विभ्रमाद्यथा ।
न वेत्ति दशमो ऽस्मीति स्वीक्षमाणो ऽपि तान्नव ॥६००॥
निःशेषानात्मदृक्तद्वदनिर्ज्ञातात्मतत्त्वकः ।
न वेत्त्यैकात्म्यमस्मीति वीक्षमाणो ऽप्यनात्मनः ॥६०१॥
दशमो ऽस्मीतिवाक्योत्थसम्यग्ज्ञानानलार्चिषा ।
प्लुष्ट्वात्मदशमाज्ञानं दशमो ऽस्मीति वीक्षते ॥६०२॥
यथा तत्त्वमसीत्यादिवाक्योत्थज्ञानवह्निना ।
प्लुष्ट्वेहात्मतमस्तज्जं तथैकात्म्यं प्रपद्यते ॥६०३॥

(This is) like a person who sees that the number of objects (before him) is (but) nine, though he is the tenth individual (and yet) and does not know 'I am the tenth.', owing to (his) error, even though he is well seeing those nine (objects), [600] in the same way, the person, who has not known the truth regarding the Self and sees (i.e. accepts) the entire (world as full of) non-Ātman(s) (and thus) even while seeing (i.e. experiencing) the non-Ātman (objects) does not know the uniqueness (of the Ātman) in the form 'I am (that Ātman).'; [601]

(and) having burnt the ignorance about himself being the tenth one by means of the flame of fire in the form of the true knowledge which arises from the sentence, 'I am the tenth.', he sees (i.e. understands) 'I am the tenth.', [602]

as when one has burnt the ignorance about one's own self and the effects thereof by means of the fire, arising from the (Śruti) sentence 'That you are.' etc., one apprehends the uniqueness of the Ātman. [603]

प्रत्यगज्ञानहेतूत्थशास्त्राचार्यादिसाधनः ।
तद्विरुद्धमथैकात्म्यं प्रत्यपद्यत मायया ॥६०४॥

One, who has such means as Śāstra and teacher etc. which have arisen out of the ignorance about (the true nature of) the individual self, becomes aware by means of Māyā (i.e. by false means)¹ the uniqueness of the Ātman which is opposed to (all) that. [604]

¹That is, *śāstrāder utpannā brahmadhī* (SP, NKL).

शास्त्राचार्यादयो यद्वन्मोहोत्थत्वान्न वस्तुतः ।
प्रवेशो ऽप्यस्य तादृक्स्यादैकात्म्यप्रतिपत्तये ॥६०५॥

As (the notions of) Śāstra, teacher etc. have arisen out of ignorance and (are not there) as a matter the Reality, so also is the entry of this (Self into its product, ignorance, but only) for the sake of one's acquiring the knowledge of the uniqueness of the Ātman. [605]

This clarifies the purpose of the Śruti regarding the really false entry of the Self into its so-called product. Also it justifies verse 549 above.

व्याकृताव्याकृतावस्थे जगतो ऽस्य स्वभावतः ।
अनूद्य लोकतो दृष्टे तद्याथात्म्यं प्रबोध्यते ॥६०६॥

(Only) after the two states of this universe, viz. the manifest and the unmanifest, which exist by their nature, are stated and after (the two) are seen (i.e. understood) the knowledge of the true nature of the same is acquired (by the people).¹ [606]

¹This is, on the basis of the popularly known example of a pitcher.

यत एवमतो ऽपास्तरागद्वेषादिधीमलः ।

उदारधिषणः प्राह भाष्यकृन्न्यायवद्वचः ॥६०७॥

As this is so, the Bhāṣyakāra, who has cast off all dirt of attachment, hatred etc. off his intellect and who is very intelligent, has spoken words which are (supported) with proper reason. [607]

अप्रविष्टस्वभावस्य दिग्देशाद्यनभिप्लुतेः ।
प्रवेशो व्याकृते क्लृप्तो जलपात्रार्कबिम्बवत् ॥६०८॥

Like (the entry of) the orb of the sun into a pot of water, the entry into the manifest (universe) of (the Ātman) which is of the nature of one that has (really) not entered and which is not covered by quarters and regions etc., is also imaginary. [608]

This has reference to BUB: *jalasūryādipratibimbavad ātmapra-
veśaś ca pratibimbavad vyākṛte kārya upalabhyatvam.*

बिम्बात्मना प्रवेशस्य ननु दूषणमीरितम् ।
विप्रकृष्ट्याद्यभावोक्त्या भूयः कस्मात्स आश्रितः ॥६०९॥

[Verses 609-622 justify the statement about the entry of the Ātman into the products, having the form of its reflection.]

(It might be argued:) You have found fault with (the statement) that there is the entry (of the Ātman into its products) in the form of a reflection, stating that there is absence of its being far from other objects etc.¹; then, why do you resort to the notion of the reflection again? [609]

¹This has a basis in the earlier verses 540-543 which occur in the refutation of the objector's view.

संभवाद्विप्रकृष्ट्यादेरदुष्टो दूषितः पुरा ।
कथं तदिति चेदत्र युक्तिलेशो मिधीयते ॥६१०॥

(The answer is:) On the earlier occasion, the faultless (Ātman)

was given a blame, because of the possibility of being in the distance etc. Now, if you ask, 'How could that be?', then here is stated some reason in brief.¹ [610]

¹This refers to BUB: *ātmapraveśaś ca pratibimbavad vyākṛte kārya upalabhyatvam.*

निर्धूताशेषनानात्वतद्धेतुरविभागवान् ।
 अनन्यसाक्षिकः प्रत्यङ्ङासीन्नामादिजन्मतः ॥६११॥
 द्रष्टादिरूपतस्तावद्व्यतिरेको ऽभवत्पुरा ।
 नामादिजन्मनि द्रष्टेत्यादिरूपान्वयो ऽप्यभूत् ॥६१२॥

The inner self was that which was wholly devoid of (lit. had shaken off) the entire variety (of worldly objects) and all its causes¹, which was not possessed of parts, which had none else as the seer (of itself) and which existed before (the production of) name etc. [611]

Formerly (i.e. earlier), there was absence of the distinct forms of it such as the seer etc. and, when name etc. were produced there also occurred its association with the forms such as the seer etc. [612]

These two verses establish the object-reflection relation between the Self and the inner self. The Self and the inner self are really non-distinct. But, the Self is called the inner self owing to its association with body, sense-organs, objects etc. In the first line of verse 612 the Self is meant, and in the second, the inner self.

¹According to SP, it means: effects.

अप्पात्रत्थापिताद्धानोर्दिवि भानुर्यथेक्ष्यते ।
 सुषुप्तस्थस्तथा धीस्थात्कर्तृभोक्तृत्वलक्षणात् ॥६१३॥

As the sun is taken (i.e. understood) to be existent in the sky (as distinct from) the sun which has appeared from a pot of water, so also is the Ātman residing in the state of deep sleep taken to be existent (as distinct) from that Ātman residing in the intellect etc. by means of the characteristics of the agent and the enjoyer etc. [613]

This illustration brings out the real non-difference between the Self and the inner self; the apparent difference is owing to the difference in the states (*sthānabheda*).

द्रष्टृश्रोत्रादिरूपश्च यश्च द्रष्टृद्रादिसाक्ष्यपि ।
बुद्धितत्कारणोपाधी क्षेत्रज्ञेश्वरसंज्ञकौ ॥६१४॥

And he who is of the nature of the seer, the listener etc. and the one who sees the seer etc. are having (as their) limiting adjuncts such as the intellect and its cause, are called *kṣetrajña* 'the knower of the field' and *īśvara* 'the Lord'. [614]

स्वप्ननिद्रायुतावाद्यौ प्राज्ञस्त्वस्वप्ननिद्रया ।
इत्यादिस्थानभेदो ऽपि वेदान्तोक्तौ विनिश्चितः ॥६१५॥

And this distinction of their states (in the so-called worldly existence) is also decided¹ in the Vedāntic sentence:² The first two³ are associated with dream and deep sleep and the (one called) *Prājña*, with dreamless sleep. [615]

¹That is, decisively stated.

²This is *Gauḍapāḍakārikā* 1.14ab.

³This refers to the two names of the inner self, viz. *Vaiśvānara* and *Taijasa*.

जिघ्राणीममहं गन्धमिति यो वेत्यविक्रियः ।
तद्भावाभावसाक्ष्यात्मा हेतच्च श्रुतिमस्तके ॥६१६॥

The *Ātman* (alone) without undergoing any modification is the witness of the presence and the absence of the one who knows, 'I am experiencing this smell.' — and this occurs at the head (prominent place) of the *Śruti*. [616]

This is directed against the *Mīmāṃsakas* who do not accept that there is the Self beyond an individual self (NKL).

अर्थान्तरनिरासार्थं दूषणं चोदितं पुरा ।

तदभावाददुष्टत्वात्प्रवेशो मुखबिम्बवत् ॥६१७॥

We had earlier given blame to (the faultless Ātman) for the purpose of setting aside (the notion of) any object other (than it as existent). (The fact is:) On account of the absence of that¹ (and therefore) on account of its not having any blemish (in reality), the entry (of the Ātman into the manifest) is like the reflection of a face (in a mirror). [617]

¹Namely, any other object.

दर्पणाभिहता दृष्टिः पर्यावृत्य स्वमाननम् ।
व्याप्नुवन्त्यविभागेन भ्रान्ति नो जनयेद्यथा ॥६१८॥

(This is like) our sight, obstructed by a mirror, would turn back to our own face and, occupying (that, viz. the face) as not being apart from it, might cause some misconception (=wrong apprehension). [618]

इहापि कारणोपाधिः केवलो ऽप्यविवेकतः ।
बुद्ध्यदिकार्यगैर्धर्मैः प्रतिबिम्बवदीक्ष्यते ॥६१९॥

Here (in this example) also, the only (i.e. unique) Ātman, being delimited by the notion of its being the cause, is owing to the absence of discrimination noticed (i.e. grasped) like a reflection (of some object) on account of its properties which belong to its (so-called) effects such as intellect etc. [619]

यथोक्तार्थप्रसिद्ध्यर्थं वचांसि सुबहून्त्यपि ।
त्रय्यन्तेषूपपद्यन्ते तत्सृष्ट्वेत्यादिकानि च ॥६२०॥

And, there are noticed quite a number of statements in the Vedānta texts for establishing the argument which we had adduced, viz. *tat sṛṣṭvā* ... and others. [620]

दिग्देशकालशून्यस्य प्रवेशो बिलसर्पवत् ।
न त्वाञ्जसः परस्यास्ति तेनाविद्याप्रकल्पितः ॥६२१॥

But (in reality) the entry of the highest (Ātman), who is without¹ space, region and time, is like that of a serpent into a hole is not reasonable and therefore it is produced by ignorance. [621]

¹That is, not associated with any such concepts as space etc.

अग्निः सूर्यो मरुद्यद्वत्प्रविष्टो भुवनं तथा ।
अप्रविष्टस्वभावो ऽपि कार्यमात्माविशज्जगत् ॥६२२॥

As the fire, the sun and the wind have entered into the universe,¹ so also has the Ātman that, does not have the nature of one who has entered (the world), entered into it (which is) its effect. [622]

¹Cf. *Kāthopaniṣad* 5.9-11 which Śaṅkara has quoted in BUB.

प्रत्यग्याथात्म्यदृक्सिद्धिहेतुत्वाच्च भवेदिदम् ।
जगज्जनिस्थितिध्वंसप्रवेशानां प्रयोजनम् ॥६२३॥

And, on account of being the cause of acquiring the knowledge of the true nature of the inner self, this would indeed be the purpose of origin, sustenance and destruction of the world and the entry (into it by the Ātman). [623]

तद्वृष्टेः पुरुषार्थत्वश्रवणादसकृच्छ्रुतौ ।
ब्रह्म वेदेत्येवमादौ क्लृप्ताः सृष्ट्यादयस्ततः ॥६२४॥

[Verses 624-633 point out that the Vedāntic sentences convey the imaginary character of the creation etc. of the world.]

Since we have heard in the Śruti, time and again,¹ (that) the seeing of that (viz. the true nature of the Ātman²) is an end of human endeavour, therefore (the statements about) the creation etc. are imagined³ in such sentences as *brahma veda* ... [624]

¹It literally means ...

²Namely, its uniqueness.

³Or, thought of.

युक्त्या नैवोपपद्यन्ते जगत्सृष्ट्यादयो यतः ।
प्रत्यगज्ञानमात्रोत्था जगत्सृष्ट्यादयस्ततः ॥६२५॥

Because the creation etc. of the world are not justified by (any) reason, therefore, the creation etc. (must be declared to) have arisen from ignorance about (the true nature of) the inner self. [625]

नासतो जन्मना योगः सतः सत्त्वान्न चेष्ट्यते ।
कूटस्थे विक्रिया नास्ति तस्मादज्ञानतो जनिः ॥६२६॥

That which is non-existent has no birth (and) it is not accepted (as born) from an existent because of its (i.e. the latter's) character of an existent. There is no modification (whatever) in the immutable. Therefore, (the notion of) the creation arises from ignorance. [626]

तथा रूपं रूपमिति मन्त्रवर्णो ऽपि चात्मनः ।
याथात्म्यदर्शनायैव सृष्ट्यादि प्रत्यपीपदत् ॥६२७॥

So also does the text of the Śruti *rūpaṃ rūpaṃ ...*¹ state the creation etc. (of the world) for showing the true nature of the Ātman. [627]

¹BU 4.5.19.

व्याप्तिः प्रवेशशब्देन भण्यते कारणात्मनः ।
बुद्ध्यादिकार्यविषया व्यापिव्याप्यत्वमेतयोः ॥६२८॥

Pervasion (of the world) by the Ātman (which is understood to be) its cause is expressed by the word *praveśa*; and (this pervasion) pertains to intellect etc. as its product and (there is between these two, viz. the Ātman and the intellect etc.) the relation of what pervades and what is pervaded. [628]

This specifies that even the imaginary pervasion must have only the Ātman as the pervader.

असाधारणतो न स्यात्कालदिग्देशभिन्नयोः ।
मिथो ऽसंगतितो व्याप्तिर्हिमवद्विन्ध्ययोरिव ॥६२९॥

There would not be (a relation of pervasion) between two dissimilar things, in respect of time, direction and region (which they occupy) — that is, when they do not occur together, (as there can be no relation of pervasion between) Mt. Himalaya and Mt. Vindhya. [629]

मिथो ऽविभिन्नयोर्नासौ नापि सैकात्म्य इष्यते ।
भिन्नसामान्ययोस्तद्वत्तदसाधारणात्मनः ॥६३०॥

It¹ is not accepted in the case of the two things which are mutually distinct² and also in the case of those that have only one nature³; in the same way also between an individual and its species⁴ on account of their one (common) nature. [630]

¹This refers to *vyāpti*.

²Like Mt. Himalaya and Mt. Vindhya.

³In totally identical (*tadātma*) things.

⁴That is, between *jāti* and *vyakti*.

कार्यकारणयोरेवं भिन्नाभिन्नविकल्पतः ।
वस्तुवृत्तेन संव्याप्तिर्न युक्त्येहोपपद्यते ॥६३१॥

Also in respect of the cause and the effect there cannot be postulated here¹ with reason (the notion of) pervasion, either by the activity of the (two) things or by holding them optionally as distinct and non-distinct. [631]

¹This refers to *vyavahārabhūmi*. It is implied that, in addition to the differences as *kārya* and *kāraṇa* and *jāti* and *vyakti*, other differences also render pervasion unthinkable.

यत्र कात्स्न्येन वृत्तिः स्याद्रज्जुसर्पादिवद्द्वयोः ।
व्याप्तिर्मुख्यास्तु तत्रैव तथात्मानात्मनोरपि ॥६३२॥

Where there is (identity of) a form (or modification) in its entirety in two things, as in the case of a rope and serpent, let there be a pervasion (and) only there; so also (let it be) in the case of the Ātman and the non-Ātman. [632]

तमसैव यथा सर्पं स्रक्प्रविष्टा न तु स्वतः ।
प्रत्यगज्ञानहेतूत्थमात्मैवं मायया जगत् ॥६३३॥

As only on account of darkness (the character of) a garland has entered into a serpent and not in its real form, so does the Ātman enter into the world which has arisen from ignorance about the nature of the inner self, viz. Māyā. [633]

कया मर्यादया कार्यं मायावी माययाविशत् ।
आनखाग्रेभ्य इत्युक्त्या मर्यादातो ऽस्य भण्यते ॥६३४॥

(One might ask:) To what extent does the powerful Lord (lit. magician) enter the effect by means of his power (magic)? Therefore, (in answer) is stated the extent of it in the words *ā nakhāgrebhyah* ... [634]

नखाग्रावधिका यस्मात्संवित्पुंसो ऽभिजायते ।
अतः सामान्यवृत्त्यात्मा प्राविशद्देहमीश्वरः ॥६३५॥

Since sentience in an individual is noticed (lit. produced) up to the tip of the nails, therefore (it is held that) the Lord (viz. the Ātman) has entered into a body in a similar way. [635]

दृष्टान्ताभ्यामिमां वृत्तिं व्याचष्टे प्रत्यगात्मनः ।
कृत्स्नकारणतत्कार्यवृत्त्युपाधिसमाश्रयात् ॥६३६॥

(The Upaniṣad) declares this (twofold) activity (i.e. function) of the inner self with (i.e. in the light of) two illustrations, basing the same on the delimiting adjuncts, viz. the cause of

the entire (world) and the functions of its effects (=body).
[636]

मिथो विभक्ता एकत्र क्षुरधाने यथा क्षुराः ।
क्षुरधानाद्विभज्यन्ते तथात्मा नाडिभेदतः ॥६३७॥

As (many) razors, distinct from one another, are put into one place, i.e. in the razor-case and are distinguished from (that) razor-case, so also is the Ātman (distinguished from the bodies) on account of the distinction among (various) veins (etc.)¹
[637]

¹SP and NKL explain this thus: The Ātman is called the listener, the seer etc. by its contact with the ear, the eye etc.

ओतप्रोतात्मना तस्थुरर्वाग्या भूमयो ऽक्षरात् ।
तत्तद्विमिपरिच्छेदात्क्षेत्रज्ञः पर एव सन् ॥६३८॥

Whatever states, lower than the imperishable, remained on account of the Ātman which has woven them both length-wise and cross-wise, by limiting each one of those states, the highest Ātman is ever (eva) existing there as the knower of the field.
[638]

This verse refers to the subtle Ātman remaining in every gross product, after producing the same. This is based on *etasmin nu khalv akṣare gārgy ākāśa otaś ca protaś ca iti* ... (BU 3.8.11).

सूक्ष्मताव्यापिते ज्ञेये भूम्यादेर्यावदक्षरम् ।
पूर्वपूर्वप्रहाणेन तन्निष्ठा वियदात्मना ॥६३९॥

(In all things) beginning with the earth etc. and up to the imperishable (Ātman), one has to know the subtlety and pervasiveness (of the Ātman); by abandoning each preceding (of the earth etc., is noticed) its existence in the form of ether.
[639]

विश्वंभरो ऽग्निर्विज्ञेयो विश्वस्य भरणादिह ।

दारु कृत्स्नमभिव्याप्य यथाग्निर्दारुणि स्थितः ॥६४०॥
 संव्याप्य तद्वदखिलं देहमात्मा व्यवस्थितः ।

Because of his occupying the universe, Agni is to be understood as Viśvambhara, (for), fire resides in wood, pervading the whole of it, [640]
 in the same way, the Ātman exists, pervading the entire body. [641ab]

This explains the sentence in BU 1.4.7: *viśvambharo vā viśvambharakulāye*. The second line of this verse forms a syntactical whole, when together with the first line of the next verse.

तस्थावसंव्याप्य यथा क्षुरधानं क्षुरस्तथा ॥६४१॥
 श्रोत्रादिनाडीमध्यस्थ आत्माव्याप्य तनुं स्थितः ।
 वृत्ती द्वे प्राप्नुते ऽतद्वान्स्वप्नजाग्रदवस्थयोः ॥६४२॥

[In verses 641cd-644, there is description of the twofold appearance of the existent with reference respectively to a body and the outside world (*adhyātma* and *adhibhūta*).]

(Then) like a razor in a razor-case, which has not pervaded the whole (but one part) of it, the Ātman, not having pervaded the whole of the body, is residing (only) in some part, i.e. an ear etc. or the vein. (The Ātman) though really not having them, has two functions to perform, in the two states of waking and deep sleep. [641cd-642]

The second line of verse 641 and the first line of verse 642 together form one syntactical whole. The second line of verse 642 refers to the two states of the Ātman called Vaiśvānara and Taijasa in *Māṇḍūkyaopaniṣad* 3-5.

सामान्यमात्रवृत्तिं स सुषुप्ते प्रतिपद्यते ।
 प्रत्यग्याथात्म्यसंमोहान्न त्वसौ परमार्थतः ॥६४३॥

The Ātman performs the general function only while in deep sleep state; this, on account of the ignorance about the true

nature of the inner self. In reality, however, it is not that (viz. ignorance). [643]

महासत्ता वियज्ज्ञेयं कृत्स्नार्वागभूमिसंप्लुतेः ।
व्यक्तयो ऽन्त्या विशेषाः स्युस्तदसाधारणत्वतः ॥६४४॥

The sky¹, should be known as the absolute (lit. great) existent (on account of its) encompassing all lower regions; the manifold forms are (lit. should be known as) the last (i.e. lower) particulars on account of the uncommonness of them. [644]

¹The sky stands for the Ātman — NKL: *viyat brahman* and SP: *viyad akṣaram ṛco akṣare parame vyomann iti ...*

सामान्यानि विशेषाश्च तन्मध्यपतितानि च ।
सामान्यात्मविशेषत्वं तदुपाधिरगात्परः ॥६४५॥

The highest (Ātman), assuming such limiting adjuncts as are common, particular and those which fall between the two,¹ thus attained the character of (both) generality and particularity¹. [645]

In the preceding verse was stated that the sky (= Ātman), having the most pervading character, is called Mahāsattā. Now, a statement follows about other elements and their products — all these are but limiting adjuncts of the Ātman.

¹Namely, which can be both common and particular.

श्रोत्रत्वगादिनाडिस्थं शब्दाद्यालोचनादिभिः ।
चेष्टितं नामरूपाभ्यां देहे ऽमुष्योपलभ्यते ॥६४६॥

The activity¹ of that one (viz. the highest Ātman) is noticed in a body by various names and forms, (thus) in the sense of hearing, skin, etc. and the veins and by means of (hearing of) sound, etc. and seeing. [646]

¹See NKL, NKL edition and a variant reading: *veṣṭitam* for *ceṣṭitam*— quite an inferior reading!

असाधारणसामान्यरूपाभ्यामीक्ष्यमीक्षते ।

सर्वमानैः प्रसिद्धत्वादतो व्युत्थाप्यते ततः ॥६४७॥

The object of seeing¹ is seen² in its uncommon (i.e. particular) and common (i.e. general) forms with the help of all the means of knowing, since they are known (thereby). (And) therefore the (real experiencer³) is lifted up⁴ from them. [647]

This points out how this entire world has two parts; one seen and the other which cannot be seen (*vikāra* and *avikāra*).

¹This refers to the world, the so-called product of the Ātman.

²*īkṣate* in the original is understood as *īkṣyate*. Yet, alternatively one could translate: The Śruti sees or the people see the object of seeing in ...

³That is, the Ātman.

⁴This indicates that they do not see the one or they find it apart from all activity.

अयं मेयः प्रमाताहं मानमेतदितीक्ष्णे ।

मिथ्याज्ञाने जनस्तुष्टः स्वप्नमायेन्द्रजालवत् ॥६४८॥

[Verses 648-659 explain the meaning of *taṁ na paśyati*.]

This one is (the object) to be known, I am the knower and this is the means of knowing — in such (way of) knowing, viz. in false knowledge, are people satisfied as (one is satisfied) in a dream or a magic show. [648]

यतो मिथ्यावबोधो ऽयमतस्तदपनुत्तये ।

न पश्यन्ति तमित्याह ये पश्यन्ति यथोदितम् ॥६४९॥

As this (way of knowing) is (only) false knowledge, therefore, for the removal of the same, (the Śruti) has stated, 'They do not see ...' with reference to them who see him as described.

[649]

This verse establishes that a person who sees the Ātman as

possessed of varied forms is in reality ignorant about the same.

NKL edition reads: *-bodho 'yam matas ...*; accordingly the translation could be: this (way of knowing) is taken to be false knowledge ...; this hardly makes any difference.

वस्त्वज्ञानैकनिष्ठत्वान्मिथ्याधीर्न हि वस्तुनि ।
न पश्यन्तीत्यतो युक्तं नेक्षन्ते वस्तु तत्परम् ॥६५०॥

False knowledge, being dependent on ignorance about the real thing (does not belong) to the real thing. Therefore, it is proper to accept that they do not see it (viz. the real thing, the Ātman); they do not really see the highest thing (viz. Reality).

[650]

This sets aside the possible notion that the common man's knowledge about as object is not false. Since the Ātman has assumed the form of the object, therefore, the knowledge is really not true.

यद्यप्यत्राभिमानो ऽस्ति निष्क्रियाकारकात्मनि ।
पश्यामीत्ययथार्थत्वान्मिथ्याधिरेव सा मता ॥६५१॥

Even if, in this (state)¹, there is on the part of the Ātman, who is the actionless agent, the ego, viz. 'I am seeing.', there does not follow (the sight of) Reality, and so, that is to be understood as false knowledge.

[651]

¹This refers to worldly dealings.

नन्वप्राप्तनिषेधो ऽयं न पश्यन्तीति भण्यते ।
नैवं सृष्ट्यादिवाक्यानां प्रत्यग्बोधैकहेतुतः ॥६५२॥

(One might object:) When it is said (in the Śruti) 'They do not see.', this should be treated as rejection of what is not introduced.¹ (Our answer is:) This is not so, since the sentences (in the Śruti) about creation etc. have the only purpose of giving information about (the true nature of) the inner self.

[652]

¹ *aprāptaniṣedha* consists in denying or rejecting what was already not begun as a part of the statement. The objector would hold that *taddarśana* should have been earlier mentioned, should the Śruti *taṁ na paśyanti* become a meaningful *niṣedhavākya*.

मन्त्रो ऽप्याहेममेवार्थं रूपं रूपमिति स्फुटम् ।
तद्दर्शनात्समस्तस्य पुरुषार्थस्य सिद्धितः ॥६५३॥

Even the Mantra *rūpaṁ rūpaṁ ...*¹ has clearly declared this very thought, since there is complete accomplishment of the end of human endeavour from seeing that (viz. the Ātman).

[653]

¹BU 2.5.19: *rūpaṁ rūpaṁ pratirūpo babhūva tad asya ...*

पश्यन्तो ऽपि न पश्यन्ति विरुद्धं कथमुच्यते ।
मेयासंस्पर्शिदृष्टित्वान्न पश्यन्तीति भण्यते ॥६५४॥

(The objector asks a question:) How is this contradictory statement made, i.e. though seeing it, they do not see it¹? (To this we answer:) That 'they do not see it' is said because there is not (actual) seeing connected with any object of knowing.

[654]

¹The objector persists in holding the contradiction thus: *ātma-darśana* is taken up for discussion (*prakṛta*); therefore, *taṁ na paśyanti* is *niṣedha* of the same. That explains the apparent contradiction in the Śruti (*aprakṛtanīṣedha*).

सदेवेत्यादिवाक्येभ्यः कृत्स्नं वस्तु यतो ऽद्वयम् ।
संभवस्तद्विरुद्धस्य कुतो ऽकृत्स्नस्य वस्तुनः ॥६५५॥

Since from such sentences as *sad eva ...*¹ (it is understood that) there is only one whole thing without any duality, how could there be the possibility of (what is) opposed to it and is not (the) whole (thing)?

[655]

¹CU 6.2.1.

अव्यावृत्ताननुगतं प्रत्यग्वस्तु स्वतो मितेः ।
तद्विरुद्धेह या दृष्टिर्मिथ्यारूपा न सान्यथा ॥६५६॥

The inner self is the real thing, is not distinguished from another, (and) is not similar to (lit. followed by) another. Since it becomes known by itself, therefore, whatever knowledge in this world is opposed to that (viz. knowledge of the real) is false knowledge; it is otherwise (than real). [656]

This is another argument to convey the completeness/fullness of the inner self (Ātman) which is heard in the Śruti.

आत्मानात्मानमाप्नोति यतः प्रत्यक्तयाखिलम् ।
तदन्यानवशिष्टत्वादकृत्स्नः स्यादतो ऽन्यथा ॥६५७॥

Since the Ātman pervades¹ the entire non-Ātman by becoming the one within it; therefore, if (it were) different by being non-distinguished from that (creation),² (then) it would have been incomplete. [657]

This explains why the inner self (Ātman) is complete (*pūrṇa/kṛtsna*).

¹ *āpnoti = vyāpnoti*.

² This would disprove its *advitīyatva* 'singularity, being one without a second'.

अनात्मा नात्मरूपेण प्रत्यक्त्वात्सिद्धिमर्हति ।
प्रत्यङ्मात्रैकयाथात्म्यात्कुतस्तद्व्यतिरेकतः ॥६५८॥

The non-Ātman cannot be established as the Ātman, since that (viz. Ātman) is of the nature of one that resides within (a body) and since the truth is that the Ātman has only the inner self as its (delimited) nature. How can that be apart from that (i.e. the inner self)? [658]

This explains how duality (viz. non-Ātman) cannot exist as

identical with, and also apart from, the Ātman.

देशतः कालतो रूपाद्वस्त्ववस्थादितो ऽपि च ।
व्यभिचारो ऽस्य संसिद्धस्तद्विरुद्धात्मसाक्षिकः ॥६५९॥

And further, variance in the nature of this (non-Ātman/duality) is established by its region, time, form and (the different) states etc.¹ and has as its seer² what is opposite (to it in) character. [659]

It is stated that the varying character of the non-Ātman establishes it to be false.

¹The word etc. refers to change in properties.

²Namely, the inner self, the Ātman.

Verses 660-692 explain BU sentence 'akṛtsno hi sa prāṇann eva prāṇo nāma bhavati'.

प्रतिज्ञार्थस्य सिद्ध्यर्थं न पश्यन्तीति भण्यते ।
अकृत्स्नो हीति हेतूक्तिः सापि चैवं समर्थ्यते ॥६६०॥

The statement beginning with (the words); *na paśyanti* is made with a view to establishing what is enunciated.¹ The statement beginning with *akṛtsnaḥ* ...,² which is the statement of the reason (for the earlier statement), is also justified in this very way. [660]

This is the purport of *akṛtsno hi ... bhavati*.

¹That is, the uniqueness of the ever-existing Ātman.

²That is, *akṛtsno hi sa prāṇann eva prāṇo nāma bhavati, ... manvāno manah*.

तदकृत्स्नत्वसंसिद्ध्यै प्राणन्नेवेत्युदीरणम् ।
अन्योन्यव्यभिचारित्वं प्राणादेरीक्ष्यते यतः ॥६६१॥

The statement *prāṇann eva* has the purpose of establishing the incompleteness (in daily dealings) of that (i.e. the non-Ātman), since it is seen (i.e. experienced) that Prāṇa etc. have

existence¹ in the absence of one another.

[661]

¹That is, they are operative.

यस्मिन्दृष्टे ऽप्यदृष्टो ऽर्थः स तदन्यश्च शिष्यते ।
तथादृष्टे ऽपि दृष्टः स्यादकृत्स्नस्तादृगुच्यते ॥६६२॥

Such a thing (or object) is called incomplete when on its being seen¹ a thing, an unseen and other than itself (does) exist; (similarly) it would be seen even while that (former) is not seen.²

[662]

By this statement of the meaning of *akṛtsna*, Sureśvara suggests that Ātman being *kṛtsna* and known, everything else also becomes known.

¹That is, known.

²Sureśvara suggests that on the Ātman becoming known everything else becomes known and that the Ātman continues to exist while the other (apparent) thing is not seen (i.e. is no more in existence). This is how the Ātman is *kṛtsna*.

आविष्करिष्यन्हेत्वर्थमकृत्स्नत्वप्रसिद्धये ।
न ह्यसौ कृत्स्नतामेति चक्षुःश्रोत्रादिसंहतः ॥६६३॥

With a view to revealing the meaning of the (word expressive of) reason¹ and for establishing the incompleteness (of the non-Ātman, the Veda² declares) that the one, who possesses eye, ear etc., does not attain completeness.

[663]

¹Namely, the words *akṛtsno hi* ...

²Supply: *vedaḥ* in consonance with *āviṣkarīṣyan* (masculine form).

परस्परानभिव्याप्तेर्नामरूपक्रियात्मनाम् ।
व्यभिचारादकृत्स्नत्वं स्यादनात्मैकरूपिणाम् ॥६६४॥

There is incompleteness in the case of those (things) which are of the nature of name, form and action(s) and which have the form of only the non-Ātman and since they do not

pervade one another¹ and there is their mutual exclusion
(*vyabhicāra*). [664]

This verse states that all worldly things are *saṃghātas* and therefore *akṛtsna*.

¹That is, since they do not exist at one and the same time.

असंहतः संहतः सन्प्रत्यङ्मोहैकहेतुतः ।
प्राणनादिक्रियाः कुर्वन्प्राण इत्यभिधीयते ॥६६५॥

The one which is (in reality) not limited (in body etc.) is (taken as) limited (in a body) on account of the sole reason, viz. the ignorance about (the nature of) the inner self and is described by the word *Prāṇa*,¹ perform as it seems to do (various) activities beginning with breathing etc. [665]

¹SP suggests *prāṇa* should be understood for *prāṇanādi*.

तस्मिन्श्च प्राणने वायोर्व्यापारः करणात्मना ।
उत्सृज्यमानः कर्मत्वं विज्ञानात्मन एति सः ॥६६६॥

And in that action of breathing there is the function of the wind, in the capacity of an instrument (and), being released, it becomes the object of the activity of the knowing self¹. [666]

¹Namely, the inner self.

साक्षादात्मोत्सृजन्वायुं तस्मिन्प्राणनकर्मणि ।
अपेतकारकग्रामः प्रतीचैवानुभूयते ॥६६७॥

In that action of breathing, it is the *Ātman* itself who is far away from (i.e. is not possessed of) all the organs of activity (and), who, releasing the wind, is experienced by the inner self (as being within itself). [667]

कर्त्रादिकारकाण्यस्मिन्नसाधारणरूपतः ।

कर्त्रादिकारकाण्यस्मिन्नसाधारणरूपतः ॥६६८॥

All operative causes, viz. agent, means of activity etc., appear to be there in this witness of the coming and going (of wind etc.), (in that) who is not possessed of those (activities) as its properties. [668]

साक्षिरूपं स्वतःसिद्धं तेनैष्वव्यभिचारतः ।
कर्त्रादि तु तमोन्तस्य रूपं धर्माद्यपेक्षया ॥६६९॥

Therefore, its nature as the witness in these (activities) is self-established invariably; but, the form(s) as the agent etc. belongs to that which ends in ignorance (about the nature of the inner self)¹, owing to the dependence of the same on the property or activity (*dharma*) etc. [669]

¹ *tamonta* is not explained by both SP and NKL.

अनित्यहेतुतो ऽनित्यं तेन कर्त्रादि लक्ष्यते ।
निर्हेतु प्रत्यगज्ञानं लक्ष्यते तेन नित्यवत् ॥६७०॥

Therefore, owing to (its rise from) an impermanent cause, the character of the agent etc. is understood (by the knower, i.e. inner self) as impermanent. (And) for that (very) reason, ignorance about the inner self, having no cause for it whatever, is taken as permanent. [670]

प्रत्यगज्ञानमात्रैकनीडत्वान्नान्यरूपता ।
क्रियाकारकरूपाणां नित्यानित्यमतिः कुतः ॥६७१॥

Such things as are of the nature of activity and the means of activity, having a support (lit. nest) only in the ignorance about (the true nature of) the inner self, cannot have any other form.¹ How can (then) there be any thought² about (their cause),³ as permanent or impermanent? [671]

¹ They remain only as product of ignorance and therefore unreal.

² That is, discussion.

³ That is, the sky. What is meant is: The (so-called) knowers

in this world are the products of the sky. Therefore, the sky, their cause, also must be like them only non-eternal.

अतस्तद्व्यभिचारेण नामरूपक्रियात्मनाम् ।
अकृत्स्नव्यपदेशेन मिथ्याज्ञानत्वमुच्यते ॥६७२॥

Therefore (i.e. for that reason) is declared that those who are of the nature of name and form, varying in nature with that (inner self), are of the nature of false knowledge. (This is stated) in the mention 'incompleteness ...'. [672]

अज्ञातायां यथा रज्ज्वां तदध्यस्तैकरूपिणाम् ।
व्यभिचारः स्रगादीनां प्रतीच्येवमनात्मनाम् ॥६७३॥

As the wreath of flowers etc. has (i.e. shows) variance (with the rope (etc.)) when the rope (etc.) which has/have the form(s) of what is/are superimposed on the same is/are not known (in the real form), so also the non-Ātmans, being superimposed on the inner self, (show variance with it). [673]

प्राणाग्नयः पुरा बुद्धेः सुषेष्वन्येषु जाग्रति ।
अतस्तद्विषया तावत्कर्तृतेहोच्यते प्रभोः ॥६७४॥

Fires in the form of *prāṇas* exist (even) before one's awakening (from the state of deep sleep) while the others (i.e. other functioning organs) are asleep. Therefore, with reference to that (existence) is here stated the activity (of breathing) of the Lord. [674]

नामतो रूपतश्चैवं प्राणनादिषु कर्मसु ।
लक्ष्यते ऽविद्यया तद्वान्रज्जुः सर्पादिभिर्यथा ॥६७५॥

Thus, owing to name and also owing to form is experienced in the activities, viz. breathing etc. (the inner self) as the performer of them through ignorance, in the same way as a rope (etc.) is noticed (i.e. understood) as having the form of a serpent etc. [675]

प्राणन्नेवेत्यवधृतेस्तदर्थान्तररूपतः ।

प्राणाद्यकृत्स्नतासिद्ध्यै व्यभिचारः प्रदर्श्यते ॥६७६॥

(Therefore) in order to establish the incompleteness of (the agent of) breathing etc. there is shown by the restriction with the use of the word *eva* the variance of the same (lit. that) from other (functions).¹ [676]

¹For example, seeing, hearing and others. Cf. note 1 on verse 665 above.

कर्मैतदेव कुर्वाणः काले चात्रैव भण्यते ।

अत्रैव च क्रियायोगे तद्रूपाहः स इष्यते ॥६७७॥

(This Ātman) who is performing just this activity is described as '(he is) so and so at this point of time'. It is only here on account of (its) association with that (particular) function that it is accepted to have a name after that form. [677]

तद्वानसमकालं तु प्राणनादिक्रियोत्थितेः ।

प्रागूर्ध्वं च तदन्येषु प्राणासंभवहेतुतः ।

न तन्नामा न तद्रूपस्तदन्यत्र च कर्मणि ॥६७८॥

But doing (only) that activity, it does not have that name and that form while doing another activity, i.e. before and after the rise of the activity such as breathing, (and also) at another point of time, since there is no possibility of there being Prāṇa etc. [678]

प्राणनानन्तरं यस्मात्क्रियाशक्तेः समुद्भवः ।

वदन्वागित्यतः प्राह क्रमयोगानुरोधतः ॥६७९॥

Since the rise of any capacity for performing any function (only) follows breathing (by an individual), therefore, the Śruti declares 'speaking, (therefore) it is speech' etc., in accordance with the sequence (of the rise of other functions). [679]

तथोच्यते ऽनयेत्यस्मात्करणं वागुदाहृता ॥६८०॥

The Ātman, because it speaks, is called speech (= Vāc) When there is sound (produced), it is called Vāc. (Also) it is called Vāc, a sense-organ, because thereby is (sound) uttered. [680]

This verse has a purport to point out that there is in worldly dealings the division as the agent, the object and the sense-organs even while the Śruti has declared that all these are but the Ātman.

पश्यंश्चक्षुस्तथा द्रष्टा शृण्वञ्श्रोत्रं तथैव च ।
त्रिधा त्रिधा व्यवच्छिन्नं एवं सर्वत्र लक्षयेत् ॥६८१॥

So, (the Ātman) who is seeing is the seer, the eye, in the same way, listening, (it) is the ear. Thus limited in this threefold (function)¹ in three ways² is the Ātman — thus should one understand (the thought) everywhere. [681]

This verse describes the limitation of the Ātman under the influence of ignorance.

¹Seeing, hearing, feeling the touch.

²The agent, the object and the means of knowing.

चक्षुरालोचनायैव संशयं कुरुते मनः ।
बुद्धिरध्यवसानाय साक्षी क्षेत्रज्ञ उच्यते ॥६८२॥

Eye¹ is only for seeing² (an object), *manas* entertains doubt (about the nature of an object) [or options regarding the nature of the object], intellect is for deciding (its exact nature) and the witness (the Ātman) is called the knower of the field. [682]

¹SP: Eye stands for all the *indriyas* of *karman* and *jñāna*.

²SP: *darśana* indicates all other activities of the *indriyas*.

यैव ज्ञानविकाशेषु साक्षिता सैव नान्यथा ।
क्रियाशक्तिविकाशेषु ह्यन्योन्यव्यभिचारिषु ॥६८३॥

Whatever be the character of the witness it remains the same in respect of different flashes of knowing (i.e. awarenesses); (at all times), it does not vary (even) while there are flashes of the capacities of various functions, and while they differ with one another. [683]

निरस्तावयवे व्योम्नि मिथोभिन्नप्रदेशिनाम् ।
न संभाव्या यथा सिद्धिः प्रतीच्येवं तमोवताम् ॥६८४॥

As in the case of the sky which does not have any parts, (the notions of) parts in mutually distinct regions are not possible to posit; so it is in the case of them who have ignorance with respect to the inner self. [684]

प्राणन्वदन्नित्युक्तानि नामरूपाणि यानि तु ।
कर्मजान्येव तान्यस्य न तु चैतन्यवत्स्वतः ॥६८५॥
अन्योन्यापेक्षसंसिद्धेरन्योन्यव्यभिचारतः ।
अपराधीनसंसिद्धौ भानाविव तमो भवेत् ॥६८६॥

Whatever be the names and forms mentioned in the statements 'breathing, speaking, etc.', they have originated only in (different) functions of this one (i.e. the inner self). But (none of these) is, like (its own) sentience, on the strength of itself, [685]

because they get established through mutual dependence and because they occur in the absence of one another. In case (therefore, it is said that) they get established without depending mutually, it would be like (saying that) there is darkness in the sun. [686]

Verse 685 explains BU: *tāny aṣyaitāni karmamayāny eva*.

यत एवमविद्योत्थं प्राणाद्यस्यातदात्मनः ।
नामरूपमतस्ताभ्यां पश्यन्नपि न पश्यति ॥६८७॥

Since thus¹ (all this, viz.) Prāṇa etc. has thus originated from ignorance (about the true nature of the Ātman), therefore, from this one which does not have the same (lit. that)² as

its nature, (i.e.) from these names and forms, (therefore) this one (i.e. the inner self) does not see, even though it is seeing.

[687]

¹That is, for this reason, viz. being dependent (on another) and being without one another.

²Namely, the two factors mentioned in the preceding note.

तत्रैवं सति यो द्रष्टा प्राणनादिक्रियं परम् ।
उपास्त इति जानाति न स्वभावादुपासनम् ॥६८८॥

Then, this being so, whichever seer worships the highest (Ātman) as the one that performs such activities as breathing etc., does not really know worship in its own (i.e. real) nature.

[688]

This explains BU: *sa yo 'ta ekaikam upāste*. This is not an injunction, inasmuch as there follows a *nindā*: *na sa veda*.

न यतो युगपत्कृत्स्नवस्तुज्ञानं क्रमेण वा ।
अस्त्येकैकमतो ऽनूक्तिः प्राप्ता दृष्टिरनूद्यते ॥६८९॥

Since there does not arise the knowledge of all entities simultaneously or (gradually) in some sequence, therefore (in the statement of the Śruti) there is the mention of the word *ekaika* 'one after another'; thus is followed the nature of each as commonly observed in the world.¹

[689]

This explains the purpose of *ekaikam*. The Upāsana under reference cannot pertain to all objects together, i.e. simultaneously. One can infer from SP: *na svābhāvikajñānasya vidhāyakam idaṃ vākyaṃ*.

¹*prāptā = lokataḥ prāptā* (SP).

नानेकदृष्टिविध्यर्थमेकैकोपास्तिकत्सनम् ।
मृत्योः स मृत्युमित्येवं तद्दृष्टिरपि कुत्स्यते ॥६९०॥

This censure (implied in) this statement about worship of each of them, one after another, is not prescriptive of seeing many.

for, in the statement *mṛtyoḥ sa mṛtyuḥ* ... is censured that (kind of) seeing¹ also. [690]

¹That refers to *anekadr̥ṣṭi*.

सर्व एकमिति ह्युक्तेरिहाप्यैकात्म्यदर्शनम् ।
विधीयते यतो नातः समस्तव्यस्तदर्शनम् ॥६९१॥

Since here also is prescribed in words *sarva ekam*; seeing the uniqueness of the Ātman, therefore, there is no seeing of the aggregate and the several parts. [691]

This has a reference to *atra hy ete sarva ekam bhavanti*.

समस्तव्यस्ततां तस्मान्मानान्तरमितत्वतः ।
अनूद्यापूर्वमैकात्म्यं विधेयमुपपत्तिमत् ॥६९२॥

Therefore, having merely repeated the nature of the aggregate and of the several parts owing to their being known by other means of knowing, (the Śruti finds it proper) to state with reason the uniqueness of the Ātman which was not stated¹ (anywhere) before. [692]

¹That is, known.

समुद्रतरुगोपिण्डदृष्टान्तैः परमात्मनः ।
व्याचक्षते बलात्केचित्समस्तव्यस्तदर्शनम् ॥६९३॥

[Verses 693-703 state and refute Bhartṛprapañca's view on *atra ... bhavanti*.]

Some¹ emphatically² state that the highest Ātman is seen as an aggregate and as consisting of parts in the light of the illustrations of the ocean, the tree, and the body of a cow. [693]

¹SP and NKL refer some to Bhartṛprapañca. Cf. verses 947-950

²Cf. SP: *balād iti śrutyakṣarabāhyatvoktiḥ*, i.e. going against the Śruti.

नानावयवसंभेदभिन्नार्थश्चेन्नगादिवत् ।

सिद्धः कुतश्चिन्मानात्स्यादनुवादस्तथा सति ॥६९४॥

If (the Ātman) were somehow established by some means to be a thing characterized as a conglomeration of various parts like, for instance, a tree etc.¹, then there could have been a repetitive statement² about that. [694]

This verse refers to the idea that the Śruti mentions about the Ātman as a *samastavyasta vastu*.

¹The word etc. refers to an ocean, the body of a cow.

²That is, *anuvāda*. Cf. NKL: *brahma bhinnābhinnam upādānavāt samudravat ity anumānāt siddhaś cet tathā sati vākyam anuvādo 'pramāṇam ity arthah*.

निःशेषभेदसामान्यदृष्ट्यावृत्तिरुपासनम् ।

विधित्सतं चेत्तादृक्षं कल्पकोट्या ऽपि दुःशकम् ॥६९५॥

If it was intended to prescribe a worship (of the Ātman) by repeating the notion of (its being) identical with the common characteristic and all (variety of the things); then that kind (of worship) would be extremely difficult (to imagine) by every stretch of imagination.¹ [695]

This sets aside the possible view that there is some worship prescribed of the Ātman as a *bhinnābhinna vastu*.

¹Read SP: *teṣām (= viśeṣāṇām) ānanyāt kārtsnyenānusamdhānā-siddheḥ ...*

प्रत्यग्दृष्टेर्हि विषयः स्यादात्मैत्यनुभूतितः ।

तदबोधमृते तत्र कुतः पिण्डादिदर्शनम् ॥६९६॥

Indeed (the Ātman) would be an object of seeing by the individual self owing to its being experienced. Therefore, how could there be the sight (i.e. seeing) of a body etc. unless

(there is) ignorance of that (Ātman)?

[696]

तं परादादिति तथा प्रतीच्यज्ञानकल्पितम् ।
मिथ्याज्ञानापनुत्त्यर्थमात्मैवेत्यब्रवीच्छ्रुतिः ॥६९७॥

Also, what the Śruti has declared in the statement *taṁ parādād* ... is in respect of the inner self — a notion produced by ignorance and it is pronounced for removing (i.e. wiping away) completely the false knowledge that the Śruti stated *ātmaiva* ...

[697]

पराञ्चीत्यपवादाच्च न पिण्डादीक्षणम् श्रुतेः ।
प्रत्यग्दृष्ट्या विरुद्धत्वान्न परागर्थदर्शनम् ॥६९८॥

So also, on the basis of the denial in the statement *parāñci khāni* ...¹, (it may be said that) seeing the individual body etc. is not (acceptable) to the Śruti. There is no seeing of any outside object (possible), since that is opposed to seeing of the individual self.

[698]

¹ *Kāthopaniṣad* 4.1; cf. verse 180 note 3 above.

अनन्यमेयतन्मानमातृ वस्त्वविभागवत् ।
अमेयमानमात्रेकं तदात्मेति प्रचक्षते ॥६९९॥

They declare that as the Ātman, which is a thing that does not have any to be known (as associated with it), a means and the knower of knowing it — a real thing, which does not have parts, unique object, not (associated with any) means but the knower of itself.

[699]

This explains the nature of the Ātman.

संसारदर्शनाभ्यासात्तन्मुक्तिं ये प्रचक्षते ।
नाकार्यं विद्यते तेषां वैश्वानरवराश्रयात् ॥७००॥

For those who state that liberation of that (viz. the Ātman, as effected) by continued meditation on (the nature of) the

transmigratory existence, there does not exist any activity which cannot be performed; (that is so) on account of the support of Vaiśvānara's favour. [700]

वयं तु वरहीनत्वाच्चर्मवद्वेष्टितुं वियत् ।
न शक्नुमो विना युक्तीरतो न श्रद्धधामहे ॥७०१॥

As for ourselves, we are not able (to declare), without reasoning¹, (such a meaning of the Śruti)², in the same way as they (would), for the reason of not having received the boon (of Fire), (indeed, it would be like an effort) to cover the sky with some skin³ — therefore, we do not have faith (in that meaning). [701]

¹It literally means: reasons.

²Namely, that which Bhartṛprapañca has declared.

³Cf. *Śvetāśvataropaniṣad* 6.20: *yadā carmavad ākāśam veṣṭayisyanti mānavāḥ*; this implies opposition to scriptures.

उक्तं च वक्ष्यमाणं समस्तव्यस्ततां प्रति ।
श्रुत्यक्षरानुरोधेन दूषणं दूषितात्मनाम् ॥७०२॥

Thus is blame directed and also will be directed against those whose minds are affected (by wrong notions) with respect to the nature of the Ātman as an aggregate and what is made up of parts — this, in consonance with the statements (lit. words) of the Śruti. [702]

नादूषितात्मभिर्यस्मात्प्रतीचो ऽन्यन्मनागपि ।
प्रत्यग्दृष्ट्येक्षितुं शक्यं वस्तु स्वप्नदृशा यथा ॥७०३॥

And (this is so) because, for those whose intellect is not affected (by notions of duality), it is not possible to see even a little thing which is other than the Ātman as the inner self as by one who is seeing a dream. [703]

This gives the reason why Bhartṛprapañca, who sees duality (*samastavyastavastudarśana*) is blamed as *dūṣitātman*.

प्राणन्वदन्निति द्वाभ्यां क्रियाशक्तिसमुद्भवः ।
पश्यञ्छण्वन्निति तथा ज्ञानशक्त्युद्भवः कृतः ॥७०४॥

[Verses 704-710 explain BU: *prāṇann eva*.]

By the words *prāṇan* and *vadan*, (there is a statement made about) the rise of the capacity for activity and, by the words *paśyan* and *śṛṇvan*, about the rise of the capacity for knowing.

[704]

नामरूपातिरेकेण न ज्ञेयं वस्तु विद्यते ।
उपलब्धौ तयोरुक्ते कारणे श्रोत्रचक्षुषी ॥७०५॥

There does not exist an object to be known apart from (what has) name and form, and, for knowing these two, there are stated two means, viz. ears and eyes.

[705]

नामरूपप्रकाश्या च क्रिया प्राणात्मिका तथा ।
नामाभिव्यक्तिकृद्वाकस्यादेवं सर्वत्र योजना ॥७०६॥

Activity is what can be revealed by name and form and which has *Prāṇa* as its essence — (this is understood) from the sentence which reveals the name and form — such is the construe everywhere (in the present context).

[706]

श्रोत्रादिकरणैर्यद्यत्प्रथते तत्तदुच्यते ।
रूपं व्याक्रियते यत्तु तन्नामेत्युपदिश्यते ॥७०७॥

(In this context), whatever becomes revealed (to an individual) by organs such as ears¹ is called form; and (*tu*) whatever is specified is called to be name.

[707]

¹Organs such as ears refers to the eyes also. This indicates the flash of the knowing sentience (*viññānaśaktyudbhava*). It is sentience that is really capable of hearing, seeing etc. Therefore, SP rightly points out: *śaktidvayodbhavoktyā samastasamsārasya praticy adhyāsasyātra vivakṣitatvān na prasiddhanāpnarūpagraho 'tra*

yuktaḥ.

ज्ञानशक्तिविकाशानां मनः साधारणं मतम् ।
क्रियाशक्त्युद्भावानां च कारणं तत्त्रिकालदृक् ॥७०८॥

manas is held as common in (grasping) all the capacities for knowing and that is also the means for the rise of the capacity for activity — (thus) that is the seer (i.e. experiencer) in all the three periods of time.¹ [708]

This explains BUB: *manvāno mano manuta iti* ... But cf. SP: *atra ca bhāṣyānusāreṇa vyutpattitrayam āśritya kartṛtvāditrayam ātmano draṣṭavyam*.

प्राणनादिकृतां मध्य एकैकं यः समीक्षते ।
न स जानात्यकृत्स्नत्वात्पूर्णं वस्तु यतः स्वतः ॥७०९॥

Whosoever amongst Prāṇa etc. sees only each one of them does not know (the true nature of the inner self) because of the incompleteness (of each one of them); since Reality in itself is complete.¹ [709]

¹Read NKL: *ekaikakriyāviśiṣṭam (ātmānam) vidvān avidvān*.

यावदेवमयं वेद प्राणितीत्यादिकर्तृकम् ।
अक्रियाकारकं वस्तु न तावद्वेद तत्त्वतः ॥७१०॥

So long as this (individual) knows (this Ātman) as the agent of the action conveyed by (the verb root) *pra-√an*, he has not known the real thing which does not perform (or do) any activity. [710]

This explains away the paradox in *yaḥ samīkṣate na sa jānāti* in the previous verse.

Now is introduced a discussion of the sentence 'ātmety evopā-sīta' up to verse 940.

अव्याकृते ऽनभिव्यक्तेर्न चेतत्तत्त्वमीक्ष्यते ।
व्यक्तौ च हेतुकार्याभ्यां कथं तर्हीक्ष्यतां परम् ॥७११॥

If that Reality is not grasped in the unmanifest (form, viz. which is in deep sleep state¹), since it is not revealed (in various name(s) and form(s)), how then can that highest (Reality) be seen when it is manifest by means of the cause and the effect?¹ [711]

This verse refers to two states; deep sleep and waking.

¹SP: *svāpaviṣayo 'vyākṛtaśabdah*.

²Namely, by its various names and forms.

कार्यकारणबुद्धौ ताविष्येते विश्वतैजसौ ।
प्राज्ञः कारणबद्धस्तु द्वौ तु तुर्ये न सिद्ध्यतः ॥७१२॥

Those two, viz. Viśva and Taijasa¹ are understood as affected (lit. bound) by the effect and the cause²; as for Prājña¹, it is affected by the cause; and these two do not affect the Turya.¹ [712]

This is *Gauḍapāḍakārikā* 1.11.

¹These are names for sentience in the states of waking, dream, deep sleep and liberation.

²These refer to non-understanding of the Reality and consequent acceptance of duality as real.

विस्फारिताक्षो जानाति शब्दाद्येव न तत्परम् ।
अपीतकरणग्रामः शब्दाद्यपि न वेत्ति हि ॥७१३॥

One whose sense-organs¹ are wide-open² grasps only words etc., but not the highest Reality; for, indeed, he whose sense-organs have merged (into their own cause) cannot grasp even word etc.³ [713]

¹These imply organs of action also.

²That is, active or operative.

³The first line refers to waking state and the second line to deep sleep state.

sleep state.

कथं पश्यंस्तमात्मानं साक्षाद्वेदेति चोदिते ।
आत्मेत्येवेति नो वक्ति चोद्यहेतुनिवृत्तये ॥७१४॥

When it is asked, 'how does he, seeing, know the Ātman in its own form?', the Śruti announces to us, *ātmety eva ...?*¹, for the removal of the cause of the question (asked). [714]

¹Cf. BUB: *katham punaḥ paśyan vedety āha, ātmety eva ...*

अतिरोहितरूपं यज्जगत्यव्याकृते तथा ।
तत्साक्षित्वाच्च तद्व्यक्तौ यदक्षैर्व्यज्यते न च ॥७१५॥
प्रत्यक्तया यः प्रथते स्वयंज्योतिःस्वभावकः ।
मातृमानक्रियामेयविभागैर्न विभज्यते ॥७१६॥
जिघ्राणीममहं गन्धमिति यो वेत्त्यविक्रियः ।
स आत्मा तत्परं ज्योतिः शिरसीदं वचः श्रुतेः ॥७१७॥

That is the Ātman; that is the highest light — that whose nature is not concealed (even) while the mundane world in (it when it was) not manifest as well; and which is not revealed by the sense-organs because of its nature of being the witness of it in its manifestation; (the one) which reveals itself as the inner self, having self-luminous nature, and which cannot be divided into parts, viz. knower, means of knowing, function of knowing and objects of knowing, and (the one) which, without undergoing any modification, knows 'I smell this fragrance.'¹ — this is a statement at the head of the Śruti.

[715-717]

These verses explain what is Ātman.

¹Cf. CU 8.12.4: *atha yo vededam jighrāṇīti sa ātmā*.

अभिधाज्ञानगम्यत्वनिषेधार्थेतिशब्दनम् ।
यतो वाचो निवर्तन्त इति च श्रुतिशासनम् ॥७१८॥

The expression *iti* (in *ātmety evopāsīta*) is for denying the possible thought that (the Ātman has) the character of being

the object of knowing by its name and (for conveying this very idea) there is also a statement in the Śruti *yato vāco nivartante*¹. [718]

¹Cf. *Taittirīyopaniṣad* 2.3.1.

व्याकृताव्याकृतात्मत्वनिराकरणसिद्धये ।
एवेत्याहान्यदेवेति तथा चोच्चैः श्रुतीरणम् ॥७१९॥

The Śruti has used the word *eva* for effecting the refutation of (the idea that) the Ātman is (both) the manifest and the unmanifest; so also, there is a loud (i.e. prominent) statement of the Śruti *anyad eva* ...¹ [719]

¹*Kenopaniṣad* 1.4: *anyad eva tad veditād atho aviditād adhi*. This Śruti is also referred to in verses 873, 1117 below.

उपेति सामीप्यवचस्तन्निष्ठा प्रत्यगात्मनि ।
कार्यकारणभूताभ्यां प्रत्यङ्नेदीय ईक्ष्यते ॥७२०॥

(The preposition) *upa* is an expression for nearness; it has relation to (lit. rest on) the inner self. The inner self is seen to be in the nearness owing to what have become the cause and the effect.¹ [720]

¹These are intellect and false knowledge.

व्याकृताव्याकृतात्मभ्यां यो भिन्नो ऽज्ञानहेतुतः ।
प्रत्यक्त्वधिया हत्वा तावुपैत्यात्ममात्रताम् ॥७२१॥

The one who is distinct from what are of the nature of the manifest and the unmanifest (only) on account of the ignorance (about the same) becomes the Ātman, after it has destroyed the two¹ by the knowledge of the true nature of the inner self. [721]

¹This refers to the two limiting adjuncts mentioned as *kārya* and *kāraṇa* in the preceding verse.

व्युत्थाय कारणात्कार्यात्तत्त्वज्ञानवर्त्मना ।
उपेत्य कूटस्थमजमासीतापरिणामवान् ॥७२२॥

Having risen above the cause and (also) the effect by (following) the way of knowing the truth of that (i.e. inner self) and (thus) having gone nearest unto the immutable, unborn, (a person¹) should become unpossessed of (every) modification. [722]

¹That is, *sādhaka* 'worshipper of the Ātman'.

व्यक्ताव्यक्तविभागो ऽयं सिध्येदात्मन्यतद्वति ।
अहोरात्रविभागो ऽयं भानौ तद्वहिते यथा ॥७२३॥

This division (of the world) into the manifest and the unmanifest would stand established¹ in the case (of the Ātman), which does not possess the two, in the same way as the division of day and night, in the case of the sun who is without them. [723]

¹That is, is related to; cf. verse 720 above.

आत्मानात्मविभागो ऽपि नायमात्मस्पृगीक्ष्यते ।
अज्ञातात्मैकसाक्षित्वादज्ञानोत्थं न वस्तुगम् ॥७२४॥

Even¹ this division of the Ātman and the non-Ātman is not considered to pertain to (lit. to touch) the Ātman, because it has only the Ātman, not known before, as its witness; (in fact) whatever arises from ignorance does not pertain to (the real) thing. [724]

¹This implies: Like the division into the cause and the effect.

अनात्मसिद्धिवन्न स्यादात्मसिद्धिरनात्मनः ।
आत्मनो ऽनात्मसिद्धिश्च नैव स्यादात्मसिद्धिवत् ॥७२५॥
आत्मनो व्यतिरेकेण नैःस्वाभाव्यादनात्मनः ।
तथैवाव्यतिरेकेण रज्जसर्पखपृष्पवत् ॥७२६॥

The (existence of the) Ātman cannot get established¹ (with the help) of the non-Ātman in the same way as (the existence of) the non-Ātman gets established (with the help) of the Ātman². So also, the non-Ātman does not get established (with the help) of the Ātman as the Ātman gets established.³

[725]

(And this is so, also) because the non-Ātman stands apart from the Ātman owing to its not having a nature of its own and also since it is not apart from the Ātman as in the (instance of) a rope-serpent and/or a sky-flower.⁴

[726]

¹That is, cannot come into existence.

²Read SP: *vyavahāradaśāyām anātmano jaḍasyājaḍātmaprasādāt siddhivad anātmaprasādān nātmasiddhiḥ ...*

³The Ātman is self-established (*svayamprakāśa*). The non-Ātman cannot establish itself. Nor does the Ātman establish (i.e. really produce) it.

⁴This is yet another argument to point to the imaginary character of the non-Ātman. It does not exist in its own right or as apart from the Ātman. It is like a sky-flower or a serpent in the place of a rope!

तस्मान्नानात्मनो ऽस्त्यात्मा नाप्यनात्मात्मनः स्वतः ।
आत्मनस्तु स्वतः सिद्धिरात्मसिद्धेरनन्यतः ॥७२७॥

Therefore,¹ the Ātman does not exist on account of the (supposed existence of) the non-Ātman; so also does not the non-Ātman exist on account of the existence of the Ātman, or, on its own account. As against this, the existence of the Ātman is established on account of itself, for, the Ātman does not get established by anything else.

[727]

¹Or, thus.

यावानात्मनि वेदात्मा प्रतीच्यात्मानमात्मना ।
निरस्ताज्ञानतत्कार्यं पश्येत्तद्वदनात्मसु ॥७२८॥

As¹ the Ātman has known itself in the ...

i.e. by its own effort, so also should the inner self know itself (even) in the non-Ātman (taken as existent) to be the one who has cast off all ignorance and its effect(s). [728]

¹ *yāvan ... tadvat* are for *yadvat ... tadvat* (i.e. *yathā ... tathā*).

बुद्ध्यादेर्विषयान्तस्य निरस्तस्यात्मनो बहिः ।
अनात्मवस्तुनः प्रत्यङ्ङात्मा ह्यात्मीयतो भवेत् ॥७२९॥

The Ātman is inside (all) the non-Ātman, viz. what begins with intellect and ends with the objects of various sense-organs and which are set aside as external (to the Ātman); (this is so) because each of the things belongs to the Ātman (viz. the inner self). [729]

तद्याथात्म्यात्महेतुभ्यामनात्मार्थसमागमे ।
अव्यावृत्ताननुगतसंगती रज्जुसर्पवत् ॥७३०॥

Therefore, when the Ātman is in conjunction with the non-Ātman object(s) on account of its true nature (of pervading everything) and the things being caused by the Ātman, there follows the association of the non-differentiated and the unique Ātman like (in the illustration of) the serpent seen in the place of a rope. [730]

The idea is: As a rope appears to be a serpent, so does the inner self appear to have the various sense-organs, as it were.

प्रतीचो ऽव्यतिरेकेण तदन्यद्वस्तु सिध्यति ।
प्रतीचा तस्य जग्धत्वात्क्वानात्मा सिध्यतामयम् ॥७३१॥

A thing other than the inner self gets established as existent (only) as (really) not being apart from it because it is pervaded (lit. eaten, devoured) by the inner self; whence can the non-Ātman (originate) then? [731]

This stresses that the connection between the inner self and the non-Ātman is imaginary.

सहते ऽनात्मतां नात्मानात्मा तद्विरहे कुतः ।
वस्त्वात्मना न चेत्सिद्ध्येत्कुतः सिद्ध्येदनात्मना ॥७३२॥

The Ātman cannot tolerate anything of the nature of the non-Ātman, how then can there exist a non-Ātman in the absence of the Ātman? If Reality does not get self-established by itself, how could it get established by any non-Ātman? [732]

This is to strengthen the idea of the imaginary relation between the Ātman and the non-Ātman. Also, this is another reason to prove the imaginary character of the non-Ātman.

स्वात्मन्येव सदन्यत्र सर्ववस्तु प्रसिध्यति ।
तत्र चेत्तदसत्सत्स्यात्कथमन्यत्र निष्प्रमम् ॥७३३॥

All things appear elsewhere¹, remaining (unchanged) in their own nature², and in case it is non-existent there, how could the existent exist elsewhere as non-perceptible? [733]

This illustrates the thought in the preceding verse: The non-existent non-Ātman cannot really exist in what one might call as its effects.

¹That is, in many forms.

²For example, clay changing into a plate, a pot, a pitcher etc.

मातृत्वकञ्चुको यद्वदात्मानात्मानमीक्षते ।
दृष्टिमात्रैकरूपत्वान्न तथात्मानमीक्षते ॥७३४॥

As the Ātman, wearing a robe in the form of the character of a seer, sees the non-Ātman; in the same way does not the Ātman see itself on account of its being merely the seeing (one)¹. [734]

The idea is: The character of the inner self as the seer of outside world is only attributed to it; in that sense, it sees the objects in the world. But it cannot see itself and the real seer.

¹*dr̥ṣṭi* = *draṣṭr*. Also, cf. note on verse 745 below.

कर्तृत्वप्रतिषेधार्थं द्रष्टुर्दृष्टेरिति श्रुतिः ।
दृष्टिरेव तु यो द्रष्टेत्याह दृष्टिविशेषणम् ॥७३५॥

The statement in the Śruti *draṣṭur dr̥ṣṭer*¹ is for the purpose of the denial of any activity (on the part of the Ātman) and (the Śruti) has mentioned the distinguishing factor of seeing in the statement 'He is the seer who is the sight.' [735]

¹BU 4.3.23: *na hi draṣṭur dr̥ṣṭeh*.

प्रतीचो वस्तुनस्तावद्वस्तुवृत्तं यथोदितम् ।
शब्दवृत्तमथेदानीं यथावदभिधीयते ॥७३६॥

Thus is explained the nature of Reality in the case of the inner self,¹ so now is explained the purport of the word.² [736]

¹This refers to the discussion which was begun in verse 723 above.

²*śabdavṛtta* refers to the use and purpose of various words in relation to the Ātman.

यच्चाप्नोति यदादत्ते यच्चात्ति विषयानिह ।
यच्चास्य संततो भावस्तस्मादात्मेति कथ्यते ॥७३७॥

The Ātman is so called, since it pervades, takes up, experiences (lit. eats) objects (of pleasure) here (i.e. in this world) and has a continued existence. [737]

SP points out that this is a verse of Vyāsa. Cf. *Mahābhārata* 1.524* (2); this is inserted after 1.57.88ab in Poona critical ed.

यस्मादर्थे तु विज्ञेया यच्छब्दाः सर्व एव तु ।
समुच्चये चशब्दाश्च तथा सर्वत्र योजयेत् ॥७३८॥

Indeed all the four expressions, viz. *yat* (four times in the
(...)) should be understood only¹ in the sense of

yasmāt 'because' and the (three) *cas* also are in the sense of collection; in this way should one connect the words together everywhere. [738]

¹SP comments: First *tu* is for specification (*avadhāraṇa*) and the second, to indicate the absence of any other sense of the word.

व्याप्नोत्यनवशेषेण सर्पादीन्स्रगिवाखिलान् ।
प्रत्यक्त्यानात्मनो ऽतः प्रत्यगात्मेति भण्यते ॥७३९॥

[In verses 739-740, Sureśvara derives the word *ātman* from the verb root $\sqrt{\text{āp}}$ 'to pervade'.]

Since it pervades all the non-Ātmans in their entirety by being inside them, like a wreath of flowers (etc.) pervades (all) the serpents etc.,¹ it is called the inner self. [739]

This versre is the explanation of *yac cāpnoti tasmāt* in verse 737 above.

¹The word etc. refers to well-known instance of superimposition.

सावशेषात्मनो ऽकृत्स्नान्निःशेषात्मतया यतः ।
आत्मानात्मन आप्नोति तेनात्मेत्यभिधीयते ॥७४०॥

The Ātman is so called (i.e. Ātman) since the Ātman pervades (all) the non-Ātmans which are of the nature of some dependent things (and) incomplete, being entirely one with them. [740]

स्वचिदाभासमोहेन तदुत्थानखिलान्यतः ।
आदत्ते ऽनात्मनः प्राज्ञे ततश्चात्मेति तं विदुः ॥७४१॥

Since in *Prājña* (viz. form of the Ātman in the state of deep sleep) it receives within itself by a semblance of its own consciousness all the non-Ātmans which have arisen from it, therefore, they have known it as the Ātman. [741]

Here, Sureśvara derives the word *ātman* from the verb root $\sqrt{dā}$ 'to withdraw'.

पर आत्मनि सर्वे ऽपि संप्रतिष्ठन्त एकले ।
पृथिव्याद्या अनात्मान इति चार्थवणे वचः ॥७४२॥

All (objects) without exception (*api*) remain (dormant) in the highest Ātman, which is just alone (i.e. one without a second). And (i.e. for,) there is a statement in the Ātharvaṇa (Śruti) *pr̥thivyādyā anātmānaḥ* ... 'The earth etc., the non-Ātman ...'¹
[742]

Sureśvara confirms the deviation in the preceding verse by a statement in the Śruti.

¹ *Praśnopaniṣad* 4.9-11.

स्वात्माभासाः पराचीना धीवृत्तीर्विषयोन्मुखाः ।
प्रत्यगति यतो ऽतो ऽसावात्मैत्युक्तो मनौषिभिः ॥७४३॥

Since the inner self experiences (lit. eats) (all) the modifications of the intellect which are directed towards objects, which are of the nature of the semblance of its own self, and which have turned outwards; therefore, the wise ones have called it the Ātman.
[743]

Here, Sureśvara derives *ātman* from the verb root \sqrt{ad} 'to eat'.

विश्वो हि स्थूलभुङ्नित्यं तैजसः प्रविविक्तभुक् ।
आनन्दभुक्तथा प्राज्ञ इति चागमशासनम् ॥७४४॥

Indeed Viśva is ever the enjoyer of what is gross and Taijasa, the enjoyer of what is segregated (from the body itself), and similarly Prājña is the enjoyer of bliss — this is the instruction in Āgama 'Vedāntic tradition'.
[744]

This is *Gaudapādakārikā* 1.3a-c. It is called Āgama, i.e. raised to the status of the Veda.

अव्यावृताननुगतः पूर्णः स्वात्मन्यवस्थितः ।
यतो ऽस्य संततो भावस्तस्माच्चात्मेति सद्ध्यते ॥७४५॥

Since the Ātman is not distinguished (from anything else), not followed (by anything similar to itself), full (i.e. complete), resting in itself (i.e. independent of anything else) and since the existence of this is continuous, therefore, it is called the Ātman. [745]

This is the total meaning of *yac cāśya saṁtato bhāvas tasmād ātmeti kathyate* in verse 737 above. SP points out that every former adjective leads to the subsequent.

तद्विष्णोरिति मन्त्रो ऽपि विष्णोस्तत्परमं पदम् ।
चक्षुर्वदाततं व्योम्नि व्याचष्टे प्रत्यगात्मनि ॥७४६॥

And the R̥gvedic verse *tad viṣṇoḥ ...*¹ also declares (only) in respect of the inner self that the highest step of Viṣṇu is wide-stretched in the sky just like the eye. [746]

¹ *R̥gveda* 1.22.20; 1.154.5: *tad viṣṇoḥ paramam padam sadā paśyanti sūrayaḥ, divīva cakṣur āyatam ...* Also cf. *Subālopaniṣad* 6.1.

नानत्पन्नमतो ज्ञानं नानपास्तं तथा तमः ।
यथौक्तैकात्म्यसंदृष्टावतः कात्स्न्यं ममात्मनः ॥७४७॥

When there is the seeing of the uniqueness of the Ātman, as described before, it is not that knowledge is not produced in this one, so also it is not that ignorance is not removed from (it). Therefore, there is fullness of the inner self.¹ [747]

¹ Or, it literally means: of me, the Ātman. But see *pratyak* in the next verse.

द्रष्टृदर्शनदृश्यानां प्रत्यक्त्वं यतस्ततः ।
तद्दृष्टावखिलं दृष्टं रज्जुसर्पादिवद्भवेत् ॥७४८॥

Since the seer, the activity of seeing, and the object of seeing

have their true nature only in the inner self; therefore, on seeing that (viz. the inner self), all that is seen (before) would become (unreal) like the serpent in a rope etc. [748]

This explains, with illustration, the thought in the preceding verse.

स्रगज्ञानैकहेतूनां स्रग्धिया ज्ञातता यथा ।
प्रत्यङ्मोहजवस्तूनां प्रतीच्यवगते तथा ॥७४९॥

As by the knowledge of a wreath of flowers (in its true nature), there arises the knowledge of the sole cause of ignorance about (the true nature) of the wreath of flowers, so also, when the inner self¹ is known, there results the knowledge of the objects produced from the ignorance about (the true nature) of the inner self. [749]

¹That is, its true nature.

अत्र ज्ञाते यतः सर्व ऐकात्म्यं यान्त्यशेषतः ।
प्राणादयो ऽत आत्मैव द्रष्टव्यः सर्वदर्शनात् ॥७५०॥

Since, in the present context, (the true nature of the Ātman) being known, all (the non-Ātmans), without any exception, become (understood as) one with (the Ātman), therefore, Prāṇa etc. should be seen (i.e. understood) as the Ātman itself; (this is so), because of the statement about the seeing of all. [750]

केचिद्व्याचक्षते ऽपूर्वं विधिमेतं महाधियः ।
नियमं त्वपरे धीराः परिसंख्यामथापरे ॥७५१॥

[Now follows in verses 751-757 a discussion regarding *ātmety evopāsita* as Apūrva-vidhi as held by the non-Vedāntins.]

Some persons of great wisdom explain this (sentence)¹ as an injunction about what is not (known) before,² whereas other learned men call it a restrictive injunction, and, further, some others call it an injunction for exclusion.³ [751]

In this context, it is useful to remember *Tantravārtika* 1.2.4:
vidhir atyantam aprāptau niyamaḥ pākṣike sati /
tatra cānyatra ca prāptau parisamkhyeti gīyate //

¹Namely, *ātmety evopāsita*.

²Some translate *Apūrva-vidhi* as 'originating injunction' — conveniently to be used. This injunction is about some matter/procedure not known before; *pramāṇāntareṇāprāptasya prāpakah*.

³This can be translated as 'excluding injunction'; *pakṣe 'prāptasya prāpakah*.

नापर्वविधिरित्येष कदाचिदपि गृह्यते ।
 सर्वदैव तु तत्प्राप्तेस्तथा नान्यो ऽपि कश्चन ॥७५२॥

It is never to be accepted that this is an originating injunction, since that (viz. the *Ātman* about which the *Śruti* speaks) is ever acquired (i.e. understood), so also there is no other (injunction) ¹ possible. [752]

¹This refers to restrictive and excluding injunctions.

पुंव्यापारानधीनत्वान्नेह संभाव्यते विधिः ।
 स्वव्यापारैकविषयः सर्व एव यतो विधिः ॥७५३॥

(Further) here (in respect of the knowledge of the *Ātman*) there is no possibility of (the prescription of) any injunction, since (securing the knowledge of the *Ātman*) is not dependent on any human activity and since every injunction has for its subject an activity of one's own. [753]

संस्थेम्ने ऽस्यैव चार्थस्य पूर्वपक्षोक्तिपूर्वकः ।
 भाष्यकृद्भिः कृतो यत्नः स आविष्क्रियते ऽधुना ॥७५४॥

The revered author of the *Bhāṣya* has made an effort (to secure) firm postulation of this very idea ¹, having first stated the *prima facie* views. That (effort) is now explained. [754]

¹Namely, this is not a matter that can be the subject of any type of injunction.

यथा कार्यानपेक्षस्य प्रामाण्यं वचसः स्फुटम् ।
ऐकात्म्यवस्तुनिष्ठस्य तथा पूर्वमवादिषम् ॥७५५॥

As there is authoritativeness of the statement which does not expect any activity to be performed, so (is it there in respect of the statement) which pertains only to the uniqueness of the Ātman; so I have clearly explained earlier.¹ [755]

¹This has a reference to SV 20-31 in particular.

लिङ्प्रत्ययश्रुतेरत्र भ्रान्तिः समुपजायते ।
यजेतेत्यादिसामान्याद्विद्यर्थो ऽतौ विचार्यते ॥७५६॥

Since there arises here¹ some misunderstanding after one has heard the suffix of the potential mood, i.e. because of its similarity with (the suffix in the form) *yajeta* etc., therefore, the meaning of the potential mood is (now) taken up for discussion. [756]

This is to justify that this discussion is not any repetition; it is purposeful.

¹In respect of the sentence *ātmety evopāsita*.

सिद्धान्तोपक्रमः पूर्वं पूर्वपक्षः प्रदर्श्यते ।
सम्यग्निर्ज्ञातिसिद्धान्तो यतो वेत्ति बलाबलम् ॥७५७॥

First is stated the Siddhānta (and) the *prima facie* view is stated (later); since one, who has well ascertained the Siddhānta, (understands) the strength or weakness (in the same). [757]

In BUB, Śaṅkara has followed the unusual method of discussion; he has not stated the objector's view. Sureśvara explains and justifies his teacher's procedure of discussion. This is explanation of Anukta in the Bhāṣya

नापूर्वविधिरेष स्यात्पक्षेप्राप्तत्वकारणात् ।

पक्षे प्राप्तिर्विचारान्ते वक्ष्यते कारणाश्रयात् ॥७५८॥

[In verses 758-769 follows an exposition of the Uttarapakṣa-Siddhānta — as stated by the Bhāṣyakāra.]

This is not (lit. would not be) an originating injunction for the reason that it¹ is known as having the form of alternatives.² As to how there occurs (a possibility of) alternatives will be stated at the end of the discussion³ (on the question of an originating injunction) by resorting to (some) reason. [758]

¹Namely, knowledge about the Ātman.

²That is, not necessarily by this sentence *ātmety evopāśita*.

³SP: *prārabdhakarmavaśāt kṣutpipāsādidoṣodbhavād ātmano vi-smaraṇam anātmanah smaraṇam ca sambhāvitam iti vadan bhāṣyakṛj jñānasya pakṣe prāptim vicārāvasāna vakṣyatīty arthah.*

नित्यप्राप्तिमिहाचष्टे विद्यर्थपननत्सया ।
अप्राप्तांशानुपात्येव सर्व एव विधिर्यतः ॥७५९॥

With a view to setting aside the meaning (as conveyed by) an injunction, (the author of the Bhāṣya) stated here that the Ātman is ever known, because every injunction necessarily (*eva*) follows that part (of the object to be known) which is not known.¹ [759]

¹SP adds: *ato nityaprāpte jñāne na kaścid api vidhiḥ.*

पाक्षिक्युपासनप्राप्तिर्नित्या वेति च लिङ्गतः ।
विवक्षिता भाष्यकृतो नित्यप्राप्तिरितीक्ष्यते ॥७६०॥

On the basis of the characteristic mark¹ *nityā vā*, one gets that the intended (thought of the Bhāṣyakāra is about meditation (taken as) an alternative (to something else), and that it is understood as ever obtaining. [760]

There is a reference here to BUB: *yat sākṣād aparokṣād brahma ... na vidhātavyam prāptatvāt ... nityā veti.*

¹That is, the words.

यत्साक्षादितिवाक्योत्थप्रत्यग्याथात्म्यलेहिना ।
ज्ञानेन तमसो दाहात्कुतो विध्यर्थसंभवः ॥७६१॥

How can there be any possibility of an injunction since there is a removal of ignorance¹ by knowledge which leads to² (the knowledge of) the true nature of the individual self arising from the sentence (of the Śruti) *yat sākṣāt ...*³ [761]

¹It literally means: burning away of darkness.

²It literally means: licks or touches.

³Cf BU 3.4.1-2; 3.5.1.

कारकाण्युपमृद्नाति विद्या बुद्धिमिवोषरे ।
कारकत्वमविद्योत्थं स्वतश्चाकारकात्मता ॥७६२॥

Knowledge (of the Brahman) destroys (the notion of) the means¹ in the same way as (it destroys) the apprehension (of a mirage) in a desert place; since (the notion of) the character of the means arises from ignorance and not the nature of the means from itself.² [762]

¹It refers to the means of action such as the agent, the object etc.

²It is dependent on acceptance by someone of *vyavahārabhūmi*.

यदज्ञानात्प्रवृत्तिर्या तज्ज्ञाने सति सा कुतः ।
न हीहापास्तनिद्रो ऽपि सुप्तवत्स्वप्नमीक्षते ॥७६३॥

How can there be that activity from the ignorance about which activity arises when there has arisen the knowledge of that? Indeed, no one here¹ sees a dream like a sleeping man even when his sleep is over. [763]

¹That is, in this world.

यद्वि यस्य स्वतो रूपं न तत्प्राप्तावपेक्षते ।

क्रियां मोहनिमित्तत्वादपेक्षा कर्त्रपहवे ॥७६४॥

Whatever indeed be the form of whichever thing, in its own right, the obtainment (i.e. knowledge) of that (thing) does not depend on (lit. expect) any activity for its being known since (it is only) on account of ignorance that there is dependence (on activity) owing to the concealment of the agent. [764]

This verse sets aside the notion of any activity for *brahmaprāpti*.

न च संमोहविध्वस्तौ यथावस्त्ववबोधतः ।
समर्थमन्यत्पश्यामः क्रियाकारकरूपकम् ॥७६५॥

For effecting the destruction of ignorance, we do not see any effective means other than the knowledge of the thing as it is, (viz.) such a means as has the nature of activity and its agent. [765]

This is to discard the idea of any means for the removal of ignorance about the Brahman.

स्वाध्यायाधीतिविधिना ज्योतिष्टोमादिबोधवत् ।
सदा प्राप्तात्मविद्यापि नातो विधिरिहेष्यते ॥७६६॥

As by an injunction in respect of the recitation (or study) of one's own book of study there arises the knowledge of (the need of performing) Jyotiṣṭoma etc., so is known (from it) the lore of the Ātman. Therefore, here (i.e. in this sentence) an idea of injunction is not (to be) entertained. [766]

This verse implies and answers a question whether the injunction should pertain to the knowledge of the meaning of words or another knowledge, viz. direct perception. The first alternative is answered.

देहेन्द्रियमनोबुद्धिसर्वव्यापारभासिनः ।
लिङ्गतश्चावसेयत्वान्न संभाव्यो विधिस्ततः ॥७६७॥

Therefore, it follows that an injunction is not possible¹ as

(the Brahman) can be² inferred from the characteristic (of it) which reveals all the activity of the body, its organs, *manas*, and intellect. [767]

This verse points out as to why an injunction is not intended for a transmigratory being.

¹That is, necessary.

²That is, is.

तथाहंप्रत्ययात्साक्षादात्मयाथात्म्यनिश्चितेः ।
असम्भवादसंप्राप्तेः कुतो विधिरिहेष्यते ॥७६८॥

So also, on account of the awareness 'I (am).' and the consequent direct decision (or ascertainment) about the true nature of the Ātman, there is an impossibility of one's not getting that¹. How then can be an injunction expected on that behalf? [768]

This refers to a transmigratory being who has known about the nature of his own self.

¹That is, one's getting to know that.

नन्विहात्मार्थसंदृष्टावहंप्रत्ययगम्यता ।
पाक्षिकीति ततो ऽप्राप्तेर्भवेन्नैयमिको विधिः ॥७६९॥

(One might object:) Here (in this context), for the purpose of the knowing¹ the Reality (viz. the Ātman) its nature of being known by the awareness 'I am (the Ātman).' is variable² and since the knowledge of the Ātman may not therefore be obtained (necessarily), the sentence (*ātmety evopāsīta*) is a restrictive injunction. [769]

This refers to the argument that the injunction pertains to knowing of non-transmigratory Ātman.

¹It literally means: seeing.

²That isto say: It does not obtain invariably.

पाक्षिकी तावदत्रास्तामैकात्म्यार्थावलेहिनः ।

ज्ञानस्य प्राप्तिर्नित्या वेत्यस्त्वपूर्वो विधिः स्फुटः ॥७७०॥

[Verses 770 -791 discuss the view that the Upāsana of the Ātman has to be prescribed by an injunction.]

May the knowledge pertaining to the unique Ātman be obtained only optionally or let it be ever obtaining, there is to be clearly an originating injunction. [770]

This is the statement by one who accepts the injunction to be originating injunction.

एकार्थोल्लेखिवृत्तीनामातादात्म्याभिमानतः ।
आप्तेडनं हि शब्दार्थः सर्वत्रोपासनश्रुतेः ॥७७१॥

Indeed the meaning of the word *upāsana* in the Śruti statement means the repetition of such functions as (lit.) touch but one object (viz. the truth) up to the (moment when there arises) the awareness of oneness (with that, viz. the Ātman). [771]

This explains the meaning of *upāsana* in relation to the originating injunction.

न पश्यन्तीत्यतो लिङ्गाज्ज्ञानमेव विधित्सितम् ।
न तूपासनमिति चेन्मैवमैकार्थ्यकारणात् ॥७७२॥

(If one would say,) since they do not perceive (the Ātman directly), therefore only that knowledge which arises from its characteristic is intended to be prescribed (in the injunction), but not an Upāsana; (then we say:) Let this not be so, because of the oneness of the meaning (of the two words knowledge and Upāsana). [772]

The purpose is to point out the inutility of explaining the meaning of Upāsana — it should be understood in the sense of *jñāna* .

सर्वत्रैकार्थता दृष्टा वेदोपासनशब्दयोः ।
यथान्यत्र तथेहापि कस्मान्नाध्यवसीयते ॥७७३॥

We have seen the oneness of meaning in the case of the two words knowing (*veda*) and meditation (*upāsanā*), why do you not decide that to be here also, as this is the case elsewhere (i.e. in other passages)? [773]

SP points out an example: *dūram ha vā asmān mṛtyur bhavati ya evaṃ veda ...* (BU 1.3.9ff.)

रश्मींस्त्वं पर्यावर्तयादिति चावर्तनात्मकः ।
विधिः श्रुतः श्रुतौ स्पष्टस्ततश्च फलसंगतिः ॥७७४॥

'May you turn the strings.'¹ is a clear injunction heard in the Śruti and it is of the nature of repetition (of activity); therefrom follows the connection (of the activity) with the result. [774]

It is followed by a clear statement about the result of Upāsana, viz. *bahavo vaite putrā bhaviṣyanti* (CU 1.5.2).

¹CU 1.5.2.

देवो भूत्वेति देवांश्च सदा तद्भावभावितः ।
देवप्राप्तिं श्रुतिः प्राह भावनाबलसंश्रयात् ॥७७५॥

Depending on the strength of meditation, the Śruti has declared that one attains to a god (i.e. godhead) by becoming a god (oneself),¹ ever resorting to the strength of devotion.² [775]

¹BU 4.1.2-7: *devo bhūtvā devān apyeti*

²Namely, the thought of being/approaching some particular god(s). SP reports that *sadā ...* is the last quarter of a Smṛti verse (*Gītā* 8.6). Also, it states that the verse points to the support of Śruti and Smṛti both.

स यो ऽत इत्युपक्रम्य ह्युपासनगिरैव तु ।
अन्त आत्मेत्युपासीत तथैवोपासनश्रुतेः ॥७७६॥

(This is so) because of the Śruti in respect of meditation where

the words relating to Upāsana have begun with *sa yo 'taḥ* ... and ended with *ātmety evopāsita*. [776]

प्रवृत्तौ चोपसंहारे तथैवोपासनश्रुतेः ।
वेदेत्युपासनार्थत्वमस्याप्यभ्युपगम्यते ॥७७७॥

Thus, since we hear the word in respect of Upāsana in the beginning and in the end as well, therefore, we accept the meaning of the word *veda* also to be Upāsana. [777]

तथैतत्सर्वं वेदेति यत्र यत्र श्रुतिर्भवेत् ।
अभ्यासस्य तदाप्राप्तेरपूर्वविधिरिष्यते ॥७७८॥

Then, in this way, wherever there is a statement *etat sarvaṁ veda* (and) there does not occur (any word conveying) repetition, that is to be accepted as an originating injunction. [778]

वस्तुस्वरूपान्वाख्याने न च कश्चित्प्रवर्तते ।
तज्ज्ञानजन्ममात्राच्च पुरुषार्थो ऽपि नेष्यते ॥७७९॥

(For) nobody enters on an activity when there is a statement about the nature of a thing (already known or existent) and it is not accepted that from the mere origin of it they accept (the idea of the fulfilment of) the end of human endeavour (i.e. liberation). [779]

यादृक्कर्मविधे रूपामात्मध्यानविधेरपि ।
तादृगेव विशेषो ऽत्र न मनागपि गम्यते ॥७८०॥

Whatever is the form of an injunction regarding an activity, so should it be of an injunction regarding meditation on the Ātman. There is not even a little difference there (between the two injunctions). [780]

कुतो ऽविशेष इति चेदत आह यथा तथा ।
मानस्येव क्रिया यस्मादविशिष्टोभयोरपि ॥७८१॥
वषट्करिष्यंस्तां ध्यायेदिति यद्वद्विधीयते ।

(One may ask:) Whence (should one hold that) there is no difference (between the two injunctions)? Therefore, (the author of the Bhāṣya) answers: *yathā ... tathā ...* (thus to say:) Because there is only a mental activity which is not distinct in the two: [781]

(Thus, for example,) as only a mental activity is prescribed (in the injunction) 'One should meditate on that when one is about to utter the word *vaṣat.*', so also (it is prescribed) in respect of meditations on objects (that are identified with) the Ātman. [782]

भावनांशत्रयं यस्मादुपासनविधावपि ।
संभाव्यते ऽतो विज्ञेयो यजेतेत्यादिवद्विधिः ॥७८३॥

Since in an injunction regarding meditation also, it is possible to notice the three aspects of Bhāvanā 'impulse'¹, so let that be considered as an injunction like (the injunction) *yajeta* etc. [783]

These three aspects are explained in verse 785 below. These are *sādhya*, *sādhana* and *itikartavyatā*.

स्वाध्यायस्य विधिर्ब्रूते लिङाद्यात्मानमेव च ।
विधिप्रशस्तज्ञानाभ्यां कुरुध्वं पुंस्प्रवर्तनम् ॥७८४॥

The injunction regarding *svādhyāya* 'one's daily study of the Veda' mentions *liṅ* a verbal suffix expressing (potential mood of the verbal form) etc. and about (*svādhyāya*) itself; by the knowledge (of the injunction) and what is praised, proceed to activity, O men. [784]

See SP on this verse and the next for definition of *śābdī bhāvanā* 'verbal creative impulse' and *ārthī bhāvanā* 'purposive creative impulse'. These are well-known concepts of Mīmāṃsā.

करणांशो विधिज्ञानं किमंशः पुंस्प्रवर्तनम् ।

इतिकर्तव्यता चात्र ह्यर्थवादप्रशंसनम् ॥७८५॥

Knowledge of *vidhi*¹ is the aspect (called) the means²; the incitement³ (of one) to activity is the 'what'-aspect⁴; and the procedure of the activity⁵ is the *prasi*⁶ of (some) already done activity. [785]

¹This explains the *śābdī-bhāvanā*, the suffix of potential (or similar mood) which incites activity of a human being.

²This is *sādhana*.

³This indicates action towards some purpose.

⁴This is *sādhya*.

⁵It is literally the description 'thus this should be done'.

⁶Or alternatively, censure also.

प्रवृत्तस्य ततः पुंसः करणं याग इष्यते ।

स्वर्गादिश्च किमंशः स्यात्प्रयाजादिस्तथा परः ॥७८६॥

It is understood that Yāga 'sacrificial performance'¹ is some activity which a man has entered on, and the heaven etc. refer to the aspect 'what'² (the result, and) the Prayāja 'fore offering' etc. the later (i.e. last)³ aspect. [786]

This explains the *bhāvanāṃśatraya* mentioned in verse 783 above.

¹It means: sacrifice (is one aspect).

²What is to be effected.

³Namely, procedure.

यथा तत्र तथेहापि शास्त्रेणैव समर्प्यते ।

अंशत्रयमतो युक्तमपूर्वविधिरेव तु ॥७८७॥

As (this group of three is) there, so also are here the three aspects (of an injunction) presented by the Śruti; therefore, it is only proper (to hold that this is) only an originating injunction. [787]

किमंश आत्मा विज्ञेयः करणांशस्तथा मनः ।

इतिकर्तव्यता त्यागब्रह्मचर्यादिसाधनम् ॥७८८॥

The Ātman is to be known (i.e. taken) as the aspect 'what' (is to be effected), so also by the word *manas* (is clarified) the aspect 'with what' and abandoning (desires), practising celibacy etc. as the 'procedure, i.e. thus it should be done'.

[788]

This explains the three aspects of the injunction in relation to *ātmajñāna*.

कृत्स्नप्रकरणार्थस्य ज्योतिष्टोमादिगामिनः ।
विद्युद्देशतया यद्वदुपयोगस्तथैव च ॥७८९॥
उपासाविध्यपेक्षस्य प्रक्रियापतितस्य च ।
आत्मार्थोपासनविधिदेशे तद्विनियोज्यते ॥७९०॥

As there is the use of the whole chapter pertaining to Jyotiṣṭoma etc. owing to its being the subject matter of the injunction, so also

[789]

(the whole of this chapter) has been put to use in an injunction regarding meditation on the Ātman for one who expects an injunction regarding meditation that has occurred in the course (of discussion).

[790]

अत्रास्थूलादिवाक्यानामुपास्यार्थसमर्पणे ।
उपयोगः फलं मोक्षस्तमसो वस्त्वपहृतिः ॥७९१॥

In this (portion connected with the meditation of the Ātman) the sentences 'It is non-gross.', etc.¹ become useful by informing us about the object of meditation and the result is liberation, viz. keeping away (lit. concealing) Reality from ignorance. [791]

¹Also cf. *Muṇḍakopaniṣad* 3.2.9: *brahma veda brahmaiva bhavati*; CU 7.1.3: *tarati śokam ātmavit*.

संप्रदायविदस्त्वन्ये यथावच्छास्त्रचक्षुषा ।
व्याचक्षते महात्मानो यथा तदभिधीयते ॥७९२॥

[Verses 792-808 explain another view: This injunction pertains

to some specific knowledge — other than the meaning resulting from words — viz. that which results into liberation.]

But now is explained that in the way as other knowers of Vedāntic tradition, the respectable (authorities), explain (this matter) with their view (lit. eye) on the existing (statements of) the Śruti. [792]

विधिश्चान्यस्य वाक्यस्य न प्रामाण्यं किलेष्ट्यते ।
नियोगानुप्रवेशेन यतो वस्त्ववबोध्यते ॥७९३॥

Since, it is reported, that no authority is accepted of a Vedānta passage which is any injunction devoid of it (i.e. injunctive force); (therefore) Reality is made known by the inclusion (of the statement about it) into an injunction. [793]

This proceeds from the rejection of any injunction by propounders of the theory of the Brahman.

नानुवादस्वरूपस्य निरस्तविधिकस्य हि ।
सापेक्षस्येह वचसः प्रामाण्यमुपपद्यते ॥७९४॥

Indeed, here (i.e. in respect of the Śruti sentences) authoritativeness of any statement cannot be reasonable, if it is of the nature of repetition, has set aside (any idea of) injunction and is dependent on (lit. expects) another (injunction). [794]

क्रियैव ननु सर्वत्र तत्र तत्र विधीयते ।
स्वव्यापारे हि विधिना नियोक्तुं शक्यते यतः ॥७९५॥

Indeed, since it is possible to induce to (one) some activity by means of an injunction, therefore, everywhere, in each context, only (some) activity (or another) is enjoined. [795]

द्रव्यस्वरूपे ऽसाध्यत्वाद्विधिः कथमिहेष्ट्यते ।
न हि सिद्धस्य साध्यत्वं निपुणेनापि गम्यते ॥७९६॥

How can (an idea of) an injunction be entertained here since

the nature of the thing (to be known, lit. obtained) is not what is to be brought into existence (lit. obtained)? Indeed, the nature of an already accomplished thing, as a thing to be accomplished, is not entertained by even an intelligent person. [796]

This rules out the possibility that the Ātman is prescribed to be obtained.

न चात्मविषयं ज्ञानं वेदान्तेषु विधीयते ।
तस्य विध्यन्तरात्सिद्धेर्वेदान्तस्यानुवादता ॥७९७॥

Further, the knowledge regarding the Ātman is not prescribed (as what is to be obtained) in any Vedānta text, since that is already accomplished with the help of another injunction. (Therefore,) the Vedānta texts have the character of (mere) restatements (about what is already known). [797]

This sets aside the idea that knowledge about the Ātman has to be produced.

स्वाध्यायाधीतिविधिना ज्योतिष्टोमादिबोधवत् ।
वेदान्तार्थावबोधो ऽपि तेनैवेह समापितः ॥७९८॥

As by an injunction in respect of one's daily study of the Veda there arises the knowledge of (the need of performing) Jyotiṣṭoma etc., so also, the knowledge of the Vedānta (viz. the lore of the Ātman) is here obtained by that (*svādhyāya*). [798]

The first line is the repetition of verse 766 above.

स्यादेतत्फलसंबन्धो नियोगविरहाद्यदि ।
प्रत्यग्ज्ञानस्य लभ्येत न त्वसौ लभ्यते तथा ॥७९९॥

This might be argued: If it is possible to see the connection of the knowledge of the inner self with the result (viz. liberation, even) without any injunction — (then it is counterargued:)

But such a connection is not seen.

[799]

पुमर्थकारिता बुद्धेर्नियोगादेव लभ्यते ।
नातस्तन्निरपेक्षस्य प्रामाण्यं वचसो भवेत् ॥८००॥

Capacity of fulfilling the end of the human endeavour is obtained only by enjoining intellect through (the force of) an injunction; therefore, there could not be authoritativeness of a statement which does not expect (i.e. is not related to) an injunction. [800]

नैकात्म्यवस्तुसंव्याप्तिव्यरितिरेकेण किञ्चन ।
फलं स्यादात्मबोधस्य यथा कर्मफलं तथा ॥८०१॥

There would not be any result accruing from the knowledge of the Ātman over and above the attainment of the Reality, i.e. being one with the Ātman in the same way as the result accrues from ritual activity. [801]

अत्रोच्यते ऽन्यदेवेदं विज्ञानान्तरमात्मगम् ।
विधीयते सहोपायं वेदान्तोक्तिप्रबोधतः ॥८०२॥

In this regard (this) is said: This is an altogether different type of knowledge,¹ pertaining to the Ātman which is prescribed together with the means, as resulting from the statement(s) of Vedānta. [802]

This is in answer to the counterargument above.

¹The word *viññānāntara* suggests that this knowledge is different from that which arises from word(s).

न हि वाक्यसमुत्थेन ब्रह्मावाक्यार्थरूपकम् ।
विज्ञानेन परिच्छेत्तुं शक्यते कर्मवत्कवचित् ॥८०३॥

In no case¹ it is ever possible to delimit the Brahman, not of the nature of the sentence-meaning by the knowledge which arises from (mainly or only) the Vedānta sentences as in the case of ritual. [803]

¹Or, in no time or place.

नानापदार्थसंसृष्टरूपं शब्दात्प्रजायते ।
विज्ञानं तेनावाक्यार्थरूपं नैव च गम्यते ॥८०४॥

From (Vedic) word there arises knowledge, which is of the nature of composite meaning of different words (*padārthas*). Therefore, that can never be known which is not of the nature of the sentence-meaning. [804]

शब्दस्वभाव एवैष संसृष्टार्थावबोधनम् ।
ब्रह्मासंसृष्टरूपत्वात्तेनातो नावगम्यते ॥८०५॥

This is the natural function of words, viz. they convey to one such information as is of composite nature, (therefore), the Brahman, on account of its nature not being composite in form, cannot be understood from this one (viz. Vedic sentence). [805]

वाक्यं चातीन्द्रियार्थेषु प्रमाणमिति निश्चितम् ।
तस्याप्यविषयत्वात्तद्विज्ञानान्तरगोचरः ॥८०६॥

And it is decided that in respect of the objects which are beyond (the grasp of) the sense-organs, it is (Vedic) sentence that is the authoritative means of knowing. (And) since that ¹ is not the object (of the information from word), that is the subject (lit. object) of some other knowledge. [806]

¹Namely, the Brahman, which is not perceptible and connected with words, (like other objects).

न चेद्वाक्योत्थविज्ञानपरिच्छेद्यं तदिष्यते ।
नाम्नायार्थो भवेत्तर्हि नैवं वेदार्थ एव हि ॥८०७॥

(It may be argued:) If it is not accepted as comprehensible from information (lit. by knowledge), from (Vedic sentence), then the Brahman will not be the thing conveyed by Veda.

(The answer to this is:) It is not so. Indeed (that Brahman is) but the thing conveyed by the Veda. [807]

अपि चाधीयते ऽत्रार्थे वेदवाक्यान्यनेकशः ।
प्रज्ञां कुर्वीत विज्ञायेत्येवमादीनि यत्नतः ॥८०८॥

And, in this regard, they recite (a number of) Vedic sentences in various ways; (Vedic sentences) *viññāya prajñām kurvīta*¹ and others (have to be recited) specifically (or, with special effort). [808]

Here concludes the statement of the view of some (special) kind of knowledge about the Brahman from the Veda.

¹For metre, Sureśvara has changed the order of words. See BU 4.4.21.

Verses 809-847 are the Siddhāntin's view.

मुमुक्षुपुरुषार्थस्य मोहमात्रान्तरायतः ।
ज्ञानात्कार्यान्तराभावान्नैतत्साधवभिधीयते ॥८०९॥

Whatever has been said (by way of opposition to our Siddhānta) is not well said, because from the knowledge (of the meaning of Vedic sentences) there follows the absence of (any other) activity to be undertaken (and) because there is an obstacle only of ignorance in respect of the (ultimate) end of human endeavour in the case of a seeker of liberation.¹ [809]

¹NKL edition and NKL (*pratīka*) reads: *mumukṣoḥ* ...; an easier reading. But that does not make any difference of meaning.

विधेर्हि तत्र साफल्यं यत्र वाक्योत्थबोधतः ।
व्यतिरेकादनुष्ठेयः पदार्थः कश्चिदिष्यते ॥८१०॥
यथाग्निहोत्रयाथात्म्यविज्ञानव्यतिरेकतः ।
प्रयोगात्मा पृथक्तादृङ्नेह कश्चिदपीक्ष्यते ॥८११॥

There is meaningfulness¹ of an injunction only in that they understand some (other) thing over and above (that) which

is apart from the meaning arising from (Vedic) sentence and which is to be accomplished. [810]

(And) as, in addition to the knowledge of the nature of Agnihotra, they understand (from a Vedic sentence) another distinct (object) of the nature of performance; so they do not expect here (in Vedānta) any object whatever), similar in nature. [811]

¹That is, usefulness; or lit. fruitfulness.

उत्पत्त्यादौ हि साध्ये ऽर्थे पुंव्यापृतिरपेक्ष्यते ।
उत्पत्त्यादिविरुद्धत्वान्मुक्तेर्नान्यव्यपेक्षिता ॥८१२॥

They expect a man's performance of some activity in respect of accomplishment (of some thing like a sacrifice) etc. And since liberation is opposed to what is accomplishment etc., there is no expectancy of anything else. [812]

utpattyādi signifies four types of (ritual) activity related to objects, viz. *utpatti* 'origination/production', *āpti* 'obtaining/achieving', *vikṛti* 'modification/change', and *saṃskṛti* 'refinement/polishing'.

उत्पत्त्यादि स्वतो नो चेत्किं मुक्तौ कर्मणः फलम् ।
उत्पत्त्यादि स्वतश्चेत्स्यात्किं मुक्तौ कर्मणा वद ॥८१३॥

(One might ask:) If (any of) accomplishment etc. of liberation ¹ does not occur of itself, what is the use (lit. fruit) of activity? If again (any of) accomplishment etc. of liberation does occur of itself, what is the end of activity? Tell me. [813]

The objector takes his stand on the supposition that liberation can be achieved like heaven by activity. Hence, a double-edged argument.

¹*muktau* (Locative) is for *mukteh* (Genitive/Ablative as well); in the case of liberation.

उत्पत्त्यादौ तु यच्छक्तं हेतुमात्रमपेक्षते ।
तस्य कर्मव्यपेक्षा स्यान्नान्यथा तदपेक्षते ॥८१४॥

For *utpatti* etc. (of Agniṣṭoma) there is need of some able (individual) as the (efficient) cause and, in respect of that efficient cause (also), there is need of his (doing some) activity; (when it is) otherwise, it would not expect that (activity). [814]

The argument is: For achieving heaven, activity is necessary. Not for attaining liberation.

प्रवृत्त्या स्वात्मसिद्ध्यर्थं कारकं सदपेक्षते ।
कारकाणां क्रियापेक्षा नोभयापेक्षितात्मनि ॥८१५॥

In order that there is accomplishment (etc.) of an activity, it expects an existent agent etc. So also do agent etc. expect (i.e. depend on) some activity of them; but (in respect of) the Ātman, there is no expectancy (i.e. dependence on) both. [815]

संभावितात्मकर्तृत्वो ब्राह्मण्याद्यधिकारवान् ।
विधिश्रुतेः प्रवर्तेत न तु प्लुष्टतदन्वयः ॥८१६॥

On hearing an injunction, a person, who is eligible by being a Brāhmaṇa etc. and who has considered his own capacity to perform (a ritual activity), proceeds (to perform that activity); but not the one who has got rid of (lit. burnt) that relation (viz. association) with the same.¹ [816]

¹Namely, *kartṛtva* and *adhikāra*. These are not required in the pursuit of the Brahman.

अपूर्वानपराबाह्यं ब्रह्मास्मीति विजानतः ।
कारकत्वं न संभाव्यं तन्मोहविरहात्क्वचित् ॥८१७॥

It is not at all¹ to be thought of one, who knows 'I am Brahman (which is) not preceded by anything, not having any subsequent, and not outside anything.', that one has the desire (lit. capacity) to act, because there is an absence of ignorance about it.² [817]

¹Or rather, never or not anywhere (for *kvacit*).

²That is, in respect of any ritual activity.

आत्मनो ब्रह्मता यत्र ब्रह्मणो ऽप्यात्मता स्वतः ।
तत्त्वमस्यादिवाक्योत्थबोधाच्चेत्किमितीहते ॥८१८॥

When¹ the inner self is taken to be the Brahman and the Brahman is by itself taken to be the inner self, thanks to the understanding which has arisen from the sentences like 'That you are.' etc., what then does one wish for in this?²

[818]

¹This refers to one's state of having obtained the knowledge of the Brahman.

²That is, in this world full of ritual and other activities.

अब्रह्मानात्मविज्ञानमोहोत्थध्वंसहेतुतः ।
प्रत्यग्याथात्म्यबोधस्य कुतो ऽमूढः प्रवर्तते ॥८१९॥

Since the knowledge of the true nature of the inner self arises from the knowledge of that which is not the Brahman¹ or the Ātman and which is the cause of the destruction of ignorance, for what reason would one, devoid of (any) ignorance, proceed² to perform any (ritual) activity? [819]

¹These clauses negate the basis of any eligibility of a person for ritual performance.

²*pravartate* is for *pravarteta*.

तत्र को मोह इत्येवं मन्त्रवर्णो ऽपि नो जगौ ।
संसारासंभवं साक्षादेकत्वमनुपश्यतः ॥८२०॥

In that respect, the text of a Mantra has sung¹ to us the impossibility of transmigratory existence in the case of a person who directly experiences his own identity with the Brahman in the words, 'What ignorance is there?'².

[820]

¹That is, declared.

²Cf. *Īsopaniṣad* 7.

बाध्यबाधकभावाच्च प्रत्यङ्मोहप्रबोधयोः ।
सहावस्थानताभावात्प्रवृत्तेः स्यादसंभवः ॥८२१॥

And because there exists between ignorance and knowledge about the inner self the relation of the stultified and the stultifier, there cannot be their co-existence and (as such) there cannot be any activity (undertaken by the knower). [821]

मतं वाक्योत्थविज्ञानमात्राच्चेन्न निराकृतिः ।
अब्रह्मानात्मविषयमोहस्येति न तत्तथा ॥८२२॥
तत्त्वमस्यादिवाक्यानां तावन्मात्रावबोधनात् ।
अर्थान्तरं न संभाव्यं वाक्यवाक्यार्थवेदिना ॥८२३॥

If it is held: There is no removal of ignorance in respect of the objects which are non-Brahman and which non-Ātman by mere knowledge arising from the sentence (in the Śruti).; (we say:) It is not so. [822]

By knowing only that much¹ from (Vedāntic) sentences like 'That you are.', a knower of the meaning of the Vedic sentence and its meaning does not have to think of any other object. [823]

In verse 822, there is clarification of the objection raised in BUB: *vākya-janitavijñānamātrāt nābrahmānātmavijñānanivṛttir iti cet.*

अस्थलाद्यर्थशंसीनि द्रष्टव्यादिविधेर्यदि ।
समर्पयेयुर्विषयमित्येतदपि नेष्यते ॥८२४॥
मुक्त्यन्तरायसंमोहविध्वंस्यैकात्म्यवोधतः ।
न तदर्थान्तराभावादिति पूर्वमवादिषम् ॥८२५॥

If (it is argued) that the conveyers of such meaning as 'not fat' etc. from the injunction, 'That is to be seen etc.' would bring to the fore that object,¹ (then we say:) This also is not accepted, [824]

because, on account of the absence of any object other (than

the self) which results from the knowledge of the oneness (of the inner Ātman and the Brahman) which destroys ignorance (that acts as) an impediment to liberation, there is no possibility of the existence of another object — this is what I have said earlier.² [825]

In this verse there is clarification of another objection in BUB: *draṣṭavyavidheḥ viśayasamarpakāny etānīti cet*. The last quarter of verse 824 conveys the Siddhāntin's reply, viz. rejection of the objector's arguments — continued in verse 825.

¹Namely, the nature of the Ātman.

²Cf. SP: *siddhāntopakrame darśitam*.

प्रत्यग्याथात्म्यव्याख्यानमात्रेणैव विना विधिम् ।
न प्रवर्तेत वाक्यार्थसंबोधायेति चेन्मतम् ॥८२६॥
नात्मयाथात्म्यसंबोधिवाक्यश्रवणमात्रतः ।
प्रत्यक्तत्त्वधियः सूतेः किमन्यद्विधिनेष्यते ॥८२७॥

If it is held that (an individual) would not proceed for (acquiring) the knowledge of the sentence-meaning when there is not any injunction (regarding that) and by (i.e. under the impulse of) mere exposition of the true nature of the individual self, [826]

(the reply is:) No. (This should not be so considered) since on mere hearing the sentence expository of the true nature of the self there results the knowledge of the true nature of the inner self, what else is there to be expected from an injunction?¹ [827]

It is held by the objector that an injunction has to be known for the pursuit of the knowledge of the Brahman.

¹It means: by an injunction (*hetau tṛtīyā*).

अन्तरेण विधिं वाक्यश्रवणायापि नेहते ।
इति ब्रुवाणं प्रब्रूयादनिष्टं श्रूयते कुतः ॥८२८॥

To one who says: (No person) desires to hear a sentence (in the Śruti) unless there is an injunction in it, (a Vedāntin)

should say: For what reason is heard (a sentence conveying) the undesirable?'¹ [828]

¹SP explains: In common conversation one does hear many undesirable words. There is not any injunction for one to hear them. In the same way, one does not need to have an injunction so that one hears the Veda on the matter of the Brahman.

अनवस्थाप्रसक्तिश्च तत्र तत्र प्रसङ्गतः ।
विध्यन्तरस्येति ततो यथोक्तो ऽर्थो ऽवसीयताम् ॥८२९॥

And there would follow the contingency of *infinite regress*, in respect of every context (viz. in respect of every injunction), therefore, there would be the contingency of (expecting) another injunction. For this reason, may you accept what we have said. [829]

The argument is: If, for hearing the Vedānta sentence, one expects an injunction which is also conveyed by the words of the Śruti, then for hearing that injunction also one would expect another injunction and so on. And this is an endless series.

यथात्मवादिवाक्यार्थश्रुतये न प्रवर्तते ।
विधिवाक्यमृते तद्विध्यर्थश्रवणे ऽपि न ॥८३०॥

As (according to you) one does not proceed to hear a matter discussed in the Śruti sentence pertaining to the Ātman unless without an injunctive sentence, so also (would) not (one proceed) to hear a matter conveyed by an injunction. [830]

मतं वाक्योत्थविज्ञानस्मृतिसंतानता यदि ।
केवलोक्तिश्रवोद्धूतज्ञानादर्थान्तरं स्फुटम् ॥८३१॥

If it is held that there results a continuity of memory of some knowledge arising from the (Vedānta) sentence; it clearly means that there is another thing (which has resulted) from the knowledge that sprang up on mere hearing the statement. [831]

नैवं साक्षाद्यथावस्तुबोधस्यैवेह संभवात् ।
नित्यं संनिहिते तस्मिंस्तत्स्मृत्या किं प्रयोजनम् ॥८३२॥

(The answer to this is:) This is not so, because there is the possibility here of only the rise of direct knowledge of Reality; and since that (knowledge) is constantly possessed (by one), what then is the necessity of memory? [832]

अपि पाशुपतास्त्रेण विद्धश्चेन्न ममार यः ।
निष्फलेषुवितुन्नाङ्गो नङ्क्ष्यतीत्यतिदुष्करम् ॥८३३॥

If one pierced by the Pāsupata missile (also) did not die, it is extremely difficult that he should die when his limbs are sharply pierced by powerless arrows. [833]

अपि प्रत्यक्तमो नित्यं भास्वच्चैतन्यबिम्बितम् ।
बुद्धितद्वृत्तयश्चैवं तप्तायोविस्फुलिङ्गवत् ॥८३४॥

Also, ignorance about the inner self is the ever existing reflection of the bright consciousness; and also are intellect and its functions like sparks from a heated piece of iron. [834]

प्रागप्यनात्मसंपातात्प्रतीचैवाप्तमेयकम् ।
जन्मनैवाखिलं ज्ञानं फलवत्किमपेक्षते ॥८३५॥

Even before it came to exist (lit. fell) as a non-Ātman,¹ the inner self, by its very birth, (possessed) complete knowledge wherein (all) objects of knowing (were) obtained (i.e. known). What fruitful (activity) should (lit. does) it expect (then)? [835]

¹That is, an embodied individual.

मात्रादिव्यवधानेन यथान्यत्र मितेः फलम् ।
फलतो ऽवगतेरेव न तथेहात्मदर्शने ॥८३६॥

As there results elsewhere a fruit of (some) knowledge only as intervened by a knower etc., so it¹ is not here, i.e. in case there arises the knowledge of the Self, because knowing

itself is the result.

[836]

¹Such an intervention of a knower etc. (*māṭrmeyādī*) is not to be thought of.

खपूर्ण एव सन्कुम्भो द्रव्यैर्नानाविधैर्युतिम् ।
वियोगं वा यथा गच्छेच्चैतन्येद्वास्तथा धियः ॥८३७॥

Even if a pot, full of ether, becomes united with, or is separated from different sorts of things, so also are the intellects (of individuals) (ever) enkindled by sentience. [837]

Experience of individuals can be compared with the varied connections of a pot with numerous things. *caitanya* 'sentience' and individual bodies are exemplified by ether and different pots.

तस्मादावृत्तिपक्षे ऽपि स्वतस्तत्सिद्धितो विधिः ।
नापूर्वः कश्चिदत्र स्यादत एवापरो ऽपि न ॥८३८॥

And therefore even in the opinion regarding *āvṛtti*¹, the injunction (in respect of knowing the Ātman) cannot be the originating injunction. And, for this very reason, there would not be the other injunction³ as well. [838]

¹That is, even if the opinion regarding *āvṛtti* is accepted. *āvṛtti* refers to the view that an individual is enjoined to recollect again that he is pervaded by sentience — though that is not patent to him; this was implied in verse 834 above. Cf. SP: *sarvasyāparokṣacidvyāpter vastujñānasmṛtisamṛtatir vidheyeti pakṣe 'pi* for *āvṛttipakṣe 'pi*.

²Namely, restrictive injunction.

अशब्दाद्यात्मकं साक्षान्निचाय्यात्मानमेकलम् ।
मुच्यते मृत्युतो विद्वानिति नैगमिकं वचः ॥८३९॥

(And) there is a statement of the Śruti, viz. a knower is released from death on having directly observed the unique Ātman, which is of the nature of what is not word etc.¹ [839]

This explains why there should not be any notion of an injunction entertained in respect of the remembrance of what is known before.

¹Cp. *Kāthopanīṣad* 3.17. Sureśvara has given a sort of paraphrase of the verse, or rather the gist of the Upaniṣadic verse. His words *iti naigamikam vacaḥ* do not convey that there is a quotation.

आत्मन्यवगते साक्षात्प्रमाणार्थसमाप्तिः ।
किमन्यत्स्मृतिसंतानात्प्राथर्यते निष्प्रमाणकम् ॥८४०॥

What else is then desired from continuity of remembrance, that which has no authoritative means of knowing it, when one has already acquired the knowledge of the Ātman, by securing the object of direct perception? [840]

भविष्यत्कालसंबन्धि फलं चेह न नाकवत् ।
तज्ज्ञानजन्मकालत्वादग्निजन्मोत्थकार्यवत् ॥८४१॥

And here (in respect of this knowledge) there is not a result connected with any future time like the heaven,¹ (it is) like a product resulting from the churning of fire, known at the time of its production.² [841]

¹Supply: which is acquired after the performance of a sacrifice prescribed by injunction.

²The product of Agni's appearance is light. Both the production of fire and its flash are simultaneous. So is the knowledge of sentience — it has been existing simultaneously with it.

अविधिश्चार्थतः प्राप्तेस्तज्ज्ञानस्मृतिसंततेः ।
बोधाच्च ध्वस्तसंमोहः स्मृतिं नैव व्यपेक्षते ॥८४२॥

There is absence of an injunction then on account of an individual's obtaining the end¹ and the ever continuing memory of the knowledge of the same.² And also from that knowledge,³ which has destroyed ignorance, one does not expect any memory. [842]

¹ *artha* = *puruṣartha* (= *mokṣa*) consisting in being one with the Ātman. This indicates the absence of any other object of knowing.

² It is continued awareness of that, viz. 'I am Brahman.'

³ NKL edition and NKL: *bodhaś ca ...* for *bodhāc ca*. accordingly, the translation could be: And knowledge (of the Brahman) which has destroyed ignorance does not at all expect (or depend on) any memory.

सम्यग्ज्ञानाग्निनिर्दग्धे प्रत्यङ्मोहे सबान्धवे ।
यथावस्तुस्मृतिं मुक्त्वा स्मृतिर्नान्यावशिष्यते ॥८४३॥

(Indeed) when the ignorance of the individual self, together with its associates¹, is completely burnt down by fire in the form of right knowledge, there does not remain any memory other than that of the thing (viz. Reality or the Ātman) as it exists. [843]

This explains *smṛti* in *smṛtisamṛtateḥ* in the preceding verse.

¹ SP paraphrases *sabāndhave* as *sakārye*.

प्रमाननुविधानाच्च न स्मृतिर्बाधिकापरा ।
बाध्यत्वेनैव माबुद्धेर्निष्ठिताभूदनात्मधीः ॥८४४॥

And, owing to the discontinuity of right knowledge¹, (it should) not (be argued that) another remembrance is (its) stultifier, because the awareness of the non-Ātman had become steady only owing to the correct knowledge being obscured (lit. stultified). [844]

¹ The AnSS edition reads *pramā-ananuvidhānāc* and the NKL edition (and NKL also), *apramā-anuvidhānāc*. AnSS looks more probable.

बाध्यं तमो मितेः कृत्स्नं तज्जं चाप्यतिदुर्बलम् ।
मानं बाधकमेवासीत्स्मृतिरप्यनयोस्तथा ॥८४५॥

(Truly speaking) darkness and all of its products — (all of this) extremely weak — are stultified by right knowledge¹.

Indeed (right) knowledge¹ has been the only stultifier. And the remembrance of these two² also is likewise. [845]

The *bādhya-bādhaka* relation exists when there are one strong and the other a weak one.

¹The words *miti* and *māna* convey the same as *bodha* in verse 842 and *mābuddhi* in verse 844 conveys the same, viz. right knowledge which is nothing but *ātmajñāna*.

²This refers to *ātmajñāna* and *bhedajñāna*, or, *advaitasmṛti*.

न स्मृतिर्विस्मृतिर्वेह संभाव्येतापि केनचित् ।
सकृद्विभातो ह्येवैष रवौ रात्र्यहनी यथा ॥८४६॥

(In fact) nobody can imagine that in respect of the Ātman that there is any remembrance or forgetting, for (*hi*) this has shone forth just once. (This is) in the same way as day and night (have continued to exist) while the sun (has appeared just once). [846]

अनर्थहेतुदाहित्वाद्यथोक्तात्मस्मृतेरतः ।
आत्मस्मृतेः स्वतः प्राप्तिरितरस्यास्तु बाध्यता ॥८४७॥

Therefore, since the already stated remembrance of the Ātman has the character of a destroyer of the cause of undesirable (effects), let there be understood then the remembrance of the Ātman arisen on account of itself and let the other (*anātma-smṛti*) be what is to be stultified. [847]

निरोधस्तर्हि पूर्वोक्तान्मतमर्थान्तरं यदि ।
तन्त्रान्तरेषु तस्यापि कार्यत्वेन श्रुतत्वतः ॥८४८॥
न मुक्तिसाधनत्वेन तस्यानधिगमाच्छ्रुतेः ।
प्रत्यग्बोधात्परं नान्यन्मुक्तेरस्तीह साधनम् ॥८४९॥
अननुष्ठेयरूपत्वात्तत्सिद्धिश्चात्मबोधतः ।
प्रत्यग्ज्ञाने निरुध्यन्ते चित्ततद्वृत्तयो यतः ॥८५०॥

[Verses 848-852 discuss whether *cittavṛttinirodha* is prescribed for acquiring knowledge of the Ātman and continued memory of the same.]

If it is held that the other thing which is stated before is withdrawing (of functions of the sense-organs), (then we have to say:) That is not so; because that has been heard (i.e. prescribed) in the other Śāstra(s)¹ as some effect (activity),² [848]

and because it has not been heard from the Śruti as the means to liberation, therefore there is not here any means to liberation other than the knowledge of the inner self³; [849]
being of the nature of what cannot to be accomplished (by activity) and because it results from (acquiring) the knowledge of the Ātman, and since human intellect (*citta*) and its functions are checked when there has occurred the knowledge of the inner self. [850]

The argument in verse 850 is: Even granting that *cittavṛttinirodha* leads to liberation, it cannot be prescribed.

¹This is Yoga and others.

²Whatever are effects are perishable and therefore not eternal. And, as such, they are not prescribed for achieving.

³Cf. *nānyaḥ panthāḥ* (*Taittirīya Āraṇyaka* 3.1.2.7); *jñānād eva tu kaivalyam* (BUBV 2.4.26) (NKL).

अभ्युपेत्यैतदस्माभिरुच्यते संभवादिति ।
सम्यग्ज्ञानातिरेकेण न त्वन्यन्मुक्तिसाधनं ॥८५१॥
श्रुतौ स्मृतौ वा संभाव्यं ताभ्यां नान्यस्य मानता ।
प्रत्यग्याथात्म्यनिर्णायौ तार्किकोक्तात्मवस्तुवत् ॥८५२॥

Having accepted this (view of another Śāstra for arguments' sake), we had said *sambhavāt*, 'owing to possibility'; but there is not any means to liberation beside (lit. in addition to) right knowledge (of the individual self) [851]

possibly to be seen (or known, from) the Śruti and the Smṛti; from these two (authoritative texts) there does not become known the authoritativeness of anything other (than knowledge of the Ātman), in the same way as the thing, viz. the inner self,¹ cannot be accepted, among logicians², (as the means) in respect of deciding the true nature of the inner self³. [852]

These two verses offer an argument after giving up the acceptance for arguments' sake (*abhyupetyavāda*) in the three preceding verses.

¹The word *ātmavastu* refers to the accepted principle of inference among the Vedāntins. This word does not refer to the existential entity, the Ātman. See *yāthā tārīkaiḥ īśvarādaḥ svatantram anumānādīmānam iṣṭam naivam vaidikaiḥ* (SP).

²This refers not only to the Nyāya-Vaiśeṣikas but also to the Sāṃkhyas and others. This justifies the reference to *etena yogaḥ pratyuktaḥ* below.

³Sureśvara compares the non-authoritativeness of the propounders of Yoga and those of logic. This is in the same way as BS 2.1.3: *etena yogaḥ pratyuktaḥ*.

सर्वाकाङ्क्षैकहेतोश्च प्रत्यग्विज्ञानहानतः ।

न भावनेह संभाव्या मोहे सत्येव सा यतः ॥८५३॥

[Verses 853-856 state that there is neither impulse (*bhāvanā*) nor injunction (*niyoga*) in Vedānta texts.]

And, here (in respect of the knowledge of the Ātman), impulse is not to be thought of (as possible) because of abandoning the awareness of the inner self which is the only cause for all (kinds of) expectations, since that obtains only while there exists ignorance.

[853]

मानान्तरानधिगतोक्त्यर्थाधिगम एव नः ।

विधिर्यतो नियोगो ऽपि नैव स्यादनृतन्त्रतः ॥८५४॥

(This is so) because, for us, injunction is only that where we get the knowledge of something which is not obtained from (by) any other means of knowing; (so) also there would not obtain any injunction while there is independence of human (effort).

[854]

In this verse, Sureśvara uses the term *vidhi* only to mean an injunctive text.

नियोज्यतद्विषययोर्यत्र भेदो ऽवसीयते ।

विषयः स नियोगस्य नात्मज्ञाने त्वभेदतः ॥८५५॥

There is a scope for an injunctive text where there is distinction understood between a person who is to be impelled (to an activity) and a thing in respect of which he is to be impelled, but not in respect of the knowledge of (the nature of) the inner self on account of their being non-difference (between them). [855]

शब्दो लिङादिशून्यो ऽपि ह्यविज्ञातार्थबोधकः ।
विधिर्भवति सामर्थ्याज्ज्ञाते ह्यर्थे ऽनुवादता ॥८५६॥

Indeed, a word which is informative of some unknown thing can become an injunctive text even though it is devoid of the potential suffix (*lin*) etc. and in respect of the thing which becomes known by means of its power (greatness or potence) there can be (only) the nature of description. [856]

यतो वाचो ऽभिधानानि प्रयुक्तान्युपलब्धये ।
सर्वाण्यनभिधायैव निवर्तन्ते ऽवबोध्य च ॥८५७॥
उदपादि च यच्छब्दैर्ज्ञानमाकारवद्वियः ।
स्वतोबुद्धं तदप्राप्य नाम्ना सह निवर्तते ॥८५८॥

[Verses 857-867 discuss that the Vedānta sentences are authoritative in respect of the knowledge of the Brahman.]

(That known thing) from which all expressions of speech that are employed for knowing (it) return¹ without having expressed (that) and having made (that) known; [857]
and that knowledge which was produced by words, possessing the shape of the intellect, does not touch (lit. reach) that self-known and returns together with the name (given to self-known). [858]

¹Cf. *Taittirīyopaniṣad* 2.4: *yata vāco nivartante*.

माहात्म्यमेतच्छब्दस्य यदविद्यां निरस्यति ।
सुषुप्त इव निद्राया दुर्बलत्वाच्च बाध्यते ॥८५९॥

This is the greatness of the Veda in that it removes ignorance. It is affected¹ owing to its weakness in the same way as a sleeping person (is awakened) from his sleep. [859]

¹Translation follows the reading *bādhyate* accepted by NKL edition and this is supported by the paraphrases in SP as *prabudhyate*. AnSS reads *bādhate*. Cf. verse 870 below.

दुर्बलत्वादविद्याया आत्मत्वाद्वोधरूपिणः ।
शब्दशक्तेरचिन्त्यत्वाद्विभ्रस्तं मोहहानतः ॥८६०॥

On the removal of ignorance, we know that one (viz. the inner self=the Ātman) on the removal of ignorance owing to its weakness, since the Ātman in the form of knowledge and (also) thanks to the incomprehensible (potence) of the words (in the Veda). [860]

अगृहीत्वैव संबन्धमभिधानाभिधेययोः ।
हित्वा निद्रां प्रबुध्यन्ते सुषुप्ते बोधिताः परैः ॥८६१॥

(Such is the wonderful potence of the words of Veda that), even without their having touched the connection between the expression and what is to be expressed, (the ignorant ones), who are awakened in their sleep (i.e. ignorance) by others, wake up having given up their sleep. [861]

¹This illustrates the observation in the preceding verses.

जाग्रद्वन्न यतः शब्दं सुषुप्ते वेत्ति कश्चन ।
ध्वस्ते ऽतो ज्ञानतो ऽज्ञाने ब्रह्मास्मीति भवेत्फलम् ॥८६२॥

(This is so said) since nobody in deep sleep knows (the meaning of) the word(s) as in the waking state. Therefore, when ignorance (about the nature of the Self) is destroyed by the knowledge (of the Self), there follows the result (in the form) 'I am Brahman.' [862]

अविद्याघातिनः शब्दाद्याहं ब्रह्मेति धीर्भवेत् ।

नश्यत्यविद्यया सार्धं हत्वा रोगमिवौषधम् ॥८६३॥

The awareness (=the shape of the intellect in the form) 'I am Brahman.', which arises from the word(s) of the Veda that destroys ignorance, also gets destroyed together with ignorance in the same way as a medicine (in the body of a diseased person gets destroyed) after it has destroyed the disease. [863]

This sets aside the notion of the continued existence of intellect after it has grasped the nature of the Ātman.

अवशिष्टं स्वतो बुद्धं शुद्धं मुक्तमतो भवेत् ।
नातः स्याद्भावनापेक्षा नापि मानान्तरं प्रति ॥८६४॥

Thereafter, there would remain the Self known, pure, (and) free; therefore; there would not be any expectation of an impulse and also with regard to any other means of knowing. [864]

क्रियाप्रभेदविरहाज्ज्ञानं वा निखिलं तमः ।
हन्त्यात्मलाभमात्रेण न तदन्या तमोहृतिः ॥८६५॥

Indeed knowledge destroys by mere appearance of itself entire darkness, for there is absence of any kind of action. The removal of darkness is not different from that (viz. appearance of knowledge). [865]

क्रियातत्फलयोर्भेदान्न भेदः क्रिययोरतः ।
प्रत्यग्ध्वान्तमतो ज्ञानं स्वात्मलब्धयैव हन्ति तत् ॥८६६॥

Therefore, since there is not any distinction between (the so-called) two actions¹ in accordance with the difference between the action and its fruit. As such, knowledge (of the true nature of the inner self) by its very appearance destroys that darkness (in the form of the absence of knowledge) about the inner self. [866]

¹One action is 'making effort to know' and the other is 'acquiring the knowledge'.

निष्पन्नो ऽपि कुठारादिः प्रयोगविरहाद्यथा ।
द्वैधीभावाय नैवालं तथा नैव प्रमाणधीः ॥८६७॥

As an axe etc., though (already) produced, cannot ever differentiate (between an action and its result) when there is absence of any operation (with it), so also the knowledge (about the Ātman resulting from) the authoritative means (i.e. Vedic sentence) does not at all (differentiate between the so-called two actions.) [867]

अलौकिकत्वाद्बोधस्य स्वतश्चावगमात्मनः ।
बोध्ये हि लौकिके ऽपेक्षा परतो ऽवगतौ तथा ॥८६८॥

(This is so) because of the non-worldliness of what is to be known and because of its nature of its being self-known, for, (only) in a worldly object of knowing, there is such an expectation of outside help so that it can be known. [868]

नद्यास्तीरे फलानीव प्रत्यक्षाद्यनपेक्षतः ।
किमिवेहान्यमानेषु तवापेक्षाभिधाश्रुतेः ॥८६९॥

[Now begins the discussion of the inner self's being beyond the scope of any other means. It is continued up to verse 875.]

What do you expect here (in respect of the knowledge of the Ātman) from other means of knowing when there is the Śruti statement (about it),¹ when there is no expectation of (any means of perception such as) direct perception as in respect of (a statement) 'There are fruits on the bank(s) of a river.'? [869]

This is to emphasise that *śabdapramāṇa* is stronger than any other means of knowing.

¹Sentences like *tat tvam asi*.

प्रमाता च प्रमाणं च प्रमेयो निश्चितस्तथा ।
यत्सांनिध्यात्प्रसिद्ध्यन्ति तत्सिद्धौ किमपेक्ष्यते ॥८७०॥

What is expected¹ for establishing that on account of whose presence (lit. nearness) (the structure of a worldly dealing) namely (that which comprises) the knower, the means of knowing, the object of knowing and the decision, gets established? [870]

¹Translation adopts variant reading *apekṣyate* which seems better for *apekṣate*. Cf. verse 859 above where *bādhyate* is preferred to *bādhate*.

जाग्रत्स्वप्नसुषुप्तेषु घटो ऽयमिति संविदः ।
व्यवधानं न चेहास्ति तद्भावाभावसाक्षितः ॥८७१॥

In the knowledge 'This is a pot.' (which occurs) in the states of waking, dream and deep sleep, there is some delimitation¹; (but such delimitation) does not exist here (in respect of the knowledge of the Ātman), since (the Ātman itself) is the seer of the presence and absence of that (thing). [871]

Cf. SP refers to the example of a lamp that manifests a pot.

¹Namely, this pot exists on such and such a thing for such and such a period.

इदमेवमिदं नैवमिति बद्धिर्विभागभाक् ।
अनात्मिकात्मवत्यत्र येनासौ किमपेक्षते ॥८७२॥

Since such a notion as 'This is so and this is not so.' effects distinction and is of the nature of the non-Ātman obtaining in one who has the Ātman within; (therefore) what does that (Ātman) expect (as a means of differentiation)? [872]

कर्त्रादिव्यापृतेः पूर्वमसंकीर्णमुपाधिभिः ।
अविक्षिप्तमसंसुप्तं ह्यनुभवन्किमपेक्षते ॥८७३॥

Indeed before the activity of the agent etc. what would (the individual self) expect while it is experiencing what is not characterized by delimiting ajuncts, what is not unconcealed to it, and what has not slept together with it¹? [873]

ātmā vā are draṣṭavyaḥ ... is not an injunction, for it lacks in *ākāṅkṣā* 'expectancy'. On this basis, Sureśvara develops his theory of *anubhava* 'experience', which is no doubt regarded as Anukta portion of the Vārtika.

Here, taking help of the deep sleep state, Sureśvara has discussed the experience of an experiencer: 'I am Brahman.'. The existence of the experiencer is however inferred from a thought on the part of the experiencer after his sleep is over; that is to say: Existence of the experiencer at the earlier moment could not be established by usual means of perception.

¹This argument has a basis in Upaniṣad: *anyad eva tad veditāt* ... (*Kenopaniṣad* 1.4).

प्रमाणमप्रमाणं च प्रमाभासस्तथैव च ।
कुर्वन्त्येव प्रमां यत्र तदसंभावना कुतः ॥८७४॥

Whence can there be the impossibility of existence of that resting on which they produce (the so-called) right knowledge as also what is authoritative, what is not authoritative, and what has the semblance of right knowledge? [874]

प्रामाण्यमेतत्पृष्ठेन कस्मान्नास्त्यभिधाश्रुतेः ।
नियोगस्यापि मानत्वं नानपेक्ष्य प्रमामिमाम् ॥८७५॥

Therefore, why should not there be authoritativeness of the statement of the Śruti (which is thus understood) through this (=experience)? Authoritativeness of an injunction also is not without dependence on this right knowledge. [875]

पश्येदात्मानमित्यादि वाक्यं यत्स्याद्विधायकम् ।
ज्ञानकर्तव्यतायां तन्नियोज्य पुरुषं प्रति ॥८७६॥

[Now, there is discussion in verses 876-894 that the statement

paśyed ... is not an injunction for knowing.]

The sentence 'He should see the Self within his own Self.'¹ and such others would be injunctive in respect of the activity of acquiring knowledge for a person after they had enjoined (him to undertake that activity). [876]

Read SP: *niyogarāgiṇām niyogavaśāt prāṇatyāgādāv api pravṛtṭiḥ sambhavati tasya śakyatvān nāśakye 'rthe tato 'pi pravṛtṭir astīty arthaḥ.*

¹CP. BU 4.4.23 where *paśyati* is used, not *paśyet*.

स्वव्यापारे ऽनपेक्ष्यैव वस्तुवृत्तं वचो यतः ।
नियुङ्क्ते पुरुषं तस्माद्वस्तुवृत्तं सुदुर्लभम् ॥८७७॥

(And) since (this) statement enjoins a person (to some activity) without having (any) reference to the state of the thing (viz. the Ātman), therefore the state of the thing is extremely difficult (to know or to establish). [877]

स्वशक्त्यननुरूपं चेत्कार्यं वाक्यशतैरपि ।
नियुक्तो ऽपि न तत्कर्तुमलं शक्ये स हीश्वरः ॥८७८॥

If an activity which is to be undertaken is beyond a person's capacity, that (person), even if he is enjoined (to undertake that activity) by even hundreds of (injunctive) sentences, will not be able to accomplish that activity, for (he) is capable (of doing) (only) what is possible. [878]

In verses 876-877, Sureśvara had, for the time being, accepted that there is an injunction in *paśyed* ... Now, he rejects that there is any injunction.

अभिधाश्रुतिश्चेत्तत्सिद्धौ व्यायच्छेत प्रयत्नतः ।
विधिवत्मानुगामित्वान्नार्थस्पृक्सास्वतन्त्रतः ॥८७९॥

If there were a statement of the Śruti that one should attempt with effort to accomplish that, then that statement does not

concern an existent object, because it follows the way of the injunctive statements and is not independent.¹ [879]

The purport is: The Śruti does not enjoin a person to create by his effort the inner self. Since the inner self is already a known thing, no sentence, which is injunction, can refer to the poroduction of the inner self.

¹It is *puruṣatantra* 'expecting human activity'. In an impossible task, there is never any human activity and in respect of that there is no injunction operative as well!

स्वमांसान्यपि खादन्ति नियोगानतिलिङ्घिनः ।
जहत्यपि प्रियान्प्राणाञ्शक्यत्वादेव नान्यतः ॥८८०॥

Those who do not transgress the injunction would eat even their own flesh; they would even give up their dear life, only because (these two acts) are possible for one to accomplish; not otherwise¹! [880]

¹In an impossible task, there is never any human activity and in respect of that there is no injunction operative as well!

अशक्ये विनियुक्तो ऽपि कृष्णलाञ्छपयेदिति ।
सर्वात्मनाप्यसौ कुर्वन्कुर्यात्तस्करकन्दुवत् ॥८८१॥

An injunction which enjoins on one an impossible activity as in (a statement) 'He should cook *māṣa* grains of gold.', then a person (who is so enjoined), making all efforts to do that, would do it like a thief called Kandu.¹ [881]

SP: *aśakye niyogād apravṛttir ity etad dṛṣṭāntenāha.*

¹The purpose is (in accordance with Mīmāṃsā Sūtra 10.2.2): 'Let there be no cooking of *māṣa* grains of gold, for in the attempt at that cooking there would be only loss of energy. In this context, a story is told of a thief, called Kandu, who, in order to escape arrest, entered into a kitchen and began to do some cooking, of course not knowing anything about it and, as a result, only fell into the hands of the pursuers. (Both SP and NKL do not give

नात्मोपास्यत्वावगमाद्वाक्यशेषे भवेदिदम् ।
पदनीयान्तरतरप्रियमित्यादिशेषतः ॥९३६॥

This is not so, because the knowledge that the Ātman is to be worshipped (arises) from the remainder of the sentence: This from the remainder (in the form of the words) *padanīya*, *antaratarā*, and *priya* etc. [936]

Now follows the answer. Translation follows the variant reading in the AnSS edition where *padanīyāntaratarapriya*, a *samāhāradvanda* compound is used.

आत्मानं प्रियमित्येतद्वाक्यशेषे ऽवगम्यते ।
तस्मादात्मैवोपास्यः स्यान्नानात्मोपास्य इष्यते ॥९३७॥

(This) is understood in the remainder of the sentence, viz. *ātmānam priyam*; therefore, Ātman alone is to be worshipped, it is not desired that the non-Ātman is the object of worship. [937]

अकृत्स्नत्वान्निषेधश्च न त्वात्मोपासनस्य सः ।
शब्दज्ञानातिवर्तित्वख्यापनायेतिशब्दनम् ॥९३८॥

And also there is rejection¹ (of worship) on the basis of incompleteness; that² is not desired in the case of the worship of the Ātman. The use of the word *iti* is for declaring the character (of the object, viz. Ātman, as) what transcends the knowledge from words. [938]

¹Cf. verse 935 above.

²Namely, the rejection.

यतो वाचो निवर्तन्ते नेति नेत्यादिकं तथा ।
एवम् सत्यर्थवत्सर्वमन्यथा तदनर्थकम् ॥९३९॥

So also words in the Śruti *yato vāco nivartante*¹, *neti neti*² etc. (indicate the same). This being (only) thus, all (that is stated in the Śruti) becomes meaningful and, if otherwise, that

would be meaningless.

[939]

¹ *Taittirīyopaniṣad* 2.4.1.

² BU 2.3.6 etc.; see verse 539 note 4 above.

अनात्मार्थापनुत्त्यर्थमात्मानमिति शब्दघटे ।
नातो वाक्यान्तरं तत्स्याद्यथोक्तार्थानुवादतः ॥९४०॥

With a view to rejecting the notion of any non-Ātman (it is that) the word *ātmānam* is uttered; therefore, that is not ¹ (considered as a) different ² sentence, for there is (in it) a restatement of what is said.

[940]

This verse has in view the word *priyam* in verse 936 above. The Śruti statement(s) in view is (or, are) *ātmānam eva priyam upāsīta* and/or *ātmānam eva avet*.

¹ It literally means: should not be.

² It should not be different in meaning. Two parts of a sentence under purview should form unity of thought. Cf. the NKL edition note: *arthaikatvād ekam vākyam arthabhede na ekavākyatvam ity arthaḥ*.

आत्मेत्येवोपासीतेति हेतुरत्रोपदिश्यते ।
अकात्स्न्यदोषहानाय प्रतीचः कृत्स्नतोच्यते ॥९४१॥

[Verses 941-950 explain the Śruti *atra hy ete sarve ekam bhavanti*.]

In (the statement) *ātmety eva* ... there is stated the reason (for worshipping the Ātman) and, for averting the fault of incompleteness that might attach to the individual self, there is stated its completeness.

[941]

आत्मनो ऽनवशेषेण संबन्धो ऽनात्मवस्तुना ।
रज्जुसर्पादिवन्नातः प्रतीचः शिष्यते पराक् ॥९४२॥

The Ātman has relation to the non-Ātman in its entirety ¹ exactly as there obtains (the relation between) a rope and a serpent; therefore, (the non-Ātman) is not stated as being

away from the inner self.

[942]

Translation follows the variant reading *parāk* supported by the NKL edition, because we expect in the verse the neuter from *parāk* to yield the adverbial sense. Contrary to this, the word *parān* is a Nominative singular (masculine) form and that does not seem to be correct because that does not qualify *anātmavastu* (neuter).

¹ *anavaśeṣeṇa* = *tādātmyena* 'being entirely identical'.

सर्वमज्ञातमेव स्याद्यस्मिन्नज्ञात आत्मनि ।

ज्ञाते ज्ञातं च कृत्स्नो ऽसौ तावत्त्वात्सर्ववस्तुनः ॥९४३॥

If this Ātman were to remain not-known, all of the world would have remained entirely unknown and (this) being known, (that) becomes known.¹ That one (viz. the Ātman) is complete (and) all the world (of objects) has only that much as its dimension.

[943]

¹This is similar to CU 6.1.3: *yenāśrutam śrutam bhavati ...*

युक्त्या निरूप्यमाणस्य ह्यात्मा तत्त्वमनात्मनः ।

प्रत्याख्यातः स चेत्तेन क्वानात्मा सिद्ध्यतामयम् ॥९४४॥

When this non-Ātman is examined with proper reason, its true nature (would be revealed as only) the Ātman; but if that one is rejected,¹ then how could this non-Ātman be established?

[944]

¹That is, not recognised.

अनात्मतत्त्वमन्वेति ह्यात्मासङ्गो ऽगुणो ऽद्वयः ।

स्वतः सिद्धौ न चेत्सिद्ध्येतिकमन्यद्वेषजं ततः ॥९४५॥

Indeed, the Ātman associates itself with the non-Ātman things, being (at the same time) unattached, qualitless and without duality, (and) if it does not get established by itself, what then would be the source¹ of (liberation)?

[945]

¹ *bheṣajam* literally means: medicine. The use of the word medicine is metaphorical; it expresses Sureśvara's intention to indicate cure of the malady of misery.

ज्ञातायां स्रजि तन्मोहकल्पितानां यथैकता ।
प्रतीच्येवं तदज्ञानकल्पितानामेकतेष्यते ॥९४६॥

As when (the true nature of) a rope is known, there is (understood) oneness of all the notions which had arisen out of ignorance about it, so also, in the case of the individual self, oneness of all the notions, resulting from the ignorance about that (individual self), is accepted (by us). [946]

आत्मशब्दाभिधेये ऽर्थे प्रत्यक्सामान्यरूपके ।
अन्तर्भवन्ति निखिला विशेषा इति केचन ॥९४७॥

[Verses 947-950 are the explanation of *atra hy eke sarve ekam bhavanti ...* by Bhartṛprapañca.]

Some¹ say: All particulars² are contained within the thing which is expressed by the word *ātman* and which has several and collective forms. [947]

¹ The word 'some' refers to Bhartṛprapañca. This view was earlier referred to in verses 693ff.

² This means: distinct individual selves, objects etc., i.e. *jagat*.

सामान्येन समस्तं तद्विशेषैर्व्यस्तमेव च ।
कृत्स्नमेवं परं ब्रह्म सदोपासीत यत्नतः ॥९४८॥

Being common (in those in collective form) that (Brahman is) whole; by its particular forms, it is several; thus, this highest Brahman should one ever worship with particular care. [948]

अवस्थावदवस्थाभिः क्वचित्कात्स्न्यं प्रचक्षते ।
कार्यकारणरूपेण क्वचिद्व्याचक्षते तथा ॥९४९॥

Sometimes they describe the completeness (i.e. the Brahman)

as possessed of different states by the different states¹; so also do they sometimes describe the same by its form (as made up of) causes and effects. [949]

¹This refers to the world in eight states of the Brahman; cf. verse 487 above.

भागभागिविभागेन नाभिनेम्यरवत्तथा ।
व्याचक्षते महात्मानः संप्रदायबलात्किल ॥९५०॥

And also (they describe the same) by resorting to its division of the parts and the whole as in the case of the hub, the rim and the spokes (of a wheel) — thus do the learned describe (the Brahman), indeed on the strength of the tradition (which they follow). [950]

This concludes Bhartṛprapañca's explanation of *atra hy ete sarve ekam bhavanti*.

अक्षराणामतात्पर्याद्युक्तितश्चाप्यसंभवात् ।
प्रतिपत्तुं वयं तादृक्शक्नुमो नाञ्जसा परम् ॥९५१॥

[Verses 951-968 are the refutation of Bhartṛprapañca's view on the sentence.]

We are not able to understand the highest (Brahman) to be that,¹ in a neat way, because the words² (of the Veda) do not have that as their purport and also because there is no possibility of it (being so) for reasons (shown below).³ [951]

¹That is, of that nature in Bhartṛprapañca's view.

²Sureśvara uses the word *akṣara* 'letters'.

³Sureśvara rejects the view of Bhartṛprapañca on the basis of *śrutisamanvaya* and *tarka*.

अज्ञातं जगदज्ञाते ज्ञाते ज्ञातं च यत्र तत् ।
तद्ब्रह्मैवंविधिं कृत्स्नं न गोवृक्षादिवन्मतम् ॥९५२॥

That Brahman is such that, if it is not known, the world (also) does not become known, and, when that becomes known, then does that (world also) become known — thus the Brahman is (described as) the whole, it is not understood as cows, trees etc.¹ [952]

¹Refer to verse 693 above. *ādi* refers to sea and clay. Reference to (i)cows indicates the *sāmānya-viśeṣa* relation; (ii)trees, parts and whole relation; (iii)sea, states and what has states relation; and (vi)clay, cause and effect relation.

सामान्यानि विशेषाश्च व्यावर्तन्ते परस्परम् ।
प्राणादिवदतः कात्स्न्यं न तेषां युक्तिमद्वेत् ॥९५३॥

The common properties (of different individuals) and the particular ones differ from one another in the same way as *Prāṇa*¹ etc.; therefore, the wholeness of them (being positive) does not² become reasonable. [953]

¹*prāṇa* = *prāṇana*. This refers to the functions of different organs of a human body such as breathing, speaking etc.

²It literally means: would not.

तदानन्त्याच्च तद्वेधो नेश्वरेणापि कात्स्न्यतः ।
क्रमशो ऽक्रमशो वापि शक्यः कर्तुं कदाचन ॥९५४॥

And, on account of the infinite number¹ of them², it would not ever be possible for even an able person³ to know them in their entirety or serially or otherwise.⁴ [954]

¹It literally means: the infiniteness of them.

²It means: '*sāmānya* and *viśeṣa*' mentioned in the preceding verse.

³The word *īśvara* is here a person who is possessed of parts or who has varied means of knowing at his command.

⁴In a sequential order, or in a desultory (or, random) manner.

तादात्म्यभावनायां तु पुंसां संभावनापि न ।

शक्या सुनिपुणेनापि कर्तुं तद्व्यापृतिः कुतः ॥९५५॥

With regard to their being possessed of the nature of that (=Brahman), it is not possible even for an excellent (thinker) to entertain an idea of them; how can there be any employment of the same (by him)? [955]

This refers to the notion of worshipping some object/being. Such worship becomes possible if only one knows/ascertains the nature of it and then tries to become one with it. Here there are difficulties; innumerable particulars and therefore the absence of the knowledge of the same. In brief, worshipping *samasta-vyasta* Brahman is not possible.

गङ्गावतारवन्नापि बहूपासितृकर्मता ।
भावनोपचयाभावादेकैकस्मिस्तथा सति ॥९५६॥

As in the case of the descent of the Ganges, there cannot be here¹ an object (of the activity) of many worshippers, for there would not be a collection of the devotions of (many distinct individuals) if there were devotion in each one of them. [956]

The basic idea is: The Ganges came to the world through the effort of many towards one goal; so also a number of individuals would, each of them, worship one form of the Brahman and the collected effort of them would suffice for getting to know the whole of the Brahman. (Yet the preceding verse has already pointed to the impossibility of the same!)

¹This means: in respect of knowing the Brahman of varied nature by many.

देवो भूत्वैति विबुधान्भावनोपचयान्नरः ।
इति सर्वपदार्थेषु पुंसो ऽशक्यं विधित्सितम् ॥९५७॥

A man (first) becomes a god and (then) becomes one among them owing to the increase (in the intensity) of devotion. (But) being so is impossible for a man, (even if) that is intended

to be achieved in respect of all objects (of the world). [957]

This verse points to the impossibility of worshipping the Brahman by a single individual and also by many of them coming together.

यज्ज्ञातमपि कात्स्नर्येन तत्तदन्यच्च नाञ्जसा ।
ज्ञानेन ज्ञायते तादृक्कृत्स्नं कथमिहोच्यते ॥९५८॥

How can a thing be called complete (or full) which, when seen, is not known in its fullness or by which, being known, any other thing is not known? [958]

In the case of *samastavyasta* Brahman, there are difficulties (as already pointed out) in getting to know the variety of the individuals/particulars and therefore there cannot be anything complete. Naturally then that is not like the Brahman of the Vedāntin.

परावस्तु विरोधित्वात्प्रत्यग्बुद्ध्या न गम्यते ।
पराञ्चीत्यपि हेतुत्तेर्नातः पिण्डादिकृत्स्नधीः ॥९५९॥

A thing which is away (from the inner self) cannot be understood by the knowledge of the inner self because it is opposed (in nature to the latter). (This is so,) because there is a statement about the reason for it in the Śruti *parāñci*...¹ Therefore, there cannot be the knowledge of the entire mass of objects such as a body etc. [959]

¹ *Kāthopanīṣad* 4.1; cf. verse 180 note 3 above.

तथात्मनि च विज्ञाते सर्वं ज्ञातं भवेदिति ।
येनाश्रुतं श्रुतमिति कस्मिन्निवति तथा परम् ॥९६०॥

Thus is the highest (Brahman known) from 'The Ātman being known, all would become known.'. 'By which being heard, everything else is heard.'¹ and 'In what ...'². [960]

¹ *yenāśrutam śrutam bhavati amatam matam avijñātam vijñātam*

(CU 6.1.3)

²*kasmin nu bhagavo vijñāte sarvam idaṃ vijñātam bhavati* (Munḍakopaniṣad 1.1.3). Or perhaps BU 3.8.7: *kasmin nu phalam*

...

आत्मसाम्यग्रहे ऽप्यात्मभेदमात्रगृहीतितः ।
नैवानात्मार्थसामान्यविशेषाणां ग्रहो भवेत् ॥९६१॥

Even when one has grasped that the Ātman is common (in all the non-Ātmans), there follows merely the grasp (of them) as different from the Ātman and, therefore, there would not really follow the grasp of the common and the particular properties of the non-Ātmans. [961]

The verse answers the following idea of the opponent: By knowing the common property, the particulars could be known. Hence, since Ātman is common to the non-Ātmans, the knowledge of the same would result in the knowledge of all the non-Ātman(s). This would avert the opposition to the Śruti *yenāśrutam śrutam ...*.

समस्तव्यस्ततादृष्टावेवमादि सुदुर्घटम् ।
अपूर्वानपरानन्तराबाह्योक्तिश्च दुःस्थिता ॥९६२॥

In the view (of the Brahman) as appearing in collective and individual (forms), this (argument stated just before) and any other (such argument), likely to be offered, would be very difficult to stand. Further, the Śruti statement (about the Ātman), viz. it is *apūrva*, *anapara*, *anantara* (and) *abāhya* would stand in danger (of being unauthoritative or false). [962]

पराक्प्रमेयमानानां प्रत्यगर्थीधियोदितः ।
बाधो ऽतो ऽसाध्वभिहितं समस्तव्यस्ततां प्रति ॥९६३॥

It is declared that there is a stultification or (denial of) the outside objects of knowing and the means of their knowing on account of the cognition of the inner (i.e. real) object; therefore; what you have said¹ about the character (of the Brahman) as collective and individual in forms is not well

said.

[963]

¹See verse 947 above.

तथोपास्यस्य ब्रह्मत्वे श्रुत्या साक्षान्निराकृते ।
नेदं यदिदमित्येवं समस्तव्यस्तता कुतः ॥९६४॥
स्थूलाद्यशेषापहुत्या चाक्षरे प्रत्यगात्मनि ।
कारणान्तस्य जगत ओतप्रोतोक्तितस्तथा ॥९६५॥

In that way, the nature of the object of worship is (already) expressly denied by the Śruti itself, viz. in the words *nedam yad idam ...*¹; this being so, whence can there be the collective and individual nature (of the Brahman)? [964]

and also, on account of the concealment² of the entire mass of gross things etc. into the imperishable inner self and from the statement that the world ends into its cause, since it is woven (in it) length-wise and cross-wise? [965]

¹*Kenopaniṣad* 1.5.

²That is, merger.

न च प्रत्यग्धिया द्रष्टुं परावस्त्वह शक्यते ।
समस्तव्यस्ततैवं च न मानादुपपद्यते ॥९६६॥

And it is not possible here (in our worldly dealings) to see an outside object by the knowledge of the inner self and thus the nature of the collective and individual forms of the Brahman does not arise from reason. [966]

This is to say: *samastavyastatā* cannot be established by any means of knowng.

मानभूमेश्च व्युत्थाप्य तथा विदितभूमितः ।
प्रत्यङ्मात्रस्य ब्रह्मोक्तेः समस्तव्यस्तता कुतः ॥९६७॥

Therefore, when we have raised¹ the Brahman above the level/area of knowing and also beyond what is known and stated that merely the inner self is the Brahman, whence can

there be (in the Brahman) the nature of collective and individual (forms)? [967]

This states further: *samastavyastatā* is opposed to the means of knowing, viz. Śruti.

¹It literally means: said about.

न समस्तं न च व्यस्तं नोभयं प्रत्यगात्मनि ।
प्रत्यक्प्रवणया बुद्ध्या वीक्ष्यतां यदि शक्यते ॥९६८॥

So there cannot be seen either as collective or as individual or both of the (forms) together (of the Brahman) in the inner self; so, with a mind inclined towards (understanding) the inner self, let this be seen, if it is possible (for you). [968]

कस्मात्पुनरिदं त्यक्त्वा दृष्टादृष्टार्थसाधनम् ।
आत्मेत्यैवोपासीतेति महान्यतनः श्रुतेरिह ॥९६९॥

[Verses 969-983 are the explanation of *tad etad padanīyam asya sarvasya* (BU 1.4.7).]

(Now, the question is:) Why should the Śruti make such a great effort and state abandoning this means of achieving every seen and unseen object¹ in *ātmety evopāsita*? [969]

¹This refers to Agnihotra and other ritual.

पदनीयमिदं यस्मादनात्मभ्यः परं पदम् ।
सर्वज्ञेयपुमर्थानां प्रत्यग्ज्ञाने समाप्तिः ॥९७०॥

(The answer is:) This should be obtained/known¹, since this one (viz. the Ātman) is a state/status above that of all the non-Ātman (objects) and because all the ends of human endeavour are known to have been obtained when the knowledge of individual self has occurred (to one). [970]

¹Generally verbs in Sanskrit which convey movement convey also the sense of knowing.

न हि प्रतीचि विज्ञाते कश्चिदप्यवशिष्यते ।
ज्ञेयो ऽर्थः पुरुषार्थो वा पदनीयमतो भवेत् ॥९७१॥

Indeed, since no known object or end of human endeavour remains (to be achieved) when the inner self is known, therefore that is to be obtained. [971]

This states the reason for the argument in the preceding verse.

अनात्मार्थे तु विज्ञाते स्वाध्यस्ताहिप्रबोधवत् ।
न किञ्चित्स्यात्परिज्ञातं नानात्मातः प्रमितिसतः ॥९७२॥

As against this (*tu*), when a non-Ātman is known nothing else would become known, as in the case of the cognition of a serpent which is superimposed on (the real thing) itself.¹ Therefore the non-Ātman is not sought to be known. [972]

¹Here Sureśvara's phrasiology is peculiar. In his use of *svādhyastāhiprabodhavat*, the first member of the compound, viz. *sva*, stands for a rope/garland of flowers. We understand this because of *ahi*. It means that we do not understand the true nature of the object present, viz. a rope or a garland and also we do not know the serpent. This leads to the following: When we say, we grasp the non-Ātman we have really grasped neither the non-Ātman nor the Ātman — there is just ignorance. Read SP: *yathā svaśabditā-dhiṣṭhāna- ... vā jñāyate*.

अस्येति शैषिकी षष्ठी कृत्स्नसंगत्यपेक्षया ।
प्रतीचा व्यतिरेकी सन्नानात्मा ह्येति संगतिम् ॥९७३॥

The Genitive case in (the form) *asya* is expressive of *śeṣa* 'remainder'¹, in view of its association with the whole (world of the non-Ātman)². For, non-Ātman gets connected with the inner self, though it remains apart from it. [973]

This verse justifies the use of the Genitive form *asya* together with *sarvasya*.

¹Cf. *ṣaṣṭhī śeṣe* (Pāṇini Sūtra 2.3.50). 'The Genitive case is expressive of relations between two words other than those which are not enumerated in other Pāṇini Sūtras'.

²This is to express the presence of the inner self in all the non-Ātmans. In other words, this is expressive of the association of all this world with the self.

नर्ते विभागं संबन्धः प्रतीचानात्मनो ऽस्ति हि ।
प्रत्यगर्थो ऽविभागात्मा नातः संगच्छते द्वयम् ॥९७४॥

Indeed, there is no connection of the non-Ātman with the inner self unless without (i.e. there has been an accepted) division. The thing, called the inner self, is undivided in nature, therefore, (the existence of) a pair (of distinctly existing inner self and the non-Ātman) does not stand to reason. [974]

This argument is based on the imaginary division of Reality into the inner self and the non-Ātman and the consequent *śeṣe ṣaṣṭhī*.

अतो दुःस्थितसिद्ध्येतत्पराग्वस्त्वन्तरात्मनि ।
तावन्मात्रैकयाथात्म्याद्बुद्ध्यदे रज्जुसर्पवत् ॥९७५॥

Therefore, this external object, viz. the non-Ātman, is very difficult to find while there exists (only the Ātman). The true nature of intellect etc. is only that much, viz. they are only the Ātman, as it¹ is in the case of a serpent (seen) in a rope. [975]

¹That is, the true nature.

पराक्त्यैष ज्ञातो ऽपि प्रत्यग्याथात्म्यहेतुतः ।
अनात्माज्ञात एव स्याच्छ्रुक्तिकारूप्यबोधवत् ॥९७६॥

Being an external object, the non-Ātman would remain only unknown even if it is (said to be) known through the true nature of the inner self;¹ the non-Ātman would remain (really) unknown, in the same way as there is the cognition of silver in a shell. [976]

¹That is, thanks to its Māyā (= *avidyā*) or *bhrānti*.

निर्धारणे वा षष्ठीयं ज्ञेयार्थस्यावधारणात् ।
प्रतीचो ह्यनधिगतान्नान्यो ऽनधिगतो यतः ॥९७७॥

Or rather, this (use of the) the Genitive case is to be known for specification since the object of knowing is specified (in the Śruti statement); for, a thing other (than the inner self) cannot become known when the inner self has not become known. [977]

This is the alternative explanation of the Genitive case *asya*.

ज्ञातो ऽपि तद्वदेवास्मान्नात्मनो विद्यते परः ।
प्रत्यगज्ञानहेतुत्वात्तदन्यस्येह वस्तुनः ॥९७८॥

(Supposing) it was known also, it would not, like that (unknown non-Ātman) exist as apart from this Ātman, because here (i.e. in worldly dealings, the existence of) anything other than that (viz. the Ātman) is possible only on account of the ignorance about the inner self. [978]

अनात्मनो ऽस्य सर्वस्य व्याकृताव्याकृतात्मनः ।
यस्मादात्मा परं तत्त्वं पदनीयमतो भवेत् ॥९७९॥

Since the Ātman is the highest truth (obtaining in) all this (world of) the non-Ātman which is of the nature of the manifest and the unmanifest, therefore (the highest Reality) should be known/obtained. [979]

This states the meaning of *yad ayam ātmā*.

खण्डादौ गोत्ववद्यस्मात्प्रत्यग्दृष्ट्यान्तरात्मनि ।
समीक्ष्यते हिरुङ्नापि तेनासावात्मतत्त्वकः ॥९८०॥

Since (the non-Ātman) is seen, through the cognition (of the real nature) of the inner self, in the inner self, in the same

way as cowness is seen in an individual cow¹, therefore (it) — one really of the nature of the Ātman — is not far (i.e. apart) from it². [980]

¹*khaṇḍādau* in the verse is a paraphrase for *gopiṇḍa*. The word etc. refers to the shape, colour etc., but cowness is not seen as distinct from any one of these.

²The verse implies that what are called the non-Ātmans are but the projections of (the superimpositions on) the Ātman.

ज्ञेय आत्मैव नानात्मा पदनीयत्वकारणात् ।
नन्वन्यज्ञाने नान्यस्य क्वचिदस्त्यवबुद्धता ॥९८१॥

What should be sought to be known is only the Ātman, not the non-Ātman, because it is (forever) of the nature of what should be obtained/known.¹ (The objector asks:) Let me say, when one thing is known another does not become known.²

[981]

¹See verse 970 note 1 above.

²Cf. SP: *na hi kvacid api deśādaḥ ghaṭādi jñānena paṭādi jñāya-mānam dr̥ṣṭam ity arthaḥ*.

सत्यमेवं भवेदेतद्यद्यात्माप्यन्य इष्यते ।
आत्मासावन्य इति च नानुन्मत्तस्य गीरियम् ॥९८२॥

(The answer to this is:) True, this could be so, if it were accepted that the Ātman also¹ is known as another (i.e. distinct object from the non-Ātman). That it is the Ātman and it is distinct (from the non-Ātman) is not a statement of one who is not mad.

[982]

¹The force of *api* 'also' is to emphasise the impropriety in comparing it with *ghaṭa*, *paṭa* etc.

अनेनेति तृतीयेयमित्थंभूतार्थलक्षणा ।
इदंधीशब्दगम्यस्य प्रत्यङ्मात्रसत्त्वतः ॥९८३॥

In the word *anena*, the (use of) the Instrumental case is for indicating an object of some (lit. what has become of such and such) particular nature, because whatever is understood from the word *idam* is of the nature of only the inner self.

[983]

घटो नास्तीति को ऽन्वस्मान्मानादर्थः प्रतीयते ।
संवित्तावदशेषेभ्यः प्रमाणेभ्यो ऽवसीयते ॥९८४॥

[Verses 984-990 explain that all this world is but of the nature of one's experience (*saṁvid*).]

(This is an objection:) What is the meaning acquired from this means of knowing (viz. our experience): 'There does not exist a pot.'? Insofar as *saṁvid* 'cognition' is concerned, it is obtained from all the means of knowing.

[984]

न संविदः पृथक्त्वेन नापि संविदि तद्विया ।
अनात्मवस्तूत्प्रेक्ष्यं स्याद्यथा संविदियं स्वतः ॥९८५॥

(The answer is given:) Not indeed should the non-Ātman be seen as an object distinct from *saṁvid* 'cognition' and not also with the cognition (i.e. notion) of that (viz. *saṁvid*). *saṁvid* can be understood as an object which is non-Ātman, since *saṁvid* (exists) in its own right.¹

[985]

¹That is to say: *saṁvid* is merely the Ātman itself.

उपलब्धो ऽस्ति सन्कुम्भो लम्बोष्ठो देशकालवान् ।
पूर्वपूर्वातिरेकेण नोत्तरार्थो ऽनुभूयते ॥९८६॥

A pot is known as an existing thing¹, having a broad brim (lit. long lip) and having a place and (some) period of time (for its existence) (and, in) every subsequent detail (of this cognition), is not experienced in supersession of every preceding detail.

[986]

This justifies the argument in the preceding verse. The non-Ātman

being seen in the *saṃvid* (=Ātman) in succession would not disprove its absolute existence.

¹Cf. NKL: *sann iti sattāsāmānyayogaḥ astīti svarūpasattvam iti bhedaḥ*.

कर्त्रादिव्यापृतेः पूर्वं संवित्स्वात्मन्यवस्थितेः ।
अविभागादनाख्येया तदुद्धृत्या फलायते ॥९८७॥

saṃvid 'cognition' is indescribable since, before the activity of the agent etc., it has remained in its own nature, owing to its non-differentiation¹ (which occurs through ignorance); (but) it shows the result(s) by the appearance of that (differentiation). [987]

¹Add: into a number of non-Ātman objects.

अक्रिये ऽपि यथा व्योम्नि ह्युत्पत्तिस्थितिहानिभिः ।
जगन्ननर्ति मय्येवं सदसद्विश्वरूपभृत् ॥९८८॥

As the world dances¹ by the rise, existence and loss (of the various forms etc.) in the non-active sky², so does this world which assumes all these forms of the existents and the non-existents dances within Me (i.e. the individual self possessing Ego)³. [988]

¹This metaphorical expression means: It appears to present various forms.

²SP points out that all thinkers accept the sky to be devoid of any activity.

³The sudden use of *mayi* 'in Me' is expressive of the association of *saṃvid* and *ahamkāra*; also (very possibly) of the influence on Sureśvara of some God-oriented philosophy.

नञ्घटार्थावपहृत्य संवित्सद्रूपमात्रया ।
अवगत्यात्मना सत्त्वं सर्वदृक्स्यादविक्रियः ॥९८९॥

The inner self (*sattva*),¹ which is free from (every) modification, would be the seer of all after having concealed (both) the

nañ (= *abhāva* 'absence') and the pot² by its knowledge that is merely its existent form of *saṃvid*, that is by its nature of knowing. [989]

¹That means *satya* 'Reality'.

²This refers to presence of the pot (*ghaṭasya bhāvā*). *nañ* stands for absence of it, as translation shows.

दिग्विभागो ऽविभागे ऽपि व्योम्नि यद्वत्प्रकल्पितः ।
प्रध्वस्ताशेषभेदे ऽपि मयि भिन्नधियस्तथा ॥९९०॥

As they have held (lit. imagined) in the case of the partless sky a division into quarters, so also (do they hold) different notions (in Me), in whom the entire (world of) differentiation is already destroyed (i.e. not existent). [990]

Verses 991-1019 explain 'yathā ha vai padenānuvindet'.

कथं पुनरबोधोत्थक्लृप्तोयेन तत्परम् ।
गमयते सत्यमित्यस्य परिहृत्यै परं वचः ॥९९१॥

Now, the subsequent statement (of the Śruti) is made with a view to setting aside this objection: How is that highest (Reality) make the truth known by a means arising (or derived from)¹ ignorance?² [991]

¹That is, devised on the basis of.

²It literally means: the absence of the knowledge of the Ātman, that is to say, we proceed to know the Ātman on the basis of the knowledge of the non-Ātmans. This latter constitutes ignorance (*abodha*).

परमार्थात्मनासत्यं पदं तदपि बोधकम् ।
स्वार्थस्यैवमुपायत्वमसत्यस्यात्मनीक्ष्यताम् ॥९९२॥

[Verses 992-993 are the first argument adduced by Sureśvara on the meaning of the word *padam*.]

Even that word (indicative/expressive of the Ātman), untrue (i.e. non-conveyer of truth) by nature (though it is,) is the conveyer (of the Ātman); thus should be seen or accepted the character of the means of knowing in the non-Ātman towards the meaning of its own essence, i.e. towards the Ātman.

[992]

उपायसत्यतां मुक्त्वा नान्यदृगुपयुज्यते ।
सत्यतात्र ह्युपायानामुपेये किं तयेष्यते ॥९९३॥

Leaving aside the trueness of the means of knowing,¹ there is not employed another (means) which sees another². Indeed, here is in respect of (knowing) what is there to be known — what (else) is desired by that (=trueness of the means)? [993]

The point made is: The acceptance of true means etc. is also imaginary (*kalpitatva*).

¹This means its character as the existent and refers only to the Ātman (i.e. the inner self). Its *satyatā* consists in its grasping the true nature of the objects, viz. their having no essence (=truth).

²We have accepted the variant in AnSS edition. *anyādrk* is in contrast with *upāyasatya*.

गवादिखुरबिम्बो वा पदमित्युपदिश्यते ।
अनन्वितार्थसिद्ध्यर्थं दृष्टान्तो ऽयं तथा सति ॥९९४॥

Or rather, the word *pada* is mentioned (here) in the sense of the footprint of a cow¹ etc. (There can be an objection raised here: But) that being so, this illustration (can be understood) for proving the object not connected (with the means of knowing).

[994]

¹This is another meaning of the word *pada* We have translated *go* as 'cow' because it is convenient, though *go* can stand for animals in general.

गवादिबोधनिर्वृत्तिः पदतज्ज्ञानहेतुतः ।
अनन्वितापदज्ञानगोपिण्डैकावसाधिनी ॥९९५॥

यथैवं नामरूपादिप्रपञ्चोपायहेतुतः ।

अप्रपञ्चात्मके भूमिनि प्रत्यग्बोधः प्रजायते ॥९९६॥

There results (the acquisition) of the knowledge of the cow etc. by means of a footprint and the knowledge of it; (the acquisition) ends into the knowledge of Reality, viz. the animal itself, (though) the footprint and the knowledge (of the animal) are not (in reality or directly) connected. [995]

As this happens, (so also) there arises the knowledge of the self in what is great and what is not of the nature of this (multifold) universe, with the help of the means in the form of this (multifold) universe which is made up of names, forms etc.¹ [996]

Verse 995 answers the objection in the preceding verse and verse 996 shows how the illustration is understood.

¹The word etc. refers to various activities.

प्रमाणभूमावैकात्म्यं विरोधान्न प्रतीयते ।

तमोन्वयाप्रमेयत्वात्तदभावे ऽपि नेक्ष्यते ॥९९७॥

The uniqueness of the Ātman is not experienced on the level of the various (worldly) means of knowing, on account of (their) opposition (to Reality); so also, it is not known (lit. seen) even in the absence of that (viz. the world of means), since the Ātman cannot be an object of knowing owing to the continued darkness (i.e. ignorance). [997]

The first line refers to the waking and the dream states and the second line to deep sleep state. In all these states, there continues ignorance and therefore the knowledge of the Ātman is obstructed.

न हि वस्त्वात्मनैवात्ममोहाद्युच्छित्तये क्वचित् ।

प्रमाणनिरपेक्षं सद्वस्त्वलं स्वप्रसिद्धये ॥९९८॥

संसारानवतारः स्यान्मानवैफल्यामेव च ।

(An objection would be raised:) Indeed, there does not exist

anywhere a thing which is by itself capable of destroying ignorance about itself. (The answer is:) (But) an existential entity which is independent of any means of knowing, is capable of establishing itself [998]

and there would not have come to exist this transmigratory world and so (also) there would have been (felt/experienced) the uselessness (or futility) of the means of knowing (viz. Veda). [999ab]

Here in 998ab, there is an objection that the knowledge of the Ātman is not necessary for the removal of ignorance about the non-Ātman, the non-Ātmans themselves would be capable of removing it. 998cd and 999ab are an answer to that objection. If the non-Ātman was capable of removing ignorance about itself, there would not have been the necessity of any means of knowing etc.

A thing known through the use of the means of knowing is not capable of removing wrong knowledge about itself; that is to say, worldly *pramāṇavyavahāra* is not itself useful in removing any ignorance.

इत्येतस्येह चोद्यस्य परिहाराय चोत्तरम् ॥९९९॥
 यथा गवात्मना साक्षाद्ग्रां विन्देद्गोपदानुगः ।
 प्रत्यक्चैतन्यसृत्यैवं विन्देत्तत्परमं पदम् ॥१०००॥
 प्रत्यक्तया यदाभाति ह्यागमापायिसाक्षितः ।
 देहेन्द्रियमनोधीषु चैतन्याभासरूपकम् ॥१००१॥

And (what now) follows is the answer to (or, for answering away) this objection (abode) raised. [999cd]

As one, following (the track of) a cow's foot(print), would find an individual cow itself as having the nature of a cow, so also would one get that highest object by following the course (i.e. activity) of the inner consciousness, [1000] which appears as being within (a body), on account of its being the witness of whatever comes and goes in various cognitions of the different organs by the body, and *manas* and which has the form of the flash of sentience. [1001]

जडेष्वेकमनेकेषु कूटस्थं क्षणभङ्गिषु ।
अनात्मसु तथा चात्मा संहतेष्वप्यसंहतः ॥१००२॥

The (only) one among many non-sentient, the immutable among the many that are perishable in a moment, and also the Ātman in the non-Ātmans, though not collected in a mass, (is) yet collected in a mass¹. [1002]

¹Or alternatively, *saṁhateṣv asaṁhatataḥ* 'The partless among those that are made up of parts'.

तस्यावाक्यार्थरूपस्य पदमेतत्प्रचक्षते ।
पद्यते ऽनेन तद्यस्मात्तेनेदं पदमुच्यते ॥१००३॥

This¹ they call as a word (expressive) of that which is of the nature of not the sentence-meaning; since by this is obtained/reached that; therefore, this is called word (expressive of that). [1003]

¹The description given in verses 1001-1002.

स्वमहिम्नैव चेत्सिद्धयेदुपायः परमार्थवत् ।
स्वतः सिद्धेर्न मिथ्यात्वं तस्य स्यात्परमार्थवत् ॥१००४॥
परमार्थादभिन्नश्चेन्नितराममृषात्मता ।
इत्यादि पूर्वमुक्तं यदनुसंधेयमत्र तत् ॥१००५॥

If the means were to get established, like the highest Reality, by its own potence; then, owing to its self-establishing, it would not have any falsity just like the highest Reality (would not have it). [1004]

If it is not distinct from the highest Reality, then it has certainly the nature of what is not (ever) false — all this, which we have said before, should be remembered here. [1005]

न सामान्यं विशेषो वा यथैकात्म्ये ऽवगम्यते ।
उक्तमप्युत्तरत्रैतदसंतोषात्प्रवक्ष्यते ॥१००६॥

in the case of the uniqueness of the Ātman will be said later (also) — though already stated (before) — (of course) owing to want of satisfaction. [1006]

प्रत्यगात्मनि विज्ञाते नाज्ञातमवशिष्यते ।
 अनेन हेतुदित्युक्त्या तत्पूर्वमुपवर्णितम् ॥१००७॥
 निःशेषपुरुषार्थसिद्धिर्दुःखहानिस्तु तत्फलम् ।
 यथा हेतुच्यते श्रुत्या साधनाभिन्नमात्मनः ॥१००८॥

When the inner self is known, there does not remain anything that is not known — that has been already explained by the statement *anena hetu*, [1007]

(and) obtaining the entire (group) of the ends of human endeavour, (consisting in) getting rid of grief, is the fruit of that (=knowledge of the inner self). This is said by the Śruti *tathā ha* ... where the Ātman is (understood as) non-distinct from the means.¹ [1008]

This is another meaning of *yathā ha*, expressed in *anena hy etat sarvam*.

¹That is, the means to liberation.

ननु प्रतीचि विदिते तदन्यद्विदितं भवेत् ।
 ज्ञानार्थे प्रकृते कस्माल्लाभार्थेनोपसंहृतिः ॥१००९॥

(An objection is raised:) Let me ask, 'It is said, when the inner self is known, everything else would become known, thus, you have introduced the topic of knowledge at the start, (and then) for what (reason) is there a conclusion with the (statement of the) object of gain?' [1009]

ज्ञानलाभार्थयोर्यस्मादेकार्थत्वं विवक्षितम् ।
 अविद्याध्वंसमात्रत्वात्तेनात्रास्त्वविरुद्धता ॥१०१०॥

(The answer is:) (This is so,) since it is intended to state the unity of meaning between the object of knowing and the object of gain. Let there be (understood) the absence of contradiction (in meaning) on account of (the latter) being

merely the destruction of the absence of knowledge. [1010]

नित्यलब्धैकरूपस्य नालाभो ऽज्ञानतो ऽन्यतः ।
यथैवं तस्य लाभो ऽपि तज्ज्ञानान्नान्यतो भवेत् ॥१०११॥

(In fact) there is no absence of gain as different from the absence of knowledge of what is ever of the nature of (a thing) obtained/known; therefore, this being so, the gain of it would also not be different from the knowledge of it¹ and not from any other (source). [1011]

¹That is to say: It is the same as that.

आत्मता ब्रह्मणो लाभो ब्रह्मताप्यात्मनः फलम् ।
व्यावर्त्यभेदात्तद्वित्तेरेकं वस्तु द्विरुच्यते ॥१०१२॥

The Brahman becoming the individual self¹ is the gain; so also, the self's becoming the Ātman is the result — (thus) is the unique thing stated twice (i.e. in two ways) on account of the basis, viz. their distinction from each other². [1012]

¹The word *ātman* here is used for individual self. Also we notice the pair the Brahman and the Ātman used in contrast — one of the rare occasions for such expression.

²This explains that the difference is purely linguistic, and not pertaining to Reality.

ब्रह्मता नात्मनो ऽन्यत्र नात्मता ब्रह्मणो ऽन्यतः ।
यत एवमतो ऽभेदो ज्ञानलाभार्थयोरिह ॥१०१३॥

The nature of the Brahman does not obtain elsewhere than in the Ātman, (as also) the nature of the Ātman¹ does not obtain elsewhere than in the Brahman. Since this is so, therefore here (in this Śruti passage) there is non-distinction of the two meanings expressed by the words *jñāna* and *lābha*.²

[1013]

¹That is, the individual self.

²Namely, the object of knowing and the object of gain; cf. verse 1010 above.

लब्धूलब्धव्ययोर्भेदो यत्राविद्योत्थभूमिषु ।
फलभेदः क्रियाभेदात्तत्र भिन्नार्थता तयोः ॥१०१४॥

Where (therefore), in the states which arise from ignorance, there is the difference between the one who obtains and the one that has to be obtained; there is (also) a distinction among the results on account of the distinction between (two) actions and there are two meanings of the two (words expressive of the actions as well.) [1014]

आप्तशेषपुमर्थो ऽपि प्रत्यग्याथात्म्यमोहतः ।
असर्वज्ञो भवेदात्मा तथानाप्तार्थ एव च ॥१०१५॥

An individual, though he has obtained the entire group of the ends of human endeavour, becomes, on account of ignorance in respect of the true nature of the inner self, a non-omniscient being and also one who has (really) not obtained (any) end of human endeavour. [1015]

तत्रात्मा लब्धाविद्वान्स्याल्लब्धव्यं च क्रियाफलम् ।
उत्पत्त्याद्यन्तरायं सत्कारकोपात्तिपूर्वकम् ॥१०१६॥

There (in that state) the individual self, who is a non-knower, is (lit. would be) the one who will obtain (the reward) and the reward which would be the result of (his) action of obtaining it is obstructed/hindered by (the process of creation etc.) and is preceded by taking up some effective means (of achieving it). [1016]

तादृग्लब्धो ऽप्यलब्धः स्यादविद्यामात्रहेतुतः ।
आद्यन्तयोरभावाच्च स्वप्नपुत्रादिलाभवत् ॥१०१७॥

(The Ātman), though obtained in such nature (as is described),¹ is (to be taken as) un-obtained for only one reason, viz. (its) ignorance and also owing to the absence of the beginning

and the end of itself, as in the case of the obtaining of a son in a dream. [1017]

¹Cf. verses 1015-1016 for qualifications of the ignorant individual self.

विपरीतस्वभावो ऽत आत्मलाभः स्वतः सदा ।
अज्ञानहेतोरन्यादृक्स च ज्ञानान्निवर्तते ॥१०१८॥

Therefore, the existence¹ of the Ātman is of an altogether different kind, viz. it is ever (existent) in its own right. It appears, on account of ignorance,² different and turns away from knowledge³. [1018]

¹It literally means: coming into existence.

²That is, being overpowered by ignorance.

³It ceases to be the witness and appears as a partial knower.

आरभ्य सर्वं वेदेति ज्ञानार्थेनोपसंहृतिम् ।
अतो ऽनुविन्देदित्याह लाभार्थेनैव तत्फले ॥१०१९॥

Therefore, having begun (the discussion) with the words *sarvam veda*, which convey the notion of knowledge, the Śruti stated the conclusion in the word *anuvindet* (and) has (thus) conveyed the reward, viz. knowledge and liberation as fruits, namely the only gain. [1019]

This explains away the contradiction conceived by the objector.

अप्रख्यातो यथैवात्मा व्याकृते ख्यातिमेयिवान् ।
एवं तदवबोधान्ना ख्यातिमेत्यविनश्वरीम् ॥१०२०॥

[Verses 1020-1024 explain *evam kīrtiṃ ślokaṃ vindate* ...]

As the unknown¹ Ātman came to have a name (lit. description) when it (had become) manifest; similarly, does a man come to have an ever-lasting name (i.e. fame) by knowing (the true nature of the Ātman). [1020]

¹This stands for *avyākṛta* 'non-manifest'.

संहतिश्चक्षुरादीनां श्लोकशब्देन भण्यते ।
यथात्मा संहतिं प्रापद्व्याकृतः करणादिभिः ॥१०२१॥
एवं विद्वानवाप्नोति पुत्रामात्यादिसंहतिम् ।
उक्तज्ञानप्रवृत्त्यर्थमर्थवादो ऽयमिष्यते ॥१०२२॥

Collection of eyes etc. is expressed by the word *śloka*. As the Ātman, when it became manifest by organs etc., obtained (the nature of) a collection, [1021] so does a knower (of the true nature of the Ātman) obtain a collection of sons, relatives¹, and others. Therefore, is this sentence accepted (or understood) as an Arthavāda for purposes of producing, i.e. urging, an effort towards (securing that) knowledge. [1022]

¹For *amātya*. It does not mean here a minister. This sense is noticed in Gṛhya texts.

निरेषणानां नेदृग्धि संसारं प्रजिहासताम् ।
फलं युक्तं प्रवृत्त्यङ्गमर्थवादो भवेदतः ॥१०२३॥

Indeed, such a result is not relevant (lit. necessary) in the case of those who do not have any desire and who wish to abandon transmigratory existence. Therefore, this Arthavāda is (only) for generating (in them) an activity towards getting knowledge.¹ [1023]

¹This refers to 'not towards acquiring worldly prosperity'.

कीर्तिं चैकात्म्यविज्ञानं श्लोकं चैकात्म्यसंगतिम् ।
यथोक्तवस्तुवेद्येतत्फलमाप्नोत्यभीप्सितम् ॥१०२४॥

(The knower obtains) fame, viz. knowledge of the uniqueness of the Ātman, and reward, viz. association with the uniqueness, i.e. the Ātman. Thus he obtains the desired result which informs him of the thing as described (above). [1024]

अव्याकृतव्याकरणं प्रत्यग्दर्शनसिद्धये ।
तदन्तरायस्तत्सक्तिस्तन्निवृत्तौ परा श्रुतिः ॥१०२५॥

[Verses 1025-1028 state the purpose of the Śruti *tad etat preyaḥ* ... (BU 1.4.8).]

(There has been stated earlier) the explanation of the division (or manifestation) of what has been (never) divided (manifested)¹ in order that there occurs the seeing (i.e. knowledge) of the inner self. (And) the obstacle to that² is one's adherence (lit. attachment) to that (notion of division). (And therefore) the subsequent Śruti (proceeds) with the purpose of the removal of that (viz. adherence to that). [1025]

SP reports that this verse conveys what Bhartṛprapañca has held.

¹This refers to *tad asya rūpam* ... BU 2.5.19 (*Rgveda* 6.47.18 and *Jaiminīyopaniṣad* 1.44.1). It is the purport of *tad etat preyaḥ* ...; cf. NKL: *sr̥ṣṭisaṃkīrtanam ātmajñānārtham kṛtam. sr̥ṣṭe ca jagati saktir ātmajñānapratibandhaḥ*.

²The first *tat* in the second line refers to *pratyagdarśana*, the second to *antarāya* and the third, (*pratyagdarśanāntarāya*-)śakti.

शब्दादिबडिशकृष्टचेतसः प्रत्यगीक्षणे ।
न सामर्थ्यं यतस्तेभ्यो व्यावृत्त्यर्थं परा श्रुतिः ॥१०२६॥

Because, on the part of one whose mind is attracted by the baits, viz. word etc.,¹ there is no capacity for seeing the inner self, the subsequent Śruti (proceeds) with the purpose of warding (one) from those (word etc.) [1026]

¹NKL points out that *śabdādi* causes obstruction to one's knowing the inner self.

हेत्वन्तरोपदेशो वा पदनीयत्व आत्मनः ।
तदेतदितिशास्त्रेण भण्यते तद्बुभुत्सवे ॥१०२७॥

Or, with reference to the Ātman being the object of knowing,

there is the statement (lit. instruction) of another reason in the statement of the Śruti *tad etat ...* (so that it becomes useful) to one who desires to know that. [1027]

The earlier portion of the Śruti pointed out why one should attempt to know the inner self, viz. because it has generally remained unknown to human beings. This verse points to how knowing the inner self is the most desired means to liberation.

सांख्यमुक्तिनिवृत्त्यर्थमथवास्तूत्तरा श्रुतिः ।
प्रेयोगिरात्मनो यस्मान्निष्ठानन्दस्य भण्यते ॥१०२८॥

Or, let the subsequent Śruti be for the removal of the notion of liberation posited by the Sāṃkhya(s); because the word *preyaḥ* with reference to the Ātman (viz. the inner self) conveys (that it, viz. the Ātman) is the basis of the (highest) delight. [1028]

SP quotes *Sāṃkhyakārikā* 57 and 68 as the basis for the argument. They purport to say that liberation consists in mere making between Prakṛti 'matter' and Puruṣa 'sentience'. They do not refer to the state as consisting in bliss. This verse controverts the Sāṃkhya(s)' position and lays emphasis on the state of being full of bliss — this alone is in consonance with the Śruti.

पुत्रात्प्रेय इदं तत्त्वं वित्तात्प्रियतरं तथा ।
पुत्रो वित्तं च लोके ऽपि प्रसिद्धं प्रियरूपतः ॥१०२९॥

This Reality is (to one) more dear than a son. So also (it is) more dear than wealth (of every kind); and it is well-known in the world¹ that a son and wealth are taken to be (very) dear (to one).² [1029]

This is the restatement of the contents of the Śruti in brief.

¹The force of *api* is that it indicates *abhivyāpti* (SP).

²See SP: *na vastuto 'sya priyatvam kiṃ tu pratītyā*.

ईर्यसुस्तमबर्थे स्यात्पुत्रादीनां बहुत्वतः ।

छान्दसत्वात्प्रियतमस्तथात्मा संभवत्यपि ॥१०३०॥

[Now starts the ascertaining of the character of the inner self as the most dear and continues up to the verse 1045.]

The suffix *īyasun* is in the sense of *-tamap*¹ because of (i) the maniness of sons etc.² and (ii) the character of (the words is) *chāndasa*³. Also, it means that the Ātman (alone⁴) can be in the same way the most dear to one. [1030]

¹The suffix *īyasun* expresses comparative degree and the second, viz. *-tamap* the superlative.

²The word *putrādi* refers to *vitta* already mentioned.

³In *chandasa* the usual rules of grammar do not hold as they are; that is, the comparative suffix may be used for the superlative. The suffix *-īyasun* is mentioned by Pāṇini as equivalent of *-tamap* in Pāṇini Sūtra 5.3.57: *dvivacanavibhajyopapade tarabīyasunau* and sanctions the option in Pāṇini Sūtra 3.1.85: *vyatyayo bahulam*.

⁴Cf. SP: *ātmaiva priyatamaḥ; apir avadhārane* ...

वित्तात्पुत्रः प्रियः पुत्रात्पिण्डः पिण्डात्तथेन्द्रियम् ।
इन्द्रियेभ्यः प्रियः प्राण आत्मा प्रियतमस्ततः ॥१०३१॥

A son is more dear¹ than wealth; one's own body is more dear than the son; also a (certain) sense-organ might be more dear to one than the whole body; Prāṇa (=the inner self²) is more dear than the sense-organs. Therefore, the Ātman is the dearmost (of all to one). [1031]

That the Ātman is the dearmost is shown by *pariśeṣya* 'what is left over and above others' and *anubhava* 'experience'.

¹The word *priyaḥ*, though not in the comparative or the superlative, is in the sense of *priyatarāḥ* and *priyatamaḥ*, according to the context, cf. *vyatyayo bahulam* quoted above.

²The difference between Prāṇa and Ātman has to be noted.

वित्तं द्विविधमप्यत्र वित्तशब्देन गृह्यते ।
देवलोकः फलं यस्माद्देवस्यापि न तत्पदम् ॥१०३२॥

In this (statement of the Śruti),¹ the word *vitta* is understood as *vitta*² of both the types to be. Even that from which results (the attainment to) the world of gods is not a place (to be attained) by the god.³ [1032]

SP refers to the Śruti *vidyayā devalokaḥ*— this *vidyā* should not be mistaken for Ātmavidyā; it is understood here in the sense of any Upāsanā as mentioned in an earlier part of the text.

¹The word *atra* is *saptamyaṛtha* 'in the sense of the Locative'.

²One is in worldly prosperity and the other is in the form of knowledge of some Upāsanā. Also this refers to the twofold means, viz. gold, cow (*karmasādhana*) etc. and Upāsanā which is related to some god or object of worship (NKL).

³Because it is impermanent. As against the knowledge of the Ātman is ever-lasting; (cf. *vidyayā devalokaḥ* (cf. BU 1.5.16); *na muktiḥ tatphalaṃ niṣedhaśruteḥ*— SP) *deva* here is the shining one, the Ātman. Its goal is liberation, not the world of gods.

प्रीतिसाधनहेतुत्वात्प्राणादौ प्रीतिरिष्यते ।
बन्धकीप्रीतिवन्मुख्या नैवानात्मसु युज्यते ॥१०३३॥
व्याध्याद्युपप्लुतौ यस्माद्वक्ति निर्विण्णमानसः ।
अद्यैव मरणं श्रेयो मम दुःखार्दितात्मनः ॥१०३४॥

In the case of the sense-organs etc.,¹ they entertain a liking² for them because they are the means to (acquiring) pleasure³; (but) the principal (pleasure³) is not at all (entertained) in respect of (any of) the non-Ātmans in the same way as a longing² for a courtesan,⁴ [1033]

because a person who is oppressed by disease etc. (and is therefore) dejected in mind, says (to himself) 'For me, who am afflicted with sorrow, death just today is more agreeable.'⁵ [1034]

Verse 1034 explains how *prāṇa* etc. are not dear as the principal objects.

¹*prāṇa* in the sense of 'sense-organ'; cf. our book [Vol.4:1991] p.128.

²*prīti* = *snehaḥ/saktiḥ*.

³*prīti* = *manasaḥ ullāsaḥ*.

⁴SP notes the variant reading *vardhakīprīvat* for *bandhakīprīvat* and explains the word *vardhakī* as an infidel woman. The editor of the AnSS edition does not have *vardhakī* as a variant reading in any manuscript consulted. NKL and NKL edition also do not support *vardhakī*.

⁵SP adds: *tasmāt prāṇādāv amukhyā prītir iti śeṣaḥ*.

प्रतीचि निर्निमित्तैव सर्वावस्थास्वपीष्यते ।

प्रीतिरग्न्युष्णवत्तस्मादात्मा प्रेयाननात्मनः ॥१०३५॥

During all the states of (one's life), a liking is entertained for the inner self, even if there is not any cause whatever (*eva*) for it — (this is) in the same way that heat ever abides in fire. Therefore, the Ātman is more dear than (any) non-Ātman.¹

[1035]

¹NKL points out the purpose of the verse: The Ātman is dear, because it is the cause of bliss (to an individual).

त्रैगुण्यात्सर्वभावानां मोहदुःखसुखात्मता ।

स्वत एव त्वनद्यस्ता ह्येवं कैचित्प्रचक्षते ॥१०३६॥

In this regard some¹ say: Since all beings and the objects² outside them, are (the combination) of the three qualities³, they are of the nature of (having been affected by) infatuation, misery and pleasure; this is so by their very nature and (this condition is) not superimposed on them.⁴

[1036]

¹SP identifies them to be the Sāṃkhyas and supports this idea with *Sāṃkhyakārikā* 55 and 60cd, together with a very brief comment thereon.

²The word *bhāva* refers to whatever undergoes a change or modification; therefore, both beings and things.

³Qualities are: *sattva*, *rajas* and *tamas*— the three constituents of Prakṛti.

⁴SP cites here *guṇavaty aguṇasya satas tasyāpārthakam carati*

(Sāṃkhyakārikā 60) and observes *ātmanah sattvādiguṇahīnatvāt svataḥ sukhādyabhāvaḥ*.

तत्तु नैवं यतः सत्त्वम् मोहादित्रयकृद्द्वयः ।
भानूदयं प्रपश्यामश्चोरदृग्गोदिग्दृशाम् ॥१०३७॥

But that is not so because it is only Sattva which causes the trio, infatuation etc.¹ (This is thus justified:) We see the sunrise (as the cause of confusion) for the thieves, (of sorrow) for those who are afflicted with disease(s) of the eye, and (of happiness) for those who want to find out (lit. see) the direction². [1037]

The idea is: *sattvam prakāśakam*— this is particularly true in the case of the sun, *nātra rajastamasī calanāvaranayor abhāvāt*.

¹That is, *moha*, *sukha* and *duḥkha*.

²NKL is more specifically helpful in ascertaining this.

समं त्रयं त्रिषु भवेत्त्रैगुण्यं चेद्रवौ मतम् ।
गुणान्तराधिकारो ऽपि न च भानूदये मतः ॥१०३८॥

If it were held that there is the combination in the sun of the three (qualities) in equal proportion,¹ then in all the three (viz. infatuation etc.) it would have been the same (i.e. equal in proportion to others) and it is not (i.e. cannot be) accepted that there is in the sunrise any scope/place² for any quality other (than Sattva). [1038]

The argument of the Sāṃkhyas could be: 'Being a *bhāva*, the sunrise could also be *triguṇātmaka*' and this would imply the impropriety of the illustration in the preceding verse. But this argument would go against the Sāṃkhya doctrine according to which the sun is only *sattvātmaka*, i.e. it cannot be at the same time *cala* or *āvaraka* in accordance with *rajas* and *tamas*— it can be only *prakāśaka*. As such, the illustration is only apt.

¹*samam trayam triṣu = guṇatrayasya sāmyaṃ sukhaduḥkhamoheṣu*.

²*adhikāra = praveśa* (SP); it is literally entry.

प्रमाणैर्गृह्यते प्रीतिर्व्यभिचारिण्यनात्मसु ।
रज्ज्वां सर्पादिवन्नैवं प्रत्यगात्मनि सैक्ष्यते ॥१०३९॥

(Thus) delight (lit. liking), which is not uniform (i.e. the same) is ascertained for (all) the non-Ātman objects, (with the help of) different means of knowing¹ as in the case of the (notion(s) of) a serpent etc. in respect of a rope² etc. But this³ is not so seen in respect of the inner self. [1039]

Here concludes the discussion of the Sāṃkhya view.

¹This stands for the means acceptable to the Sāṃkhyas: *pratyakṣa*, *anumāna* and *śabda*.

²The word *rajivām* should be understood for *rajivādau*, since the word *sarpādi* stands for *sarpa*, *śūktikā* and other well-known *upamānas* in illustrations.

³This refers to *vyabhicāriṇī prīti* 'variously changing liking'.

आत्मैव प्रिय इत्यत्र हेतुः स्पष्टो ऽभिधीयते ।
श्रुत्यान्तरतरोक्त्येह तद्वैतुश्चात्मतोच्यते ॥१०४०॥

In respect of this statement 'The Ātman alone is dear (i.e. dearer than others).', the reason is clearly stated by the Śruti in the words 'it is the nearest within'. In this (statement) is mentioned also the reason for that¹, viz. the nature (of all this universe is) the Ātman². [1040]

¹NKL reads *taddhetusthiti* for *taddhetuś ceti*. This is obviously misreading in the manuscript of NKL.

²This refers to the first sentence in BU 1.4.8, repeated by BUB: *yad ayam ātmā*.

यथान्तरतमः प्रत्यक्तथोदके प्रवक्ष्यते ।
वाचकनव्यक्षरान्तेन ग्रन्थेन प्रत्यगात्मनः ॥१०४१॥

It will be stated later as to how the inner self is the nearest within (*antarātama*), i.e. in the later portion of the text (beginning with) the word *vācaknavī* and ending with the word *ākṣara* that pertains to the inner self [1041]

Sureśvara's wording is cryptic; it stands for the beginning of Yājñavalkya's discussion with Vācaknavī and ending with his statement about *akṣara* (BU 3.8.8ff.)

The purpose of the verse is to say that the conclusions of the discussion in the earlier portion will be reaffirmed in the subsequent portion of the BU, viz. in the dialogue of Yājñavalkya and Vācaknavī Gārgi. This indicates that Sureśvara follows Śaṅkara's method of showing *ekavākyatā* (= *ekārthatā*) of the entire text.

NKL refers to *tātparyalinga abhyāsa* 'repetition pointing to but one purport'.

प्रत्यक्तान्यानपेक्षा हि तदन्यत्तदपेक्षया ।

यतो ऽन्तरतमः प्रत्यक्तस्मादेवावगम्यते ॥१०४२॥

Since the nature of the inner self does not indeed depend on any other (object etc.) and what is other than that¹ (exists) only depending on it, therefore, is the *pratyak* 'existing within' thus understood as the nearest within.² [1042]

¹Namely, the inner self

²The purport is: It is one with the Ātman; or, in other words, the inner self.

यस्य त्वष्टास्ववस्थासु प्रत्यक्त्वं सममिष्यते ।

तस्यान्तरतम इति दुर्घटं वचनं भवेत् ॥१०४३॥

But, in the case of him who holds that the nature of the inner self is the same¹ in all of its eight states², the word (lit. expression) *antaratamaḥ* would be very difficult (to explain or understand).³ [1043]

This and the next verse express the view of Bhartṛprapañca. In his theory the expression *antaratama* does not go well with the Ātman.

¹That is to say: It remains unchanged.

²See verse 487 and note thereon.

³According to Bhartṛprapañca, so Sureśvara intends to convey,

the inner self undergoes, i.e. gets modified into eight states and is yet unchanged. This does not stand to reason.

अन्यनाधिकरूपासु त्वष्टावस्थास्विहात्मनः ।
कं विशेषं समाश्रित्य ह्यात्मान्तरतमो मतः ॥१०४४॥

In this connection (we ask:) With reference to which distinctive feature does the Śruti hold that the Ātman is the nearest within, while it persists in the eight states of the same nature, viz. that none of them is not less or more than another? [1044]

¹It literally means: Having resorted to ...

भाक्तैवानात्मसु प्रीतिर्यस्मात्तस्मादनात्मनः ।
व्युत्थाप्य निखिलां प्रीतिं प्रतीच्येव निवेशयेत् ॥१०४५॥

Since liking for the non-Ātman objects is understood only in the secondary sense, therefore, having given up (lit. warded away) the entire liking for the non-Ātman, let one fix¹ delight only in the inner self. [1045]

Thus Sureśvara states his own view; after he has pointed out the defect in Bhartṛprapañca's view.

¹This means: entertain, find.

एवं व्यवस्थितौ सत्यां युक्तिलेशो ऽभिधीयते ।
पुत्रादि प्रियमात्मेति द्वयोर्विवदमानयोः ॥१०४६॥
आत्मनो ऽन्यत्प्रियमिति यो ब्रूते मोहसंप्लुतः ।
ब्रुवाणं तं प्रति ब्रूयादिति श्रुत्यनुशासनम् ॥१०४७॥
यस्ते प्रियतयाभीष्टः सो ऽचिराद्दुःखकृद्भवेत् ।
यतो नङ्क्षयति स क्षिप्रं नश्यन्चासुखकृत्प्रियः ॥१०४८॥

[Now follows the explanation of *sa yo 'nyam ātmanah priyam ...* (BU 1.4.8)]

Such being decision¹ (of what is liked and not liked), there is (now) stated some (more) argument: Between the two, who are arguing (against each other), holding the views (such as)

‘the son etc. is (more) dear’ and ‘the Ātman (alone is more dear)’, [1046]

to the one who, overpowered by ignorance, would say that a thing than the Ātman is (more) dear, should one say, ‘Such is the instruction of the Śruti: [1047]

That one, which is desired by you as the dear one, would soon be the cause of (your) misery, because the one will soon perish (and), thus perishing, will be the cause of unhappiness. [1048]

All these three verses together are an explanation of the Śruti statement *priyam rotsyatīti ... pramāyukam bhavati* (BU 1.4.8).

¹Or, division.

यथोक्तस्याविसंवादं तत्तथैवेति च श्रुतिः ।
आत्मैव प्रिय इत्येवं प्रतिज्ञां प्रत्यभाषत ॥१०४९॥

And the words in the Śruti *tat tathaiva (syāt)* (reaffirmed) in a way that it does not involve (any) contradiction with the statement of the proposition ‘The Ātman alone is dear.’, which was made earlier. [1049]

Translation is in agreement with the first explanation of SP, confirmed by NKL. This brings out the relation between the two sentences *ātmaiva priyaḥ ...* and *tathaiva syāt*. Or, as SP points out alternatively, the Śruti reaffirmed ‘the Ātman alone is dear’ in such a way that it is not contrary to what is stated earlier.

यस्मादेवमतो हित्वा प्राणादीनप्रियात्मनः ।
सर्वान्तरतमात्मानमुपासीत प्रियं सदा ॥१०५०॥

Since this is so, therefore, having abandoned *prāṇa* etc.¹ which are such as cannot be dear, one should ever consider as dear the Ātman, which is the most within of all. [1050]

This verse is the explanation of *ātmānam eva priyam upāsita*. Some explanation of SP, *sarvasmāt antaratā ... draṣṭavyaḥ*, though ingenious, is not acceptable.

¹The word *ādi* refers to the sense-organs.

स य आत्मानमित्युक्त्या प्राप्तदोषनिराक्रिया ।
प्रमायुक्तत्वं मर्त्यत्वात्प्राणादेर्न तु वार्यते ॥१०५१॥

In the statement of the Śruti *sa ya ātmānam*, there is the refutation of the evil that would affect (lit. reach) the self; but the perishable nature of *prāṇa* etc. is not (i.e. cannot) be warded away, since they are liable to death. [1051]

This brings out the purpose of *sa ya ātmānam* ... 'Though agreeable like other things, it (i.e. self) does not perish.'

व्यावृत्तसर्वबाह्यार्थप्रीतेस्तन्मुक्तिकामिनः ।
न हास्येति गिरा नातो मुमुक्षोः फलकीर्तनम् ॥१०५२॥

Therefore, in the words *na hāsyā*, there is not a statement of the fruit¹ for him who has withdrawn himself from any liking for all external objects² and who has a desire for freedom from that³ and for one who wants to be free from this (external world). [1052]

¹This is literal translation. It means the result, viz. liberation.

²They signify *prāṇa* etc. which certainly perish.

³That is, the bondage of it.

आविरिञ्चाद्विरक्तश्चेत्कम्भीपाकादिवेह यः ।
आप्ताशेषक्रियाकार्यो मुक्तौ स विनियुज्यते ॥१०५३॥

That person among them here¹ is eligible for securing² liberation, who is averse to (the entire universe) beginning with Viriñca, if at all, as from (the hell called) Kumbhīpāka³, after he has performed the entire mass of activity to be performed (according to the dictate of Śāstra). [1053]

¹Cf. SP: *iheti madhye 'dhikṛtānām iti yāvat*.

²It is literally 'is enjoined to acquire'.

³This is one of the *naraka*s enunciated in Purāṇic or old

tradition.

परीक्ष्य लोकानित्यादि तथा नैगमिकं वचः ।
त्यज धर्ममधर्मं चेत्येवमादि स्मृतेरपि ॥१०५४॥

To that purpose¹ is there the Śruti statement *parīkṣya lokān ...*² and also a similar one from the Smṛti, (such as) *tyaja dharmam adharmam ca*.³ [1054]

¹Or alternatively, so also is ...

²*Muṇḍakopaniṣad* 1.2.12.

³*Mahābhārata* 12.167.10.

Verses 1055-1165 pertains to BU 1.4.9.

आत्माविद्यापनुत्त्यर्थं प्रारब्धोपनिषत्परा ।
आत्मेत्युपक्रमं यच्च तत्सूत्रं प्रागुदाहृतम् ॥१०५५॥

The subsequent¹ Śruti begins (lit. has proceeded) with the purpose of removing ignorance about (the nature of) the Ātman and the Sūtra, which has its beginning in the words *ātmety*, has been already introduced. [1055]

The purpose of verses 1055-1068 is to show the connection of the foregoing discussion with *tad āhuḥ* in BU 1.4.9.

¹Read NKL: *paraviṣayatvāt parety arthaḥ*. This is because there immediately follows the (the Sūtra, viz. statement) *ātmety evopāsita*.

तद्वेदमित्यनेनास्याः प्रमेयो ऽर्थो निरूपितः ।
अकृत्स्नवचसा तद्वत्प्रमाभासो ऽप्यपोदितः ॥१०५६॥

The purport to be known from this¹ Upaniṣad has been explained in the statement *tad dhedaṁ ...*² So also is set aside by (the use of) the word *akṛtsna* what (would have) appeared as the knowledge of the truth. [1056]

¹Supply: which has been stated immediately before.

²BU 1.4.7.

आत्मैवैको ऽत्र द्रष्टव्यः कृत्स्नत्वान्नात्मनो ऽपरः ।
अकृत्स्न एव तावत्स्यात्तदन्यो यावदीक्ष्यते ॥१०५७॥

In (connection with the teaching of) this (Upaniṣad), the Ātman alone is to be known (lit. seen), because of its completeness and not what is other than the Ātman, (because) it is seen that what is other than that (viz. the Ātman) is¹ only incomplete. [1057]

¹It literally means: would be.

को ऽहं कस्य कुतो वेति कः कथं वा भवेदिति ।
प्रयोजकमतेरेष विध्यर्थो ऽत्रावगम्यते ॥१०५८॥

The meaning of the injunction which conveys the inciting thought is this: 'Who am I? or, to whom do I belong? whence (was I) born? or what shall I be and how?' [1058]

NKL here points out that the questions in the verse pertain to the exposition of *tvampadārtha* 'an individual mentioned by the word *tvam*'. Both SP and NKL point out the fuller significance of each question.

उत्पत्तिस्थितिविध्वंसाः कार्याणां स्युः कुतो न्विति ।
अन्वयव्यतिरेकाख्यो व्यापारो ऽत्र विधीयते ॥१०५९॥

Whence indeed would they be — origin, sustenance and destruction of the products (i.e. effects) — (to explain this) there is enjoined here the activity of applying (the method of) Anvaya and Vyatireka. [1059]

This is an explanation of the earlier verse where the injunctions *ātmety* ... and *ātmā* ... *draṣṭavyaḥ* expect one to think about the nature of the Ātman by the method of Anvaya and Vyatireka.

It is taken for granted here that an injunction is always about some ritual and therefore one is expected to begin to think, and this is taken as an activity.

तपसा तत्परं ब्रह्म विद्धीति वचनादतः ।
अन्वयव्यतिरेकाख्यो व्यापारो ऽत्र तपो मतम् ॥१०६०॥

Therefore, from the Śruti statement *tapasā tatparam brahma vidhī*,¹ *tapas* is understood to be an activity, called applying the method of Anvaya and Vyatireka. [1060]

¹ *Taittirīyopaniṣad* 3.2.

यतो वा इत्यतो वाक्यान्न तदन्यत्तपो भवेत् ।
लक्षणोक्तेर्य आत्मेति सो ऽन्वेष्टव्य इति श्रुतेः ॥१०६१॥

There would not be on the authority of the Śruti statement *yato vā imāni bhūtāni jāyante*¹ (the idea of) any *tapas* 'penance' other than that²; (this is so) owing to the statement in the Śruti which is the definition of (the Brahman), viz. *ya ātmā-pahatapāpmā* ... and which further enjoins *so 'nveṣṭavyaḥ*.³ [1061]

So far Sureśvara has made every effort to show the oneness of purport of various Śruti passages (from BU, CU and *Taittirīyopaniṣad*; viz. their *ekavākyatā*).

¹ *Taittirīyopaniṣad* 3.1.

² This refers to applying the method of Anvaya Vyatireka mentioned in the preceding verse.

³ CU 8.7.1 and 3.

त्यक्ताप्रियपरागर्थो ह्यमानित्वादिसाधनः ।
प्रियात्मानमुपासीत शक्रवद्ब्रह्मचर्यवान् ॥१०६२॥

One, who has abandoned all the unlikable external objects and is possessed of means such as being without attachment to the body¹, should, being a Brahmacārin like Śakra², think of the Ātman as the dear one. [1062]

¹ Cp. *Gītā* 13.7.

² Refer to CU 8.11.3.

आत्मेत्यनेन वाक्येन ब्रह्मविद्योपासत्रिता ।
 यदर्थोपनिषत्कृत्स्ना वृत्तिस्तस्या भविष्यति ॥१०६३॥
 आत्मेत्येकमिदं सूत्रं कण्डिकाद्वयमेव वा ।
 अध्यायो वा समस्तो ऽयमध्यायद्वयमेव वा ॥१०६४॥

In this statement, viz. *ātmety* ... is introduced the lore of the Brahman for (conveying) which the entire Upaniṣad (has proceeded). Now will be given a full explanation¹ of that; viz. one Sūtra *ātmety* ..., or two sections² (*kaṇḍikās*), or this entire chapter³ or these two chapters⁴. [1063-1064]

¹The Upaniṣadic sentence *tad āhuḥ* is the explanation of the lore of the Brahman. This, according to Śaṅkara (NKL).

²(i) *tad dha* ... and (ii) *tad etat* ... This, according to Sureśvara (NKL).

³That is, BU ch. 1.

⁴That is, BU chh. 1-2.

अव्याकृतव्याकरणप्रभृतीन्यपरे विदुः ।
 पञ्चैव किल सूत्राणि तथापीष्टं न बाध्यते ॥१०६५॥

[Verses 1065-1068 mention the view of Bhartṛprapañca.]

Others (however) have understood (the explanation to be) only the five Sūtras beginning with the statement of the division of what was unmanifest; but, even in that way, the desired purpose is not lost (lit. obstructed). [1065]

अव्याकृतं स एषेह तथात्मैवेति चापरः ।
 पदनीयं तथा प्रेयः पदार्थाः पञ्च सूत्रिताः ॥१०६६॥

(Thus, according to him,) there are (references to, or Śruti statements about the five Sūtras heard (or enumerated,) viz. *avyākṛta*, *sa eṣeḥ*,¹ *ātmaiva*,² *padanīyam* and *preyaḥ*, as the objects of knowing. [1066]

The first four references occur in BU 1.4.7 and the fifth in BU 1.4.8. Cf. SP: *ajñātam ātmatattvaṃ jagato nidānam, tad eva*

srṣṭe jagati praviṣṭam, tad eva cānātmano hitvā jñātavyam, tasyaiva jñātatvena padanīyatvam, tad eva ca priyatamam iti padārthapañcakam atra sūtram.

¹In BU it reads *sa eṣa iha*. Sureśvara has adopted double Samdhi in Chāndasa manner.

²This is *ātmety eva* for metre's sake.

यथोक्तानां च सूत्राणामा शास्त्रस्य सममपनात् ।
वृत्तिः स्यादुत्तरो ग्रन्थस्तत्र तेषां समन्वयात् ॥१०६७॥

(Let it be understood that) the subsequent portion of this text up to the completion of this Upaniṣad is the explanation of the Sūtras as stated (above), because, in that (portion), there is proper construing of them. [1067]

व्याचिख्यासुरथेदानीं सूत्रार्थाञ्श्रुतिरञ्जसा ।
प्रयोजनाभिधित्साया उपोद्धाते प्रवर्तते ॥१०६८॥

Now, the Śruti, desirous as it is to explain the thoughts in the Sūtras in a smooth way, proceeds to introduce the discussion with an aim to state their purpose. [1068]

Now follows the discussion of the meaning of *tad āhuh*.

For *upoddhāta*, cf. NKL: *cintām prakṛtasiddhyarthām upoddhātam pracakṣate*, i.e. the statement of the basic thought or the purpose of the discussion which is undertaken.

वक्ष्यमाणवचो वस्तु तच्छब्देनाभिधीयते ।
ब्रह्म जिज्ञासवो विप्रा आहुर्यद्गुरुसंनिधौ ॥१०६९॥

By the word *tat* is expressed the thing about which there is a discussion to be undertaken (in the subsequent portion of the text), viz. what the Brāhmaṇas, who were desirous of knowing the Brahman, said in the presence of the preceptor. [1069]

To begin with, the Vārtika explains the meanings of the words in *tad āhuh* ...

विज्ञाताशेषवेदान्तसर्वस्वं ब्रह्मणि स्थितम् ।
 उपसद्य गुरुं न्यायादाहुः केचिन्मुमुक्षवः ॥१०७०॥
 यज्ञाद्याहितसंस्कारा अपास्ताशेषसाधनाः ।
 सांसारिकपुमर्थेभ्यो विरक्ताः शुद्धबुद्धयः ॥१०७१॥
 त्यक्त्वा कर्माणि निःसङ्गाः कर्मणां चरितार्थतः ।
 ब्रह्मविद्याप्लवेनेमं संसाराब्धिं तृतीर्षवः ॥१०७२॥
 आ विरिञ्चात्पुमर्थानामकृत्स्नत्वादिदोषतः ।
 वितृषो ऽशेषतद्दोषद्विस्तृष्यः परीप्सवः ॥१०७३॥
 साक्षेपमाहुः श्रेयांसं गुरुं प्राप्य निरेषणाः ।
 गुरुद्वारैव विद्येह श्रेयःप्राप्तौ क्षमा यतः ॥१०७४॥

Having approached the preceptor who had known the essence of all the Upaniṣadic texts and who abided in the Brahman¹, some seekers of liberation addressed (him) in the prescribed manner², [1070]

— (the seekers) who had purified themselves by (lit. placed in themselves) some *saṃskāras* (by the performances of) sacrifices etc.³, who had discarded (lit. thrown away) all the means (of ritual performance etc.), who had become averse to the ends of human endeavour, and who were thus pure in intellect, [1071]

who were without any attachment, after having abandoned the ritual activities, since the purpose of (their) activities had been fulfilled, and who were desirous to cross over this ocean of worldly existence in a boat in the form of the lore of the Brahman, [1072]

who were without any desire owing to there being faults in all the ends of human endeavour up to Viriñca, such as incompleteness etc. and seeking to attain bliss (which consists in) the destruction of all of the faults in them, [1073]

devoid of any desire, having approached an excellent preceptor, with courage⁴ addressed him; since, here in respect of obtaining bliss, only knowledge through (the guidance of) the preceptor is an effective (means).⁵ [1074]

There description here of Brāhmaṇas who are seekers of liberation.

¹That is, who was given to constant meditation on the nature of the Brahman.

²There are statements in the Śruti and the Smṛti about the manner in which one should approach the preceptor. Refer to *Muṇḍakopaniṣad* 1.1.12.

³That is, who had purified their intellect by the performances of rituals.

⁴*sākṣepam* usually means: thoughtlessly (or, without much thought). Here the idea is: They made bold to address him.

⁵See CU 6.14.2: *ācāryavān puruṣo veda ...*

किमाहुरित्यपेक्षायामिदं तदभिधीयते ।
मन्यन्त इत्यनेनैव यच्छब्दो याति संगतिम् ॥१०७५॥
अव्यावृत्ताननुगतं वस्तु ब्रह्मगिरोच्यते ।
मुख्यार्थो ब्रह्मशब्दो ऽयमेवं सत्युपपद्यते ॥१०७६॥

(With a view to answering) the curiosity as to what they said, this is said in the statement: *manyante* ... and thus (i.e. in this way), the word *yat* gets properly construed. [1075]

By the word *brahman* is mentioned that (real) thing which is not differentiated from anything else and is not followed by (i.e. is not similar to) any other. This being the case, this word *brahman* becomes reasonable in its primary sense. [1076]

Here is introduced the Śruti *yad brahmavidyayā sarvam bhavi-
syanto manuṣyā manyante*.

तद्यथा वेद्यते बुद्ध्या तदसाधारणात्मना ।
ब्रह्मविद्येति तां साक्षाच्छेमुषीं प्रतिजानते ॥१०७७॥

They call that instruction as the lore of the Brahman by which the Brahman, in its uncommon nature, becomes known; they declare that itself¹ as devotion (to the Brahman). [1077]

This explains the word *vidyā*.

¹This refers to the lore of the Brahman.

सर्वं कृत्स्नं भविष्यामो मन्यन्ते ब्रह्मविद्यया ।
 यन्मनुष्या वयं तत्र विरोधमनुयुञ्जमहे ॥१०७८॥
 कृत्स्नमेव यतः प्रोक्तं वस्तु यत्पारमार्थिकम् ।
 तत्प्रमाणविशुद्ध्यर्थं चोदयन्ति मुमुक्षवः ॥१०७९॥

We hold an objection to that, viz. men think, 'We shall become by the lore of the Brahman all that is complete.', [1078] because the thing, which is the ultimate Reality, is described to be all this;¹ therefore, the seekers of liberation raise an objection with a view to ascertaining the clarity of the argument (lit. means of knowing): [1079]

Now, there is discussion of the meanings of the sentence. To begin with, verse 1078 expresses the intention of the disciples.

These justify the questioning by the seekers for liberation. They raise this question not because they desire anything, but they seek fuller clarification of the Reality which is described as 'all this'.

¹The entire mass of this world. Cp. *atra hy ete sarve ekam bhavanti*.

ब्रह्मविद्यैव कृत्स्नाप्तौ यस्मात्साधनमुच्यते ।
 तत्प्राप्तौ तत्तमोमात्रं व्यवधानमतो भवेत् ॥१०८०॥

Since the lore of the Brahman alone is declared to be the means to obtaining fullness (or completeness), therefore, only ignorance about that (Brahman) would be the obstruction to acquiring that.¹ [1080]

¹Namely, knowledge of the Brahman.

द्योतिकैव यतो विद्या न त्वसौ कारकं ततः ।
 उत्पत्त्यादिक्रियाकार्यं तस्माच्चेह न शङ्क्यते ॥१०८१॥

[The objector might emphasise the word 'arguing' which leads to the idea of 'producing' (the knowledge of the Brahman). The following verse answers away this objection.]

Since knowledge is only an indicator¹ (to Reality, i.e. the Brahman), indeed, it is not, therefore, a means of producing (that) and therefore, in this context², no doubt should be entertained as to any activity and its effect beginning with production.³ [1081]

NKL writes *karmasamuccitadhīphalatvam mukter arthān nirastam*; the editor of NKL points out that this remark is for setting aside the idea of the combination of knowledge and activity which Bhartṛprapañca has posited.

¹It means: what throws light on.

²It means: securing liberation.

³These are: *āpti*, *saṃskṛti* and *vikṛti* (beside *utpatti*).

सिद्धे ऽर्थे द्योतको दीपो न तु कार्ये यतस्ततः ।
सर्वात्मभावः सर्वेषां सिद्धः प्रागपि बोधतः ॥१०८२॥

Since a lamp is an illuminator of an already existing object and not of what is to be produced, therefore (let it be understood that), in the case of all (the persons), becoming (one with) the Ātman is accomplished even before (they have acquired) the knowledge¹. [1082]

This is to affirm that liberation (*sarvātmabhāva*) does not have to be produced.

¹It is the knowledge of oneness of the individual self with the Supreme Self.

अतो ऽकृत्स्ना वयं मोहात्कृत्स्नात्मानो ऽपि वस्तुतः ।
निहत्य विद्ययाविद्यां यामः कात्स्न्यं स्वतोगतम् ॥१०८३॥

Therefore, we are incomplete on account of (our) ignorance, even though we are in reality of the nature of (what is) complete¹ (and), having destroyed ignorance (by the knowledge of the Brahman), we shall attain fullness² which is already within us. [1083]

¹*sarvam kṛtsnam manyante*.

²Or, completeness. Mark the conceived motion in *kārtsnyam yāmaḥ*.

अधिकारविनिश्चित्यै मनुष्या इति गीरियम् ।
मनुष्याणां हि निःशेषत्रय्यर्थे ऽधिकृतिर्यतः ॥१०८४॥

This word *manuṣyāḥ* is for specifying eligibility, since men have eligibility with respect to the meaning of all the three Vedas. [1084]

दृष्टार्थतो वा विद्याया मनुष्यग्रहणं कृतम् ।
तावन्मात्रो ऽधिकार्यत्र नाग्निहोत्राधिकारिवत् ॥१०८५॥

Since the lore of the Brahman secures a 'seen'¹ purpose, therefore, there is a mention made of (all) men² (in the Śruti regarding the lore of the Brahman). Here, whosoever is man is eligible (for the study of the lore); not like only someone that is eligible for (the performance of) Agnihotra³. [1085]

Here is another explanaltion of *manuṣyāḥ*.

¹In the case of injunctions regarding rituals the results are unseen, since ritual does not directly lead one to the final result.

²*tāvanmātra* = *manuṣyamātra*.

³Regarding Agnihotra and other such performances, there is restriction of caste etc. of the performer. This is not so in the case of the lore of the Brahman.

प्रत्यबुध्यत यो यस्तदिति चोर्ध्वं प्रवक्ष्यति ।
नातः कर्माधिकार्यत्र दृष्टार्थत्वादपेक्ष्यते ॥१०८६॥

And (the Śruti) will later declare (in words) *pratyabudhyata yo yas tat*.¹ For this reason,² it is not found here necessary that one has to be eligible by (the performance of) some (ritual) activity, since (this lore of the Brahman) has a seen result. [1086]

Though the preceding verse has expressed this idea, it is repeated here purposely. One who performs a ritual activity becomes eligible

for the final result. This is indirectly known. In the case of the lore of the Brahman, the case is different, i.e. one knowing the Brahman becomes one with it. Read SP: *karmādhikārī tadvadviśiṣṭo 'dhikārīty arthah*.

¹This has a reference of BU 1.4.10 which reads *pratyabudhyata sa eva tad abhavat*. This justifies the second line of the preceding verse.

²In other words: Because there is a seen result.

कर्मभ्य इव च ज्ञानात्फलप्राप्तिं सुनिश्चिताम् ।
मन्यन्त उभयत्रापि श्रुतिमानाविशेषतः ॥१०८७॥

They hold that there results definitely the fulfilment of some end from knowledge as from the performance of (rituals), since, in the case of both¹, there is no difference in respect of the means of knowing them, viz. the Śruti. [1087]

This explains why they decide the lore of the Brahman as leading to liberation.

¹This means: the knowledge of activity and the lore of the Brahman.

यन्मन्यन्ते नरास्तत्र विरुद्धमिव लक्ष्यते ।
यतो ऽतश्चोदयामो ऽत्र यथा विप्रतिषिद्धता ॥१०८८॥

Since there appears here in the statement *manyante narāḥ* something which is opposed (to the acquisition of the result of the lore of the Brahman as explained above), therefore we are adducing how there is opposition. [1088]

¹This is to introduce the question *kim u tad brahmāved yasmāt tat sarvam abhavad iti*; (*parichinnam aparichinnam vā*).

किमु तद्ब्रह्म यद्वेद्यं यज्ज्ञानात्सर्वताप्यते ।
किंचापि तदवेदन्यद्यज्ज्ञानात्कृत्स्नतामगात् ॥१०८९॥

What is that Brahman, which is to be known (and) from the knowledge of which is obtained fullness (completeness)? And

further, what else did it know from whose knowledge it attained to fullness¹? [1089]

¹This is the paraphrase of *sarvatā*.

ब्रह्माकृत्स्नं मतं तच्चेदुक्तदोषानिराकृतेः ।
अनुपास्यं भवेत्तादृक्प्राणादिवदसंशयम् ॥१०९०॥

If that Brahman is held to be incomplete (=not full), then it would certainly not be what should be pondered over (lit. worshipped, or meditated on), in the same way as the sense-organs etc. which are similar to that,¹ because there is no removal of the fault (already) stated² before. [1090]

¹That is, *akṛtsna* like the *prāṇas*.

²Namely, pondering over 'that which is not full, would not lead to the result, viz. fullness'.

कल्पना नापि गौण्यत्र मुख्यार्थे सति युज्यते ।
न ह्यालभन्ते वाहीकं मुख्ये गवि सति क्वचित् ॥१०९१॥

In this context, it is not proper to hold a metaphorical notion while the principal meaning/object is acceptable¹. Indeed, they do not kill in any sacrifice a Vāhika (a man from the Punjab) when there (really) exists a bull². [1091]

Calling the Brahman incomplete, one cannot establish that the knowledge of the Brahman is the result called incompleteness.

¹That Brahman is full is a matter of experience, therefore it is not correct to consider that it is not full (as said in verse 1090 above).

²We have an example of *lakṣaṇā* 'metaphorical usage in language' in the oft-quoted sentence *vāhikaḥ gauḥ* 'A man from the Punjab is a bull.'; therefore, since a Vāhika is here called a bull, one should not proceed to kill him in a sacrifice where a bull is to be killed. Such an activity never takes place; it is only improper to do so. Metaphorical usage in language should not imply an actual action.

मुख्यं ब्रह्म न चेदस्ति गौणं स्यात्तद्विना कुतः ।
मुख्यमग्निं विना गौणं न लोको ऽप्यवगच्छति ॥१०९२॥

Supposing there did not exist the Brahman in the principal sense (of the word), how could there be a metaphorical Brahman without that? (Indeed,) unless there is a real fire, people do not entertain the notion some metaphorical fire. [1092]

This refers to the *lakṣaṇāvyāpāra* whose example is *agniḥ māṇavakaḥ* 'Young Māṇavaka is fire.'. Here, unless the speaker has known what is real fire — or, in other words, if there did not exist a real fire — he would not have employed the metaphorical statement mentioned above. In the same way, the real Brahman being unknown, nobody could hold it as metaphorically existent. Cf. Śaṅkara's statement in *Adhyāsabhāṣya* (p.81): *sarvo hy ātmāstitvam pratyeti ...*

अकृत्स्नज्ञानतो नापि पुरुषार्थो ऽवगम्यते ।
ब्रह्माज्ञानसमुत्थत्वाग्निमथ्याज्ञानत्वकारणात् ॥१०९३॥

And, further, the end of human endeavour is not obtained from knowing what is incomplete, because (that knowledge) has arisen from the ignorance about the Brahman, i.e. because it has arisen from false knowledge. [1093]

मेयमानादिसंभित्तिर्यदि नामेह लभ्यते ।
अयथावस्तुरूपत्वात्स्वप्नमेयादिवत्तु सा ॥१०९४॥

If at all we find here¹ the differentiation among the object of knowing, the means of knowing etc., that is like the objects of knowing in a dream since they are of the nature of what is not real. [1094]

This explains *mithyājñānatvakāraṇāt* in verse 1093.

This refers to the use of *pramāṇa-prameya-vyavahāra* in respect of the Brahman and in that is that *vyavahāra* based on unreality

of objects; the example of a dream makes the idea clear. For this, see *Gauḍapāḍakārikā* 2.1.

¹It means: in respect of knowing the Brahman .

अकृत्स्नस्य च ब्रह्मत्वं विरुद्धं भानुशैत्यवत् ।
तस्मादकृत्स्नं ब्रह्मेति न मानेनोपपद्यते ॥१०९५॥

And (holding) an incomplete thing as the Brahman involves internal contradiction as (in holding that) the sun is possessed of cold; therefore, by none of the means of knowledge is an incomplete object reasonably held as the Brahman. [1095]

ब्रह्मास्तु तर्हि तत्कृत्स्नमुक्तदोषासमन्वयात् ।
मुख्यार्थलाभतश्चापि तस्य च प्रकृतत्वतः ॥१०९६॥

Let then that Brahman be full (i.e. complete), since it is not inseparably associated with the faults stated earlier and, further, for the reason that it is the matter under description and from that we get to know the principal meaning of the word. [1096]

न कृत्स्नमिति तद्ग्राह्यं तत्प्रमाणाद्यसंभवात् ।
तदन्यवस्तुसद्भावे तद्ब्रह्मत्वं विहन्यते ॥१०९७॥

Let not that Brahman be understood as full, for there cannot be any means etc. of knowing that¹ (And) if there is held to exist another object, the nature of the Brahman would get disproved². [1097]

¹It means: its fullness.

²In the first half of the verse the objector points to the need of having some means of knowing for the nature of the Brahman and, if a means of knowing were accepted to exist, that should mean something else than the Brahman existed and therefore the nature of the Brahman as one without a second should get disproved.

न च मानानपेक्षस्य सिद्धिरभ्याप्यमाने ।

मानादियत्नानर्थक्यप्रसक्तिः स्यात्तथा सति ॥१०९८॥

And nobody accepts as proven what is not dependent on a means of proof; for, if that were so, there would result the contingency that there is uselessness of a man's effort to employ the means of proof etc. [1098]

सदानुदितालुप्तैकज्ञप्तिमात्रसतत्त्वकम् ।
यद्यपौष्टं तथापीदं नात्ममोहापनोदकृत् ॥१०९९॥

Even if it is held that (Reality) is ever unoriginated, unnegated, and of the nature that is merely knowledge, in that case also it cannot be the remover of ignorance about the Ātman. [1099]

न हि मानमनाश्रित्य वस्त्वात्माज्ञानहानिकृत् ।
स्रक्स्थाण्वादावदृष्टत्वादुक्तदोषो ऽपि चापतेत् ॥११००॥

Indeed, there cannot be a thing which is the remover of ignorance about the Ātman, unless without resorting to some means of knowledge; for this fault would occur when (the absence of any means of knowing) is not noticed in (the apprehension of) a garland, a tree etc. [1100]

मानाद्यनभ्युपेतौ हि न किञ्चिद्वस्तु सिद्ध्यति ।
तदभ्युपेतौ ब्रह्मत्वं व्यावृत्तेर्न प्रसिद्ध्यति ॥११०१॥

Indeed nothing can be proved if any means of knowing it etc. is not accepted and if that¹ is accepted then the nature of the Brahman cannot be established because it is then already differentiated (from something). [1101]

¹ = *mānādi*.

यथाकथंचिच्छदार्थो यदि नामाभ्युपेयते ।
तथापि दोषवद्ब्रह्म यथा तदधुनोच्यते ॥११०२॥

And, indeed, if the meaning of the Śruti (passage) is somehow accepted (as known), in that case also, the Brahman will have

(to be accepted as having) a fault — how that is so is now explained. [1102]

कृत्स्नं वा यदि वाकृत्स्नं यथेच्छसि तथास्तु तत् ।
ब्रह्मत्वं किं स्वतस्तस्य किंवा तत्परतो मतम् ॥११०३॥

(Well!) let that Brahman be complete or incomplete, in whatsoever (form) you may hold (lit. desire) that (to be). (We ask a question:) Does the nature of the Brahman exist in its own right or on account of (a thing) other than that? [1103]

यदि तावत्स्वतस्तस्याद्ब्रह्मविद्या निरर्थिका ।
न ह्युष्णत्वं हुताशस्य परतः कुर्वते बुधाः ॥११०४॥

If, in the first place, that would exist in its own right, then the lore of the Brahman would be meaningless. Indeed, the wise do not accept the hotness of fire as (coming) from another. [1104]

ज्ञानमर्तेर्न चाज्ञानमागन्तु सहजं तथा ।
भानौ तमोवत्तेनेद्ब्रह्म नैवोपपद्यते ॥११०५॥

Further, in the case of what has the form of knowledge, ignorance cannot be either adventitious or natural in the same way as darkness in the sun¹. Therefore, such² Brahman does not get reasonably explained. [1105]

¹That is, together with the sun.

²Namely, which is accompanied by ignorance.

शास्त्राद्यारम्भानर्थक्यदोषश्चापि प्रसज्यते ।
स्वानुभूतिविरोधो ऽपि ब्रह्मत्वं चेद्वेत्स्वतः ॥११०६॥

And there would also be contingent the fault of meaninglessness (or uselessness) of/in the effort of the Śāstra¹ and also contradiction with one's own experience, if it would be held that the state of the Brahman gets established by itself. [1106]

¹The Śruti text giving instruction on the nature of Brahman; ārambha 'activity' — cf. *vāmetaras tasya karaḥ prahartuś ... citrārpitārambha ivāvatasthe* (*Raghuvamśa* 2.31).

योषाग्निवच्चेच्छास्त्रं स्याद्दृष्टिमात्रविधायकम् ।
तथा सत्यविरोधः स्याद्विन्नाधिकरणत्वतः ॥११०७॥

(Again) if the Śruti would enjoin one merely to look upon (something as the Brahman), in the way as one should see fire in the place of a woman¹, there would be in that case no opposition, since the Brahman and the so-called other thing do not have (two) different bases. [1107]

¹Cf. CU 5.8.1: *yoṣā vāva gautamāgniḥ*. This pertains to the conflict between Śāstric sentence and direct perception.

सदसीति क्रियानिष्ठं प्रत्यक्षाद्यर्थनिष्ठितम् ।
विरोधः को ऽनयोरत्र मिथोर्थासंस्पृशोः सतोः ॥११०८॥

The sentence *sad asi* 'You are existent.' is based on (what is formally expressive of) action and is based on what is directly perceived etc. What contradiction could there be in this case where these so-called two are not touching one another? [1108]

This verse is the explanation of the second line of the preceding verse.

sad asi has the word *asi* which grammatically refers to some action, but being and action are here just non-different. They refer only to being, therefore there is no contradiction between the two.

नैतदेवं यतो वाक्यं वस्तुनिष्ठं पुरोदितम् ।
विरोध एव तेन स्यादेकाधिकरणत्वतः ॥११०९॥

But, this is not so, since there is already a statement made which pertains to Reality. Therefore, there is indeed contradiction in that (since the two are mentioned in that sentence) as having but one basis. [1109]

This refers to the earlier passage *sarvo 'py ayam ...* (SV 556).

अशक्या ब्रह्मदृष्टिश्च कर्तुं ब्रह्माप्रसिद्धितः ।
लोकसिद्धौ तु योषाग्नी तद्दृष्टिः सुकरेष्यते ॥१११०॥

Also, it is not possible to look upon something as the Brahman because of the non-knownness of the Brahman. As against this, a young woman and fire are already existing in the world¹ and therefore that (metaphorical) seeing is easily acceptable. [1110]

¹As two distinct entities.

अथाग्निवच्चेत्तद्ब्रह्म सिद्धं मानान्तरान्मतम् ।
तावतैव कृतार्थत्वात्किमन्यत्प्रार्थ्यते श्रुतेः ॥११११॥

If that Brahman were taken to be established by another means (of knowing) in the way as fire, then by that very (means of knowing) the purpose being served¹ what else is expected from the Śruti? [1111]

The argument is: Fire is seen and immediately known, there is no need of any other means of knowing it, i.e. a Śruti or a statement of somebody about it, for example. Similarly, if the Brahman is seen (i.e. experienced) by one, where is the need of such a Śruti?

¹Namely, that it becomes known.

तद्दृष्टावेव निःशेषपुरुषार्थसमाप्तिः ।
फलान्तराय तद्दृष्टिर्न च स्यादग्निदृष्टिवत् ॥१११२॥

Since there is the attainment of all the ends of human endeavour when the Brahman is seen, therefore there is no need to see it (in another object) for achieving (yet) another result; (and thus) this would not be like seeing the fire (in a woman). [1112]

Before one hears the statement about fire in a woman, one does really see the fire, and one's purpose is not fully served, viz. no *puruṣārtha* is obtained; therefore, that purpose has to be served by yet another means, viz. by accepting *lakṣaṇā* 'metaphor' and doing meditation on 'fire in the woman'. As against this, when the Brahman is seen every *puruṣārtha* is obtained, there remains no other purpose to be achieved whatsoever. It means, therefore, that seeing Brahman in some objects is entirely redundant. This argument in the verse is supported by the illustration of a dissimilar object (*vaidharmyadr̥ṣṭānta*).

परतो ऽपि च कृत्स्नत्वे ब्रह्मत्वं दुःस्थसिद्धिकम् ।
क्रियातो ज्ञानतो वा तद्यदि वोभयसंश्रयात् ॥१११३॥

And in the opinion that completeness (of the Brahman is established) on account of another, the character of the Brahman is difficult to establish.¹ One would entertain ideas about the nature of the Brahman as established from some action, or from the knowledge (of it)² or perhaps from both.³

[1113]

The argument, which is controverted in this verse, presupposes that the nature of the Brahman cannot become known from itself.

¹The Brahman would be determined as impermanent like heaven etc.

²Supply: by some means of knowing. This also points to its impermanent character.

³This is clarified in the next verse.

न ब्रह्मता क्रियातः स्यादुत्पत्त्यादिसमन्वयात् ।
न स्यादाद्यन्तवद्ब्रह्म ह्यपूर्वाजादिशास्त्रतः ॥१११४॥

Indeed the nature of the Brahman cannot be established on the basis of some action, because that (viz. action) is inseparably connected with an origin etc.¹ Further, the Brahman would not be having a beginning and an end, since there is a scripture saying that it is *apūrva*, *aja* etc.²

[1114]

The first line clarifies the argument in the preceding verse and the second offers the reason for not accepting it.

¹The word etc. stands for *āpti*, *saṃskṛti* and *vikṛti*; these would show its changeable nature and, consequently, its impermanence.

²BU 3.8.8.

अपवादश्च बहुशः कर्मकार्यस्य दृश्यते ।
मुमुक्षुत्वस्य तद्धेतोः कर्मकार्यं न तत्ततः ॥१११५॥

Many a time it is noticed that there is rejection of (lit. exception taken to) there being an effect of some action in respect of liberation¹; it has that (Brahman) as its cause and, therefore, it is not an effect of that (viz. an action). [1115]

¹Cf. *Muṇḍakopaniṣad* 1.2.12; BU 4.4.22.

अथ ज्ञानात्तदभवत्कृत्स्नं ब्रह्मेति चेन्मतम् ।
अन्यानन्यप्रमेयत्वे तथापीष्टं न सिद्ध्यति ॥१११६॥

If it is held that the Brahman became full¹, owing to knowledge, then, having accepted (that knowledge) to be different from it, not different from it, and different and non-different from it also would (i.e. does) not establish the truth (or get established). [1116]

If knowledge and the Brahman are accepted to be the source and the product, we can pose three different relations between the two: (1) the two are different, (2) the two are not different and (3) they are in part different and in another not different. This is the basic supposition in the word *jñānataḥ* of verse 1113. This verse points out very clearly that none of these three relations can be entertained and therefore the supposition gets disproved.

¹That is, produced — cf. *utpattyādi* mentioned earlier in verse 813.

क्रियाविरोधः प्राप्नोति यद्यनन्यस्य मेयता ।
श्रुत्यन्तरविरोधश्च प्रत्यग्दृष्टौ प्रसज्यते ॥१११७॥

If it is held that the unique Brahman is an object knowable from what is not different from it, then there results opposition to the activity¹ (viz. making it known) and, further, there becomes contingent the opposition to another Śruti² regarding seeing the inner self. [1117]

¹If the Brahman is understood as produced from what is not different from it, then there is opposition as regards what is the agent and what, the object of production.

²*Kenopaniṣad* 1.4: *anyad eva tad veditāt* . Or BU 3.5.2: *na dr̥ṣṭeḥ dr̥ṣṭāram paśyet*.

तथा च ज्ञानसाध्यत्वं ब्रह्मणः संप्रसज्यते ।
अन्यानन्यप्रमेये ऽपि दोषो ऽयं दुर्निवारणः ॥१११८॥

So also it would be contingent to accept the nature of the Brahman as what can be obtained or acquired by means of knowledge¹. And this fault² is difficult to avoid in that it is accepted as a knowable from another or not from another (i.e. from itself). [1118]

SP points out that the argument in the two verses is based on acceptance of the distinction and the non-distinction (obtaining) between knowledge and the Brahman.

¹It is accepted in the expression that knowledge and the Brahman are related as a means of knowledge and the result to be acquired thereby. This is against the Śruti which says that knowledge and the Brahman are not different.

²*kriyāvirodha* and *śrutyantara*.

बुद्ध्वाथान्यत्तदभवत्तदन्यत्किमबुध्यत ।
तदप्यन्यत्पुराज्ञासीदनवस्था प्रसज्यते ॥१११९॥

If (it is held that) the Brahman became complete on knowing a different thing, then what was that other that was known? Holding that it¹ also was yet another thing earlier would make *infinite regress* contingent. [1119]

¹Namely, that which was known.

निर्निमित्तस्य कृत्स्नत्वे ऽप्यस्मंदादेस्तथा न किम् ।
पक्षपातः श्रुतेर्नापि प्रामाण्यादुपपद्यते ॥११२०॥

In case (the Brahman), which did not have a cause (for becoming full), attained fullness¹, why should not this (be) in the case of persons like us²? (Indeed) such partiality on the part of the Śruti cannot stand to reason because it is the real means of knowing (Reality). [1120]

This verse has set aside the view beginning with the words: *etena kimcāpi tad aved iti*.

¹That is, becoming one with the Brahman.

²It means: Those who are required to know the nature of the Brahman by the study of the Vedānta.

समुच्चयनिषेधश्च युक्तिभिर्वक्ष्यते स्फुटम् ।
प्रधानगुणभावो ऽपि विरोधान्न तयोर्भवेत् ॥११२१॥

And¹ there will be clearly stated the rejection of the combination (of knowledge and activity²) by (adducing) reasons. Also, there cannot be the relation between the two as the principal and the subordinate, because of their (mutual) contradiction. [1121]

This refers to Bhujyu Brāhmaṇa (=BU 3.3).

¹By the word 'and' Sureśvara suggests (this is according to SP and NKL) the idea of the combination has been already rejected with reason in the SV 357-377. But this refers to BUBV 1708ff. — This justifies *vakṣyate*

²This refers to threefold combinations of knowledge and activity, according to SP and NKL; knowledge and activity in equal proportion, knowledge and activity in unequal proportion, knowledge principal and activity subordinate, or vice-versa).

इत्यादिबहुदोषत्वाद्दुःसंभाव्यं प्रमाणतः ।
विद्ययैवाप्नुमः कात्स्न्यमित्यादि यदुदीरितम् ॥११२२॥

Because there are these and many other fault, (attaining completeness) is difficult to occur on the strength of any means of (right) knowledge; (therefore) we shall obtain this wholeness etc., which was stated, only by knowledge. [1122]

This concludes the introductory to the Siddhānta which follows soon after.

न कश्चिदपि दोषो ऽत्र यथैतदुपपत्स्यते ।
अन्यथा कल्प्यमाने ऽस्मिन्नुक्तदोषपरंपरा ॥११२३॥

There is not be even a little of fault here¹ because (all) this will be stated with reason²; if this is understood otherwise,³ there follows a chain of faults stated (above). [1123]

¹According to NKL, this refers to Vivartavāda.

²It will be shown later that knowledge about the Brahman will effect liberation.

³This is a reference to Parīṇāma-vāda: According to some, the Brahman undergoes modifications. According to a note by NKL on verse 1160, Bhartṛprapañca's view resembles this view.

एवं तावदुपोद्धातो व्याख्यातो ऽत्र समासतः ।
भगवत्पादभाष्ये ऽस्मिन्नन्यदीयो ऽपि वर्ण्यते ॥११२४॥

Thus far, we have briefly explained the introductory¹ in the commentary of (our) revered teacher(Śaṅkara), to begin with, and now in this (i.e. in what follows, or 'here') another introductory is also being presented.² [1124]

¹The word *upoddhāta* has to be understood as words *tad āhuḥ* in the beginning of BUB 1.4.9.

²Earlier explanation has followed the argument of Śaṅkara and what now follows is the argument of the Vṛttikāra. According to SP and NKL, he is Bhartṛprapañca. SP states that Sureśvara finds the exposition acceptable.

Verses 1055-1124 presented an exposition of the introductory remark by Śaṅkara and now from verse 1125 the Vārtika discusses the meaning of BU 1.4.9 according to the Vṛttikāra.

तदेतद्ब्रह्मविद्याया आरम्भे फलमुच्यते ।
तत्प्रवृत्त्यङ्गतायै च तत्फलस्य प्रकीर्तनम् ॥११२५॥

With the words *tat* ... there is here¹, at the very beginning of the lore of the Brahman, the statement of the result (of the lore) and, the statement of the result of the same is made as an ancillary to the activity towards that (viz. acquiring the lore of the Brahman). [1125]

¹This is *etat*.

वक्ष्यमाण उपोद्धातो ब्रह्मविद्या ततः परं ।
ततो ऽप्यूर्ध्वं फलोक्तिश्चेत्तच्छब्देनोच्यते कथम् ॥११२६॥

(A question is asked:) If the introductory is going to be stated, and the lore of the Brahman (also will follow) later, and then thereafter (there is going to be) the statement of the result, then why is (that result) expressed by the word *tat*? [1126]

NKL clarifies the question thus: *tat* signifies the introductory statement; *tad ātmānam avet* is the lore of the Brahman and *tat urvam abhavat* is the mention of the result. Therefore, Bhartṛ-*ṛapañca's* view: *tat*, which is expressive of the result, is *dūrānvaya-
uṣṭa*.

अनन्तरेण संबन्धसामर्थ्ये सत्यमानतः ।
दवीयसाभिसंबन्धस्तच्छब्दस्योच्यते कुतः ॥११२७॥

(The answer is given thus¹:) When (in your opinion also) the word *tat* (is said to have) the capacity to be connected² with what has preceded, (though) it is in distance (from it) (and) though there is no authority for it, why do you object to our view? [1127]

¹Add: by a counter-question.

²It means: has a syntactical unity.

³In *kaṇḍikā* 8: *na hāsyā priyam pramāyukam bhavati*; the *vidyāphala*.

द्वैतैकत्वात्मकं साक्षाद्ब्रह्मविद्योदयात्पुरा ।
समाप्य तत्फलं कृत्स्नं जातकौतुहलाः परे ॥११२८॥
आहुरेवं द्विजाः केचिद्विरक्ताः पूर्वभूमितः ।
संभाव्यते ब्रह्मविद्विर्यत्तदर्थबुभुत्सवः ॥११२९॥

Having experienced (lit. obtained) that entire result which is of the nature of (knowing) only unity in duality before there arises the direct knowledge about the Brahman,¹ they, who have their curiosity about the highest aroused, [1128] (they) who have become averse to the earlier stage of their life — the persons of three castes², becoming desirous of knowing the meaning of that which is thought/pondered over by the knowers of the Brahman, thus said: [1129]

This is according to Bhartṛprapañca the meaning of *āhuḥ*.

¹The knowledge of the Brahman does not refer to the instruction about the Brahman but the knowledge about the nature of it.

²According to BUB it refers to the Brāhmaṇas. But translation follows SP which notes the significance of the word *dvijāḥ* according to one view; read: *dvijagrahaṇena traivarnikānām eva vedadvārā vidyādhikāram sūcayati*. However, SP does not keep from noting its view: *dvija* indicates the maxim of *manuṣyāṇām sahasreṣu* [... *kaścin mām vetti tatvataḥ*] (*Gītā* 7.3).

द्वैतैकत्वधिया नैव पूर्वया फल्गुकार्यया ।
संभाव्यते सर्वभूतिर्यतः सा ब्रह्मविद्यया ॥११३०॥

Becoming all (i.e. complete or full) is not at all possible by earlier (gained) knowledge of unity in duality, which produces (only) an insignificant result,¹ since that (becomes possible) by the lore of the Brahman. [1130]

¹This refers to earlier *upāsanā* which would lead only to

transmigratory existence; cf. SP: *upāstir hi saṃsāraphalā*.

द्वैतैकत्वमतिर्यद्वत्स्वानुरूपफलाप्तये ।

अलं सर्वमतिस्तद्वत्सर्वभावफलाप्तये ॥११३१॥

As getting to learn¹ unity in duality is capable of resulting into one's acquiring its own proper result, so is the knowledge of all (as the Brahman) is capable of resulting into one's acquiring (the result, i.e.) the becoming all (i.e. complete).

[1131]

¹This is *mati*, viz. *dhī* (i.e. *vijñāna*) already noted in the preceding verse.

ब्रह्मबुद्ध्या भविष्यामः कृत्स्नं ब्रह्मेति तद्विदः ।

यन्मन्यन्ते ऽथ तद्ब्रह्म किमवेदिति पृच्छयते ॥११३२॥

Since the knowers of that (knowledge of the Brahman or the Brahman itself) think (i.e. hold:) 'We shall become the complete Brahman by getting to know the Brahman.'; there is the question asked, 'What did that the Brahman know?' [1132]

This is the explanation of BU: *yad brahmavidyayā ... tat brahmāvet*.

किमवेदिति यः प्रश्नः स किं स्यात्कर्तृकर्मणोः ।

विद्यायाः पृच्छयते कर्ता कर्म वेह विवक्षितम् ॥११३३॥

Is the question, viz. 'What did it know?', with reference to the agent or the action of knowing?¹ That is to say: 'What is sought to be mentioned, the knower or the object of knowing?' [1133]

This verse seeks the specific matter under question.

¹*karṭṛkarmanoh* is an optional compound.

ब्रह्मणा चेतकृता विद्या निष्फलेयं प्रसज्यते ।

ब्रह्मविद्योदयाद्यस्मादभूद्ब्रह्म पुरापि तत् ॥११३४॥

If it is held that the Brahman obtained this lore, then it is futile (to say so); since that Brahman was that (viz. itself) even earlier, i.e. even before the rise of (the result of) the lore of the Brahman. [1134]

This sets aside the possibility that the Brahman was the agent in the act of learning the lore.

तस्मात्कर्मैव विद्यायाः पिपृच्छिषितमत्र तु ।
प्रमेयोपाश्रयादेव यतः प्रामाण्यमुच्यते ॥११३५॥

Therefore, it is only (*tu*) the object of knowing which is questioned about, since the authoritativeness (of a means of knowing) is said¹ (to exist) only by its connection with (lit. resorting to) the object to be known (that is becoming known). [1135]

This is suggested: As a result of the answer in the preceding, the Brahman is the object in that act.

¹That is, held.

वस्तुनिष्ठत्वतो ऽदोषः कर्तर्यपि विवक्षिते ॥११३६॥
सर्वं ब्रह्माभवद्यस्माद्विज्ञानात्तदिहोच्यते ।
ब्रह्मविद्येति सर्वाप्तावसाधारणकारणम् ॥११३७॥

And even if (the Brahman) were intended as the agent of the knowing, there would be no fault,¹ since (the character of the agent) is abiding in the thing (i.e. Reality)². [1136]

That is called the lore of the Brahman from which (there arises) the knowledge: 'All (this) became the Brahman.'; that is, therefore, the uncommon means of acquiring (the fullness) of all.¹ [1137]

¹Both SP and NKL rightly point out: *adoṣaḥ iti padacchedaḥ*. Also, read in this context, SP: *na ca kartṛpraśne vidyāvaiphalyam, svataḥ sadā brahmatve 'pi brahmaṇaḥ avidyādhvaṃsitvena tatsā-phalyād iti bhāvaḥ*. (This is accepted by NKL).

²Supply: which is the object of knowing. That means the Brahman.

सर्वैकत्वावबोधो ऽयं ब्रह्मविद्यागिरोच्यते ।
द्वैतस्याद्वैतयाथात्म्यात्क्लृप्तसर्पादितत्त्ववत् ॥११३८॥

This, namely, knowing about all (duality) merges into but one (Reality), is expressed by the word *brahmavidyā* because of one's knowing thereby about the duality as the real nature of non-duality (exactly) in the same way as the truth about a serpent etc. that was imagined (in the place of a rope was realised). [1138]

This states the purpose of Brahmavidyā.

सर्वैकत्वं परं ब्रह्म परमात्मेति यं विदुः ।
तन्मोहजानां सर्वेषां स तत्त्वं परमार्थतः ॥११३९॥

The unity of all (duality) is the highest Reality, the Brahman; that is what they have known as the highest Ātman, it is, in reality, the true nature¹ of all that are the products of ignorance about itself. [1139]

This is according to SP in consonance with the Bhāṣya on BU (of Bhartṛprapañca): *sarvaikatvam param brahma paramātmā yah ... sa ātmā*.

¹Both SP and NKL have rightly invited attention to *sa tattvam iti padadvayam*.

तदज्ञानैकहेतुत्वात्तेनैव परमात्मना ।
तदन्यान्यात्मवन्ति स्युः सर्पादीनि स्रजा यथा ॥११४०॥

On account of that very highest Ātman (and) on account of only one cause, viz. ignorance about that (Ātman), the things other than that come have their existence in the same way as the serpent etc. come to have their existence (really) on account of a wreath (etc.). [1140]

This is the meaning of the Bhāṣya (of Bhartṛprapañca?) on BU: *anenātmanātmanvanti*.

उक्तमच्युतदृष्टीनां तदबोधैकहेतुतः ।
आब्रह्मस्थाणुभेदो ऽयं नामरूपक्रियात्मकः ।
अविद्याकृत एवायं न यथावस्तुधीकृतः ॥११४१॥

On the part of those who have lost¹ the knowledge (lit. sight) of (the true nature of) the Ātman, as described before, there is (this world of) duality beginning with the Brahman up to a pillar that has nature of names, forms and actions on account of only one reason, viz. ignorance about that (Ātman) — this (world of discrete objects) is produced only by ignorance and not by the knowledge of the thing (viz. Reality) as it is. [1141]

¹It literally means: fallen from.

तमोहन्यैव ततो ब्रह्म प्राप्यते ब्रह्मविद्यया ॥११४२॥
यथोक्ततत्त्वकान्येव रज्ज्वां तत्कलृप्तवस्तुवत् ।
सूत्रं विराङ्देवता च यावत्किञ्चिच्च वस्त्वह ॥११४३॥

Therefore, the Brahman is obtained only by the lore of the Brahman which destroys darkness, [1142]
(and also) whatever things¹, viz. the Sūtra², the deity (called) Virāj etc. — the different elements³ that were mentioned are here the Reality⁴ as in the case of a rope there exists a thing (which) is imagined in its place.⁵ [1143]

This is how Bhartṛprapañca would hold the Brahman as *dvaitādvaitātmaka*. According to Śaṅkara and Sureśvara, this refers to *vyavahārabhūmi*.

¹*vastu* in singular stands for *vastujāta* 'all things'.

²It is for Hiranyagarbha.

³This refers to the five elements.

⁴This refers to the Brahman which really persists in all the eight states mentioned earlier.

⁵This refers to a serpent seen in the place of rope and temporarily as a real thing.

ब्रह्मैवेदं यथा सर्वं विद्यया तदबोधजम् ।
अविद्यया तथाकृत्स्नं ब्रह्म सूत्रादिरूपकम् ॥११४४॥

As by (securing) the knowledge (about the Brahman) it is understood that all this and whatever is produced by the non-knowing¹ (about the true nature of the Brahman) is only the Brahman, in the same way, is the Brahman (understood) by not securing (that knowledge) (to be) incomplete and possessed of forms, beginning with Sūtra. [1144]

This is another statement about how the Brahman, which is without any particulars, comes to have them; these particulars are the eight forms, Sūtra etc. Refer to note on verse 487 above.

¹That is, ignorance.

भावनाज्ञानकर्माणि साधनानीति यद्यपि ।
तत्सतत्त्वमविद्यैव यतो ऽतः सैव कारणम् ॥११४५॥

Even if (it is said that) devotion, knowledge and action are the means (of acquiring the knowledge of the Brahman), yet for the reason that their nature is, (ignorance) only, that itself¹ is the cause (of this multifold universe). [1145]

¹Namely, ignorance.

न हि साधनसापेक्षं वस्तु स्यात्पारमार्थिकम् ।
परमार्थं न वस्त्वस्ति यत्परायत्तसिद्धिकम् ॥११४६॥

Indeed, a thing, which depends on the means (of knowing it or for its becoming known), cannot be a real thing. The ultimate Reality is also not a thing which, for getting established, depends on another. [1146]

मोहोत्थाः पृथगात्मानः साधनायत्तसिद्धिकाः ।
सूत्रादयस्तृणान्ताः स्युरन्योन्यव्यभिचारिणः ॥११४७॥

The different individual selves have originated from ignorance

and they get established as existing through their dependence on (different) means; (those things/objects), beginning with the Sūtra and ending with (a blade of) grass, are things which have variance with one another. [1147]

सर्वे ऽप्येते यथादृष्टि ह्येकैकस्य तमस्विनः ।
सूत्रादयो ऽनुभूयन्ते यथाकर्म यथाश्रुतम् ॥११४८॥

All of these, viz. the Sūtrātman etc., are understood by each person, who is possessed of (i.e. overpowered by) ignorance, as he sees them, in accordance with his activity, and his learning. [1148]

अविद्यैव यतो ऽमीषां प्रागभावो न तत्परम् ।
भावनाज्ञानकर्मभ्यो जन्मैषां तेन नान्यतः ॥११४९॥

Since ignorance alone is the prior non-existence of these (multifold objects), (and) not the highest Reality,¹ the origin of these is from devotion, knowledge and action and not from any other thing. [1149]

¹This implies that one should not try to infer the cause of these, viz. Pradhāna (as the Sāṃkhyas would do) or the Brahman (of the Pariṇāmibrahmavādins).

यथैता दर्शनावस्थाः कार्यमासां तथाविधम् ।
उत्पाद्यमाप्यं संस्कार्यं विकार्यं च क्रियावशात् ॥११५०॥

As these are the different phases (or types) of their worship¹, the functions connected with these also are of those kinds; viz. they are things (i)which can be created, (ii)which can be obtained, (iii)which can be polished or improved and (iv)which can undergo modification(s), by some action. [1150]

This explains the result produced by Upāsanā-jñāna 'meditation/worship'.

¹This is literally seeing or notion or view. But these are: *bhāvanā*, *karmans* or *Upāsanās*.

पिण्डात्माहमितीक्षाणः पिण्डमेव प्रपद्यते ।
दैवं विराजं सूत्रं च मृतः सन्प्रतिपद्यते ॥११५१॥

One, who considers about oneself: 'I am this body.', becomes (only) body; being dead, that one becomes the divine Sūtrātman or Virāj. [1151]

This explains *piṇḍātmadarśī piṇḍātmānam evābhisampadyate. pretya* in the Bhāṣya (of Bhartṛprapañca? — SP and NKL editions).

संस्कारोपचयाद्ब्रह्मदेवो भूत्वैति देवताम् ।
संस्कारोपचयाद्धवंसस्तथा तासां न संशयः ॥११५२॥

As one becomes a certain deity after amassing together a number of impressions¹ and becomes that deity itself, so also, there occurs the destruction of one's status of the deity by the diminishing of the impressions — there is no doubt about this. [1152]

This is to emphasise that the result of the Upāsanā of Sūtra etc. is impermanent.

¹This is for *bhāvanajñānakarmaṇi* mentioned in verse 1145 above. Cf. SP: *bhāvanāprakarṣāj jīvaṇ eva devatābhāvam anubhūyānte yathopāsti pratipadyate.*

ब्रह्मणो ऽन्यद्यतो वस्तु ब्रह्मैव परमार्थतः ।
तदबोधात्तदन्यत्तद्बोधाद्ब्रह्मैव तत्त्वतः ॥११५३॥

Since a thing which is (known as) other than the Brahman is in reality the Brahman itself; that thing is other (than the Brahman) owing to ignorance about that (Brahman); so also it would become Brahman itself (just) on knowing that (Brahman). [1153]

This verse justifies the statement in verse 1143 above.

सत्त्वित्तराज्ञानां सृष्टात्सत्त्वित्तराज्ञानं यथा फलम् ।

परात्मदर्शनस्यापि तद्भावः स्यात्तथा फलम् ॥११५४॥

As the Sūtrātman etc. themselves would be the result of the worship of the Sūtrātman etc., similarly, in the case of looking upon (oneself as) of the nature of the highest (Reality), there would be the result, viz. becoming one with that. [1154]

Read SP: *paramātmadarśanāvasthāyāḥ paramātmabhāva eva kāryam iti bhāṣyenāha*; (possibly Bhartṛprapañca's Bhāṣya on BU).

ब्रह्मभावो ऽत्र नित्यः स्यात्कारणाद्यनपेक्षतः ।
अनित्यमितरत्सर्वं यदविद्याविजृम्भितम् ॥११५५॥

Here, becoming one with the Brahman would be permanent because that (becoming) does not have dependence on any (external) cause. Everything else (than the Brahman), viz. that which has proceeded (lit. spread out) from ignorance, is impermanent. [1155]

This sets aside an argument that Brahmanbhāva, being a product of *jñāna*, can be perishable/impermanent.

अनित्यं दर्शनं ज्ञेयं नित्यस्यापि परात्मनः ।
मोहमात्रान्तरायत्वात्कादाचित्कं हि दर्शनम् ॥११५६॥

In the case of even the perennial highest Ātman, consideration/seeing (of it to be such) is not ever-lasting. Indeed, seeing occurs only sometimes, because of the sole difficulty (in the form of) ignorance (about the nature of it). [1156]

This explains away the possible objection to the rise of trans-migratory existence.

अहमेव परं ब्रह्मेत्यस्यार्थस्याप्रबुद्धता ।
अविद्येति वयं ब्रूमो येह नास्ति सदात्मनि ॥११५७॥

We say that not knowing this truth, viz. 'I am the highest

Brahman.', is ignorance and which does not ever exist on the part of the Ātman. [1157]

This is Bhartṛprapañca's explanation of *avidyā*. Cf. SP: *yathoktam sāvidyāham evedam sarvam ity etasyārthasyāsambodha iti*.

परात्मनि तु संबोधो नित्यः स्याच्छशिशीतवत् ।
तदन्यात्मस्वनित्यो ऽसौ मोहसंवीतबुद्धिषु ॥११५८॥

As against this (*tu*), there is on the part of the highest Ātman perfect (*sam*) knowledge, permanent (or invariable) in the same way as there is cool in the moon. (But) in the case of those (beings), whose intellect is wrapped up in ignorance and who have a nature other than one of that (highest Ātman), it¹ is impermanent. [1158]

¹This refers to *sambodha* 'perfect knowledge'.

तत्रैवं सति यो ऽकात्स्न्यमित्वा ब्रह्माप्रबोधतः ।
सर्वात्मविद्ययाविद्यां हत्वा ब्रह्माभवत्पुमान् ॥११५९॥
पुरापि चात्मसंबोधाद्ब्रह्मैवायं स्वतो ह्यभूत् ।
यतो ऽतस्तत्त्वसंबोधाद्ब्रह्म ब्रह्म प्रपद्यते ॥११६०॥

This being so, the person who has become a limited being¹ on account of ignorance about (the nature of) the Brahman would become the Brahman after having struck down that ignorance by the knowledge about all that it is the Brahman. [1159]

And since even before knowing well (the nature of) the Brahman this person was only the Brahman, therefore (what really happens is that) the Brahman (itself) becomes the Brahman by knowing well the true nature (of its own). [1160]

¹It literally means: incomplete.

प्रत्यग्याथात्म्यसंबोधात्तदन्यत्रैव या मतिः ।
परार्था सा मतिर्ज्ञेया बाह्यकर्मव्यपाश्रया ॥११६१॥

If there is any thought about something else than the inner self, on account of well knowing the true nature of the inner self, then that thought is to be known as one about another (i.e. non-Ātman), dependent as it is on external activities. [116]

This points to that the knowledge about the inner self is not dependent on any means of knowing.

अहं ब्रह्मेति यज्ज्ञानं स्वार्थमेव तदिष्यते ।
 सर्वप्रयोगबीजात्मध्वान्तोच्छेदित्वहेतुतः ॥११६२॥
 निःशेषपुरुषार्थानां ज्ञेयानां चापि कृत्स्नतः ।
 प्रत्यक्तत्त्वपरिज्ञानसमुत्पत्तौ समाप्तिः ॥११६३॥

But that knowledge, which has the form 'I am Brahman.', is accepted as the knowledge for itself, because it is the cause of the destruction of the darkness which is of the nature of the seed of all activities¹, [116]
 because of its fullness in respect of the knowable objects which do not have left any end of human endeavour (to be achieved), and also because it has attained (completeness) at the rise of the all-sided knowledge about true nature of the inner self. [116]

This reiterates the point discussed in the preceding verse.

¹It includes ritual activities.

भर्तृप्रपञ्चप्रस्थानमेवमेतद्यथोदितम् ।
 इतो ऽन्यत्रापि तद्भाष्यं गमयेदेवमेव तु ॥११६४॥

This is the standpoint (or rather, view) of Bhartṛprapañca as stated above; so also is his explanation of passages other than this; it would inform about (the relevant) matters in this very way. [116]

According to SP, the theory of Bhartṛprapañca is really in agreement with Vivartavāda.

ब्रह्मभाविस्त्वं श्रुत्वा ये तु व्याचक्षते ऽन्यथा ।

तानुद्दिश्य विचारो ऽयं प्रारब्धो गुरुभिः स्फुटः ॥११६५॥

Keeping in view those (others) who explain (the thought of the BU) on hearing the word about (the inner self) as what is going to be the (known) Brahman, some other way, our teacher has begun to state his clear opinion (on the same).

[1165]

This is Sureśvara's view: Bhartṛprapañca had stated that, in the sentence *brahma vā idam* the word *brahma* signifies a human being who is going to be the Brahman. Therefore (SP observes:) some wrongly understand Bhartṛprapañca to be opposed to Vivartavāda of Śaṅkara. With these persons in view, Śaṅkara has introduced in BUB the opinion of Bhartṛprapañca, intending to remove their mis-conception.

Verses 1166-1589 are the longish explanation of BU 1.4.10.

यथोक्तसूत्रव्याख्यायां प्रयोजनविवक्षया ।

उपोद्धातौक्तदोषाणां परिहाराय यत्यते ॥११६६॥

An effort is (now) made to explain away the faults mentioned in the introductory with the intention to bring out the purpose of the explanation of the Sūtra¹ which is already stated. [1166]

This explains BU: *brahma vā idam agra āsīt ... tat sarvam abhavad* ti (BU 1.4.10).

¹This is understood to be the Siddhānta; *ātmety evopāsita* (or the two *kaṇḍikās*?); cf. verse 1064 above.

ब्रह्मविद्योपदेशस्य विषयश्चावधार्यते ।

साक्षाद्ब्रह्माथवाब्रह्म यदि बोभयरूपकम् ॥११६७॥

And the subject matter of the instruction in the lore of the Brahman is ascertained thus (in the form of three possibilities, viz.) whether the Brahman is directly perceptible Brahman itself, or that which is not Brahman¹ (viz. that which is the inner self) or that of both the types?

[1167]

¹Not perceptible. This is *antahkaraṇādyavachinna*. The NKL edition reads correctly *-athavābrahma* not like *-athavā brahma* in the AnSS edition.

समाशङ्कितनिःशेषदोषानागन्धितं स्फुटम् ।
श्रुतिः प्रतिवचः प्राह दोषमूलनिरासकृत् ॥११६८॥
ब्रह्मेति ब्रह्मशब्दो ऽयं मुख्यब्रह्मार्थवाचकः ।
अपूर्वादिश्रुतेर्ज्ञेयो ब्रह्मत्वं न ततो ऽन्यथा ॥११६९॥

Indeed, the Brahman is clearly untainted by the entire multitude of faults which are conceived (as affecting it) — the Śruti has given an answer that completely destroys (any idea of) fault. [1168]

This word *brahma* is to be known from the Śruti (statement) beginning with (the word) *apūrva* ...¹ as expressive of that object which is the principal Brahman. The nature of the Brahman cannot be anything else than that.² [1169]

¹Cf. the Śruti *apūrvam* ... BU (Mādhyandina) 3.8.8. This shows that the Brahman is principally known as non-delimited by *deśa*, *kāla* and *vastu* (= *vastvantara*). That is the principal purport of the Śruti texts.

²For example, a pitcher etc. But these would not really exist apart from the Brahman.

अविचारितसंसिद्धप्रत्यगज्ञानकारणात् ।
अब्रह्मेव तदाभाति मोहसंवीतचेतसः ॥११७०॥

That the Brahman appears to those whose minds are wrapped up in ignorance as the non-Brahman on account of the ignorance about (the nature of) the inner self which has somehow¹ come into existence. [1170]

¹This refers to the indescribability of ignorance. Here the NKL edition reads: *avicāritasamsiddhapratyagajñāna*- which is better than the AnSS edition reading *-samsiddhi*-, or even the variant noted by it, viz. *-samsiddheḥ pratyag*-. Translation follows the NKL edition

reading.

प्रत्यक्संबोधविध्वस्तप्रत्यङ्मोहः परात्मनः ।
संभावयति संबोधान्नान्यद्वस्त्वन्तरं यथा ॥११७१॥

One who has destroyed one's own ignorance about the nature of the inner self by knowing (the true nature of) the inner self understands from that knowledge that there is no other thing than the highest Ātman. [1171]

एवमेव महामोहसंवीतधिषणः पुमान् ।
ब्रह्मैवापि स्वतो मोहान्न तत्संभावयत्यपि ॥११७२॥

Just in this way, a man whose intelligence is wrapped up in great ignorance (about the nature of the inner self) does not even understand that, though he himself is the Brahman. [1172]

बुद्धतत्त्वस्य लोको ऽयं जडोन्मत्तपिशाचवत् ।
बुद्धतत्त्वो ऽपि लोकस्य जडोन्मत्तपिशाचवत् ॥११७३॥

For one, who has known the true (nature of the world), this world is like that unto an unintelligent, or madman or a goblin. And also for this one, who has known the truth (of the world), is this world like to an unintelligent, or a mad person or a goblin. [1173]

Though both SP and NKL mention that this is a verse from some Purāṇa, but we have not found it in the Purāṇa texts.

यदि नामास्ति संभेदः साक्षात्कल्पितसर्पयोः ।
भीतं प्रत्यविशिष्टो ऽसौ वास्तवत्वादनादृतः ॥११७४॥

If indeed there is a mixture of a real and an imaginary serpent, that (serpent) is for the one, who is afraid, not distinguished (by its real property) and is not ignored as out of the world of reality.¹ [1174]

¹A person who is afraid does not really know that there is

not a real serpent and the cause of his fear is but an imaginary serpent.

प्रत्यक्तत्वं तमोमात्रव्यवधानादिहोच्यते ।
ब्रह्मभावीति न पुनर्वस्तुतत्त्वव्यपेक्षया ॥११७५॥

Here¹, only on account of the obstruction of ignorance it is that the true element, viz. the inner self, is mentioned as what is going to be the (known) Brahman not on account of the view of the real nature of the thing (viz. Reality). [1175]

¹That is, in the Bhāṣya (of Bhartṛprapañca).

इदं धीशब्दगम्यं यद्ब्रह्मरूपाद्विशिष्यते ।
ब्रह्मैव तदुपाधीहेदंशब्देनाभिधीयते ॥११७६॥

Here¹, it is only that Brahman itself which is understood from the word (expressive of) the knowledge '(It is) this.', which is distinguished from the real form of the Brahman² and, being delimited by that (i.e. this world), that is here expressed by the word *idam*³. [1176]

¹In the sentence of the Bhāṣya: *idam iti nāmarūpavyākṛtaṃ jagan nirdīśyate*

²Namely, that which is in fact formless.

³SP points out this as the meaning of the word *idam* as stated in the Bhāṣya (of Bhartṛprapañca?).

यो ऽसावविद्योत्सङ्गस्थः प्राक्प्रविष्ट इतीरितः ।
स्वाभासान्तः स संमोहान्नामरूपात्मको ऽभवत् ॥११७७॥

That one, who, being on the lap of ignorance¹, was mentioned earlier as the one who entered, was really inside his own appearances (and) only out of complete (*sam*) ignorance came to be possessed of a name and a form.² [1177]

¹It means: being delimited by ignorance.

²SP cites Bhāṣya (of Bhartṛprapañca?): *sa idam jagad ātmatvenā-*

bhisampanno 'bhūd avidyayā.

अव्याकृतादिपिण्डान्तं पर एव त्वविद्यया ।
तदात्मत्वं समापेदे न त्वसौ परमार्थतः ॥११७८॥

It is only the highest self that has become possessed of the nature of that, which begins with the unmanifest and ends with a body, only owing to ignorance and not in reality. [1178]

प्रागात्मबोधादिपिण्डादौ यात्मेत्यासीन्मतिर्दृढा ।
सा तत्तत्त्वमसंप्राप्य सिद्धा स्रगहिबोधवत् ॥११७९॥

That firm consciousness, viz. there is only the Ātman, which existed in respect of a body etc. before one's knowing the true nature of the self, existed there because it had not obtained the form of the truth in the same way as (the knowledge of) a serpent in (the place of) a wreath. [1179]

अविद्याकल्पितांस्तस्मादन्वयव्यतिरेकतः ।
विधूयानात्मनो ऽशेषांस्तत्प्रत्यग्रूपमैक्षत ॥११८०॥

Therefore, having thrown away (the notion(s) of) all the non-Ātmans which were created by ignorance with (the help of) the method of Anvaya and Vyatireka, a person knows that (real) form of the inner self. [1180]

This refers to *tad ātmānam* (BU).

प्रत्यग्याथात्म्यविद्याग्निसंप्लुष्टाशेषतत्तमः ।
ब्रह्मैवात्मानमेवेति प्रत्यबुध्यत वाक्यतः ॥११८१॥

The person, who has completely (*sam*) burnt the entire darkness about that¹ by means of the fire in the form of the knowledge about the real nature of the inner self, knows himself as the Ātman by means of the Śruti statement². [1181]

¹This refers to the inner self.

²In the form 'I am the Ātman.'

न हि प्लुष्टाखिलाविद्यः प्रतीच्यन्यन्मनागपि ।
प्रत्यग्दृष्ट्येक्षते ऽन्यस्य तदविद्यैकहेतुतः ॥११८२॥

Indeed, one, who has burnt (one's) entire ignorance, does not see in the inner self even a little (thing) other than (the inner self) by adopting the notion that it is the inner self; because that other (thing) could thus be imagined only) on account of the ignorance about it (i.e. the inner self). [1182]

अद्वैतविषयं चेदमेकं ब्रह्मेति भण्यते ।
समस्तव्यस्तता यस्मान्नेह प्रत्यग्धिष्येक्ष्यते ॥११८३॥

And it is declared that only this unique Brahman is not the object of duality¹, since (its) collectiveness and individuality are not seen when there has occurred the knowledge (of the true nature) of the inner self. [1183]

¹It refers to existence of the Self without any second.

मिथ्याभिमानात्संपत्तिरविद्योत्थासु भूमिषु ।
यत्र वा अन्यदित्येवं श्रुतिश्चापि जगौ तथा ॥११८४॥

It is on account of false conception that there is becoming (manifold) in different states that have arisen from ignorance — so has the Śruti sung (i.e. declared) in the statement *yatra vā anyad* [*iva syāt tatrānyo 'nyat paśyet*] ...¹ [1184]

¹Cf. BU 4.3.31.

निरविद्य इहाद्वैते भेदहेतोरसंभवात् ।
स्वत एवाभिसंपत्तिर्यत्र त्वस्येतिशास्त्रतः ॥११८५॥

Since there is no possibility of any cause of effecting differentiation in non-duality, in which there does not exist any ignorance, there is (its) becoming (manifold) only on its own¹ — this (is known) from the scriptural statement *yatra tv asya* [*sarvamātmaivābhūttatkena kaṁ paśyet*]...² [1185]

This sets aside a possible argument that the individual self's becoming the Brahman is also a product of *avidyā*.

¹SP points to *iha punar advaite sarvabhāvānām ananyatvāt sarvam añjasaivātmatvenābhinsampadyata (iti bhāṣyeṇa)*— as the Bhāṣya of Bhartṛprapañca(?).

²BU 4.5.15.

तस्मात्तदिति विद्यायाः पूर्णता फलमुच्यते ।

तदन्यस्य त्वकृत्स्नत्वोज्जिहासाविषयत्वतः ॥११८६॥

Therefore, in the word *tat* is expressed the result, viz. the completeness of knowledge and, as against this, there is a desire of abandoning everything else than that (=the Brahman), because it is incomplete and not an object (of knowledge).

[1186]

This explains the meaning of BU: *tasmāt tat sarvam abhavat*.

यदिदंशब्दनिर्दिष्टं पूर्णविद्यैकहेतुजम् ।

अहं ब्रह्मेति तद्धवंसात्पूर्णमेवाभवत्स्वतः ॥११८७॥

That, which is mentioned by the word *idam* and which has originated from only one cause, viz. complete ignorance, became complete owing to the destruction of that (ignorance by knowing) 'I am Brahman.'

[1187]

This explains that the individual self was wrapped in ignorance and, therefore, incomplete and, then, on knowing 'I am Brahman.', became complete.

भर्तृप्रपञ्चभाष्यस्य प्रचारो ऽयं प्रदर्शितः ।

श्रुत्यक्षरानुसारेण तथानुभववर्त्मना ॥११८८॥

This one (i.e. thus) is shown (to be) the accepted purport¹ of the explanation, given by Bhartṛprapañca, in keeping with the wording of the Śruti and also with experience.²

[1188]

¹This means: It is in accord with Vivartavāda, according to Śaṅkara and Sureśvara.

²With reference to the second line, read SP: *kim ity evaṁ tadīyabhāṣyasya gatiṃ ucyate*; this is to state that his explanation is in accord with the Śruti and is supported by experience.

ब्रह्मेति ब्रह्मशब्देन द्वैतैकत्वात्मकं किल ।
भण्यते न परं ब्रह्म तस्य विद्यानपेक्षतः ॥११८९॥

They say (*kila*)¹: By the word *brahman* is mentioned that Brahman which is of the nature of duality and non-duality (both) and not the highest Reality, for that does not expect any instruction (about it). [1189]

This has a reference to verse 1165 above. The purpose of this and the following verses is to remove the misunderstanding on the part of some of Bhartṛprapañca's commentators on his interpretation of BU: *brahma vā* ... Sureśvara follows Śaṅkara, as implied in the preceding verse.

¹Cf. SP: *kilety ubhayor bhāṣyakṛtor atrānicchoktiḥ*.

परस्य ब्रह्मता यस्मादनन्यायत्तसिद्धिका ।
स्वत एव तु तत्सिद्धेर्नातस्तदभिधीयते ॥११९०॥

Because the highest Reality has the character of the Brahman which is not dependent on any other (thing or means) and is of itself established; therefore, it is not mentioned by (the word *brahman*). [1190]

This is the reason for the argument *na param brahma* in the preceding verse.

तथा कालानवच्छित्तेरासीदिति न तत्प्रति ।
घटते कालसंबन्धो विरिञ्चे तूपपद्यते ॥११९१॥

So also, because it is not delimited by time, there cannot be with reference to it the use of the word *āsīt* 'it was.'¹; in respect of Viriñca, however, it stands to reason. [1191]

This is another reason for saying that *para* is not understood by the word *brahman*.

¹Cf. *Kāthopanīṣad* 2.14: *anyatra bhūtāc ca bhavyāc ca*.

ननु तस्यापि विज्ञानं नोपदेशव्यपेक्षया ।
जन्मनैवास्य तत्सिद्धेर्न युक्ता ब्रह्मगीरियम् ॥११९२॥

One might say that the information about him (viz. Viriñca) also is not dependent on instruction¹, since that gets established at his very origin; therefore, this word *brahman* is not reasonable.

[1192]

Also Viriñca or Hiranyagarbha, though different from the Brahman, may not be the meaning of the word *brahman*; this is the thought of the questioner.

¹Namely, the statement *tasmāt tat sarvam abhavat*.

आसीदिति च निर्देशस्तस्मिन्नपि न युज्यते ।
विरिञ्चस्य त्रिकालत्वादासीदस्ति भविष्यति ॥११९३॥

So also the mention 'There he was.' is not reasonable in the case of that (viz. Viriñca), because Viriñca belongs to all the three periods of time; (that is to say:) 'He was, he is and he will be.'

[1193]

यत एवमसंतोषात्पक्षान्तरसमाश्रयः ।
मनुष्याधिकृतेर्वेति क्रियते पूर्वपक्षिणा ॥११९४॥

Since this is so, viz. there is dissatisfaction (about the answer), therefore, the other view is resorted to and the *prima facie* view is put forth *manuṣyādhikṛter vā ...*¹

[1194]

This verse gives the view of the Bhartṛprapañca's Bhāṣya as the basis for the doubt in verses 1192-94.

¹NKL cites: *manuṣyādhikārād vā tadbhāvi brāhmaṇaḥ syāt* as the Bhāṣya (of Bhartṛprapañca?).

मनुष्याः प्रकृताः पूर्वं ते च निःश्रेयसार्थिनः ।
ब्रह्मणो न त्वनर्थित्वात्तथा चाप्रकृतत्वतः ॥११९५॥

At mention was made first of men and they were described as desirous of the highest bliss; but the Brahman is not (intended to be) desirous of anything, because that is not the matter which was begun in the discussion. [1195]

This is to explain the other view.

ऋष्यादिवचसा चापि ब्रह्मविद्याविशेषतः ।
सर्वार्थैव समुद्दिष्टा नाग्रजन्मैकगोचरा ॥११९६॥

Also by the statement about the sages etc. it is not the lore of the Brahman that is distinguished and therefore it is introduced as one having the first-born (Hiranyagarbha)¹ as its subject. [1196]

¹This conveys by implication the Brahman also.

जन्मनैव तु तत्सिद्धेर्नोपदेशव्यपेक्षता ।
ज्ञानमप्रतिघं यस्य वैराग्यं चेति च स्मृतेः ॥११९७॥

It is already established at its very birth and has no dependence on any instruction; and this is based on the Smṛti statement *jñānam apratigham* ...¹ [1197]

¹As we have noted in verse 79, this is the *Vāyupurāṇa*.

द्वैतैकत्वात्मकब्रह्मविद्याकर्मैकसाधनः ॥११९८॥
अपरब्रह्मतापन्नो भोज्याद्व्यावृत्तमानसः ।
निःशेषप्राप्त्या चोच्छिन्नकामकर्मादिबन्धनः ॥११९९॥
परब्रह्मपरिज्ञानभावनोपचयात्परः ।
ब्रह्मभावी नरो ऽतो ऽत्र ब्रह्मशब्देन भण्यते ॥१२००॥

Therefore, by the word *brahman* is mentioned here a man who will be the Brahman — (he) who has the sole means (of achieving his ends) by activity connected with the knowledge

of the Brahman which is of the nature of unity in duality; who has become another Brahman¹, who has his mind turned averse to (all) enjoyable (objects), who has cut off the bonds in the form of desire, activity, etc. by obtaining the entire (multitude of desires), and who has become the highest by the increase of his devotion to all-sided knowledge about the highest Brahman. [1198-1200]

This is the view of Bhartṛprapañca, according to his commentators' explanation in respect of BU 1.4.9-10.

¹Namely, Hiranyagarbha.

भविष्यद्वृत्त्या लोके ऽपि प्रयोगो दृश्यते यथा ।
ओदनं पचतीत्यादि तथेहापि भविष्यति ॥१२०१॥

In worldly dealings also, we notice employment of a word with the notion of the function of the future, as for example, in the sentence 'He is cooking rice.'¹ etc.²; so also, here (the man) will be (the Brahman). [1201]

This is the explanation of the second line of the preceding verse in the light of linguistic usage.

¹What is cooked are grains and after they are cooked they become rice. Yet we say 'He is cooking rice.', so also here the employment of the word conveys the sense of the future.

²SP refers *ādi* to making a gift of village or weaving a carpet, while NKL refers it to shaping a pitcher.

गृहस्थो भार्यां विन्देत शास्त्रे चापि समीक्ष्यते ।
एवं व्याचक्षते केचिद्गम्भीरन्यायवादिनः ॥१२०२॥

In the Śruti text also it is seen (in the sentence) 'A householder should get a wife.'¹ — thus do some thinkers who talk about the profound rules (of interpretation)², explain (the purport of the Śruti). [1202]

¹It means: one, who wants to be (i.e. is going to be) a householder, should get married. Cf. *Gautama Grhya Sūtra* 1.4.1.

Sureśvara dropped the word *sadādrśīm* from the original Sūtra for the sake of metre; not because he ignores *varṇa*.

²SP says the word *gambhīra* indicates ridicule (of the Bhartr-prapañca's commentators).

Verses 1203-1234 refute the view of the commentator of the Vṛttikāra whose views are presented just before.

सर्वापत्तेरनित्यत्वदोषासक्तेर्न तत्तथा ।

साधनायत्तलब्धात्मा न लोके ऽस्त्यविनश्वरः ॥१२०३॥

(But) that is not so, because all beings will necessarily become (the Brahman). And also there will be contingent the fault, viz. impermanence (i.e. non-eternality of the Brahman). (Indeed, whatever¹) comes into existence owing to its dependence on some means is known even in the world² as non-permanent.

[1203]

¹This has a reference to liberation which has to be produced by certain men, as taught in the Śruti. This has a basis in the experience that things related as causes and effects are impermanent.

²This means: in the Śruti also.

अथाविद्योत्थाकृत्स्नत्वनिवृत्तिं चेदिहेच्छसि ।

कल्पनेयं वृथैव स्याद्ब्रह्मभावीति या कृता ॥१२०४॥

यतः प्रागपि तद्विधात्सर्वो जन्तुः स्वभावतः ।

ब्रह्मत्वादाप्ततद्भावो नित्यमेव न साधनात् ॥१२०५॥

Now if you understand here¹ (liberation to be) the cessation of the incompleteness that had arisen from ignorance, then this notion (which you entertain), viz. that (an individual) is what is going to be the (known) Brahman, would be just useless,

[1204]

since, even before (the rise of) the knowledge of that (=Brahman), every being had been by its very nature the Brahman, and therefore, having had already attained the nature of the Brahman, was therefore eternal, not by (any) means

(taught in the Śruti etc.).

[1205]

¹Namely, in this context.

केवलं तत्तमोमात्रव्यवधानैकहेतुतः ।

संभावयत्यकृत्स्नत्वं प्रत्यगात्मनि मूढधीः ॥१२०६॥

An individual, whose intellect is blurred in respect of the inner self on account of only one cause, viz. the covering of its true nature by mere ignorance about it, entertains the notion of insufficiency (or incompleteness).

[1206]

यद्विद्यैकहेतु स्यादब्रह्मत्वं न तु स्वतः ।

तद्यथावस्तुसंबोधान्मूलनाशात्प्रणश्यति ॥१२०७॥

That character of what is a non-Brahman, which has arisen from only ignorance (about the true nature of the inner self) and not by its own nature, gets destroyed by the knowledge of the thing (viz. the inner self) as it is, i.e. by the destruction of the root (of ignorance).

[1207]

एवं चेत्स्यादभिप्रायः किमर्थं निष्प्रयोजनम् ।

मुख्यार्थं संपरित्यज्य पुंसि ब्रह्मेति कल्पनम् ॥१२०८॥

If such is the intended thought, why then (entertain) the notion of the Brahman in an individual, having given up the primary meaning of the word without any reason?

[1208]

This amplifies the thought in verse 1204 above.

श्रुतार्थहानिरेवं स्यादश्रुतस्य च कल्पना ।

अपन्यायो वृथा च स्यात्पुमर्थासंभवादिह ॥१२०९॥

Thus there would be (i) abandoning what is heard in the Śruti and (ii) (entertaining) the notion of what is not heard; thus, this would be a bad way (or manner) of interpretation since there would be no possibility of (securing) the end of human endeavour, viz. liberation.

[1209]

अविद्योत्थातिरेकेण स्वत एवेति चेन्मतम् ।
अब्रह्मत्वं न तद्वानिरुपायासंभवात्क्वचित् ॥१२१०॥

If it is held that the character of what is a non-Brahman exists in its own right (*svataḥ eva*) as apart from what is arising from ignorance, then there is no possibility whatever of the existence of any means (of removing it) at all¹. [1210]

¹It means: at any time, at any region, and in any condition. Cf. SP on the next verse: *kvacid ity avasthādeśakāloktiḥ*.

अभिव्यञ्जकमेवेष्टं प्रमाणं न तु कारकम् ।
नापोद्गरी नापि कर्त्रीयं विद्यातो वस्तुनः क्वचित् ॥१२११॥

The means (for the removal of the notion of the non-Brahman) is held (by us) to be what reveals it and (*tu*) not what produces (it); then also, this lore (of the Brahman) is neither the remover nor the producer of anything at all¹. [1211]

The first line gives a general notion of what a means of knowledge should be, viz. it is merely informative, and the second line extends the notion to the means of knowing the Brahman (i.e. to the lore of the Brahman).

¹See the note on the preceding verse.

स्वप्रमेयाखिलाज्ञानध्वंसिनीति समीक्ष्यते ।
विद्या लोके तथेहापि तद्ध्वंसिन्येव गृह्यताम् ॥१२१२॥

In worldly dealings, (any) lore is desired to be what destroys the entire ignorance about the object to be known by it; so also here (in respect of the Brahman), let (the lore) be accepted as the destroyer of that¹ (ignorance about the Brahman). [1212]

This verse is similar to the preceding. In the first line is stated the general rule regarding any branch of knowledge and in the second is extended the general rule or procedure to the lore of

the Brahman. Cf. SP: *lokānusāritvād vedasyety abhiprāyaḥ*.

¹This refers to *svaprameyākḥilājñāna*.

सदानुदितानस्तमितभास्वद्विज्ञानमात्रतः ।

तद्विरुद्धतनुर्मोहः कुतो ब्रह्मणि चेन्मतम् ॥१२१३॥

(And) if it is (asked by the opponent:) How can there remain in the Brahman¹ (as you have understood) ignorance which is opposed to it in nature², since it is ever only bright knowledge³, which has ever been there⁴ and which will never disappear⁵?

[1213]

The idea in the first line is that of the sunrise and the sunset — these two occasions occur again and again, but knowledge on the part of the Brahman has ever been abiding.

¹*brahmaṇi* is *viśayasaptamī* and not *adhikaraṇasaptamī*; cp. *iha* in verse 1212 above on which SP: *brahma saptamyarthah* (for *iha*).

²The word *tanu* means *svarūpa*.

³*vijñāna* here stands for *jñāna*.

⁴*anudita* literally means: which has not arisen; i.e. which is beginningless.

⁵It literally means: which will never set.

नानुभूत्यैव तत्सिद्धेर्ज्ञातकुम्भानुभूतिवत् ।

न वैज्ञीत्यनुभूतिर्हि सर्वेषामात्मसाक्षिका ॥१२१४॥

(Our answer is:) No. (This is not so), because that¹ gets established by one's experience (of the cause) as a pitcher becomes known² by means of its experience. (Indeed) all of them have a personal experience, viz. 'I do not know (myself)'. .

[1214]

This verse states why the objection cannot be raised.

¹It refers to *moha* of the previous verse.

²That is, when ignorance about it is removed.

अव्याकृताधिकारे च यदुक्तं प्राक्समासतः ।

ब्रह्मण्यविद्यासंसिद्ध्यै स्मर्तव्यं तदिहाखिलम् ॥१२१५॥

Further¹, whatever was briefly said (by us earlier)² in connection with the topic of the undifferentiated — all that has to be remembered here in order to become aware of the ignorance in respect of the Brahman. [1215]

¹This is *ca*.

²Namely, the means of knowing convey information about what was not known earlier.

विद्याविधानाच्चाविद्या ब्रह्मण्यस्तीति गम्यताम् ।
विद्याविधानं विज्ञाते पिष्टपेषणवद्यतः ॥१२१६॥

And let it be understood in respect of the Brahman that there is ignorance about the Brahman, since there is a prescription of the lore of the Brahman; for such a prescription of the lore in respect of what is already known (would have been) like grinding what was already ground. [1216]

This is a further argument in confirmation of what is stated in the preceding verse. Also, it brings out why the Brahman is at the same time unknown.

SP and NKL refer to *tat tvam asi* (CU 6.8.7) but better understand *ātmā vā are śrotavyo mantavyo nididhyāsitavyaḥ* in this very Upaniṣad.

अज्ञानमेव मिथ्याधीः प्रमेयानभिसंगतेः ।
रूप्याध्यारोपणं तस्मादुदाहारि गरीयसा ॥१२१७॥

Ignorance (about the self) is itself false knowledge, because it is not connected with the object of knowing. Therefore, the elder one¹ had given the illustration of the superimposition of silver (on a mother-of-pearl). [1217]

In BUB we read *na hi śuktikāyām* ... this is justified by Sureśvara as pointing to how false knowledge is rooted in ignorance about a real thing.

¹SP makes out this to be Śaṅkara.

the Brahman. Cf. SP: *lokānusāritvād vedasyety abhiprāyaḥ*.

¹This refers to *svaprameyākhlājñāna*.

सदानुदितानस्तमितभास्वद्विज्ञानमात्रतः ।

तद्विरुद्धतनुर्मोहः कुतो ब्रह्मणि चेन्मतम् ॥१२१३॥

(And) if it is (asked by the opponent:) How can there remain in the Brahman¹ (as you have understood) ignorance which is opposed to it in nature², since it is ever only bright knowledge³, which has ever been there⁴ and which will never disappear⁵? [1213]

The idea in the first line is that of the sunrise and the sunset — these two occasions occur again and again, but knowledge on the part of the Brahman has ever been abiding.

¹*brahmaṇi* is *viśayasaptamī* and not *adhikaraṇasaptamī*; cp. *iha* in verse 1212 above on which SP: *brahma saptamyarthaḥ* (for *iha*).

²The word *tanu* means *svarūpa*.

³*viññāna* here stands for *jñāna*.

⁴*anudita* literally means: which has not arisen; i.e. which is beginningless.

⁵It literally means: which will never set.

नानुभूत्यैव तत्सिद्धेर्ज्ञातकुम्भानुभूतिवत् ।

न वैद्वीत्यनुभूतिर्हि सर्वेषामात्मसाक्षिका ॥१२१४॥

(Our answer is:) No. (This is not so), because that¹ gets established by one's experience (of the cause) as a pitcher becomes known² by means of its experience. (Indeed) all of them have a personal experience, viz. 'I do not know (myself)'. [1214]

This verse states why the objection cannot be raised.

¹It refers to *moha* of the previous verse.

²That is, when ignorance about it is removed.

अव्याकृताधिकारे च यदुक्तं प्राक्समासतः ।

ब्रह्मण्यविद्यासंसिद्ध्यै स्मर्तव्यं तदिहाखिलम् ॥१२१५॥

Further¹, whatever was briefly said (by us earlier)² in connection with the topic of the undifferentiated — all that has to be remembered here in order to become aware of the ignorance in respect of the Brahman. [1215]

¹This is *ca*.

²Namely, the means of knowing convey information about what was not known earlier.

विद्याविधानाच्चाविद्या ब्रह्मण्यस्तीति गम्यताम् ।
विद्याविधानं विज्ञाते पिष्टपेषणवद्यतः ॥१२१६॥

And let it be understood in respect of the Brahman that there is ignorance about the Brahman, since there is a prescription of the lore of the Brahman; for such a prescription of the lore in respect of what is already known (would have been) like grinding what was already ground. [1216]

This is a further argument in confirmation of what is stated in the preceding verse. Also, it brings out why the Brahman is at the same time unknown.

SP and NKL refer to *tat tvam asi* (CU 6.8.7) but better understand *ātmā vā are śrotavyo mantavyo nididhyāsitavyaḥ* in this very Upaniṣad.

अज्ञानमेव मिथ्याधीः प्रमेयानभिसंगतेः ।
रूप्याद्यारोपणं तस्मादुदाहारि गरीयसा ॥१२१७॥

Ignorance (about the self) is itself false knowledge, because it is not connected with the object of knowing. Therefore, the elder one¹ had given the illustration of the superimposition of silver (on a mother-of-pearl). [1217]

In BUB we read *na hi śuktikāyām* ... this is justified by Sureśvara as pointing to how false knowledge is rooted in ignorance about a real thing.

¹SP makes out this to be Śaṅkara.

अस्त्वविद्या परे भूमिन् यथोक्तन्यायगौरवात् ।
न तु ब्रह्मैव तां कुर्यात्सर्वज्ञं प्रत्यगात्मनि ॥१२१८॥

(Therefore), on the strength of the example stated before, let there be ignorance on the part of the highest pervader¹ (i.e. the Supreme Self). But let not the Brahman, which is omniscient, create that² in the inner self. [1218]

¹Sureśvara uses the word *bhūman* for the Brahman because of metrical exigencies. Cf. BS 1.3.8; CU 7.23-24 .

²It refers to *avidyā*.

न हि धीपूर्वकारी सन्निःशेषानर्थदायिनीम् ।
प्रतीच्यविद्यां विसृजेद्यान्यत्रापि न काम्यते ॥१२१९॥

Indeed, a human being who acts on thought would not create in the inner self ignorance which causes all kinds of undesirable results (and) that which is not desired elsewhere also. [1219]

Everyone knows that ignorance causes disasters and therefore would not create it anywhere.

यद्यविद्या भवेत्कार्यमस्त्वेतद्यदिहोदितम् ।
अकार्यत्वात्त्वविद्यायास्त्वदुक्तं तुषकण्डनम् ॥१२२०॥ -

If ignorance is (lit. would be considered as) an effect (lit. product), let there be this, viz. what is (already) said.¹ As against this, if ignorance does not have the nature of a product, then your making a statement² is (like) pounding the chaff.³

[1220]

The argument is: Though omniscient, the Brahman cannot be considered as the basis of *avidyā*.

¹It is already stated that the Brahman does not create ignorance in the inner self.

²Namely, the argument: *avidyā* is a product of the Brahman.

³This example means: it is useless for one to try to get any

grains out of chaff. The Brahman produces nothing. Cf. verse 1214 above.

अथोपचारात्कार्यत्वमविद्याविषयत्वतः ।

तथापि नापराधो नस्तदन्यासंभवादिह ॥१२२१॥

If again, the nature of a product (is attributed to ignorance) in a secondary sense, because it is affected by ignorance; then also this is not a fault on our part, as there is no possibility of the existence of anything else (than the Brahman). [1221]

The idea behind this verse is: We know that the inner self is affected by ignorance; i.e. there exists ignorance and therefore the Brahman must have created ignorance (viz. it is a *kārya*).

न हि ब्रह्मातिरेकेण ब्रह्माविद्याकृदिष्यते ।

न ह्यन्यो ऽतो ऽस्ति द्रष्टेति तथाच श्रुतिशासनम् ॥१२२२॥

Indeed, it is not held that there exists beside the Brahman (another) Brahman which creates ignorance. (For, there is) instruction in the Śruti to that effect, viz. there is not any other seer than this one.¹ [1222]

This sets aside the possibility about the existence of another sentient being apart from the Brahman.

¹Cf. BU 3.7.23.

क्रिया वा कारकं वेह सदसद्वेह यन्मतम् ।

अप्रज्ञातात्मयाथात्म्यं ब्रह्मैव तदितीक्ष्यताम् ॥१२२३॥

पुरुष एवेदं सर्वमात्मैवेदमिति श्रुतिः ।

नानुभूतेः प्रमाणाद्वा तदन्यद्वस्तु लभ्यते ॥१२२४॥

Whatever be here¹, whether action or agent of an action and² the existent or the non-existent, it is such that the truth of its nature is not known; (therefore,) let that be accepted (lit. seen) as only the Brahman itself, [1223]

for, (there are) the Śruti statements 'All this is only Puruṣa.' (and) 'This is only the Ātman.'. (And) neither from experience

nor from (any) means of knowing is known any object other than that (Puruṣa or Ātman). [1224]

This is to set aside the existence of even an insentient thing beside the Brahman and to establish the existence of the Brahman alone.

¹ Namely, in dealings worldly and Śāstric as well.

² *vā = ca* (so understood by us).

ननु शास्त्रोपदेशो ऽयमेवं सत्यफलो भवेत् ।
 नासौ ब्रह्मणि साफल्यं नाप्यन्यस्मिन्समश्नुते ॥१२२५॥
 उपदेशानपेक्षत्वाद्ब्रह्मत्वस्य परात्मनः ।
 असंभवात्ततो ऽन्यस्य ह्युपदेशो ऽफलो भवेत् ॥१२२६॥

(An objection may be raised:) But if this were so, this instruction in the Śruti would be fruitless (i.e. meaningless). (For) that (instruction) does not become fruitful with reference to the Brahman or anything other than that; [1225] (for), the nature of the Brahman abiding in the highest Ātman does not depend on (any means of knowing or another thing), since that is not possible¹. (And) instruction in regard to the other² would indeed be useless (lit. fruitless). [1226]

This would explain the thought arising from the preceding verse regarding the *aphalatva* of Śāstra.

¹ Namely, any other means of knowing or another thing does not have any existence.

² That is, non-*brahman*.

ब्रह्माकर्त्रपि संबोधात्प्रागभूतदसंसृति ।
 अविद्यातज्जसंबन्धात्कर्तृत्वे ऽपि न दोषभाक् ॥१२२७॥

(This is in answer to the doubt:) The Brahman, though a non-agent (of any action) was there existent even before¹; it has been non-transmigratory. (And if it is held) to be an agent of some action, thanks to its connection with ignorance and its products, it does not have (that) fault¹ even then.

[1227]

The Siddhāntin answers away the thought in the two preceding verses.

¹It means: before the transmigratory world came to exist.

²Namely, the character of being transmigratory.

प्रागज्ञातं तदैकात्म्यं यथैवानुभवान्मतम् ।
ब्रह्मास्मीत्यपि संबोधस्तथैवानुभवाश्रयात् ॥१२२८॥

As indeed (*eva*) the uniqueness of it, which was not known before, is understood (i.e. grasped) through experience, in the same way, there will be understanding of the knowledge, 'I am Brahman.' through experience. [1228]

प्रमेयाधिगमं कुर्वत्प्रमाणमफलं यदि ।
क्वान्यत्र फलवत्तत्स्यान्नातो ऽन्यत्स्यान्मितेःफलम् ॥१२२९॥

If any means of knowing, which brings about knowledge about the object of (its) knowing, were held as fruitless, (then we ask) where else¹ could it be fruitful? Therefore, there would not be any fruit other than the knowledge (of it²). [1229]

¹That is, in what other respect.

²It means: the object of its knowing'; here, the Brahman.

सोत्प्रासमिव चाहातो बाढमित्येवमादिना ।
अस्त्वेषो ऽवगते दोष इतो ऽन्यः कीदृशो गुणः ॥१२३०॥

Therefore (the Bhāṣyakāra) said, as if with a smile of ridicule, 'Well, let it be so ...'. Let there be this¹ fault, when the Brahman is being known; for, what excellence can there be other than this?² [1230]

¹This refers to the fruitlessness of instruction which brings about *ajñāna(-dhvasti)*.

²Namely, the knowledge of the Brahman brings about the destruction of ignorance, thereby declaring the fruitlessness of instruction in reality fruitfulness.

अथावगमवैयर्थ्यं भवता परिचोद्यते ।
तत्रापि चानवगमध्वस्तिः प्रतिवचो भवेत् ॥१२३१॥

Now, if you happen to posit fruitlessness of even the knowledge (arising from instruction of the Śruti), in that respect also our answer would be that there follows destruction of ignorance¹. [1231]

¹This means: not understanding the true nature of the Brahman; and that latter is conveyed by the Śruti.

ऐकात्म्ये तन्निवृत्तिश्चेदसम्भाव्येति चोद्यते ।
लब्धैकात्म्येन नैवेयं निवृत्तिः काम्यते श्रुतेः ॥१२३२॥
अप्रसिद्धे त्वथैकात्म्ये निवृत्तिरिह चोद्यते ।
तथा दृष्टविरोधो वः प्राप्नुवन्न निवार्यते ॥१२३३॥

(Now) if an argument is adduced (by the opponent:) The removal of that¹ is not possible even when the uniqueness of the Brahman is understood; (the answer to the objection is:) Indeed (this) removal is not desired (i.e. expected) by one who has acquired the knowledge of the uniqueness of the Ātman from the Śruti. But, this removal is here urged² by the Śruti in respect of the uniqueness of the Brahman when it is not known; then the (fault of) opposition to what is seen³ would come to you and it could not be averted. [1232-1233]

¹Namely, ignorance to which a reference is made in verse 1231.

²It literally means: enjoined to be destroyed.

³That is, experienced. Here, the uniqueness of the Ātman.

सर्वस्यानुपपन्नत्वं सिद्धं दृष्टबलाश्रयात् ।
दृष्टस्यानुपपन्नत्वं किमाश्रित्याभिधीयते ॥१२३४॥

The unreasonableness of whatever (was argued) is (thus established) on the support of what is seen. But, on the support of what can be established the unreasonableness of what is

seen?

[1234]

This is said for reaffirming the argument in the preceding verse which is related to *dr̥ṣṭavirodha*.

उक्तानि तावद्भूयांसि दूषणानि विभागशः ।
अब्रह्मविषये क्लृप्ते ब्रह्मभावी पुमानिति ॥१२३५॥

Thus are shown (lit. stated) a number of faults, one after another¹ in respect of the non-Brahman which is accepted to be what is going to be the (known) Brahman (in future).

[1235]

¹It means: part by part; as divided into various parts of the argument.

भूयो ऽप्यस्यैव दाढ्यार्थं पूर्वपक्षाय यत्यते ।
वाक्यार्थाभाससंजातभ्रान्त्युच्छ्रित्यै प्रयत्नतः ॥१२३६॥

Yet once again an attempt is made (in what follows) to offer more support to (lit. to strengthen) the *prima facie* view with a view to removing completely (i.e. disproving), with care, the mistake (in that view) caused by what appeared (to him) as the meaning of the Śruti statements.

[1236]

Now follows in verses 1237-1277 a discussion on the purport of BUB: 'punyo vai ... brahmabhāvī puruṣa ucyate iti cen na'.

पुण्यः पुण्येन भवति पापः पापेन कर्मणा ।
संसारिणं समुद्धिश्य श्रुतिरेतदुदाहरत् ॥१२३७॥

That 'He becomes holy by performing holy acts, he has become a sinner by performing sinful acts.'¹ is stated by the Śruti with reference to a transmigratory being.

[1237]

¹Cf. BU 3.2.13.

तथैष हीति विस्पष्टं संसार्येवाभिधीयते ।

तस्माद्विलक्षणस्तद्वदीश्वरो ऽप्यभिधीयते ।
स एष नेति नेतीति य आत्मेत्यादिना तथा ॥१२३८॥

[In verses 1238-1245, there is shown the difference between Īśvara and a transmigratory being.]

So also (in the Śruti passage) 'This one indeed ...'¹ only a transmigratory being is clearly mentioned (and) so also Īśvara, who is in nature opposed to him, is mentioned (in the Śruti statements) *sa eṣa neti neti ...*,² and *ya ātmā ...*,³ etc. [1238]

¹ *Praśnopaniṣad* 4.9.

² BU 3.9.26 etc., see verse 539 note 4 above.

³ CU 8.7.13.

तथाक्षपादकाणादतर्कशास्त्रेषु यत्नतः ।
उपपत्तिशतैरीशः साध्यते वादिभिः पृथक् ॥१२३९॥

So (also), other (exponents of philosophy) have severally made effort to establish in their works on logic (e.g.) by Gautama and Kaṇāda² with hundreds¹ of arguments the existence of Īśvara. [1239]

¹ This is hyperbolic number for saying 'numerous'. NKL cites some arguments; so also does the editor of NKL in his note.

² This may refer to even Seśvara Yoga that also seeks to establish the existence of Īśvara.

दुःखापनयनार्थित्वप्रवृत्तेर्दर्शनादपि ।
अत्यन्तभेदो विज्ञेयः संसारीश्वरयोरतः ॥१२४०॥

And also, on noticing the activity (of individuals) who have the desire of removing their sorrows, one has to know (i.e. accept) the extreme difference between a transmigratory being and Īśvara. [1240]

तं त्रिदिवैतमेवेति कर्मकर्तृविभागतः ।
क्षेत्रज्ञेश्वरयोरुक्तेर्मृगव्याधादिभेदवत् ॥१२४१॥

And also from the Śruti passages *taṁ viditvā ...*¹, *etam eva ...*² etc. on the basis of the division made between an agent and an object (of action), as also from the statement about a *kṣetrajña* 'knower of the field' and *Īśvara* (should one understand) the difference as that between a deer and a hunter.³ [1241]

¹BU 4.4.23.

²BU 4.4.22. Sureśvara's verse reads: *etam eva ...*; however SP and NKL, *etam vai taṁ ātmānam* which is BU 3.5.1. SP and NKL further refer to *etam itaḥ pretyāham abhisambhavitāsmi* (CU 3.14.4). It seems that Sureśvara intended some Śruti passages as the basis. But one may refer to *Gītā* ch. 14. It may be remembered that they held the *Gītā* as an Upaniṣad.

³This illustration is well in keeping with *karma-karṭṛ-vibhāga*.

ममक्षोर्गतिमार्गस्य देशभेदोपदेशतः ।

भेदे ऽसति गतिः केयं गन्तृगन्तव्ययोर्भवेत् ॥१२४२॥

(This is noticeable also) from different information (given) about the destinations in respect of the paths of journey for the one who is seeking liberation. (And therefore we ask:) If there were no distinction (between the individual self and the highest), why should there be the (twofold) movement with reference to the (individual who is) going and the destination? [1242]

This has reference to *śuklakṛṣṇagatī* or *devayāna* and *pitryāna* which are talked about in the Upaniṣads. (Cf. *Muṇḍakopaniṣad* 3.1.7; CU 5.3.2 and 5.10.2; BU 6.2.2; *Kauṣītakyupaniṣad* 1.3; *Praśnopaniṣad* 1.9.) Thus there are two different paths to two different goals, viz. *devaloka* and *pitṛloka* and men are supposed to go by this or that of the two paths. How could there be this talk in the Upaniṣad, if men were not taken as transmigratory? In the case of *Īśvara*, he does not have to take to (or travel by) any of these two paths or to go to any. This is understood in the following verse also.

दक्षिणोत्तरमार्गोक्तिस्तथा सति विरुध्यते ।
गन्तव्यदेशाभावाच्च गतिर्नैवोपपद्यते ॥१२४३॥

And in case that was so (viz. as you say¹), then the statement about the southern and the northern paths would be contradictory (lit. opposed) and, since there is no distinction to be reached, there would not be any movement reasonably to be accepted. [1243]

¹That is, the Brahman and the individual self are one, non-distinct.

तथाभ्युदयकैवल्यसाधनानां विधानतः ।
न हीश्वरस्य कैवल्यं साधनायत्तमिष्यते ॥१२४४॥

So also, on account of the prescription of various means to worldly prosperity and liberation (one has to accept that the individual self and the Brahman are different.)¹ Indeed they do not accept that the state of liberation of Īśvara is dependent on any means. [1244]

¹This idea has run through verses 1240-1244.

ब्रह्मभावी ततो नेशः किंतु तद्व्यतिरेकभाक् ।
संसार्येवाभिधीयेत यथोक्तन्यायगौरवात् ॥१२४५॥

Therefore,¹ what is going to be the (known) Brahman is not Īśvara but one who experiences the state(s) apart from the same (i.e. the state(s) of Īśvara). Thus it is only a transmigratory being who would be talked about here (as a seeker of liberation) on the strength of the argument(s) stated by us. [1245]

This is the concluding remark of the *prima facie* view about *brahmabhāvī puruṣa*.

¹That is, for these reasons. This is *samānādhikaraṇa* with *yatho-ktanyāyagaurava*, viz. the same arguments (SP).

नैवं ब्रह्मोपदेशार्थशास्त्रानर्थक्यसक्तिः ।
संसारिविद्ययैवास्य पुरुषार्थसमाप्तिः ॥१२४६॥

(The Siddhāntin answers:) This is not so; for that would invite the contingency¹ of the fruitlessness of the Śruti which is meant for the instruction regarding the Brahman and also because this (transmigratory) individual can obtain the end of human endeavour only by means of the lore (imparted to) transmigratory beings. [1246]

¹sakti is for prasakti (=prasaṅga).

न च ब्रह्मोपदेशस्य सर्वभावातिरेकतः ।
शक्यं फलान्तरं वक्तुं येनासावर्थवान्भवेत् ॥१२४७॥

And it is not possible to say that there is some other fruit (i.e. result) of the instruction regarding the Brahman beyond becoming all¹ and whereby² he would have obtained his desired end. [1247]

¹It means: to become the Brahman, cf. *tad āhur yad brahma-vidyayā sarvam bhaviṣyanto ...* (BU 1.4.9).

²It means: by that other fruit (if there existed any).

पुमर्थसाधने ऽन्यस्मिन्न चासौ विनियुज्यते ।
मन्त्रवत्तेन तच्छास्त्रं स्यादनर्थकमेव तु ॥१२४८॥

Further, an individual is not enjoined to acquire the end of human endeavour by any other means; (if it were thatwise), the instruction (i.e. the scriptural text) would have been fruitless (i.e. meaningless) in the same way as any other Mantra¹. [1248]

The argument of the Siddhāntin has run through verses 1246-1248.

¹A Mantra like *īṣe tvā ...* in *Yajurveda* is enjoined for recitation while a branch of some sacrificial tree is cut; that makes the Mantra fruitful. Now, Upaniṣadic Mantras do not have any relation to sacrificial activity — their employment towards that is not pre-

scribed. As such, one would call them fruitless/meaningless. But Śaṅkara and his followers have held that sacrificial purpose alone does not make Mantras meaningful. They can be (or rather, they are) meaningful in that they make one aware of the true nature of Reality, thereby effecting one's liberation.

मतं दुःखिन एवासौ संपदर्थं विधीयते ।
ब्रह्मास्मीत्यविनिर्ज्ञाते कथं ब्रह्मणि सा भवेत् ॥१२४९॥

If it is held that it (viz. instruction) is prescribed for the person who is sorrow-stricken in order that he looks upon the object of instruction¹ as the Brahman, then (the question is:) How could that² be possible in respect of the Brahman, when it is not known in the awareness: 'I am Brahman.' [1249]

Verses 1249-1250 pertain to a view of some other opponent: Instruction regarding the Brahman is subservient to Upāsanā.

¹The purpose of such looking is 'worship' (*upāsanā*).

²Namely, *sampad* which consists in looking upon some object as the Brahman (*upāsyajñāna*) and therefore Upāsanā also.

तस्मिंस्तु शास्त्राद्विज्ञाते शक्यते कर्तुमञ्जसा ।
ब्रह्मसंपदतः शास्त्रं तादर्थ्यादर्थवद्भवैत् ॥१२५०॥

But worship of the Brahman can be easily possible when that (Brahman) is known from the Śruti; thus the Śruti would become meaningful, being useful for that purpose. [1250]

The opponent's view is that, if a thing is taken as the Brahman, the Śruti statements talking about the *brahmasampad* 'looking upon (or viewing) something as the Brahman' would be meaningless.

ननु ब्रह्म यदि ज्ञातं तावतैव कृतार्थता ।
न चेत्तत्संपदा किं स्याद्येन तामनुरुध्यसे ॥१२५१॥

(The Siddhāntin puts a question:) But, let me say, if the Brahman becomes known, only in that lies the fulfilment of the goal. If such is not the case, what would be the use of

looking upon something as the Brahman, so that you adopt (lit. follow)¹ it? [1251]

¹We follow here the variant reading *anurudhyase* for *anurudhyate* shown in the AnSS edition of the BUBV (and not shown even in the NKL edition). The verse becomes meaningful, if we accept the variant. The word *tām* in the fourth quarter of the verse refers to *sampad* mentioned in the third quarter. Of course, alternatively (i.e. following the printed editions), the last quarter can be translated thus: ... so that (the seeker of liberation) adopts (lit. follows) it?

नैवं ब्रह्मावबोधस्य पाराथर्येन फलत्वतः ।
सर्वमेव यतो ज्ञानं परार्थं फलवन्मतम् ॥१२५२॥

(The objector persists to say:) This is not so because knowing the Brahman can be (said to be) fruitful only when it serves the purpose of another; for, all knowledge is accepted, on all hands, as fruitful if it serves some purpose of someone. [1252]

parārthatva of knowledge is the basic argument of the opponent. He means that *brahmajñāna* as understood by the Vedāntins cannot be taken as *parārtha*.

उक्तत्वात्परिहारस्य नैवमेतद्वेदिह ।
ब्रह्मज्ञानात्तदन्यत्र परार्थं ज्ञानमिष्यते ॥१२५३॥

(The Siddhāntin answers:) Since a counterargument (to this view) has been already stated¹, this would not (now) be an objection here²; (we hold that) except in knowing the Brahman, knowledge elsewhere³ is accepted to be serving the purpose of another. [1253]

¹This refers to *brahmajñānasya phalam nāsti* (verse 1248) above.

²That is, in respect of *brahmajñāna* and *brahmasampatti*.

³That is, in knowing any other branch of study.

सर्वत्रैव हि विज्ञानं संस्कारत्वेन गम्यते ।
पराङ्गं चात्मविज्ञानादन्यत्रेत्यवधारणात् ॥१२५४॥

Indeed knowledge¹ is everywhere accepted as an impression (on a learner's mind) and also as serving the purpose of another (i.e. some person) elsewhere than in the knowledge of the Ātman — such is the decision.² [1254]

¹Sureśvara deliberately uses the word *vijñāna*. This has a reference to the subject-object relationship in every knowledge situation of the world, that has duality at the basis. Sureśvara uses the word *ātmavijñāna* not *ātmajñāna* because he refers here to Śāstric instruction. Knowledge arising from it would work towards one's becoming one with the Brahman. But he really means *ātmajñāna* by *ātmavijñāna*.

²SP and NKL point out that this verse is from Kumārila's *Tantravārtika* p.240, line 15 (on Mīmāṃsā Sūtra 1.3.25, Benares Sanskrit Series No.3, 1882-1908, ed. by Gaṅgādhara Śāstrī) Cf. *śabda-sādhutājñānasya śabde puṃsi vā saṃskārakāritvena prayogaṅgatvam prakṛtya vyākaraṇādhikaraṇe vārtikakāroktim atra mānatvenodātarati*.

सामानाधिकरण्येन तथा ब्रह्मात्मशब्दयोः ।
श्रुतौ श्रुतेर्न संपत्स्यात्संपद्येष न हि क्रमः ॥१२५५॥

So also, by the scriptural use of the words *brahman* and *ātman* in the same case relation, there cannot arise from the Śruti the notion of looking upon something as (the Brahman); indeed in no such looking is this the manner (of the use of words).¹

[1255]

There is no use of *iti* here as in the case of *mano brahmeti* ... This is clearly *sāmānādhikarāṇya* and an indication of the absence of the notion of *sampad*; SP and NKL.

¹While looking upon something as another, someone who is the agent and the object of his looking (or obtaining) are not expressed in the same case relation. Thus *aham brahmāsmi* reveals *sāmānādhikarāṇya*, while *mano brahma iti jñānāti* do not show that; for, in this latter case, *manas* is the object and *brahma* is the

object. There is not the use of *iti* here as in the case of *mano brahmeti* ... This is a clear case of *sāmānādhikarāṇya* and an indication of the absence of the notion of *sampad* (NKL).

आत्मा ब्रह्मेत्येवमादौ सामानाधिकरण्यगीः ।
अन्यस्यान्यत्र संपत्स्यादद्वये सा कथं भवेत् ॥१२५६॥

In *ātmā brahma* ... and such other (Śruti texts), there is the expression (of two words) in the same case relation. Indeed, in *sampad* one would look something elsewhere (i.e. in some other); how can that¹ be there when there is absence of duality? [1256]

¹It means *sampad* 'looking upon a thing as another'.

द्रष्टव्यस्यात्मनस्तद्वदैकात्म्यं श्रुतिरब्रवीत् ।
ब्रह्मादि सर्वमात्मेति संपन्नातो ऽत्र युज्यते ॥१२५७॥

Likewise, the Śruti has declared a person's becoming one with the Ātman which is to be seen. So also in the Śruti 'The Brahman etc.¹ is all this.', it is not proper to entertain any idea of such looking upon one thing as another. [1257]

This affirms the *advayatva* of the Ātman.

SP here supports the *advayatva* of the Ātman by the Śruti passage *idaṁ sarvaṁ yad ayam ātmā* (BU 2.4.6).

¹The words in the first quarter have a reference to *kṣatra* and *vaiśya*, as SP points out, on the basis of *brahma tam parādāt* ..., *kṣatram tam parādāt* ... (BU 2.4.6).

तदापत्तिश्रुतेश्चेयं संपन्नेहोपपद्यते ।
ब्रह्मैव भवतीत्यादितदापत्तिवचांस्यपि ॥१२५८॥

And even on the basis of the Śruti statement about (a person's) becoming that, looking upon something as another is not acceptable here (lit. in this context), (for there are also) such statements as *brahmaiva bhavati*, referring to becoming that.

[1258]

The second line implies that, only on the similarity between the words *āpatti* and *sampatti*, one cannot rush to say that statements like the one about *sarvāpatti* can be taken as the basis for the theory of an individual being looked upon as the Brahman, thus indicating the acceptance of duality.

aapad with sampad !

वचनात्स्यात्तदापत्तिः संपत्तेरिति चेन्मतम् ।
नैवं प्रत्ययमात्रत्वात्संपत्तेर्न तदिष्यते ॥१२५९॥

If it is held that one can understand becoming the Brahman as an effect of looking upon something else as that (viz. the Brahman) on the basis of the Śruti statement, this is not so, because (becoming that) has the nature of only (one's) experience, and that (viz. *brahmāpatti*) is not accepted (as resulting from) looking upon something else as the Brahman.

[1259]

The Vedāntins hold that the Śruti statement about the Brahman makes one aware of its own meaning and this knowing itself is becoming one with the Brahman. There is nothing intervening between knowing the Brahman and becoming the Brahman. That is to say, there is no such process as: Śruti → *sampad* → *tadāpatti*.

तमोमात्रान्तरायत्वादाप्तमप्याप्यते न तत् ।
न च संपत्तमोहन्त्री मिथ्याज्ञानात्मकत्वतः ॥१२६०॥

(The fact is) that it (=the Brahman) is not obtained¹, even though it has been already obtained, because of its having the obstacle of mere ignorance about itself. And *sampad* is not the remover of ignorance, for it is itself of the nature of false knowledge.

[1260]

¹It means: not known.

तमोऽध्वंसातिरेकेण सम्यग्ज्ञानस्य नापरम् ।

फलमण्वपि संभाव्यं ज्ञानस्याकारकत्वतः ॥१२६१॥

It is not possible to think of even a little fruit in addition to destruction of ignorance (which results) from right knowledge; for, owing to its nature of being knowledge, not even a little of another fruit can be thought of. [1261]

This verse has in view an objector's notion: *śrutivacana* → *brahmasampatti* → *brahmāpatti*.

वस्तुनः शक्तिकृन्नापि वचनं ज्ञापकत्वतः ।
ज्ञापकानि हि शास्त्राणि कारकाणि न कुत्रचित् ॥१२६२॥

And a Śruti statement, being (only) informative (about the Brahman), does not produce (any) power in the real thing; for, the Śruti texts are only informative and nowhere productive (of any effects). [1262]

The second line of the verse is a general rule regarding informative means of knowing; it supports the specific statement about the Śruti sentences which declare the nature of the Brahman but not create it.

अभीष्टपुरुषार्थस्य बाधश्चैवं प्रसज्यते ।
निःशेषपुरुषार्थाप्तिकारि ब्रह्मावबोधनम् ॥१२६३॥

Thus¹, there will be contingent a difficulty in (achieving) the desired end of human endeavour for an individual; (as against this), informing (one) about the Brahman is capable of bringing about complete attainment of the end of human endeavour for an individual. [1263]

The verse brings about the difference in the attitude of the two sides, viz. the Vṛttikāra and the Siddhāntin. Also it points out why teaching about the Brahman is not a subsidiary to some prescription of worship (*brahmopāsana*).

¹Namely, by accepting that *sampad* which results from Vedānta sentences, and in turn, into liberation.

तादृक्षं संपदो न स्यान्न च दुःख्यात्मबोधतः ।
निःशेषपुरुषार्थाप्तिस्तद्बुद्धेरनृतन्त्रतः ॥१२६४॥

Similar (fruit) would not (result) from *sampad*, and also by knowing oneself as affected by sorrow; the complete achievement of the end of human endeavour for an individual is obtained from knowing that (viz. the Brahman), since it does not depend on man (i.e. man's effort). [1264]

The first line refers to *sampad* and the knowledge connected with it and the second line, with the knowledge of the Brahman and liberation.

Verses 1263-1264 emphasise that *duḥkhyātmabodha* (i.e. *sam-sāridhī*), is, because it is not *puruṣatantra*, ever obtaining and that would involve the contingency of all-time absence of liberation. If it were not so held, then there would ever be the state of liberation for an individual (NKL).

अपूर्वाद्यर्थ एवैकः प्राधान्येन विवक्षितः ।
काण्डद्वये ऽपि नैतस्मादन्यो ऽर्थः कश्चिदीक्ष्यते ॥१२६५॥

In both of the Kāṇḍas¹ there is only one thought to be expounded, viz. about that which did not have anything preceding it, as the principal matter; therefore, no other thought can be entertained (as the subject of discussion). [1265]

The verse emphasises how the Upaniṣad does not anywhere refer to an individual who later on becomes the Brahman as a subject of discussion in the Vedānta sentences discussed above.

¹These refer to the Madhu Kāṇḍa and the Muni Kāṇḍa which cover BU chh. 1-2 and chh. 3-4 respectively.

एतावदर इत्यन्त उपसंहारदर्शनात् ।
न चोपक्रमसंहारविरुद्धोक्तिः प्रशस्यते ॥१२६६॥

(And) there is seen in the end the conclusion (in the words)

etāvad are; (indeed) contradictory statements in the introductory and the concluding (parts of a work¹) are nowhere appreciated². [1266]

¹In the *upakarama* and *upasamhāra*.

²It means: acceptable.

तत्रैवं सति संसारी यद्यन्यो ब्रह्मणो भवेत् ।
इष्टस्यार्थस्य बाधः स्यान्न च ध्वान्तनिराकृतिः ॥१२६७॥

This being so, if there existed (according to one) a trans-migratory individual apart from the Brahman, there would result obstruction to the desired end¹ and not the removal of darkness². [1267]

¹It means: liberation.

²It means *avidyā*.

आरम्भे ऽवसितौ शास्त्रं परस्परविरोधतः ।
समञ्जसं न क्लृप्तं स्यात्संभवे ऽप्यविरोधिनः ॥१२६८॥

(Also) on account of the mutual contradiction between the beginning and the end of it, the Śāstra (i.e. scripture) would not be considered as reasonable — this, even when there is a possibility of (some scripture) that does not involve internal contradiction. [1268]

समाख्यानुपपत्तिश्च ब्रह्मणो ऽन्यस्य वेदनात् ।
नापि रुढिस्तदन्यस्मिन्नश्वकर्णादिवद्भवेत् ॥१२६९॥

If there is understood (from the Vedānta statement) information of something else than the Brahman, there would result impropriety (lit. unreasonableness) of the nature (of the lore¹). So also, there is not a convention (to use the word *brahman* as) some other thing (than the Brahman) as in the case of word *aśvakarṇa* etc.² [1269]

¹This is *brahmavidyā*, if the Brahman were taken to mean

manuṣya, then *brahmavidyā* would not be a significant name.

²The first line conveys the argument based on the significance (or, strictly speaking, etymology) of the name (*yoga*); the second line refers to the convention which can be impervious of *yoga*. To explain this, the example of *aśvakarṇa* is stated. *aśvakarṇa* literally means: a horse's ear; but, by *rūḍhi*, one can understand the word to signify somebody of that name, or, as NKL points out, a particular tree. The word *ādi* is not explained by SP or NKL. Though NKL writes *ādipadena karṇādisaṃgrahahāḥ*, one wonders if NKL understood by *karṇa*, which literally means an ear, the great hero of the *Mahābhārata* bearing that name. One can point out to the names *Śunaḥśepa*, *Śunaḥpuccha*, *Śunolāṅgūla* from the *Aitareya Brāhmaṇa*, all meaning 'a dog's tail', but actually standing for three brothers' names.

आत्मेति वेत्तुरन्यश्चेन्न ब्रह्माहमिति श्रुतेः ।

प्रतीचो ब्रह्मवत्प्रत्यग्ब्रह्मणो ऽपि विशेषणम् ॥१२७०॥

If by the word *ātman* is signified someone other than the knower, then there would not have occurred a specification by the Śruti of the inner self as the Brahman in (the words) 'I am Brahman.' with regard to the Brahman abiding (as) the inner self. [1270]

Identity of the inner self and the Brahman is here emphasised with a view to warding off the notion that Brahman signifies *manuṣya*.

ब्रह्मता न मदन्यत्र कौटस्थ्यान्मम नाशिषु ।

ब्रह्मणो नान्यतः प्रत्यक्साक्षात्त्वाद्ब्रह्मवस्तुनः ॥१२७१॥

The character of the Brahman is not elsewhere than in me (i.e. my inner self), on account of (hearing about) my immutability among perishable (objects); the inner self (also) is not (existing) elsewhere than in the Brahman, since the Reality, viz. the Brahman, is directly perceptible (in it). [1271]

SP refers to the Śruti passage *yat sākṣāt* ... (BU 3.4.1) which

mentions the Brahman and the the inner self as identical.

अव्यावृत्ताननुगतेर्मुख्यार्थश्च तथा सति ।
ब्रह्मविद्येति सिद्धः स्यादव्यपदेशो न चान्यथा ॥१२७२॥

That being so¹, the primary meaning of the word *brahmavidyā* gets established because of the Brahman not being distinguished (from any other object) and also not being followed (by any other object)²; also, it³ would not be improper. [1272]

¹The Brahman and the inner self are taken as identical.

²The word *vyāvṛtta* signifies what has differences in qualities like colour etc. with other objects in other class (*vijātīya*) and *anugata* signifies what shares a common (*sāmānya*) quality with the objects in the same class (*sajātīya*), i.e. similar to something else. The Brahman is neither of them. The word *avyāvṛttānanugati* points to two specific attributes of the Brahman and not of a man.

³Namely, the meaning of *brahmavidyā*.

भिन्नाभिन्नत्वगीर्यापि सापि दुःस्थितसिद्धिका ।
विरुद्धधर्मसंबन्धो न प्रतीच्यस्त्यधर्मणि ॥१२७३॥

(Now) as to the statement (about the Brahman and the inner self) being different and non-different; that also establishes a difficult situation. (Indeed) there is no connection of qualities which are opposed (to the Brahman) with the inner self which is (in reality) without any qualities. [1273]

This refers to the condition of the inner self as overpowered by ignorance. Only in this condition it seems to be different from the Brahman. This is the force of the word *duḥsthita*. By merely calling it *bhinnābhinna*, one cannot establish one's theory of *bhedābheda*. SP rightly points out BU passage (3.8.8) which describes the Brahman as only *asthūla* etc.

धर्मधर्म्यभिसंबन्धा गृह्यन्ते ऽनात्मवस्तुषु ।
प्रत्यक्षादिप्रमाणेन नामीषामात्मनि ग्रहः ॥१२७४॥

The relations of qualities and those who possess the qualities are understood in the case of objects other than the Ātman by such means as direct perception. One does not hold these (relations) in the case of the Ātman. [1274]

That is, the Ātman cannot be known by any means other than the Śruti and *dharmadharmisambandha* is understood only by *pratyakṣa*, *anumāna* and *upamāna*— those three *pramāṇas* are accepted in common life.

आत्मानात्मनिमित्ते ऽपि व्यपदेशो ऽपि दुर्घटः ।
विकल्पतो वा तत्सिद्धिर्ब्रह्मसंसारिणोर्भवेत् ॥१२७५॥

And (this) name (*brahmavidyā*) also would be difficult to explain even though it has both the Ātman and the non-Ātman as the subject-matter¹ of discussion. (One might argue:) Or, perhaps, that (name, viz. *brahmavidyā*) would get established with reference to the Brahman and the transmigratory being optionally. [1275]

¹This is the meaning of *nimitta* on the authority of SP and NKL which hold *nimitta* = *viṣaya*. The word *ātmānātmanimitta* would literally mean 'caused by (or arisen on account of) the Ātman and the non-Ātman'.

न चार्धवैशसं युक्तं तत्त्वज्ञाने विवक्षिते ।
संशयो हि तथा श्रोतुः स्यादनिश्चितवाक्यतः ॥१२७६॥

(The answer is:) It is not at all (*ca*) proper to adopt half-killing¹ when it is intended (to secure/expound) the knowledge of Reality, since, from a statement wherein there is no certainty,² there would be on the part of a listener (only) doubt about that (viz. Reality). [1276]

¹ 'One cannot cook one half of a chicken, keeping the other half alive for further regeneration.' This is *ardhavaśasa*.

²That literally means: where there is *vikalpa* 'option'.

निश्चितं फलवज्ज्ञानं यस्य स्यादिति शास्त्रतः ।
न तु संशयितं यस्मात्संशयात्मा विनश्यति ॥१२७७॥

(This is so) on the basis of the Śruti¹, viz. knowledge is fruitful (in the case of him) whose (knowledge) is ascertained (i.e. proceeds from decision)²; but not that which is beset with doubt, because (it is said in the Smṛti,) One who entertains doubts perishes ...³ [1277]

¹Cf. CU 3.14.4: *yasya syād addhā na vicikitsāsti*.

²The word *nīścitam* is misprinted in AnSS as *nīścittam*.

³Cf. *Gītā* 4.40.

परमात्मन्ययुक्ता चेत्साधकत्वादिकल्पना ।
शास्त्रोपालम्भतो नेवं शास्त्रीयेयं प्रकल्पना ॥१२७८॥

[Verses 1278-1283 point out that the word *brahman* signifies the Brahman (i.e. *mukhya-brahman*).]

If (one argues:) The notion of being an aspirant (for liberation) on the part of the Supreme Self¹ is improper, (our answer is:) No, it is not so, for that (argument) would give blame to the this Śruti; this is indeed a notion entertained² by the Śruti. [1278]

The argument is: The Śruti statement *tad ātmānam evāvet* (CU 1.4.10) points to the Brahman as the agent of *jānāti-kriyā* and, as such, it is unreasonable to hold that liberation results from knowing an agent of some action! This explains the word *akṣama* in the nextd verse.

¹Namely, *brahmabhāvī jīvaḥ iti kalpanā*.

²As will be clear: 'owing to ignorance'; cf. the next two verses.

अक्षमा भवतः केयं साधकत्वप्रकल्पने ।
किं न पश्यसि संसारं तत्रैवाज्ञानकल्पितम् ॥१२७९॥

(An objector argues:) What kind of (*kā*) inability is this on

your part, with respect to the notion¹ of (the Brahman itself) being an aspirant (for liberation)? (We answer:) Why! Do you not see this world which is imagined by ignorance resting as it is only on that (Brahman)²? — (this is what we hold!).

[1279]

¹It means: you cannot entertain.

²*tatra* is equal to *paramātmāni* in the preceding verse.

अनात्मवस्तु यत्किञ्चित्द्ब्रह्मानवबोधतः ।
ब्रह्मण्येव समध्यस्तं शुक्तिकारजतादिवत् ॥१२८०॥

Whatever is a non-Ātman object, is (what exists) thanks to non-knowing of (the nature of) the Brahman; (that) is superimposed on the Brahman itself, in the same way as silver on a conch-shell etc.,¹ (for example). [1280]

¹The word *ādi* refers to *rajjusarpa*, *mṛgaṭṛṣṇikā* and such other well-known examples.

यस्मादेवमतो ऽशेषसंसारानर्थकल्पना-
निदानबहुलाज्ञानसमुच्छ्रित्यै परा श्रुतिः ॥१२८१॥

Since this is so, therefore, the subsequent Śruti proceeds with the purpose of destroying the ignorance (about the nature of the Ātman) as a potent remedy against the undesirable notion of this entire transmigratory existence. [1281]

We take *aśeṣasamsāra* ... up to *samucchityai* as one word and not two, in this we follow the NKL edition of the BUBV not the AnSS edition. Also read SP: *-svāvidyādhvaṃsi brahma-vidyārthatvenārabdheti* ...

ब्रह्मेतिब्रह्मशब्देन कृत्स्नं वस्त्वभिधीयते ।
प्रकृतस्यात्मकात्स्न्यस्य वैशब्दः स्मृतये मतः ॥१२८२॥

(In the Śruti text referring to) the Brahman, it is the (one) whole object that is signified by the word *brahman* and the

word *vai* (in the same text) is understood for the remembrance of the wholeness of the Ātman which is the subject matter of discussion. [1282]

Cf. *brahma vā idam agra āsīt* (CU 1.4.10).

प्रकृतार्थोपरोधाच्च मुख्यब्रह्मार्थलाभतः ।
यथोक्तदोषाभावाच्च ब्रह्म कृत्स्नमिहास्त्वतः ॥१२८३॥

(Therefore), lest there should be opposition (*uparodha*) to what is taken up for discussion, (and) owing to the profit (which should accrue) from accepting the meaning of the principal Brahman and also because (in so doing) there should be absence of faults as stated before,¹ let here be (understood) the whole Brahman (as the thing meant). [1283]

The argument is: The word *brahman* signifies the Ātman without duality (*advaya*).

¹By Śaṅkara in BUB, viz. *prakṛtahānāprakṛtaprakriyāprasaṅga*, *mukhyārthabādha* and *upoddhātadoṣa*. Refer to verses 1203-1209 above.

In verses 1284-1311, Sureśvara states and refutes the argument against the wholeness of the Brahman.

ननु मानादिविरहादकृत्स्नमपि नेष्यते ।
कुतः कात्स्न्यं यतः सर्वं मानादेव प्रसिद्ध्यति ॥१२८४॥

(An objector argues:) But, even a thing, which is not whole, is not acceptable¹, if there is absence of any means (for proving its nature). Therefore, whence is this wholeness (of the Brahman proved)? Indeed, everything gets established (i.e. proven) on the basis of some means of knowing. [1284]

This verse, i.e. the objection, proceeds from resentment against *yathoktadoṣābhāvāt* in the preceding verse.

¹This literally means: accepted.

अभ्युपेतौ च मानादेस्तस्य कात्स्न्यं विहन्यते ।
न हि ब्रह्मातिरिक्ते ऽर्थे सति संभाव्यते ऽजडैः ॥१२८५॥

And, in case (such) means is accepted (as existing), the wholeness of that (Brahman) is stultified, because, when there exists an object in addition (to the Brahman), the intelligent do not hold that it is the Brahman. [1285]

The Advaitin is held as an intelligent person. There is obvious derision intended by the opponent, because, if the Advaitin were to accept that there are means of knowing the Brahman as apart from the Brahman, that would give lie to his proposition that the Brahman was alone.

भिन्नाभिन्नत्ववादे ऽपि ब्रह्माभिन्नात्मना भवेत् ।
व्यावृत्तेर्न तु भिन्नेषु ब्रह्मता स्याद्घटादिवत् ॥१२८६॥

Even in the theory that (the Brahman and the transmigratory world) are distinct and non-distinct, there would be the Brahman which remains undifferentiated in nature; and because of their distinction (from the Brahman) there would not be (in the dissimilar objects) the nature of the Brahman as established in the case of a pitcher etc. [1286]

In the case of a pitcher or a piece of cloth, we notice that though it may have some characteristics similar to those of a thing of its kind (*abhinna*) it is still distinct from it because of its peculiarity; some pitcher may be bigger than another, it may have a different colour; so also, a piece of cloth may be longer or shorter than another, it may be old or new in comparison with another and so on. This explains the word *ādi* 'etc.'.

वस्तुवन्तराभ्युपगमः प्रत्यक्कात्स्न्यविधातृकृत् ।
न तु मानाभ्युपगमो मितेस्तदवसानतः ॥१२८७॥

(And) acceptance (of the inner self¹) as something else than the Brahman would be an obstacle (to understanding) the wholeness/completeness of the inner self. However, acceptance

of the (different) means (does not obstruct) knowledge, because (their) end is that (viz. knowledge). [1287]

The first line reaffirms the oneness of the Brahman and the inner self. It emphasises that, if *bhedābhedavāda* were accepted, then the wholeness of the inner self (as seen in the sentence 'I am Brahman.') would be opposed. Thus *bhedābhedavāda* and Śaṅkara stand in opposition. The second line points out that the acceptance of the means of knowing does not bring about such an undesirable condition. Therefore, the means are understood to be there only up to the point when there results understanding of the nature of the Brahman or the inner self. That is to say: They do not really exist apart from the Brahman. There were notions of them held for the convenience of apprehension of their oneness.

¹Supply: which is held to be subject to transmigratory existence.

वस्तुवन्तरस्य सद्भावः सिद्धे कात्स्न्ये विरुध्यते ।
मानाद्यपेक्षा सिद्धस्य नानुन्मत्तेन चोद्यते ॥१२८८॥

The existence of an object other than the real object (viz. Brahman) would be opposed when the wholeness (of the latter) is established (and the existence of) the means etc.¹ in the case of (an object whose existence) is established is not upheld by one who is not mad.² [1288]

¹This stands for *mānameyavyavahārah* which was understood in the preceding verse where the word *mānābhyupagamaḥ* is used.

²This amounts to the discontinuation of the *mānādivyavahāra* when the Reality is established; cf. *miti* in the preceding verse. Both, this verse and its preceding, indicate Śaṅkara's idea — That *pramāṇādivyavahāra* (= *mānādi* ... here) is also understood as a product of superimposition.

न चापि वास्तवी सिद्धिः प्रमात्रादिविरोधिनी ।
सत्यामेव यतस्तस्यां संसारानर्थविभ्रमः ॥१२८९॥

Establishing of Reality is not opposed to (the acceptance of)

the knower etc., since only when that comes to be (i.e. gets) established, (there arises) the superimposition on it of the undesirable transmigratory existence. [1289]

वास्तव्या अपि संसिद्धेः स्वमहिम्नैव नेष्यते ।
प्रमाणविरहात्सिद्धिरेतच्च स्वानुभूतितः ॥१२९०॥

Also, in the case of the self-established Reality, it is not accepted as what gets established in the absence of the various means of knowing, i.e. on its own strength, and this is (clearly known) from one's own experience. [1290]

मेयकात्स्न्यविरोधित्वान्न मितेः शङ्क्यते भिदा ।
मेयस्वरूपावसितेर्नान्या मानस्य मानता ॥१२९१॥

Not any doubt is entertained in respect of knowledge that it has a distinction (from the Brahman) because of its character of not having any opposition to the wholeness of the object of knowing, viz. the Brahman. The character of the means of knowing as a means is not distinct from that it culminates into (grasping) the true nature of the object of knowing. [1291]

Cf. verse 1287 above.

न हि मेयप्रतिस्पर्धि तन्मानं मेयबोधितः ।
मानप्रसादात्सिद्धं सत्स्पर्धते मितिबाधितैः ॥१२९२॥

(Indeed) that means of knowing is not vying with (i.e. is opposed to) the object of knowing, because the existent being established by the favour¹ of the means of knowing, the existent stands in opposition to (all the objects) which are stultified by knowledge. [1292]

¹That is, power.

न हि वस्त्वन्पाश्रित्य मानत्वं लभ्यते मितेः ।
वास्तव्या अपि संसिद्धेर्न सिद्धिः स्यात्प्रमां विना ॥१२९३॥

Indeed, without having recourse to the real object (i.e. the Brahman), knowledge cannot get the character of (the authoritative) means of knowing. The knowledge about Reality (viz. the Brahman) cannot be (thought of) as an established means¹ without knowledge. [1293]

¹Supply: towards destruction of ignorance.

स्वप्रमेयार्पणं मुक्त्वा मानत्वे ऽन्यन्न कारणम् ।
अर्पितेन विरोधश्चेदस्तु कामं न दुष्यति ॥१२९४॥

There is no other ground for a means of knowing to be that (i.e. the means of knowing) unless it has yielded (i.e. led to the knowledge about) the object of its knowing (viz. the Brahman). If it is held that there is opposition to what is yielded (viz. knowledge), well, let it be so, it does not affect (our position). [1294]

प्राज्ञानाज्ज्ञानकाले च मानं मेयो ऽप्यपेक्षते ।
प्रमाणकार्ये निर्वृत्ते नान्यत्किंचिदपेक्षते ॥१२९५॥

Even the object of knowing (in Vedānta, viz. the Ātman¹) expects a means (of knowing it) before the knowledge (of it has dawned) and at the time of the knowing (of it); further, when the function of the means is accomplished², (the object of knowing) does not expect anything else (than itself). [1295]

¹This is in view of *meyah* in the masculine gender.

²That is, knowledge has occurred by using that means.

अज्ञातो ऽर्थः प्रमेयः स्याज्ज्ञाते को ऽतिशयो मितेः ।
अज्ञाते न विरोधो ऽस्ति ज्ञाते चान्यानपेक्षतः ॥१२९६॥

The object that is not known is taken to be the object of knowing. What excellence could there be in the knowledge when its object is already known? When (however) the object is not known, there does not exist any opposition¹ (of any kind); and when that (object) has become known, it has the

character of not being dependent on anything else (as the means of knowing it). [1296]

This reaffirms the thought in the preceding verse.

¹Supply: to the existence (and consequent acceptance) of the means.

मेयासाधारणात्मोत्थज्ञानस्यैव प्रमाणतः ।
तस्य वस्त्वनुरोधित्वादभेदादविरोधिता ॥१२९७॥

Since (here in the theory of Advaita) the means of knowing is only the knowledge which arises from the object of knowing, i.e. the unique Ātman, and it has conformity with Reality, therefore, there is non-distinction (between the means of knowing and the object of knowing) and consequent absence of opposition. [1297]

पश्येदात्मानमित्यत्र नियोज्यो विषयाद्विरुक् ।
न लभ्यते यतो नात ऐकात्म्ये स्याद्विरुद्धता ॥१२९८॥

In the statement 'He should see the Ātman.', the person to be enjoined is not (really) found to be away from the object (to be seen); therefore, for this reason also, there would not be any opposition to his oneness (with the object of his knowing). [1298]

ब्रह्मश्रुतेश्च मुख्यो ऽर्थः प्रतीचो ऽन्यत्र दुर्लभः ।
यथाकथंचिदित्येतदतो नैवाभ्युपेयते ॥१२९९॥

The primary meaning of the Śruti about the Brahman (i.e. the sentence such as 'He should see the Ātman.') is in every way difficult to fix elsewhere than in the inner self; therefore this (viz. the supposed absence of the whole of the Brahman) is not accepted. [1299]

स्वत एवात्मनः कात्स्न्यान्न कात्स्न्यं साधनाश्रयात् ।
साधनायासतः प्राक्च ब्रह्मैवासीदतीरितम् ॥१३००॥

Since the wholeness of the Ātman exists by its own nature, that wholeness is not on account of any means (of producing it). (For) it is said that the Brahman did exist there even before the means became operative (towards the purpose of knowledge)¹. [1300]

¹This is to say: Since the Brahman is already existent, the so-called means of producing the knowledge about it cannot be said to have produced that Brahman.

आसीदित्यपि यः शब्दः स तन्मोहाद्यपेक्षया ।
वस्तुवृत्तमपेक्षयैतन्नासीदस्ति भविष्यति ॥१३०१॥

And even that word *āsīt* (is used in the Śruti) with an eye on¹ (or keeping in view) ignorance about it. (The verbs) *āsīt*, *asti* and *bhaviṣyati* (are) not used (by one) depending upon the happening in the case of the real object. [1301]

Sureśvara uses the word *vr̥tta* in the sense of happening which requires cause the use of the verbs indicative of the past, the present and the future tenses while referring to the Brahman. There is no such happening in respect of the Brahman, i.e. it does not undergo any change; therefore, the indication of any tense in any proposition about it is ruled out.

¹It literally means: in expectation of.

सदानुदितालुप्तैकज्ञानमूर्तिरिति त्वया ।
कुतो ऽज्ञायि विना मानान्मानं नाज्ञाततां विना ॥१३०२॥

(A question is asked:) Whence have you known that (the real Brahman) has a form which has not come into existence, which will not disappear, and which has the form of knowledge, unless without any means of knowing? — (And indeed) there cannot be a means (operating) without (having to make known) something which has the nature of being unknown. [1302]

एकं ब्रह्म सदा बुद्धं यथा मानानुभूतितः ।

As from the means (in the form of Śruti), experience and instruction by the learned this formerly not-known Brahman becomes known as ever unique (i.e. one without a second), so also (does it become known) by resorting to (mere) one's experience.¹ [1303]

¹This experience takes the form of 'I do not know.'

व्युत्पत्तिफलमाश्रित्य तमो ऽसंभव उच्यते ।
व्युत्पत्तेः प्राक्तमस्वित्वं तत्साक्षित्वे ऽपि गम्यते ॥१३०४॥

Impossibility of (the existence of) ignorance is posited only after one resorts to the result of the knowledge arising from instruction. (This means:) Before knowledge from instruction (has occurred), there is understood (in the inner self which is really the Brahman) the state of having been overpowered by ignorance, even while it has the nature of the witness. [1304]

This has reference to SV 176.

This is to indicate the wholeness of the inner self that is equal to that of the Brahman and also to explain away the association of ignorance with the inner self.

AnSS reads *tamosambhava*, wrongly.

स्वसत्तयात्मनो मोहं न यतो वस्तु हन्त्यतः ।
शास्त्रानारम्भदोषो ऽपि नैवास्मान्प्रति ढौकते ॥१३०५॥

Since the real object does not destroy ignorance on the part of the inner self by its existence, therefore even the fault of not-beginning the study of the Śruti also does not affect us.

[1305]

This pertains to a fault pointed out earlier, viz. the inutility of Śāstric study.

SP refers to BSB 1.1.4 (cf. p.154): *śāstrotthajñānād ajñānadhvasteḥ śāstrārambho 'rthavān iti samanvayādhikarāṇe sthitam ity arthaḥ*.

अनादेरपि बाधश्चेत्तमसो नाभ्युपेयते ।
प्रमाणानां प्रमाणत्वं न क्वचिद्धः प्रसिद्ध्यति ॥१३०६॥

And if the removal of ignorance, which is beginningless, is also not accepted (by the opponent), (then, in that case, we have to say to him:) For you there will not be anywhere any means of knowing which has the character of the means of knowing. [1306]

The means of knowing informs one of something not known before, therefore, if the Śruti sentence is held as not capable of removing ignorance and thereby conveying the nature of the Brahman, then it has to be declared as totally non-productive of any effect.

अनुभूतेस्तदज्ञातं सिद्धं ब्रह्म पुरा मितेः ।
अपास्ताज्ञानतत्कार्यं तत्तु मानात्प्रसिद्ध्यति ॥१३०७॥

(One would say:) That Brahman, which was not-known before it was made known (by the Śruti), was (already or in reality) established by experience, but it can get (or gets) established by means of knowledge, as one from which is removed ignorance and its effect(s). [1307]

The thrust of the argument which is refuted is: There is no need of any *pramāṇa* (or Śruti) for getting to know the Brahman.

पूर्वोक्त्यैवोत्तरेषां च दोषाणां परिहारतः ।
परिहारान्तरं तस्मान्न वाच्यं तत्प्रसिद्धितः ॥१३०८॥

(And we answer thus:) Since there is (already) a refutation of these later (shown) faults by our earlier arguments,¹ therefore yet another argument (for their refutation) has not to be adduced (lit. stated), since that can be effected by the same (automatically). [1308]

¹Śaṅkara has in mind his argument against some doubt raised

by the opponent earlier in verse 1087 above.

प्रतीचो ऽर्थस्य ज्ञेयत्वादनवस्था च नेष्यते ।
अकारकस्य कौटस्थ्याद्विरोधो नात्मदर्शने ॥१३०९॥

Since the object to be known is the inner self, it is not possible (lit. accepted) that there is *infinite regress*. So also, there is no contradiction in (stating about the) seeing of the self since the Brahman/Ātman which is (in reality) not an agent of any action is immutable.¹ [1309]

¹Since the inner self is self-illuminating, there is not involved any contradiction (i.e. *svapprakāśatvān na svātmani kriyāvirodhah*).

घटादिमेयसाधर्म्ये निषेधो ऽपि श्रुतीरितः ।
यथोक्तावगमत्वं तु न कथंचिन्निवार्यते ॥१३१०॥

In respect of the similarity of (the Brahman/inner self) with a pitcher as an object of knowing also there is rejection stated in the Śruti. But, in no way, the character (of the Brahman) as what becomes known, as stated before, cannot be negated. [1310]

The objector compared the statement *ātmā vā are draṣṭavyo mantavyo śrotavyo nididhyāsitavyaḥ* ... to a popular statement *ghaṭo draṣṭavyaḥ*. Thereby he means to point out the contradiction involved in the Śruti statement. Thus, like a *ghaṭa*, the Brahman should be considered as impermanent, while the Śruti describes it as permanent! The answer is: Yet, the Śruti statement *vijñātāram are kena vijānīyāt* has negated any seeing of the object.

तस्मान्न कश्चिदप्यत्र कात्स्न्यर्यात्मावगमे भवेत् ।
दोषो ऽतः सांप्रतं भाष्यग्रन्थं व्याचक्ष्महे स्फुटम् ॥१३११॥

Therefore, here in understanding the wholeness (of the Ātman/Brahman) there is not (lit. would not be) any fault whatever. As such, we shall now clarify the text of the Bhāṣya.

[1311]

Verses 1312-1350 explain BUB: 'tat praviṣṭaḥ sraṣṭṛ brahma' with respect to BU 1.4.7: 'sa eṣa iha praviṣṭaḥ'.

यत्स्रष्टृ ब्रह्म पूर्वोक्तं स्वात्ममोहैकवर्त्मना ।
कार्यं चैतन्यबिम्बेन प्रविष्टं जलचन्द्रवत् ॥१३१२॥
ब्रह्मेति ब्रह्मशब्देन तदेवात्राभिधीयते ।
तस्य यो ऽतिशयः प्रोक्तो व्याकृताव्याकृतात्मकः ।
इदमित्युच्यते ब्रह्म तदुपाधिस्वभावकम् ॥१३१३॥

By the word *brahman* is here referred to that very Brahman which was earlier stated as the creator by following the way of ignorance about its own nature, (and which is now mentioned here as) the effect like the moon in the water that appears to have entered (into it) with her real orb.¹ [1312-1313ab] In the word *idam* is mentioned that Brahman² which has the nature of its delimiting adjuncts, viz. that excellence which was mentioned as having the form of the differentiated and the non-differentiated. [1313c-f]

tasya yo ... in verse 1313 explains BUB *idam śarīrastham ...*

¹This refers to *bimba-pratibimba* illustration; here the real entry is denied.

²Cf. NKL: *dehadvayāvacchinnam brahma idampadapratipādyam ity arthaḥ*.

वैशब्दो ऽवधृतौ ज्ञेयो ब्रह्मैव न तदन्यथा ।
अनिर्ज्ञातात्मतत्त्वं सदब्रह्मैवावभाति तत् ॥१३१४॥

(In the statement in the Bhāṣya), the word *vai* is to be understood in the sense of emphasis/specification. (That is to say that it conveys) only the Brahman and not anything else, being what has its true nature not-known, (and) it appears only as the non-Brahman. [1314]

This is another meaning as given by BUB *vaiśabdo 'vadhāraṇārthah*.

यदिदंशब्दधीगम्यं सम्यग्ज्ञानोदयात्पुरा ।

अपि ब्रह्मैव तत्कृत्स्नं तन्मोहादतथेक्ष्यते ॥१३१५॥

Whatever is understood from the meaning of the word *idam* is only that whole Brahman; even before the rise of the knowledge of Reality. But, owing to ignorance about it, it is seen as otherwise. [1315]

This is to re-iterate the meaning of the word *idam* and to explain the sentence in the Bhāṣya beginning with *prāk*.

रज्जुवत्तदविज्ञानात्सर्पदण्डादिनेक्ष्यते ।
ब्रह्मेदंमात्रश्रवणात्कुतो ऽग्र इति भण्यते ॥१३१६॥

That (viz. the Brahman) is understood through ignorance (about it) like a rope (being seen) as a serpent or a stick etc. Now only on hearing the word *brahmedam* (the question arises:) Why is it said (that there was the Brahman) before (*agre*)? It is (now) said (in answer): [1316]

सत्रान्तजगतो व्यक्तेः प्राक्तनः काल उच्यते ।
यद्वै तदिति तच्चापि स्पष्टमूर्ध्वं प्रवक्ष्यते ॥१३१७॥

Here is mentioned that time (which was) before the appearance of this transmigratory world that ends with the Sūtrātman (i.e. Hiranyagarbha) and that will again be clearly stated later in the words *yad vai tat ...*¹ [1317]

¹Cf. BU 4.3.26.

नाविद्यासंगतिस्तत्र तदकार्यत्वहेतुतः ।
तमोजस्यापि कार्यस्य न प्रतीच्यस्त्यकारणात् ॥१३१८॥

There, in that case there is no association of ignorance since it does not have the nature of an effect. Also, the effect of what is produced from ignorance is not (associated) with the inner self, because it is not its cause.¹ [1318]

¹The argument is: Ignorance is not the cause of the inner self

and therefore is ruled out its association with the latter which could be in accordance with the maxim regarding *kāryakāraṇa-samgati*.

प्रत्यक्तयात्मसंबन्धान्मोहादेशिचिन्निभात्मता ।

आचिच्छेषादतो नासौ मृषा स्याद्धर्मकार्यवत् ॥१३१९॥

Since, being within the body, ignorance etc.¹ has connection with the Ātman (and) has similarity of nature with sentience; therefore, till when there remains (only) sentience, it is not false in the same way as an activity in ritual (is not false).²

[1319]

¹The word etc. refers to the products of ignorance.

²On the *vyāvahārika* level, the ritual and all its pre-requisites such as qualification of a performer, the deity, the result are taken to be real. This is acceptance of *dvaita*. Similarly, *moha* etc. are taken to be real. This is only hypothetical acceptance!

प्रत्यग्याथात्म्यसंबोधान्नान्यो हेतुः समीक्ष्यते ।

निरन्वयविनाशाय यो ऽलं संसाररूपिणः ॥१३२०॥

There is no other cause than the knowledge of the true nature of the inner self to be seen as what is capable of destroying completely¹ all that exists in the form of transmigratory existence.

[1320]

This verse emphasises that only the knowledge of the inner self can remove ignorance.

¹It literally means: destroying it in such a way that there is no remainder left of it.

कौटस्थ्यासंगतो नास्य मोहतत्कार्यसंगतिः ।

स्वतः सेद्धुमशक्तत्वान्मोहादेरात्मसंगतिः ॥१३२१॥

On account of its immutability and non-association (with anything else),¹ this one has no association with ignorance and its effect(s). And, in the case of ignorance etc., there

is no association of them with the Ātman, because they have incapacity to establish themselves, on their own. [1321]

¹For there really does not exist that. *asaṅga* is for *asaṅgatva*.

काष्ण्येनेव वियद्योगः खवृत्तापेक्षया त्वसन् ।
आत्मनैवं तमोयोगो नात्मवृत्तानुरोधतः ॥१३२२॥

(As) in the case of the sky, there is association with darkness etc. though it (the latter) is not in existence by its (i.e. of the sky's) own doing, in the same way there is no association of ignorance with the Ātman; (indeed) not following its own doing. [1322]

Refer to Adhyāsabhāṣya (p.39): *apratyakṣe 'py hy ākāśe bālās talamalinatādy adhyasyanti*.

अन्यतः संगतिः सेयमविचारितसिद्धिका ।
अविज्ञातचिदुत्सङ्गसंस्थैवेयम् न वस्तुनि ॥१३२३॥

This so far talked about (*seyam*) association of the Ātman with another (viz. the non-Ātman) gets established by the absence of proper thought (reasoning); this is (indeed) supported on the basis (lit. lap) of sentience which is not known¹; (and) this is not (supported) by the real object. [1323]

¹It means: before the proper knowledge of it has arisen from the understanding of the Śruti.

अविद्याद्वारिकाप्यस्य संगतिर्नाञ्जसेष्यते ।
निरात्मकपरार्थत्वहेतुभ्यां शुक्तिरूप्यवत् ॥१३२४॥

And even the association of this (Ātman with the non-Ātman), though (understood) through ignorance, does not follow smoothly because (it is like the association) of a shell and silver¹ for two reasons, viz. (i)that it does not have any essence² and (ii)that it exists for the benefit of another.³

[1324]

¹This use of suffix *vat* after *śuktirūpya* is according to Pāṇini Sūtra 5.1.116: *tatra tasyeva*.

²It means: the character of a real thing.

³Like Prakṛti, every non-Ātman is *parārtha* as in the Sāṃkhya view.

प्रत्यग्रपातिरेकेण नान्यद्रूपमनात्मनः ।
वादिभिर्युक्तिभिः शक्यं क्वचित्साधयितुं सदा ॥१३२५॥

It is not at all possible for the opponents ever to establish with reasons that the non-Ātman has a form beside that of the inner self. [1325]

This is to explain the idea of *nirātmakatva* of the preceding verse.

कूटस्थादितमोन्तेन नित्यमव्यतिरेकतः ।
बुद्ध्यदेर्विषयान्तस्य नित्यमेतदतो जगत् ॥१३२६॥

Therefore, owing to its being non-different (*avyatirekataḥ*) from the immutable, the beginning (of all) and (the one) ending with ignorance, is eternal this transmigratory world, beginning with intellect and ending with the object(s). [1326]

This is to explain the Śruti *sad eva soṃyedam agra āsīt*; for justifying the pseudo-identity of the Reality and the world.

अतो ऽविद्यामहानिद्रासंवीतमनसामसौ ।
जन्मादिविक्रियाषट्कं स्वप्नदर्शनविभ्रमः ॥१३२७॥

For this reason, there is on the part of persons whose mind is wrapped up in deep sleep of ignorance, that error, viz. seeing dreams, consisting in six modifications beginning with the birth¹. [1327]

¹Cf. BSB 1.1.2. This refers to what Yāska has said about six *bhāvavikāras* (*Nirukta* 1.2).

यथा व्याख्यातबाह्यार्थप्रधानो ऽसंहतो ऽप्रमः ।
सर्वप्रमाणभाक्तद्वत्प्रमाणाभासभागपि ॥१३२८॥

As an individual, since he attaches¹ significance to all eternal objects, is not connected (with Reality/Ātman) (and) is without proper knowledge, experiences (i.e. uses) all the means of knowing; so (does he experience) the semblance of the means of knowledge (as well). [1328]

The NKL edition uses *yathāvyākhyātabāhyārthapradhānaḥ* as one word. Translation follows the AnSS edition: *yathā* and *vyākhyāta-* as two words.

¹It literally means: explains.

अविचारितसंसिद्धि तमोवत्स्यात्तदुद्भवम् ।
कृत्स्नं जगदतो मोहध्वस्तौ ध्वस्तं भवेच्चित्तिः ॥१३२९॥

Therefore, the entire transmigratory world is (lit. would be) like ignorance established in the absence of thought (reasoning), produced as it is from it (=ignorance). Therefore, when ignorance is destroyed the entire world would be destroyed and (become) knowledge. [1329]

¹Cf. SP: *jñānād ajñānadhvastau tajjatvād dhvastam jagac citir eva syād ity arthaḥ*.

भिन्नमातृप्रमाणादौ कार्यकारणवस्तुनि ।
अभिन्नमातृमानादिरात्मैवैको ऽद्वयः स्वतः ॥१३३०॥

While the things¹ are differentiated as the effects and the causes, viz. as various knowers and the means of knowing etc., only the Ātman, one without duality, is by its nature one that is not differentiated as knowers, the means of knowing etc. [1330]

¹In the text *vastuni* is *jātāv ekavacanam*; things refer to the world.

न देशकालावस्थादावपेक्षास्त्यात्मनः स्वतः ।
अनन्यापेक्षसंसिद्धेर्देशादेस्तदपेक्षतः ॥१३३१॥

On the part of the Ātman itself, there is not any dependence on region, time, condition etc.¹ since it is not established through dependence on any other (thing), whereas the region etc. depend on the same². [1331]

¹The word etc. stands for the producer and that which informs one of it.

²*tat* refers to *anya*.

देशकालनिमित्तादिव्यपेक्षं वस्तु यद्ववेत् ।
तदेव तदपेक्षं स्यान्न तु देशादिसिद्धिदम् ॥१३३२॥

Whatever thing would be (lit. is) dependent on region, time, condition etc.¹, would expect that² and (*tu*) it does not give rise to region etc. [1332]

¹See note 1 on the preceding verse.

²It refers to *deśakālādi*.

प्रमात्राद्युत्थितेरग्रे ब्रह्मैवासीद्यथोदितम् ।
यतस्ततो न साध्यं तज्ज्ञानकर्मादिसाधनैः ॥१३३३॥

Since, before the rise of (the notions) such as the knower etc.¹, there was only the Brahman in the beginning, as stated earlier, therefore, it is not what is to be accomplished by such means as knowledge, activity etc. [1333]

¹SP explains that by *ādi* is understood the intention of producing something (*bhāvanā*).

ब्रह्मापि तत्स्वतः साक्षात्तदबोधैकहेतुतः ।
इदंरूपं समापेदे रशनेवाहिरूपताम् ॥१३३४॥

And even that Brahman, on its own, transformed itself (into the form of this (transmigratory world) owing only to not-knowing about itself, like a girdle changes into the form of a serpent. [1334]

Such occurrence is due to ignorance on the part of a worldly knower.

अविद्याफलकारूढं तदेवंरूपकं परम् ।
ब्रह्म विद्याधिकारित्वं द्वैविध्यात्प्रतिपद्यते ॥१३३५॥

That highest (Brahman, when it has) mounted on the raft (in the form) of ignorance², comes to have (i.e. assumes) such forms¹, attains eligibility for (receiving) instruction³ because of its (assumed) dual nature.⁴ [1335]

¹The use of the compound *evam-rūpakam* refers to *rūpaka* in the contemporary world of drama.

²It is explained in the note on the preceding verse.

³It is the Śāstric instruction regarding the Brahman.

⁴See the next verse for the explanation of this.

स्वतो मुक्तं यतस्तस्माद्ब्रह्म विद्याम् तदर्हति ।
संसारित्वमविद्यातो मुमुक्षुत्वं ततो भवेत् ॥१३३६॥

Since it is by its very nature free¹, that Brahman is eligible for (receiving) that instruction. The state of transmigratory existence (in the case of the Brahman) is owing to ignorance (and), for that reason, there would arise a desire to be liberated. [1336]

The word *dvaividhya* used in verse 1335 is explained in the second half of this verse.

¹That is, in the state of release.

Up to the end of verse 1336 Sureśvara has explained the sentence 'brahmevedam agra āsīt' in BU. And now follows the explanation of the word *tat* in the subsequent sentence.

अध्यात्ममधिभूतं च तथा चैवाधिदैवतम् ।
परं तदभिमानेद्धं तच्छब्देनाभिधीयते ॥१३३७॥

That highest (Brahman), which is inflamed (i.e. affected) by Ego with reference to what is existing in bodies, what in elements, and what in deities, is expressed by the word *tat*. [1337]

हिरण्यगर्भतां नीत्वा कृत्स्नमध्यात्मरूपकम् ।
तस्मै हिरण्यगर्भाय ब्रूयाद्विद्यां तमस्विने ॥१३३८॥

Having led the entire (world) of forms in the bodies to the status of Hiranyagarbha, let one¹ declare that instruction² to that Hiranyagarbha who is wrapped by ignorance. [1338]

This has a reference to the earlier portions of BU talking about Hiranyagarbha existing in every individual sacrificer. Sureśvara has already referred to the *sūtrānta jagat* in verse 1317 above.

¹This refers to the knower of the Brahman.

²Regarding the nature of the Brahman.

एवं निःशेषसंसारप्रत्याख्यानेन निर्वृतिम् ।
सर्वाविद्यापनिहृत्या विद्यया प्रतिपद्यते ॥१३३९॥

Thus, one obtains the highest delight by discarding (the notion) of the entire transmigratory existence, and by (acquiring) the instruction which effects destruction (lit. concealment) of all ignorance. [1339]

आत्मानात्मात्मकं विश्वं प्रत्यक्षादिप्रमाणकम् ।
आत्मानमेव तदवेन्निष्ठां कात्स्नर्यात्मनः पराम् ॥१३४०॥

That (Brahman) knew (this) world consisting of Ātman and non-Ātman objects having for it the direct perception and other means, i.e. in fact itself, the highest basis of its nature of totality. [1340]

This explains the meaning of the sentence *tad ātmānam avet*. It is the Brahman which receives the instruction as said before and comes to realise only itself as the basis of all supposed duality.

अविचारितसंसिद्धि सर्वानर्थैककारणम् ।
 प्रत्यङ्मात्रैकसाक्षित्वात्तमस्तत्प्रत्यगात्मनि ॥१३४१॥
 प्रतीच्येव यतो ऽज्ञानमतस्तत्त्वविद्यया ।
 सकार्ये तमसि ध्वस्त आत्मैवैको ऽवशिष्यते ॥१३४२॥

Ignorance (lit. darkness) on the part of the inner self has got established (only) in the absence of thought (and) has been the sole cause of all undesirable effects, on account of its being experienced only by the inner self. [1341]

Since, ignorance rests only in the inner self, therefore, by knowing the true nature of that, there remains only the Ātman, when ignorance together with its effects, is destroyed. [1342]

विरक्तः सर्वसंसारान्निविवृत्सुः स्वतस्ततः ।
 संसारानलसंतप्तस्तद्विरुद्धं परीप्सति ॥१३४३॥

That individual, who has turned averse to all transmigratory existence, himself desiring to withdraw¹ from that (and) then tormented by the fire of the transmigratory existence, wishes to embrace fully what is opposed to that¹. [1343]

The metaphorical expression *samsārānalasamtaptaḥ* forces the use of embracing what is cool in opposition to the fire of transmigratory existence.

¹The word 'that' in both the cases refers to 'transmigratory existence'.

तस्याकृत्स्नापवादेन कृत्स्नैकात्म्यावबुद्धये ॥१३४४॥
 अन्वयव्यतिरेकाख्यो व्यापारो विहितः पुरा ।
 आत्मेत्येवेति विधिना पराक्प्रत्यग्विवेककृत् ॥१३४५॥

(Therefore), in order that the complete uniqueness of the Ātman is understood by explaining away (i.e. disproving) the incompleteness of that (transmigratory existence), [1344]

the Śruti has earlier made an effort¹, called (adoption of the method of) Anvaya and Vyatireka in the statement (lit. injunction) *ātmety eva* which makes difference between what is outside and what is within.² [1345]

¹It literally means: activity.

²This refers to the Brahman and the inner self.

ऐकात्म्यं वीक्ष्यते तेन त्यक्त्वा सर्वाननात्मनः ।
कृत्स्नमेव यतो वस्तु तदन्यत्तदबोधजम् ॥१३४६॥

Thereby is expressed (lit. seen) by one the uniqueness of the Ātman, after one has abandoned all non-Ātman (objects); for, Reality is one whole thing and anything else than that is (but) the product of the absence of knowledge. [1346]

¹The word *tena* refers to *vyāpāra* in the preceding verse.

कृत्स्नं पश्येदिति ततो वाक्यं वस्तुनि वर्तते ।
प्रविष्टो ऽकृत्स्नरूपत्वात्संसारानर्थचोदितः ।
आत्मेत्यनेन कृत्स्नात्मदर्शनाय नियुज्यते ॥१३४७॥

For that reason, the sentence 'He should see the whole.' has reference to the real thing¹ (and) the one that has entered into it and (therefore) is urged by the undesirable effects of the transmigratory existence, and, as such, on account of its own incomplete/defective form enjoined on one to be seen as the complete Ātman (viz. the Brahman) in (the sentence) *ātmetyeva* ... [1347]

This explains the *vyākṛtāvyākṛta* forms of the Brahman, or, in other words, *dvaividhya* of the Brahman mentioned in verse 1335 above.

¹Locative case is objective in sense (*viśayasaptamī*).

कृत्स्न आत्मेत्यतो वाक्यात्तथारूपं दिदृक्षति ।
अन्योन्यार्थसमाप्तित्वान्न भेदो ऽत्र पदार्थयोः ॥१३४८॥

Therefore, from the sentence *kṛtsna ātmā*,¹ an individual becomes desirous to see (the Ātman) of that nature; there is no difference between the two things,² since they satisfy the need of each other. [1348]

¹BU 4.5.13.

²These refer to the Ātman, i.e. the inner self and the Brahman, the highest Reality.

अकृत्स्नानात्मनः सर्वान्कृत्स्नांश्चानात्मनस्तथा ।
अन्वयव्यतिरेकाभ्यां तथा कृत्स्नानात्मनः ॥१३४९॥
निर्माल्यवत्परित्यज्य चैतन्याभासवर्त्मना ।
अनुमीयात्मनात्मानं कृत्स्नात्मानं प्रपश्यति ॥१३५०॥

Then, accordingly (*tathā*), an individual, (having first made between) all incomplete Ātmans¹ and all complete non-Ātmans by (adopting) the method of Anvaya and Vyatireka and then, [1349]

having abandoned all incomplete non-Ātmans like once-used-flowers, and then, following the path (shown by) the flash of sentience², thereby pleasing the Ātman (viz. Brahman) himself, finally sees himself (as) the full Ātman (viz. Brahman). [1350]

¹This refers to the individual selves.

²This refers to *prāṇopāsanā*.

उक्तदोषापनुत्त्यर्थं प्रत्युक्तिर्गौरवी त्वियम् ।
ब्रह्म वा इदमित्यादिर्नातो दोषो ऽत्र कश्चन ॥१३५१॥

[Verses 1351-1364 are an exposition of *tad ātmānam evāvet*.]

The weighty answer (of the Śruti)¹ which begins with the words *brahma vā idam* is (intended) for the removal of the fault stated (in the introductory) and, therefore, there is not any fault in this (statement) whatever. [1351]

¹This can be alternatively translated as: the teacher's statement —

this on the basis of a footnote by the editor of NKL. But the reply-sentence is: *brahma vā idam agra āsīt, tad ātmānam evāvet, aham brahmāsmīti, tasmāt tat sarvam abhavat.*

प्रमेयं यत्पुरा पृष्टं तद्ब्रह्म किमवेदिति ।
सर्वं चाप्यभवद्यस्माज्ज्ञानं ज्ञेयं च भण्यते ॥१३५२॥

In the question, 'What did the Brahman know?,' the subject (matter) of the discussion was first sought and in the statement 'And it became all.' is stated what is knowledge and the means of knowing (it). [1352]

तद्ब्रह्मात्मानमेवावेन्मेयं मानं च भण्यते ।
आत्मा मेयस्तथा मानमात्मप्रत्यय एव तु ॥१३५३॥

In the statement 'That Brahman knew only itself.', there are stated both the object of knowing and the (actual) knowledge. The Ātman is thus the object of knowing and the means of knowing is the awareness of the Ātman within. [1353]

नात्मज्ञानाद्यतो ऽज्ञानं विद्यते ऽनात्मनस्ततः ।
नात्मयाथात्म्यविज्ञानाज्ज्ञानमन्यदनात्मनः ॥१३५४॥

Since ignorance does not continue to be there on the part of a non-Ātman, after the knowledge of the Ātman has occurred to it, therefore, there is no knowledge for the non-Ātman other than the knowledge about the true nature of the Ātman (viz. Brahman). [1354]

This implies that a non-Ātman cannot exist apart from the Ātman.

प्रमात्रादिविभागेन यज्ज्ञानं प्रथते क्वचित् ।
तज्जन्मनः पुरेवार्थो न तेन ज्ञायते ऽज्जसा ॥१३५५॥

Whatever and wherever occurs (some) knowledge as divisible into the knower etc.,¹ even before the rise of that, the real object (has existed) and therefore it is not smoothly known by that (knowledge²). [1355]

¹This refers to knowledge and the means and the object of knowing.

²Namely, that which is mentioned in the first part of the verse.

तमोमात्रावसायित्वान्न यथावस्तु तत्ततः ।
प्रत्यग्वस्तवात्मकत्वे ऽपि चित्रमज्ञानचेष्टितम् ॥१३५६॥

Since that (knowledge¹) culminates into ignorance alone, it is not in accordance with the real thing; and, even if it is of the nature of the inner self, it is indeed the wonderful doing or effect of ignorance!

[1356]

¹Which is referred to in the preceding verse.

यत्प्रसादात्तमःसिद्धिस्तत्स्वसाक्ष्यप्यपहृते ।
तमो ऽप्यनुभवादेव प्राक्तद्व्युत्पत्तिजन्मनः ॥१३५७॥

That (knowledge¹), viz. its (own) witness (or seer) through whose favour (i.e. help) is ignorance (lit. darkness) established,² conceals even that; ignorance also results from (one's) experience and it occurs before the rise of the knowledge³ of that.

[1357]

This verse explains the power of darkness in concealing the nature of the inner self: (i)the experience of a worldly being and (ii)the knowledge of its true nature.

¹That which is mentioned in verse 1355 above.

²That is, becomes known; not through experience.

³The word *vyutpatti* means knowledge coming from instruction that is based on *mānameya* relation . Ignorance prevailed before *mānavyāpāra*.

प्राक्प्रवृत्तेः प्रमाणानामज्ञातं यदिहोदितम् ।
अक्षादि तत्तमोबाधान्न मानं रज्जुसर्पवत् ॥१३५८॥

Whatever is mentioned as sense-organs etc. was not known before the activity of the various means of knowing on account

of the obstruction by darkness¹ — (and) that² is not therefore the (correct/right) means of knowing like a serpent in (the knowing of) a rope. [1358]

¹That is, ignorance.

²It refers to *akṣādipramāṇa*.

न पश्यन्तीत्यतः प्राह बोद्धृत्वादिसमन्वयम् ।
न हि मोहैकनिष्ठेन तद्धीनं वस्तु मीयते ॥१३५९॥

Therefore, in the (sentence) *na taṁ paśyanti* the Śruti has declared the connection (of the Ātman) with the capacity of a knower etc.¹ Indeed, one who is given to² ignorance cannot see what is devoid of that³. [1359]

The verse explains the meaning of Śruti *taṁ na paśyanti* in BU 1.4.7.

¹The notion of this and others like, the object of knowing, the means of knowing etc. are based on ignorance.

²It means: overpowered by.

³Namely, the thing not wrapped up in ignorance, or Reality.

आत्मानं विरहय्यान्यो नालमात्मावबुद्धये ।
असाधारणतन्मातृमानमेयात्मकत्वतः ॥१३६०॥

A person (lit. Another, viz. a non-Ātman) is not able to grasp (the nature of) the Ātman by keeping the Ātman aside,¹ since (the Ātman) is of the unique nature of (the unity of) the ensemble, viz. the knower, the means of knowing and the object of knowing. [1360]

¹That is, by being *mohaikaniṣṭha* as said in the preceding verse, or not having received the favour of the Ātman.

असाधारणमात्रादि प्रत्यग्वस्तु यतस्ततः ।
नियोगो ऽपीह नायाति भिन्नकर्त्रीदिगो ह्यसौ ॥१३६१॥

Since the real thing, viz. the inner self, is (itself) the unique

(unity of the) knower etc.¹, therefore, here (i.e. in the case of this one, viz. the inner self) there cannot occur any injunction also for the reason that (injunction) has a reference to diverse (things) such as the agent etc. [1361]

¹As said in the preceding verse.

सर्वमज्ञातमेव स्याद्यस्मिन्नज्ञात आत्मनि ।
ज्ञाते ज्ञातं च तत्कात्स्न्योत्तावत्त्वात्सर्ववस्तुनः ॥१३६२॥

On account of all the objects forming a wholeness of that and being only of the dimension of that¹, all would remain unknown indeed (*hi*) if this Ātman (the inner self) remained unknown and (it would be) known when that (latter) was known. [1362]

¹That is, if we talk in terms of dimension and variety.

युक्त्या निरूप्यमाणस्य ह्यात्मा तत्त्वमनात्मनः ।
प्रत्याख्यातः स चेत्तेन क्वानात्मा सिद्ध्यतां ततः ॥१३६३॥

Indeed the Ātman is (known as) the truth (underlying) the non-Ātman when it is carefully observed with reason; (and) if that (Ātman) is discarded by that¹, on what basis can the non-Ātman get established? [1363]

¹It refers to the non-Ātman. Cf. *ātmānam virahayya* in verse 1360 above.

अनात्मतत्त्वमन्वेति ह्यात्मासङ्गो ऽगुणो ऽद्वयः ।
असिद्ध्यन्स स्वतःसिद्धौ सिद्धिं क्वान्यत्र लप्स्यते ॥१३६४॥

Indeed the Ātman, not-attached (to anything else), not having any qualities, and not having any duality, runs through¹ the nature of the non-Ātman (objects); (that same Ātman), not itself getting established, (i.e. unless it has existed) on which other basis does it get established? [1364]

¹It literally means: is associated with (all); i.e. is really the basis of all the world — this is because of *avidyā/māyā*/ignorance.

Verses 1365-1415 discuss 'anubhava' i.e. experience as a unique means of knowing Reality, a means undisputed by even mutually disputing theorists. Also, about their argument on that the beginningless ignorance is removed by knowledge (of Reality).

सर्ववादिविरोधे ऽपि संवादो ऽनुभवे यथा ।
वादिनामविसंवादस्तथाज्ञाने ऽप्यसंशयः ॥१३६५॥

And as there is concord among all the different exponents of theories in respect of experience, even while there exists opposition among themselves; so also is there absence of any discord among these opponents (lit. variously arguing persons) in respect of ignorance — there is not any doubt about this.

[1365]

तद्वद्बाधो ऽप्यबोधस्य बोधेनाभ्युपगम्यते ।
एतावतैव पर्याप्तमस्मद्राद्धान्तसिद्धये ॥१३६६॥

In the same way, it is accepted (by all of them) that the absence of knowledge (i.e. ignorance about Reality) is removed by knowing (the real object of knowing). This much (about the method of argument among debaters) would be (i.e. is) sufficient for establishing our doctrine.

[1366]

अस्मद्राद्धान्तसंसिद्धौ नान्यद्राद्धान्तसिद्धता ।
तत्सिद्धावस्य संसिद्धिर्न कथंचिन्निवार्यते ॥१३६७॥

When our doctrine is established there cannot be the establishment of the doctrine of another. And, even if the other's doctrine is established (we point out) the establishing of this (i.e. doctrine) can in no way be avoided.¹

[1367]

¹This is because the opponent also has to accept Jñāna as a *pramāṇa* or proof for his doctrine. And Jñāna is the nature of the Ātman, in our view. Therefore, our view is automatically proved.

अज्ञानं संशयज्ञानं मिथ्याज्ञानमिति त्रिकम् ।

अज्ञानं कारणं तत्र कार्यत्वं परिशिष्टयोः ॥१३६८॥

Absence of knowledge, knowing the doubt, and false knowledge are the triad (which characterizes other doctrines¹); among those three (*tatra*), the absence of knowledge is the cause, whereas the remaining two are of the nature of the effect (of the first). [1368]

This points to the importance of Jñāna in every doctrine; particularly in Vedānta.

¹We understand this from SP: *pratyagajñānavijṛmbhitāḥ sarve parasiddhāntā aprāmāṇikabhedāśrayatvād atas teṣāṃ bhrāntatvam iti bhāvah.*

कूटस्थज्ञानमात्रत्वान्न तमो ऽस्य स्वभावतः ।

नाप्यागन्तु तथाज्ञानं हिरुक्सिद्धेरसंभवात् ॥१३६९॥

This one (i.e. the inner self) does not, by its nature, have darkness¹, since it is only (of the nature of the) immutable knowledge. So also, ignorance cannot come to it, because there is no possibility of its existence apart from it.² [1369]

¹That is, ignorance associated with it.

²Ignorance has a basis in *avidyā* of the Ātman; it cannot be any characteristic of the same. Nor can it be a distinct entity.

अविद्यातज्जकार्याणामात्मना संगतिस्ततः ।

आत्मात्मवत्त्वरूपा स्यान्न तु सोभयकर्मजा ॥१३७०॥

For that reason,¹ the association of ignorance and the effects produced by it with the Ātman is only of the nature of the Ātman and what has (i.e. is possessed of) the Ātman; but it does not result from the activity of the two (Ātman and ignorance) together. [1370]

¹This is *tataḥ* = *nāvidyātirekeṇa* 'not apart from *avidyā*' (SP).

एकमेव हि सद्बस्तु यद्वेदान्तप्रमाणकम् ।
 तावन्मात्रैकनिष्ठत्वादात्मज्ञानं सदास्पदम् ॥१३७१॥
 सर्ववादिविरोधे ऽपि यत्तिसद्धान्तबलाश्रयम् ।
 साधनं दूषणं सर्वं न तन्निहुतिरिष्यते ॥१३७२॥

The existent thing which is known from Vedānta is but unique¹ (and therefore) the knowledge of the Ātman, supported as it is only by it (viz. the Ātman), has an abode in that existent, [1371]

even while there is opposition among all the opponents, that, on the strength of whose doctrine all the means (of knowledge) are seen as fault, cannot be denied (lit. concealed). [1372]

The verses convey that Jñāna cannot be unreal.

¹Or, all alone.

साधनं दूषणं सर्वं यस्य पादव्यपाश्रयात् ।
 सिद्धायते तीर्थदृशां कुतः स्यात्तस्य निहुतिः ॥१३७३॥

How can there be the concealment of that (means of knowing) by resorting to whose strength (lit. feet) all the means of knowing are proved as false for them who see the adorable (i.e. Reality)? [1373]

This is directed against the Śūnyavādin, who denies even the existence of experience.

अभावो येन भावेन भाव्यते ऽस्ति न नास्ति सः ।
 तस्य भावस्य सद्भावो वद केन निवार्यते ॥१३७४॥

That one exists and it is not that that does not exist — that (i.e. experience) on account of whose existence the absence of another (i.e. unreal) is understood. Tell me, 'Who can ward away the existential character of that existence?' [1374]

व्यभिचारि न यत्रास्ति प्रमाणं सर्ववादिनाम् ।
 स्वमहिम्ना च यत्तिसद्द्वं तदपह्नयते कथम् ॥१३७५॥

That, in respect of which there is not any contradictory means of knowing¹ (even) in (the opinion of) all disputants, and that which has existed (*siddham*), on its own strength — how can that be concealed (i.e. denied)? [1375]

The argument is: No one can deny *anubhava* as an authoritative means of knowing.

¹This stands for argument.

तस्यैवाव्यभिचाद्रित्वात्सर्वेषु व्यभिचारिषु ।
तदेवैकं प्रमाणं नः सर्ववाद्यविरोधि यत् ॥१३७६॥

Only that is for us (an authoritative) means of knowing (Reality) which, amongst all the disputants, is not disputed, namely that which has an invariable character¹ among all the variable means of knowing. [1376]

Sureśvara points out that (this indicates the Ātman, the experiencer — not distinct from experience) is accepted for *anubhava* 'experience' its greatness as an existent among all the changing forms etc.; it is not denied to be so existing and therefore is an authoritative means for establishing Reality and its nature.

¹That which invariably exists.

देहादावात्मबुद्धिर्नो न कदाचिद्विहन्यते ।
जाग्रत्स्वप्नसुषुप्तेषु शक्तिकारजतादिवत् ॥१३७७॥

In respect of the body etc., our awareness of the existence of the Ātman is not lost (lit. struck down) any time — (it continues to be there) in (all) the (states of) waking, dream and deep sleep, in the same way as the notion of silver in a conch-shell. [1377]

The word *dehādi* has reference to the next verse. The instance of silver in a conch-shell emphasises the effect of ignorance or *avidyā* and *tajja*. Thereby is indicated the false identification of body etc. with the Ātman/inner self.

देहान्तात्कर्तुरन्यो यो बुद्ध्यन्ताद्बोद्धुरेव च ।

प्राणान्तात्करणाच्चान्यः प्रत्यग्दृष्ट्या य ईक्ष्यते ॥१३७८॥

He¹ is understood as the inner self, who is other than the agent of the body etc.², so also from the knower, viz. intellect etc., and yet again from various operative organs ending with *prāṇa*. [1378]

Sureśvara mentions three different opponents though he has not mentioned them specifically. In the preceding verse also, he has vaguely referred to them and emphasised that the awareness of the existence of the inner self is acceptable even to them. The three opponents are: the followers of the Cārvāka, the Mīmāṃsakas and those devoted to Hiranyagarbha. (NKL refers to one called Gārgya.)

¹The use of 'He' is implied in the verse, for the verse uses *yaḥ*; on this SP and NKL rightly observe, one *yaḥ* stands for *sa*—we take the last to be that.

²It shows the nature of man who holds intellect, Ego and *manas* as identical with the Ātman. SP points to that the body, the sense-organs and *manas* are understood by *dehānta*. (This, we can say, is the view of Cārvākas.) *buddhyanta* indicates the function of *ahamkāra* also. And finally, *prāṇa* shows connection with Hiranyagarbha. Cf. NKL for this explanation.

अदेहतो ऽजरो ऽमृत्युरस्वान्तो ऽमोहशोकवान् ।

अबुभुक्षो ऽपिपासश्च प्राणकारणवर्जनात् ॥१३७९॥

Since it does not have a body¹, it never ages, it never dies, it never has any inner parts for itself, it never has infatuation and grief, it never has hunger (lit. desire to eat), it never has thirst (lit. desire to drink), never devoid as it is of the causes (of these, viz.) *prāṇa* (etc.) [1379]

¹*dehataḥ* = *adehavattvataḥ*.

अहीनो हीयते यो ऽसौ तथानागत एति यः ।

जानीयात्तमनात्मानं जाग्रत्स्वप्नसुषुप्तिषु ॥१३८०॥

One should know that as non-Ātman who, though not abandoned (in reality), is abandoned and also, though not coming, does come — in (the states of) waking, dream and deep sleep. [1380]

न हीयते हीयमान आगच्छति न चैति यः ।
आगमापायसाक्षित्वादात्मा सो ऽनुभवाश्रयात् ॥१३८१॥

(And) that is the Ātman which is not abandoned though being abandoned, which does not come and does not go, and has the nature of being the witness of coming in and going out (of the body etc.) — this is so on the basis of experience. [1381]

नाविद्यामनुपादाय प्रत्यक्कारकतां व्रजेत् ।
नाकारकः क्रियां कर्तुमलं जगति वीक्ष्यते ॥१३८२॥

(Indeed) the inner self does not become the agent (of any action) unless it has taken recourse to ignorance¹. Nowhere in the world is noticed a non-agent to be capable of doing any act². [1382]

¹The inner self is taken to be the agent of actions because of ignorance, as said earlier.

²This *vaidharmyadr̥ṣṭānta* 'example of opposite nature' is given with a view to pointing out that the Ātman does not in reality undertake any activity and, therefore, in the world no activity can be attributed to it. If it is so done, it is wrongly done!

द्रष्टुर्दृष्ट्या न चानाप्तो ऽनात्मा कश्चित्प्रसिद्ध्यति ।
मिथ्याज्ञानमतो ऽनात्मा ह्यात्माज्ञानसमुत्थितेः ॥१३८३॥

No non-Ātman whatever gets established, nor is it seen as it is by the sight of the seer. Therefore, seeing (i.e. accepting) (that there is) the non-Ātman is only false knowledge and that has arisen from ignorance about the (true nature) of the

Ātman.

[1383]

नाविद्यामनुपादाय जाग्रत्स्वप्नसुषुप्तिषु ।
अनात्मानं विजानाति तज्जज्ञात्राद्यनन्वयात् ॥१३८४॥

One does not know (any) non-Ātman in (the states of) waking, dream and deep sleep, unless one has taken recourse to¹ ignorance, for there is, in reality, no connection of one with the knower etc. which are products of that (viz. ignorance).

[1384]

¹That is, one is overpowered by.

न च ज्ञात्रनुरोधिन्या दृष्ट्याज्ञानासमन्वितम् ।
आत्मात्मानमलं द्रष्टुं रूपं श्रोत्रधिया यथा ॥१३८५॥

And the Ātman is not able to see, with a sight which follows (the notion of) a knower etc., the non-Ātman which is associated with ignorance, in the same way as one cannot see a form with an ear or intellect.¹

[1385]

For any seeing etc., which is a worldly experience, one requires an eye etc. This means that there must be association of the Ātman and the non-Ātman through ignorance — only then a proper mechanism of seeing etc. obtains. If such mechanism is wanting any seeing etc. does not become possible. Now, the Ātman has no such mechanism, this is reality; therefore, it cannot see any non-Ātman. For clarifying this, an example is given in the last line. An ear and intellect are not the proper means of seeing an object. Since the Ātman is not overpowered by *avidyā*, it is unable to see the non-Ātman.

¹*śrotradhiyā* is an optional Dvandva compound, meaning *śrotena dhiyā vā*.

उत्सार्यानात्मनः सर्वानन्वयव्यतिरेकतः ।
प्रत्यक्प्रधानया दृष्ट्या पश्येदात्मानमद्वयम् ॥१३८६॥

(Therefore) having set aside all the non-Ātman (objects) by

adopting (the method of) Anvaya and Vyatireka, and holding a proper view of the inner self, one should see the Ātman which is without any duality. [1386]

त्वं ब्रह्मेति गुरोर्वाक्यात्तन्निविष्टपदार्थयोः ।
उक्तान्वयादिनोत्पन्नविवेकः सन्नबुध्यत ॥१३८७॥

On hearing the preceptor's instruction *tvam brahma*, one, who had acquired discrimination between the two objects conveyed by the words mentioned in the instruction by (the method of) Anvaya and Vyatireka as stated earlier, became awakened (to Reality). [1387]

This reference is perhaps to Śvetaketu who learnt from Āruṇi the lore of the Brahman in the words *tat tvam asi*. Yet, by replacing the imperfect tense by the present, one could make this verse a general statement.

तद्ब्रह्मात्मानमेवावेद्यदनात्मेत्यभूत्पुरा ।
अविद्यया विद्यया तु ब्रह्मात्मैवाभवत्स्वतः ॥१३८८॥

That Brahman, which had formerly become a non-Ātman (as it were),¹ knew only itself. By *avidyā* and knowledge the Brahman itself became the Ātman.² [1388]

¹This is the force of *iti*.

²Cf. *Muṇḍakopaniṣad* 7.9: *vidyām ca avidyām ca ...*

एवेत्यवधृतौ ज्ञेयं ब्रह्मात्मार्थविशेषणम् ।
आत्मैव ब्रह्म विज्ञेयं ब्रह्मैवात्मेति संभवात् ॥१३८९॥

The word *eva* is to be understood in the sense of specification; (and) *brahman* as an attribute of the object, viz. of the Ātman, for it is possible to accept only the Ātman itself as the Brahman and only the Brahman itself as the Ātman. [1389]

ब्रह्मता नात्मनो ऽन्यत्र नात्मता ब्रह्मणो ऽन्यतः ।
तद्याथात्म्याप्रबोधात्तु तयोरेष विपर्ययः ॥१३९०॥

The character of the Brahman does not obtain elsewhere than in the Ātman; so also, the character of the Ātman does not obtain elsewhere than in the Brahman. But this differentiation between them (in language) is owing (only) to the non-knowing of the real nature of the two. [1390]

आत्मापि साक्षात्तद्ब्रह्म परोक्षं तदबोधतः ।
ब्रह्मैव तद्वदात्मापि सद्वितीयवदीक्ष्यते ॥१३९१॥

Also the Ātman is the Brahman itself and it is imperceptible on account of the absence of knowledge (about its true nature). In the same way, the Brahman itself is the Ātman and is yet seen to be having a second as it were. [1391]

वाक्योत्थसम्यग्विज्ञानप्रध्वस्ततमसो यतेः ।
विभागहेतोरच्छित्तेः सर्वमात्मैव शिष्यते ॥१३९२॥

All (this world) remains only as the Brahman for a person, who has renounced, (and) who has his ignorance destroyed by the right knowledge which arose from the Śruti statement, since there is the removal of the cause of the division (of the non-Ātman and the Ātman). [1392]

This conveys that even one who has renounced worldly connections gets to know about the Brahman from the Śruti.

विज्ञातारमरे केन विजानीयादिति श्रुतेः ।
ननु विप्रतिषिद्धार्थं तदात्मानमितीर्यते ॥१३९३॥

(Now an objection is raised:) On the basis of the Śruti *vijñātāram are kena vijānīyāt*,¹ the statement *tad ātmānam* ...² is stated indeed contrarily (to the earlier Śruti). [1393]

¹BU 2.4.14.

²BU 1.4.10.

दृष्टेर्द्रष्टेति विज्ञानान्नात्र विप्रतिषिद्धता ।

प्रत्यग्बुद्धिः प्रमात्रादौ सर्वत्रैवोपजायते ॥१३९४॥

(The answer is:) Here there is no contrariety on account of the knowledge (imparted by the Śruti in) *drṣter draṣṭā*,¹ (for) awareness of the inner self in respect of the knower etc. does arise everywhere. [1394]

¹Cp. BU 3.4.2: *na drṣter draṣṭāraṃ paśyeh*.

युष्मदस्मद्विभागाभ्यां यावद्वस्तिवह मीयते ।
तेन तेन विशेषेण प्रत्यगर्थः प्रतीयते ॥१३९५॥

Whatever be the things (here) known as divided in classes (marked by the awareness of) *yusmat* and *asmāt*, by each one (of them as) an attribute becomes known the inner self. [1395]

This refers to every knowledge situation wherein *yusmad-asmadvibhāga* is employed, but all that points to only one thing, viz. the inner self. This is in a way the essence of superimposition so well known from Śaṅkara's writing. *vastu* is *jātāv ekavacanam*.

प्रत्यगर्थमनालिङ्ग्य न परावर्ति जायते ।
विज्ञानं तेन तत्पूर्वं सर्वमन्यत्प्रतीयते ॥१३९६॥

(Verily) knowledge cannot touch¹ the object beyond,² without having referred to (lit. embraced) the object called the inner self. Therefore, everything else (than that) becomes known (only if) preceded by that³. [1396]

¹It literally means: turn to.

²It means: what is outside the body.

³It refers to *vijñāna*.

आब्रह्मास्थाणु चान्वक्षं सर्वेषु व्यभिचारिषु ।
प्रत्ययो ऽव्यभिचार्येकश्चैतन्यप्रतिबिम्बितः ॥१३९७॥

In the case of all the variable (objects), from the Brahman up to a pillar which are directly perceptible¹, only the

knowledge (of them all) which is reflected in the sentience (within) is invariable. [1397]

This refers to the commonly accepted notion about knowledge that every object of knowledge finds a reflection in the sentience within the body of the perceiver.

न च विप्रतिपद्यन्ते वादिनो ऽनुभवात्मनि ।
तत्र चेत्स्याद्विसंवादः केनान्येन चिकित्स्यते ॥१३९८॥

And (whoever may be among) the disputants, they do not hold different views as regards the nature of the experience of one; if they were to dispute about that¹ (also), by what other means could that (Reality) be² to be known? [1398]

¹It refers to *anubhava*.

²Or alternatively, by what other means is that (Reality) sought?

अन्योऽपि योऽत्र कल्प्यः स्यात्सोऽप्यस्मान्नैव भिद्यते ।
सर्वभेदात्मरूपत्वात्कः सन्स्यादात्मना विना ॥१३९९॥

And whosoever other¹ is to be understood as different is also not distinct from this one. Since that one is the nature of all the discrete objects, how can that be existent without the Ātman?² [1399]

¹Any other than the inner self, i.e. the object to be known.

²That is, unless it is one with the Ātman.

प्रत्यगात्मनि विश्वस्य ततो ऽनात्मनि तद्वशात् ।
आविद्वदङ्गनाबालं विश्वसित्यनपेक्षतः ॥१४००॥

Therefore, having depended¹ on the inner self, everyone, from the learned² to a women and to a young one, thereby depends on the non-Ātman, without having any expectation (from it). [1400]

¹That is, having accepted the existence of the Ātman as one

without a second.

²The AnSS edition says *avidvat-* while the NKL edition reads *āvidvat-*. We adopt this latter. The reading in *Bṛhadāraṇyaka-vārtikasāra* 10.38 supports this. The reading in AnSS edition is difficult to explain.

आत्मनैवात्मविज्ञानं ज्ञेयज्ञात्रादिवर्जितम् ।
स्वयमेव फलात्मत्वात्फलं चास्मान्न भिद्यते ॥१४०१॥

Since the knowledge on the part of the inner self (about itself occurs) only on its own and is devoid of (all differences) such as the knower, the object of knowing etc.¹; therefore, that (viz. the knowledge about the nature of the self), being of the nature of the fruit, and the fruit does not differ from this one (viz. Ātman). [1401]

¹The word etc. refers to the sense-organs.

प्रमाणव्यवहारो ऽयं सर्वेषामपि वादिनाम् ।
स्वतो ऽनुभूतनिष्ठः स्यान्न चेत्षष्ठेन्द्रियार्थवत् ॥१४०२॥

Also this dealing (involving various) means of knowing is for all the disputants resting on experience, by its nature; if it were not so, it would have been like the object of the sixth sense¹. [1402]

¹It refers to *manas*, therefore the object of this sense is only imaginary or meaningless. It is not real, and therefore, if a dealing involving various means of knowing were not rooted in one's experience, they also would be imaginary likewise. This stresses the importance of *anubhava*. Cf. Sureśvara's use of *ṣaṣṭhagocara* which (we believe) is a cyptic expression for *ṣaṣṭhendriyārtha*. See our book [Vol.1:1982] p.280.

चैतन्यमात्ररूपो ऽयं सदानस्तमितोदितः ।
अविद्यामस्पृशन्नास्ते निष्क्रियो ऽकारको ऽफलः ॥१४०३॥

This one (viz. the inner self) is of the nature of only sentience.

ever existent (lit. has never arisen), and never disappearing, nor touching ignorance¹ and ever non-active, non-agent, and non-productive and without any fruit. [1403]

¹That is, not being affected by it.

स्वतो ऽसङ्गस्वभावत्वात्खचरादि वियद्यथा ।
नाविद्या नापि तत्कार्यं प्रत्यक्स्थमपि ढौकते ॥१४०४॥

As a bird etc. does not touch¹ the sky, which by its own nature does not have connection with anything else, so also neither ignorance nor its effect, though abiding in the inner self, touches it. [1404]

¹The verb root \sqrt{dhauk} is 'to push/urge'; but here the *Ātmanepada* indicates its meaning of 'touching' without affecting the touched.

स्वतः सेद्धुमशक्तत्वात्खमृते वायुवत्सदा ।
प्रत्याख्यातस्वभावो ऽपि सिद्ध्यतीवाग्रहो दृशौ ॥१४०५॥

Since it cannot get established on its own, like the wind without the sky, ignorance¹ gets, as it were, established² in the seer³ even though its nature is (finally) discarded. [1405]

¹*agrahaḥ sakāryam ajñānam* (SP), ignorance is what is not being received by the *Ātman*.

²That is, seems to be existent.

³That is, in the inner self.

युतिं साधारणात्मा हि यात्यसाधारणात्मभिः ।
अनन्यवृत्तितो नात्मा संसर्गं प्रैत्यनात्मभिः ॥१४०६॥

Indeed, what is of the nature of a common property (of many) gets connected with (other objects or properties), which are objects of different nature, (but) the *Ātman*, which does not have existence elsewhere,¹ does not get connected with the non-*Ātman* objects. [1406]

विभज्यमानो ऽन्येभ्यो हि विशेषो ऽपि प्रसिद्ध्यति ।
एकत्वादात्मनो भेदो द्वयाभावान्न चेष्ट्यते ॥१४०७॥

Further, even an uncommon or a particular property gets established as such when it is distinguished from others; (but) in the case of the Ātman there is only uniqueness¹ and, therefore, in the absence of duality (associated with it), no (such) distinction is or can be accepted. [1407]

¹It alone exists, without a second.

भेदसंसर्गहीनत्वात्पदवाक्यार्थतात्मनः ।
दुःसंभाव्यात आत्मायमात्मनैवानुभूयते ॥१४०८॥

On account of (the Ātman), being devoid of any connection with discrete objects, it is difficult (to accept) that Ātman can be an object which is conveyed by words and sentences¹. Therefore, this Ātman is experienced by itself². [1408]

¹See, for example, *nīlam utpalam* where *nīla* and *utpala* are distinct from each other and therefore they stand in relation of *viśeṣaṇa* and *viśeṣya*; such cannot be the case of the Ātman on one hand and any other thing which is conveyed by some word on the other. In a sense, this entails the next part of the verse.

²We do not convey any particularity or distinction of the Ātman. It is the thing only to be experienced.

यादृगस्य द्वये तत्त्वमात्मनैवानुभूयते ।
निषिद्धाशेषभेदस्य तावदेवात्मसाक्षिकम् ॥१४०९॥

Whatever kind of truth is experienced by the Ātman in respect of its duality¹ — only that much is the object to be witnessed by the Ātman. [1409]

This refers to duality only on the level of words, though, by nature, the inner self and the Self are but one.

¹Namely the inner self and Supreme Self about which all (the

notions of) distinction are negated.

अपास्ताशेषतमसो यत्तत्त्वं प्रत्यगात्मनः ।
तदवच्छिद्यते नालं प्रत्यग्बोधादृते ऽन्यधीः ॥१४१०॥

Whatever be the truth obtaining in the inner self that has given up¹ entire darkness, no knowledge other than the knowledge of (the true nature) of the inner self is capable of grasping it. [1410]

¹That is, discarded.

प्रत्यङ्मात्रेक्षणादात्ममोहतज्जनिराकृतेः ।
असंभवाद्द्वितीयस्य स्यामपूर्वादिमानहम् ॥१४११॥

(Therefore one thinks:) Since there is no possibility for a second (to exist apart from the Ātman), let me be possessed of (the properties) *apūrva* etc. by seeing only the inner self and by removing ignorance about the inner self and also the product of it. [1411]

This verse states the outcome of the knowledge about the inner self which is evoked by the Śruti statement.

व्यपेततमसस्तत्त्वमागमापायसाक्षिणः ।
ज्ञानेन गम्यते साक्षात्तावन्मात्रानुरोधिना ॥१४१२॥

In the case of one whose ignorance is removed (and) who is the witness of the incoming and the outgoing (of trans-migratory objects), the truth becomes known by directly knowing (the inner self) (which) follows only that much (as Reality). [1412]

कालादिप्रविभक्तं सद्यद्ब्रह्माभूदविद्यया ।
तत्प्रत्यक्तत्त्वसंबोधाद्धवस्ते ध्वान्ते ऽन्तरात्मनि ।
आत्मानमेव तद्ब्रह्म ब्रह्मैवात्मेत्यवेच्छुतेः ॥१४१३॥

That existent, the Brahman, which had, through ignorance,

become differentiated by time etc.¹ knew itself to be the Brahman from (the statement in) the Śruti (saying) 'The Brahman itself is the Ātman.', on coming to know the true nature of the inner self, when the darkness in respect of the inner self was destroyed. [1413]

Here is concluded the exposition of the meaning of *tad ātmānam evāvet*.

¹The word etc. refers to *deśa* and other things (*vastvantara*).

अब्रह्मानात्मताहेतौ प्रत्यग्ध्वान्ते निवर्तिते ।
व्यावृत्त्यनुगमाभावात्सर्वं तदभवत्ततः ॥१४१४॥
व्यावृत्त्यनुगमौ यस्माद्द्वितीये सति वस्तुनि ।
दृष्टिमात्रात्मवस्तुत्वात्कार्यकारणवस्तुनः ॥१४१५॥

[Verses 1414-1415 discuss the meaning of *tasmāt tat sarvam abhavad*.]

When the ignorance on the part of the inner self, which was the cause of its not being the Brahman and the Ātman, was removed, it became all owing to the absence of (any) differentiation and similarity, [1414]
(and) since differentiation and similarity are possible (only) when there exists a second thing (and) since the real thing comprising causes and effects is merely the seeing one alone. [1415]

The cause-effect relation presupposes duality; so also do *vyāvṛtti* and *anugama* require duality. None of these is possible to be existing, for the Brahman alone is existent.

नाज्ञातं किञ्चिदप्यस्ति नानपास्तं तमो ऽप्यतः ।
सामानाधिकरण्यार्थमस्मीत्येतत्पदं भवेत् ॥१४१६॥

[Verses 1416-1436 explain the meaning of *aham brahmāsmi*.]

(Since) there is no thing which is not known and also there is no darkness that is not removed, therefore, the word *asmi*

(in the sentence *aham brahmāsmi*) is used for conveying the same-case-relation (of them). [1416]

This is the meaning of the word *asmi*.

Being in the same-case-relation can be possible of two words which have the same status and/or which do not exist apart from each other.

adhikaraṇa refers to grammatical case. Therefore, two words in the same case are taken to refer to (or signify) but one thing, e.g. *nīlam kamalam*. *adhikaraṇa* can also mean substratum. Therefore, two properties/words which refer to but one and same substratum are also mentioned in a sentence in the same case. Thus, here *aham* and *brahma* are both in the Nominative case. This is explained in the next verse.

ब्रह्माहंपदयोरर्थौ यौ तयोः संगतिर्मिथः ।
अहमर्थो विशेष्यो ऽत्र तत्प्राधान्यप्रसिद्धितः ॥१४१७॥
तद्याथात्म्यप्रसिद्ध्यर्थं ब्रह्मार्थस्तु विशेषणम् ॥१४१८॥

Those two objects, which are signified by the words *brahman* and *ātman*, have a close (*sam*) association between them; (and) here the object (signified) by the word *aham* is what is to be qualified (by the other), because of its pre-eminence (in worldly existence). [1417]

And (*tu*) the object (signified) by the word *brahman* is its qualifier for establishing the true nature of that (=the inner self signified by *aham*). [1418]

विशेषणानां संबन्धो विशेष्येण विशेषणैः ।
विशेष्यस्यापि संबन्धः स्वातन्त्र्यपारतन्त्र्यतः ॥१४१९॥

The relation of the qualifiers to what is qualified and (the relation) of what is qualified to the qualifier is owing to the independence and/or the dependence (of the signified). [1419]

There follows now a discussion on the relation between the qualifier and the qualified; particularly that between *aham* and *brahma*.

In verse 1419 Sureśvara gives us the philosophical basis of the qualifier-qualified relation which presupposes duality. So also does he imply that those that are qualified can at times become the qualifiers of others as well — this is their dependence so far as worldly existence is concerned. It is only the Brahman which is purely what is ever qualified. This (is implied) and explains its independence.

विशेषणविशेष्याणां साकल्येनैव संगतिः ।

उपात्तान्योन्यरूपाणां विशेषणविशेष्यता ॥१४२०॥

Those, that are (known as) the qualifier and the qualified, have a close association (between them) only in their entirety.¹ The relationship of the qualifier and the qualified obtains between such two things as have assumed the forms of each other.

[1420]

To explain: Now *aham* and *brahman* can stand as the qualifier and the qualified. This their relation requires complete identity of the two — those two which are assumed to be two different objects. This is possible owing to *avidyā*. This relationship is different from the relation of the qualifier and the qualified in worldly language and dealings.

¹That is, by being identical.

उपात्तद्रव्यकाण्येव विशिषन्त्युत्पलादिकम् ।

द्रव्यं विशेषणान्येति तथोपात्तविशेषणम् ॥१४२१॥

Only those which have come to occur¹ in substances (can) qualify a lotus etc. In the same way, a substance which has come to have qualifiers goes to them.²

[1421]

This refers to the qualifier and the qualified relation in language.

¹This has a reference to *utpannam dravyam ādye kṣaṇe nirguṇam tiṣṭhati*. Accordingly, *nīlatva* 'blueness', *sugandhitva* 'fragrance' come to occur in the lotus from the second moment of its existence.

²This is to say, becomes associated with them.

नायःशलाकाकल्पानां विशेषणविशेष्यता ।
परस्परानपेक्षत्वाद्विमवद्विन्ध्ययोरिव ॥१४२२॥

There does not occur the relation of the qualifier and the qualified between those which resemble two pieces of iron, on account of their not having any mutual expectancy as in the case of Mt. Himalaya and Mt. Vindhya. [1422]

The instances mentioned in the verse are of two pairs of substratums; one substance exists independently of the other. Thus there cannot be the relation of the qualifier and the qualified between the two.

Both SP and NKL point out the instance of *daṇḍa* 'staff' and (a man called) Devadatta. *daṇḍa* cannot be a qualifier of the latter, while *daṇḍin* 'one having a staff' can be.

एकदा निर्विभागेन कात्स्न्यसंगतिकारणात् ।
सामर्थ्यात्स्वविरुद्धानां न विशेष्ये ऽस्ति संभवः ॥१४२३॥

There is no possibility of what are opposed (in nature to), on account of their own propriety (or capacity), to be existent in a substantive only on the ground that they are (at least) at one time inseparably associated with fullness/completeness. [1423]

aham and *brahman* can be at some time realised/seen to be together but it does not mean that *aham* connected with *buddhatva* etc. can be a qualifier of the Brahman.

परस्पराविरोधेन विशिषन्त्यात्मसंश्रयम् ।
विशेषणानि येनातस्तद्विरुद्धं न ढौकते ॥१४२४॥

Since qualifiers qualify (the substance of) their own support, without mutual opposition, therefore, what is opposed to that¹ does not touch (it). [1424]

This points to the qualifiers of *aham*, viz. *samsāritva* etc. which can hold in the case of the inner self only, since these, viz. *ahamkāra*

and the inner self obtain in one substratum. But since *aham* etc. are opposed in nature to the Brahman, they do not qualify the Brahman.

¹Namely, the Brahman — this is implied. Yet, 'that' can signify the substratum which is already mentioned. Thus, the whole verse can be taken to state a general rule regarding *viśeṣaṇas* in *sāmānādhikaraṇa*.

विशेषणयुतिः शाब्दी तद्विरुद्धनिराकृतिः ।

मोहमात्रेण तत्प्राप्तेः सामर्थ्यात्स्यान्न शब्दतः ॥१४२५॥

The association of the qualifier (*aham* with the Brahman) is only on the word level; (it results into) setting aside of what is opposed to that, inasmuch as it has occurred only through ignorance and not from the meaningfulness (lit. capacity) of the word (to convey Reality). [1425]

Here, there is a specific statement about *aham* and *brahman*.

एकैकरूपासंसर्गबोधमात्रस्वभावतः ।

विशेषणानां संप्राप्तिर्नाञ्जसी प्रत्यगात्मनि ॥१४२६॥

Since the nature of (the inner self) consists only in knowledge that is without any association with any qualities, whether similar or dissimilar,¹ therefore, the qualifiers do not come into association with the inner self in a smooth way. [1426]

¹Cf. *sajātīyabhedavyudāsārtham ekapadam, vijātīyabhedāpavādārtham ekarūpety uktam* (SP).

विशेषणानां संबन्धो यतो न प्रत्यगात्मनि ।

लक्ष्यलक्षणता तस्मात्प्रतीच्यध्यवसीयते ॥१४२७॥

Since connection of qualifiers is not (possible) in the case of the inner self, therefore it is concluded that (in the case of the proposition) of the inner self there is the relation of the indicator and the indicated. [1427]

The words *aham* and *brahman* seem to be used as qualifiers of the Ātman (viz. inner self), but in verse 1426 it is pointed out that there cannot be any qualifier in the case of the inner self. Therefore, Sureśvara points out that, in the sentence *aham brahmāsmi*, *aham* is to be understood as the inner self which is *aśuddha* and *mugdha*; but since, in reality, the inner self is *śuddha* and *buddha* (as understood from *aham brahma*— in the same-case-relation), the relation between *aham* and *brahma* is to be understood as that between an indicator and the indicated. This is clarified in the next verse.

अनन्यापेक्षि प्रत्यक्त्वमहंरूपेण लक्ष्यते ।
तथैव ब्रह्मरूपेण प्रतीचो ऽप्यद्वयात्मता ॥१४२८॥

The nature of the inner self (which is) not dependent on anything else is indicated by the (word-)form *aham*; in the same way, (is indicated) the character of the inner self without duality in the form of the Brahman. [1428]

निवर्त्यभेदाद्विन्नो ऽर्थो ऽमानित्वादेर्यथा तथा ।
ब्रह्माहमर्थयोर्ज्ञेयस्तयोरैकार्थ्यहेतुतः ॥१४२९॥

As some entity from which all distinction (caused by ignorance) has to be removed on account of its not having any Ego etc. (has to be ascertained), so also (the non-distinction) has to be known between the two entities *brahman* and *aham* on account of their having reference to but one entity. [1429]

अनात्माब्रह्मताहेतौ प्रत्यग्ध्वान्ते निवर्तिते ।
पदार्थ एक एव स्याद्ब्रह्माहंपदयोः परः ॥१४३०॥

When darkness on the part of an individual self, which has been the cause of its being the non-Ātman and the non-Brahman, is removed, there would remain only one entity (and which would be) beyond the two words¹ *aham* and *brahman*. [1430]

¹That is, beyond the expression by the two words.

भेदसंसर्गनाशार्थो नात उक्तेरिहेष्यते ।

अहंब्रह्मश्रुतेः साक्षात्तादात्म्यमिह गम्यते ॥१४३१॥

Therefore, no thing like distinction or connection or negation¹ (in relation to things) is here desired (i.e. understood) from the (Śruti) statement. From the (Śruti) statement *aham brahma (asmi)* is understood here the direct oneness (or, identity) of the two. [1431]

¹ *bheda* here is a thing to be distinguished from another, i.e. it is a discrete object; *samsarga* means connection, but here it stands for a thing to be shown to be connected with another; and *nāśa* which means destruction stands for a thing to negate something else. *bhedasamsarganāśa* is an optional (*vaikalpita*) Dvandva compound word joined to *artha*.

कर्तुर्ज्ञातुर्हि या दृष्टिः साविद्योत्थार्थलेहिनी ।

तत्प्रत्यगात्मदृष्ट्या तां प्रत्याख्यायान्नुतेऽद्वयम् ॥१४३२॥

Whatever seeing on the part of the agent or the knower (is understood in the sentence) is the destroyer of the notions which have arisen from ignorance; therefore, having set aside¹ that² by (giving rise to) the seeing of the inner self as the Brahman, one obtains (i.e. experiences) non-duality³. [1432]

¹ That is, having negated or removed.

² Namely, ignorance.

³ *advayam* here refers to *advayatā*.

अस्मीतीहत्यनिर्देशाद्विद्याकालैव मुक्तता ।

सिद्धातोऽसौ न साध्या स्यादग्निहोत्रादिकार्यवत् ॥१४३३॥

By the mention here of *asmi* (it follows that) there is liberation achieved at the very time of (obtaining) instruction; therefore, it is not to be accomplished (later) like an effect, viz. Agnihotra¹ (ritual) etc. [1433]

¹The Śruti statement regarding Agnihotra etc. merely gives information about the same. Then the Agnihotra etc. has to be performed. As a consequence, there follows the result. Thus, there is a time gap between knowing the meaning of the statement regarding Agnihotra etc. and performing what is signified by it. As against this, instruction regarding the Brahman brings liberation along with itself; there is never any time gap or any intervention whatever.

प्रत्यग्याथात्म्यविज्ञानमात्रव्युत्पत्तिसिद्धये ।
तस्मादिति श्रुतिर्वक्ति ह्युत्पत्त्यादिनिवृत्तये ॥१४३४॥

The Śruti states the word *tasmāt* in order that there arises the knowledge (of the Brahman) from mere knowing (*vijñāna*)¹ about the true nature of the inner self (and) in order to ward off the idea of production² etc. (of the same at some later point of time). [1434]

¹It is mere information and not the knowledge of Reality.

²Sureśvara has still in mind *agnyādivākya* which expects some action to be performed after the resulting of *vijñāna* from the *vākya*.

अविद्यातज्जनिर्मुक्तौ ब्रह्म ब्रह्माभवत्स्वतः ।
सर्वः कृत्स्नस्तथा पूर्णः शब्दाः पर्यायवाचकाः ॥१४३५॥

The Brahman (i.e. the inner self) itself became the Brahman (viz. the Supreme Self), when there was release (of it from) ignorance and its effect. As such, the words *sarva*, *kṛtsna*, and *pūrṇa* are all synonymous.¹ [1435]

¹SP points out that they are synonyms of the Brahman.

आत्माविद्यासमत्थानामात्मयाथात्म्यमात्रतः ।
कर्मवत्काङ्क्षते ज्ञानं विशिष्टं नाधिकारिणम् ॥१४३६॥

[Verses 1436cd-1442 explain the sentence *tad yo yo devānām.*]

Since (the various things of the transmigratory world) which have arisen from the ignorance about (the true nature of) the Ātman are only of the nature of the Ātman (itself)¹, knowledge (about) the Ātman) does not expect any (particular) eligible person as does (a ritual) activity.² [1436]

¹The first half of this verse explains how *sarva* is a synonym of the Brahman.

²The second half of the verse begins the discussion on *tad yo yo devānām*.

देवादीनामतो यो यो यथोक्तेनैव वर्त्मना ।
प्रत्यबुध्यत तद्ब्रह्म स स तदभवत्परम् ॥१४३७॥

Therefore¹, whosoever among the gods came to know that Brahman by the very path stated (herebefore) became the highest (Brahman). [1437]

This is the substance of the sentence *yo yo ...*

¹This justifies *kāṅkṣate nādhikāriṇam* in the preceding verse.

प्रत्यबोधातिरेकेण साधनान्तरनिहुतौ ।
एवेत्यवधृतिर्ज्ञेया ज्ञानादेव ततो भवेत् ॥१४३८॥

From the word (*eva*) is to be understood specification of the denial (lit. concealment) of any other means beside knowing about (the true nature of) the inner self; then there results (liberation) only from knowledge. [1438]

आत्मयाथात्म्यविज्ञानाद्यदन्यत्साधनान्तरम् ।
ज्ञानाभावो ऽथवा सर्वमविद्यैवेति निश्चितिः ॥१४३९॥

Whatever means other than the knowing about the true nature of the Ātman has as its result either absence of knowledge or all that is only ignorance. This is the decision. [1439]

मनुष्या यदमन्यन्त साधवेवातस्तदीरितम् ।
न कश्चिदपि दोषो ऽत्र पूर्वो ऽतः प्रसज्यते ॥१४४०॥

Whatever men thought about (or, expected) was therefore only well said; there is in this no fault whatever that was pointed out¹ before that can become contingent. [1440]

¹Supply: by opponents. This refers to the faults pointed out in the introductory (*upoddhāta*).

प्रत्यक्त्यैव संबन्धादात्मनो ऽनात्मवस्तुना ।
विशिष्टेनाविशिष्टस्य क्लृप्तेनाकल्पितात्मनः ॥१४४१॥
यतो ऽतो लोकबुद्ध्यैव देवादीनामितीर्यते ।
तुल्यो देवादिसंबन्धो ब्रह्मणो मशकादिभिः ॥१४४२॥

Since the Ātman has connection with (all) the non-Ātman objects¹ only by being their inner self, viz. the connection between with what is qualified (by attributes) and what is not qualified, and that between what is imagined and what is not imagined, [1441]

therefore, only in accordance with worldly notions (lit. knowledge) it is said 'among the gods ...'; the connection of the Brahman with the gods etc. is similar to that with the insects etc. [1442]

This explains how the Brahman is understood from the Śruti statement as connected with all sorts of non-Ātman objects and beings.

¹This is *jātāv ekavacanam*.

अन्तरेणाधिकारं चेन्नात्मबोधस्य संभवः ।
न जन्मान्तरसंस्काराद्वामदेवस्य तद्ववेत् ॥१४४३॥

[Verses 1443-1457 explain *tad dhaitat*.]

If (it is said:) There is no possibility of (acquiring) the knowledge about the Ātman unless (one has) the eligibility (for it), (then we say:) That could not have become¹ possible as in the case of Vāmadeva, on account of the impression(s) of the previous life². [1443]

¹ *bhavet* = *abhavat* in Vedic style.

² 'Impression(s) of the previous life' here refers to *antaḥkaraṇa-suddhi* acquired by the performance of ritual etc. which are prescribed in the Śruti. Reference to previous life (or lives) points to the world of human beings. There is a reference here to a Vedic sage Vāmadeva verse whose 'I became Manu ...' (*Rgveda* 4.26.1) points to his excellent knowledge consequential to his knowledge about the Brahman.

श्रुत्युक्तार्थस्य वा स्थेम्ने मन्त्रोदाहृतिरिष्यते ।
प्रमाणान्तरसंवादात्पुंसां विश्वासधीर्यतः ॥१४४४॥

Or rather, it is for establishing more firmly the meaning of the Śruti that there is intended the citation of a Mantra¹, since there occurs the faith in men only by (pointing out) agreement of an argument with another (accepted) means of knowing.

[1444]

This justifies the meaningfulness of the citation of a Rgvedic Mantra.

¹ This refers to *aham manur abhavam* (*Rgveda* 4.26.1).

अव्यावृत्ताननुगतं तद्वैतत्प्रत्यगात्मनि ।
तद्दर्शनादृषिः साक्षात्पश्यन्सर्वम् प्रपन्नवान् ॥१४४५॥

This (Brahman) then (is existent) indeed in the inner self, the one undifferentiated (from others), not similar¹ (to anything else); on visualizing that, i.e. directly seeing that the seer obtained all.

[1445]

This is the meaning of the words in the Mantra quoted.

¹ It literally means: followed by.

सूक्तादिज्ञापनार्थाय ह्यहं मनुरितीरणम् ।
ऐकात्म्यं सर्वभूतेषु प्रतीचो ऽसौ ददर्श ह ॥१४४६॥

In order to convey the beginning of a (full) hymn, there is

the Śruti statement *aham manuh*¹. (The purpose is to say:) He indeed saw in all those beings² (only) oneness of the Self. [1446]

¹Sureśvara points out the significance of the beginning (*pratīka*) of the hymn, conveying thereby that the *ṛṣi* saw the whole of the hymn.

²This refers to the mention of the various beings and objects in the hymn *Rgveda* 4.26.

तत्पश्यन्नित्यनेनात्र ब्रह्मविद्या प्रदर्श्यते ।
अहमासं मनुरिति विद्यायाः फलमुच्यते ॥१४४७॥
पश्यन्प्रतिपेद इति प्रयोगादवसीयते ।
विद्याकालैव कृत्स्नाप्तिरिति तन्मोहहानतः ॥१४४८॥

By the phrase *tat paśyan* is here conveyed the lore of the Brahman; and by the sentence *aham āsam manuh* is stated the fruit of the lore (of the Brahman); [1447] (and) by the employment (of the words) *paśyan pratipede* it is brought out that the obtainment of all is just simultaneous with (the acquiring of) the lore, (resultant) from the loss (i.e. abandoning) of ignorance about it (viz. the Brahman). [1448]

ब्रह्मप्राप्त्यन्तरायस्य प्रत्यक्संमोहमात्रतः ।
प्रत्यग्विज्ञानतो ध्वस्तेस्तत्प्राप्तिर्नान्यसाधना ॥१४४९॥

Since the hindrance to the obtaining of the Brahman is merely total (*sam*) ignorance about the inner self, there is the obtainment of that (Brahman) only after the destruction of some particular knowledge¹ about the inner self, not by any other means. [1449]

¹This is *vijñāna*, viz. understanding the inner self as having various attributes etc. — this is in fact *avidyā*.

अविद्याध्वंसमात्रेण पुमर्थस्य समाप्तिः ।
तावतावसितेर्विद्या स्वार्थैवेति विनिश्चयः ॥१४५०॥

Because the end of human endeavour is acquired only by the destruction of ignorance, only therewith¹ is there the completion (of the lore of the Brahman). Therefore, indeed, the lore (of the Brahman) is for its own sake². [1450]

¹That is, only by effecting the destruction of ignorance.

²It is not for achieving any other purpose (*parārtha*).

सकृदात्मप्रसृत्यैव निरुणद्ध्यखिलं भवम् ।
ध्वान्तमात्रनिरासेन न ततो ऽन्यान्यथा मतिः ॥१४५१॥

By its rise only for once does (the knowledge about the nature of the Brahman) check (lit. destroy) entire (transmigratory) existence (and consequently) by removing merely the ignorance (about it,) therefore, there is not any knowledge other than that (to be sought). [1451]

देशकालाद्यसंबन्धाद्देशादेर्मोहकार्यतः ।
नानुत्पन्नमदग्धं वा ज्ञानमज्ञानमस्त्यतः ॥१४५२॥

Therefore, owing to (the fact that there is) absence of any connection (of the inner self) with region, time etc. and because region etc. are effects of ignorance, knowledge does not really get produced or ignorance does not get burnt. [1452]

नाबाधित्वेह बाधयार्थं बाधको बाधकात्मताम् ।
लभते मेययाथात्म्यहेतुमात्रव्यपेक्षतः ॥१४५३॥
यतो ऽतोऽविद्यातज्जानां बाधितत्वात्प्रबोधतः ।
सकृदेव च मायोगान्नोद्धर्षं तच्चोदनेष्यते ॥१४५४॥
सम्यग्ज्ञानशिखिप्लुष्टमोहतत्कार्यरूपिणः ।
सकृन्निवृत्तेर्बाध्यस्य किं कार्यमवशिष्यते ॥१४५५॥

Since, here (in the context of this lore), what stultifies does not acquire the nature of the stultifier without having removed the object which is to be removed, depend as it does only on one cause, viz. (acquiring the knowledge of) the true nature of object to be known (viz. the Ātman), therefore, ignorance and its effects being stultified by (that) knowledge and through

the connection (of the inner self afflicted by ignorance) with right knowledge just once, there is not required any impulse further. [1453-1454]

(Tell me then) what remains to be done of ignorance which is to be stultified and which has, once for all, ceased to be the one, which has the form of error and its effects which are burnt by the fire of right knowledge? [1455]

ध्वान्तादिघस्मरे प्रत्यक्चैतन्यात्मैकनिष्ठिते ।
प्रत्यर्थिनि स्थिते ऽनात्मधियां स्यात्सत्यता कुतः ॥१४५६॥

(When there has occurred knowledge) which is inimical (to ignorance), the destroyer of darkness etc., and which abides only in the sentience of the inner self, whence can there be truth in the knowledge of the non-Ātman (objects and beings)? [1456]

अज्ञातमिथ्याविज्ञाततत्त्वमात्रावलम्बिना ।
ज्ञानेन किं न विज्ञातं वद किं वा न बाधितम् ॥१४५७॥

What does not become known by knowledge which has taken resort to only the truth that underlies what is unknown (and) what is false?; (and) tell me, what is not stultified? [1457]

In verses 1456-57, the word knowledge stands for the knower also.

सर्वापत्तिरियं युक्ता देवादीनां महात्मनाम् ।
अस्मदादेस्तमस्वित्वान्न संभाव्येति चेन्न तत् ॥१४५८॥

[Verses 1456-1461 explain *tad idam apy etarhi.*]

This becoming all is reasonably acceptable in the case of gods etc., who have greatness of their own, but it is not possible (to be thought of) in the case of us and others. — if this is (the argument), (the answer is:) That is not so. [1458]

एतर्ह्यपि तु तद्ब्रह्म यो यः साक्षादबुध्यत ।

स एव तदभूद्यस्मान्नातो ऽभिजनकारणम् ॥१४५९॥

Since, even now, whosoever became directly aware (of the true nature of his inner self) is (i.e. becomes) the Brahman; (and) since he himself became that, therefore there is not (here) any cause in one's birth in some high family. [1459]

This emphasises that only knowledge about the nature of the Brahman (or inner self) is the pre-requisite for liberation. Being born as a god, or in a high family are not necessary for it.

अप्येतर्हि यथान्यायं यो वेदात्मानमद्वयम् ।
स इदं सर्वमात्मैव भवत्यज्ञानहानतः ॥१४६०॥

So also, even now, whosoever has, in the manner¹ (mentioned before), known the Ātman which is without any duality, becomes all this, viz. the Ātman itself, owing to the disappearance (lit. loss) of ignorance. [1460]

¹By applying the method of Anvaya and Vyatireka as in verse 1437 above..

न हीहोत्कृष्टसत्त्वेषु देवादिषु परात्मनः ।
नापि चात्यन्तमूढेषु विशेषः कश्चिदीक्ष्यते ॥१४६१॥
प्रत्यक्तत्त्वधियो वास्ति स्वतोबुद्धैकतात्मनः ।

Indeed, there is not seen any differentiating attitude on the part of the Supreme Self in the case of those who are excellent beings such as gods and those who are extremely ignorant; [1461]

and (not also) in the case of the one, who has acquired the knowledge of the true nature of the inner self; for, in the case of the Ātman, there is only the state of being knowledge.

[1462ab]

श्रेयांसि बहुविघ्नानीत्याशङ्क्यैतदथोच्यते ॥१४६२॥
तस्य ज्ञातात्मतत्त्वस्य प्रध्वस्ततमसो यतेः ।
इन्द्रादयो ऽपि नैवालं कैवल्यमिति निवारणे ॥१४६३॥

[Verses 1462cd-1466 explain *tasya ha devāś ca* in the light of the comments of Śaṅkara and Bhartṛprapañca.]

Now (what follows) is said with a fear in mind that all good things are beset with many obstacles. [1462cd]

In the case of that person, who has renounced¹, has known the (true) nature of the Ātman, and has his ignorance destroyed, even Indra and others are not able to ward away his obtaining liberation. [1463]

Verses 1463-1466 explain the meaning of *tasya ha devāś ca nābhūtyā īśate, ātmā hy eṣāṃ sa bhavati*, according to Śaṅkara. The purpose of verse 1463 is: The knower of the true nature of the inner self (viz. the Supreme Self) has a power higher than that of known high powers in mythology, such as Indra and others.

¹Cf. verse 1392 above.

देवाद्यैश्वर्यविषयव्यतिक्रान्तत्वहेतुतः ।
कैवल्यभूत्या उद्युक्ता ईश्वरा अपि नेशते ॥१४६४॥

Since the experience of the state of liberation has for its cause the state of being beyond all the objects of excellence (enjoyed by) gods and others, even the masters (of great wealth), though out (to possess, i.e. to acquire) it, are unable (to do so).

[1464]

The knowledge of the Brahman cannot be outdone by any so-called precious wealth of the world. Therefore, possession of riches would not enable a person to acquire liberation. It is only knowledge of the self that is a pre-requisite for achieving liberation.

ईशेशितव्यसंबन्धः प्रत्यगज्ञानहेतुजः ।
सम्यग्ज्ञानात्तमोऽवस्तावीश्वराणामपीश्वरः ॥१४६५॥

Relation of the controller and what is to be controlled proceeds from ignorance about (the true nature of) the inner self. Once when one has one's ignorance destroyed by right knowledge

(of the nature of self), one is the Lord of Lords.

[1465]

ईश्वराणामनैश्वर्यं कस्माद्ब्रह्मविदीति चेत् ।
आत्मा ह्येषामितीत्याह तद्धेतुप्रतिपत्तये ॥१४६६॥

If someone were to ask: Why are the Lords powerless in respect of the knower of the Brahman?', (the answer is: The Śruti) has pronounced the words *ātmā hy eṣām* in order that one knows the cause for that (happening).

[1466]

भोज्यत्वेन जगत्कृत्स्नं कर्मविद्यादिसाधनैः ।
उपात्तं तदभुक्त्वा तु कैवल्यं लभते न चेत् ॥१४६७॥
इत्याशङ्कापनुत्त्यर्थं परो ग्रन्थो ऽवतार्यते ।
कैवल्यवाप्तिविघ्नाय नालं देवा अपीश्वराः ॥१४६८॥
अविद्याविषये यस्मात्तेषामधिकृतिः स्मृता ।
न तु प्लुष्टात्मयाथात्म्यविज्ञानतमसामसौ ॥१४६९॥

[Verses 1467-1469 are Bhartṛprapañca's explanation of the same sentence.]

If it is said that one does not achieve liberation without enjoying this entire world as an object of enjoyment that is obtained through such means as (ritual) activities, (various) lores etc.,

[1467]

(then) for the removal of this doubt, the subsequent section (of the text) is introduced: Even gods of great powers are not capable of (causing) any obstacle to (one's) obtaining liberation,

[1468]

since their ability (lit. eligibility) is recognised (only) in the sphere of ignorance, and not in respect of them who have burnt their ignorance by the knowledge of the true nature of the self.

[1469]

ब्रह्मविद्याफलप्राप्तौ विघ्नं कुर्वन्ति देवताः ।
इत्यत्र किंनिमित्तेयमाशङ्केत्यभिधीयते ॥१४७०॥
युक्तासङ्का यतो मर्त्या देवान्प्रत्यृणिनः श्रुतेः ।
पशुलोकत्ववाक्याच्च पारतन्त्र्याच्च कर्मिणः ॥१४७१॥

[Verses 1470-1473 discuss whether the sentence *tasya ha devās ca nābhūtyā īśate* is *aprāptaniṣedha* 'denial of what is not already stated or prescribed'.]

What is the cause for this doubt, viz. in (respect of) the statement 'Gods cause obstacles to one's achieving the fruit of the lore of the Brahman.'? (In answer) it is said (now):

[1470]

The doubt is justified, since the mortals are debtors to the gods (as we hear) from the Śruti, the sentence about (the human beings) becoming the animals (for the sacrifice) and also (about the Ātman), the *loka* ('region' as the object of enjoyment) and also because of the dependence of the performer (of rituals).¹

[1471]

BU 1.4.10 and 16 are the basis of this argument, viz. the reference in the Śruti to *śreyāṃsi bahuviḥnāni bhavanti mahatām api* is uncalled for; it was necessary to explain away the same by *tasya ha ... (aprāptapratiṣedha)*. These verses answer that argument. Here we notice the mixture of mythology and philosophy in Sureśvara's writings, owing to the effort of the seer of BU to bridge philosophy and ritual together.

¹Cf. *paśur eva sa devānām* (BU 1.4.10) and *atho ayam vā ātmā sarveṣām bhūtānām lokah* (BU 1.4.16).

ब्रह्मवित्त्वे च पारार्थ्यं देवादीन्प्रति हीयते ।

तस्य ब्रह्मतमोहेतोस्तन्निवृत्तौ निवर्तते ॥१४७२॥

And in relation to a person's being the knower of the Brahman his dependence on the gods¹ gets lost; since caused by ignorance about (the nature of) the Brahman (that it is), that (dependence) comes to an end when that (i.e. ignorance) has receded.

[1472]

¹Namely, that which is mentioned in the preceding verse.

अप्रियारिष्टिवाक्याभ्यामयमर्थो ऽवसीयते ।

तस्माद्विद्याफलावाप्तौ विघ्नं कुर्वन्ति देवताः ॥१४७३॥

This matter is decided from the Śruti sentences regarding *apriya* and *ariṣṭi*, therefore (it is said that) the deities cause obstacles to one's obtaining the fruit of the lore (of the Brahman).

[1473]

The ritual activities are accepted by the Siddhāntin as necessary for *cittaśuddhi*. This *cittaśuddhi* is connected with the gods who would cause obstacle to one's liberation.

Now is introduced a new argument about the gods' causing obstacles to one's securing the result of ritual performances also. There is the counterargument also. Thus, verses 1474-1491 discuss these fully.

नन्वेवं तर्ह्यविश्रम्भो ह्यदृष्टफलसंपदि ।

प्राप्तो ऽभ्युदयमोक्षार्थसाधनव्यापृताविह ॥१४७४॥

[Verses 1474-1477 point out how gods' power which causes obstacles to men's doing would destroy their faith in ritual activity.]

(The objector says:) Indeed, this being so, there will be want of faith¹ (of the people) in respect of the rich of fruit called *adrṣṭa*, since a person of this world has set himself upon the activity which brings about worldly rise and liberation. [1474]

¹It literally means: disbelief.

तथेश्वरो ऽपि नो विघ्नं कुर्वन्केन निषिध्यते ।

कालमन्त्रौषधादीनामचिन्त्या शक्तिरिष्यते ॥१४७५॥

कर्ममन्त्रौषधितपःकालादीनां च विद्यते ।

महती शक्तिरित्यत्र युक्तमाशङ्कितुं फले ॥१४७६॥

And also how can a (mighty) lord causing obstacle to us be warded off? It is accepted that (he has) unthinkable power in respect of time, Mantras and herbs etc. [1475]

And there exists great power in (magical) activities, Mantras,

herbs, penances, time etc.; therefore, it is reasonable to entertain the doubt (which is stated above) in respect of the fruit (of the lore of the Brahman). [1476]

देवादयः स्वतन्त्रत्वात्फलप्राप्तिविधातयोः ।
सर्वं कुर्युरनाशवासस्तस्मात्प्राप्नोति कर्मसु ॥१४७७॥

Gods and others, because they are independent in respect of (causing the) obtainment of or obstruction to fruit, would do everything;¹ therefore, there occurs (in the mind of the people) want of faith in the rituals. [1477]

¹This refers to the obstacle to the lore of Brahman.

नैवं सर्वपदार्थानां नियतादानकारणात् ।
जगद्वैचित्र्यदृष्टेश्च स्वभावे तदसंभवात् ॥१४७८॥

(Now the Siddhāntin answers:) This is not so, because all objects and beings (in the world) take (i.e. require) some specific causes (for their origination or production); also because there is variety seen in respect of the worldly happenings; and because it is impossible that such is the happening in the nature of the things.¹ [1478]

This is in refutation of the Svabhāvavādins.

¹That is to say: Determined relationship of causes and effects and variety of the objects/things in the world could not occur if one accepted *svabhāvavāda* 'Naturalism'.

सुखादिफलदं कर्मेत्यस्मिन्पक्षे व्यवस्थिते ।
श्रुतिन्यायादिसंसिद्धेर्नातो विघ्नकृतः सुराः ॥१४७९॥

When the view that ritual activity brings about results such as happiness is (thus) established, (it has to be said that) gods cannot cause obstacles, since that view is established by Śruti, reasoning etc.¹ [1479]

This is an argument against those who do not hold Svabhāvavāda.

¹For 'Śruti', SP refers to *pūṇyo vai pūṇyena karmanā ...* (BU 3.2.13); *karma haivā ...* (BU 3.2.13), for 'reasoning', *jagadvaicitrya-dṛṣṭi* in verse 1478 above, and for 'etc.', *karmanā badhyate jantur ...* (*Mahābhārata* 12.233.7). SP further refers to a passage in *Kāma-sūtra* 23.2: *puruṣakārapūrvakatvāt sarvappravṛttinām avaśyambhāvino pyarthasyopāyapūrvakatvād eva na niṣkramiṇo bhadram asti.*

कर्मणैव स्वसिद्ध्यर्थं तेषां क्रोडीकृतत्वतः ।
नात्मानं लभते कर्म देवेशाद्यनपेक्षि सत् ॥१४८०॥

Since they, i.e. gods have been accepted (in its system) by the ritual activity in order that it gets established; therefore, ritual cannot come into existence if it is without any dependence on gods. [1480]

फलदाने ऽनुलोमत्वान्नामी स्युर्विघ्नकारिणः ।
यथा कर्म तथेशादि कर्मपेक्षयैव सिद्ध्यति ॥१४८१॥

(And) these would not cause obstacles (to the fruit of the ritual), since they are prone to yield suitable fruits. (This means:) As activity (depends on gods etc.); likewise, the deity of it etc. is dependent on that activity; only then (that activity) gets reward. [1481]

For *phalādāne* translation and text follow the variant reading of the AnSS edition and also the NKL edition, *phaladāne*. *Brhad-āranyakavārtikasāra* 1.4.1092 also follows this.

सर्वं सर्वमपेक्षयैव संहतत्वात्प्रसिद्ध्यति ।
प्रधानगुणभावश्च क्वचित्कस्यचिदिष्यते ॥१४८२॥

All these come into existence, only depending on all else, because they are closely knit together and the relation as the principal and the subordinate of someone to another is accepted at some or another place. [1482]

विघ्नकार्ये ऽपि चाप्येते नानपेक्ष्य प्रकुर्वते ।
तत्सामर्थ्याप्रणोद्यत्वात्सर्वेषां सर्वकर्मसं ॥१४८३॥

And further, in respect of obstacles to be caused, these (gods) do not cause (the same) without keeping in view¹ (some activity or reason), since all these are (effective) in respect of all activities such as are not to be impelled by their (own) strength (alone). [1483]

¹It literally means: without depending on ...

गुणप्रधानभावश्च देवकालेश्वरादिषु ।
कर्मस्वनियतो दृष्टो नान्यथा चोपपद्यते ॥१४८४॥

And the relation of the principal and the subordinate in the case of gods, time and a lord etc. is seen as not definitely fixed in point of activities and it does not get reasonably explained otherwise. [1484]

यदैकस्य प्रधानत्वं तदान्यस्याप्रधानता ।
एवं नृत्यज्जगन्नित्यमतद्वृत्त्यात्मनि स्थितम् ॥१४८५॥

When one has the status of being the principal, then the other has the status of being subordinate to it; thus is the world ever changing its states (lit. dancing up and down) and is abiding in the Ātman, without becoming that. [1485]

This verse clarifies the not-fixed change in the world.

The world continuously seems to change its states; but this is the effect of ignorance about the nature of the Ātman. It exists because it has the basis only in the Ātman.

गुणप्रधानभावश्च पदार्थानामनन्ततः ।
क्षेपीयस्त्वाच्च कालस्य दुर्ज्ञेयो मतिविभ्रमात् ॥१४८६॥

[It should be noted here that the NKL does not comment on verses 1486-1489 — i.e. NKL did not have the four verses before it!]

Further, since the relation of the principal and the subordinate

which obtains among various objects and beings is (of) infinite (variety), and since time is more quick than (everything else), it (i.e. the true nature of the relation) is difficult to understand owing to a chance of there being an error in thought (about the same). [1486]

The word *mativibhrama* is to be noted: This stands for error which is known in Sanskrit more commonly as *adhyāsa*. Maṇḍana-miśra is reported to have written a book *Vibhramaviveka* wherein he discusses various types of error. This name *vibhrama* could have also been at the basis of, the some-time-back-held equation of Maṇḍanamiśra and Sureśvara.

कर्मैव कारणं केचित्फलप्राप्तौ प्रचक्षते ।
दैवमेके ऽपरे कालं स्वभाव इति चापरे ॥१४८७॥

Some¹ point out (lit. declare) that, for the acquisition of the fruit (viz. liberation), the cause is only ritual activity; others² (declare that to be) fate. And yet others³ say it to be Time and (still others⁴), the nature of things. [1487]

¹This refers to the Mīmāṃsakas.

²This refers to the author(s) of *Devatākāṇḍa* (of ritual).

³This refers to the Astrologers.

⁴This refers to the Lokāyatas.

श्रुतयः स्मृतिवादाश्च कर्मप्राधान्यमेव तु ।
अङ्गीकृत्य प्रदृश्यन्ते प्रवृत्ताः सर्व एव हि ॥१४८८॥

But all Śruti texts and discussions in the Smṛti texts are seen to have put forth (their subject matter) after having accepted the principal significance (or greater importance) of the ritual activity. [1488]

पुण्यः पुण्येन भवति पापः पापेन कर्मणा ।
वचांस्येवं सुबहुशो लक्ष्यन्ते शास्त्रभूमिषु ॥१४८९॥

(Thus) in (various) portions of the Śruti are seen a large

number of statements like *punyaḥ punyena bhavati pāpaḥ pāpena karmaṇā*¹. [1489]

This has a reference to the Śruti mentioned in the preceding verse 1488.

Cp. BU 3.2.13: *punyo vai punyena karmaṇā bhavati pāpaḥ pāpeneti*; BU 4.4.5: *punyaḥ punyena karmaṇā pāpaḥ pāpena*.

यद्यप्येषां स्वविषये प्राधान्यम् कस्यचित्क्वचित् ।
अप्राधान्यं तदन्येषां तथापि तु न कर्मणाम् ।
फलप्राप्तावहेतुत्वं शास्त्रन्यायावधारणात् ॥१४९०॥

Though in the case of some of these statements (we notice that) some have attached in their sphere greater significance to some things in some places and less significance to others; yet they (have not attached) less significance to rituals in respect of their being the causes of the fruit — this, on account of the accepted principle of the Śāstra. [1490]

कर्मणः फलसंप्राप्तिरप्राप्तिश्चेह येक्ष्यते ।
साद्गुण्यविगुणत्वाभ्यां सा स्यात्कर्मण एव च ॥१४९१॥

And obtaining or non-obtaining of the fruit from certain activity, whatever it be, is seen here only on account of the excellence or shortcoming¹ of the activity itself. [1491]

¹The word *sādguṇyaviguṇatvābhyām* is an optional Dvandva compound.

विघ्नं कुर्वन्ति नो देवा विद्योत्थफलसंगतौ ।
उक्तं यदपनुत्त्यर्थं तत्र प्रतिविधीयते ॥१४९२॥

[Verses 1492-1505 refute the idea that gods cause obstacles to one's achieving the knowledge of the Brahman.]

As to what is said, viz. gods cause obstacle to us in respect of (our being associated) with the fruit (viz. liberation) which arises from the knowledge (of the inner self), the following

is said in answer:

[1492]

अविद्याहानमात्रत्वात्कैवल्यसिफलात्मनः ।
तत्प्राप्तेर्ज्ञानकालत्वान्नालं विघ्नाय देवताः ॥१४९३॥

Because what has the nature of fruit, viz. obtaining release has resulted only from abandoning of ignorance and because it has occurred at the same time (when there is the rise of) knowledge, therefore gods are not capable of (causing) any obstacle.

[1493]

चक्षुरूपाभिसंबन्धसमकाला यथेष्यते ।
रूपाभिव्यक्तिरेवं स्यादविद्यावस्तिरात्मनः ॥१४९४॥

As the appearance of a form is accepted to be simultaneously occurring with the connection of the eye and the form, so also it is accepted (by us) in respect of the connection of the destruction of ignorance and (the rise of the knowledge about) the Ātman.

[1494]

यथास्थितात्मयाथात्म्यज्ञानजन्मातिरेकतः ।
न तत्तमोनिवृत्तिः स्यात्तदुत्थस्य च वस्तुनः ॥१४९५॥

There would not be (lit. there is not) the cessation of darkness (i.e. ignorance) and also of that which has arisen from it (viz. darkness) in addition to the rise of the knowledge of the true nature of the inner self as it exists.

[1495]

सर्पात्मना गृहीतायां न दण्डादीक्ष्यते स्रजि ।
प्रतीच्येकतनुग्राह्ये तदन्यन्न तथेक्ष्यते ॥१४९६॥

In the place of a garland which is taken to be having the nature of a serpent, there is not seen a stick etc., so also in the case of the inner self which is noticed only in a body anything else than that is not seen.

[1496]

Both SP and NKL point out to *sarvātmana* as a variant for *sarpātmana* and explain the meaning accordingly. But that is not

convincing. However the texts in the editions of both AnSS and NKL do not show this variant!

अन्योन्यव्यभिचारित्वमज्ञाने ऽपि ह्यनात्मनाम् ।
किमु विध्वस्तनिःशेषघनाज्ञाने ऽन्तरात्मनि ॥१४९७॥

Even when ignorance prevails, there is noticed in the case of the non-Ātman objects mutual exclusiveness; what then to say about the same when there exists (only) the inner self from which is destroyed the entire mass of ignorance. [1497]

रूप्याभज्ञानवेलायां शुक्तिकाधीर्न बाधते ।
तदसूतेरिह त्वात्मन्यादिमध्यान्तबाधधीः ॥१४९८॥

At the time of having the knowledge of what appears as silver, the knowledge of the shell does not act as a stultifier, since there is no rise of it;¹ but, here in the case of the inner self, the knowledge of it as a stultifier (of ignorance) exists in the beginning, in the middle and in the end. [1498]

¹Namely, the knowledge of the shell as it is.

निर्निमित्तं प्रमात्रादेः प्रत्यग्रूपमनात्मनः ।
सन्निमित्तं प्राग्रूपमात्मनो मोहहेतुतः ॥१४९९॥

The knowers etc., (which are) the non-Ātmans, have the form of the inner self for no reason (whatever); (and) they have the form of what is outside world because of the ignorance (about the nature) of the Ātman. [1499]

एक आत्मेति विज्ञाने दोषो ऽप्यप्रतिबन्धकः ।
मूढात्मनामपि हेतन्न विसंवादमृच्छति ॥१५००॥

When there arises knowledge that the Ātman is one (without a second), that fault¹ is not obstructive, and in the case of those who have remained ignorant about the self also, this does not vary. [1500]

The verse is preceded by a possible doubt that the knowledge of the Ātman also is like every other knowledge affected by ignorance.

¹The fault of being affected by ignorance.

मिथ्यासंशयविज्ञानमनात्मानं प्रतीष्यते ।
प्रत्यगात्मानि तद्यस्मात्सम्यग्ज्ञानान्न भिद्यते ॥१५०१॥

False knowledge, doubt and (so-called) knowledge, on the part of (an individual) is accepted to be what refers to the non-Ātman, since that referring to the inner self does not get differentiated (likewise). [1501]

अज्ञानं चेच्चिदाकारं संशयादिषु का कथा ।
प्रमित्सते प्रतीच्यस्मान्न दोषो नापि बाधकम् ॥१५०२॥

If it were that ignorance had really the form of sentience, then where could one talk of doubt etc.? From this (it follows that) when the inner self is sought to be known there is no fault and it does not affect (as well). [1502]

महिमानो यदामी स्युरविद्याया न वस्तुनः ॥१५०३॥
काला देवादयस्तस्यां ध्वस्तायां तद्विनाशतः ।
देवेश्वरादयः के स्युर्विघ्नं वा कस्य कुर्वते ॥१५०४॥

When these great ones, viz. (periods of) time, gods etc., belong to ignorance and they do not belong to the real object, then, that ignorance being destroyed, these, viz. (its effects) gods, lords etc. also get destroyed; how then could they be what they are, and for whom will they cause obstacles? [1503-1504]

यत्र त्वस्येति श्रुत्यैव सर्वमेतत्स्फुटीकृतम् ।
इहापि हेतुसंसिद्ध्यै तत्स्पष्टमभिधीयते ॥१५०५॥
यतो विघ्नकृतामात्मा प्रत्यग्याथात्म्यविद्वेत् ।
तद्गोचरातिवर्तित्वं विद्याकाले तमोहतेः ॥१५०६॥

All this is made quite clear by the very Śruti statement *yatra tv asya ...*¹ (but) here also it is stated in clear terms with

a view to establishing the cause of (effecting) the release of the bound self— [1505]

Since the inner self of (each of) them who cause obstacle (to men) would be the knower of the true nature of the inner self thanks to the destruction of ignorance at the time of acquiring the knowledge of the Brahman, (there would be) the capacity to transcend the sphere (lit. object(s)) of that (viz. ignorance). [1506]

This is an additional argument about why it is said that gods etc. do not cause any obstacle to a man's pursuit of knowledge. Gods etc. are also, like men, some individual selves affected by ignorance and, therefore, in their case also, ignorance would be destroyed at the time of their acquiring the knowledge of the Brahman. This renders it impossible that they would cause any obstacles.

¹BU 4.5.15.

आत्मामीषां तदा ब्रह्म देवादीनां भवेद्वशी ।
कालाद्यन्तरितं यत्स्यात्प्राप्त्युत्पत्त्यादिलक्षणम् ॥१५०७॥
अनात्मैव फलं तत्र देवानामीशता भवेत् ।

At that time, the inner self of (each of) these gods etc. would become the all-powerful Brahman, which was earlier (obscured by) time etc. and was of the nature of having an origin etc. as its character. [1507]

That being so (*tatra*), the lordship of the gods is (but) the fruit, (viz. becoming) the non-Ātman. [1508ab]

In verses 1508cd-1527, there is discussion of the doubt of some Vedāntin (of the same school) regarding: What removes ignorance— the final moment of one's life or the continuous stream of that knowledge. The role played by the lore of the Brahman is also discussed.

अपि ज्ञातात्मतत्त्वानामभावाज्ज्ञानसंततेः ॥१५०८॥
अन्त्यो ऽविद्यापनुद्धो रागादिप्रत्ययोत्थितेः ।
इति चेन्नैतदेवं स्यादाद्ये ऽनैकान्तिकत्वतः ॥१५०९॥

If (it is argued:) Because in the case of them who have (later on) known the true nature of the Ātman also, there is noticed absence of continuous stream of knowledge [1508cd] (and) it is only the last moment (in their life), (viz. the moment) of knowing which removes ignorance, since (after every moment of knowing) there has arisen the feeling of attachment, (our answer is:) This is not so, because (even) at the first moment of knowing (the nature of Brahman) there would arise the fault of the argument having two (opposite) results. [1509]

नान्त्याविद्यापनद्विद्विरात्मैकविषयत्वतः ।
आद्यात्मबुद्धिवद्वैतोरनैकान्तिकतेक्ष्यते ॥१५१०॥

Not indeed (knowledge) at the last moment (in one's life) removes ignorance, because it has only the Ātman as its object and it would be like the first (earlier) moment of knowing the Ātman and thus here also is there the fault of having two (opposite) results. [1510]

अनैकान्तिकता हेतोस्तद्वत्संततिवादिनः ।
न चाभ्यासात्प्रमाणानि कुर्वन्त्यर्थावबोधनम् ॥१५११॥

This having two (opposite) results by means of knowledge (lit. cause of it) (would occur) in the same way in the case of one who argues the stream of (knowledge) also and the means of knowledge do not bring about the truth of the object of knowing (merely) by their repetition. [1511]

Once the knowledge of the Brahman is acquired, there is no need of repeated use of that means of knowing. The example of a lamp makes this clear. Once a lamp is brought to a place, it reveals the objects there. That is all! This is contrary to the example of taking food. It removes hunger, but not once for all. Hunger returns and, therefore, taking food has to be repeated.

संबन्धमात्राभिव्यक्तेर्व्यञ्जकत्वात्प्रदीपवत् ।
भोजनादौ न च सति ज्ञानसंततिरिष्यते ॥१५१२॥

Since (the means of knowing) has a capacity to reveal (the object) by its mere connection (with the same), as in the case of a lamp, and not as in the case of taking food etc.; therefore, continuity of knowing (in the case of a *jīvanmukta*) is not desired. [1512]

This continues the thought of the second line of the preceding verse. The purpose of the means of knowing is revealing the nature of the object of knowing. There should not be repetition of an attempt to know the Brahman.

तदन्तरायबाहुल्यात्सुषुप्तादौ च नेष्यते ।
प्रत्यक्प्रमेयपूर्वेवं सर्वासां नो यतो धियाम् ।
सूतिराम्रेडनं तस्मात्सिद्धमात्मधियः सदा ॥१५१३॥

And (i.e. but) in the state of deep sleep etc.¹ it is not accepted, because there are many hindrances to it. Since again there is impulse of all our cognitions (i.e. intellect) preceded by the inner self,² the object of knowing, therefore it is established that there is (the necessity of) repetition of the knowing of the Ātman. [1513]

This can yet be an argument against the thought of the preceding verses.

¹The word etc. refers to swoon, utter destruction of the world and *asamprajñāta samādhi*.

²This is characterized by *aham*, viz. Ego.

ज्ञानस्य वस्तुतन्त्रत्वान्न कर्त्रनुविधायिता ।
शीतोष्णज्ञानवत्तस्मान्नेष्यते ज्ञानसंततिः ॥१५१४॥

Since knowledge (of the Brahman) depends on the thing itself, it is not what is to be accomplished by (the performance of) some agent; and is like the experience of cold and heat; therefore, continuous stream of knowledge is not accepted.

[1514]

भोजनादिनिरोधेन संततिश्चेत्समर्थ्यते ।

उक्ता परिहृतिस्तत्र न भूयो ऽपि व्यपेक्ष्यते ॥१५१५॥

If continuity (of the knowledge of Brahman) is justified by (pointing out) obstruction (caused) by food etc.; then, in that respect (*tatra*), we have (already) stated the argument in refutation of it¹; it is not desired² (to be given) once again. [1515]

¹Cf. *jñānasya vastutantratvāt* above.

²Text and translation adopt the variant reading *vyapekṣyate*. The textual reading is rejected.

क्षुत्पिपासापरिम्लानचेतस्त्वान्नितरां न सा ।

भोजनादिनिरोधेन न च तस्याः प्रमेक्ष्यते ॥१५१६॥

That (=continuous stream of knowledge) is not at all (there) because the mind of the person is overpowered by hunger and desire, in the case of obstruction (caused by) food etc.; the awareness of it (i.e. nature of the Ātman) is not noticeable.

[1516]

संतत्यारम्भकधियामियत्तानवधारणात् ।

शास्त्रार्थानिश्चयो दोषः स चानिष्टः प्रसज्यते ॥१५१७॥

In the case of them who hold that there is a beginning of the continuous stream of knowledge, there is no specification (possible) of its magnitude and there follows the contingent fault, viz. indecision regarding the meaning of the Śruti; and that is not desired.

[1517]

मतं संततिमात्रत्वे निश्चितिः स्यात्तथापि च ।

अनैकान्तिकता हेतोराद्यसंततिवद्भवेत् ॥१५१८॥

If it is held that there would be decision at least in that there is the continuity (of the awareness); there would be the fault of having two opposite conclusions (from it) as in the case of the continuity of knowledge in respect of the first moment (of experience).

[1518]

समानविषयत्वे ऽपि नाद्याविद्यां निहन्ति चेत् ।
ज्ञानसंततिरन्त्या नः सेत्स्यतीत्यत्र का प्रमा ॥१५१९॥

When there is but one object of knowing and the first (posited stream of knowledge) does not destroy ignorance; then what correctness would there be in saying that the final moment of knowledge will result for us (into liberation)? [1519]

This verse explains *anaikāntikatā* of *hetu* as mentioned in the preceding verse.

मरणे ऽपि न विश्वासो हिकिकावशवर्तिनः ।
ज्ञानसंततिनिष्पत्तौ तमोमात्रसमाप्तिः ॥१५२०॥

In the case of a person who is overpowered by hiccups, at the time of his death, there is no decision about truth by (any) stream of knowledge, overpowered as it is by darkness (viz. ignorance). [1520]

कर्म्मच्छिद्रेषु कुर्वन्ति ये ऽपि सम्यग्धिद्यं बलात् ।
नूनं ते नासिकाग्रेण वीक्षन्ते सूर्यमडलम् ॥१५२१॥

And those, who achieve right knowledge (lit. the knowledge of the Brahman) even while there are shortcomings in their (performance of ritual) activities, are indeed looking at the sun's orb through the tip of the nose. [1521]

Thus the Siddhāntin proves the impossibility of achieving the knowledge of the Brahman and thereby the final release by ritual performance (even if they are defective).

वस्तुतन्त्रं न हि ज्ञानं नृतन्त्रं लोकवहिवत् ।
अनन्यज्ञातृकत्वाच्च प्रत्यग्ज्ञानस्य सर्वदा ॥१५२२॥

Knowledge (which) is indeed dependent on the thing (of Reality) is not like (the maintenance of) fire in the common world dependent on a man (i.e. his activity), because knowledge of

the inner self is to be acquired by no other knower.¹ [1522]

¹That is, none other than the inner self.

न चानिर्वर्तकं ज्ञानं प्रत्यङ्मोहस्य युज्यते ।
स्वानुभूतिविरुद्धत्वादग्निदाहादिबोधवत् ॥१५२३॥

Further, it is not properly argued that knowledge (on the part of an individual) is what does not ward off ignorance about the inner self, for (that would be) opposed to one's own experience which is similar to (the experience of) the burning sensation caused by fire etc.¹ [1523]

¹The word etc. refers to the cool touch of water.

सर्ववेदान्तवाक्यानामेतावन्मात्रनिष्ठतः ।
न चार्थवादता तेषामन्याशेषत्वकारणात् ॥१५२४॥

Since all the sentences of the Vedānta are related only to this much (viz. the exposition of the true nature of the inner self), they do not have the character of a eulogistic statement, for the reason that they are not subordinate to any other (ritual etc.) [1524]

This refutes the idea that the Vedānta sentences could be treated as eulogistic statements (Arthavāda). Cf. discussion on *sarvo 'py ayam vedah* ...; SV 556ff., particularly 568-575.

अहंधीविषयत्वाच्चेत्तेषां स्यादर्थवादता ।
नोक्तत्वात्परिहारस्य न चाहंगम्यतात्मनः ॥१५२५॥

If (one would say:) They have the character of a eulogistic statement, since they pertain to the sense of Ego. (The answer is:) No, because the refutation in respect of this has been already made (lit. stated) by us; indeed the Ātman is not to be known by the sense of Ego. [1525]

The answer has the following argument: *ahamdhigamyah pramātā*,

tatsākṣiṇo brahmatvaṃ vedāntā bodhayanti (NKL).

अहंबुद्ध्येक्ष्यते प्रत्यक्प्रतीचा चाप्यहंमतिः ।
अन्योन्याश्रयता दोषः स्यादहंवृत्तिविक्षणे ॥१५२६॥

(The answer is: In the above argument) the sense of Ego expects (i.e. depends on) the inner self and the inner self also (expects) the sense of Ego — thus there is the fault of mutual dependence in holding (lit. seeing) the theory of such functioning of Ego.¹ [1526]

¹That is, the function of Ego in seeing the inner self.

यत एवमतो यो नः प्रत्यक्संमोहहानिकृत् ।
आद्योऽन्त्यः संततो वासौ बोधो मुक्तिफलः स्मृतः ॥१५२७॥

Since this is so, therefore, that which is for us the first (i.e. an earlier) experience (of the inner self) or even the last one which brings about the destruction of ignorance about the inner self, and is continuous (and therefore) is accepted by us as the one resulting into liberation. [1527]

The Siddhāntin states that he does not make any distinction between the first or the last (=the one occurring at the time of death) experience in relation to liberation.

Verses 1528-1557 refute the argument that knowledge does not remove ignorance, for one notices attachment etc. on the part of knowers of Reality, by explaining the nature of a 'jīvanmukta'.

यत्तत्तं ज्ञाततत्त्वानामपि रागादिदर्शनात् ।
नाविद्याहानिकृज्ज्ञानमत्र प्रतिविधीयते ॥१५२८॥

As to what is said,¹ viz. there is noticed a feeling of attachment etc. on the part of them who have known the true nature (of the individual self) also¹ and their knowledge does not therefore effect the removal of ignorance — this is now refuted.

¹In verse 1509 above.

²The word also indicates: even the ignorant ones.

आरब्धफलशेषैकहेतुत्वाद्देहसंस्थितेः ।
रागादिप्रत्ययोद्धृतिरिषुचक्रादिवेगवत् ॥१५२९॥

(This is so)¹, because there remains the body on account of the mere remainder of the fruit (of the actions) which have begun (to show it) and the rise of the experience of attachment etc. there is just like the speed of an arrow or a wheel etc. [1529]

This asserts the known maxim: *prārabdhakarmanām bhogād eva kṣayaḥ*. The author refers to the well-known example of an arrow which when shot stops only after its speed is arrested; similar is the case of a rotating wheel.

¹This refers to *rāgādidarśana* in the case of those who have known the nature of the Ātman.

तस्य वृत्तफलत्वान्नो ज्ञानं स्यात्तन्निवृत्तिकृत् ।
अतीतत्वाच्च तद्धान्यै नालमात्मावबोधनम् ॥१५३०॥

Since the fruit has already occurred, in the case of that person (who has acquired the knowledge of the Brahman), his knowledge would not be the cause of the removal of that (ritual activity) and the knowledge of (the true nature of) the Ātman is not necessary (lit. capable) for the abandoning of that which has already occurred. [1530]

SP compares the thought in the first half of the verse to *Sāṃkhyapravācanasūtra* 3.82: *tiṣṭhatīsaṃskāravaśāccakrabhramaṇavaddhṛtaśarīrah*.

यत्तु स्वात्माश्रयं कर्म ह्यनारब्धफलं भवेत् ।
उत्पितस्वनागतं कृत्स्नं ज्ञानं हन्ति तदेव नः ॥१५३१॥

But whatever be (the action) related to the Ātman and has

not begun to show its fruits — the knowledge which is about to occur or the one which has not (yet) occurred will alone destroy all that for us. [1531]

अनारब्धफलं कर्म न त्वारब्धफलं यदि ।
निरुणद्ध्यात्मविज्ञानं तदानिष्टम् प्रसज्यते ॥१५३२॥

If the knowledge of (the true nature of) the Ātman does not obstruct (ritual) activity which has not begun to show its fruit (in the same way as) that which has begun to show its fruit, then there forcefully follows (the) undesired (result).¹ [1532]

¹That means opposition to the Śruti like *kṣīyante cāśya karmāṇi tasmin drṣṭe parāvare* (Munḍakopaniṣad 2.2.8).

प्रारब्धात्मफलं नो चेत्कर्म ज्ञानं निवर्तयेत् ।
अनारब्धफलं हन्तीत्यत्रापि स्यान्न निश्चितिः ॥१५३३॥

If knowledge of (the true nature of) the Ātman does not ward away (ritual) activity which has begun to show fruit, then there would not be any certainty that it would destroy (that ritual activity) also which has not begun to show its fruits! [1533]

न चेदारब्धकार्येषु ज्ञानस्वातन्त्र्यमिष्यते ।
अनारब्धेषु नितरां पुंसो ऽपि स्याद्यथेष्टता ॥१५३४॥

If it is not accepted that knowledge has freedom (i.e. capacity to destroy) in respect of those (ritual activities) which have begun to show their results, then in the case of a person there would certainly be wanton behaviour. [1534]

न च तेषु निरुद्धेषु किञ्चिन्नः स्यात्प्रयोजनम् ।
प्राङ्मृतेर्मुक्त्यसंसिद्धेरबीजत्वाच्च संसृतेः ॥१५३५॥

And in case they¹ are obstructed, we would not have any purpose whatsoever in life before death, so long as there has not occurred liberation and since (consequent upon death) transmigratory existence would not have any seed for it. [1535]

¹ *ārabdhakāryakarmasu* referred to in the preceding verse.

सर्वसंहारकाले च निरोधो ऽभूदशेषतः ।
तावानपि न पर्याप्तो निरोधो मुक्तये कथम् ॥१५३६॥
अल्पीयोहःसमभ्यस्तो निरोधो ऽलं विमुक्तये ।
भावनोपचयान्नापि मुक्तिः स्याद्भङ्गुरत्वतः ॥१५३७॥

And, further, at the time of destruction of all (beings and things), there has been cessation of (lit. obstruction to) (all activities) in their entirety.¹ How would not that much² obstruction (to ritual activity) be capable of effecting liberation?

[1536]

Obstruction (to performance of ritual activity) carried on (even) for few days (by acquiring the knowledge of the Ātman) is capable of leading to liberation; but there would not be liberation like (in the other case), since there is increase of desire for ritual activity and because of its being liable to perish.

[1537]

¹This is to oppose the view of the followers of Yoga who hold that *cittavṛttinirodha* leads to liberation. No importance is attached to the knowledge of the Ātman by them.

²This refers to the obstruction to ritual activity caused by the knowledge of the Brahman, acquired in one's life-time, before death (i.e. in the state of *jīvanmukti*).

दुःख्यस्मीत्यपि चेद्धवस्ता कोटिकल्पोपबृंहिता ।
अल्पीयोभ्यासजा साध्वी भावनेत्यत्र का प्रमा ॥१५३८॥

(One would ask:) What proof is there that there is produced a good impulse by short-time-application (to the activity of acquiring the knowledge of the Brahman), in case (the feeling) 'I am unhappy.', which has become strong in the large number of previous *kalpas* gets destroyed?

[1538]

शास्त्रार्थस्य समाप्तेश्च मुक्तिः स्यात्तावता मितेः ।
रागादयः सन्तु कामं न तद्भावो ऽपराद्ध्यति ॥१५३९॥

(This is said in answer:) There is liberation, because of the fulfilment of the purpose of the Śruti (to that effect), viz. liberation by that much right knowledge; let there be the feelings of attachment etc., their being there does not in any way affect the occurrence of liberation. [1539]

आगमाद्वेद चेद्ब्रह्म ब्रह्मैव भवतीति हि ।
फलावस्थस्य च सतः कुतो रागादिसंप्लुतिः ॥१५४०॥

Since if one knew the Brahman from tradition of the Veda (or from the Śruti) 'He would indeed be the Brahman.', how could there be overpowering by attachment etc. of the one who is in the state of liberation (which is) the fruit? [1540]

This verse explains the second line of the preceding verse.

न च ब्रह्मपरिज्ञानहुताशाप्लुष्टमण्वपि ।
संभाव्यते ब्रह्मधियः सर्वान्त्यत्वैकहेतुतः ॥१५४१॥

Further, there cannot be even a little thing which is not burnt by the fire in the form of complete knowledge of the Brahman on the part of one who has acquired the knowledge of the Brahman, for it is the one cause of the end of all (other things). [1541]

सम्यग्ज्ञानविरुद्धा धीर्न चैकात्म्यं विजानतः ।
उत्पद्यते निर्विषया विषयाशयहानतः ॥१५४२॥

And there does not arise on the part of one who has known the uniqueness of the Ātman any awareness which is opposed to right knowledge. There arises on the part of him a knowledge which has no object, since there has been abandonment of the contents of all objects. [1542]

लोके ऽनिर्ज्ञाततत्त्वस्य मिथ्याधीरुपजायते ।
प्रध्वस्ततत्त्वतमसः कुतः स्यात्कारणादृते ॥१५४३॥

In the world there arises false knowledge on the part of one

who has not determined the true nature of the Ātman; how could that (=false knowledge) be (on the part of one) who has destroyed the darkness which had earlier overpowered that truth, unless there was any reason?¹ [1543]

¹There is right knowledge, therefore that happening is not at all possible.

सम्यग्ज्ञाने ऽपि चेत्सा स्यादविश्रम्भः प्रसज्यते ।
एवं सत्यप्रमाणत्वं मितेश्चापि प्रसज्यते ॥१५४४॥

Supposing it¹ would be there even when was right knowledge (on the part of one), then there would be the contingency of disbelief in (the teaching of the Śruti) and, this being so, even right knowledge would cease to be an authoritative means of knowing. [1544]

¹It refers to *mithyājñāna* mentioned in the preceding verse.

सम्यङ्मिथ्याधियोऽर्थस्माद्विशेषो नोपलभ्यते ।
व्यवहारस्य लोपो ऽतः सर्वस्य स्यादसंशयः ॥१५४५॥

(And that being so),¹ since there would be no difference noticeable between right knowledge and false knowledge, therefore there would be a doubtless (i.e. decided) loss of the entire dealing (of human beings). [1545]

¹This means: if there is *miter apramāṇatva* (which is stated in the preceding verse).

सम्यग्ज्ञानसमुत्पत्तिसमनन्तरमेव च ।
शरीरपातः कस्मान्नेत्येतच्चाप्यपहस्तितम् ॥१५४६॥
पूर्वोक्तेनैव न्यायेन वक्तव्यं नावशिष्यते ।

As to the question, 'why there is no fall of the body immediately after the rise of right knowledge?', that also is refuted [1546]

by the very reason already stated.¹ (As such), there is nothing

left to be said.

[1547ab]

¹Namely, the argument already stated in verse 1529 above and note thereon, viz. *prārabdhakarmāṇām bhogād eva kṣayaḥ*.

ज्ञानोत्पत्तावतो ध्वस्तिः सर्वेषामपि कर्मणाम् ॥१५४७॥
यथैधांसि समिद्धो ऽग्निर्भस्मसात्कुरुते ऽर्जुन ।
ज्ञानाग्निः सर्वकर्माणि भस्मसात्कुरुते तथा ॥१५४८॥

Therefore, when there arises knowledge (viz. the true nature of the Self), there is destruction of all the (ritual) activities also. (The following is said by the Lord in this context:) As an enkindled fire renders fuel sticks to ashes, O Arjuna, so does the fire of knowledge render to ashes all actions of man.¹

[1547cd-1548]

¹*Gītā* 4.37.

सर्वदृष्टान्तसारूप्यप्रसक्तौ तन्निषेधकृत् ।
तावदेव चिरं तस्येत्यपवादः श्रुतीरितः ॥१५४९॥

Now there might follow contingently the similarity (or, the sameness) of illustrations in their entirety, therefore, there is stated in the Śruti an exception to that in the words, 'For him only that much delay.'¹ which negates that.² (Thus:) —

[1549]

¹For the sake of metre, Sureśvara changes the order of words from *tasya tāvad eva ciram* (CU 6.14.2).

²Namely, the contingent sameness of illustrations.

नेत्रबन्धविनिर्मोकादुपदेशः स्मृतिं प्रति ॥१५५०॥
ततस्तदर्थग्रहणमनुष्ठानं ततः परम् ।
स भूरिगत्युपचयाद्ग्रामाद्ग्रामान्तरं व्रजेत् ॥१५५१॥
सम्यग्ज्ञातोपदेशार्थः स्वयं च प्रतिभानवान् ।
द्राघीयसा स कालेन गन्धारान्प्रतिपद्यते ॥१५५२॥

There is (in CU instruction as to the memory of a country

lost to some person) after removing the bondage on the eyes (of him), [1550]

(and) thereafter, there is (or the part of that person) grasping of the meaning of that (=instruction) and, thereafter, there is some activity (on his part), namely that 'and (then) by going about here and there (lit. variously or a long way) he moves from one village to another — [1551]

(and) having well understood the meaning of the instruction, he himself becomes fully aware¹ (of Reality and) arrives, after some long span of time, at the region of Gāndhāra.' [1552]

This is the summary of CU 6.14.1-2. It seeks to answer away the contingent similarity with the illustrations in entirety.

¹Knowing fully the bearings of the country etc.

यथैवमेवेहापि स्याद्य इहाचार्यवानरः ।

निःशेषदृष्टान्तोक्त्यर्थप्रसक्तिविनिवृत्तये ।

अपवादं श्रुतिरियं तस्य त्विति जगाद नः ॥१५५३॥

As this (happens), so here also it would be (i.e. happen) (in the case of) a person who has a teacher.¹ And then, in order to ward away the contingent meaning of the (similarity with) illustration in its fullness, this Śruti declared to us *tasya tu ...*², as an exception.³ [1553]

¹He obtains the knowledge of the true nature of their inner self.

²*tasya tu ...* is for *tasya tāvad eva ciram ...* (CU 6.14.2); as seen in the next verse.

³A statement for excluding some contingent matter.

तस्य त्वेवंविदः पुंसस्तावदेव चिरं भवेत् ।

यावदैकात्म्यसंमोहपट्टको नापनीयते ॥१५५४॥

In the case of that person, who knows thus; there is only that much delay so long as the bondage of ignorance about the uniqueness of the Ātman is not removed (from his eyes).

[1554]

This is explanation of the last line of the preceding verse.

प्रत्यग्याथात्म्यविज्ञानजन्मनो नातिरेकभाक् ।
प्रत्यङ्मोहाभिनहनद्वंसश्चाप्यन्यथामतेः ॥१५५५॥

And the removal, lit. destruction of the bondage of ignorance about (the inner self) in the case of one, who had a notion (about it) as other (than what it really is), is not apart from¹ the rise of the knowledge of the true nature of the inner self. [1555]

¹It literally means: is not in addition to ...

तस्माद्याथात्म्यविज्ञानसमुत्पत्तेः पुरैव तु ।
आत्माज्ञानं सकार्यं स्यात्तस्य बाध्यत्वकारणात् ॥१५५६॥

Therefore, only before the rise of the knowledge of the true nature of, Self there exists (on the part of a person) ignorance about the inner self together with its effects, because there has existed (earlier) the cause of its obstruction. [1556]

यस्मिन्प्राप्ते यद्ववति तत्तस्मात्स्यात्कथं पुरा ।
अन्त्यं तस्मात्परिज्ञानं सर्वबाध्यस्य बाधकम् ॥१५५७॥

(The objector asks:) How could a thing exist before that which obtaining (only) it obtains? Therefore, knowledge which stultifies all that is to be stultified is what exists last. [1557]

This objection pertains to the dispute about the state of *jīvanmukti*, which results from acquisition of knowledge about the true nature of the Ātman at some moment in life, and the state after realising the nature of the Brahman at the time of death. The idea of the objector is that, in the state of *jīvanmukti*, there would not be any existence which is already stultified by the knowledge of the Brahman. It is only logical that the last moment in one's life stultifies every worldly thing.

This is the conclusion of the discussion.

ऋणिनो ऽप्यस्य देवाद्या नेशते ब्रह्मवेदिनः ।
इत्युक्तं किंनिमित्तं चेत्तत्र प्रतिविधीयते ॥१५५८॥

[Verses 1558-1562 state that even the gods cannot take liberty to stop one's attaining liberation.]

If (it is asked:) What is the reason for the statement that gods and others do not have control over this knower of the Brahman, even though he is bound in debt to them? (To this) an answer is given (now): [1558]

This question has a basis in verses 1507-1508 above.

न विज्ञातात्मयाथात्म्यं प्रत्यृणित्वं भवेद्यतः ।
अविद्याविषयं तत्स्यात्तस्य कर्तृत्वकारणात् ॥१५५९॥

The state of being indebted (to gods and others) would not be on the part of him who has known the true nature of the Self, since that (state) is within the purview of ignorance for the reason that his nature of an agent (of some activity is understood thereby). [1559]

यत्र वा अन्यदित्यादि तथा च श्रुतिशासनम् ।
द्वस्ताविद्यस्य तन्न स्यात्तस्यैकात्म्यस्वभावतः ॥१५६०॥

And to that effect is there the instruction in the Śruti *yatra* ...¹ or *anyad* ...² and so on. That³ would not be on the part of one whose ignorance is destroyed, since his nature is now that of the unique Ātman.⁴ [1560]

¹BU 4.5.15: *yatra tv asya sarvam ātmaivābhūt*. This is referred to in verses 571, 1185 and 1505 above.

²*Kenopaniṣad* 1.4: *anyad eva tad veditād atho aviditād adhi*. This is referred to in verses 565, 719, 873(note) and 1117 above.

³That is, *karṣṭva*.

⁴That is to say: He is one with the Ātman and, therefore, there

is nothing else that would govern him.

न चेहाविदुषो ऽपि स्यादृणित्वम् हेत्वसंभवात् ।
न किञ्चिन्नः सुरैः प्रत्तमृणित्वं येन नो भवेत् ॥१५६१॥

Further, there is not (in reality) on the part of even a non-knower of the Brahman the state of being bound in debt, because there is no cause (for his being so). Indeed, nothing is given to us by gods on whose account we would be in the state of being bound in debt. [1561]

वचनादिति चेन्नैवं तदुक्तेरर्थवादतः ।
अवदानविधेः शेषो ह्यर्थवादो हि तद्वचः ॥१५६२॥

If (it is argued:) (It is so) because there is a statement in the Śruti (about man's being bound to gods etc. in debt). (It has to be said:) No, that statement is but an Arthavāda¹. Indeed, that statement is an Arthavāda, since it is the remainder of the injunction about the cutting (of the oblation). [1562]

¹It means: the statement of some ancillary matter.

विद्वांसं प्रति नेशाना यदि देवादयो मताः ।
कस्मिन्विषय ऐश्वर्यं तेषां स्यात्सो ऽधुनोच्यते ॥१५६३॥

[Verses 1563-1589 explain the meaning of *atha yo 'nyām.*]

If the gods and others are considered as unable to control a learned man, (then the question is:) In what area do they have a capacity to control? That (particular area) is now stated: [1563]

In three quarters of the verse, the objector has asked a doubt about the meaningfulness or otherwise of the gods and others having a control over human beings. This doubt is answered in the verses which follow.

प्रामाण्यं कर्मकाण्डस्य यस्मिन्विषय इष्यते ।

अविद्याविषयः साक्षादथ यो ऽन्यामितीर्यते ॥१५६४॥

That area (viz. portion) of the Śruti in which its authoritativeness is accepted with reference to rituals is in reality (*sā-kṣāt*) the area of ignorance and that is stated in the words *yo 'nyām ...* [1564]

सम्यग्ज्ञानसमुत्पत्तौ कर्मकार्यसमाप्तिः ।
नापेक्षा कर्मकाण्डे स्यात्तत्प्रामाण्यकृतार्थतः ॥१५६५॥

When there arises right knowledge (about the nature of the Brahman) there is obtainment (of the result of) all the activity and, therefore, there is no expectation of the portions pertaining to rituals, because the purpose of its authority is already fulfilled. [1565]

This verse refers to *karmakārya*.

प्रकृतैकात्म्यविद्याया व्युत्थानायाथगीरियम् ।
न हि संगच्छते विद्याविद्यायोगं विरोधतः ॥१५६६॥

This (use of the word) *atha* is to express the rise of the knowledge of the uniqueness of the Ātman which is the subject matter under discussion, and indeed (that statement) does not go (well) with knowledge and ignorance together on account of their mutual conflict. [1566]

प्रतीच्यनन्य एकस्मिन्नविद्यापिहितेक्षणः ।
अनन्यो ऽप्यात्मनो भिन्नामुपास्ते देवतां नरः ॥१५६७॥

A man whose eye is covered by ignorance in respect of the inner self, which is one without a second, worships a deity other than his own self, even if he is not different from the Ātman. [1567]

अन्यो ऽसाविति वाक्येन व्याख्योपासापदस्य तु ।
भेददर्शनमेवात उपास्त इति भण्यते ॥१५६८॥

In the statement *anyo 'sau* there is the explanation of the term *upāsā*¹; therefore what is said in the word *upāste* is described only as seeing (that is accepting) duality. [1568]

¹See our book [Vol.4:1991] Introduction for a discussion on Upāsana/Upāsanā.

किं मूलं भिन्नदृष्टेः स्यादिति श्रुत्या तदुच्यते ।
न स वेदेत्यविद्येयं नामरूपप्रपञ्चकृत् ॥१५६९॥

(One would ask:) 'What is the root of this notion of distinction (between the Brahman and the other thing)?' and (to answer this,) it is said: The Śruti states *na sa veda*, 'Thus this is ignorance which creates variety in name and form.'. [1569]

आत्माविद्याग्रहग्रस्तः संहतस्तज्जवस्तुभिः ।
स एष पशुतामेति देवादीनां स्वकर्मभिः ॥१५७०॥

This one, who is oppressed by (lit. swallowed by) the evil spirit in the form of ignorance about (the nature of) the Ātman and bound by the objects that are the products of it, becomes by his own activity an animal for gods and others. [1570]

बहूपकारकृद्यद्वज्रवादिलौकिकः पशुः ।
देवादीनां तथाविद्वान्पशुः स्यादुपकारकृत् ॥१५७१॥

As an animal of this world, such as a cow, renders various service (to human beings), so also does an ignorant person, an animal, render service to gods and others. [1571]

एकैकस्वामिको लोके गवादिः पशुरिष्यते ।
ततो ऽप्यतिशयः पुंसां सर्वलोकोपकारिता ॥१५७२॥

In the world, they hold that an animal, such as a cow, has one master, but there is, in the case of human beings, some additional aspect of them, viz. they have usefulness for all the people. [1572]

एकैकक्रियया लोक एकैकस्वामिकः पशुः ।
अनेकैः संहतश्चैवं कदाचिदुपकारकः ॥१५७३॥

In the world, an animal which performs one activity and has one master (for itself) it could at some time be (variously) useful (to the master) as flocked with many others also. [1573]

भरिक्रियावांस्तु नरस्तथानेकेश्वरो ऽवशः ।
एकैको निखिलं विश्वं बिभर्त्यज्ञो दिवानिशम् ॥१५७४॥

As against this (*tu*), a human being, capable of doing many actions, not having one master, a servant, the ignorant one, performs day and night all (numerous duties) without exception, though even a single (person). [1574]

अस्यैवार्थस्य दृष्टान्तो यथा हेत्यभिधीयते ।
यत एवमतो युक्तं देवादेर्भृशमप्रियम् ॥१५७५॥

For conveying this very meaning is here stated the illustration in the words *yathā ha* ...; since this is so, it is reasonable (to hold that) this is very disagreeable to gods and others. [1575]

This is clarified in the next verse.

अपि भरिपशोः पुंस एकस्मिन्नपि तस्करैः ।
हियमाणे पशौ तीव्रं दुःखं समुपजायते ।
किमु सर्वस्वहरणे वक्तव्यं दुःखकारणम् ॥१५७६॥

For a human being who has a large stock of animals, there is a very intense sorrow even when a single animal is stolen away by thieves; how great a cause of sorrow there would be when the all-in-all of his life is taken away (from him)?

[1576]

This is the meaning of the sentence *yathā ca*.

सर्वस्वतुल्ये नृपशौ ब्रह्मधीपरिमोषिणा ॥१५७७॥
 हियमाणे महद्दुःखं तस्मादेषां तदप्रियम् ।
 यद्यथोक्तं परं ब्रह्म मनुष्या विद्युरञ्जसा ॥१५७८॥

Therefore, for these persons it is greatly disagreeable when the animal in the form of man, which is (for them) as good as all of (their) property, is (being) stolen away by the thief in the form the knowledge about the Brahman, for, as is already said, men knew the Brahman clearly. [1577-1578]

This is the meaning of *tasmād eṣām* ...

सर्वाधिकारहेत्वग्निब्रह्मज्ञानस्य जन्मनि ।
 अव्यावृत्ताननुगतात्प्रतीचो ऽन्यन्न शिष्यते ॥१५७९॥

At the rise of the knowledge of the Brahman, which is fire (that burns away) every ground of eligibility (for ritual activity), there does not remain anything else than the inner self which is undifferentiated and not similar to anything (else). [1579]

This explains why the knowledge about the Brahman is called a thief (in the preceding verse).

नावशिष्यत एतस्मात्तदविद्योत्थमण्वपि ।
 प्रध्वस्तत्त्वादविद्याया ब्रह्मात्मज्ञानवहिना ॥१५८०॥

For this reason, not even a little of what had arisen from ignorance about that (viz. the inner self) remains, since ignorance is completely destroyed by the fire in the form of the knowledge of the inner self as the Brahman. [1580]

This refers to the preceding verse.

क्रियावद्भिर्हि कौन्तेय देवलोकः समावृतः ।
 न चैतदिष्टं देवानां मर्त्यैरुपरि वर्तनम् ॥१५८१॥

For, the world of gods is all crowded, O son of Kuntī, by them who perform rituals and this, viz. rising of men above

(their normal condition), is not desired by gods. [1581]

This is *Mahābhārata* 14.19.54; it clarifies the word *apriya* in the text.

तस्मान्मुमुक्षुर्देवादीन्सम्यगाराध्य कर्मभिः ।
उन्मुक्तबन्धनस्तैः सन्नापित्सेज्ज्ञानमात्मनः ॥१५८२॥

Therefore, a person who is desirous of securing liberation should first please the gods through various services, and, having become free from ties (of worldly existence), he should seek to acquire the knowledge of Ātman. [1582]

तद्विपक्षस्तु यो बालो बलादेव मुमुक्षति ।
स्वर्गादेरपि विभ्रष्टो नरकं स निर्गच्छति ॥१५८३॥

But the one who, opposed to him (in nature or action), the ignorant one, would perforce seek to obtain liberation, would fall even from a heaven and go down to the hell. [1583]

प्रमादिनो बहिर्चित्ताः पिशुनाः कलहोत्सुकाः ।
संन्यासिनो ऽपि दृश्यन्ते देवसंदूषिताशयाः ॥१५८४॥

There are seen even ascetics who have mistaken¹, whose mind is prone outwards, who are wicked, who are ever ready to pick up quarrels and who have their minds spoilt by gods.² [1584]

¹Or, who falter or take wrong steps.

²That is, because they are not worshipped by the ascetics.

न कर्मणामनारम्भान्नैष्कर्म्यं पुरुषो ऽश्नुते ।
न च संन्यसनादेव सिद्धिं समधिगच्छति ॥१५८५॥

A man does not become free from *karman* by (mere) not beginning the rituals/activities. Also he does not obtain liberation (or better, *siddhi* 'fulfilment of his life') by only abandoning the same. [1585]

This is *Gītā* 3.4.

कषायं पाचयित्वा तु श्रेणीस्थानेषु च त्रिषु ।
प्रव्रजेच्च परं स्थानं पारिव्राज्यमनुत्तमम् ॥१५८६॥

And, having exhausted (lit. covered) the evil in the three stages of ascending¹, a person should take to the ultimate stage, viz. excellent renunciation. [1586]

This is comparable to *Mahābhārata* 12.237.3 where the second line ends in *parivrajyāmanuttamām*.

¹ *brahmacarya*, *gārhaṣṭhya* and *vānaprastha* are meant.

भावितैः करणैश्चायं बहुसंसारयोनिषु ।
आसादयति शुद्धात्मा मोक्षं वै प्रथमाश्रमे ॥१५८७॥

And this person who, having purified his inner self by means of his various sense-organs that are satisfied in the course of many births in transmigratory existence, indeed obtains liberation (even) in the first stage (of life). [1587]

This is *Mahābhārata* 12.313.26.

तमासाद्य तु मुक्तस्य दृष्टार्थस्य विपरिचितः ।
त्रिष्वश्रमेषु को न्वर्थो भवेत्परमभीप्सतः ॥१५८८॥

And (*tu*) in the case of the person, who has obtained that¹ and is liberated, who has seen the (real) thing, who is an excellent knower, what significance would there be in the three remaining stages when he is desiring for only the highest (bliss of Brahman)? [1588]

This is *Mahābhārata* 12.313.27.

¹ *mukti* stated in verse 1587.

इत्येवं भगवद्व्यासवचांस्यत्र सहस्रशः ।
श्रूयन्ते न्यायदृब्धानि तस्मात्तान्यादराच्छ्रयेत् ॥१५८९॥

This and such other thousands of (i.e. numerous) statements of venerable Vyāsa are heard and they are supported with reasoning; therefore, one should take recourse to them with respect. [1589]

The point of all the statements of Vyāsa is that a person should be worshipful to gods (as stated in BUB).

Now begins the explanation of BU 1.4.11-13.

शास्त्रार्थः सूत्रितस्तावदात्मेत्येवेति यत्नतः ।
उक्तश्च तस्य सूत्रस्य संबन्धः सप्रयोजनः ॥१५९०॥

[Verses 1590-1597 narrate the origination of the four Varnas.]

Thus, the meaning of the Śruti, has been carefully explained in brief in the words *ātmety eva* and its relation to the Sūtrātman (i.e. Hiranyagarbha), has also been stated together with the purpose of the same. [1590]

संसारानर्थहेतुत्वमविद्यायाश्च वर्णितम् ।
यो ऽन्यामित्यादिवाक्येन तत्कार्यमपि सूत्रितम् ॥१५९१॥

Further, there has been pointed out how ignorance is the cause of all the undesirable in the transmigratory world and its effect also is expounded by the statement *yo 'nyām ...* [1591]

विद्यावत्सह कार्येण ह्यविद्यापीह सूत्रिता ।
सामर्थ्याद्विस्तरस्तस्या आध्यायान्तादिहोच्यते ॥१५९२॥

Like the knowledge of the Brahman, ignorance, together with its effect also has been expounded here because of the propriety (of it in this context) — this is stated at length up to the end of this chapter. [1592]

यथोक्तात्मानभिज्ञो यो ऽविद्याकार्याभिमानवान् ।
पशुवद्देवताः पाति स जुहोत्यादिकर्माभिः ॥१५९३॥

He, who is a non-knower of the Ātman as already described and has the Ego that he does activity (which is really) ignorance,¹ serves², like animals, the deities by the performance of rituals of offering etc. [1593]

¹That is, which is really under the influence of ignorance.

²This is a peculiar use of the verb root $\sqrt{pā}$ (in the sense of *upa-√kr*) 'to render service to'.

आध्यायावसितेस्तस्मादविद्याया विभूतयः ।
वक्ष्यन्ते विस्तरेणातः परो ग्रन्थो ऽवतार्यते ॥१५९४॥

Therefore, up to the end of the chapter are described at length the various forms (lit. excellences) of ignorance; as such, now is introduced the subsequent (part of the) text. [1594]

अस्यैवार्थस्य सिद्ध्यर्थमग्निसर्गादनन्तरम् ।
इन्द्रादिसर्गः प्राङ्नोक्तो मोहकार्यविवक्षया ॥१५९५॥

In order to establish this very thought it is that after (the description of) the creation of fire (the description) of Indra and others was not stated earlier; this was with a desire to expound (the nature of) the effects of ignorance. [1595]

परिपूरणाय सृष्टेस्तु ह्यग्निसर्गः पुरोदितः ।
यत एवमतो ऽविद्याकार्यो ऽनर्थो ऽखिलो भवेत् ॥१५९६॥

Since the creation of Agni was mentioned earlier with a view to completing (the description of) the creation. Since this is so, the entire creation of undesirable effects, which is to be produced by ignorance, would be similarly (described). [1596]

इन्द्रादिसर्गस्तत्रैव तच्छेषत्वात्समीक्ष्यताम् ।
अविद्याकार्यसिद्ध्यर्थमिह त्वस्य प्रपञ्चनम् ॥१५९७॥

The creation of Indra and others should have been described just there, since it is subordinate to that¹ — thus this should

be accepted; yet, it is explained at length here for revealing fully the effects of ignorance. [1597]

¹ *sr̥ṣṭi* of the preceding verse.

स्रष्टृ यज्जगतः पूर्वमात्मैवेत्यभिनिर्दिष्टम् ।
तदग्न्याद्यभिमान्यत्र ब्रह्मेति व्यपदिश्यते ॥१५९८॥

[Verses 1598-1613 explain the meaning of *brahma vā*.]

That creator of the world, which was earlier mentioned by the word *ātman* itself¹, is here mentioned (now) as the Brahman, having the notion that it is fire etc. [1598]

This verse points to but one significance of the two words *ātman* used earlier and *brahman* now. Thus, there is continuity of but one thought.

¹Refer to BU 1.4.1.

ब्रह्मैकजात्यवच्छिन्नं यस्मादग्रे व्यवर्तत ।
नानेकजातिमद्वेतुकर्मणे ऽलं ततो भवेत् ॥१५९९॥

Since the Brahman existed in the beginning as marked by only one caste, viz. Brāhmaṇa, and was not having more than one caste; therefore it was not capable of activity. [1599]

This explains *ekam eva*.

The idea of the four castes as found in *Gītā* 4.13: *cāturvarṇyaṃ mayā sr̥ṣṭam guṇakarmavibhāgaśaḥ* is explained by Sureśvara.

चातुर्वर्ण्यप्रसाध्यं सन्नैकजातिप्रसाधनम् ।
कर्मांलं सिद्धये लोके शिबिकोद्वहनं यथा ॥१६००॥

Being what can be accomplished by four castes, activity, which has many castes as its agents, is not possible to come into effect like the bearing of a palanquin. [1600]

All the social functions are not carried out by one caste, viz.

the Brāhmaṇa caste; they were carried out by all the castes working together. This is clarified by the illustration of a palanquin which is borne by more persons than one.

गृहीतिरभिषिक्तानामिन्द्रादीनां श्रुतौ श्रुता ।
श्रेयोरूपप्रसिद्ध्यर्थं क्षत्रस्येत्यवगम्यते ॥१६०१॥

It is heard in the Śruti and it is understood that there is acceptance of Indra and others, who are consecrated, for declaring the excellent forms of the Kṣatriya¹ caste. [1601]

This conveys the purport of *yāny etāni*.

¹The Kṣatriya is recognised in society as the most excellent being. This is because Indra and others are also considered as the most capable of gods, the one who was consecrated.

धर्मान्तैः संहतैर्यस्मात्कर्म सिद्ध्यति नान्यथा ।
तेन तेन विना शक्तमतस्तत्तदचीकलृपत् ॥१६०२॥

Since activity is accomplished by all of them, ending in *dharma*, together and not otherwise; therefore, the Brāhmaṇa created everyone of them as capable (in a limited measure¹) without each one of them. [1602]

¹Translation follows the reading of the verse in both the editions NKL and AnSS, viz. *vinā śaktam* as separate words; but we suspect that the proper reading may be *vināśaktam* = *vinā aśaktam*. Therefore to justify the reading of the text we have added '(in a limited measure)' but we are still not happy with it. Further, it would have been better to accept the variant in the AnSS edition *saṃtataih* after *dharmāntaiḥ*, not *sahitaiḥ*.

ब्रह्मासृजद्यतः क्षत्रमात्मनो ऽप्यतिवीर्यवत् ।
बलवत्क्षत्रतस्तस्मान्नान्यद्वृत्तमिहेष्यते ॥१६०३॥

Since the Brahman created the Kṣatriya (caste), very much stronger than itself, therefore, no other being is known (lit. accepted) as stronger than the Kṣatriya. [1603]

This explains *tasmāt kṣatrāt*.

तस्माच्च ब्राह्मणो ऽध्यस्ताद्राजसूये महाक्रतौ ।
आसन्दीस्थमुपास्ते त्वं राजन्ब्रह्मेति संभ्रमात् ॥१६०४॥

And, for this reason, the Brāhmaṇa takes, in the great sacrifice (called) Rājasūya, his seat on bare earth (lit. below), with the notion¹ (about the king:) 'You are, O King, a Brāhmaṇa.'

[1604]

This explains *tasmād brāhmaṇah*.

¹The word *sambhrama* does not express doubt; it signifies uncertainty which is caused by ignorance.

ब्रह्मेति श्रावितो राज्ञा ब्रह्मा प्रत्याह तं नृपम् ।
त्वमेव राजन्ब्रह्मेति क्षत्रे तद्यश आत्मनः ॥१६०५॥
दधाति भास्वद्ब्रह्माख्यं यस्मिन्सर्वं प्रतिष्ठितम् ।
क्षत्रस्य योनिर्ब्रह्मेदं क्षत्रं ह्याविरभूततः ॥१६०६॥
यतो ऽतो यद्यपि क्षत्रं ब्राह्मण्यं प्रतिपद्यते ॥१६०७॥

The priest, who was addressed by the king 'O Brāhmaṇa', answered the king: 'You yourself are the Brāhmaṇa, O King.' In (doing) this, he places in the Kṣatriya his own bright lustre, called Brahman, in which everything is resting. Since this Brāhmaṇahood is the origin of the Kṣatriya, the Kṣatriya arose from that,

[1605-1606]

therefore, even though a Kṣatriya, he attains Brāhmaṇahood.¹

[1607]

¹In the Rājasūya sacrifice, the king is consecrated for the performance and he is taken to have become a Brāhmaṇa. He so remains till the completion of his sacrifice. This is clarified in the following verse.

परमत्वं तथाप्यन्ते राजसूयक्रतोः पुनः ।
उपनिश्रयति ब्रह्म गुणभावेन पूर्ववत् ॥१६०८॥

So also, at the end of the (great) sacrifice Rājasūya the state of the highest resorts to the Brāhmaṇa (clan/person) as his quality, once again, even as before. [1608]

ब्रह्मैव चान्ततः क्षत्रमुपनिश्रयतीत्यतः ।
ऋतुकालैव ब्रह्माप्तिः क्षत्रस्येत्यवसीयते ॥१६०९॥

Since, finally the Brāhmaṇa himself resorts to the Kṣatriya, therefore, it is concluded that obtaining the status of the Brāhmaṇa by a Kṣatriya is only for the duration of the sacrificial performance. [1609]

स्वां योनिमिति हेतूक्तिः कार्यं कारणसंश्रयम् ।
न हि कारणतो ऽन्यत्र वृत्तिः कार्यात्मनः क्वचित् ।
ब्रह्मैककारणो राजा तस्माद्ब्रह्मैव संश्रितः ॥१६१०॥

This Śruti statement *svām yonim* is a statement about the cause or origin, since an effect which depends on (its) cause is not any time present anywhere else than in the cause; therefore, the king who is brought into existence by the Brāhmaṇa resorts to the same. [1610]

यस्तु बाहुबलोन्मत्तः स्वां योनिं ब्राह्मणं नृपः ।
वाङ्मात्रेणापि सक्रोधो हिनस्तीह प्रमादतः ॥१६११॥
ब्रह्मोपमर्दनात्पापः प्रागपि क्रूरकर्मकृत् ।
ततो ऽपि पापात्पापीयान्स स्याद्ब्रह्मापवादतः ॥१६१२॥

But a king who, proud of his prowess, full of anger, would harm a Brāhmaṇa, who is his origin, even by this speech (or) through a fault [1611]
shall, by insulting the Brāhmaṇa, be a sinner, a doer of cruel act already¹ and, for that reason also, viz. by slighting the Brāhmaṇa he would be a greater sinner than any. [1612]

¹That is, by nature.

उत्तमाभिजनोपेतं भूर्युदारगुणं द्विजम् ।
यथा श्रेयांसं हिंसित्वा पापीयान्स्यात्तथैव सः ॥१६१३॥

Similarly, he would be greater sinner by harming his superior, a Brāhmaṇa, who was born in the highest family and who had many excellent qualities. [1613]

This clarifies the idea expressed in verses 1611-1612.

Now follows in verses 1614-1633 an exposition of BU 1.4.14, pertaining to the origin of Dharma etc.

सृष्ट्वापि चतुरो वर्णान्व्यवस्थाकारणं विना ।
कर्मणे नैव पर्याप्तं ब्रह्माभूत्पूर्ववत्ततः ॥१६१४॥
ब्रह्मक्षत्रादिरूपाणि यतो ऽतीत्यासृजत्प्रभुः ।
श्रेयोरूपस्ततो धर्मः सर्वानप्यनुशास्त्यसौ ॥१६१५॥

Even after creating the four castes, yet without (producing) the cause of governing¹ them, the Brāhmaṇa could not be sufficiently able to accomplish his (desired) duties²; (and) then, [1614]

since the great Lord created (Dharma) beyond the various forms, viz. Brāhmaṇa, Kṣatriya etc., therefore, Dharma which is of the best form governs all of them (created before). [1615]

The words *dharmāntaiḥ sahitaiḥ* in verse 1602 above appear to be justified here.

¹That is, the governing principle.

²The singular form *karmaṇe* stands for *karmabhyah*— these are duties/activities prescribed by Dharmaśāstra.

तदेतत्सृष्टं धर्माख्यं क्षत्रस्याधिपतेरपि ।
प्रशास्तृ तद्व्याघस्मात्क्षत्रं भीतं प्रवर्तते ॥१६१६॥

Thus is created this principle called Dharma governing even the ruler, the Kṣatriya; (and), for that reason, being afraid of it, the Kṣatriya, full of fear, proceeds (to do his duties).

[1616]

क्षत्रस्यापि यतो धर्मः साक्षादधिपोतेस्ततः ।

धर्मादन्यन्महद्भूतं न भूतं न भविष्यति ॥१६१७॥

Since Dharma is the actual ruler even of a Kṣatriya, therefore, there is no other thing greater than Dharma, (viz.) that which ever was and will ever be. [1617]

This explains *tasmād dharmād param nāsti*.

श्रेयोरूपप्रसिद्ध्यर्थं प्रसिद्धिरुपवर्ण्यते ।
अथो इत्यादिना धर्माविशिष्टत्वावबुद्धये ॥१६१८॥

Now with the words *atho* ... there is described the origin of Dharma in order that its excellent form is established and also that one knows the excellence of Dharma. [1618]

This is the purport of *atho abaliyān baliyāṃsam āśamsate dharmena yathā rājñāivam*.

¹ *dharmaviśiṣṭatva-* = *dharmasya viśiṣṭatva-*.

आशंसते बलीयांसमबलीयानपि स्वयम् ।
धर्मं बलं समाश्रित्य जेतुं लोके तथा यथा ॥१६१९॥
राज्ञा बलेनाल्पबलो बलीयांसं कुटुम्बिनम् ।
जेतुमाशंसते तस्माद्धर्मः स्याद्वलवत्तमः ॥१६२०॥

As a weaker person, expects to be successful in the world, resorting, on his own, to a stronger person, i.e. strength; so also having resorted to Dharma, viz. the *strength*, in order to overcome (lit. win), in (this) world, [1619]
one, who has small strength, seeks to prevail over a stronger family-man through the king, viz. the strength. Therefore, Dharma is the strongest. [1620]

This is another explanation of *yathā rājñāivam*.

बलीयसापि राज्ञेह स्पर्धमानो ऽबलो ऽपि सन् ।
जेतुमुत्सहते भूपं धर्मात्मकबलाश्रयात् ॥१६२१॥

(Therefore) a person, being weak and (yet) vying with even

a strong king, would dare to conquer that king by resorting to the strength in the form of Dharma. [1621]

एतदेव यतो ज्यायो रूपं धर्मेत्युदाहृतम् ।
रूपान्तरेभ्यः सर्वेभ्यस्तद्धि सत्यात्मकं यतः ॥१६२२॥

Since it is said that this very form, called Dharma, is greater than all other forms (of life), therefore, that¹ has the nature of the truth. [1622]

This is the purport of *yo vai sa dharmah ... ubhayam bhavati*.

¹The construe is: *tat (rūpam) hi ...* and the last word *yatah* is to be read for *tatah*.

तस्यास्य धर्मरूपस्य कार्यकारणतां मिथः ।
यो वै स धर्म इत्युक्त्या वक्तुं प्रवृत्ते श्रुतिः ॥१६२३॥

Therefore does the Śruti proceed with the words *yo vai sa dharmah* to declare the mutual relation of that¹ and this (which is called) Dharma, namely their being mutually the cause and the effect. [1623]

¹That is, truth; the construe is: *tasya (satyasya) asya dharmasya ... mithah ...*

प्रयोगलक्षणो यो ऽयं श्रुतिस्मृत्युदितो मतः ।
स धर्म इति विज्ञेयः सत्यं शास्त्रार्थलक्षणम् ॥१६२४॥

This one, which has *employment*¹ as its characteristic, as prescribed (lit. stated) by the Śruti and the Smṛti, is to be known as that Dharma, and truth is characterized as the thing conveyed by the meaning of the Śāstra.² [1624]

This verse points out that Dharma is a matter of performance and *satya* 'truth' of knowledge.

¹The word *prayoga* means: the employment or procedure in ritual performance.

²This refers to the meaning of the Vedānta sentences.

अक्षरानुगतो ऽप्यर्थो यदि संशय्यते तदा ।
नित्यप्रयोगरूपोत्थविज्ञानात्तद्विनिश्चितिः ॥१६२५॥

If the meaning conveyed by the letters (i.e. words in the Śāstra) is doubted, then it is determined from the knowledge that arises from its daily performances. [1625]

This and the next verse explain how Dharma and *satya* are mutually cause/effect.

¹See note 2 on the preceding verse.

प्रयोगे ऽपि च संशीतौ वाक्यार्थज्ञानसंश्रयात् ।
निर्णुदेत्संशयं प्राज्ञ एवमन्योन्यहेतुता ॥१६२६॥

And the wise one would remove his doubt, in case a doubt arises as regards *employment* by resorting to the knowledge which arises from the meaning of the sentence — thus is here mutual dependence. [1626]

यथा प्रयोगमुल्लङ्घ्य व्याख्यातुं शक्नुयात्सुधीः ।
यथाशास्त्रं तथोल्लङ्घ्य कर्तुं शक्नोत्यथापरः ॥१६२७॥

As a very intelligent person could explain (some ritual), without paying attention to ¹ (actual) *employment*, so can another person perform (ritual) without paying attention to (what is prescribed) according to the Dharmaśāstra (text). [1627]

This supplies the reason as to why they have accepted mutual dependence of Śāstra and *prayoga* as said in the preceding verse.

¹In other words, disregarding (actual) ...

अतथ्यान्यपि तथ्यानि दर्शयन्तीह वादिनः ।
समे निम्नोन्नतानीव चित्रकर्मविदो जनाः ॥१६२८॥

(For example) disputants present even untruths as truths as a person who knows the art of painting can show ups and

downs on even a flat (surface).

[1628]

शास्त्रार्थस्तत्प्रयोगश्च यदा त्वन्योन्यसंश्रयात् ।
प्रवर्तते तदा कर्तुर्न प्रमादो मनागपि ॥१६२९॥

But (ca) when the meaning of the Śruti and *employment* are operative, with mutual dependence, there is not even a little blemish on the part of a performer.

[1629]

नायं धर्म इति ज्ञेयो यो ऽयं सृष्टाविहेरितः ।
क्षत्रादिनियमाशक्तेस्तस्याचैतन्यरूपतः ॥१६३०॥

This, which is described in relation to this creation as Dharma, should not be (really) known as Dharma since it has no capacity for controlling the Kṣatriya and others and also because it does not have (for its purport) the form of sentience. [1630]

Now is introduced another meaning of the word 'dharma'—earlier it referred to ritual activity such as Agnihotra, prescribed by scriptural texts (shown by us as Dharma); this indicated apūrva or adrṣṭa. This was understood in 'tato dharmam śreyorūpam asṛjata'.

देवता तु ह्यधिष्ठात्री धर्मो ऽस्मीत्यभिमानिनी ।
सैवेह सृज्यते धात्रा नियमार्थप्रसिद्धये ॥१६३१॥

However, the superintending deity (of a ritual activity) has a strong feeling 'I am Dharma.' and that itself is created by the creator with a view to effecting control (over the creation).

[1631]

The Mīmāṃsā principle is that Dharma is insentient; it cannot act in the way described in the preceding verse. Therefore, they have acknowledged the need of a deity which superintends over a ritual activity.

धर्मस्यैव तु रूपेण देवता रूपिणी मता ।
तन्नाम्ना नामवत्येवं देवतान्तरयोजना ॥१६३२॥

And (*tu*) the deity is understood to be having a form, through that of Dharma (superintended over by it) has a form; so also, it has a name on account of the name of that — thus is the arrangement in respect of other deities. [1632]

This is to express the meaning of *dharma*.

एकैव देवता तस्मान्नामरूपाद्युपाधिभिः ।
आभाति बहुरूपेव तत्पराधीनचैतसाम् ॥१६३३॥

Therefore, there is (in reality) but one deity which appears to them whose minds are prone to it as having many forms on account of its having various delimiting adjuncts such as names and forms. [1633]

This establishes non-duality as the Reality.

Verses 1634-1779 explain the contents of BU 1.4.15.

यथोक्तार्थोपसंहार उत्तरार्थविवक्षया ।
ब्राह्मणस्य पुरानुक्तेस्तदुक्त्यर्था परा श्रुतिः ॥१६३४॥

(This is) the conclusion of the matter so far stated; (now), with a desire to explain the next (lit. subsequent) thought, proceeds the subsequent Śruti, since (the nature of) the Brāhmaṇa¹ is not stated before. [1634]

In the previous verse, there is concluded the discussion of *cāturvarṇya*. Now, this and the next three verses state the purport of *tad etad brahma kṣatram viṭ sūdraḥ*.

¹*brāhmaṇasya* = *brāhmaṇatvasya* (SP). Earlier, only the Kṣatriya among the gods was stated. Now, *agninaiva* ... will state Agni as the Brāhmaṇa among them.

दैववर्णविभागस्य मनुष्येष्वपि भण्यते ।
विनियोगो यथोक्तो ऽयं वर्णानां प्रविभागशः ॥१६३५॥

This so far described arrangement in respect of the division of castes of gods is mentioned in respect of men also by specifying the division of their castes. [1635]

In BU 1.4.6 was mentioned only the kindling of fire, not its Brāhmaṇahood. That is now stated in *tad agninaiva ...*

क्षत्रादीनां पुरोक्तत्वादनुक्तेर्ब्राह्मणस्य च ।
को न्वेषु ब्राह्मण इति चोदिते स्यात्परा श्रुतिः ॥१६३६॥

Since (the origin of) Kṣatriya and others was mentioned earlier and (that of) Brāhmaṇa was not mentioned, the subsequent Śruti proceeds (to state that), as urged by the question, 'Who amongst them is indeed Brāhmaṇa?' [1636]

देवतायाः समाख्यातो विभागो वर्णसंश्रयः ।
तत्पूर्वको मनुष्येषु विभागस्त्वधुनोच्यते ॥१६३७॥

Division of gods¹ with reference to castes is already enumerated; and now is stated the division among men², as preceded (or caused) by that. [1637]

¹This is *jātav ekavacana*. As such, *devatāyāḥ* = *devatānām*.

²The words 'into castes' are to be supplied after 'men'.

यदग्निनाभवद्ब्रह्म देवेष्वविकृतं नृषु ।
ब्राह्मणेन तदेवाभूद्ब्रह्मैवाविकृतात्मना ॥१६३८॥

That unmodified Brahman which appeared (lit. became) among gods as Agni itself appeared among men as Brāhmaṇa, in its unmodified nature. [1638]

Now follows the explanation of 'tad agninā ...'.

या जातिर्ब्राह्मणत्वाख्या साग्निरेवेति निश्चितिः ।
जातिरूपेण सा स्थित्वा जातिमेव नियच्छति ॥१६३९॥

What genus is called Brāhmaṇahood is but Agni itself — this

is the decision. Remaining in the form of the genus, it controls the (whole) class (of Brāhmaṇa). [1639]

This is to explain the *sāmānādhikarāṇya* of Agni and Brāhmaṇa in *agnir brāhmaṇaḥ*. Agni, the deity is the controller and the individuals in the Brāhmaṇa clan are the controlled. This relation justifies the *sāmānādhikarāṇya* in *agnir (eva) brāhmaṇaḥ*.

आग्नेयो ब्राह्मणश्चातस्तत्संबन्धाच्छ्रुतौ श्रुतः ।
अनुग्रहनियन्तृत्वे ब्राह्मणस्याग्नितो यतः ॥१६४०॥

Therefore, a Brāhmaṇa is heard in the Śruti text as a protégé of Agni, i.e. on account of his connection with that (Agni), since the capacity in a Brāhmaṇa for (doing) favour and (effecting) governance is from Agni. [1640]

Cf. *āgneyo vai brāhmaṇaḥ* (untraceable).

नियम्यमानो दैवेन क्षत्रियेण मनुष्यगः ।
इक्ष्वाकवादिरभूत्पूर्वः क्षत्रियस्तद्वदुत्तरः ॥१६४१॥

(So also), being controlled by (the divine Kṣatriya) there came into existence (Kṣatriyas)¹ among men, viz. Ikṣvāku and others; in the same way, later (two groups of castes came into existence). [1641]

ब्रह्मैवाविकृतं यस्मात्पूर्वयोर्विकृतिं पुनः ।
क्षत्रियादौ समापेदे तेनाग्निब्राह्मणाश्रयात् ॥१६४२॥
कामितार्थस्य संसिद्धिः कर्मिणां कामिनामिह ।
स्थित्वाग्नौ ब्राह्मणे चेह लोकमीप्सन्ति कर्मिणः ॥१६४३॥

Since the unmodified Brahman itself attains modification of the first two¹, viz. in Kṣatriya and others; therefore, by resorting to Agni and Brāhmaṇa, [1642]
there is attainment of the desired objects of those who, with desire, perform ritual activities. And,² here (i.e. in this world), persons who perform ritual activities desire (for enjoyment³) after depending on Agni and Brāhmaṇa. [1643]

This is the explanation of popular belief regarding importance of Agni and Brāhmaṇa in rituals on the basis of the philosophical position taken; *avikṛta brahman* is Agni in gods and Brāhmaṇa in human beings.

¹Namely, Agni and Brāhmaṇa.

²It means: Therefore.

³It literally means: the world full of objects of enjoyment for it.

कर्मकार्यश्च लोको ऽत्र ज्ञेयो ऽग्न्यादिसमाश्रयात् ।
प्रत्यग्याथात्म्यधीमात्रात्परलोकाप्तिरिष्यते ॥१६४४॥

[Verses 1644-1658 refute the view of Bhartṛprapañca in respect of the belief mentioned in the two preceding verses.]

Here¹, the word *loka* is to understand to be what is to be produced by ritual activity (performed) by resorting to Agni etc.² (And) attainment of the yonder world is sought only by (acquiring) the knowledge of the true nature of the inner self.

[1644]

¹This means: in respect of ritual performances.

²The effect of ritual activity indicates impermanence of what is achieved by men through their performances. This is in opposition to the view of Bhartṛprapañca, as reported by SP, viz. that the words *karmakāryaś ca lokaḥ* refer to the obtainment of the highest Ātman.

The word etc. stands for Brāhmaṇa; cf. *agnibrāhmaṇāśrayāt* in verse 1642 above.

अजातशत्रुजनकसुलभादिनिदर्शनात् ।
अविद्योत्थाधिकाराच्च लोकोक्तिर्न परात्मनि ॥१६४५॥

From the illustrations of Ajātaśatru, Janaka and Sulabha and others as also from (the statement of) the qualification (for the performance of rituals) which really arise from ignorance, (it follows that) the mention of *loka* does not pertain to the

highest Ātman.

[1645]

This justifies the argument against the view of Bhartṛprapañca which is mentioned in note 2 on the preceding verse. There are two arguments: (i) Illustrations of Ajātaśatru etc. and (ii) the mention of different qualification(s) which are, as already pointed out, based on ignorance.

अव्याकृतव्याकरणात्स्वाभिप्रायाच्च नेष्यते ।
अव्याकृतव्याकरणरूपाभ्यां छाद्यते परः ॥१६४६॥

(The view: *loka* means *paramātmān*) is not accepted (by the Siddhāntin for two reasons:) (i) (It) has a basis in differentiation of the undifferentiated; (ii) his own view, viz. the highest (Brahman) is wrapped by the two forms, viz the undifferentiated and the differentiation;¹

[1646]

¹Refer to BU 1.4.7: *tad dhedaṃ tarhi vyākṛtāvyākṛta- ...* and also BU 1.4.10: *atho yo 'nyām ...* This is accepted by Bhartṛprapañca also.

आविष्कृतिस्तन्निषेधादन्यदेवेति च श्रुतेः ॥१६४७॥
उत्तरत्र स्वशब्देन लोकस्य च विशेषणात् ।
कर्मणां फलमेवात्र लोकशब्देन भण्यते ॥१६४८॥

and also (iii) from (a statement in) the Śruti, viz. *anyad eva ...* (that is first) the expression (of modification) and then (there is) its negation (also);

[1647]

and (iv) yet later on there is the qualifying of *loka* by the word *sva*. Thus, here¹, the word *loka* expresses only the fruit of (the ritual) activities.

[1648]

This has a reference to *lokam icchate*.

¹Refer to the verse 1644 above.

लोकशब्देन संप्राप्तं कर्मकार्यमपेक्ष्य हि ।
स्वगिरानात्मनो लोकाद्विशिनष्ट्यात्मरूपकम् ॥१६४९॥

Keeping in view only the effect of ritual activity which is understood from the word *loka*, the Śruti (under consideration) distinguishes the form of the (Supreme) Self from the non-Ātman, by (using) the word *loka*. [1649]

This implies that, in Bhartṛprapañca's view, *sva* cannot and does not qualify *loka*.

स्वत्वेनाव्यभिचारित्वाद्यभ्यभिचारादनात्मनः ।
कर्मकार्यनिवृत्त्यर्थमर्थवत्स्याद्विशेषणम् ॥१६५०॥

That qualifying word (viz. *sva*) would be meaningful (i.e. useful) for setting aside the effect of ritual activity by its being invariably in its own form and by being variably associated with the non-Ātman. [1650]

त्रयाणामपि वर्णानां श्रुतौ संन्यासदर्शनात् ।
ब्राह्मणस्यैव संन्यास इति श्रुत्या विरुध्यते ॥१६५१॥

Since we notice in the Śruti (the mention of) renunciation with reference to all the three castes, therefore, (the view that) renunciation is only for a Brāhmaṇa is opposed by the Śruti. [1651]

This verse points out that Śaṅkara's view is opposed to the content of the Śruti.

SP refers to the Smṛti which is included by NKL edition as under verse 1651, without any number, because NKL cites it by the *Pratīka japyenaiva*. The editor of NKL invites attention to this. It may be possible that NKL has incorporated the full verse of the *Manusmṛti* into the main text because SP writes *nanu japyenaiva tu saṁsidhyet ityādismṛteḥ* ... The verse under reference is *Manusmṛti* 2.87. All this becomes relevant upon Śaṅkara's reference to Manu's verse in his Bhāṣya under 1.4.14 (almost towards the end) and also his remark there: *pārivṛājyadarśanāc ca. tasmād brāhmaṇa-va eva manuṣyeṣu lokam karmaphalam icchanti*.

लिङ्गं च न्यायरहितं प्रामाण्याय न कल्पते ।
ब्राह्मणोक्तिबलात्तस्मात्कामितो ऽर्थो न सिद्ध्यति ॥१६५२॥

And any indication, which is not in keeping with the accepted rule of interpretation, cannot become authoritative; therefore, on the strength of a statement about a Brāhmaṇa (in another Śruti), cannot be established the argument which you desire (to establish). [1652]

SP points to verses in the *Mahābhārata* which show that even a Kṣatriya can decide to renounce. Cf. 1.110.7-8 and also verse: *gatvā nāgapuram vācyam pāṇḍuḥ pravrajito vanam*. SP and NKL quote 7-8 and *pauravṛddhās ca ye tatra nivasanty asmadāśrayāḥ / prasādyā sarve vaktavyāḥ pāṇḍuḥ pravrajito vane //* (not in critical ed.).

उपलक्षणं वा तद्ग्राह्यं ब्राह्मणग्रहणं श्रुतौ ।
ब्राह्मणस्य प्रधानत्वाद्युक्तं तदुपलक्षणम् ॥१६५३॥

Or rather, that mention of the word *brāhmaṇa* (in respect of Saṃnyāsa) is to be accepted as an indication (of those who are eligible for renunciation); (and) that indication is reason- able for the reason that a Brāhmaṇa has the status of the principal (persons of among all the castes). [1653]

SP refers to *brāhmaṇaprādhānya* on the basis of *mukhajānām ayam ...*

NKL editor reads: *upalakṣaṇam ca tad ...*, thereby showing that this verse is syntactically connected with the preceding – as the part of a compound sentence.

ब्राह्मणत्वात्मलाभो ऽपि यः स्यात्क्षत्रियवैश्ययोः ।
स्वमहिम्ना तयोर्नासावग्निब्राह्मणसंश्रयात् ॥१६५४॥

(There can be an objector's view:) Even when there has been obtaining of Brāhmaṇahood on the part of a Kṣatriya and/or a Vaiśya,¹ that was on account of their own (great) capacity and not because they had taken recourse to Agni and Brāh-

maṇa.

[1654]

¹This refers to the performance of a Rājasūya and a Vaiśyastoma sacrifice by the two respectively.

ब्राह्मणं न ह्यनाश्रित्य राजसूयादिहेतुकः ।
ब्राह्मणत्वाभिसंबन्धः प्राधान्यं तेन पूर्वयोः ॥१६५५॥

(The objection is thus answered:) Connection with Brāhmaṇa-hood (of a Kṣatriya etc.¹) which results from the Rājasūya etc.² is not without taking recourse to a Brāhmaṇa; therefore, there has been greater importance (lit. principal significance) of the former two (viz. Agni and Brāhmaṇa). [1655]

This is a statement by Vyatireka.
In matters of sacrifice, Agni and Brāhmaṇa are considered as more important because Kṣatriya and others have to take recourse to them. Only this much is the principal significance.

¹Reference to Vaiśya is implied.
²Reference to Vaiśyastoma is implied.

वर्णान्तरगतापेक्षा नाग्निब्राह्मणयोस्तथा ।
ब्राह्मणः स्वमहिम्नैव पुरुषार्थं समश्नुते ॥१६५६॥

Such is not the case of Agni and Brāhmaṇa that they have to depend on any other caste; a Brāhmaṇa secures the fulfilment of the end of human endeavour by his own greatness. [1656]

अग्निब्राह्मणयोर्हेतुः प्राधान्ये भण्यते स्फुटः ।
एताभ्यामेव रूपाभ्यां यतो ब्रह्माभवत्स्वयम् ॥१६५७॥

(Now) is stated the evident reason for the principal significance of Agni and Brāhmaṇa, viz. in these very two forms, indeed did the Brahman reveal itself. [1657]

This explains *etābhyām* ...

अग्निब्राह्मणयोर्यस्माद्ब्रह्म साक्षादभूत्परा ।
विट्क्षत्रयोर्व्यवहितं प्राधान्यं तेन पूर्वयोः ॥१६५८॥

Since first the Brahman became manifest first to Agni and Brāhmaṇa remained, and for the Kṣatriya and Vaiśya it concealed, therefore, the former two (viz. Agni and Brāhmaṇa) have the principal significance. [1658]

This explains the purpose of *svayam*.

ब्रह्मेति जातिरेवात्र ग्राह्या न तु पराक्षरम् ।
तत्कारणत्वात्सर्वस्य हेतूक्तिस्तत्र दुर्घटा ॥१६५९॥

[Verses 1659-1666 refute Bhartṛprapañca's explanation of the word *brahman* in *etābhyām hi rūpābhyām brahmābhavat*.]

Here (in the word *brahmaloka*) it should be understood that the word *brahman* signifies only the class and not the highest immutable (Brahman), since it is the origin of all, it is difficult to make a statement in that respect (*tatra*). [1659]

This means that no particular quality of the Brahman can be established, though some particular qualities of Agni and Brāhmaṇa can be thought of. Therefore, when we have to talk about the origin of any thing, we have to refer to Agni and Brāhmaṇa, i.e. *jāti*.

सर्वेषां प्रत्यगात्मत्वात्पक्षपातो ऽपि नेष्यते ।
अग्निब्राह्मणयोर्विष्णोस्तावन्मात्रसमाप्तिः ॥१६६०॥

Owing to (the fact) that all beings are of the nature of the inner self, such a partial attitude¹ is not acceptable in respect of (the superiority) of Agni and Brāhmaṇa, for (already) the all-pervader² who has (already) obtained (it) by that much.

[1660]

¹That is, predilection for holding Agni and Brāhmaṇa as the most superior.

²This is based on the derivation of the word from the verb root \sqrt{vis} 'to pervade'.

ब्रह्मैवेदं विश्वमिति साक्षादाम्नायशासनम् ।
विद्याविनयसंपन्न इति च स्मृतिशासनम् ॥१६६१॥

That all this is only the Brahman is the direct affirmation of the Śruti and that 'one possessed of knowledge, modesty ...' is the affirmation in the Smṛti.¹ [1661]

This supplies the basis for saying that all is but the Brahman.

¹This is an adjective of Brāhmaṇa stated in *Gītā* 5.18.

क्षत्रादाविव तुल्याग्निविप्रयोर्विकृतिर्दृशेः ।
तेजोबन्नादिभूतानां तुल्या सत्कारणात्मता ॥१६६२॥

As there is the same modification of the seer¹ in Agni and Brāhmaṇa as in Kṣatriya and others, so also, in the case of the elements, viz. fire, water, food etc., there is the same nature of having the existent as the cause.² [1662]

¹The seer stands for the Brahman, all-knower and *sat* in *satkāraṇātmatā* refers to the Brahman.

²Cf. CU 6.8.4: *sanmūlāḥ somyemāḥ sarvāḥ prajāḥ*.

अग्निब्राह्मणरूपेण ब्रह्म साक्षाद्व्यवस्थितम् ।
तत्प्राप्तौ हेतुताग्न्यादेरिति निर्होक्वागियम् ॥१६६३॥

The Brahman has revealed itself directly in the forms of Agni and Brāhmaṇa; therefore, the statement that Agni etc.¹ are the cause of acquiring that² is but a statement (made) without any sense of shame. [1663]

¹The word etc. stands for Brāhmaṇa.

²Namely, the Brahman.

वर्णाश्रमादिसर्गो ऽयं कर्मार्थो ब्रह्मणः स्मृतः ।
धर्माख्यं कर्म च ज्ञेयं स्वाधिकारनियन्तृतः ॥१६६४॥

[Verses 1664-1669 explain *atha yo ha vā* according to both Bhartṛprapañca and the author.]

This creation of the castes and the stages of life is known to be for the sake of (accomplishing) the activity of the Brahman and that activity has to be known by the name Dharma, since it is the controller¹ of its own duty.² [1664]

¹This has a basis in the well-known Smṛti statement *dharmo dhārayate prajāḥ*; cf. verse 1631 above.

²*karman* is literally activity. Supply: enjoined on it.

तेनैव कर्मणा मुक्तिं प्राप्स्यामः शास्वतीं वयम् ।
अज्ञात्वैव परं तत्त्वमेवं प्राप्ते परा श्रुतिः ॥१६६५॥

Here (one might say:) We shall obtain eternal liberation by that very (ritual) activity, without (even) knowing the highest truth. This being the position, there is the subsequent Śruti (as an answer:) [1665]

नियन्ता चाभिमन्ता च ब्राह्मणत्वस्य हव्यवाट् ।
कर्मैवाग्नेर्नियन्तु स्यात्कर्मणो देवता तथा ॥१६६६॥

Agni is the controller of Brāhmaṇahood and also has the Ego of it; activity alone is the controller of Agni and so also (is Agni) the deity of the activity. [1666]

This is the view of Bhartṛprapañca whose devotion to Agni is well-known and very frequently mentioned by Sureśvara.

स्यादेतदग्निरेवैनं ब्रह्मभावाय वक्ष्यति ।
अदृष्टात्मतत्त्वमपि तच्च नैवोपपद्यते ॥१६६७॥

Let it be so; (but) Agni itself will lead¹ this one to attainment (of the status) of the Brahman and the truth, which has the nature of *adr̥ṣṭa*, does not stand to reason. [1667]

Here is a statement about the outcome of the relation of the controller and the controlled mentioned in previous verse.

¹Verb *vakṣyati* is from verb root \sqrt{vah} 'to lead'.

व्याचक्षते परं ग्रन्थमेवंसंबन्धपूर्वकम् ।
न कश्चित्फलभेदो ऽत्र तस्मादुभयथापि सन् ॥१६६८॥

They explain the subsequent part of this Śruti (also) as preceded by this kind of relation (to ritual activity); (but) there is not here any distinction of the fruit, be it (explained) in (this) twofold way. [1668]

This emphasises the ultimate end, viz. liberation, as resulting from knowledge; therefore, even the view of Bhartṛprapañca cannot be set aside as ununderstandable.

न कर्मणा भवेन्मुक्तिर्नापि चाग्निसमाश्रयात् ।
ज्ञानादेव तु कैवल्यमज्ञानादेव नास्ति तत् ॥१६६९॥

Liberation is not (achieved) through activity; not also by devotion (lit. resorting) to Agni; but liberation comes only from knowledge and only from ignorance¹ it is not (possible). [1669]

This is the purport of the Vedānta sentence under discussion, according to both the views.

¹It refers to *karman*, the result of ignorance.

आशङ्कितनिवृत्त्यर्थमथेत्यत्र प्रयुज्यते ।
ह वा इति प्रसिद्ध्यर्थं मुक्तिर्न ज्ञानतो ऽन्यतः ॥१६७०॥

In this context, the word *atha* is employed for warding off whatever could be expressed as doubt and the words *ha vā* (are used) for establishing that liberation does not come from anything else than knowledge. [1670]

कर्म कृत्स्नं समाप्यापि तत्त्वज्ञानाद्बहिष्कृतः ।
लभते निर्वृतिं नैव ज्ञानादेव हि सा यतः ॥१६७१॥

[Verses 1671-1691 explain the meaning of the sentence *atha yo ha vā ...*; verse 1671 states the meaning of *atha*.]

A person, who is kept away from¹ the knowledge of the true nature of Reality (i.e. Brahman), does not at all obtain the highest bliss even if he has accomplished all ritual activities, because that (liberation) results from knowledge alone. [1671]

¹That is, who has remained without the knowledge.

अस्वैः पिण्डादिभिर्योग आ विरिञ्चादविद्यया ।
प्रतीचस्तद्व्युदासार्थं स्वं लोकमिति शब्दघटे ॥१६७२॥

It is on account of ignorance that the inner self is in union with bodies etc., beginning with (the body of) Viriñca, which are not its own; therefore, in order to avert (the idea of) that,¹ it is said (in the Śruti) *svam lokam*. [1672]

¹Namely, *asvapinḍayoga*.

अज्ञानिनः स्यान्मरणं संसर्गः कारणात्मनि ।
ज्ञानाद्धवान्तनिवृत्तिस्तु मरणं स्याद्विपरिचिताम् ॥१६७३॥

In the case of an ignorant person, death would mean union with his own cause; but (*tu*), in the case of the knowers (of the Brahman), death is the remover of darkness by knowledge. [1673]

This is with a view to explaining *asmāt lokāt*.

In the case of ignorant persons, their bodies etc. merge into the elements; there is no liberation. In the case of the knower of the Brahman, the result is only liberation.

मृत्योर्मृत्यवपरिज्ञानादज्ञस्य मरणं तमः ।
अविद्वन्मृतिसिद्ध्यर्थमस्माल्लोकादितीर्यते ॥१६७४॥

In the case of an ignorant (person), since there is no knowledge

of death as *Mṛtyu*,¹ his death is only darkness; therefore, in order to explain the nature of the death of the non-knowing², it is said 'from this world'. [1674]

¹Refer to our book [Vol.3:1990] — but the stress is here on *ajñāna* — that is called *Mṛtyu*.

²That is, one who does not know the Brahman, ignorant person (already mentioned).

अज्ञात्वैव परं देवमागमापायरूपिणः ।
 अस्वभूताद्देहलोकान्म्रयते यो ऽवशो नरः ॥१६७५॥
 अज्ञाततत्त्वः स परो न भुनक्ति ह्यतद्विदम् ।
 कैवल्यफलदानेन प्रत्यगात्मापि सन्परः ॥१६७६॥

The helpless¹ person, who departs from (lit. dies) in this world of bodies which has not been his and which has been in the form of those coming and those going; without even knowing the highest Lord (thre Brahman), [1675] is he who has not known the true nature of that (viz. the Brahman). The highest (Brahman) does not protect² him who does not know the same by granting to him liberation, though the highest (Brahman) is (his) inner self. [1676]

This is the meaning of the sentence.

These verses explain the nature of the death of the common man who does not know the nature of the Brahman. Though the Brahman is within him as his inner self, it does not bring to him liberation.

¹It literally means: who cannot control himself.

²Verb root \sqrt{bhuj} has the sense: to protect (SP, NKL). Possibly *bhunakti* is equivalent of the suppressed causal form of the verb *bhojayantu* — a Vedic tendency in Sureśvara.

तद्दृष्टिमात्रतः सिद्धेर्नान्यतस्तदवाप्यते ।
 मोहमात्रान्तरायत्वात्तत्कर्माणि न मुक्तये ॥१६७७॥

That (highest Brahman) is obtained only by the seeing of that (i.e. acquiring the lore of the Brahman); this acquisition does

not result from (lit. is not secured from) any other thing. Therefore, a person's ritual activity is not sufficient (for effecting) liberation for him — there is the obstacle only of ignorance. [1677]

This is the meaning of *sā enam* ... This is to set aside a possible argument that the highest, even remaining unknown, would offer protection to a performer of rituals.

Seeing of the Brahman is itself the removal of ignorance.

वेदस्य ग्रहणं यद्वन्न स्यादध्ययनादृते ।
कृष्यादि वान्यदकृतं कर्म नालं फलाय च ॥१६७८॥

As one cannot grasp (the meaning of) the Veda without pursuing one's own (daily) study¹ of it, so also agriculture etc. or any other activity (which may not have been performed) cannot be the cause of the fruit. [1678]

¹This refers to the compulsory study of Veda according to the Vedic dictum (*svādhyāyo 'dhyetavyaḥ*). SP refers to *dharmajijñāsā-sūtra*, *vinādhyayanam na svādhyāyagrahanam arthavat*.

भूरि कर्म करिष्यामि तत्फलानन्त्यसिद्धये ।
कर्मणो ऽचिन्त्यशक्तित्वान्नैवमप्युपपद्यते ॥१६७९॥
अप्रज्ञातात्मतत्त्वः सन्यदि नाम दिवानिशम् ।
कल्पकोटिसहस्राणि कुर्यात्कर्म महच्छुभम् ॥१६८०॥
तदप्यस्य तथाभूतमन्तवत्त्वात्प्रतिक्षणम् ।
विध्वंसमेत्यपचयात्कोष्ठागारादिवद्ध्रुवम् ॥१६८१॥

(One might say:) I shall do quite a lot of (ritual) activity to secure great abundance (lit. infiniteness) of its fruit, because activity has unthinkable power. (In reply the following is said:) But this also does not stand to reason — [1679]

(A person), being a non-knower of the true nature of the Ātman, might well perform plenty of holy ritual for thousands of crores of *kalpas*; even then that kind of activity of this one meets destruction every moment, because of its perishability and, by (such) reduction, it certainly perishes as a store-house

of grains etc. (gets exhausted).

[1680-1681]

This sets aside the argument understood in *yad iha vā ... anevamvin mahat puṇyam karoti*.

Sureśvara emphasises the transitoriness and final loss of *karman* and its fruit by using the simile in the verse.

SP points out that this is the meaning of *tad yatheha karmajitaḥ ...* (CU 8.1.6) *iyādiśruter ity arthaḥ*.

कृतस्य हि क्षयो ऽवश्यमकृतस्याक्षयात्मता ।
प्रसिद्धातीव जगति श्रुत्यैवं तेन भण्यते ॥१६८२॥

Indeed whatever is made (i.e. produced as an effect) does necessarily (or, invariably) perish and what is not made (i.e. not effected) has the nature of permanence — this is well-known in the world and, as such, it is stated by the Śruti (also).

[1682]

उक्तदोषापनक्तिः स्यात्कथमस्येति चोदिते ।
आत्मानमिति निर्वृत्ति श्रुतिः परिहृतिं पराम् ॥१६८३॥

[Verses 1683-1691 discuss the meaning of *ātmānam eva loka upāsita*, by stating a question and its answer.]

(Therefore,) when it was asked as to how there could be the removal of the fault (earlier) stated,¹ the Śruti states the following refutation (in the words) *ātmānam ...*

[1683]

¹Namely, liberation would be impermanent, if it were the result of ritual activity; cf. verses 1680-1681 above.

निःशेषानात्मसंदृष्टिनिराकरणसिद्धये ।
एवेत्यवधृतिर्ज्ञेया प्रत्यङ्मात्रेक्षणाय तु ॥१६८४॥

The word *eva* is to be understood as specification (or, emphasising) of merely seeing¹ only (the true nature of) the inner self in order to secure the removal of the seeing of all non-Ātman objects.

[1684]

This explains the purposeful use of *eva* and its meaning which follows the Śruti.

¹Or, knowing.

प्रत्यङ्मात्रदृशः पुंसो न न्याय्यः स्यात्समुच्चयः ।
ब्रह्मात्मनि समाप्तस्य न तदन्यार्थशेषता ॥१६८५॥

(Further,) combination (of knowledge and ritual activity) would not stand as reasonable in the case of a person who sees only the inner self; (the end of human endeavour) being obtained (only) in the Brahman as the Ātman, there does not remain his dependence on anything else¹. [1685]

This is the meaning of *eva* at the verbal level (*ārthika*).

¹Or, it literally means: ... remain anything else to be obtained.

क्षयः कर्मफलस्योक्तः कृतकत्वसमन्वयात् ।
न क्षयो ज्ञानकार्यस्य कृतकत्वाद्यसंभवात् ॥१६८६॥
प्रत्यङ्मात्रैकयाथात्म्यात्क्षेत्रक्षेत्रज्ञवस्तुनः ।
तस्मिञ्ज्ञाते ऽखिलं ज्ञातं सर्वाज्ञाननिराकृतेः ॥१६८७॥

It is declared that the fruit of activity has an end because it has an inherent relation to being what is produced; but there is no end of what is effected by knowledge, since there is impossibility of its being what is produced; [1686]

since the thing called the knower of the field is in its true nature merely the inner self, therefore, that being known, all else is known, since there has been the removal of all ignorance.

[1687]

This argument is against the view that liberation, being a product of knowing (*dhikārya*), is impermanent.

सर्वसाधनसाध्यं च सुखं यच्चाप्यभीप्सितम् ।
सर्वानन्दैकहेतुत्वाद्ब्रह्माप्तौ प्राप्तमेव तत् ॥१६८८॥
यद्यत्कामयते कामी कर्मभूमाववस्थितः ।
अस्मादेवात्मविज्ञानात्तत्तत्सुखमुपाश्नुते ॥१६८९॥

And whatever (be the) happiness, that can be acquired by all the different means and is therefore desired, is all of it obtained when the Brahman, the source of all delight is known.

[1688]

Whatever a person, who is full of desires, longs for while he rests on the performance of activity, is all of it what he enjoys from this every knowledge of Self.

[1689]

This connects the sentence *yad yat kāmāyate* ... with the preceding statement.

सहस्रदशभागद्ध्या सुखानन्त्यं परात्मनः ।

वक्ष्यते सर्वसौख्याप्तिस्तस्मिन्दृष्टे परात्मनि ॥१६९०॥

It will be declared that the highest Ātman has¹ infinite happiness owing to its richness in thousands and tens (of the same) and that there is obtainment of all happiness when the highest (Ātman) is seen.

[1690]

¹That is, affords.

अन्तर्भावः परानन्दे सुखानामाविरिञ्चतः ।

अस्माद्ध्येवेति वाक्येन सर्वेषां नः प्रबोध्यते ॥१६९१॥

There is inclusion of all happinesses beginning from (that of) Viriñca in the highest delight (viz. in the Brahman) and this is made known to all of us all by the sentence *asmād eva*

...

[1691]

Verses 1692-1707 present the meaning of 'ātmānam eva lokam upāsita' as discussed by Bhartṛprapañca.

स्थिते ऽप्येवं प्रमाणार्थे केचिद्व्याचक्षते ऽन्यथा ।

प्रमान्तरविरुद्धार्थमिमं ग्रन्थं यथोदितम् ॥१६९२॥

[Verses 1692-1699 are the argument of the *prima facie* view in Bhartṛprapañca's discussion.]

Though the meaning conveyed by the means of knowing¹ is thus established, some (thinkers) explain this (portion which is so far discussed) otherwise — that is, in a way that shows a meaning which is opposed to right meaning.¹ [1692]

¹Namely, *jñānād eva muktiḥ*.

न कर्म कारणं मुक्तेः क्षयिष्णुत्वसमन्वयात् ।
कर्मस्वेव नियच्छन्ति देवताश्च न मुक्तिदाः ॥१६९३॥
कर्माधिकृतिहेतुत्वादग्न्यादेर्देवतात्मनः ।

Activity is not the cause of liberation, because of its inherent relation to perishability. The deities bind down the sacrificer only to activities and they do not grant liberation, [1693] since the nature of Agni and others originates one's eligibility for an activity. [1694ab]

This indicates that, by mere doing ritual activity, one does not secure liberation.

नाप्युत्थायेह कर्मभ्यो ब्रह्म ज्ञातुं क्षमो नरः ॥१६९४॥

Not also, even after rising above ritual activities is a man is able to know the Brahman. [1694cd]

There are two arguments: (i) *karman* is inseparably connected with perishability, and (ii) gods are related to rituals alone — i.e. not to liberation. Cf. SP: *devatās tāvat karmādhikṛtāḥ karmasv evainam niyacchantīti bhāṣyeṇa ... dūṣayati* which seems to quote from Bhartṛprapañca's comment. Now, Bhartṛprapañca's third argument: Since one cannot give up ritual activity till the end of one's life, knowledge also does not effect liberation — this refers to the Śruti *tasya tāvad eva ciraṃ* which implies *yāvajjīvaṃ karmācāraḥ*.

प्रत्यगात्माप्यसंदृष्टो मुक्त्या नैवोपतिष्ठते ।
देवताज्ञाकरत्वेन ब्रह्मविद्या विरुध्यते ॥१६९५॥

And the inner self, (so long as it is) not seen,¹ would not (of itself) attend upon one, thanks to (one's) liberation². (Verily) the lore of the Brahman is opposed by one's doing the deities' commands.³ [1695]

This is Bhartṛprapañca's fourth argument.

¹It means: known in its true nature.

²That is, will not behave like a kind deity who would of itself grant some favour.

³It literally means: by one's being devoted to the performance of ritual as the commands of deities. This implies the impossibility of the combination of knowledge and ritual activity.

कर्मिणः कर्मशेषत्वं स्वाराज्यम् ब्रह्मवेदने ।

नातः समुच्चयान्मुक्तिर्नापि स्यात्सा विकल्पतः ॥१६९६॥

A performer of rituals is subordinate to ritual activity, whereas in knowing the Brahman, there is *svārājya*.¹ Therefore, liberation is not possible owing to the combination (of knowledge and ritual) — not from any option (among the above). [1696]

This verse justifies the statement of the impossibility mentioned in note 3 on the preceding verse.

¹It literally means: kingdom of heaven and indicates complete freedom.

सति ज्ञाने तदुभयं तत्तु नैवोपपद्यते ।

ऋणानि चानपाकृत्य कर्म त्यक्तुं न लभ्यते ॥१६९७॥

ऋणानि त्रीण्यपाकृत्येत्येवं च स्मृतिशासनम् ॥१६९८॥

एवं न कर्मतो मोक्षः कर्मणः क्षयवत्त्वतः ।

ज्ञानाभावान्न विज्ञानान्नोभाभ्यां तदसंभवात् ॥१६९९॥

(One might argue:) While there is knowledge of the inner self (on the part of one), the two (viz. knowledge and ritual activity) can be (adopted as the course of one's action); but that is not reasonable, for (ca) it is not possible to give up action without repaying the debts; [1697]

(indeed) such is the dictate of the Smṛti *ṛnāṇi trīṇi apākṛtya* ... [1698]

Thus, liberation does not result from (the performance of) action, for the reason that action itself has its destruction (and), in the absence of knowledge, there is not any possibility of liberation and from *vijñāna* and not from both, i.e. *samuccaya*. [1699]

This explains the word *atah*.

वीक्ष्यापन्नस्य तस्यैवं सामर्थ्यं ज्ञानकर्मणोः ।
उद्विभावयिषुः साक्षात्प्रवृत्तैषा परा श्रुतिः ॥१७००॥

Having thought (about) this thus distressed (person who desired liberation), the subsequent Śruti (becoming) desirous of creating (in him) the strength (or potentiality) of knowledge and ritual activity (for his achieving liberation) has itself proceeded further. [1700]

This begins Bhartṛprapañca's answer.

लोकमात्मानमेवेममुपासीतात्मविद्यया ।
इति स्यादर्थवत्त्वाय समाधिर्ज्ञानकर्मणोः ॥१७०१॥

One should worship this *loka* as the very Ātman, by securing the lore of the Ātman. Thus would be meaningful a proper combination of knowledge and ritual. [1701]

The idea is to point that one should perform the rituals but with the idea that it is for the pleasure of the Ātman, i.e. for securing oneness with the Ātman.

¹*samādhi* is usually translated as meditation. But here it stands for a proper (combination) — a purely etymological sense from the verb root *sam-ā-√dhā*.

द्वैतैकत्वात्मिकावस्था विरिञ्चाख्या परात्मनः ।
विज्ञानकर्माभिव्यङ्ग्या द्वैतत्वात्सा क्षयात्मिका ॥१७०२॥

There is the state of having oneness and duality (both) of the highest Ātman which is called Viriñca, which can be revealed by knowledge (*viññāna*) and (ritual) activity, and it is perishable because of duality. [1702]

अवस्था यान्भिव्यक्ता तस्यैव परमात्मनः ।
अविशेषात्मिका सास्य कारणत्वात्त्वनश्वरी ॥१७०३॥

But that condition of the same highest Ātman, which is not manifest and which does not have any differentiation as its nature, is imperishable owing to its being the cause of this (transmigratory world). [1703]

तत्रैवं सति लोके ऽस्मिन्द्वैताद्वैतात्मसंस्थितौ ।
द्वैतावस्थामुपास्ते यस्तस्यासौ क्षीयते ध्रुवम् ।
द्वैतत्वाद्यः पुनर्धीमान्कर्मावस्थां यथोदिताम् ॥१७०४॥
अव्यक्तावस्थामापाद्य सदोपास्ते परात्मना ।
न क्षीयते कर्म तस्याद्वैतत्वादेव कारणात् ॥१७०५॥

This being so, in this (world) consisting in duality and unity, he who worships the condition of duality of that (viz. the highest Ātman) certainly perishes. However, the intelligent one, who has effected the state of uniqueness from his (own) state of duality (viz.) the state of performing action,¹ as described (before), ever worships the same as the highest Ātman, does not perish, thanks to (his) action (proceeding) from only that non-duality (which is) the cause. [1704-1705]

The first two lines of verse 1704 point out the fault of the worshipper of duality; its third line and verse 1705 state the excellence of the worshipper of non-duality.

¹This is the same *dvaitāvasthā*.

ब्रह्मोपास्तिर्भवेदेवं कर्म चानुष्ठितं भवेत् ॥१७०६॥
व्यक्तं ससाधनं कर्म ब्रह्मभावेन पश्यतः ।
न क्षीयते कर्म तस्य सदैकात्म्यावसानतः ॥१७०७॥

Thus, there would be proper worship of the Brahman and

there would be the performance of action in the case of one who sees action together with all its means as the Brahman. The action of that (person) does not perish, since it has culminated into the uniqueness of the existent. [1706-1707]

The second line of verse 1707 explains away a possible objection, viz. the sentence *na hāsyā karma kṣīyate* is opposed to the entire Śruti teaching.

Verses 1708-1779 are the refutation of the meaning as proposed above by Bharṭṛ- prapañca in its various details.

हिरण्यगर्भविज्ञानकर्मणोः प्रथमः किल ॥१७०८॥
समुच्चयस्ततो ऽन्यो ऽयमव्यक्तब्रह्मविद्याया ।
व्यक्तसूत्रात्मविद्यायाः परो ऽप्येष समुच्चयः ॥१७०९॥

[In verses 1708-1737 there follows the refutation of Bharṭṛ-prapañca's theory of two *samuccayas*.]

The first combination is said to be (*kila*) that of the worship¹ of Hiranyagarbha and (ritual) activity. [1708]

And there is this another (secures) by knowing the Brahman as the unmanifest (Ātman) and this is another combination, viz. the knowledge about the Ātman as the manifest form of Sūtra (viz. Hiranyagarbha).² [1709]

These verses, viz. 1708-1709, state about the two *samuccayas*.

¹ *viññāna* here stands for Upāsanā.

² This is suggestive of the question: Which combination is understood in the sentence *ātmānam eva ...?*

द्वयोर्यथोक्तयोर्मध्ये कतरो ऽयं समुच्चयः ।
प्रथमो ऽथ द्वितीयो वा न न्यायो ऽस्त्युभयोरपि ॥१७१०॥

(The Siddhāntin observes:) There is no leading principle¹ for deciding which of the two combinations thus described is the first² (combination) or the second (combination). [1710]

This is to say: It is not clear as to which of the two combinations Bhartṛprapañca would like to hold as correct (or satisfactory).

¹ *nyāya* is here the leading principle.

² That is, superior or more significant.

प्रथमश्चेत्त्वयैवोक्तं क्षीयेते कामकर्मणी ।

निःशेषभोगभुक्तत्वात्कृत्स्नप्राप्त्या द्वयात्मनः ॥१७११॥

If (you were to hold) the first combination¹ (as more acceptable), then (remember what) you yourself have said, viz. desire and action perish, because there is fulfilment of all of the enjoyments² and (also) the obtainment of the entire fruit (viz. completeness) in the case of what comprises duality.³

[1711]

¹ Cf. verses 1714-1715ab below for the internal contradiction of the argument (*vyāghāta*).

² This refers to attaining to the status of the Sūtrātman.

³ This has a reference to Bhartṛprapañca's comment in respect of BU 3.2.12: *kim enaṃ na jahāti nāma*.

विशीर्यते ततः कार्यं कृत्स्नं च कारणं तथा ।

ततः क्षेत्रज्ञरूपस्य सर्वभोज्यातिलङ्घिनः ॥१७१२॥

केवलाज्ञानमात्रेण व्यवधानं परात्मनः ।

अप्राप्य परमात्मानमन्तराले व्यवस्थितिः ॥१७१३॥

Then, on account of that, the entire (world of) effect(s) perishes and so also the cause (of the same). Then there is the obscurity of the highest Ātman which is of the nature of the knower of the field, that transgresses all the enjoyables, owing to ignorance alone. And then, when one has not attained the highest Ātman, there is (for the devotee) the state which is (only) mid-way (i.e. between this transmigratory world and liberation).

[1712-1713]

इह त्वक्षितिरेवोक्ता भवता ज्ञानकर्मणोः ।

न हास्य क्षीयते कर्मेत्यस्माद्ध्येवेति चोक्तिः ॥१७१४॥

पूर्वोक्तरोक्तवचसोर्व्याहतिर्वः प्रसज्यते ।

But you have stated that there is here only absence of the destruction of knowledge and action on the basis of the statement of the Śruti *na hāsyā kṣīyate* ... [1714]

And thus there results contradiction between your earlier and later statements. [1715ab]

अथ द्वितीयो ऽभिमतो न तथाप्युपपद्यते ॥१७१५॥

Now, if you refer to the second (combination), then also, that does not stand to reason.¹ [1715cd]

¹This is explained in the few following verses.

फलं त्वयैव व्याख्यातं द्वितीयस्याः समुच्चितेः ॥१७१६॥
 द्वैतैकत्वधिया मृत्युं कामकर्मस्वलक्षणम् ।
 तीर्त्वात्मविद्यया विद्वानमृतत्वं समश्नुते ॥१७१७॥
 न हास्य क्षीयते कर्म यद्यत्कामयते ऽक्षरात् ।
 तत्तत्सृजत इत्युक्त्योः पूर्वोत्तरविरुद्धता ॥१७१८॥

You yourself have declared the result of the second combination, [1716]

(viz.) (in the statements:) (i) Having overcome death whose characteristic is in desire and actions by (securing) the knowledge of the uniqueness, oneness in duality, the knower obtains immortality by the lore of the Ātman,¹ [1717]
 and (ii) (the Śruti:) 'Indeed, his action does not perish.' (and) 'Whatever he wishes (for) from the imperishable, each of that it created.'² Between the two statements of the Śruti, there is contradiction between (what is said) earlier and (what) subsequently. [1718]

¹In the second line of the verse, Sureśvara uses the idea of *Īsopaniṣad* 11cd: *avidyayā mṛtyuṃ tīrtvā vidyayāmṛtam aśnute*.

²Sureśvara refers in verse 1718 to the text under question, i.e. BU 1.4.15; though he seems to quote, he is merely condensing the thought — this is noticed in his adding the word *akṣarāt* which does not at all occur in the passage under reference.

कामकर्मक्षये यस्मादमृतत्वं फलं श्रुतम् ।
यदा सर्वे प्रमुच्यन्त इत्येवं बहुशः श्रुतौ ॥१७१९॥

Since it is heard that immortality is the result when there is destruction of desire and action (as) in passages (like) *yādā sarve pramucyante ...*¹; thus it is many times declared in the Śruti. [1719]

¹ *Kāthopaniṣad* 6.14: *yādā sarve pramucyante kamā ye 'sya hr̥di śritāḥ*.

कथमेति स कैवल्यमक्षितौ कामकर्मणोः ।
कैवल्यावाप्तौ च कथं तयोरक्षितिरुच्यते ॥१७२०॥

How will he attain liberation (*kaivalya*), if there is no destruction of desire and action, and, if there is obtainment of liberation, how could there be stated non-destruction of the two (viz. desire and action)? [1720]

इतश्च व्याहतिः स्पष्टा ब्रह्मविद्या विरुध्यते ।
देवताज्ञाकरत्वेनेत्युक्तं यत्प्रणिधानतः ॥१७२१॥

From this also becomes clear the contradiction: It is stated (by you) that (a seeker) has to be following the dictates of the gods,¹ by devotedly doing which the lore of the Brahman is opposed. [1721]

This is another contradiction in the view of Bhartṛprapañca.

¹ Cf. verses 1582, 1664-1665 and 1695ff. above. The argument pertaining to the opposition between ritual performances and the lore of the Brahman.

ससाधनमिदं कर्म ब्रह्मभावेन पश्यतः ।
तदेव ब्रह्मविज्ञानं कथं नेह विरुध्यते ॥१७२२॥

How does the knowing about the Brahman not become contradicted while one is seeing this ritual activity together

with its means as becoming the Brahman?

[1722]

पूर्वं कृत्वाथ तत्कर्म पश्चाद्ब्रह्मात्मनेक्षते ।
व्युत्थाय कर्मणः कृत्स्नान्मोक्षाशंसेति चेन्मतम् ॥१७२३॥
एवं समर्थ्यमाने ऽपि न मुक्तिः कर्मणो भवेत् ।
व्युत्थितस्यैव कर्मभ्यो मुक्त्यभ्युपगमत्वतः ॥१७२४॥

If it is held: Having first done (ritual) activity, one sees later the Brahman in the form of one's own inner self and then after having risen above all action there is the expectation of liberation,

[1723]

(then the answer is:) Even when (this opinion) is being justified thus, there would not be effected release from ritual activity, because liberation is held to result only for one who has risen above ritual activities.

[1724]

These verses pertain to the contradiction between ritual performance and achieving liberation in relation to time.

अथ गार्हस्थ्य एवायं कर्मकाले विभिन्नधीः ।
कर्म कृत्वाथ तच्छान्तौ कर्म ब्रह्मेति वेत्स्यति ॥१७२५॥
एवं समादधानस्य कामितो ऽर्थो न सिध्यति ।
पराधीनमृतेर्जन्तोर्मुक्तिः स्यात्पाक्षिकी यतः ॥१७२६॥

(One would argue:) In the state of a householder only, this one entertains different notions¹ at the time for ritual activity and later, having performed (that) ritual activity (and having secured) the removal of that², he will know that ritual activity is the Brahman.

[1725]

The counterargument is: (But even) while you are thus explaining, your desired end will not be secured; since there would be the only optionally (possible) liberation for one who has come into being on account of a death that is dependent on another.³

[1726]

¹It literally means: possessing notion of the differentiated world.

²*tacchāntau = vibhinnadhīdvamse sati.*

³This is explained in the following verse.

भेदं पश्यन् यदि मृतो बद्ध एव भवेन्नरः ।

कर्म ब्रह्मेति संपश्यन् मृतश्चेद्ब्रह्मसाद्भवेत् ॥१७२७॥

If a man dies while seeing (this) duality, he will be only tied (to the transmigratory world); (but) if he died seeing the ritual activity as the Brahman, he would be one with the Brahman.

[1727]

भेददृष्टेर्बलीयस्त्वात्तस्याः स्वाभाविकत्वतः ।

इच्छातश्चापि भाव्यत्वात्तदापि स्यान्न निर्वृतिः ॥१७२८॥

Because seeing of duality is stronger (than seeing of that oneness); because (that is only) natural (for one) and that seeing would be resulting from desire, therefore, then also there would not at all be liberation (possible).

[1728]

This sets aside the possibility of an optional achieving of liberation.

कुर्वाण एव चेत्कर्म कर्म ब्रह्मेति पश्यति ।

देवताज्ञाकरत्वेन ब्रह्मविद्या विहन्यते ॥१७२९॥

इत्युक्तिर्वो विरुध्येत पूर्वोत्तरविधाततः ।

अपास्तदेवतात्यक्तद्रव्यं कर्मापि दुर्घटम् ॥१७३०॥

If he sees action as the Brahman, indeed while performing ritual activity; his knowing of the Brahman would be obstructed by (his) following the dictates of the god(s) — this your statement would stand opposed owing to the contradiction between (your) earlier and subsequent (statements) and ritual activity, wherein the material offered to the deity is set aside, would also be difficult to perform.

[1729-1730]

त्यक्तद्रव्यादिसंभेददृष्ट्यैव नियततवतः ।

यागादिकर्मणस्तस्मादसमीचीनमुच्यते ॥१७३१॥

ससाधनमिदं कर्म ब्रह्मैवेति समीक्षणम् ।

ईदृङ् न लोके वेदे ऽपि प्रसिद्धं कर्म कुत्रचित् ॥१७३२॥

Since the (varied) action in sacrifice and (any other) activity is controlled only with their differences regarding the offered material etc. in view; therefore, what is stated in (your view) is unreasonable.

[1731]

And this view, viz. (all) this action, together with its means, is the Brahman itself, is not known anywhere in the world and in the Veda also.

[1732]

आत्मानमित्यतो वाक्यात्कर्मैदृक्चेत्प्रसेत्स्यति ।
वाक्यभेदप्रसङ्गत्वान्नैवमप्युपपद्यते ॥१७३३॥

Therefore, if from the statement of the Śruti *ātmānam* ... the seer of such an action is established (as successful in achieving liberation), there would result the (undesirable fault called) Vākyabheda, therefore, this way also¹ (your view) would not stand to reason.

[1733]

¹Vākyabheda 'diversity of statements'; the fault occurs when a sentence conveys two senses against the accepted principle that one sentence must convey only one particular sense. Jaimini's rule is: *arthaikatvād ekam vākyaṃ*. The next verse explains the Vākyabheda.

एवंविधस्य कर्मत्वमपास्ति चात्मनस्तथा ।
उभयं विदधद्वाक्यं भिद्येतैव न संशयः ॥१७३४॥

The sentence, which is (seen) prescribing both, viz. the nature of ritual activity of this type and also the worship of the Ātman, would be a split sentence.¹ There is no doubt about this.

[1734]

¹For, it conveys two diverse statements at one time.

ब्रह्मार्पणमिति वचो यथोक्तेनैव वर्त्मना ।
निर्धारितार्थं जानीयात्स्फुटन्यायसमाश्रयात् ॥१७३५॥

One should know that the statement *brahmārpaṇam* ...¹ will have its meaning established by the very way stated.²

has resorted to the very clear leading principle.³ [1735]

¹Cf. *Gītā* 4.24ab: *brahmārpaṇam brahma havir brahmāgnau brahmaṇā hutam*.

²That is, without involving a Vākyabheda.

³Cf. verse 1733cd above.

पूर्वाभ्यामन्य एवायं तृतीयश्चेत्समुच्चयः ।
श्रुतौ स्मृतौ वा लोके वा सिद्धश्चेदस्तु नान्यथा ॥१७३६॥

If one were to say that there is this third combination (which is) different from the first two (that you have posited), let the combination be such as is accepted, i.e. known, in the Śruti or Smṛti or the world; (it can) not (be accepted as) otherwise. [1736]

This has a reference to the third *samuccaya*, viz. the combination of ritual and worship of the Ātman. It is implied that such a combination is totally unknown.

तस्मादसदिदं गीतमात्मानमिति यद्वचः ।
तत्समुच्चयसिद्ध्यर्थमित्येतच्चोक्तयुक्तिः ॥१७३७॥

Therefore, what you have said (lit. sung) is all false and also the statement *ātmānam* ... (which you had adduced) for establishing that combination is wrong just on account of the reason (already) stated.¹ [1737]

This concludes the refutation of Bhartṛprapañca's explanation of the sentence *ātmānam eva* ... by resorting to the different *samuccayas* mentioned above.

¹This refers to the fault of Vākyabheda.

कार्यलिङ्गसमुच्छित्तिः फलं नाद्यसमुच्चितेः ।
युक्त्या कल्पयितुं शक्यं श्रुतिवाक्यविरोधतः ॥१७३८॥

It is not possible, by any reason, to think that from the first combination follows the result, viz. the destruction of the *linga*¹

or the effect², because of the opposition (to that) by the statement in the Śruti.³ [1738]

¹That is, *sūkṣmadeha* 'subtle body'.

²That is, gross body.

³This is explained in the next two verses.

द्वैतैकत्वात्मविज्ञानकर्मानुष्ठायिनः पितुः ।
पुत्रे न्यस्तात्मभारस्य मरणात्परतः फलम् ॥१७३९॥
पृथिव्यै चैनमित्यादि त्र्यन्नात्मावाप्तिलक्षणम् ।
श्रूयते स्पष्टवचनं देहादेर्नाशनं कुतः ॥१७४०॥

[Verses 1739-1752 refute Bhartṛprapañca's theory about the destruction of gross and subtle bodies of an individual by the first *samuccaya* posited by him.]

In the case of a father, who is performing ritual activities from the knowledge about the uniqueness of the Ātman in all this duality and also who has transferred his own responsibility unto a son, the result (viz. liberation) is far away, it is (obtained) after death. [1739]

And a very clear statement is heard in *pr̥thivyai cainam* ...¹ which indicates the obtainment of the nature of the three foods; how can then there be the destruction of the body etc.? [1740]

¹This refers to BU 1.5.18: *pr̥thivyai cainam agneś ca daivī vāg āviśati*.

न चाप्यतिक्रमार्थत्वं जय्य इत्यस्य युक्तिमत् ।
तस्याविशतिवाक्येन विरोधादेव कारणात् ॥१७४१॥

And the statement *jayya* ...¹ is also not reasonable in the case of a person for transgressing (the worldly existence) lest it might be contradictory with the statement *āviśanti* ...² [1741]

¹Cf. BU 1.5.16: *putreṇaivāyam loko jayyah*.

²Cf. *agneś ca daivī vāg āviśati*. This points out that the word *jayya* does not refer to only 'transgressing', but it means 'obtaining'

or 'reaching up to'.

मतं त्र्यन्नात्मसंप्राप्तेरुर्ध्वं भोगस्य भुक्तिः ।
 सामर्थ्यात्कल्प्यते कार्यं प्राणानां नाशनं पितुः ॥१७४२॥
 नैवं स्याद्ब्रह्मबोधस्य निष्फलत्वप्रसङ्गतः ।
 विद्याफलस्य संप्राप्तेः प्रागपि ब्रह्मबोधतः ॥१७४३॥

(One might argue: It is) held that the destruction of the father's¹ *prāṇas*² is (i.e. can be) imagined with propriety after the enjoyment of pleasure after (a sacrificer first) attained the nature of the three foods. [1742]

(In answering, this is said: It would) not (be) so, because there would arise the contingency that the knowledge of the Brahman becomes purposeless, for (in that case) one would have achieved the fruit of knowledge³ even before one had (actually) obtained the knowledge of the Brahman. [1743]

¹That is, Prajāpati's.

²These are subtle sense-organs, signifying his body.

³That is, the destruction of two bodies, viz. subtle and gross.

संसारानर्थनाशो हि विद्यायाः प्रार्थ्यते फलम् ।
 विद्यामृते ऽपि तच्चेत्स्याद्ध्रुवं विद्या निरर्थिका ॥१७४४॥

They desire from the lore (of the Brahman) the destruction of the undesirable transmigratory world as the fruit, if that would be obtained even without knowing (the Brahman), it is certain that the lore (of the Brahman) becomes purposeless. [1744]

ध्वान्तनाशो ऽथ विद्यायाः कार्यं चेदभिधीयते ।
 सर्वानर्थस्य नष्टत्वात्किमन्यत्स्यात्तमोहुतेः ॥१७४५॥

If it is said that destruction of darkness is to be the effect (to be achieved by) the knowledge of the Brahman, (we ask,) what else would there remain after the absence (lit. concealment) of darkness, for, already all the undesirable would have been destroyed? [1745]

This verse presupposes the argument that the destruction of ignorance is the second result of the lore of the Brahman, the first being the acquisition of the knowledge about the Brahman.

उत्खातदन्तोरगवदविद्या किं करिष्यति ।
विद्यमानापि विध्वस्ततीव्रानर्थपरंपरा ॥१७४६॥
कामकर्मादिविध्वस्तौ नाविद्यानर्थभुक्तये ।
प्रतीचो ऽलमृते कार्यं कारणं न हि कारणम् ॥१७४७॥

What would darkness do, (when it is) like a serpent whose tooth has been extracted? The one,¹ even though existing, would have its strong chain of undesirables destroyed, [1746] (for), ignorance is not able to produce experience of the undesirable in the case of an individual when desire, action etc. are destroyed. (Indeed) there is not any such means (of enjoyment) as is a means without an effect. [1747]

These verses presuppose an objection: Knowledge about the Brahman is obtained from the lore of the Brahman but ignorance has still remained. Would it not cause transmigration for a student of that lore?

¹Namely, *avidyā*.

विद्यमाना पुनः कामं कर्म चापि प्रवर्तयेत् ।
अविद्येति मतं चेत्स्यान्नैवमप्युपपद्यते ॥१७४८॥
अविद्या विद्यमाना चेच्छक्तोत्पादयितुं बलात् ।
नाशकद्रक्षितुं नाशात्कथं ते कामकर्मणि ॥१७४९॥

If it be held that when ignorance continues to exist, it would incite desire and also action; (then the answer is,) this also is not reasonable — [1748]

If ignorance that continues to exist (or, were to be able) to create (desire and action) per force, how then it was not able to protect the desire and action from being destroyed? [1749]

This means: *avidyā* cannot again produce *kāma* and *karman* which

are destroyed by the knowledge of the Brahman.

अथ कारणसंसर्गो नाशशब्देन भण्यते ।

सर्वान्प्रत्यविशिष्टत्वात्फलं तन्न समुच्चिते ॥१७५०॥

Now, if it is held that the contact (of an effect) with the cause is expressed by the word *nāśa*,¹ then, that would not be the (real) result of (the first) combination, since (that) would not be unrelated to all, not specified (with respect to some objects only). [1750]

¹This presupposes that the first combination does not bring about complete destruction of *kāma* etc., some of it combining to exist.

तस्मात्संघातविध्वंसो निर्युक्तिक इहोच्यते ।

अथ सत्यपि संमोहे संघातश्चेद्विशीर्यते ॥१७५१॥

देहहेत्वन्तराभावाद्भूयो ऽपि विफलैव धीः ।

आनर्थक्यं ब्रह्मधियो न च युक्तं कथंचन ।

निःशेषोपनिषत्काण्डनैरर्थक्यप्रसङ्गतः ॥१७५२॥

Therefore, the destruction of an aggregate is here postulated without any (logical) reason. Now if (it is held) that an aggregate it would get destroyed while there is ignorance, then, owing to the absence of any other cause (for a creation of a) body, once again, the knowledge (of the Brahman) would (have to) be (considered as) useless. But the uselessness of the knowledge of the Brahman is in no way accepted as reasonable; for, (if that were accepted), there would be the contingency (of accepting) the meaninglessness of an entire section (of the Veda called) the Upaniṣad.¹ [1751-1752]

¹This refers to all the Vedānta texts among the Vedic works.

अपि च ध्वस्तनिःशेषकार्यप्राणादिसाधनः ।

श्रवणादि कथं कुर्याद्ब्रह्मविद्योपलब्धये ॥१७५३॥

[Verses 1753-1763 present Sureśvara's refutation of the opinion

of Bhartṛprapañca that, being, which is mid-way between liberation and transmigratory existence after the destruction of its subtle and gross bodies, undertakes *śravaṇa* etc. (or worship of the Ātman).]

And, further, how can one, whose entire means of ritual activities, viz. *prāṇa* etc. are destroyed, perform hearing etc. for obtaining the knowledge of the Brahman? [1753]

वैराग्यातिशयार्थत्वाद्गौणं चेन्नाशनं मतम् ।
स्वव्याख्यानविरोधित्वान्नैवमप्युपपद्यते ॥१७५४॥

If it is held (by you) that, owing to its being (necessary) for (effecting) the excellence of detachment, there is (posited the opinion regarding) the destruction (of two bodies); that (lit. thus thinking) also, it is not reasonable because (that would involve) contradiction to your own explanation. [1754]

अत्रैव संनिमज्जन्ति प्राणाः सर्वे स्वकारणे ।
मृतः शेते स आधमातो जीवतैतद्विरुध्यते ॥१७५५॥
फलं चैतत्त्वयैवोक्तं प्रथमायाः समुच्चितेः ।
तस्मान्न जीवतो वाच्यं गौणं विशरणं त्वया ॥१७५६॥

Here all the sense-organs (*prāṇas*) merge into their own cause and then a human being lies dead; then he is inflated by a living one¹ — (all) this is contradictory. And (listen), you yourself have stated this as the result of the first combination; therefore, it should not be argued by you that the destruction of a living body is (but) secondary. [1755-1756]

¹SP and NKL report that the principal part of this verse (up to *jīvata*) is Bhartṛprapañca's comment on the third chapter.

अत्रैवेति फलं चोक्त्वा प्रथमायाः समुच्चितेः ।
व्युत्थितस्याखिलाद्भोज्यान्नाममात्रावशेषिणः ॥१७५७॥
परमात्मापरिज्ञानमात्रयानाप्तनिर्द्वयः ।
ब्रह्मविद्यात आरब्धा ब्रह्मविद्यानिवृत्तये ॥१७५८॥
एतत्त्वदीयम् व्याख्यानं तद्विरुद्धमिदं वचः ।

संघातस्य विशरणं जीवतश्चेति दुःस्थितम् ॥१७५९॥

Having stated in the words *atraiva* the result of the first combination in the case of the one who has risen above the entire (collection of) the enjoyables (or eatables); i.e. who has remained only in name; [1757]

one who has not obtained the (Ātman) without duality through only ignorance about the highest Ātman, the lore of the Brahman, is begun for the removal of the ignorance about the Brahman — [1758]

This is your explanation and opposed to that is this your statement, viz. there is disintegration (or flittering) of the aggregate (of *prāṇas*) and, at the same time, of a living one — all this is ill-stated. [1759]

Verses 1757-1758 present a gist of Bhartṛprapañca's comment on the third chapter — this is according to SP and NKL.

निषिद्धषड्विकारस्य श्रुत्यैव परमात्मनः ।

अविद्या तद्विकारश्च न युक्तस्तूषरादिवत् ॥१७६०॥

But it is not reasonable (to hold) that ignorance and this modification belong to the highest Ātman whose six modifications are denied by the Śruti itself — it¹ is like (ascribing the existence of water in) a barren land etc. [1760]

¹ Namely, saying that *avidyā* is a modification of the Ātman (as holds Bhartṛprapañca), will be like saying 'there is water', even while there is only a barren land.

हिरण्यगर्भद्वारैव मुक्तिरित्यपि यद्वचः ।

तस्यापि दूषणं ज्ञेयं यथोक्तन्यायवर्त्मना ॥१७६१॥

As to the statement, viz. there results liberation through (the knowledge of) Hiranyagarbha, there also is to be understood a blemish in the way of the leading principle which was argued. [1761]

This is explained in the next verse.

¹This has a reference to the Śruti *tad yo yo devānām ...*

हिरण्यगर्भवद्यस्मात्क्रिम्यादेरपि संगतिः ।

ब्रह्मात्मलक्षणासाधवी तेनेयं कल्पना कृता ॥१७६२॥

Since in the case of insects etc. also there would be the same situation, viz. they are characterized by being of the nature of the Brahman, as in the case of Hiraṇyagarbha, therefore (you have) conceived a wrong notion. [1762]

In first three *pādas* of this verse, there is, according to SP, the leading principle mentioned earlier in SV.

संसारिताविशिष्टैव मोक्षादर्वाक्षु भूमिषु ।

ब्रह्मा विश्वसृजो धर्म इत्यादिवचनान्मनोः ॥१७६३॥

In the lower states (of beings) before the state of liberation the nature of being transmigratory is not something special (or uncommon with Hiraṇyagarbha) — this, on the basis of Manu's statement *brahmā viśvasṛjo dharmah ...*¹ [1763]

This refutes the possible argument: All *jīvās*, except Sūtra, cannot attain liberation. But all of them have to be experiencing the results of the performance of Dharma.

¹*Manusṛti* 12.15.

विद्यां चेत्यादिमन्त्रो ऽपि न समुच्चयबोधकः ।

परस्परविरोधित्वान्न सहावस्थितिस्तयोः ॥१७६४॥

[Verses 1764-1770 point out that *vidyām ca* and *sambhūtim ca* do not have *samuccaya* as their purport.]

And even the Mantra, *vidyām ca ...*¹ is not conducive to the understanding of a combination; they (*vidyā* and *avidyā*) cannot exist together, for, (their stay together would) involve mutual contradiction. [1764]

¹Cf. *Īsopaniṣad* 11ab; *Maitrāyaṇyupaniṣad* 7.9.

क्त्वायोगात्पूर्वकालत्वमविद्यायाः प्रतीयते ।
 स्वाभाविकं कर्म मृत्युर्विद्या शास्त्रीयमुच्यते ॥१७६५॥
 मृत्युः स्वाभाविकं ज्ञानं शास्त्रीयं संभवस्तथा ।
 शास्त्रीयेणेतरत्तीर्त्वा विद्ययामृतमश्नुते ॥१७६६॥

From the use of suffix *-ktvā* it is understood (or seen) that ignorance belongs to some earlier moment of time. Performance of natural action is called Death. And (actions) prescribed by Śāstra is called *vidyā*. [1765]

Death consists in natural knowledge and birth in that (which is) acquired from Śāstra; one, having crossed over everything else (than Śāstra) by means of Śāstra, obtains immortality.

[1766]

The first line explains the word *mṛtyu* in *vināśena mṛtyum tīrtvā*; the second, the word *sambhūti* in *sambhūtim ca vināśam ca*; cf. *Īsopaniṣad* 14.

नाविरतो दुश्चरितादिति चागमिकं वचः ।
 तपसा कल्मषं हन्ति विद्ययामृतमश्नुते ॥१७६७॥

It is not that a person has not stopped from ill-action — such is the statement from the Āgama.¹ He destroys the ill by means of penance and attains immortality by knowledge. [1767]

¹This is *Kaṭhopanīṣad* 2.24.

तस्मात्समुच्चयाशेह कार्या नाक्षरसंश्रयात् ।
 अप्रमाणं ब्रुवाणस्तु नास्माभिर्विनिवार्यते ॥१७६८॥

Therefore, one should not entertain here¹ a hope (to prove that there is combination) by resorting to Śruti (texts, lit. letters) as the authority, and, one who declares unauthoritative (these) theories, is not refuted (lit. warded off) by us.² [1768]

This concludes the refutation of *samuccaya* proposed by Bhartr-
 prapañca.

¹That is, in respect of liberation.

²That is, we pay no heed to him.

तस्माद्व्युत्थाय कर्मभ्यः प्रत्यक्प्रवणबुद्धयः ।

प्रत्यग्याथात्म्यविज्ञानान्निर्वान्तीत्येष निश्चयः ॥१७६९॥

Therefore, having risen above ritual activities, those who have their intellect inclined towards the inner self, put an end to (the transmigratory existence) by means of the knowledge of the true nature of the inner self. This is the decision. [1769]

This is Sureśvara's assertion of his own positing consequent upon the few preceding verses.

अपुण्यपुण्योपरमे यं पुनर्भवनिर्भयाः ।

शान्ताः संन्यासिनो यान्ति तस्मै मोक्षात्मने नमः ॥१७७०॥

Salutation to him whose nature is liberation and whom approach they who have renounced all action, who are calm (in mind), who are not afraid of re-birth and (who are in the state) in which merit and demerit have ceased to exist.

[1770]

न चेह लोकशब्देन कश्चिदन्यो ऽभिधीयते ।

परात्मनः स्वशब्देन विशेषणसमन्वयात् ॥१७७१॥

[Verses 1771-1779 point out the want of reason in understanding from *ātmānam eva lokam upāsita* the world of Hiraṇyagarbha as the result of ritual activity.]

Further, none else (than the Ātman) is expressed by the word *loka* in this (passage), for, there is the proper connection of the qualifier, the word *sva*, (only) with the highest Ātman.

[1771]

SP and NKL point out that, by not understanding the word *loka* in the sense of the highest Ātman, one would invite two undesirable faults: *prakṛtahāni* and *aprakṛtaprakriyāpāta*.

आत्मानमेवेति तथा चात्मशब्दो विशेषणम् ।
 लोकस्य ग्रहणं तस्मान्न कर्मसमवायिनः ॥१७७२॥
 विद्याप्रकरणे चोर्ध्वमात्मनैव विशेषणात् ।
 येषां नो ह्ययमात्मेति कार्यलोकनिवृत्तये ॥१७७३॥

And also (the phrase) *ātmānam eva* ... and the word *ātman* are qualifiers.¹ Therefore, the use of (the word) *loka* is not in respect of one who is inseparably associated with ritual activity [1772]

and because, later,² in the context of knowledge, there is specification by the words *ātmaiva* and by the phrase *yeṣāṃ no hy ayam ātmā*, with a view to the removal of (the word) *loka* which (has the sense of what is) of the nature of some effect.³ [1773]

¹ Add: of *loka*. SP gives reason for this: (In language) *sva* and *ātman* are synonymns.

² Cf. BU 4.4.22: *sa vā eṣa mahān* and *yeṣāṃ no* ('*yam ātmāyam lokah*).

³ This doing avoids *pūrvāparavirodha* (internal contradiction). Here SP adds: *saṃdigdhasya vākyaśeṣān nirṇayo bhavatīti nyāya(h)*— this is implied by *hi*.

अस्माद्ध्येवेति लिङ्गाच्चेल्लोको ऽन्यः स्यात्परात्मनः ।
 स्वलोकस्यार्थवादत्वान्नैवमप्युपपद्यते ॥१७७४॥

If it be held that *loka* is distinct from the highest Ātman on the basis of the *liṅga*, viz. *asmād dhy eva* ..., this also is not reasonable, because the word *svaloka* is an Arthavāda 'eulogistic statement'. [1774]

The basis of this verse is an argument: The word *loka* is not in the sense of the highest Ātman, since it occurs in the context of the origin of the desired fruit and is therefore a *liṅga* 'indicator' of the fruit). This is refuted on the ground that the sentence *asmād dhy eva* ... is an Arthavāda and therefore the word *loka* is an 'indicator' in the Arthavāda and, as such, it cannot prove

stronger than the context, viz. that of *mokṣa* 'liberation'. Cf. SP: *arthavādaṣṭhaṃ liṅgaṃ na prakaraṇād balavat[taram]*.

साधनान्तरसंभाव्यं यावत्संभाव्यते फलम् ।
कृत्स्नं तदात्मनो लोकात्सिद्धमस्येति नूयते ॥१७७५॥

Whatever result is imagined as what is to be produced by other means (also), all that gets established from *loka*, the Ātman (for this one¹) — so is it² praised. [1775]

This explains the character of *asmād dhy eva ...* as an Arthavāda.

¹Namely, the knower of the Ātman.

²That is, *svaloka*.

यो ऽकाम वाक्येन ह्ययमेवार्थ उच्यते ।
सर्वं कर्माखिलमिति स्मृतेरपि शुभं वचः ॥१७७६॥

This very thought is expressed by the sentence *yo 'kāmaḥ ...*¹ and, further, there is also an auspicious² statement of the Smṛti *sarvaṃ karmākhilam (pārtha jñāne parisamāpyate)*.³ [1776]

¹Cf. BU 4.4.6: *yo 'kāma āptakāma āptakāmaḥ*.

²*śubham* indicates the sense of it: All action is significant (lit. great).

³*Gītā* 4.33cd.

यद्यकृत्स्नो ऽपरिज्ञानाज्ज्ञानात्कात्स्न्यं समश्नुते ।
आत्मशब्दप्रयोगो ऽयं तदा लोके समञ्जसः ॥१७७७॥

If (*loka* is incomplete owing to the incomplete) knowledge (about its meaning) and which attains completeness by means of (complete) knowledge (of its context), (only) then this use of the word *ātman* would be reasonable in relation to *loka*.

[1777]

This explains the purpose of the *sāmānādhikarāṇya* of *loka* and *ātman*, for, that (viz. *sāmānādhikarāṇya*) makes the meaning of *loka* clear.

अन्यथाव्याकृतावस्थाल्लोकदिति वदेच्छ्रुतिः ।
ब्रह्मलोकनिरासार्थं वचः स्यात्सविशेषणम् ॥१७७८॥

Otherwise, the Śruti would have said 'from the *loka* in the unmanifest state' and the statement would have been worth specification for setting aside the thought of the sphere (i.e. state) of the Brahman. [1778]

This is later on mentioed in BU BU 4.3.32 and 33.

नान्यस्मिन्प्रकृते ऽन्यो ऽर्थो विरह्य्य विशेषणम् ।
ग्रहीतुं सुधिया शक्यो वैश्वानरवरादृते ॥१७७९॥

It is not possible for an intelligent person to accept any meaning other than that which is relevant by setting aside its qualifier except with the boon (received through) the favour of Agni¹. [1779]

¹This is once again a reference to Bhartṛprapañca's having won a boon from Fire. But, this time, Sureśvara is more penchant. He almost ridicules Bhartṛprapañca for having understood *loka* in the sense of Sūtrātman and this involved internal contradiction — through Agni's favour(!)

Verses 1780-1805 explain the meaning of BU 1.4.16.

उक्तेन वचसा तावत्स्वाराज्यं विदुषो ऽवदत् ।
कथं नूपकरोत्यज्ञो देवतादीनिति भण्यते ॥१७८०॥

[In verses 1780-1793, Sureśvara explains how a non-learned person serves gods etc.]

To begin with, the Śruti has declared the *svārājya* 'kingdom of heaven' (for a knower of Brahman) by the earlier portion of the text (lit. statement¹). Now is stated (an answer to the question:) 'How indeed does an ignorant person serve gods and others?'. [1780]

¹That is, *ātmānam eva* ... This points to what is discussed in the previous section of the Vārtika, viz. 'the learned attains *svārājya*'.

वर्णाश्रमाभिमानी सन्नतत्त्वज्ञः पराङ्मतिः ।
कानेषो ऽवति पशुवत्कर्मभिः कैश्च सर्वदा ॥१७८१॥

How does this person who has a pride in his caste and order of life and who does not know the true nature of that (Brahman) and whose thought (mind) is directed away (from the Brahman), ever render service¹ like an animal? (and) by what actions? (and) whom? [1781]

The question in the second line of verse 1780 is amplified here.
¹This is the meaning of the verb root \sqrt{av} 'to favour, to be of service to' (Vedic usage).

सर्वेश्वरेशिता तावत्पूर्वश्रुत्योपवर्णिता ।
यथा त्वज्ञस्य पारार्थ्यं तथेदानीं प्रपञ्च्यते ॥१७८२॥

As regards the mastery of the ruler of all, it is declared in (lit) the earlier Śruti;¹ now, in the same way is explained at length the subservient character of an ignorant man. [1782]

¹Cf. BU 1.4.10; BUBV 1571ff.

अज्ञातात्मा ह्यविद्योत्थसंघातो देहलिङ्गवान् ।
आत्मलोकाभिधानाभ्यां देहान्तो ऽत्राभिधीयते ॥१७८३॥

This one, who has not known the true nature of the Ātman, who is a conglomeration which has arisen from ignorance and is, as such, possessed of a (gross) body and a subtle (body), and is inside all these bodies, is mentioned here by the two names Ātman and *loka*. [1783]

यागादिकार्यं देवादेर्देहलिङ्गद्वयादृते ।
नान्यथा युज्यते यस्मादतस्तद्वानिहोच्यते ॥१७८४॥

Since the performance of action such as a sacrifice etc. cannot be extended unto the gods except with the two bodies, gross and subtle, therefore, here is mentioned here¹ the one who is possessed of that². [1784]

¹That is, in the sense *atho ayam vā*.

²This refers to *dehalingadvaya*.

कर्मणानार्जितो यस्मान्न कश्चिदुपकारकृत् ।
गृही देवादिभिस्तस्मादार्जितो ऽभूत्स्वकर्मभिः ॥१७८५॥

Since no householder that renders service (to gods and others)¹ is obtained by gods and others, unless he is obtained² by (his earlier) ritual performance, therefore (the sacrificer) came to exist by his own performances. [1785]

This points out: *aśeṣaprāṇikamārjito dehadvayavān eva sarvabhogasyatayā lokādiśabdārthaḥ* (SP).

¹That is, a sacrificer, others refer to the *pitṛs* and the *ṛṣis*.

²That is, he has come to exist as a human being possessing a gross body (after he possesses) a subtle body.

देवादयो ऽपि गृहिणा तद्वदेव स्वकर्मभिः ।
आर्जिता एव विज्ञेयास्तन्निमित्तफलेक्षणात् ॥१७८६॥

And gods and others also are obtained¹ by a householder in the same way; i.e. by his own performances; this should be known since there is noticed the result of that cause².

[1786]

¹*ārjitāḥ* = *ā-arjitāḥ*; *ā* is not absolutely necessary.

²That is, *svakarma*.

कर्त्रेह यत्कृतं कार्यं तद्भोगायावकल्पते ।
अकृताभ्यागमो यस्मात्कृतनाश्च नेष्यते ॥१७८७॥

Whatever action is performed by an agent, it results into his¹

enjoyment because it is not desired to accept what is not produced and the annulment of what is produced. [1787]
